Mr. WOODRUM. I heartily agree with the gentleman. My suggestion to this subcommittee and the full committee was that a straight 10 per cent reduction be made in every check going out of the Federal Treasury. I believe, Mr. Chairman, everybody who draws a check from the Federal Treasury ought to help. I do not think it is an unreasonable request. If it is $10 he ought to give $1; if it is $100 he ought to give $10 to help put Uncle Sam back on a pay-as-you-go basis. The Government owes a duty to its soldiers, and I would be the last man in this House to stand here and advocate taking anything away from the veterans to which they are entitled, but what about the hundreds of thousands of veterans who are not disabled, not drawing a penny from the Federal Treasury? You saw them, thousands of them, as they paraded this city last year, begging for work, asking only what every American citizen ought to have as his birthright, that is, an opportunity to earn a living by the sweat of his brow. We owe a duty to that class of men, and the first step in the accomplishment of that duty is to put this Government back on an economically sound basis, to balance the Budget, in order that business may go forward and industry and commerce pick up, that confidence may be restored, that factories may again open and the railroads begin to operate and everybody in the country consequently benefits. [Applause.]

I know it is an unpleasant thing to reduce the salary of anybody. I do not like to do it to anybody else, and I do not like to have it done to me. Undoubtedly many of the veterans will not like it now; but a year or two from now I am going to call the CONGRESSIONAL RECORD of to-day to witness that probably if the veterans and their responsible leaders in the House and out of the House had been willing, from the standpoint of strategy, if no other, to agree to this proposition which I have made, they would be better off in the long run.

Now, as I look at some of you, I realize you are well versed in the tactics of military strategy. When you were over across the sea and had your boys lined up behind you and were starting out on a certain objective, if the weather was very bad and the enemy fire was concentrated and withering on your troops and you stood a chance of taking a terrific loss to your men, what did you do? You did what every wise general would do. You took a very hasty and a very polite and a very orderly retreat until weather conditions were more favorable. In this condition of economic stress in which we are living to-day, when the country is demanding a reduction in public expenditures, I say to you that the generals of the army of the veterans should put into play a little of their military strategy and make a little concession of this kind and allow Congress to say to the country that the veterans as well as every other branch of the Federal Government contributed to bringing back a condition of sound economic stability in this country.

When conditions improve and times get better, much of the stress that is being brought to bear upon you now for drastic and revolutionizing reductions of veterans' compensation will be passed.

Mr. LUCE. Mr. Chairman, will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. LUCE. The gentleman expressed himself on a matter that has my complete sympathy, but he did not go quite to the point I was trying to make, namely, that every veteran in receipt of a benefit from the Government has had his receipt increased by the march of events in the last three years so that he is now receiving from 10 to 30 per cent more than the Government ever meant to give him. This is by reason of the change in the purchasing power of the dollar; and I trust that to the considerations the gentleman from Virginia has advanced he will also add the fact that we are basing our action in this matter not only upon an appeal to the generosity of those receiving benefits but in part upon the fact that in reality we shall not have taken away from them one cent of the purchasing power that was given to them by the law.

Mr. SWING. Mr. Chairman, will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. SWING. I am interested in the gentleman's proposal, and I should like to get his idea as to whether the proposal he has here outlined, which I think is deserving of serious consideration, would be, if adopted, a substitute for a suggestion which has come from another source to throw the entire burden of veterans' economies upon certain selected groups who would have to bear it all.

Mr. WOODRUM. The suggestion I have made was made to the subcommittee in the form of language furnished to me by the parliamentarians of both the Veterans' Administration and the House of Representatives, which sought to incorporate in the bill language that would not change the status of any veteran but simply would deduct from each check of each beneficiary the sum of 10 per cent during the next fiscal year. This amounted to $58,319,750, pending the consideration and the report of the special committee of the House and the Senate that is now dealing with this matter and which will shortly make its report to Congress.

That report, as we know, must then go to the legislative committee for its consideration. This is offered simply as a temporary reduction in the interest of helping to balance the Federal Budget.

Mr. SWING. Is it the gentleman's idea that this would obviate the proposal to throw 100 per cent of the cut upon certain selected groups?

Mr. WOODRUM. It very probably might obviate that necessity.

Mr. SWING. If that be so, I am very much interested in it.

Mr. RANKIN. Mr. Chairman, will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. RANKIN. As I understand the gentleman's proposal would provide a cut for one year only?

Mr. WOODRUM. Yes; it takes 10 per cent for one year and expires at the end of the fiscal year.

Mr. DELANEY. Mr. Chairman, will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. DELANEY. Would this 10 per cent cut be in addition to what has already been taken?

Mr. WOODRUM. Nothing has been taken off the veterans' benefits.

Mr. DELANEY. I mean in addition to the cut provided for in the general economy act?

Mr. WOODRUM. That does not take anything from the veterans. As to the retired officers who already have an 8⅓ per cent reduction, the language I suggest would give them another 1⅔ per cent, making the total for them 10 per cent. I will say, however, that neither the subcommittee nor the full committee agreed to this proposal, and the bill comes to you without this language in it.

Mr. WOOD of Indiana. Mr. Chairman, will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. WOOD of Indiana. Was it not the consensus of opinion that neither the subcommittee nor the full committee should take definite action upon it but that it should be brought up for the consideration of the entire House?

Mr. WOODRUM. That is quite true, but the argument was that inasmuch as there was a special committee studying the problem that would make its report on March 3 that the Appropriations Committee should take no action.

My answer to that was that when the select committee makes its report, which will be March 3, the report then must go to the legislative committee, which committee will undoubtedly want to give consideration to it, and I was anxious, as I think the House is anxious, that every committee make its contribution toward balancing the Budget.

Mr. WOOD of Indiana. If the gentleman will yield further, I did not know that that was the gentleman's point. I think it was the consensus of opinion of the entire Appropriations Committee rather than the subcommittee having this in charge, taking a definite stand on this, that the matter was of such importance that its consideration and either its adoption or rejection should be left to the entire House.

Mr. WOODRUM. No; I did not so understand, I may say to the gentleman from Indiana.

Mr. WOOD of Indiana. That was the understanding I had.

Mr. WOODRUM. The committee refused to adopt the suggestion, but I present it to the House for consideration. It is not any more pleasant for me to make the suggestion than it is for anybody else.

Mr. KELLER. Mr. Chairman, will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. KELLER. Does the gentleman think if we balance the Budget we can do the things he has indicated here?

Mr. WOODRUM. I do not know what the gentleman means that I have indicated. What have I indicated?

Mr. KELLER. The gentleman indicated that if we could balance the Budget, we could put men to work and bring prosperity back.

Mr. WOODRUM. I think it is the first step. I do not think that is the whole thing. Frankly, I will say to the gentleman, I think there are underlying fundamentals involved in this present economic crisis, the overcoming of which will take more than a balanced Federal Budget. We can not balance the Budget and keep it balanced if we do not correct the fundamentals. Without doing this the Budget will be unbalanced next year. The first step in economic solidarity, whether of the Government or the individual, is not to be spending more money than we have coming in. [Applause.]

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. SCHAFER. I note on page 4 the bill carries an appropriation of $50,000 more than that recommended by the Budget for unusual repairs to the Executive Mansion. What are these unusual repairs that cause us to call upon the taxpayers to pay $50,000 more than the Budget requests?

Mr. WOODRUM. As the gentleman may have been aware, the White House has been occupied for four years by our distinguished and beloved President, Mr. Hoover, and his family. They are going to move out, and we want to have a sort of housecleaning. The gentleman understands what I mean.

Mr. SCHAFER. Does this $50,000 additional comply with the financial program of the incoming President?

Mr. WOODRUM. I am quite confident it will comply with it; yes.

Mr. SCHAFER. Do these unusual repairs include the installation of a swimming tank?

Mr. WOODRUM. That is what the gentleman is talking about, I am quite sure.

Mr. SCHAFER. Does this cover a swimming pool?

Mr. WOODRUM. I should like to ask the gentleman a question if he will permit?

Mr. SCHAFER. Yes.

Mr. WOODRUM. Does the gentleman object to the President of the United States having a place in which to take exercise that medical authority says is necessary for him to have?

Mr. SCHAFER. I wish to state that there are thousands of people in the District of Columbia who have not got swimming pools, and newspaper reports this morning indicate the next President of the United States does not desire a swimming pool.

Mr. WOODRUM. When the bill is read for amendment in committee the gentleman from Wisconsin will have an opportunity to offer an amendment to take that item out of the bill if he wants to do so.

I appreciate your courtesy and forbearance. I am sorry to have taken so much of your time. I want to ask this of you. The committee has given its best thought and study to this bill. We ask the members of the committee to help us put the bill through. Make changes in the bill if changes are to be made, but help us to put it through. I thank you very much. [Applause.]

Mr. SUMMERS of Washington. Mr. Chairman, I yield myself 20 minutes, and ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SUMMERS of Washington. Mr. Chairman, you have listened to a very instructive discussion of the independent offices appropriation bill by our beloved chairman the gentleman from Virginia [Mr. WOODRUM]. After having served for some eight or nine years on this committee, and for the past two years under the chairmanship of the gentleman from Virginia, I want to say that he has given unusual thought in his investigation of the different appropriations that are carried in the bill. He is always courteous and considerate of those who serve with him.

This is one of the most interesting bills that comes before the House for its consideration. If you want to read the hearings on one bill, above all others, that will give you the widest understanding of the activities of the Federal Government, read the 600 pages of hearings on the independent offices appropriation bill.

There are some 28 different activities of the Federal Government appropriated for in this bill. You may say this is too many. Perhaps there are too many. I think I can put my finger to-day on six of them that will have completed their activities and will have disappeared from this bill by natural course of elimination within the next year or two.

The American Battle Monuments Commission, which for the past few years has been erecting monuments and memorials at the principal battlefields in Europe in commemoration of the services there of our boys who served during the World War, will have completed its work within the next few months.

The Arlington Memorial Bridge Commission will have completed its work.

The Board of Mediation I shall discuss in some detail later.

The Board of Tax Appeals is very important to all Federal taxpayers and its work must continue indefinitely. It is for the purpose of adjusting differences finally between the income-tax payer and the Federal Treasury. The work that it does is of very great service in this respect. It results in settling many disputes which could not otherwise be settled without great expense to the taxpayer.

The Bureau of Efficiency is not a very large appropriation, and the facts, as shown by the Bureau of the Budget, are to the effect that it results in greater savings by far than the expenses of the bureau.

The Civil Service Commission, we all know, is essential to the activities of our Government and is in the interest of good service by the employees.

The Commission of Fine Arts only requires a few thousand dollars and there must be some board or tribunal in the District to pass on the buildings and monuments that are being erected in this great capital.

The Employees Compensation Commission is a necessity.

The executive appropriation covers the expenses at the White House.

The Federal Board for Vocational Education reaches out to every county, perhaps, in the United States. In cooperation with States and Districts we are helping to educate boys and girls, and not only educate them, but train them and give their instruction a practical turn toward the close of their high-school education.

The Federal Farm Board will probably be discussed at length during consideration of the bill.

The Federal Oil Conservation Board has only a few thousand dollars and serves a good purpose in conserving oil production.

The Federal Power Commission is one of the commissions that more than repays the amount appropriated.

The Federal Radio Commission, all will agree, is absolutely necessary, for the licensing of operators over the United States in order that we may have some order in the air. There is serious question about this commission, and, in fact, there are some who believe it should be wholly self-supporting, and that broadcasting stations that are used for advertising purposes and collect very large sums of money every year should bear the expenses of the commission. The appropriate committee should consider this question.

The Federal Trade Commission I shall discuss later.

The General Accounting Office is absolutely necessary. It brings order out of financial chaos and saves more than it spends. I could run on in this way with respect to the other commissions, but I shall now discuss, in some detail, three or four of them. In the preparation of this bill we have cut Budget estimates $1,657,522.

I want to first consider, very briefly, the work and appropriations of the United States Civil Service Commission.

WORK AND APPROPRIATIONS OF THE UNITED STATES CIVIL SERVICE COMMISSION

It is during a period of economic distress when an employment service is placed under the greatest strain. The Civil Service Commission has been forced to do more work to meet the situation brought about by the present economic condition of the country.

It has been found possible to reduce very appreciably in the last year the number of actual examinations held, because of the decrease in appointments due to reduced appropriations. However, the number of requests for information has been very much increased. In addition, the number of applicants in those examinations which it has been necessary to hold has increased due to the fact that so many people are looking for work. Every possible effort has been made to fill vacancies by readjustments of personnel.

A very material factor in connection with the work which the commission will have to do during the next fiscal year concerns postmasters. With or without the depression, postmaster examination work must continue. There is the increase which is customarily incident to the change in administration. If past history is to furnish a guide, the commission will be faced in the next four years with the necessity of holding approximately 15,000 examinations for postmaster in offices of the so-called presidential class. These are offices in which the appointment is made by the President with the advice and consent of the Senate. The precedure in filling these positions is, in brief, as follows:

When the term of the incumbent postmaster is nearing its end, the Postmaster General may suggest either the recommissioning of the present postmaster, the promotion of one of the subordinate employees of the post office, or an open competitive examination of applicants. It is to be anticipated that most of the post offices during the next fiscal year and the three following fiscal years will be filled as the result of these examinations.

As above stated, there are approximately 15,000 presidential post offices, and at least 4,000 examinations will be necessary during the fiscal year for which this appropriation is being made. This number may be compared with approximately 800 to 1,000 examinations which were necessary during each of the last three or four years.

Thus it will be seen that the commission will need to conduct about four times as many postmaster examinations as has been necessary during recent years. This postmaster situation is further complicated by the fact that each such examination brings out a much larger field of applicants than during normal times.

Another factor in connection with the work of the Civil Service Commission which should receive attention results from the fact that the policy of not holding examinations and continuing registers of eligibles almost indefinitely fails to give opportunity to persons now out of work to compete for the few Federal positions which are being filled.

The commission had no alternative but to bring examination procedure to a practical stop since money available to it for expenditure was appreciably reduced during the last fiscal year and during this fiscal year, and the appropriation suggested by the Budget and the committee for 1934 is still further reduced. Many of the registers of eligibles maintained by the Civil Service Commission were established prior to the depression, and in these cases appointments are being made without opportunity of competition to thousands of unemployed citizens who have lost employment since the depression started and who are in many cases very highly qualified for Government service. It is obvious, therefore, that the Civil Service Commission must conduct examinations in order to give a fair opportunity to all of the citizens to obtain Federal employment. This can not be done if a continuously restrictive program is made necessary by continuously reducing appropriations. We may have cut Civil Service Commission appropriations below fairness and efficiency.

Just a word may be said concerning the salary situation among the employees of the Civil Service Commission. This year all employees receiving $1,740 per annum, or more, including the commissioners themselves, are being forced to take very extensive administrative furloughs in addition to the legislative furlough required by the economy act of last year. The actual loss to each of these employees this year is approximately one-sixth of the income. Employees below $1,740 per annum have received a lesser amount of furlough and employees below $1,560 per annum have received

only the legislative furlough required by the economy act. Under the appropriations proposed for 1934, the commission's employees will be faced with approximately seven weeks of furlough, which will result in an approximate reduction in salaries to them of 13½ per cent if the appropriation suggested by the committee is approved by the Congress. Any further slashing of the commission's appropriations would result in further reducing the salaries of the commission's employees.

In summary, the Civil Service Commission is faced during the year 1934 with a very material increase in work while its appropriation is approximately 25 per cent below its appropriation for last year.

Everyone who has knowledge of the benefits of the merit system to the public, to the Government, and to the employees will not question for a moment the necessity for maintaining its high standards.

DUTIES AND SCOPE OF UNITED STATES EMPLOYEES' COMPENSATION COMMISSION

The United States Employees' Compensation Commission was created by the act of September 7, 1916, to administer the provisions made by that act for compensating civil employees of the United States for injuries sustained while in the performance of official duties. In enacting this legislation the United States adopted the principle of workmen's compensation previously recognized by more than two-thirds of the States. It immediately relieved the Congress of the necessity of considering innumerable private measures introduced for the relief of employees injured while in the service of the United States, and at the same time provided a system for extending prompt and adequate relief uniformly to all civil employees of the Federal Government. For more than 10 years the administration of this law was the sole function of the commission.

On March 4, 1927, the Congress passed the longshoremen and harbor workers' compensation act to provide compensation for certain maritime workers in private employment on the navigable waters of the United States who, under decisions of the Supreme Court, were not entitled to the benefits provided by the State workmen's laws because of the exclusive admiralty jurisdiction of the United States. The administration of this law was logically placed under the jurisdiction of the Employees' Compensation Commission, which was the only existing Federal agency engaged in the administration of workmen's compensation legislation. This act followed generally the pattern of State laws providing workmen's compensation, the large majority of which are administered by independent commissions. The only expense to the Federal Government in connection with this law is the cost of administration, as the benefits payable under its terms are borne by the industry itself.

By the act of May 17, 1928, the principle of workmen's compensation was extended to private employment in the District of Columbia. This was accomplished by making the substantial provisions of the longshoremen and harbor workers' compensation act applicable to such employment. The administration of this law was likewise intrusted to the Employees' Compensation Commission. The cost of administering this law does not involve an expense to the Federal Government but is borne by the government of the District of Columbia. The benefits it provides, as in the case of the longshoremen's act, are borne by employers.

BROAD FIELD OF ACTIVITIES

The three laws administered by the commission affect the interests and welfare of nearly one and one-half million employees, approximately half of whom are in private employment; likewise the rights, obligations, and duties of more than 25,000 private employers. Of the latter, between ten and fifteen thousand have operations extending throughout the United States and its Territories. Between seventy-five and eighty thousand injuries are reported to the commission annually under these laws, and the money compensation paid direct to injured employees and the dependents of those killed in industrial accidents is estimated to amount to more than $7,000,000 annually. A total of 324,417 injuries were reported to the commission under the act of September 7, 1916, prior to December 31, 1932, and the amount expended for benefits from the compensation fund to that date amounted to more than $41,000,000. During the first five years the longshoremen's and harbor workers' compensation law was operative, 164,090 injuries were reported to the commission. The benefits authorized by this law are paid direct by employers or their insurance carriers, and the amount expended for compensation and medical care is not available. During the four years the law applicable to employments in the District of Columbia has been operative, 73,413 injuries have been reported to the commission. As in the case of the longshoremen's act, the cost of benefits in these cases is paid by employers, and exact information concerning the amount of this expense is not available.

In order to carry out the administration of these three laws, the commission is required to maintain an administrative staff in the District of Columbia and in the field. The field force, consisting of 57 employees, is engaged almost exclusively in the administration of the law applicable to maritime employment. It is also used as far as practicable for investigational work in connection with claims arising under the law applicable to civil employees of the United States.

Local administration of the longshoremen's compensation act and the District of Columbia compensation act is committed to deputy commissioners appointed by the commission who receive and determine claims arising in the particular district to which they are assigned. The commission through its administrative office in Washington, which has a personnel of 119, performs all duties connected with the administration of the law applicable to Federal employees, and, in addition, performs all administrative work of a general character connected with the other laws. This includes, in addition to directing the administration of these laws through subordinates, the duty of authorizing insurance carriers to write insurance under these laws, passing upon applications of employers for authority to act as self-insurers, directing and supervising litigation arising under these acts, and other work of a similar character which must be directed from a responsible central office in order to secure uniformity in the administration of the law.

It is estimated that about two-thirds of the personnel and administrative cost of this commission relate principally to the two laws pertaining to private employment—the longshoremen's act and the District of Columbia workmen's compensation act.

THE BOARD OF MEDIATION

The Board of Mediation began its work July, 1926, under the provisions of the railway labor act. The outstanding purposes of the act are to establish an uninterrupted flow of interstate commerce in the interests of the public, the rail carriers, and their employees.

The Board of Mediation is charged with the responsibility of doing everything possible under the act to maintain harmonious and fair relations between the rail employer and the employee in regard to all features bearing upon labor relations and further to discharge its duties with the greatest possible promptness.

In considering an appropriation for the Board of Mediation it is probably unnecessary to go into any detail as to the legal steps which have to be taken to bring carriers and their employees under the provisions of the law and subject to the jurisdiction of the Board of Mediation.

There is no evidence of criticism of the law, or at all events no bills have come before Congress for its modification. The real concerns of Congress at this time are the value and quality of service of the Board of Mediation and the costs of performing such service.

Our committee held an interesting and illuminating hearing on the item of appropriations for the board. Its work was carefully gone into and the inquiries of the committee were promptly and fully answered, as one can readily see through a reading of the report of the hearing.

More extended information can be found in the annual report of the board for the fiscal year 1932 and those of

preceding years. The actual appropriation made necessary by the railway labor act is subdivided as follows:

First. The direct operating expenses of the board through its office in Washington and in the field. A study of the reports of the board during its existence will show that such expenses have been reduced through improved and more economical systems of administration in each succeeding fiscal year.

Second. Costs of arbitrations provided for by law and over which the board has virtually no control save a scrutiny and approval of reasonable bills contracted by each arbitration board under authority given by the railway labor act. The Board of Mediation acts as a cashier in respect of paying out the funds for such purposes and does the work of setting up the machinery for starting the arbitration hearings in motion.

Third. Emergency boards: This is an appropriation made for the use of the President of the United States. The Board of Mediation acts as a cashier for the payment of bills incurred by the board under the direction of the President and in no other way, save in setting up the machinery for starting off emergency board work.

SCOPE OF DUTIES AND RESULTS

The work of the board is impossible of measurement strictly by disputes settled. This is due to the fact that the board at its headquarters in Washington and in the field does a great amount of investigating, counseling, and so forth, which frequently results in a withdrawal of some proposed case without much strictly mediation work or in an abandonment by some party in interest of a proposed and likely initiation of a dispute.

The legal status of every case brought to the board has to be carefully examined in order to determine the question of the jurisdiction of the case at the hands of the board. In the consideration of the acceptance of cases a great amount of legal study has to be made covering not only provisions of the railway labor act but general law as it may apply to existing employee and carrier contracts, agreements, practices, and so forth.

The fact is that not a strike of consequence has occurred during the existence of the Board of Mediation, and there has been no interruption to the steady flow of interstate commerce as a result of labor troubles.

In addition to its office, administrative, statistical, and advisory functions, the work in the field is of controlling importance and for the most part might properly be regarded as being the hub of the wheel.

Mediations as such are held in all parts of the country. During six years they have been held in Albany, N. Y.; Buffalo, N. Y.; Lackawanna, N. Y.; Middletown, N. Y.; New York, N. Y.; Rochester, N. Y.; New Haven, Conn.; Boston, Mass.; Montpelier, Vt.; St. Albans, Vt.; Bangor, Me.; Portland, Me.; Baltimore, Md.; Philadelphia, Pa.; Pittsburgh, Pa.; Cincinnati, Ohio; Cleveland, Ohio; Toledo, Ohio; Detroit, Mich.; Washington, D. C.; Norfolk, Va.; Richmond, Va.; Roanoke, Va.; Wilmington, N. C.; St. Augustine, Fla.; Atlanta, Ga.; Augusta, Ga.; Savannah, Ga.; Birmingham, Ala.; Mobile, Ala.; Columbus, Miss.; Hattiesburg, Miss.; Erwin, Tenn.; Johnson City, Tenn.; Nashville, Tenn.; Oneida, Tenn.; Louisville, Ky.; Stearns, Ky.; Chicago, Ill.; Peoria, Ill.; Green Bay, Wis.; Houghton, Mich.; Hannibal, Mo.; Kansas City, Mo.; St. Joseph, Mo.; St. Louis, Mo.; Boone, Iowa; Des Moines, Iowa; Omaha, Nebr.; Wichita, Kans.; Muskogee, Okla.; Oklahoma City, Okla.; Dallas, Tex.; Fort Worth, Tex.; Greenville, Tex.; Houston, Tex.; Texas City, Tex.; Trinity, Tex.; New Orleans, La.; Winnfield, La.; Fort Smith, Ark.; Texarkana, Ark.; Brainard, Minn., Duluth, Minn.; Minneapolis, Minn.; St. Paul, Minn.; Denver, Colo.; Ogden, Utah; Los Angeles, Calif.; San Francisco, Calif.; Portland, Oreg.; and Cordova, Alaska—72 places—and comprehend over 1,500 different cases.

Starting at zero in July, 1926, cases of all kinds have been received and accepted by the board to the number of 1,882, up to and including December 28, 1932. (Many cases have not been accepted because of noncompliance with the provisions of the railway labor act.) Of the cases accepted 1,511 have been disposed of quietly with virtually no notice taken of them by the public, and quite likely by Members of Congress, for the simple reason that the board has avoided the spotlight and has proceeded persistently on its way, avoiding publicity and the many forms of dispute such as generally grow out of proceedings widely aired in a public way.

GOOD WILL PROMOTED

A conversation with any representative of railroad labor or of a carrier will demonstrate to anybody, as such has to me, that during the administration of the Board of Mediation all suggestions of old-time bitter relations between employee and carrier have disappeared. In the place of unhappy references of one side to the other, threats maybe, the testimony of those who participate is to the effect that meetings in which the Board of Mediation is involved are harmonious, marked by genuine respect of one side for the other, and are carried on "around the table" as between business men differing in their points of view but none the less anxious to arrive at fair conclusions.

The Board of Mediation has no power to direct anything whatsoever. In its proceedings with people in dispute they undertake, and apparently successfully, to act as a common friend who counsels both parties and not as an arbitrator or conciliator with any authority or desire to do more than to help railroad employees and employers to work out voluntarily agreements which represent justice and equity as nearly as possible.

VOLUME INCREASES

The following facts are significant and illuminating:

The Board of Mediation began to function in July, 1926, with no cases on file for attention. Without making reference to the number of cases settled within the periods it is interesting to note that the open cases on the docket of the board have been as follows:

June 30, 1927	161
June 30, 1928	139
June 30, 1929	71
June 30, 1930	220
June 30, 1931	301
June 30, 1932	289
Jan. 15, 1933	375

In addition there are in the hands of the board cases likely to be accepted, 78, making the total of open cases to be handled by the board as of January 15, 1933, 453, the greatest number of record.

The existence on the docket of this large number of cases is due to two particular reasons:

(a) The rapid increase of cases requiring service apparently due to the economic conditions of the times. There is a definite evidence of the desire of carriers to reduce their expenses to a minimum and of the employees to hold what they think they are entitled to in respect of wages, rules, and working conditions; and also to clear up any and every question which in their minds would seem to contribute to their fair rights. Many of the cases which are coming in now are of long standing and probably would not have come at this time, if ever, had economic conditions continued on what is commonly referred to as normal lines. However, as the railway labor act is constructed, both sides are at liberty to bring their cases to the Board of Mediation and the board must accept them for service if they come within the provisions of the law, hence the accumulation of cases.

(b) On account of appropriations and provisions of the economy act it does not seem to be possible for the board to increase its force of mediators to meet the rising number of cases which are coming to it.

In the annual report of the board it appears that in the fiscal year 1932 there were 392 cases accepted for mediation, and the board disposed of 404.

As evidencing the increasing call on the board for its service, it is interesting to note that from July, 1932, to January 15, 1933, the cases requiring the services of the board have been and are likely to be accepted to the number of 396, which indicates more cases for mediation service for six months and a half than were received by the board

during the whole fiscal year 1932, even though in that year the number received was high.

I have been advised by the chairman of the board that so far as reasonable estimate can be made in the light of disputes now going on throughout the country, applications for the services of the board in the immediate future would appear likely to come at a still further increasing rate. When one considers the call upon the board and the number of carriers and employees involved the importance of mediation work is very impressive.

The value of such work as has been and is now being done by the Board of Mediation rests not alone in the establishment and continuance of a free flow of interstate commerce, all important though it is. The Congress of the United States should be mindful of the financial interests of rail employees and employers and also of the economic welfare of the country.

COST OF STRIKES

On the authority of the chairman of the Board of Mediation I call attention to information which he has privately gathered as illustrating the great importance from a purely financial point of view of industrial peace and the cooperation of rail employers and employees. Great waste attends strikes in the railroad business when interruptions or strikes occur.

Without attempting to cover the whole field I present for consideration a brief statement to illustrate what railroad labor disturbances mean. In 1922, prior to the enactment of the railway labor act, there was a nation-wide strike involving particularly the shopmen employed by rail carriers. As evidencing the losses sustained and disregarding for the moment the elements of interruption to traffic as affecting shippers and receivers of merchandise, losses of efficiency in service, loss of business and loss of wages to employees affected by the strike it appears that on one railroad between July 1, and September 19, 1922, the out-of-pocket cost of such strike to the carrier was $9,000,000; on another railroad $4,240,313; on another railroad for the same period the out-of-pocket expenses were $3,896,000 and a loss of traffic estimated between seven and eight million dollars. The loss to employees was probably greater.

The total expense incurred by the Government for its share in the operations and the administration of the railway labor act for six years has been about $1,323,000. During the period there were virtually no losses of the character described above.

The foregoing figures and estimates bearing on the out-of-pocket expense of three carriers and wage losses on account of the strike which lasted about two months and a half, can be taken as a suggestion of the tremendous losses which were incurred by all carriers and employees affected throughout the country during the shopmen's strike. If the Government can contribute through the Board of Mediation at such an extremely low cost to the maintenance of peaceful labor relations and an uninterrupted flow of interstate commerce it would seem absurd to fail to furnish the necessary funds. The work of the Board of Mediation is distinct and wholly apart from that of any other Government agency.

Having supported the railway labor act from its inception and having followed with sympathetic interest the operation of the law since its enactment I have but the highest praise for this legislation and the accomplishments thereunder.

FEDERAL TRADE COMMISSION

I am a staunch believer in the widespread good and wholesome effects of Federal Trade Commission activities. Its benefits to the whole population of our country can be shown best by citing a few illustrative cases.

FORMAL COMPLAINT CASES OF UNFAIR COMPETITION AND CLAYTON LAW VIOLATIONS

Winsted Hosiery Co.—Misbranding case

The Winsted Hosiery Co. used on underwear such labels as "natural merino," "gray wool," "natural wool," "natural worsted," and "Australian wool." None of this underwear was all wool. Much of it contained only a small percentage of wool, some as little as 10 per cent. The company had not manufactured any all-wool underwear for a great many years. For the 3-year period prior to October, 1918, the date of the issuance of the complaint, the company's sales of knit underwear aggregated $2,500,000. As an estimate, it seems safe to say that 25 per cent of these sales were made with the purchaser erroneously believing that the underwear labeled merino, wool, or worsted was all wool. If this be true, the savings to the consumer in this case amounted to over $200,000 a year.

Prior to the decision in this case misdescription of goods had become so common in the trade that most dealers, as opposed to the public, no longer accepted labels at their face value, and honest manufacturers were forced to an election between also resorting to deceptive labels or losing trade. The commission ordered truthful branding. Many industries joined the fight for truthful branding. The Supreme Court ordered truthful branding. False brands were outlawed. The decision established the power of the commission to deal with misrepresentation in trade. Trade organizations, and periodicals, manufacturers, and lawyers greeted the decision as one of epochal importance. It was called the Magna Charta of truth in trade. None will deny that the action of the commission in this case is of incalculable value to both industry and the public at large.

United States Steel Corporation—Pittsburgh Plus case

This case has been cited many times as one of the most valuable where direct savings to the public resulted upon the issuance of the cease and desist order of the commission. The commission charged that the United States Steel Corporation and 11 subsidiary corporations sold at the Pittsburgh base price plus freight from Pittsburgh, and this regardless of the point or location at which the products were fabricated—for instance, Chicago or Birmingham. The West and South were particularly interested and benefited by the order in the case. The reason is apparent when it is realized that the subsidiary respondents had fabrication plants located, among other places, at Minneapolis, St. Louis, Gary, Detroit, Fairfield, Ala., and Milwaukee. One effect of this order is graphically illustrated in Figure 8, page 159, of the Masquerade of Monopoly, by Fetter. The overnight reduction to consumers on wire and wire nails as a result of this order was $10 a ton at Duluth. The drop at Birmingham was almost $9 a ton, approximately $6 at and near Chicago, and as much as $3 at many points eastward. The drop was approximately $3 at Spokane, Butte, Helena, Salt Lake City, and Ogden. During the course of the trial of the case John R. Howard, then president of the American Farm Bureau Federation, testified that the farmers of the country would be benefited by $30,000,000 a year by reductions in prices of farm machinery, implements, and material as a result of removing the fictitious freight charge imposed under the Pittsburgh-plus system.

Radium water case

The commission has proceeded in several instances against vendors of products alleged to be valuable as therapeutic agents in the treatment of disease. One of the most interesting of these cases involved a radium water known as "Radithor," and sold by the Bailey Radium Laboratories, of Orange, N. J. It was claimed that this radium water was of benefit in a long list of conditions, ranging from acidosis to wrinkles, but its principal use and appeal was as a rejuvenator. The commission alleged that not only was this product valueless as a therapeutic agent but that its use was potentially harmful. In September, 1931, the commission called as one of its witnesses Evan M. Byers, an official of the Byers Pipe & Steel Co., of Pittsburgh, Pa. Mr. Byers testified that he had consumed some 1,400 bottles of this product over a period of three years. It was proved that at the time he testified he was suffering from radium poisoning. Subsequent to the testimony of Mr. Byers the respondent consented that the commission issue a cease and desist order against it, which it did in December, 1931.

Mr. Byers died of radium poisoning in March, 1932, and the attendant publicity focused the attention of the American public upon the fatal potentialities of radium water dosage. This result can be credited to the testimony intro-

duced by the Federal Trade Commission in this case. It is not known how many bottles of this product the respondents sold in the course of a year. The product was sold at $1 a dose, and the indications were that it was a popular remedy, particularly among the well to do. More recent investigations by the Federal Trade Commission indicate that the publicity incident to the death of Mr. Byers forced many other organizations, selling various kinds of radium water and other radium products for self-medication, out of business. It would seem safe to estimate that $1,000,000 a year has been saved the American public, which, but for the commission's action in this case, would have been diverted to vendors of these valueless and often harmful radioactive products.

TRADE-PRACTICE CONFERENCES

Two cases will illustrate the scope and benefits of these trade-practice conferences:

(c) Household furniture and furnishings: Many unfair methods of competition, such as discrimination in price under section 2 of the Clayton Act, publishing false and untrue statements concerning the grade, quality, quantity, and character of competitors' products, secret rebates, with others, were eliminated by these conference rules. Also many unethical practices in the industry, such as usurping designs, styles, or patterns of a competitor, issuing false invoices, repudiation of contracts on a rising or declining market, disapproving of the sale of prison-made furniture in competition with the products of free labor without fully informing purchasers of the fact.

Publishers conference on fake advertising: It is said that through advertising the greatest frauds and misrepresentations are perpetrated, and that through such advertising in newspapers and magazines the citizens of the country are robbed of not less than $750,000,000 annually. Through the efforts of some of the publishers a trade-practice conference was held, representing over 6,000 magazines and many of the leading newspapers. These representatives of the publishing business adopted the rule that they would employ the most effective agency they could secure to examine the advertisements offered for publication and to advise them as to their fairness. It is said that as a result of this conference fraudulent advertising has decreased over 50 per cent. Many of the worst classes of advertising, such as patent-medicine remedies, hair restorers, antifat, puzzle contests, and so forth, have decreased from 75 to 90 per cent. Through the work of this one conference more fraudulent advertising has been suppressed and more honest competitors protected and the public more greatly benefited than by all other plans or activities combined which have come to the attention of the commission.

FALSE AND MISLEADING CASES IN NEWSPAPERS, MAGAZINES, AND PERIODICALS

Millions of dollars are paid annually for preparations worthless or of doubtful value but advertised as being effective for such uses as reducing flesh or building it up; removing wrinkles, age lines, freckles, moles, warts, and the footprints of time; tinting or bleaching the skin; growing hair or removing it; coloring hair or bleaching it; and the like.

Investigations of the commission disclose that various preparations purveyed by some chemists, cosmeticians, and others who are looking for easy money, will not always stand up under careful scientific analysis. A "wrinkle oil" was found to consist of castor oil with a few drops of perfume, put up in 2-ounce bottles of pleasing shape, with beautiful labels, for $2. For fat people many reducing creams are offered, and numerous vendors advertise magic results, all of which are false and misleading, for there is no cream that will reduce fat by mere application. Some vendors offer the identical cream as a tissue builder or flesh food to enable skinny folk at will to build up flesh on the neck, the arms or legs, the back, the bust, or wherever they crave it, yet there is no known cream that will build tissue or feed flesh.

During the fiscal year ended June 30, 1932, a special board concluded the investigation of and reported to the commission 406 cases. Of these, 341 were against advertisers, 57 against publishers, and 8 against advertising agencies.

STIPULATIONS TO CEASE AND DESIST FROM ALLEGED UNFAIR METHODS OF COMPETITION

Ear phones, key tags, charging fluid for batteries, correspondence school for vocational training, and alleged cures for stammering, gallstones, high blood pressure, and indigestion: The publisher of a magazine of wide interstate commerce waives the right to be made a party respondent in proceedings against 21 advertisers who are vendors of various articles of commerce, including ear phones, key tags, battery fluid, correspondence course of instruction in railway training, and alleged cures for stammering, gall stones, high blood pressure, and indigestion, and agrees to abide by the terms of any stipulations effected with or orders to cease and desist directed against such advertisers.

Perfumes: Theo. White, trading as Theo. White Co. and Palace de Flores, Los Angeles, vendor of a perfume alleged to be irresistible, agrees to discontinue representing that such is irresistible and can captivate the soul, or that it will enable the user to be exclusively attractive, and to attract and win the love of any person desired, when such are not the facts.

Mr. SUMMERS of Washington. Mr. Chairman, I yield 10 minutes to the gentleman from Iowa [Mr. KOPP].

Mr. KOPP. Mr. Chairman, again I want to discuss the farm problem, for every day it is becoming more serious and acute.

This is the last day of January, and less than five weeks remain of this session. Whatever is done must be done quickly.

All know that the thing that the farmers need most is an increase in the price of their products. If the price of farm products were raised to a normal basis, it would solve most of the farmers' difficulties.

I fear, however, that nothing will be done during this session to raise the price of farm products. Two ways have been proposed to do this, one by enacting the domestic allotment bill and the other by enacting an inflation bill. The indications are that neither the domestic allotment bill nor any inflation bill will become a law during this session.

True, the domestic allotment bill was passed by the House on January 12, 1933, but it is still before the Senate committee, where there seems to be a wide difference of opinion as to the merits of the bill. A number of inflation bills have been introduced, but thus far no such bill has been started on the road to passage. Moreover, different Democratic leaders have in strong terms declared themselves against inflation.

The farmers, however, can not wait. Many of them are burdened with heavy mortgages and are in imminent danger of losing their homes. They are in urgent need of relief. What can we do for them?

Yesterday we passed a bill amending the bankruptcy act. I voted for the bill and believe it will be helpful, but it will not give farmers who have a heavy mortgage indebtedness adequate relief. By no means. I feel that in this great emergency the Government should, without delay, aid the farmers in refinancing their farm-mortgage indebtedness and thus make it possible for them to save their homes. This can be done without impairing our national credit, without passing any unsound legislation, and with but little or no loss to the Government.

Refinancing the farm-mortgage indebtedness will have a very far-reaching and very beneficial effect. It will give hope to the hopeless and help to the helpless. If given this assistance the farmers will face the future with courage and determination.

Mr. STRONG of Kansas. How will you do it?

Mr. KOPP. I shall tell you. I shall give you my viewpoint. There are in this country over $9,000,000,000 in farm mortgages. I can not give you the exact amount. A farm publication fixed the amount at $9,200,000,000. According to the same authority, 36 per cent of the mortgage indebted-

ness amounts to more than one-half of the present value of the land covered by such mortgage indebtedness, 16 per cent amounts to more than three-fourths of the present value of the land; and 5 per cent amounts to more than the entire present value of the land.

I come from an agricultural State. I was born on a farm and have been familiar with farming all my life. Basing my opinion upon the figures I have given, I believe $3,000,000,000 would refinance the most pressing cases and would save the farmers who are threatened with the loss of their homes.

The Government, through the Reconstruction Finance Corporation, has given aid to banks, railroads, life-insurance companies, and other institutions; and I see no reason why it should not make loans direct to farmers. With that purpose in view, I recently introduced a bill authorizing the Reconstruction Finance Corporation to lend $3,000,000,000 to farmers in order to make it possible for them to refinance their mortgage indebtedness. The bill provides that the loans shall be secured by first-mortgage liens, shall run 10 years, and shall bear interest at the rate of 3½ per cent per annum, payable annually. It also provides that any part of the principal may be paid at any time and that after five years 2 per cent of the principal shall be paid at the end of each succeeding year unless such payment on the principal is waived for good cause shown. It is not the purpose to have the Government make any profit whatsoever, and if it appears that 3½ per cent interest will yield more than it will cost the Government to borrow the money then the interest rate to the farmers should be decreased accordingly.

By the terms of the bill loans may be made for as large an amount as 75 per cent of the present value of the land. As 50 per cent of the value of the land has generally been fixed as the maximum amount of a real-estate loan, this provision may be regarded by some as too liberal. It should be borne in mind in this connection that the present value of farm land is entirely too low, and that a loan for 75 per cent of the present value will be much safer than were loans for 50 per cent of the value some years ago. Furthermore, loans as high as 75 per cent of the present value of the land are to be permissible but not compulsory.

As previously stated, during the latter half of the 10-year period the farmer is to pay 2 per cent of the principal at the end of each year, so that at the end of the 10-year period the unpaid portion of the loan will be 65 per cent of the present value of the land. Such a loan, in my judgment, will be safe for the Government. I dare say that if we have any recovery in this country, 65 per cent of the present land value will be less than 50 per cent of the land value 10 years from now.

Such loans by the Government will bring about many adjustments between the mortgagor and mortgagee, for the mortgagee in many cases will be glad to reduce the mortgage indebtedness in order to enable the mortgagor to secure a new loan from the Government, and thus make it possible for the mortgagor to pay the mortgagee a substantial amount in real money.

Mr. HASTINGS. Mr. Chairman, I am very deeply interested in the argument of the gentleman from Iowa. I think this is the most important thing pending before Congress. I have embodied my views in a House bill, H. R. 14135, and made a speech upon that last Wednesday, explaining the details of the bill. I think it would meet with the gentleman's view.

Mr. KOPP. I shall be glad to support any bill that will save the farmers from losing their homes and I am gratified to know that the able gentleman from Oklahoma [Mr. HASTINGS] is so deeply interested in this important subject.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. SUMMERS of Washington. Mr. Chairman, I yield five minutes more to the gentleman.

Mr. WATSON. Mr. Chairman, will the gentleman yield?

Mr. KOPP. Yes; I am glad to yield to the distinguished gentleman from Pennsylvania.

Mr. WATSON. If we reduce the interest on mortgages, say to 3½ per cent, does the gentleman think the farmers would make a greater effort to pay?

Mr. KOPP. I certainly do. I am sure the farmers would do their best. At the present time many mortgagors face a hopeless situation. If given a chance to save their homes they will do their part.

Mr. WATSON. I agree with the gentleman that we ought to reduce the rate of interest upon the mortgages. A few years ago all of the mortgages, the gentleman will remember, were reduced to 4½ per cent interest in the city of Philadelphia. They had to be, and then we advanced the interest later.

Mr. KOPP. If a man has a heavy mortgage on his farm and wants to secure a Government loan I am sure the mortgagee will be glad to cooperate and make such concessions as may be necessary to enable the mortgagor to secure the Government loan.

Mr. STRONG of Kansas. If a man had a mortgage for 75 per cent of the value of his farm, and interest upon it, and he could not meet that, does the gentleman think it would bring him prosperity to reduce the principal and still have him pay all the farm will bring in in interest?

Mr. KOPP. I think a new loan for a less amount at a lower rate of interest is always a good thing.

Mr. STRONG of Kansas. Who is going to lose the difference?

Mr. KOPP. The mortgagee will be glad to lose some of it.

Mr. STRONG of Kansas. I have not met any of those fellows yet.

Mr. KOPP. I have.

Mr. HASTINGS. In my judgment there are literally thousands of mortgages held by insurance companies, farm mortgage companies, individuals, and banks which would rather take less and get liquid money than to go into court and stand the expense of court costs and the length of time required for foreclosure, and then, perhaps, when the land is sold under the hammer, not get enough money to pay the mortgage.

Mr. KOPP. I think the gentleman is absolutely correct.

Mr. STRONG of Kansas. I agree with the gentleman if we can get liquid money, but where is the farmer to get the cash?

Mr. KOPP. Is not the credit of this Government still good?

Mr. STRONG of Kansas. The gentleman wants the Government to take up these mortgages, then?

Mr. KOPP. Certainly. That is what I have said.

Mr. HASTINGS. And at a low rate of interest?

Mr. KOPP. Certainly.

Mr. HASTINGS. Then the farmer gets the benefit of the reduction and the low rate of interest.

Mr. KOPP. The farmer gets all the benefit, and that gives him a chance to fight his battle. He is then in a position where he can look forward with hope and courage.

Mr. STRONG of Kansas. I am in full sympathy with the idea, because I am one of the farmers who has one of these mortgages.

Mr. KOPP. They are all over the country, and I am sure the mortgagees all over the country will be glad to make a reduction in their principal in order to get money instead of land.

Mr. Chairman, this is a great emergency. We are face to face with a most serious situation. Hundreds of thousands of farmers in this country will lose their homes if they are not given a chance.

As stated, the bill authorizes the lending of $3,000,000,000 to the farmers, but if it later appears that this amount is not sufficient to save the farmers' homes, then an additional amount must be authorized. The Government must do its full duty.

Mr. HASTINGS. Did the gentleman put in his remarks the amount of the mortgages? I saw a statement in the New York Times of last Sunday that the mortgage indebtedness of the farmers was $9,100,000,000, and other

farm indebtedness was $4,283,000,000, making a total of $13,383,000,000.

Mr. KOPP. According to my investigation the amount of farm-mortgage indebtedness is between nine and ten billion dollars. I think the figures you have quoted are approximately correct.

Some may claim that this plan will put the Government into the banking business, but such a claim will be without any foundation. Lending money on real-estate security will not put the Government into the banking business. The life-insurance companies are doing that all over the country and have been doing it for many years, but they are not, and have not been, in the banking business. In ordinary times I would not favor such a plan. In such times such a plan would not be necessary, but in times like these I am in favor of any plan that, without placing any undue burden upon the Government, will save the homes of our farmers.

To the Democratic Party, which now has control of Congress, I appeal to give consideration to the farmers of our country. Some one may inquire whether there is a precedent for such action as I propose. There are numerous precedents but I shall call particular attention only to one. I am asking that our Government lend the American people $3,000,000,000 upon good real-estate security with ample legal remedies to enforce collection. After the armistice was signed, and after the World War was over, the Democratic Party, then in charge of our Government, lent more than $3,000,000,000 to European nations, without any security and without any method of enforcing collection. Of the more than $3,000,000,000 lent to European nations after the armistice France received practically one-half. Recently France refused to make the annual payment due us, but only a few weeks later lent $14,000,000 to another nation of Europe in order to promote European intrigue. There will be no such refusal to pay and no such story of ingratitude if you lend $3,000,000,000 to the farmers of our country to aid them in saving their homes. [Applause.]

Mr. SUMMERS of Washington. Mr. Chairman, I yield five minutes to the gentleman from Kansas [Mr. STRONG].

Mr. STRONG of Kansas. Mr. Chairman, I am in full sympathy with the remarks of the gentleman from Iowa [Mr. KOPP], if there is any way we can reduce the farmer's mortgages and reduce his interest fairly to the other taxpayers of the country. There is a bill now pending before the Committee on Banking and Currency, which was introduced by Chairman STEAGALL, proposing to do about this thing which the gentleman from Iowa proposes. I do not know whether the taxpayers of this country will be willing to pay off the mortgages of the farmers and reduce their rate of interest. I do not think it will aid very much to do that, in the long run, unless it is made possible for them to sell their products at a profit. The trouble with the farmer now is that when he works all year and gets his crop, he can not sell it for enough to pay his taxes, to say nothing about his interest and a part of the principal. I do not see how the readjustment of farm indebtedness and interest will help him very long unless we can bring about a readjustment that will give him a fair wage for his work and a fair profit on the operation of his farm. We must bring up commodity price levels. We must bring up the price of cotton, butterfat, and corn, and the price of hogs and wheat to make the farmer's business profitable.

Mr. HASTINGS. Will the gentleman yield?

Mr. STRONG of Kansas. I yield.

Mr. HASTINGS. The gentleman from Kansas knows very well that all of these bills can not be considered at one time. We had under consideration recently the allotment bill. We had the currency bill, and we have had different other bills. The bill which the gentleman from Iowa (Mr. KOPP] was discussing is one dealing with farm mortgages. I am in favor of the gentleman helping the farmer in his way, but I am in favor of helping the farmer every time any kind of a bill comes before this Congress for consideration. I can not dictate to the Congress whether this bill will be considered first or the other bill will be considered first. I am for any bill that will help the farmer.

Mr. STRONG of Kansas. Oh, yes; and so am I. I have voted for every piece of legislation that has come before this House in 14 years to help the farmer. There is no doubt about us who represent agricultural districts voting right on such measures.

Mr. MILLER. Will the gentleman yield?

Mr. STRONG of Kansas. I yield.

Mr. MILLER. I heartily agree with what the gentleman said about the necessity for adjusting commodity prices, but it seems to me, the question that is of foremost importance now is what are we going to do in the meantime in the emergency before commodity prices can be adjusted? That was the proposition that was being discussed by the gentleman from Iowa [Mr. KOPP].

Mr. STRONG of Kansas. I understand.

Mr. MILLER. I should like to have the gentleman's idea about that.

Mr. STRONG of Kansas. Well, I am in favor of it. If we can get anybody to help reduce the farmer's mortgages or his interest, very well. If we can do it by getting the money out of the Treasury, all right. If the other taxpayers will permit it, all right. I have been operating a farm for years. I have the highest producing herd of Holsteins in my State, and I have to feed them to protect their records, and when I do that they eat their heads off. I know something about these farm problems. What we need to do is not so much reduce the interest on his farm loan as to raise the farmer's price for his products so that it will make his farming profitable. If we can do that, he can pay his debts.

I think what we need to do is to bring down this high-priced dollar. [Applause.] Farmers were loaned money on their farms when the purchasing power of the dollar was worth 73 cents, and now are being told to "Sell their corn for 15 cents a bushel and pay back the dollar with $1.52 worth of farm products." It just can not be done. We must bring down the high-priced dollar and bring up the price of the farmer's products.

Mr. BANKHEAD. Will the gentleman yield for a moment?

Mr. STRONG of Kansas. Yes; I will be glad to.

Mr. BANKHEAD. I saw a statement in the paper day before yesterday relative to the latest estimate of the price of the gold dollar as compared with commodity prices and the figure given for it was $1.80.

Mr. STRONG of Kansas. The last time I saw an expression about it, it was $1.52; but the dollar is going up while everything the people of this Nation have to sell, their labor, their products, and everything they have to trade for the dollar, is going down. The thing we must now concern ourselves with is how to bring down the purchasing power of our high-priced dollar and we can not expect the creditor class to do that unless we come to grips with them and make it possible.

[Here the gavel fell.]

Mr. SUMMERS of Washington. Mr. Chairman, I yield 23 minutes to the gentleman from Ohio [Mr. BRAND].

Mr. BRAND of Ohio. Mr. Chairman, I have been getting together some facts and figures that possibly explain why the mortgages are on the farms, why the mortgage indebtedness on the farms has been multiplied by four in the last 10 or 12 years. These facts and figures also show why the farmer can not pay 6 per cent interest and why he is failing to pay taxes.

Perhaps 1914 was the last normal, healthy year. We had fought uphill all the way from the depressed times of the early nineties, until by 1914 we were receiving fair prices for everything, everybody was occupied, and the cost of living and income were on a comparatively even basis. Then the World War came. Men were taken from their occupations; supplies therefore were reduced; prices jumped, and we were off on a wild inflation basis which lasted in this country, except for agriculture, until 1929.

During the years of the war, prices of commodities rose and wages rose to more than double the 1914 basis. Railroad rates were doubled and the railroad men and executives absorbed the increased income by increased wages and salaries. Taxes rose, as salaries and wages of Government employees—city, State, and National Government—were doubled, and expenditures of all kinds were radically increased. Not satisfied with spending their increased incomes, people also went into debt and instead of being thrifty and saving, and paying off these debts, they allowed them to stand and grow with credit easy and no one pressing for settlement.

The year 1920 came along and agriculture was purposely deflated by action of the Federal reserve, demanding the withdrawal of credit to farmers, following a cry for a reduction in the cost of living. Farm prices dropped back one-half and never regained equality. But other groups were well organized and refused to respond to the demand for lower prices, and maintained themselves on the high basis. Agriculture suffered miserably from the inequality, multiplied its debt about four times, finally found its purchasing power exhausted when its credit failed, and in 1929 came the crash. Hardly two people agree as to why, but we all know it came and has now lasted into the third year, with the end not in sight.

It is my purpose to try to detail the conditions as they exist to-day, so that we may get a picture to survey and possibly get ideas as to what must happen before business resumes.

It may be we are on the way back to the 1914 basis, halted by laws artifically maintaining prices or by groups strong enough to withstand the downward tendency. Agriculture, on a purely competitive basis, has dropped down away below the 1914 basis. In fact, agricultural prices are to-day only 52 per cent of what they were in 1914.

My interest is to show just how much other groups are deflated by these years of depression. The Department of Labor has records of all industries from 1913 to 1933. I append below the comparative wages in 1913 and 1931, and wish to state that 1932 wages are not yet available in the tables published, but an average decline in wages is recorded of 12 per cent for 1932.

All union wages and farm prices in the United States compare as follows, with 100 representing conditions in 1913:

	1913	1931	1932
Union wages	100	273	241
Agricultural products	100	----------	52

This startling comparison shows that union wages are practically to-day two and one-half times what they were in 1913 and that farm products are one-half what they were in 1913. In other words, a workman in any union factory receives five times as much for a given service as the farmer receives.

I have collected the wages of various kinds of work from the Labor Department records, which follow:

Steel industry

	Per hour.
Plate mills:	
1913	$0.25
1931	.62
Bar mills:	
1913	.28
1931	.58
Standard rails:	
1913	.25
1931	.61
Blast furnaces:	
1913	.20
1931	.55
Bessemer converters:	
1913	.28
1931	.66
Open-hearth furnaces:	
1913	.23
1931	.70
Sheet mills and tin plate:	
1913	$0.48
1931	.63
Blooming:	
1913	.26
1931	.66
Foundries and machine shops:	
1913	.55
1931	.63
Puddling:	
1913	.32
1931	.66

Is it any wonder, with farmers receiving one-half of 1913 prices for their crops and steel-mill workers receiving nearly two and one-half times 1913 wages, that farmers are unable to buy wire fences and steel posts sorely needed? Neither can they buy farm implements made of steel and hauled to them over steel rails.

In 1913 it required 179 pounds of cotton to pay for a cultivator; in 1931 it required 691 pounds of cotton to pay for the same machine.

In 1913 it required 128 bushels of wheat to pay for a wheat binder; in 1931 it took 600 bushels of wheat to pay for the same machine.

And is it any wonder that steel mills are running at 30 per cent capacity, with most of the men out of work? Is there any way to start business between these two groups except by a readjustment—lower costs of steel and higher prices for farm products? We have an overflowing abundance of everything but are unable to exchange. We have people hungry and in want in the midst of plenty.

Building trades

[Wages in building trades with 100 representing wages in 1913]

All branches—	
1913	100
1931	276

	1913	1931
Bakers	100	279
Bricklayers	100	245
Building laborers	100	267
Hod carriers	100	297
Plasterers	100	274
Carpenters	100	263
Floor layers	100	262
Cement workers	100	253
Engineers	100	261
Electric wiremen	100	274
Fixture hangers	100	297
Lathers	100	262
Marble setters	100	235
Helpers	100	254
Painters	100	252
Fresco painters	100	267
Sign painters	100	248
Plumbers	100	244
Steam fitters	100	254
Helpers	100	346
Stone masons	100	269
Structural iron	100	251
Finishers	100	257
Tile layers	100	237
Helpers	100	291

Is there any wonder that the building trades are practically shut down, and the men without work? No records of compensation of executives are available, except in a few cases, and these cases show a higher increased compensation than the men.

Other trades

	1913	1931
Chauffeurs	100	253
Teamsters	100	287
Granite cutters	100	262
Stonecutters	100	262
Longshoremen	100	251
Bindery women	100	200
Bookbinders	100	252
Compositors	100	260
Electrotypers	100	274
Machine operators	100	228
Machine feeders	100	224
Pressworkers	100	299
Sterotypers	100	204

Hourly wage comparison in various industries

[All employees per hour]

	1917	1931
	Cents	*Cents*
Meat packing	27	47
Cotton goods	14	26
Boots and shoes	28	49
Men's clothing	26	70
Hosiery and underwear	17	35
Furniture	21	41

The records for all industries for 1931 and 1932 are available, but I have about exhausted the 1913 comparisons.

THE RAILROADS

The railroads are crying out for help and receiving it from the Public Treasury. How about their labor and executives—

Railroad wages, per hour:	
1915	$0.26
1931	.69
1932	.63

That is, railroad wages are two and one-half what they were in 1915. Cost of living is three-tenths above 1915, and farm products are one-half what they were in 1915. Railroad executives' salaries are now high, but comparisons with 1913 are not available. The salaries paid to presidents run from forty to one hundred and fifty thousand dollars per annum, with reductions claimed since 1930, with none authenticated exceeding 10 per cent. The railroad executives claim an average reduction since 1930 of 14 per cent.

The railroad rates have more than doubled since 1913, and translated into actual practice this means that you could transport a carload of steers in 1913 from Springfield, Ill., to Baltimore, Md., and pay the freight with 774 pounds of beef. In 1932 it took 2,018 pounds of beef to pay the freight.

In 1913 it took 167 bushels of wheat to pay the freight on 1,000 bushels from Wichita to Chicago, and in 1932 it took 484 bushels.

Yet these high rates find the railroads losing money. High wages find the employees out of work. The railroads lost last year $200,000,000. Their pay roll was $2,000,000,000-plus, or ten times their loss.

The railroads want truck transportation under Federal regulation, but if this regulation resulted in the death of the truck transportation it would not meet their problem because the trucks are doing only 6 per cent of the transportation business, and I might add that the truck business is here to stay.

A 10 per cent reduction in wages and salaries would meet their losses, but really what the country needs is cheaper transportation.

In my home district coal rates were $1 per ton in 1913 and are now $2.45, and coal is the very lifeblood of every factory in the United States. The freight is now nearly three times the cost of the coal.

Mr. GLOVER. Mr. Chairman, will the gentleman yield?

Mr. BRAND of Ohio. I yield.

Mr. GLOVER. The Interstate Commerce Commission now fixes the freight rate on every commodity that is shipped out of one State and into another. The railroad companies are powerless. They are penalized heavily if they charge a rate different than that fixed by the Interstate Commerce Commission. Does not the gentleman believe that if the Interstate Commerce Commission would relax and the railroads were allowed to fix their own rates at which they could carry these different commodities that they would make very much more money than they now make restricted to these high rates they are bound to charge?

Mr. BRAND of Ohio. I think the gentleman is entirely right. The railroads have been strangled by the laws passed by Congress administered by the Interstate Commerce Commission. I think if the Government would release its hold the interest of the railroads would be promoted.

We want world trade, and England, our chief competitor, lives and manufactures on the sea, and carries her products to every port in the world.

GOVERNMENT EXPENSES

Finally, I come to Government expenses.

Government expenses:	
1913	100
1932	250
Farm products:	
1913	100
1932	52

This means it takes five times as many hogs and five times as much milk and other farm products to meet the taxes as it took in 1913.

All of these conditions taken together result in the public sale of farms and the bankruptcy of farmers on all sides.

Of course, we are trying by law to bring the prices of farm products up, and if that is accomplished it will make just that much less pressure to bring other lines down.

What has happened in Government salaries since 1913? Average of all salaries paid by Federal Government: 1913, $1,136; 1933, $2,143, less furlough.

Mr. COCHRAN of Missouri. Mr. Chairman, will the gentleman yield?

Mr. BRAND of Ohio. I yield.

Mr. COCHRAN of Missouri. I think the gentleman is mistaken; it is $1,420.

Mr. BRAND of Ohio. Then the Civil Service Commission does not know what it is talking about. I got these figures from them; $2,143 is the average in the District of Columbia less the furlough, which is about 8 per cent.

Postal clerks and letter carriers

1913	$1,200
1933, less furlough	2,100

Other expenditures

Army:	
1913	$97,398,345
1932	338,948,617
Navy:	
1913	123,894,938
1932	358,271,936

I might add our Army and Navy expenditures are right at 50 per cent more than any other nation in the world.

Pensions:	
1913	$164,725,000
1932	1,135,892,795

Our pension expenditures are increasing and it is estimated will reach two billions per annum.

All appropriations:	
1913	$1,021,081,805
1932	5,618,700,409

You have a rather complete picture of 1913 and now. The farmers and the unemployed are the great sufferers from this maladjustment. Are we all to go back to the 1914 basis? That would be slow, and is being fought at every step. Apparently we will be years in this depression waiting for that. Let me repeat, with union-labor wages represented by 100 in 1913, those wages to-day are represented by 241, and in 1931 by 273—a reduction in one year of 12 per cent—and will therefore take 12 years of successive equal reductions to reach the 1913 basis. The cost of distribution has changed since 1913 from 100 to 161, and no declines in distribution are recorded. With farm crops selling for 52 per cent of 1913 prices we must adopt measures that will stop bankruptcy now.

Shall we come in the back door and cut the value of the dollar? Congress has that power. Theoretically it will cure the maladjustment—bring up prices of products that are low, and leave the high places much as they are.

Other nations of the world have already adopted this policy, broken down our tariff wall thereby, and made it almost impossible for us to sell to them. Has England lost anything by reducing the value of her pound sterling? She has undoubtedly gained much. Can we afford to cut down the value of our dollar in order to reflate, stop the growing damaging importations from abroad, made possible by cur-

rency abroad of lower value than ours, open up our natural avenues of export by having a currency of equivalent value to theirs, and at the same time raise the value of our raw materials to a normal price, or shall we double our tariffs? That would stop undesirable importations, but offers no relief in connection with securing business abroad, and does in no way touch the low prices of our farm products. And we must come to a conclusion. Other nations have taken advantage of us by means of currency regulation, and are profiting by our indecision, and our suffering increases day by day.

Mr. BOYLAN. Mr. Chairman and gentlemen of the committee, I have the great American habit of reading the newspaper at breakfast time like all of you. This morning I spread out the newspaper just as I was about to commence my breakfast, and suddenly all the pleasure of my meal left me. I saw emblazoned in gigantic headlines across the front page of the paper—

The President lashes Congress. They have exceeded the Budget estimates by $163,000,000.

Now, I was perturbed by this, and justly so, because, together with my distinguished colleagues on our committee, we had burned the midnight oil in order to reduce the Budget estimates submitted by the President. I said to myself, "How can this be? We brought in a bill that carried approximately $1,600,000 less than the President's estimate, and yet here he says the total appropriations to date are $163,000,000 over the Budget estimates."

I hastily finished my breakfast and hied speedily to my office and commenced an investigation. I found that the President, as much as I respect and admire him, had not made an exactly fair statement. You say, "Why did he not make a fair statement?" Well, he did not because when he submits to the Appropriations Committee the original sheets of the Budget, as you gentlemen know, it is customary for the Appropriations Committee to commence the hearings during the month of November in order to have something ready for the Congress when we convene here on the first Monday in December. So naturally these galley proofs, as they are called, were sent to the committee, and the subcommittees commence working. By the time the Congress had assembled practically three of the major bills were not only well under way but practically completed.

Then, on the 6th day of December, the President sent in with his message what he called a supplemental or modified Budget. Mind you, the committee had already been working for a month on the original Budget estimate that was submitted to it. Lo and behold, we found this new Budget was a modified Budget. So upon investigation I found out about it, and I looked it over, and I gave it a designation. I called it a "phantom budget."

I got out our old friend Noah Webster to see what he had to say about a phantom. He says:

A phantom is something that has a mere appearance or a seeming.

Then, to make it a little clearer, I looked up my old friend and distinguished American poet, Bayard Taylor, who used the phrase, "Phantom isles are floating in the skies."

So, therefore, we come to this phantom budget. Now, there would not be any objection on behalf of the Appropriations Committee if the President in making his statement had said, "The amounts appropriated so far exceed the phantom budget"—not the original Budget but the phantom budget—"$163,000,000." That would have been fair. Nobody would take exception to the President then, because that would be a fair statement. But the President is in error when he states to the people of the Nation that we had exceeded his Budget by $163,000,000. On the contrary, we not only had not exceeded his Budget as submitted in November, but we have reduced it to date to the extent of $66,000,000.

I can not understand how the board of strategy, or whoever gives the President these matters, can take the trouble to go into this thing and not see that it was manifestly an unfair statement to make.

Now, I will make another statement to you. The Bureau of the Budget has been in operation about 12 years, and during that time never before has any President sent in a so-called phantom budget, not one of them. So I say that it is very unfair to the members of the Appropriations Committee, consisting of men from both sides of the aisle who are giving the best that is in them to bring into this House reduced estimates under the Budget proposed by the President in order to effect economy.

Of course, this phantom budget that the President suggests has a few strings attached to it, and I just want to enumerate a couple of the strings.

He says:

The appropriations which I recommend to be made for the fiscal year ending June 30, 1934, as shown above, total $4,218,808,344, and are predicated upon—

Here is where the string comes in—

the enactment of legislation which I hereby recommend providing (a) for a temporary reduction in the rate of pay of Federal personnel to be applied to all civil employees.

And, furthermore, he says:

(b) for amending certain laws providing for benefits to veterans which would produce a further saving of $127,000,000.

He estimates the saving on the reduction in salaries as being $55,000,000.

Now, he says, if you cut the salaries 11 per cent and reduce the veterans' appropriations $127,000,000, then you can have this modified Budget.

You gentlemen know that we do not know what the possibility is of passing this proposed legislation. You know, as well as I do, that the Congress can not wait until the last day of the session in order to make up the appropriation bills. Therefore, you see it is manifestly unfair to give this erroneous impression to the people of the Nation, in view of the fact we are working so hard to save every possible dollar for the Government in these days of stress.

Mr. McSWAIN. Will the gentleman yield for a question?

Mr. BOYLAN. I yield.

Mr. McSWAIN. It would seem then that the so-called phantom budget is predicated upon an imaginary state of laws.

Mr. BOYLAN. Exactly; just as I quoted Bayard Taylor, when he said, "Phantom isles are floating in the skies." The gentleman has stated the crux of the whole matter.

Now, getting down to the independent offices appropriation bill, after our distinguished chairman, the accomplished gentleman from Virginia [Mr. WOODRUM], finished, it reminded me of an experience I had in the city of Washington on January 12, 1928. On that day we had a dinner to celebrate the victory at New Orleans of that immortal Democrat and sterling patriot, Andrew Jackson, at the Mayflower Hotel. It was one of the largest dinners I had ever attended in Washington. All the prospective candidates for the Presidency were lined up on the dais and several other distinguished speakers were there. The meal went off quietly and peacefully, and I may say that, among others, Will Rogers was present. The first speaker was announced at about 9 o'clock and was Mr. Claude Bowers, that distinguished publicist and newspaper man of the city of New York. You have all read his books on Hamilton and Jefferson and the Party Battles of Jackson's Time and other works. Mr. Bowers is a very prolific writer and a man whose language flows beautifully. Mr. Bowers got up and, as the first speaker, spoke by the clock for three hours. After Mr. Bowers had finished there was nothing left to be said about Andrew Jackson, the Democratic Party, or the history of the United States from colonial times down to January 12, 1928. About 1 o'clock in the morning Will Rogers was called upon, and Will got up and scratched his head and said:

Well, I am in the same position as the rest of the speakers. I came here with a speech in my system, but that darned fellow Bowers ruined every one of us.

So it is that our distinguished chairman, Mr. WOODRUM, has ruined every member of the committee. He has left us

very little to say, but it was well said and we feel that you profit by the fact that he has said it.

Our experience on the committee has been very pleasant. We have not only the splendid chairman, Mr. WOODRUM, but also Mr. HASTINGS, Mr. WRIGHT, Mr. WASON, and Mr. SUMMERS, all men of splendid experience with whom it is a distinct pleasure to work. So I will say that in the handling of the measures before us we proceeded, as the other subcommittees of the great Appropriations Committee proceed, without any partisan view at all. I may say that in the entire discussion of the bill now before you not over one controversial matter came up, and on that the division was not according to party lines.

As the gentleman from Virginia [Mr. WOODRUM] has said, this independent offices subcommittee appropriates for 28 different independent establishments of the Government. In addition to this we have to take care of special projects that are ordered by the vote of the Congress, such as the Chicago World's Fair, the distribution of wheat and cotton, the Federal Home Loan Bank Board, the George Washington Bicentennial Commission, and so forth.

It really would be wise, I think, for the Members of the House who are not members of the Appropriations Committee to attend the sessions of the subcommittees and listen to the hearings. I do not think there is any other way you can get a comprehensive grasp of the ramifications of the different departments of our Government as well as you can by sitting in on the Appropriations Committee hearings and listening to the budget officers from the different bureaus tell their story.

Of course, we think that our subcommittee is a kind of important subcommittee. We ought to, because our appropriations are practically one-fourth of the entire amount appropriated by the Congress each year. For instance, the bill that we brought in to you totals $1,002,890,779, which is over $21,000,000 less than the 1933 appropriation, and a decrease in the Bureau of the Budget's estimate—now, mind you, I am speaking about the regular estimate and not the phantom estimate—it is a decrease from the Budget estimate of $1,657,000.

This bill represents approximately one-quarter of the total Federal Budget. The appropriations for the Veterans' Administration are more than 90 per cent of the total of our bill, so that the remaining 27 independent offices are carrying less than 10 per cent of the total appropriations of the independent offices bill.

This bill sustained the heaviest cuts of any of the other bills last year. In the case of some bureaus and commissions the appropriations were substantially below the needs for the public service.

We are all in favor of economy, but if we do not give the departments enough to carry on, how can they function? Look at the money we could save, as my distinguished friend from Indiana [Mr. WOOD] knows, if we could abolish all the departments, abolish all the clerks and all the machinery of government; just look at the money that would be saved, but who would carry on the functions of the Government?

Sometimes we talk about economy until it gets to be ridiculous. People are going to do this and they are going to do that, but can you run the Government on wind, can you wave a magic wand and by that waving of the wand perform the service of 700,000 employees? It would be a wonderful thing if we were endowed with such power.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WOODRUM. I yield the gentleman 10 minutes more.

Mr. BOYLAN. Some may say if we were able to run the Government without any employees it would be splendid. That would balance the Budget, but in the meantime the Government could not function; so we have to be reasonable about these things.

Mr. STOKES. Will the gentleman yield?

Mr. BOYLAN. I yield.

Mr. STOKES. I want to ask the distinguished gentleman whether or not there is any possibility of saving the $412,000,000 in the veterans' expenditures as recommended by the National Committee for Economy in Government during the coming year?

Mr. BOYLAN. I do not think so; I did not intend to go into that phase of the bill, because I thought the gentleman from Virginia [Mr. WOODRUM] had covered it so fully and completely. I do not believe, however, from my studies, that such a saving could be made.

A comparison with the amount carried in the bill for 1934 with the amount appropriated for the same purpose in 1932 shows, as has been stated by my colleague, a total reduction, exclusive of the Veterans' Administration, of $11,425,000. Over the 2-year period of 1932 it was 16.7 per cent.

Mr. BRIGGS. Will the gentleman yield?

Mr. BOYLAN. Yes.

Mr. BRIGGS. I notice in the committee's report the amount recommended by the committee is $21,395,000 less than the 1933 appropriation.

Mr. BOYLAN. The gentleman is correct.

Right there I would like to say a word about the Bureau of the Budget. The President has the right, under the law, to make up the Budget. But there is absolutely no coordination between the Director of the Budget and the Appropriations Committee. Whatever hearings are held by the Director of the Budget the Appropriations Committee knows nothing at all about, and unless we cross-examine the witness we are not able to bring out any information that was submitted to the Director of the Budget in making up his estimates.

I have spoken about this in other years, and while I have no desire to infringe upon the rights of the Executive, I do think that at least informally there should be a connection between the Director of the Budget and the Appropriations Committee of the House, because I feel that if we had this information much valuable time could be saved and we could grasp the situation more comprehensively.

Now, you know we appropriate $143,322 for the American Battle Commission.

This completes the entire appropriation providing for the monuments and memorials to American soldiers resting in foreign countries. After its completion this year, these memorials will be turned over to the War Department for proper keeping and maintenance.

CIVIL SERVICE COMMISSION

One of the bureaus sustaining extraordinary heavy cuts last year and which has been allowed certain increases by the Budget and by the committee for next year is the Civil Service Commission. Their appropriation for 1932 is $1,877,192; the amount carried in the bill for 1934, while somewhat in excess of the 1933 appropriations, is $502,722 less than the appropriation for 1932, a reduction of almost 30 per cent. About 50 per cent of the work of this commission is on account of civil-service examinations; the latter of course have fallen off materially under the economy program, but they have by no means ceased entirely. The commission estimates that examination work has not been cut in excess of 60 per cent, which, of course, is 25 per cent of their entire work. The other work of the commission, that of enforcing the provisions of the civil service act, such as the apportionment provisions of the law, the retirement provisions, and so forth, have increased somewhat as a result of the provisions of the economy act and other economy measures, so that the committee felt that a cut of 30 per cent in this appropriation should not be further increased in view of the fact that the reduction in volume of work has only been about 25 per cent.

INTERSTATE COMMERCE COMMISSION

The Interstate Commerce Commission is another establishment which sustained very heavy reductions in its appropriations last year. The total recommended in the bill for this commission, while it is $10,000 less than the amount appropriated for 1933 because of the legislative furlough, represents an actual increase of approximately $500,000. However, as compared with the appropriation for 1932, the amount carried in the bill is a reduction of $2,274,834. A large portion of the reduction of last year was based upon the expectation that the recapture provision of the law

would be repealed. This provision has not been repealed and it has been necessary to grant a partial restoration of these appropriations in order to permit the commission to perform the duties imposed upon it by law. The severity of the cut of the appropriations last year for this commission is evidenced by the fact that the employees have had to take an administrative furlough of almost one month in addition to the legislative furlough.

FEDERAL RADIO COMMISSION

The consolidation of the radio division of the Department of Commerce with the Federal Radio Commission has resulted in a savings of $331,653 in the amount recommended in the bill for 1934 for the consolidated service as compared with the combined appropriation of $1,112,080 for the two separate services in 1932. There has been a reduction of 52 in the number of employees, resulting from the consolidation; 15 of these were in Washington, 37 in the field.

SHIPPING BOARD

Appropriations for the Shipping Board are from two sources: First, a direct appropriation from the Federal Treasury for the operation of the fleet and, second, appropriation of indefinite amounts from the various funds of the Shipping Board. The latter consists of—

(a) The amount of operating funds on hand July 1, 1933 (estimated)	$8,600,000
(b) Operating receipts	864,200
(c) Liquidation expenses (proceeds of sale)	1,000,000
(d) Interest on bank accounts	5,000
Total	10,469,200

In addition to the foregoing indefinite appropriations the bill carries a direct appropriation from the Treasury of $2,875,000, making a grand total made available in this bill for the operation of the fleet of $13,344,200.

Last year the bill carried no direct appropriation from the Federal Treasury, so that the present bill is apparently $2,875,000 in excess of the current appropriation. However, the total estimated amount of the indefinite sum appropriated last year from Shipping Board funds was $18,958,500, so that the total sum authorized in the current bill is $5,614,300 less than the corresponding amounts for last year.

BOARD FOR VOCATIONAL TRAINING

The Budget recommendation of $2,786,283 was allowed by your committee.

FEDERAL TRADE COMMISSION

Your committee recommended cutting the Budget estimate of $1,109,550 to $510,000, which makes a saving of $599,550. The power and chain-store investigation will be completed by July 1, 1933. The commission wanted to start three new investigations at that time. Your committee thought we could dispense with them at this time.

FEDERAL POWER COMMISSION

Your committee allowed the Budget estimate of $235,373. The receipts of this commission in the 10 years from 1922 to 1932 over expenses were $805,954.

BUREAU OF EFFICIENCY

Your committee allotted the Budget estimate of $146,298, which is $13,202 less than 1933. This bureau paid its way, showing savings as the result of its work of about $316,000 during the present year.

VETERANS' ADMINISTRATION

Your committee allowed the Budget estimate of $945,988,634, an increase of about $18,000,000 over 1933. My colleague [Mr. WOODRUM] has gone into this item very fully, so I will not speak about it. General Hines gave a very complete and exhaustive report on his various activities, which you will find set out in detail in pages 500 to 547 of the hearings.

UNITED STATES GEOGRAPHIC BOARD

I might say a word about one little bureau that is very important but very modest and is scarcely known but that does a very big work. That is the United States Geographic Board. The appropriation for next year for this bureau is only $9,778. Yet this board does a monumental work. It decides upon the spelling and pronunciation of the names of the various geographic divisions in the United States. It is an important board, because from its decisions no appeal can be taken.

In conclusion, I trust that the report of our committee will meet with your approval. We are but your stewards. You have assigned to us a particular work. We have tried to discharge the duties allotted to us to the very best of our ability. [Applause.]

Mr. SUMMERS of Washington. Mr. Chairman, I yield 15 minutes to the gentleman from Wisconsin [Mr. AMLIE].

Mr. AMLIE. Mr. Chairman and members of the committee, I want first to refer to the remarks made by the member of the committee from New York [Mr. BOYLAN], that if we are to have bureaus and commissions performing functions, then they should receive appropriations such that those functions could be performed. Otherwise, in all honesty, it would be better to abolish these commissions altogether.

In his remarks the gentleman from Virginia [Mr. WOODRUM], chairman of the subcommittee, said that any reductions made in the appropriations for the independent offices had been made where it was thought by the committee that they could be made without in any way impairing useful governmental functions. If we analyze the reductions that have been made in the independent offices appropriation bill, as reported by the committee, we find that the total of those reductions, leaving out nonrecurring items, will amount to about $657,522. Of this amount $599,550 comes out of the Federal Trade Commission. It seems to me the effect of that statement is to say that the reduction in the Federal Trade Commission alone can be made without any interference with the useful functions of Government. The effect of that reduction will be to wipe out altogether the economic department of the Federal Trade Commission. I think perhaps it is generally understood that the effect of this reduction will be to do away with the effectiveness of the Federal Trade Commission. I read now from an article from the Washington Star, published a couple of days ago, which states:

> While there was an unwillingness on the part of anyone in authority to be quoted at this time, it was made plain that it was felt the appropriation slash virtually would amount to junking the commission.

Mr. WOODRUM. Did the gentleman give the date of that?

Mr. AMLIE. I think that was last Saturday, January 29, 1933.

Mr. WOOD of Indiana. Mr. Chairman, will the gentleman yield?

Mr. AMLIE. Yes.

Mr. WOOD of Indiana. I think if the gentleman will study the hearings he will find that the elimination of a greater portion of this amount, some $300,000, was taken away from the research department because of the fact that their work is done and they have nothing to do unless they create a lot of new work at a time when under existing circumstances the committee felt there was no necessity for it.

Mr. AMLIE. It is my understanding that while the utility investigation has been completed, in so far as the field work goes, there is a great amount of material on hand that has not been prepared, or digested in such a way that it would be readily available to or understandable by Members of Congress.

Mr. WOOD of Indiana. For all of the unfinished work there is ample appropriation to complete it. Every single investigation that was ordered either by the Senate alone, and it orders most of them, or by the House and the Senate together, will be completed, the office work as well as the field work, which the gentleman says is completed, within the appropriations now available.

Mr. AMLIE. That is not my understanding. I have read the hearings and I have talked with people closely connected with this work. It is true the work in the field will be completed, the special staff will have performed their work, but there will still be a large amount of work to be performed by the regular staff of the Federal Trade Commission.

But let us question the decision of the committee, made by the Democrats and the Republicans on the Appropriations Committee, that no further new work should be undertaken at this time. First, I would like to say that the reduction in the appropriation of the Federal Trade Commission amounts to 65 per cent, and that 24 per cent of that reduction was contributed by the Republican administration and 41 per cent by the Democratic Appropriations Committee.

I want to read from the report of the hearings, the Republican and Democratic platform pledges relating to that proposed investigation, which the chairman of the subcommittee, speaking earlier in the day, stated in his opinion was unnecessary.

Mr. WOODRUM. Will the gentleman yield?

Mr. AMLIE. I yield.

Mr. WOODRUM. The chairman of the subcommittee stated it was the judgment of the subcommittee and the full committee that no new investigations should be initiated by the Federal Trade Commission at this time; that if they were necessary, that fact ought to be decided by the new administration which takes office in less than a month; and certainly we ought not embark upon such investigations, at the mere instance of the Federal Trade Commission, who are interested in trying to find something for their army of economists to do.

Mr. AMLIE. I take it that the members of the Democratic Party intend at this time to go ahead and do those things that will be necessary in order to carry out their campaign pledges.

The Democratic platform provides, among other things:

> We advocate the protection of the investing public by requiring to be filed with the Government and carried in advertisements of all offerings of foreign and domestic stocks and bonds, true information as to bonuses, commissions, and principal invested, and the interest of the sellers.

I feel there is a great deal of force in the gentleman's remark. The appropriations for the Federal Trade Commission might, perhaps, be left to the incoming administration. Rather than see an appropiration for the commission which will virtually scuttle it, I would prefer to see the whole of the appropriation stricken out and no appropriation made for the commission at all, leaving it squarely, then, to the incoming administration whether they wish to save the Federal Trade Commission or not.

Reduction of the Federal Trade Commission appropriation to $510,000 is repeal of the legislation creating that commission and prescribing its duties. Far better repeal the statutes and the duties they impose than hold out this pretense of protecting the small or the honest business from the depredations of its unscrupulous competitors. To show the size of the task imposed upon the commission by the statutes, I may say that since the beginning of its activities in 1915 and up to June 30, 1932, it has entertained over 20,000 complaints of violations from persons and corporations who believed themselves injured; it has docketed almost 7,000 of these for formal investigation; has entered into stipulations with the respondents in 1,300 cases; has issued formal complaints in more than 2,000 cases, and has issued cease and desist orders in over 1,100. Over 200 of its more doubtful orders have been reviewed in the courts, and in more than half of these its views have prevailed with the courts. As an example of its current activity, the commission reports that on December 31, 1933, it had more than 400 preliminary investigations of law violations pending, 425 applications for complaint pending, 183 complaints charging violations of law were in process, and it had 9 cases before the Federal courts. The Bureau of the Budget estimated the cost of these legal activities for 1934 at $575,206, which sum does not include salaries of commissioners nor any part of the administrative overhead which is essential to the conduct of the legal work itself.

In its fact-finding work the commission has conducted a great number of exhaustive and intensive inquiries into matters of the highest economic importance to the country. Its investigation of the meat-packing industry shortly after the war led to a decree of restraint against the large meat packers, which, after 10 years of evasion by the packers and litigation in the courts, the Supreme Court last year upheld in vigorous language. In its recent uncovering of the propaganda activities of the power companies the commission added a significant, although unsavory and unwelcome, chapter to the documented history of this country. It has followed this phase of its power investigation with expensive research into the books of many of these power companies and their superimposed holding companies. I have told part of that story in the first session of this Congress—the story of inflated valuations of utility properties, whereby securities are manufactured for the unwary investor, unwarranted fixed charges are assessed against the consumer of electricity, and control of these properties is passed around among the inner circles by the manipulators at no cost to themselves.

I feel that I can talk to the gentlemen on the Democratic side of the aisle about the Federal Trade Commission, because it is peculiarly in harmony with their theory of government, and with their pledges to the public. The Federal Trade Commission was created in the Wilson administration. It was probably fathered by Justice Brandeis more than by any other individual, both the Federal Trade Commission and the Clayton Act. When they were enacted into law, it was the feeling, after much discussion in Congress, that the Democratic Party did not intend to follow a policy of laissez faire. On the other hand, they did not intend to permit monopolies to grow without any restriction or restraint, and then attempt to regulate those monopolies later on.

It was rather their feeling that the Democratic Party ought to follow an intermediate course, by prohibiting the practices that have a tendency to lessen competition and create monopoly. At the same time they decided to follow a policy of closely observing the processes by which competition is avoided. To effect the latter purpose they retained within the Federal Trade Commission the fact-finding body originally created by Theodore Roosevelt and known as the Bureau of Corporations. In addition to creating the Federal Trade Commission, they also passed the Clayton Act, which sought further to define as a matter of legislation those practices which they considered as likely to lessen competition.

This was the political background that led to the creation of the Federal Trade Commission. It was then the type of political liberalism for which the Democratic Party stood. It is still the type of political liberalism for which the Democratic Party stands if I am able to read correctly their party platform and to understand the pledges made by their candidates who scored such an overwhelming triumph last November.

It is singular, therefore, that the Federal Trade Commission, which never had the love of the conservative Republicans and which the conservative Republicans would have abolished at any time during the past 12 years but for the fact that they were afraid of the Democrats, now when the Democrats get into control, about the first thing that they propose to do is to abolish the functions of the Federal Trade Commission by reducing its appropriation to a point where it can not function.

The reduction of the Federal Trade Commission appropriation to a point designed to scuttle it is not an economy move but legislation of far-reaching consequence. It accomplishes the virtual repeal of large portions of the antitrust laws of this country by scrapping the functions of the Federal Trade Commission act, most of the Clayton Act, and for good measure the Webb-Pomerene Act, which is designed to promote cooperation of domestic corporations in foreign trade while preserving the antitrust laws with respect to their domestic activities.

During the past 12 years the Republican Party has given to this Democratic child a rather scant diet. I do not believe that its accomplishments have been what its sponsors had anticipated. Nevertheless, I think that the commission has done remarkably well, considering the fact that we have had 12 years of a national political administration that has had for its motto, "more business in Government and less Government in business." In other words, laissez faire.

The investigation of the public utilities of the country which is now being concluded is the most important and far-reaching of any investigation that has ever been conducted by any governmental body.

I feel that the Federal Trade Commission has perhaps given a better accounting of itself than most commissions. I have rather been struck, during the past few days of debate, by some of the facts presented. I notice that in the Department of Commerce the Bureau of Foreign and Domestic Commerce goes through with substantially the appropriations made heretofore, somewhere in the neighborhood of $4,000,000. I am going to go back a little. During the past 12 years we have had, on the one hand, the Bureau of Foreign and Domestic Commerce in the Department of Commerce setting forth as a justification for continuing those large appropriations the fact that they had aided American investors in buying foreign bonds and had furnished the information upon which those purchases were made. And while we have seen the Government giving to the New York bankers aid in selling to the investing public large amounts of foreign obligations, we have seen the proponents of a high protective tariff come here and demand an increase in tariffs and get it.

It seems to me the significant thing about the whole proceeding is the breakdown of all governmental policy. One is utterly contradictory of the other. You can not at one time unload on the American people large amounts of foreign obligations and at the same time take steps that will make it nearly, if not virtually, impossible for those countries to pay those obligations by a free exchange of goods. Still, when those arguments come up, I notice the Bureau of Foreign and Domestic Commerce is able to make a case of how much they have aided business. On the other hand, because the policies of the Federal Trade Commission are a little different, because its efforts are in behalf of the consumers, because it can not be shown in dollars and cents as an aid to business for the time being, it is made the victim. If it were only this time that this particular department was marked out for slaughter I should perhaps accept the explanation of the chairman of the subcommittee, but the same thing was true last year when the commission was right in the midst of the utility investigation. It was then slated for a reduction in appropriation of 34 per cent. This time it is 65 per cent. I do say that on the strength of this, the intention is not to make economies where they can be made but to eliminate this department. If that is the plan, then I prefer to see the total and complete elimination, so that the incoming administration may judge for itself if it is going to go along on a policy where the work of the Federal Trade Commission will be necessary.

I want to refer to a talk I made a year ago in an effort to save the appropriation of the Federal Trade Commission. I made a list of the write-ups shown by the investigations so far completed, showing fictitious write-ups, amounting to over $900,000,000, that had been uncovered by the Federal Trade Commission investigations. I want to assure the gentlemen that there was genuine interest in these disclosures.

I do not know what the incoming administration is going to do about regulating utilities, but if any administration was ever elected on a promise of control and regulation, it is the administration coming in on the 4th of March. I am sure that no President has been more genuinely and sincerely interested in controlling utility activities and protecting the consumer than is President-elect Roosevelt. Whatever he may do along this line will be based essentially upon the facts disclosed by the investigations that will be concluded, as far as the field work goes, next June, showing the set-up of these public utilities and also showing the amount of actual valuation and the amount of water written in.

As I say, there is a real interest on the part of the people in the manner in which both the investors and the consumers have been robbed. Only yesterday I received a request from a gentleman in North Carolina asking for 1,000 copies of this particular talk. I have received requests from almost every State in the Union, for probably in excess of 25,000 copies of this particular talk showing the amount of these fictitious write-ups. So I say, there is a genuine interest on the part of the people in finding out how they have been robbed as investors and how they are being robbed as consumers. [Applause.]

[Here the gavel fell.]

Mr. FREAR. Mr. Chairman, I ask unanimous consent that the time of the gentleman be extended one additional minute.

The CHAIRMAN (Mrs. ESLICK). Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. FREAR. The talk the gentleman speaks of was put in the CONGRESSIONAL RECORD.

Mr. AMLIE. Yes; on March 5 and April 6 of 1932.

Mr. WOODRUM. Mr. Chairman, I yield one minute to the gentleman from Missouri [Mr. COCHRAN].

Mr. COCHRAN of Missouri. Mr. Chairman, on January 4 I made some remarks in reference to the work in the Monument grounds. I have received a letter from Colonel Grant further explaining that situation. I ask unanimous consent to place it in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The letter referred to follows:

PUBLIC BUILDINGS AND PUBLIC PARKS
OF THE NATIONAL CAPITAL,
Washington, D. C., January 7, 1933.

Subject: Improvement of Mall and Washington Monument grounds.

The Hon. JOHN J. COCHRAN,
House of Representatives, Washington, D. C.

MY DEAR MR. COCHRAN: I was glad to see from your remarks quoted on page 1303 of the CONGRESSIONAL RECORD for January 4 that you have confidence in the views of engineers. Occasionally the engineering point of view, which is usually a practical one, is overruled by other considerations, and sometimes this is not to the interests of the Government. However, in this particular case you have apparently been misinformed, and I venture to submit the following in order to make the case clear.

The work that has been done in the Mall east of Fourteenth Street is not inconsistent with the situation as to the Washington Monument grounds. You are quite right in saying a very careful investigation recently made shows that the 1901 plan for the Washington Monument grounds can not be carried out without incurring an unreasonable expense. Moreover, many, of whom I am certainly one, are of the opinion that the 1901 plan for the Washington Monument grounds is incongruous with the chief characteristics of the Washington Monument itself, that is, simplicity and dignity, and that for æsthetic reasons, too, this plan should be abandoned. Of course, I do not presume to put my opinion up against that of architects and others who are entitled to be considered expert in matters of æsthetics; but where the doctors in æsthetics disagree, the practical man has to choose between different views.

Ever since I have been here I have, therefore, opposed the carrying out of the 1901 plan for the Washington Monument grounds and sought authority from Congress to make a thorough study of the situation as to these grounds, both from the engineering and æsthetic points of view. The results of that study are contained in a report which should reach Congress soon, and my recommendation is that no material changes be made in the present character of the Washington Monument grounds and that roads be relocated and planting done as becomes necessary to bring these grounds into proper relation with the Mall to the east and the Lincoln Memorial grounds to the west, as and when needed, in accordance with an informal plan designed by Mr. Frederick Law Olmsted.

In regard to the Mall east of Fourteenth Street, you seem to have been misinformed, perhaps by some newspaper articles that appeared last summer. The work done up to date is not inconsistent with the situation that has developed in the Washington Monument grounds. The essential part of this work, in my utilitarian and economical mind, is the fact that the dip of the Mall from the Old Agricultural Building to Constitution Avenue had to be straightened out and the section of the Mall between Twelfth and Fourteenth Streets brought into relation with the Mall to the east of Twelfth Street. The new monumental Department of Agriculture Building was 8 feet down in the ground, and it was necessary to dig this excess height off on the south and raise the north edge of the Mall so as to create a building site where the Department of Agriculture Greenhouses now are commensurable with the site on which the National Museum stands. The earth needed to complete this fill had to be excavated from the public buildings on the north side of Constitution Avenue. As there was no other place where this material could be deposited within very considerable distance, it was a distinct gain in the cost of the buildings to the Government to be able to make available to the contractors this near-by area as a

disposal dump. Moreover, since the fill had to be made sometime, it was very much cheaper to get it in connection with the excavations for the new buildings than to wait several years and then have to pay a high price for the additional earth needed. These purely economic and practical reasons are the ones which actuated the work in the Mall being done between Twelfth and Fourteenth Streets at this time.

It was realized that starting the Mall project in this square would temporarily create conditions which from the standpoint of appearances might be disagreeable for a time, but it seemed worth while to risk this objection in order to take advantage of the saving in cost to the Government, reflected both in the cost of the new buildings and the cost of the Mall. These appearances are worst at Fourteenth Street. Eventually Fourteenth Street will have to be carried through at a lower level for traffic reasons, as this street carries all of the commercial and some passenger traffic to the south over the Highway Bridge. In a few years the Highway Bridge will have to be rebuilt; but this bridge was repaved and traffic conditions on it have been somewhat bettered by the abandonment of the street-car line, so that it will be a period of years before the construction of a bridge of greater capacity will require an increase in the capacity of Fourteenth Street between Water Street and Constitution Avenue. When this time comes, the grades of the Mall will be that much done toward the project, which will be expensive at best. Until that time comes, the dip down from the north road of the Mall into Fourteenth Street will be an inconvenience which seems to me justified by the saving of the very considerable expense that would have to be incurred then to raise the north edge of the Mall up by buying earth for this very material fill. In the meantime it will probably be good practical policy on the part of the District to repave Fourteenth Street on its present grades, widening it to take care of the present traffic. Whether this is the thing to do or whether it would be better to lower it to its ultimate grade right away is an economic problem which the Commissioners of the District will, of course, have to decide.

The approved plan for the Mall, as you probably understand, calls for an open vista from the foot of the Capitol to the Washington Monument, with the ground gradually rising toward the latter. Fortunately, the general grades of the Mall are such as to permit this effect to be obtained with very little more grading than what has already been done. This was first suggested in the L'Enfant plan and was worked out in considerable detail in the 1901 plan. As the latter was largely an architectural and landscape plan, rather than an engineer design, the National Capital Park and Planning Commission was given authority to revise it as might be necessary. The principal revision made to date is the elimination of the very expensive fill or terrace from Fourteenth Street across to the Washington Monument and the substitution therefor of a terminal to the central park part of the Mall just west of Fourteenth Street. Of course, no work has been done on this as yet, and the engineer commissioner and myself are trying to persuade the commission to put this terminal just east of Fourteenth Street and thereby save a rather costly overhead crossing of Fourteenth Street, the necessity for which now seems doubtful to some of us. I really believe that something of this kind can be worked out which will be æsthetically quite satisfactory. Of course, it takes time to secure approval of such changes in a plan which has been on paper and in the public mind for over a quarter of a century.

In your statement you mention that the Monument grounds scheme can not be carried out unless the Monument is rebuilt or underpinned, and that this would cost $2,000,000. While the underpinning alone of the Monument is estimated at only $600,000, my estimate for the total cost of carrying out the 1901 plan for the Monument grounds is $7,550,000. This seems to me enough reason for abandoning that part of the project at the present time; and from the standpoint of the incompatibility of the 1901 plan with what seems to me the present character of the Washington Monument, I hope this plan will never be carried out.

The practical and economical way of carrying through the Mall project seems to me to be to do it one section at a time, working only where something has to be done anyway. This will avoid fixing up things temporarily at a considerable expense and then having to come back later and change it again. This is the theory that I have worked on as far as lays within my jurisdiction and duties, and is, I am sure, the sensible procedure. To try to do the whole thing at once as one project would, of course, be very much more satisfactory from the standpoint of looks, but such a large expenditure at this time surely does not seem justified. The next step in the Mall seems to be to improve the old Botanic Garden, which is being vacated this year, and to begin the Mall development at the base of the Capitol Hill, where the removal of the Botanic Garden will leave the grounds in a very bad condition with some abandoned greenhouses, etc. Unfortunately, the execution of the design for this section made by the landscape architects for the Commission on the Extension of the Capitol Grounds will itself be very expensive, nearly $400,000. I am, therefore, asking this year for only $100,000 to do what is necessary in this area to outline the future development, leaving the very expensive features to be done or not as may be thought advisable in the future. I hope that this will have your indorsement.

Very respectfully yours,

U. S. GRANT 3d, *Director*.

Mr. WOODRUM. Mr. Chairman, I yield 15 minutes to the gentleman from Arkansas [Mr. MILLER].

Mr. MILLER. Mr. Chairman, I believe the Members of the House who had the privilege of listening to the statements made by the chairman of the subcommittee as well as the statements made by the gentleman from Washington in explanation of the various provisions of the bill under consideration have been well repaid for being here, and it is about one particular item in the bill that I want to talk for just a few minutes.

For the last several months we have heard a great deal and have read in the papers much about the necessity of reducing governmental expenses. The truth is, that is about all we have heard—the absolute necessity of reducing the expenses of Government operation. During this time there has been directed by certain organizations in this country an effort to reduce these governmental costs at the expense of certain war veterans. This agitation is particularly aimed at the class of veterans receiving benefits under and by virtue of the act of July 3, 1930. The gentlemen who were Members of Congress when that act was passed well know that it was passed as a matter of compromise, but it does not follow that the act is not a proper act and that it is not proper legislation.

I call attention to the fact that under that act there have been filed, or there had been filed up to November 30, 1932, 959,027 claims. That is to say, that many veterans of the World War had filed claims alleging they were suffering from a permanent disability of 25 per cent or more, but were unable to supply the necessary proof to show that the particular disability had been occasioned or had been aggravated by military service. Therefore, they came under the provisions of the disability act; and of the number of claims filed up to November 30, 1932, there had been allowed a total of 438,877 claims. So, on that particular date the Government was expending upon this item alone the sum of $7,300,000 per month. This expenditure was being made to that class of veterans who were unable to prove their disabilities to be service connected; and it is against this group that a great deal of agitation has been directed, a great deal of propaganda has been released.

In my opinion the criticism of the Congress and the criticism of the administration of the act and the act itself are not well founded. That act serves a double purpose. The question as to whether or not a veteran is suffering from a service-connected disability is one that has to be established largely by medical proof. In other words, the question as to the ability of the veteran to establish whether or not his present disability was occasioned by or aggravated by his service lies largely within not the information he himself is able to supply but information that he can only obtain from his physicians and his surgeons and those who treated him immediately after his return from the Army. In cities and in places where the physicians retained and kept records that is not such a handicap, but let me call your attention to the fact that in the rural districts of this country the physician treating a boy who came back from the Army, the family physician, made no such record as the Veterans' Bureau or the Veterans' Administration now requires to establish proof of a service-connected disability. This being the case, the veteran should not be denied this benefit if he in fact has the disability.

Mr. COCHRAN of Missouri. Mr. Chairman, will the gentleman yield?

Mr. MILLER. I yield.

Mr. COCHRAN of Missouri. The lack of records is not confined to the rural districts, because in 1918 and 1919 a great many of the physicians in the large cities, including my own, St. Louis, failed to keep a record every time a patient visited them.

Mr. HASTINGS. Will the gentleman let me confirm that?

Mr. MILLER. Yes.

Mr. HASTINGS. There were but few charges for services made against these returned soldiers, and but few book accounts were kept against them. Physicians in the rural sections, the cities, and everywhere were glad to render some medical service or some assistance to these boys who had

come back after rendering such great service to their country.

Mr. MILLER. I agree with the gentleman and thank him, but under the compensation act it is absolutely necessary to submit that medical evidence in order to prove that the disabilitly is service connected; and I know this is a condition existing in the rural districts and the smaller towns. Why should we sit idly by and permit this propaganda to go over the country unanswered? I firmly believe the great majority of the 438,877 men who are now within the statute are suffering just as much from a service-connected disability as any man who is drawing money under the old compensation law.

Daily we see the press of the country stating that it is necessary to enact general relief laws; that it is necessary to pour money into this country to relieve unemployment; that the bread lines are constantly growing larger and unemployment is on the increase.

This class of veterans are not asking a dole. They want justice. Shall we be swept from our feet by the propaganda of the National Economy League, whose only desire is to reduce their income taxes and by their publicity hope to influence public opinion against these men.

I want to ask you gentlemen this question: What would be the effect upon our economic body if these benefits were withdrawn in this country to-day?

Further, the men who are receiving these benefits, who are they and what are the amounts? Sixty-three per cent receive $12 per month, 24 per cent receive $18 per month, 6 per cent are receiving $24 per month, and 7 per cent are receiving $40 per month, the highest amount allowed under the disability act.

Mr. HASTINGS. And the average amount is $15.93.

Mr. MILLER. Yes; the average amount received by these veterans is $15.93 per month.

Now, take this allowance away arbitrarily and see what effect it will have upon the economic life of this country.

I am just as anxious as anyone to reduce government expenses, and I want to call the attention of the committee to the hearings, and particularly to page 541, where there are set out certain proposed amendments; and if it is necessary to reduce the veterans' allowances, let them be reduced equitably, let them be reduced equally and impartially by the adoption of the amendments set out in the hearings at page 541. This would reduce all of the benefits, emergency officers, veterans' compensation, disability benefits, pensions, and all, ratably, and at the rate of 10 per cent.

I want to say to you, very frankly, in my opinion the average veteran in this country would not object in this time of crisis and stress to this reduction, and by making this reduction and by the acceptance of it on the part of the veterans, gracefully, as they would accept it, it would go a long way toward combating the propaganda to the effect that the act of July 3, 1930, is not justified.

I say to you it is justified and that it is legislation that answers a good purpose and ought not to be repealed and ought not to be tampered with by this or any other Congress.

As I have said, I am not unmindful of the argument that is made that the man who went through the war and came out whole is not entitled to any compensation or any payment at all. This act is not based upon that theory. This act serves the purpose of extending some benefits to them all alike, and it recognizes the fact that when we were engaged in this war we were not so much concerned with keeping hospital records and records of injuries and records of sickness and records of the effect of the service upon this or that veteran as we were concerned with the immediate winning of the war.

I say to you that this whole class of people ought not to be interfered with, but should be given the same treatment that you give the others, and in this way I think we will be rendering justice to the man and to the boy who unthinkingly failed to protect himself and see that his record was preserved and protected at the time he was rendering service to the country. When he was thus engaged he had no thought of future compensation or future benefit. His one thought was to do his duty and discharge his patriotic obligation to this country.

I say to you that this act is backed by the finest American traditions, and I should regret to see this Congress or any other Congress repeal it or fail to give it force and effect by withholding appropriations to fulfill the purpose for which it was enacted. [Applause.]

The only way that justice may be done to all World War veterans alike is to retain the provisions of the disability act. In the administration of the compensation act, that is the act for the payment of benefits for service-connected disabilities, the provision providing that lay testimony may be considered in determining whether a disability was caused or aggravated by the service has been practically nullified by the failure to provide the extent of the consideration that must be given to it and by failing to make such lay testimony prima facie proof of the fact that the disability was caused or aggravated by the service of the veteran. Therefore many deserving veterans were denied any benefits at all prior to the passage of the act of July 3, 1930, merely because the physicians who had treated them soon after their return to civilian life failed to keep the proper records and failed to fully set forth on such records as were kept a full and complete statement of the disabilities they found existing at that time. The question is, Should these men be deprived of the benefits granted by a grateful Government to its defenders in time of peril simply because they did not take the precaution to see that proper records were kept? I say no. These men should be given the same rights as any other soldier. They paid the same price; they were ready to make the supreme sacrifice; and now when time has disclosed the ravages that the service made upon that veteran's body, he must not be discriminated against because of lack of records to satisfy those who are administering the veterans' legislation.

If it is necessary to reduce governmental costs let that reduction apply to all. Let us be fair to the unfortunate man who in times of war thought more of doing his simple duty than of trying to preserve a record in the hospitals and of seeing that his hardships were noted. [Applause.]

[Here the gavel fell.]

Mr. WOODRUM. Mr. Chairman, I yield five minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Chairman, the House permitted me this morning to put in the RECORD official figures from the Committee on Appropriations relative to the amounts carried in the various appropriation bills thus far passed by the House, showing a saving thus far of $66,877,908.02 below the Budget estimates of the President.

These figures are easily ascertainable. Mr. Marcellus Sheild, who came to the Congress with a former chairman of the Appropriations Committee, Mr. Tawney, of Minnesota, many years ago, has been connected with the Committee on Appropriations for over 20 years. He has been the clerk of the committee for about 16 years. All during the Harding and Coolidge and Hoover régimes he has served continuously as the clerk of this committee, and every Republican member of the committee will vouch for his integrity and reliability. He knows as much about the workings of the committee as any man in Washington. He personally prepared and gave me the figures this morning as being absolutely correct, and you will find his statement in to-day's RECORD at the beginning of our proceedings.

If you will look at these figures, you will see that with respect to the deficiency bill it is far below the estimate of the Budget sent here by the President; and every single one of the supply bills is far below the amount that the President asked us in his Budget to appropriate.

The figures show that the bills thus far passed are $69,581,111.02 below the Budget estimates, and deducting the $2,703,203 that the House, with various amendments added to these bills, the bills thus far passed by the House and reported to the House are $66,877,908 less than the amount that President Hoover asked this Congress to appropriate.

As a matter of fact, it was the Committee on Appropriations which forced the President to reduce his last Budget. Our Committee on Appropriations last year reduced the appropriations in the various supply bills $300,000,000 below the President's Budget estimates, and the President ascertained that our committee was going to cut to the bone this year and reduce the Budget at least $500,000,000, so, to anticipate the action of our committee, the President caused the Director of the Budget to make reductions. And after the President and his Budget made such reductions and sent to Congress their reduced estimates, the Committee on Appropriations has made further cuts and disallowed sums totaling $66,877,908, which were asked for by the President, and the appropriations authorized by our committee and approved by the House are $66,877,908 below the Budget, and below the amounts the President asked Congress to appropriate.

I can not understand why such an incorrect statement as that in to-day's press should come from the White House and be broadcasted from one side of the Nation to the other, misrepresenting the action of Congress.

Mr. BOYLAN. If the gentleman will yield, I called the supplemental Budget that the President sent in a phantom Budget.

Mr. BLANTON. The Budget the President sent to Congress and asked the Congress to appropriate and upon which the committee began to hold hearings several weeks before the session began is a printed document, and the amounts are specific, and no one can truthfully deny the cuts we have made below the Budget.

Mr. BOYLAN. That is the point; the President has not based his statement on that; he bases it on his phantom Budget that he sent in subsequently.

Mr. BLANTON. I do not know whether the misleading statement came from the President or not; but whoever sent that statement from the White House to the press, I challenge him to point out a specific one of the appropriation bills which this House has passed thus far, showing where they have exceeded the Budget estimates of the President. He can not show it. The correct itemized statement of the appropriation bills prepared by Marcellus Sheilds, who has been clerk for the last 16 years of the Appropriations Committee, and who gave us these authentic figures that I put into the RECORD this morning, shows conclusively, without peradventure of a doubt, that every one of the supply bills brought in by the Committee on Appropriations and passed by this House has carried a reduction below the Budget, and that all have carried a total of $66,000,000 less than the amount the President asked for.

Mr. GOSS. Will the gentleman yield?

Mr. BLANTON. I yield.

Mr. GOSS. I want to call attention to the fact that we often get mixed up here on the question of permanent appropriations, which come in in the Budget figures and then are separated out in committee, and sometimes indefinite appropriations are raised or lowered.

Mr. BLANTON. Now, let me answer that. I am not going to let any cobwebs be put into this record on this question. The President sent us specific amounts in a printed Budget that he wanted appropriated for each department, and the Committee on Appropriations have cut down these items in the bill, and we have reduced them in a total of $66,877,908.02 below the Budget amounts the President asked us to appropriate.

Mr. HASTINGS. And the gentleman from Connecticut is mistaken, because the committee does not touch the permanent appropriations, and he ought to be able to find that out sometime.

Mr. BLANTON. I want to go further. The President intimates, or gives as a reason, that Congress ought to pass certain legislation that would save some sums he speaks of. The Committee on Appropriations does not have anything to do with legislation. All it does is to appropriate money according to law and Budget estimates, and it tries to save money according to law. It can not pass legislation. Why does not the President send his special message to the various legislative committees along that line, and then it is quite probable we might save some more money.

[Here the gavel fell.]

Mr. WOODRUM. Mr. Chairman, I yield five minutes to the gentleman from Indiana [Mr. GILLEN].

Mr. GILLEN. Mr. Chairman, ladies and gentlemen of the committee, barriers now confronting industry should be removed. Your attention will be directed to two of those.

Measures designed to give temporary relief and to lead us to economic recovery seem to occupy the greater part of our time. In the meanwhile it is opportune that serious thought be given to legislation looking to the correction of errors in our industrial and governmental life and to bring about permanent relief. Government should be restored to its proper functions.

Our economic life is operated under what is known as the capitalistic system. Our Government should be operated to give economic freedom. That we have strayed far from this ideal will not be denied. That industry has been greatly retarded is universally recognized.

Your attention is invited to one of the most important elements of successful business enterprise—the element of credit. All business is done largely on credit, a legitimate and component part of most transactions. That too much credit is an evil will not be denied. Reference is made here to what may be termed "normal credit."

If industry ever escapes the excessive burdens of government, it must make the field of business more attractive to investors than to the field of government. In this task Congress must join. Business should supply its own credit. By this is meant that industry should be able to obtain credit from private sources and not from government. It was never intended that our Government should supply money in the form of credit to any industry, whether it be to a farmer, banker, manufacturer, railroad, or what not; yet during the past three decades we find the Federal Government entering the creditor field until it has become one of our accepted policies. A halt must be called. Before this can be stopped the cause must be removed.

Let us examine probably the first instance of this kind and the reasons therefor. The time was when a farmer wanting to own a farm or to add to his holdings could go to his neighbor or local bank and obtain a long-time loan at a legal rate of interest secured by mortgage on the land or commodity purchased. As time went on he found this source of credit being gradually closed against him. His friends sought other investments. The field of credit for the farmer became more and more restricted, until he was compelled to seek loans from insurance companies, with their attendant high commissions, expenses, and restrictions, and to-day he finds no one in private or corporate life that will give heed to his legitimate needs.

The result is well known. The Government, beneficent at all times to its people, recognizing the plight of agriculture, created the Federal land banks, designed solely to aid the farmer. As his plight grew worse, further aid was attempted, resulting in the fiasco of the Government trying to control the price of farm products by gambling on the board of trade, also by making direct loans to enable the farmer to finance the growing of his crops and the marketing of his livestock. Ninety million dollars is being set aside at this session for that purpose. The Reconstruction Finance Corporation act and the home loan banking act are further examples of how far the Government has gone in extending credit to various forms of business. Let us not be misunderstood. The stress of the times, no doubt, made such measures temporarily necessary. We are now interested in removing, if possible, the necessity for such legislation and restoring industry to a basis on which it can obtain credit in its own field.

Why have the avenues of credit been closed to industry? The answer is competition. Competition with Government—municipalities, States, counties, townships, schools, cities, and towns. Credit to these has been unlimited. Those with money to lend have in great measure deserted industry and sought tax-exempt bonds as an income-

producing investment. The ease with which a municipality could borrow money, subject only to State constitutional limitations, has witnessed billions and billions of dollars' worth of tax-exempt securities being floated on the market and eagerly taken by investors. This has resulted in a double burden to all classes of business. First, money has been denied them for legitimate credit needs; second, business and property must pay such municipal debts by taxation. The ability to pay has broken down, and many municipal bonds are now in default. The money lender sought the best investment. The best investment has been the one that kept the tax assessors from listing his investments for taxation.

Three major remedies suggest themselves to remove the competition cited and to place industry on a parity with municipalities in the credit field, namely: To prohibit the issuance of tax-exempt securities by or under the authority of any State; second, to tax the income from such bonds; third, to prohibit the laying of taxes on money, bills of credit, or any debt or evidence of indebtedness. Much has been said about the first and second methods. It is to the third that your attention is directed.

To get this remedy squarely before you I have introduced a joint resolution to amend the Constitution, which, omitting the formal parts, reads as follows:

SECTION 1. No State shall, without the consent of Congress, lay or collect any tax on money, bills of credit, or any debt or evidence of indebtedness; but taxes upon income derived therefrom may be laid and collected without such consent.

SEC. 2. This article shall take effect two years after its ratification.

Section 3 requires the ratification of the resolution within seven years after its adoption to be operative.

The purpose of this proposal is to make money and the principal of all loans tax exempt, except as Congress may by law decree otherwise, and place industry in the same field as that enjoyed by the States and their subdivisions. The right to tax the incomes derived therefrom is left to the States.

No pretense is made here that this plan is infallible. It is proposed to invoke thought and discussion. At once the argument will come that intangible wealth will escape its just share of taxation. Reply is made that in spite of all the statutes on the subject intangibles excape taxation. For example, take the State of Indiana: Money, bills of credit, promissory notes, and so forth, are taxable at their true cash value. The banks show hundreds of millions of dollars on deposit, promissory notes evidencing millions more are known to exist, yet an examination of the tax records shows that only a small percentage is listed for taxes, and no successful way to tax intangibles has been found. The money lender no longer makes a loan on tangibles secured by mortgage, as he knows the record of the mortgage means the listing of the loan to bear the burden of ever-increasing tax rates. Money and intangibles are driven either into hiding or to investment in tax-exempt securities. Would not the adoption and ratification of this resolution bring money out of hiding and cause it to seek investment in industry, and the blood stream of our economic life to flow freely once more? Taxation of the income derived from all loans would undoubtedly yield more revenue than is now being derived from the corpus of our money system. The long effort to tax intangibles has resulted in failure to yield revenue but has been highly successful in placing money out of reach of normal business credit.

Would not this plan do more to lower the interest rate to business than any other one thing? Right here the argument will be made that the assets of many banks are now made up in large part of tax-exempt securities, and the adoption of this resolution would cause a depreciation in value of the banks' assets. That may be true, but the resolution will take time for its adoption, and two years' time is given after its ratification for each State to adjust its tax laws and set its house in order. Would it not be far better for the holders of existing securities to take a loss than to continue under present conditions?

Let us hope the orgy of issuing municipal bonds is past and that we may get on a safe and sound credit basis, wherein business will once more have an equal chance, and that government may retire from the industrial credit field.

The Federal Government supplies the medium of exchange. It should see to it that no barriers are erected by the States to retard its free circulation and the accomplishment of the purposes for which money is intended. Chief Justice Chase, in an early decision, said:

Congress, having undertaken in the exercise of undisputed constitutional power to provide currency for the whole country, may constitutionally secure the benefit of it to the people by appropriate legislation.

Do the people "secure the benefit" of money where some States are permitted to tax money at its full value while others tax only a part of its value? The adoption of this resolution will go far to "secure the full benefit of money to the people."

Let us now turn our attention to another condition that retards business in this country, and which can be corrected only by the cooperation of industry and government. Reference is made to one of our methods of taxation, the income tax. Let us not be misunderstood. There is no pretense that wealth should not bear its just share of the cost of government by paying a graduated tax on income; but there is a point beyond which tax rates on income should not go. Rates should not be so high that business will be stifled. This condition exists to-day. What incentive is there for industry to operate beyond a point where it must give up a very large part of its income to government? Under such conditions is it not the tendency to lower wages and increase the cost of the finished product to the consumer in order to recoup against enormous income-tax rates? In other words, labor and the consumer pay.

A stagnated industry means unemployment. Labor then turns to its only remaining source of relief, its government. Already those in distress are knocking at the doors of our legislative bodies, seeking pensions, unemployment insurance, the enactment of various measures for relief, all of which would bring about increased taxation, with its consequent vicious circle. All forms of industry, and especially what is commonly designated as "big business," constantly oppose such measures with all their might.

We can not let anyone starve or want for shelter. Either the business of this country must be put on such a basis that everyone willing and able to work may be self-supporting or the Government will be compelled to assess business in the form of taxes and hand the assessments over to those who, being able and willing, are nevertheless deprived of self-support by a shortsighted business policy that wants the major share for the captains of industry and little or nothing for the producer.

Many lines of industry, feeling the stifling effect of exorbitant income-tax rates, and seeking relief by proposing other forms of taxation, have come forward within the last few years and advocated a manufacturer's sales tax, to the end that the consumer may pay Government revenues directly in the purchase price of commodities.

Under present conditions there is much opposition to a sales tax. The reason is obvious. The feeling prevails generally that the producers of wealth in this country, namely, labor and the farmers, do not get to retain a fair share of the wealth produced by them; that it drifts by divers methods into the hands of a comparative few, and, therefore, this accumulated and concentrated wealth should carry the big end of the tax load. The consumer would have no serious objections to a sales tax if our present economic system can be corrected and a greater part of the annually created wealth be left with the farmer in the form of higher prices for his products and increased wages for the workingman, to the end that there be an ample purchasing power in the hands of the masses of the people at all times.

If tax rates on incomes are to be lowered—assuming Government costs will be materially reduced—to a fair and reasonable basis, and the country is to accept a sales tax, all

of which will tend to loosen and remove the shackles of high income rates from business, then we must face about and see to it that there is a more equitable distribution of wealth in this country. The major portion of this problem lies with industry. The Government will do its share if it can be relieved of caring for its people. Instead of beating down the wages of labor, let the laborer's hire be increased.

The battle waged by tangibles to tax intangibles has not only resulted in failure but has contributed largely to present chaotic conditions. Let us hope that intangibles, except the income therefrom, can be liberated, and other forms of taxation adopted that will relieve the burden now on tangibles, set industry free, and restore government to its normal activities.

Mr. WOODRUM. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. RAYBURN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 14458, the independent offices appropriation bill, and had come to no resolution thereon.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. OVERTON, indefinitely, on account of official business, attending the hearings in Louisiana of the Senate Special Committee to Investigate Elections.

A LAME DUCK'S LAMENT

Mrs. KAHN. Mr. Speaker, I ask unanimous consent to extend my remarks by placing in the RECORD a poem entitled "The Last Will and Testament of a Lame Duck," written by my colleague, Mrs. OWEN, and read by her to-day at a luncheon of the National Women's Press Club.

The SPEAKER. Is there objection?

There was no objection.

Mrs. KAHN. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following poem, entitled "The Last Will and Testament of a Lame Duck," by my colleague, Mrs. OWEN:

LAST WILL AND TESTAMENT OF A LAME DUCK

To Members in the coming session,
We leave what's left of the depression;
With fifty thousand tomes appended
Telling just how it can be ended.
To Congressmen who'll draw our salary,
We leave all gunmen in the gallery;
All communists who march and fight,
And threaten us with dynamite.
Those stalwart ones may have the onus
Of laying hands upon the bonus.
The currency—to them we hand it,
To shrink, contract it, or expand it.
We'll let them exercise their talents,
On making that thar Budget balance;
And pointing out, with no delaying,
A tax the public won't mind paying.
To make this simple as can be,
We leave to them technocracy.
To them we're leaving the analysis
Of beer producing no paralysis;
To them we leave with stifled sobs,
All persons who are seeking jobs.
Our pangs of exile 'twill assuage
To know we have no patronage.
To you, dear ladies of the press,
We leave unfeign'd thankfulness;
All you have done to give us pleasure,
Are memories we will always treasure,
While we roam that vast expanse
Where lame ducks seek their sustenance.
When happy days are here again,
Please let us know just where and when!

—RUTH B. OWEN

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 284. An act for the relief of William B. Thompson;

S. 3147. An act for the relief of Anna Pokorny; and

S. 5484. An act to extend the time during which certain provisions of the act of February 27, 1932, relating to improving the facilities of the Federal reserve system to meet the needs of member banks in exceptional circumstances, shall be effective.

ADJOURNMENT

Mr. WOODRUM. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 57 minutes p. m.) the House adjourned until to-morrow, Wednesday, February 1, 1933, at 12 o'clock noon.

COMMITTEE HEARINGS

Tentative list of committee hearings scheduled for Wednesday, February 1, 1933, as reported to the floor leader:

WAYS AND MEANS

(10 a. m.)

Continue hearings on depreciated currency bill.

INTERSTATE AND FOREIGN COMMERCE

(10 a. m.)

Continue hearings on Federal water power act (H. R. 11675).

PUBLIC BUILDINGS AND GROUNDS

(10.30 a. m.)

Airport bill (H. R. 12887).

AGRICULTURE—SUBCOMMITTEE

(10 a. m.)

Hearings on grazing fees.

NAVAL AFFAIRS

(10.30 a. m.)

Hearings on private bills.

BANKING AND CURRENCY

(10.30 a. m.)

Continue hearings on Federal land bank bill.

COINAGE, WEIGHTS, AND MEASURES

(10 a. m.)

Continue hearings on silver bill.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

899. A letter from the president of the Washington Gas Light Co., transmitting statement of the Washington Gas Light Co., together with list of stockholders, for the year ended December 31, 1932; to the Committee on the District of Columbia.

900. A letter from the president of the Capital Traction Co., transmitting report of the Capital Traction Co. for the year ending December 31, 1932; to the Committee on the District of Columbia.

901. A letter from the president of the District of Columbia Commission, George Washington Bicentennial, transmitting a report of the commission's activities; to the Committee on the District of Columbia.

902. A letter from the Secretary of the Navy, reporting the disposition of useless papers and records in the files of the navy yards, naval stations, etc., during the calendar year 1932; to the Committee on Disposition of Useless Executive Papers.

903. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation authorizing the Secretary of Commerce to dispose of certain lighthouse reservations, and for other purposes; to the Committee on Interstate and Foreign Commerce.

904. A letter from the vice president of the Georgetown Gas Light Co., transmitting a statement of the business of the Georgetown Gas Light Co., together with list of stockholders, for the year ended December 31, 1932; to the Committee on the District of Columbia.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mrs. OWEN: Committee on Foreign Affairs. H. R. 14323. A bill authorizing an appropriation to the Government of China for the account of Li Po-tien; without amendment (Rept. No. 1949). Referred to the Committee of the Whole House on the state of the Union.

Mr. MAAS: Committee on Foreign Affairs. House Joint Resolution 568. Joint resolution authorizing an appropriation for the expenses of participation by the United States in the Third International Conference on Private Aerial Law to be held in Rome, Italy, in 1933; without amendment (Rept. No. 1950). Referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. SPENCE: A bill (H. R. 14515) to regulate the rate of premium on bonds of officers and employees in the motor-vehicle service of the Post Office Department; to the Committee on the Post Office and Post Roads.

By Mr. SHALLENBERGER: A bill (H. R. 14516) to amend the Federal water power act, as amended; to the Committee on Interstate and Foreign Commerce.

By Mr. SABATH: A bill (H. R. 14517) to provide for making loans to needy individuals, ex-service men, farmers, home-owners, and business men, and for other purposes; to the Committee on Ways and Means.

By Mr. CONNERY: A bill (H. R. 14518) to prevent interstate commerce in certain commodities and articles produced or manufactured in industrial activities in which persons are employed more than five days per week or six hours per day; to the Committee on Labor.

By Mr. WOLFENDEN: A bill (H. R. 14519) to amend the standard baskets act of August 31, 1916, to provide for a 1-pound Climax basket for mushrooms; to the Committee on Coinage, Weights, and Measures.

By Mr. GILLEN: Joint resolution (H. J. Res. 581) proposing an amendment to the Constitution of the United States restricting the power of States to tax money and debts; to the Committee on the Judiciary.

By Mr. KLEBERG: Joint resolution (H. J. Res. 582) authorizing the President under certain conditions to invite the participation of other nations in the Texas Centennial Celebration, providing for the admission of their exhibits, and for other purposes; to the Committee on Ways and Means.

By Mr. MEAD: Joint resolution (H. J. Res. 583) to provide for a change of site of the Federal building to be constructed at Binghamton, N. Y.; to the Committee on Public Buildings and Grounds.

By Mr. LUCE: Concurrent resolution (H. Con. Res. 47) relating to Statuary Hall; to the Committee on the Library.

MEMORIALS

Under clause 3 of Rule XXII, memorials were presented and referred as follows:

Memorial of the Legislature of the State of Oregon, memorializing Congress to pass legislation preventing foreign goods from coming into this country at the expense of the closing of our factories and the unemployment of our people; to the Committee on Ways and Means.

Memorial of the Senate of the State of Oregon, memorializing Congress to pass law paying the soldiers' adjusted-service certificates as soon as possible; to the Committee on Ways and Means.

Memorial of the Board of Commissioners of Salt Lake City, Utah, urging that suitable legislation be enacted establishing a standard of integrity and sound economy of municipal bond issues and giving to municipalities, which meet such standard the same rights enjoyed by national banks to receive national currency on the pledge of their bonds; to the Committee on Banking and Currency.

Memorial of the Board of Commissioners of Salt Lake City, Utah, urging the passage of necessary legislation as to exempt from taxation States and State agencies and publicly owned utilities; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BURTNESS: A bill (H. R. 14520) for the relief of E. F. Hamilton; to the Committee on Claims.

By Mr. CLANCY: A bill (H. R. 14521) for the relief of Karl F. Rindelhardt; to the Committee on Military Affairs.

By Mr. JENKINS: A bill (H. R. 14522) granting an increase of pension to Nancy South; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14523) granting a pension to Clarisa Burnett; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14524) granting an increase of pension to Henrietta H. Eator; to the Committee on Invalid Pensions.

By Mr. LEA: A bill (H. R. 14525) for the relief of Joseph Payne; to the Committee on Naval Affairs.

By Mrs. OWEN: A bill (H. R. 14526) granting a pension to Susie E. Payne; to the Committee on Invalid Pensions.

By Mr. STEAGALL: A bill (H. R. 14527) granting a pension to Julian S. Hutchinson; to the Committee on Pensions.

By Mr. SWICK: A bill (H. R. 14528) granting an increase of pension to Lizzie Shelar; to the Committee on Invalid Pensions.

By Mr. WILLIAMSON: A bill (H. R. 14529) granting an increase of pension to Maggie F. Harvey; to the Committee on Invalid Pensions.

By Mr. WOOD of Indiana: A bill (H. R. 14530) granting an increase of pension to Sallie H. Skinner; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

10054. By Mr. AYRES: Petition of citizens of Wellington, Canton, and McPherson Counties, Kans., in behalf of stop-alien-representation amendment to the United States Constitution; to the Committee on the Judiciary.

10055. By Mr. BEAM: Resolution of the Currency and Credit League of the United States, to permit the Reconstruction Finance Corporation to purchase tax-warrant securities of the various tax-levying bodies of the city of Chicago and county of Cook; to the Committee on Banking and Currency.

10056. By Mr. BOEHNE: Petition of George W. Decker and others, of Hazleton, Ind., praying for the retention of the eighteenth amendment; to the Committee on the Judiciary.

10057. By Mr. CLARKE of New York: Petition of the Woman's Home Missionary Society of Norwich, N. Y., requesting that a Federal motion-picture commission be established to control all motion-picture business, and urging support of bill 1079 on the Senate Calendar and Senate Resolution No. 170, now before the Interstate Commerce Committee; to the Committee on Interstate and Foreign Commerce.

10058. Also, petition of Mrs. Ernest Shaver and 18 members of the Woman's Christian Temperance Union of Treadwell, N. Y., opposing any efforts to increase the percentage of alcohol in liquor and the withholding of appropriations for enforcement of the national prohibition law; to the Committee on the Judiciary.

10059. By Mr. CRAIL: Petition of several citizens of the San Francisco Bay region, favoring the stop-alien-representation amendment to the Constitution and count only American citizens when making future apportionments for congressional districts; to the Committee on the Census.

10060. By Mr. DARROW: Resolution of the Woman's Home Missionary Society of Philadelphia, Pa., favoring legislation to govern censorship of motion pictures; to the Committee on Interstate and Foreign Commerce.

10061. By Mr. DELANEY: Petition of the Lackawanna Railroad Veterans' Association, Hoboken, N. J., opposing the ratification of the treaty providing for the construction of a deep waterway between the Great Lakes and the Atlantic Ocean; to the Committee on Interstate and Foreign Commerce.

10062. Also, petition of the National Guard Association of the State of New York, advocating maintaining appropriations for the Naval Reserve on a basis sufficient to afford 48 drills and 15 days' training per annum for the drilling units of the reserve; to the Committee on Appropriations.

10063. Also, petition of the New York State Bankers' Association, protesting against the publication of borrowers from the Reconstruction Finance Corporation; to the Committee on Banking and Currency.

10064. Also, petition of the sea service bureau of the United States Shipping Board, urging the defeat of the amendment abolishing the sea service bureau in the independent offices appropriation bill, H. R. 14458; to the Committee on Appropriations.

10065. By Mr. FIESINGER: Petition of Dave Spaulding, Edward L. Ways, and Clayton Irwin, on behalf of the Sandusky (Ohio) League Against Alcoholism, protesting against the proposed modification of the Volstead Act, and favoring retention of the eighteenth amendment; to the Committee on Ways and Means.

10066. By Mr. GOLDSBOROUGH: Resolution of the Woman's Home Missionary Society of Port Deposit, Md., supporting legislation to establish a Federal motion-picture commission, and to make a thorough investigation of the motion-picture industry; to the Committee on Interstate and Foreign Commerce.

10067. By Mr. HANCOCK of New York: Petition of the Marathon Church Council, Marathon, N. Y., opposing the repeal of the eighteenth amendment and modification of the Volstead Act; to the Committee on the Judiciary.

10068. By Mr. HOWARD: Resolution adopted by the house of representatives of the forty-ninth session of the Nebraska Legislature, January 24, 1933, memorializing the Congress of the United States favoring the speedy passage of a bill providing for the liquidation and refinancing of farm mortgages and farm indebtedness at a reduced rate of interest through the Federal farm-loan system, known as the Frazier bill, S. 1197; to the Committee on Agriculture.

10069. Also, resolution adopted by the house of representatives of the forty-ninth session of the Nebraska Legislature, January 23, 1933, memorializing the Congress of the United States for discontinuance of any further appropriations for the development of the inland waterways; to the Committee on Interstate and Foreign Commerce.

10070. Also, resolution adopted by the house of representatives of the forty-ninth session of the Nebraska Legislature on January 23, 1933, memorializing the Congress of the United States to favor sound inflation of the currency and urge passage of the Wheeler bill, S. 2487; to the Committee on Banking and Currency.

10071. By Mr. LINDSAY: Petition of the Lackawanna Railroad Veterans' Association, Hoboken, N. J., opposing ratification of the treaty between United States and Canada providing for the construction of a deep waterway between the Great Lakes and the Atlantic Ocean; to the Committee on Foreign Affairs.

10072. Also, petition of the New York State Bankers' Association, New York City, opposing publication of names of borrowers from the Reconstruction Finance Corporation; to the Committee on Banking and Currency.

10073. By Mr. LOOFBOUROW: Petition of the City Commission of Salt Lake City, Utah, urging that suitable legislation be enacted establishing a standard of integrity and sound economy of municipal bond issues and giving to municipalities which meet such standard the same rights enjoyed by national banks to receive national currency on the pledge of their bonds; to the Committee on Banking and Currency.

10074. Also, petition of the City Commission of Salt Lake City, Utah, urging the President and Congress to pass the necessary legislation so as to exempt from taxation States and State agencies and publicly owned utilities; to the Committee on Ways and Means.

10075. Also, petition of the Legislature of the State of Utah, memorializing Congress to appropriate to Federal aid for highways; to the Committee on Roads.

10076. Also, petition of the Legislature of the State of Utah, memorializing the President and Congress of the United States to support or initiate a movement to stabilize the monetary and credit bases, so as to improve world commodity prices; to the Committee on Coinage, Weights, and Measures.

10077. By Mr. MARTIN of Massachusetts: Petition of Frank J. Creighton and sundry residents of Taunton, Mass., asking for action to revaluate the gold ounce and to correct financial abuses; to the Committee on Banking and Currency.

10078. By Mr. RUDD: Petition of the Lackawanna Railroad Veterans' Association, headquarters, Hoboken, N. J., opposing ratification of the treaty between the United States and Canada providing for the construction of a deep waterway between the Great Lakes and the Atlantic Ocean; to the Committee on Foreign Affairs.

10079. Also, petition of Philip De Ronde, chairman Colonial Trust Co., New York City, opposing reduction in the personnel in the Marine Corps; to the Committee on Appropriations.

10080. Also, petition of the National Guard Association of the State of New York, refering to the naval militia-naval reserve drills, etc.; to the Committee on Appropriations.

10081. Also, petition of the New York State Bankers' Association, New York City, favoring the elimination of the provision in the reconstruction finance act publishing the names of banks who borrow from the Reconstruction Finance Corporation; to the Committee on Banking and Currency.

10082. By Mr. SANDERS of New York: Petition signed by citizens of Geneseo, Springwater, Hemlock, Albion, Eagle Harbor, Knowlesville, Medina, Oakfield, Bliss, Corfu, Basom, and Indian Falls, New York State, urging passage of a constitutional amendment to exclude aliens from the count for representation in Congress; to the Committee on the Judiciary.

10083. By Mr. SWICK: Petition of W. Merle Cross, member of board of education, and 14 residents of Bruin, Butler County, Pa., urging the enactment of legislation providing for revaluation of the gold standard; to the Committee on Banking and Currency.

10084. Also, petition of Mrs. W. A. Hoffmaster and 17 residents of Edinburg, Lawrence County, Pa., urging the adoption of the stop-alien-representation amendment to the Constitution for the purpose of excluding aliens from the count for purpose of making future congressional reapportionments; to the Committee on the Judiciary.

10085. By Mr. SWING: Petition signed by 25 residents of Oakland and Berkeley, Calif., favoring the stop-alien-representation amendment to the United States Constitution to cut out the 6,280,000 aliens in this country, and count only American citizens, when making future apportionments for congressional districts; to the Committee on the Judiciary.

10086. By Mr. WATSON: Petition with 189 signatures of residents of Allentown, Pa., opposing the repeal of the eighteenth amendment; to the Committee on the Judiciary.

10087. Also, resolution passed by the Benjamin Franklin Chapter, No. 105, National Sojourners, relative to strengthening national defense; to the Committee on Military Affairs.

10088. Also, resolution adopted by the Washington Camp, No. 409, Patriotic Order Sons of America, Coplay, Pa., relato the Committee on Ways and Means.
tive to tariff on coal and pledges to buy American goods;

10089. By Mr. WOOD of Indiana: Petition signed by residents of East Chicago, Ind., protesting against the repeal or modification of the eighteenth amendment; to the Committee on the Judiciary.

10090. Also, petition signed by George B. Jones and other residents of Lafayette, Ind., protesting against the repeal or

modification of the eighteenth amendment; to the Committee on the Judiciary.

10091. Also, petition signed by Rev. A. B. McCain and other residents of Morocco and Kentland, Ind., protesting against the repeal or modification of the eighteenth amendment; to the Committee on the Judiciary.

10092. Also, petition signed by Rev. D. H. Pellett and other residents of Bourbon, Ind., protesting against the repeal or modification of the eighteenth amendment; to the Committee on the Judiciary.

10093. Also, petition signed by residents of East Chicago, Ind., protesting against the repeal or modification of the eighteenth amendment; to the Committee on the Judiciary.

10094. Also, petition signed by Rev. G. P. Burdon and other residents of Remington, Ind., protesting against the repeal or modification of the eighteenth amendment; to the Committee on the Judiciary.

10095. Also, petition signed by residents of the second congressional district, State of Indiana, urging that the eighteenth amendment be not repealed or modified; to the Committee on the Judiciary.

SENATE

WEDNESDAY, FEBRUARY 1, 1933

(Legislative day of Tuesday, January 10, 1933)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate will receive a message from the President of the United States.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILL AND JOINT RESOLUTION

Messages in writing from the President of the United States were communicated to the Senate by Mr. Latta, one of his secretaries, who also announced that on January 31, 1933, the President approved and signed the following act and joint resolution:

S. 212. An act for the relief of Messrs. Short, Ross, Shaw, and Mayhood; and

S. J. Res. 239. Joint resolution authorizing the granting of permits to the Committee on Inaugural Ceremonies on the occasion of the inauguration of the President elect in March, 1933, and for other purposes.

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives by Mr. Haltigan, one of its clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 284. An act for the relief of William B. Thompson;

S. 3147. An act for the relief of Anna Pokorny; and

S. 5484. An act to extend the time during which certain provisions of the act of February 27, 1932, relating to improving the facilities of the Federal reserve system to meet the needs of member banks in exceptional circumstances, shall be effective.

REPORT OF DIRECTOR OF PUBLIC BUILDINGS AND PARKS OF THE NATIONAL CAPITAL

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying report, referred to the Committee on Public Buildings and Grounds:

To the Congress of the United States:

I transmit herewith, for the information of the Congress, the annual report of the Director of Public Buildings and Public Parks of the National Capital for the fiscal year ended June 30, 1932.

HERBERT HOOVER.

THE WHITE HOUSE, *February 1, 1933.*

THE JOURNAL

Mr. FESS. Mr. President, I ask unanimous consent for the approval of the Journal for the calendar days of January 30 and 31, 1933.

The VICE PRESIDENT. Without objection, it is so ordered.

CALL OF THE ROLL

Mr. FESS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Davis	King	Sheppard
Austin	Dickinson	La Follette	Shipstead
Bankhead	Dill	Lewis	Shortridge
Barbour	Fess	Logan	Smith
Barkley	Fletcher	Long	Smoot
Bingham	Frazier	McGill	Steiwer
Black	George	McKellar	Swanson
Blaine	Glass	McNary	Thomas, Idaho
Borah	Glenn	Metcalf	Thomas, Okla.
Bratton	Goldsborough	Moses	Townsend
Brookhart	Gore	Neely	Trammell
Bulkley	Grammer	Norbeck	Tydings
Bulow	Hale	Norris	Vandenberg
Byrnes	Harrison	Nye	Wagner
Caraway	Hastings	Oddie	Walcott
Carey	Hatfield	Pittman	Walsh, Mass.
Connally	Hawes	Reed	Walsh, Mont.
Coolidge	Hayden	Reynolds	Watson
Copeland	Hebert	Robinson, Ark.	Wheeler
Costigan	Johnson	Robinson, Ind.	White
Couzens	Kean	Russell	
Cutting	Kendrick	Schall	
Dale	Keyes	Schuyler	

Mr. FESS. I wish to announce that the Senator from Missouri [Mr. PATTERSON] is detained from the Senate because of a death in his family. I ask that this announcement may stand for the day.

The PRESIDENT pro tempore. Eighty-nine Senators have answered to their names. A quroum is present.

WAR DEBTS

Mr. ROBINSON of Indiana. Mr. President, I desire to announce that on Friday, day after to-morrow, as soon as I can obtain the floor after the convening of the Senate, I hope to be able to offer some observations on the war debts.

ORDER OF BUSINESS FOR THE SESSION

Mr. LA FOLLETTE. Mr. President, I ask unanimous consent to proceed for five minutes in order that I may present a unanimous-consent agreement. I state now that I shall not ask to have it pressed at this time, but I wish to make a brief statement concerning the objective sought to be obtained by the unanimous-consent proposal.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the Senator from Wisconsin is recognized for that purpose.

Mr. LA FOLLETTE. I send to the desk and ask to have read the tentative unanimous-consent proposal.

The PRESIDENT pro tempore. The clerk will read, as requested.

The Chief Clerk read as follows:

Ordered (by unanimous consent)—

That beginning Tuesday, February 7, the Senate shall meet on week days, Saturday excepted, at 11 o'clock and remain in session not later than 10 p. m.

That between the hours of 11 a. m. and 5 p. m. each day the Senate is in session the general appropriation bills shall be considered; and

That between the hours of 5 p. m. and 10 p. m. legislation other than appropriation bills shall be taken up for consideration;

That after any general appropriation bill shall have been considered by the Senate for more than one calendar day no Senator shall speak more than once nor longer than 20 minutes on said appropriation bill or any amendments or motions relating thereto;

That beginning Tuesday, February 7, S. 5125, Calendar No. 1212, to provide for cooperation by the Federal Government with the several States in relieving the hardship and suffering caused by unemployment, and for other purposes, shall be considered at each session of the Senate after 5 p. m. until it has passed through its various parliamentary stages to a final disposition;

That following the disposition of S. 5125 the Senate shall proceed to consider at the sessions after 5 p. m. Senate Joint Resolution 211, Calendar No. 1111, a joint resolution proposing an amendment to the Constitution, until it has finally been disposed of; and

That following the disposition of Senate Joint Resolution 211 the Senate shall proceed to consider at the sessions after 5 p. m. H. R. 13742, Calendar No. 1214, an act to provide revenue by the taxation of certain nonintoxicating liquor, and for other purposes.

The PRESIDENT pro tempore. The Chair understands the Senator from Wisconsin does not now offer the unanimous-consent agreement?

Mr. LA FOLLETTE. That is correct.

The PRESIDENT pro tempore. It has been read for the information of the Senate. The Senator from Wisconsin asked recognition for five minutes in order to explain the proposal which he has offered. Consent was granted to that end, and the Senator from Wisconsin is therefore recognized for five minutes.

Mr. LA FOLLETTE. Mr. President, there are approximately 24½ working days remaining of the short session of Congress. Without any criticism of the leadership on either side of the Chamber or of any individual Member or Members of the Senate, I think it is generally recognized that never in the recent history of this body has legislative procedure been in such a hopeless tangle. It is vital that an effort should be made to reach an agreement for orderly legislative procedure in an attempt to transact the pressing business pending before this session of Congress. I recognize the difficulty of agreeing by unanimous consent, especially in so far as the legislative proposals to be considered other than appropriation bills are concerned. I have merely offered the suggestion contained in the latter portion of the unanimous-consent agreement for the consideration of my colleagues in this Chamber in the hope that after due consideration it might be possible, by changing, by adding, or by eliminating certain legislation to be considered, to reach an agreement by unanimous consent. I have in mind other legislation which must be considered but which is still in committee, such as the farm relief bill, the bankruptcy bill, and other important legislation.

Mr. President, the country faces the gravest crisis in all its history. People are hungry and starving in the midst of plenty. Farmers are being dispossessed of the homes which they and their ancestors carved out of the wilderness. Business concerns long considered to be in an impregnable position are hovering on the brink of bankruptcy.

I recognize that the chaotic condition of this legislative session is due to two primary causes; first, to the critical nature of the crisis that confronts the country; second, to the fact that this is a lame-duck session of Congress which always results in a stalemate, under even normal conditions, because it is awaiting the incoming of a new administration. Nevertheless, Mr. President, we should, as Members representing the several States and the people therein, make an effort, without regard to partisan considerations, to transact the pressing legislation which is now pending before this body and which will be pending before it prior to the 4th of March. Unless some such limitation shall be agreed to, in so far as appropriation bills are concerned for curtailment of debate, and unless we shall divide our sessions between the consideration of appropriation bills and other legislation of an emergency character, I fear, Mr. President, that this Congress will adjourn at 12 o'clock on the 4th of March without having taken up for consideration measures which should be enacted at this session of Congress.

I have offered this proposal, Mr. President, in the hope that it might afford the basis for consideration by the leadership on both sides of this Chamber, to the end that we may transact the business which the country is desperately in need of having considered.

PETITIONS AND MEMORIALS

Mr. BLAINE presented a memorial of sundry citizens of Clear Lake, Wis., remonstrating against the passage of legislation to modify the national prohibition law, and favoring measures to make national prohibition more effective, which was ordered to lie on the table.

Mr. BROOKHART presented the petition of Mrs. A. L. Van Fossen and other members of the Woman's Christian Temperance Union of Marion, and sundry citizens, all in the State of Iowa, praying for the passage of legislation to regulate and supervise the motion-picture industry, which was ordered to lie on the table.

Mr. SHIPSTEAD presented petitions numerously signed of sundry citizens of the State of Minnesota, praying for the passage of legislation to regulate and supervise the motion-picture industry, which were ordered to lie on the table.

Mr. GOLDSBOROUGH presented papers to accompany the bill (S. 5546) granting a pension to Milton Carroll Merryman, heretofore introduced by him, which were referred to the Committee on Pensions.

Mr. COPELAND presented a resolution adopted by the Dairymen's League Cooperative Association (Inc.), of Otsego County, Schenevus, N. Y., favoring the passage of legislation to change the monetary system so as to stabilize the dollar, etc., which was referred to the Committee on Banking and Currency.

He also presented a resolution adopted by the Westchester Security League (Inc.), of Bronxville, N. Y., approving the present policy of the Government in the nonrecognition of the Government of Russia under its present form of soviet régime, which was referred to the Committee on Foreign Relations.

He also presented the petition of Henry S. Chapman and sundry other citizens of Schenectady and vicinity, in the State of New York, praying for the full carrying out of the provisions of the national defense act of 1920, which was referred to the Committee on Military Affairs.

He also presented a resolution adopted by the Bar Association of Nassau County, N. Y., favoring the prompt ratification of the World Court protocols, which was ordered to lie on the table.

He also presented a resolution adopted at a public meeting held under the auspices of the Woman's Christian Temperance Union at St. Johnsville, N. Y., protesting against the repeal of the eighteenth amendment to the Constitution or the repeal or modification of the national prohibition law, which was ordered to lie on the table.

EMERGENCY TRAFFIC RATES ON POTATOES

Mr. SCHALL. Mr. President, I am in receipt of a letter from the president of the Great Northern Railway Co. in reference to potato rates, which will be of undoubted interest to potato growers. I ask that it may be printed in the RECORD and appropriately referred.

There being no objection, the letter was referred to the Committee on Interstate Commerce and ordered to be printed in the RECORD, as follows:

GREAT NORTHERN RAILWAY CO.,
EXECUTIVE DEPARTMENT,
St. Paul, Minn., January 25, 1933.

Hon. THOMAS D. SCHALL,
United States Senate, Washington, D. C.

DEAR SENATOR SCHALL: Referring to our recent correspondence: I am quoting below a letter just written to one of the potato shippers, regarding the emergency rates on potatoes:

"Please refer to our previous exchange of correspondence in regard to emergency rates on potatoes.

"As I have advised you, the southwestern situation was dealt with at a meeting of the southwestern lines' general traffic committee held at St. Louis on January 17. We presented our proposal and the record finally adopted by the southwestern lines contemplates the establishment of a base emergency rate of 66 cents from the Princeton-Cambridge and Waupaca districts to that portion of the Southwest on and east of K. C., M. & O. Railway, from Little Sandy to San Angelo, thence through San Antonio to Corpus Christi. Rates from other origin areas will be based over Princeton-Cambridge. The proposed rate from Red River Valley group 1 will be 70 cents, from Red River Valley group 2 will be 73 cents, and from Red River Valley group 3 will be 76 cents.

"Our representative spent the remainder of the week in doing what he could to assist in the necessary details to secure authority to make publication of these emergency rates and returned to St. Paul, Minn., Sunday with the assurance of the southwestern lines that they will make every effort to expedite the publication.

"I believe you are also interested in the other phase of this emergency rate publication which deals with the rates into New Orleans and Mobile. We received late yesterday a telegram advising that the Interstate Commerce Commission had granted our sixth section petition for publication of a blanket emergency rate from points of origin in the Princeton-Cambridge and Red River Valley territories of 66 cents to New Orleans and Mobile. This rate will become effective February 5, and will be carried in Agent E. B. Boyd's Tariff No. 10–I."

We have not only taken a deep personal interest, but we have had our man spend all his time in that territory in an effort to bring about a satisfactory adjustment.

I hope our action will be satisfactory to you, and we appreciate your interest in the matter.

Very truly yours,

W. P. KENNEY.

REPORT OF THE COMMERCE COMMITTEE

Mr. VANDENBERG, from the Committee on Commerce, to which was referred the bill (S. 5502) to extend the times for commencing and completing the construction of a bridge across the Columbia River at or near The Dalles, Oreg., reported it with amendments and submitted a report (No. 1134) thereon.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. ASHURST:

A bill (S. 5567) granting a pension to Esther K. Payne; to the Committee on Pensions.

By Mr. BRATTON:

A bill (S. 5568) granting an increase of pension to Cornelia W. East; to the Committee on Pensions.

By Mr. THOMAS of Oklahoma:

A bill (S. 5569) granting a pension to Ira H. Elliott (with accompanying papers); to the Committee on Pensions.

By Mr. CAREY:

A bill (S. 5570) to meet the existing emergency in the agricultural industry, to provide for the reduction of the interest on certain existing farm mortgages, to amend and supplement the Federal farm loan act; to the Committee on Banking and Currency.

By Mr. ROBINSON of Arkansas:

A bill (S. 5571) to extend the times for commencing and completing the reconstruction of a railroad bridge across Little River in the State of Arkansas at or near Morris Ferry by the Texarkana & Fort Smith Railway Co.; to the Committee on Commerce.

By Mr. SHIPSTEAD:

A bill (S. 5572) requiring the Reconstruction Finance Corporation to be subject to the provisions of the Budget and Accounting Act of 1921; to the Committee on Banking and Currency.

CHANGE OF REFERENCE

On motion of Mr. SHIPSTEAD, the Committee on Agriculture and Forestry was discharged from the further consideration of the bill (S. 5562) to relieve agricultural distress through the consolidation and adjustment of indebtedness and the reduction of the rate of interest thereon, to release frozen credits and stimulate the recovery of business, to create in the Department of Agriculture an administration of agricultural loans, with which will be consolidated in the interest of economy and efficiency all agencies of the Federal Government concerned with agricultural credit, and for other purposes, and it was referred to the Committee on Banking and Currency.

AMENDMENT OF BANKRUPTCY LAW

Mr. ROBINSON of Arkansas submitted amendments intended to be proposed by him to the bill (H. R. 14359) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States," approved July 1, 1898, and acts amendatory thereof and supplementary thereto, which were referred to the Committee on the Judiciary and ordered to be printed.

AMENDMENTS TO TREASURY AND POST OFFICE DEPARTMENTS APPROPRIATION BILL

Mr. HEBERT submitted an amendment intended to be proposed by him to House bill 13520, the Treasury and Post Office Departments appropriation bill, which was ordered to lie on the table and to be printed, as follows:

At the proper place in the bill, to insert a new section, as follows:

"SEC. —. Section 322 of Part II of the legislative appropriation act, fiscal year 1933, is amended by adding at the end of the section the following proviso: '*Provided further*, That the provisions of this section as applicable to rentals shall apply only where the rental to be paid shall exceed $2,000 per annum.'"

Mr. COPELAND submitted amendments intended to be proposed by him to House bill 13520, the Treasury and Post Office Departments appropriation bill, which were ordered to lie on the table and to be printed, as follows:

On page 83, to strike out lines 4 to 6, inclusive, and insert in lieu thereof the following:

"SEC. 401. The Congress hereby declares that a serious emergency exists by reason of the general economic depression; that it is imperative to reduce drastically all governmental expenditures during such emergency; and that such reduction may be accomplished in great measure by proceeding immediately under the provisions of this title.

"Accordingly, in order to reduce expenditures and increase efficiency in Government, it is declared to be the policy of Congress."

On page 84, after line 15, to insert the following:

"*Provided*, That the authority granted to the President under section 403 shall terminate upon the expiration of two years after the date of enactment of this act unless otherwise provided by Congress."

THE ECONOMIC SITUATION

Mr. WHEELER. Mr. President, I ask leave to have printed in the RECORD an article entitled "Economy or Greed—Which Is It?", by Abraham Epstein, published in the Old Age Security Herald in its issue of February, 1933.

There being no objection, the article was ordered to be printed in the RECORD, and it is as follows:

ECONOMY OR GREED—WHICH IS IT?

By Abraham Epstein

America is deliberately and relentlessly being driven to social revolution. Greed and narrow-mindedness, under the guise of economy, stalk over the land determined to crush further the poorest of the poor and the weakest of the weak. From the Atlantic to the Pacific, American Bourbonism is concentrating on wiping out every trace of social justice and every spark of humanity in the United States. Protective laws and social standards which have taken more than a generation to put on the statute books are in serious danger of being completely wiped out. Never before have so-called "friends of the people" displayed such brazen initiative in repudiating their pledges and in doing the bidding of their higher masters.

These are harsh words. But the situation fully warrants them. The American Association for Old Age Security * * * has been willing to compromise with political parties and leaders in the belief that social justice could be attained for the aged poor of America through gradual progress. This year, however, political leaders are deliberately betraying their pledges. Silence is no longer a virtue. Friends of the aged must be warned of what is happening. They must organize. They must be put on their guard. Nullification of all that has been built up in the United States through a generation of effort must be prevented at all costs!

INTERLOCKING DIRECTORATE DETERMINED TO CRUSH ALL SOCIAL LEGISLATION

The blind and greedy forces who are responsible for the unprecedented and shameful destitution prevailing throughout the United States are determined to surrender not a penny of their iniquitous wealth nor an ounce of their power. Under the guise of the so-called taxpayers' associations, defenders of America, and other patriotically titled societies, as well as through manufacturers' associations, chambers of commerce and the like, these forces, linked through an interlocking directorate, have so intimidated our press, our governors, and our State legislators, that all humane social legislation is in immediate danger of repeal by the legislatures now in session. A number of governors, who in their campaigns posed as friends of the people and made innumerable promises to the destitute aged, have either forgotten their promises or have brazenly suggested wiping out the very legislation which they so vigorously defended. The battle along the old-age security front is typical of the nation-wide onslaught on all social and labor legislation.

* * * * * * *

GREED VERSUS ECONOMY

It is plain that the campaign to repeal old-age pension legislation as well as other social laws has nothing to do with the plea of economy and reduction of expenses. It is an attempt on the part of the most unscrupulous interests in the United States to take advantage of these unfortunate times to abolish every decent and humane law on our statute books. It is their hope that now they can wipe out the achievements which they fought unsuccessfully for a generation. If this is permitted to happen the friends of old-age security, and the friends of social legislation, will be guilty of the grossest negligence. The friends of the aged must organize themselves immediately. They must fight with unprecedented vigor. The issue is not economy but social justice! The question is whether the United States is ready to turn to savage barbarism or will remain a nation showing decency and humanity to the poorest of the poor.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Chaffee, one of its clerks, announced that the House insisted upon its disagreement to the amendments of the Senate to the bill (H. R. 13607) to authorize the distribution of Government-owned cotton to the American National Red Cross and other organizations for relief of distress, agreed to the further conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. JONES, Mr. FULMER, Mr. LARSEN, Mr. HAUGEN, and Mr. PURNELL were appointed managers on the part of the House at the further conference.

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Tennessee [Mr. MCKELLAR].

Mr. MCKELLAR. Mr. President, I hope we are going to vote on the amendment, and I want to call the attention of the Senate to it. The amendment is as follows: On page 58, line 2, strike out "$19,000,000" and insert "$9,500,000: *Provided*, That when the net receipts from domestic air mail exceeds the sum of $9,500,000, then such excess shall be used for this purpose by the Postmaster General in addition to the said sum of $9,500,000."

Mr. President, I want again to call attention to the fact that under the contract it is perfectly permissible to do this. Postmaster General Brown, who was opposed to the reduction, made this admission of record. He was asked this question:

> Under the present contracts, you have a right to make regulations about either day or night flying, and consolidate or cut down or enlarge it?
>
> Postmaster General BROWN. We fix the schedules.

The other day I read the provision of the contract itself showing that the Postmaster General has a perfect right to do that under the contract without violating the contract at all. It is not claimed by anybody that it would be a violation of the contract, and the department has a right to cut down the amount paid.

Just one other matter and I shall be through. I want to call attention to those whom we are subsidizing under this proposed appropriation of $19,000,000. Directly or indirectly we are subsidizing two large institutions in New York to a very large extent. The National City Bank and the Chase Bank of New York have interlocking directorates with and very largely control these aviation companies. I have previously said that the aviation companies, so far as the great subsidies are concerned, have been consolidated into four great concerns. Some of the companies have been cut out of subsidies by the Postmaster General, but the great body of them have been brought into four great concerns, and they are getting the subsidies.

By the way, I see the Senator from Alabama [Mr. BLACK] is present and I will ask him a question or so in verification of what I have just said.

The National Aviation Corporation is a holding company. Has the Senator any information about interlocking directorships between the National Aviation Corporation and either the Chase National Bank or the National City Bank?

Mr. BLACK. I have the names here of seven aviation companies upon whose boards of directors sit men who are also directors of the National City Bank of New York. I can give them to the Senator.

Mr. MCKELLAR. I trust the Senator will do so.

Mr. BLACK. They are the Aviation Corporation of America.

Mr. MCKELLAR. Just a moment. I wish to say that the Aviation Corporation of America is one of the holding companies.

Mr. BLACK. The International Zeppelin Transport Corporation.

Mr. MCKELLAR. I have no figures as to that.

Mr. BLACK. The National Air Transport Co.

Mr. MCKELLAR. The National Air Transport Co. owns several of these air-transportation companies.

Mr. BLACK. The National Aviation Corporation.

Mr. MCKELLAR. The National Air Transport Corporation is down here as one of the beneficiaries of this subsidy.

Mr. BLACK. The Pan American Rail-Airways Corporation.

Mr. MCKELLAR. Yes; the Pan American Rail-Airways Corporation get $7,000,000 under this appropriation and under the appropriation which comes under the next amendment.

Mr. BLACK. The United Aircraft & Transport Corporation.

Mr. MCKELLAR. Yes, that is another one; that is a very large beneficiary of the appropriation.

Mr. BLACK. I should like to say that the National City Bank has two directors upon that particular company—the United Aircraft & Transport Corporation.

Mr. MCKELLAR. Yes. It may be that these corporations need these subsidies; I do not know.

Mr. BLACK. May I call the Senator's attention also to the fact that the Guaranty Trust Co. of New York, which is said to be a Morgan bank, and upon which Morgan representatives sit as directors, is represented on the board of the American Airways (Inc.) by one of its directors. Is that one of the group?

Mr. MCKELLAR. That is one of the group. The American Airways, the United Air & Transport Co., the Transcontinental Western Air Express combination, are beneficiaries, as is also the Eastern Air Transport Co. The American Airways is probably a greater beneficiary than any of the others. It has a contract, and, as I understand, two directors of the bank referred to are on the board of that corporation.

Mr. BLACK. The Chase National Bank, according to the evidence before the committee, has directors sitting on the Curtiss-Wright Corporation and the Wright Aeronautical Corporation.

Mr. MCKELLAR. I find nothing in these contracts for those two corporations.

Mr. BLACK. For my own information, do I understand that the subsidies contained in this bill go to the companies upon which sit the directors of the National City Bank and the Morgan interests?

Mr. MCKELLAR. They go to these companies, on the boards of directors of which sit directors of the National City Bank and the Chase National Bank, as stated by the Senator. They are interested in these companies.

Mr. BLACK. I might say to the Senator, in order that he may know the source of this information, that it came from a witness before the subcommittee which is considering the 5-day-week bill. That witness compiled this information from various directories of directors in New York, and his data show that these particular companies have interlocking directors with the National City Bank, as stated, with the Chase National Bank as stated, and with the Morgan interests as stated.

Mr. LONG. Mr. President——

The VICE PRESIDENT. Does the Senator from Tennessee yield to the Senator from Louisiana?

Mr. MCKELLAR. I yield.

Mr. LONG. I should like to ask the Senator a question. With the wealth of this country concentrated under Morgan, how is it going to be possible to run any business, anyway, unless Morgan runs it?

Mr. MCKELLAR. If the Senator desires to help Mr. Morgan out I think a very excellent way to do it is by voting for this subsidy, because if the Senator from Alabama is correct the money is bound for and will ultimately go to those big interests up there. I just thought the Senate ought to know before it votes on this amendment just where the subsidies were actually going.

So, with the statement of the Senator from Alabama and the statement I have heretofore made about the matter, I leave the question with the Senate.

Mr. LONG. Mr. President, will the Senator yield again?

The VICE PRESIDENT. Does the Senator from Tennessee yield further to the Senator from Louisiana?

Mr. McKELLAR. I yield.

Mr. LONG. Does the Senator know that the thread industry, the steel industry, and almost every other industry in America to-day, if we should cut Morgan out, would have to discontinue?

Mr. BLACK. Mr. President, will the Senator from Tennessee yield to me once more before he yields the floor?

The VICE PRESIDENT. Does the Senator from Tennessee yield to the Senator from Alabama?

Mr. McKELLAR. I yield.

Mr. BLACK. In order to be absolutely clear, I will state that the evidence before the committee further shows that the directorships are assumed for the purpose of controlling the various industries on which those directors sit for the benefit of the banks and the Morgan interests.

Mr. McKELLAR. That is all the more reason, Mr. President, it seems to me, why, in the interest of economy and in the interest of good government at a time like this, we ought to cut this appropriation down from $19,000,000 to nine and a half million dollars.

Mr. BINGHAM obtained the floor.

Mr. LONG. Mr. President——

The VICE PRESIDENT. Does the Senator from Connecticut yield to the Senator from Louisiana?

Mr. BINGHAM. I yield.

Mr. LONG. Mr. President, I am not very anxious to help Morgan & Co., but we have $111,000,000 worth of mail contracts with railroads that are dominated practically by the house of Morgan and Kuhn-Loeb, and if we are going to begin cutting off anything on the ground that they should not have any part in the contract, then we ought to cut out $55,000,000 of the railway mail contracts, because Morgan and Kuhn-Loeb own them or have the directing hand in them.

We all know that big business is in charge of this country. I have undertaken during the few months I have been in the Senate to try to take the strangle hold of big business off this country, but if we are going to have airplanes operated, the banking houses are going to be in on it. It is not a question whether banking houses are in the business or not, because we would have to cut out practically every business we have in this country to-day if we are going to cut any out on the ground that the banking houses are interested.

The thing we ought to do, but which we can not get anybody to do or say that he wants to do it, would be what we promised the American people in the last campaign we were going to do, and that is to deconcentrate the wealth of this country, which is now in the hands of a few people; but we do not sail on that line at all. Now we have before us a bill making appropriations for air mail service. There are municipalities from coast to coast, from Canada to the Gulf, building airports. Those municipalities have floated bonds; they have lighted the airways and built roads to them, and now, because somebody is in the airplane business about whom we were told nothing until the people had bonded themselves and spent their money, it is proposed to cripple and put out of business the aircraft industry in this country.

Why should we spend several million dollars for airports in our State, as we have done, borrowing a large part of the money from the Government, if the Congress is going to cripple the air service? Every State in the Union has done that; the State of Florida has done that to an extreme extent, and Tennessee has done it, I will venture the assertion. It has been done on the coast. This country is already backward in airplane inventive and constructive development, and to reduce the $19,000,000 appropriation, as is proposed, would turn it back a little bit farther, when it is the cheapest thing we are doing and the most important thing we are doing. After millions and hundreds of millions, and I would almost say billions of dollars have been invested by localities and by communities, we come along and cut the appropriation right half in two, knowing that we are bound to cripple the airplane service.

The further suggestion has been made that maybe we ought not to act on this matter so early, because the present Postmaster General might make the contracts. Mr. President, if we have the time—and I understand we will have the time, because we are going to have an extra session—I would rather see the entire airplane appropriation stricken out and await the extra session of Congress, which I understand will assemble here in April, and let the new Postmaster General make the kind of contract he thinks ought to be made within the Budget than to put the airplane appropriations in the appropriation bill for the next Congress.

I should much prefer that than to see us strike a death blow to at least 50 per cent of the service. Let us not go here in a haphazard way, with nobody knowing anything about it. The Senator from Tennessee [Mr. McKELLAR] does not propose to tell anybody that half this money is going to be able to carry on half the service. I will venture the assertion that we will not have a fourth of the service if we come here and cut out half the money. Everybody is going to have the airplane service suddenly discontinued because of the fact that we have come along here and said, "Well, we have got to save something, so let us take this airplane service and cut it in two."

Why not take the Army and cut it in two and save $200,000,000? Why not take the Navy and cut it in two and save three or four hundred million dollars? Why come here on the only insignificant expense that we have after we have had every State and every locality in this country spend hundreds of millions of dollars, depending upon the service—the only defense service that is rendering a service to the domestic needs of the country—why take this little, insignificant appropriation, by comparison with other appropriations, and cut out airplane service, which is probably going to be the most needed thing for defense of all of them, and costs the least, and is one which concerns all these different communities?

Mr. BINGHAM. Mr. President, there is some misunderstanding in regard to the contract situation and in regard to the certificates.

The Senator from Tennessee [Mr. McKELLAR] the other day, when he was discussing this amendment, read from a contract appearing on page 301 of Senate Document No. 70 of the Seventy-second Congress, first session—a contract issued to the Philadelphia Rapid Transit Air Service in 1926. He did not tell us that that contract was canceled at the request of the contractor after less than one year of operation. He did not tell us that there is not a single one of the air transport companies now carrying the mail that is operating under contract. He implied in his remarks that they were all operating under contract. He did not tell us that all the contracts have been voluntarily canceled under the Watres Act, and, instead of that, typical route certificates have been issued.

If the Senators have before them this document, they will find on page 339 a typical route certificate, which provides that the certificate holder—

shall have the right, so long as it complies with all rules, regulations, and orders that may be issued by the Postmaster General for meeting the needs of the Postal Service and adjusting mail operations to advances in the art of flying and passenger transportation, to carry air mail over the route hereinafter set out or any modification thereof, at rates of compensation fixed herein, or to be fixed from time to time, at least annually, by the Postmaster General, provided that such rates shall not exceed $1.25 per mile for a period ending not more than 10 years from the date of beginning service under said contract, to wit, on the 5th day of April, 1936; subject to the following conditions.

Note, Mr. President, that all these certificates expire at the same time—on the 5th of April, 1936. The only right of cancellation is contained in paragraph 16 of the conditions, which appears on page 343 of the document, and reads as follows:

This certificate may be canceled by the Postmaster General at any time—

On what account?—

for willful neglect on the part of the holder to carry out any rules, regulations, or orders made for its guidance.

That is the only basis on which these certificates may be canceled. It is not at the will and pleasure of anyone. The contracts were given up voluntarily in order to receive the certificates. The certificates are good until April 5, 1936. The certificates may be canceled only for willful neglect on the part of the holder to carry out any rules, regulations, or orders.

Notice of such intended cancellation to be given in writing by the Postmaster General and 45 days allowed the holder in which to show cause why the certificate should not be canceled.

By agreement of the Postmaster General and the carrier the life of this certificate may be curtailed, said certificate may be canceled, or any other modification may be made herein not inconsistent with law.

It is true that the Postmaster General may reduce rates of compensation; but if he reduces them below a reasonable rate the contractor can apply to the Federal courts for relief. It would be impossible for the contractors to perform the service which they are now rendering at a 50 per cent reduction in mail pay, which would have to be given if the appropriation were cut in two; and a reduction of 50 per cent in compensation would mean more than a 50 per cent cut in service, because the additional schedules are paid for at a lower rate than the initial service.

Mr. President, Senators may be interested to know what has happened under the arrangement whereby the contracts were canceled and certificates issued.

Under the certificate plan, the Postmaster General, after working for a long time, has drawn up a rather complicated formula of poundage, mileage, and so forth, which applies alike to all companies carrying mail; and may I say in passing that it does not seem to me important in this regard as to whether or not these companies—none of which is paying dividends, none of which is making money—are controlled by directors who may also belong to banks or other companies. Perhaps we should have enacted a law that no company whose director is on any bank should have any contract. The fact remains that these companies have been given these certificates, and they are performing useful service.

Now, let us see what the Postmaster General has done in the way of reducing rates.

The first formula which he put into effect became effective on May 1, 1930. We were then flying 1,392,000 miles a month. The average rate received under the formula was 85 cents a mile.

A year later another rate was put into effect as the Postmaster General studied the books of the country, which he has a right to do. He has access to all the receipts and all the books of the various companies; and on the 1st of April, 1931, the second formula became effective. At that time we started flying 2,194,000 miles a month, and the average rate was reduced from 85 cents to 72 cents per mile.

The third formula became effective on January 1, 1932. We were then flying 2,502,000 miles a month, and the average rate was 62 cents a mile.

The fourth formula, just authorized, and becoming effective November 1, 1932, reduces the average rate per mile for the balance of this fiscal year to 45 cents per mile, which is almost 50 per cent of the rates in effect on May 1, 1930, when the first formula became effective. The monthly mileage last October was nearly 3,000,000 miles a month.

That shows, Mr. President, what has been done by the Postmaster General in reducing rates and increasing mileage. He has taken the money we have given him, has given additional air mail service to many different communities, has increased a number of routes, and has recently arranged to transfer some routes so as to make possible service in other regards. The suggestion that the service be placed on a self-sustaining basis would probably eliminate all air mail service in such States as Tennessee, Michigan, Arkansas, Minnesota, North and South Dakota, Colorado, all the principal cities of Texas, Washington, Oregon, Montana, Louisiana, Alabama, Massachusetts, Mississippi, and Connecticut, and possibly from Maryland, Virginia, the Carolinas, and Georgia. The discontinuance of all feeder lines would, in turn, reduce the poundage on the trunk lines, and even these might not be able to survive.

Mr. President, no one has suggested that we cancel our mail-carrying contracts with the railroads until such time as they earn enough to pay the contract price for the railroads to carry second-class mail. I hope this amendment will not be adopted, for I feel certain that it will cause an entire disruption of the air-transport business of the country which has been built up during the past two or three years under the Watres Act. It will cause more than half of the lines to be discontinued, if not three-fourths of the lines. It will probably subject us to very serious claims for damages, because the certificate may not be canceled before April, 1936, except for "willful neglect" on the part of the transport companies; but there is an agreement whereby their rates may be reduced by voluntary agreement every year.

Mr. TYDINGS. Mr. President, regardless of the pendency of the proposition offered by the Senator from Wisconsin [Mr. LA FOLLETTE], I shall voluntarily confine myself to 10 minutes.

What we have just heard from the Senator from Connecticut is the speech which will be made against every economy which is attempted to be effected in this bill. There will not be one, from the first appropriation bill to the last, to which the speech made just now by the Senator from Connecticut will not apply.

I want to leave this thought with the Senate of the United States:

During the last three years we have lived on the future to the extent of $5,000,000,000. We have added $5,000,000,000 to the national debt. At the present time our income is only one-half of our expenditures. At this very moment it costs $760,000,000 a year just to pay the interest on our national debt; and that is the sum which we get from all of the excise taxes carried in the billion dollar tax bill of 1928. It takes all the money which we raised in that long and hard-fought-out tax bill just to pay the interest on the national debt—$760,000,000 a year, 30 per cent of all the Government revenue.

This year we are going to add nearly $2,000,000,000 to the national debt. I want to ask any Member of this body where these airplane companies will be, where the Senators will be, where the employees of the Government will be, when we continue to go year after year living on the future, and the day finally comes when the Federal Government's credit is gone? Then these companies, instead of getting a cut, will get nothing, because there will be no money to give them. They are only attempting to bring about their own complete ruin by insisting that at this time they suffer no cut at all, but that there should be economy on other companies or individuals or operations.

Mr. LONG. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Maryland yield to the Senator from Louisiana?

Mr. TYDINGS. Not just yet. I want to complete my statement. Then I will yield.

I want to bring home to the attention of the Senate, if possible, that we can not go on forever and ever without bringing into serious jeopardy the credit of the Government of the United States. Municipalities now have no credit; States now have no credit; and when the Federal Government's credit is impaired—as it will be if we continue this course—where will the United States of America be? Where will the airplane companies be? Where will the Federal employees be? Where will the disabled soldiers be? Where will the emergency officers be? Where will the Army and the Navy be? They will be the subjects of a Government that can not pay its bills.

I should like to ask my friend the Senator from Connecticut where we can make some economies, if not here? Where can we save some money?

Mr. BINGHAM. Mr. President, since the Senator has asked me a question, will he yield?

Mr. TYDINGS. Yes; I yield so that the Senator may answer my question.

Mr. BINGHAM. As soon as we get to the latter part of the bill I will show the Senator where we can save some $50,000,000; and the Senator well knows that the President has suggested an amendment to the veterans' act that would enable us to save $127,000,000.

Mr. TYDINGS. I thank the Senator. He has made a very good answer; but who is the Senator that is going to offer the amendment to the veterans' act? Who is the Senator? Who is going to offer it? Where are those men who the other day took me to task and made sport of my position? Will the Senator from Delaware [Mr. HASTINGS] offer it? He is a member of the President's own party. Will the Senator from Connecticut [Mr. BINGHAM] offer it? Will the Senator from Michigan [Mr. VANDENBERG] offer it? Will the Senator from Utah [Mr. SMOOT] offer it?

Mr. BINGHAM. Mr. President, the Senator from Connecticut would be very glad to offer the amendment if he thought he could get any support for it; but the Senator from Maryland has made such a splendid lead on these subjects that we expected the Senator from Maryland himself to offer it.

Mr. TYDINGS. Oh, that is no answer. Let me say to the Senator from Connecticut that there are located in Baltimore, as he knows, two of the largest airplane factories in this country. The officials of that organization have been on the telephone this morning attempting to persuade me not to vote for this economy, and I do not mind telling the Senate what I told them. I said that, in my humble judgment, unless we effected economies the day would come when they would get no appropriation, because the Federal Government would have no money to pay, and that perhaps they would not like it, but that I intended to vote for economy in this and every other bill coming before this body.

Mr. LONG. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Maryland yield to the Senator from Louisiana?

Mr. TYDINGS. Not yet; I will yield to the Senator in a moment. I want to return to the question of appropriations for veterans. The Republican President has advocated that there be reductions in veterans' compensation, and not a man on the other side of the aisle has made a move to carry out his own President's recommendation.

Mr. BINGHAM. Mr. President, will the Senator yield?

Mr. TYDINGS. I will yield in a moment, but not now. Where are all these men who were ready to vote for economy in the aggregate? They were ready to vote for economy in the aggregate, yes; but where are they now, when we have before us a specific item which would accomplish that economy?

Mr. SMOOT. Mr. President, will the Senator yield?

Mr. TYDINGS. There will not be a bill coming from the other side or this side of the aisle, in my judgment, which will touch the veterans.

Mr. SMOOT. Mr. President——

Mr. TYDINGS. I do not mean the disabled man who suffered during the war, because I do not want to touch his compensation at all. I am talking about all that other class who now are receiving special compensation while 12,000,000 people are walking the streets asking for jobs and have been unemployed for three years.

Mr. SMOOT. Mr. President——

Mr. TYDINGS. I yield.

Mr. SMOOT. As the Senator referred to me in relation to not voting for any decrease in the veterans' compensation under the law, and stated that——

Mr. TYDINGS. I did not say that. I asked the Senator if he would offer an amendment to carry out the recommendations of the President of the United States. That was the question I asked the Senator. Will he do that?

Mr. SMOOT. Yes; I will do it.

Mr. TYDINGS. Good!

Mr. SMOOT. That is why I rose. I did not want to interrupt the Senator.

Mr. TYDINGS. Who will offer the amendment to carry out the other recommendations of the President of the United States touching the other matters? Is there one man on the other side of the aisle who will volunteer? Where are all those who the other day thought I was an acrobat? Where are all those strong, tried, courageous men who rose the other day when nothing was before the Senate, and plead for economy? Have they lost their tongues? Are they unable to function? Has their courage vanished overnight?

Mr. President, every Member of this body and the sophisticated ones in the galleries knew that the remarks made the other day in opposition to the resolution I offered were purely political, with a trace of humor. There was no real purpose back of them. While I do not want to take any laurels unto myself, let it be said that so far, whether the resolution was offered or withdrawn or not, I have not seen anybody else offer such a resolution. I have not heard any other Senator discuss veterans' legislation on this floor, not one.

Senators, it is more serious than mere parliamentary debate, because if we go on and add $2,000,000,000 more to the national debt each year, the airplane companies will not be getting any subsidies before long because there will not be any money to pay them. This Government's credit is in jeopardy. It is only a question of time.

There are bills pending to take care of the unemployed and the distressed of the country. Where is the money to come from, unless we reduce the appropriations for some of these services, and save the money, so that we will have it to appropriate for the relief of distress in the country?

I say that it is a sad commentary upon the Congress that nobody has offered a bill to carry out the recommendations recently submitted by President Hoover to the Congress. All those men who spoke in his behalf last fall have deserted him. There is not one who will make an attempt to assist him to wind up his administration at least in a partial blaze of glory. There is not one to offer to carry out his recommendations. There is not one who will offer any economy on his own initiative, and when amendments are offered seeking to reduce expenses, such as those which have been offered now by the Senator from Tennessee, remarks along the line of those made by the Senator from Connecticut will be made as an absolute and complete reason why this or that other expenditure should not be reduced.

We will add $2,000,000,000 to the deficit, which has grown $5,000,000,000 in the last three years, and continue to go on and on and on until our credit is gone. Then, forsooth, where will any subsidy or any employee of this country be?

Now I yield to the Senator from Louisiana.

Mr. LONG. Mr. President, I want to thank the Senator for yielding. The Senator has asked a question as to where the money is coming from. Would the Senator be opposed to a tax on the huge fortunes ranging into billions, to decentralize wealth and support the Government at the same time, as promised by our President elect?

Mr. TYDINGS. I voted for a very heavy inheritance tax in the last Congress, and I have no objection to doing it again; but before I do that I want to make sure that we do not spend more money than we should spend, because I am opposed to any tax which is not absolutely essential on the rich or the poor or any of them.

Mr. LONG. Will the Senator vote to reduce from the top on the fortunes which exceed a billion dollars until we balance the Budget?

Mr. TYDINGS. I would not want to pass on that proposition haphazard. May I say to the Senator from Louisiana that it takes all of the money raised by excise taxes provided for in the law to which I have referred, about which we fought so long in the Congress, $800,000,000, just to pay the interest on the national debt. As far as big fortunes are concerned, it is my observation that there are very few big fortunes left, and will be fewer as the years roll on, unless there is some upturn in business.

I have no objection to putting the burden of taxation upon those best able to pay, and it is not for them that I am speaking to-day. It is for the purpose of finding some way of restoring confidence in the country, so that the 12,000,000 people who are unemployed may get work again. There will not be any confidence in the country, there will not be any recovery, there will not be any stability of government, until we clean our own house and put our finances on a sound basis.

If we knew that the depression would end in another year, I would not favor these drastic cuts. Perhaps, if we knew it would end in two years we might continue some of these appropriations. But who can tell whether it will be five years in the future, or seven years in the future, or whether we are in some kind of a semipermanent status now?

I appeal to Senators, not that I want to cut down this particular appropriation; not at all. May I say that it is very difficult for me to support this economy because of the many warm associations I have with the people in my State who are engaged in the industry affected; but it is for their good, for eventually they will get no subsidy at all unless they make up their minds to bear their fair proportion of reductions now.

Mr. KING. Mr. President, will the Senator yield?

Mr. TYDINGS. I yield.

Mr. KING. I ask the Senator whether he is quite accurate when he concedes that the measures before us would bring about drastic cuts. I suggest to the Senator that our increases in appropriations from the year 1916 have been stupendous. I do not think the bills which have been passed by the House, or those reported in the Senate, would bring about any drastic cuts. I think they do not cut nearly enough.

Mr. TYDINGS. Mr. President, I have but a minute and a half of my time left, and I want to close within my 10 minutes.

I just want to leave this thought with my Democratic colleagues, that it appears to me that if we appropriate more money than we take in, on the scale on which we have formerly appropriated it, we are going to crucify Governor Roosevelt upon the cross of governmental extravagance in a time of national economic chaos. If we want to give him a chance, we ought to cut down all Government activities possible and furnish him the money to rehabilitate the country with whatever program is needed, so that he can show the people that he will take care of the distressed and the unfortunate by appropriate measures until a program of national and international recovery can be unfolded.

May I say to my friends on the other side of the aisle, as well, that this situation is bigger than politics, because the real integrity of this Government is at stake. The emergency is just as great as in the days of the World War, and the time has come for us to stand up to the job we have before us.

The PRESIDENT pro tempore. The time of the Senator from Maryland has expired.

Mr. DILL. Mr. President, every time anybody here proposes to cut any governmental expenditures, we are immediately confronted with a great line of reasons as to why we must not make the particular cut proposed. Everybody has some pet Government activity which he believes must be maintained.

We have been following that course for two years, and, as a result, we have made practically no cuts in the expenditures of the Government. For my part, I am committed to the doctrine that the only way to balance the Budget in times like these is to cut expenditures until they will not be any greater than the revenue received.

I dislike to see the air mail curtailed. In the past I have voted for the appropriations for the air mail, and I have salved my conscience with the thought that I was helping by supporting appropriations which would result in aviators being trained in a practical way, and that that would be a training in behalf of national defense. But the time has come, it seems to me, when there is another kind of national defense about which we must think. It is the national defense of the people back home from more taxes by Congress.

The American people to-day are so overburdened with taxes that they have just about come to the conclusion that anything different from what we have in the way of government would bring an improvement over present conditions, and I have made up my mind that I am going to vote to cut the appropriation now before us and to cut every other appropriation where the reduction would not interfere with the absolute necessities of governmental operations.

I shall not take that course because of any political consideration. It happens that in my State the greatest airplane factory in the United States, if not in the world, is in operation. The Boeing airplane factory produces a large proportion of the airplanes used in the air mail service, and I should be the last to vote to curtail that industry. But I have come to the conclusion that my first duty is to the millions of common men and women of the United States who to-day can not pay existing taxes, can not pay their living expenses, to say nothing of paying the interest on their mortgages.

Mr. President, for my part, I am going to vote for every proposition that comes before us to cut Government expenditures, and then cut them again. Of course, we want the air mail service when we can have it, but our need of the air mail service can not be compared with the need of cutting the tax burden and preventing a deficit in the Treasury.

I believe that we could well afford to cut out the entire air mail appropriation, and I should vote to do that if an amendment were offered to that effect.

I shall, therefore, vote to cut the appropriation under consideration in the amount suggested by the Senator from Tennessee in the hope that it will help a little bit toward the great sum total we must cut from Government expenditures if we are to avoid another overwhelming deficit or avoid new taxes being laid on the backs of the people who are to-day going into bankruptcy in every part of the United States and in every industry and business.

Mr. ODDIE. Mr. President, several days ago I put some figures in the RECORD which show the importance of the air mail industry. The committee which has had charge of this appropriation bill has received much valuable technical testimony, and quite a large majority of the committee was convinced that this amount is not excessive. Furthermore, we were convinced that the reduction of the amount would seriously cripple the air mail industry.

The Government has expended large sums of money thus far in preparing fields and in carrying out and perfecting this great work. The Government has made positive contracts with these companies which have invested millions of dollars in their equipment. I feel that it would be decidedly wrong and a breaking of faith for this appropriation to be cut. It would tend to injure the industry in a very serious manner.

Mr. KING. Mr. President, will the Senator suffer an interruption?

The PRESIDENT pro tempore. Does the Senator from Nevada yield to the Senator from Utah?

Mr. ODDIE. I yield.

Mr. KING. Is it not a fact that a considerable number of the airplane companies during the boom embarked upon the construction of planes wholly beyond the needs of the people and without any rhyme or reason, and when they found themselves in a financially embarrassed condition they appealed to Mr. Brown, the Postmaster General, for relief; and that at a meeting of a large number of airplane manufacturers it was understood that some of the bankrupt and prospective bankrupt concerns would receive contracts, either directly or indirectly, in order that they might be saved from their perilous financial situation?

Mr. ODDIE. That is rather an involved question, and I am not prepared to answer it offhand in detail. I refer the Senator to the record.

Referring again to the importance of the industry, I might state that 30,000 persons are directly and indirectly employed

by it. About 6,500 of them are engaged in air transportation, about 9,200 in the commercial and military aircraft branches, about 2,300 in commercial and military aircraft production, and 12,000 in miscellaneous flying services, airport operation, servicing stations, and so forth.

Referring to the influence of this industry, Mr. President, I might say that about one-quarter of the money appropriated finds its way to the manufacturing departments of the industry in payment for new aircraft and stimulates those industries. The balance of the funds go to the gasoline and oil industries, the telephone and telegraph services, and miscellaneous allied activities.

I know that the large airplane companies are spending millions of dollars in the purchase of new planes of improved types which are constantly being put into service. Methods providing for greater safety of planes and passengers are being provided at large expense to the Government and to these companies. The public has been brought to rely on this new industry as an important and safe one.

Mr. WALSH of Massachusetts. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nevada yield to the Senator from Massachusetts?

Mr. ODDIE. Certainly.

Mr. WALSH of Massachusetts. Will the Senator state for the information of the Senate whether or not the House or the Committee on Appropriations of the Senate reduced the appropriation for air mail below that of last year?

Mr. ODDIE. The appropriations of the House were reduced below the appropriations of last year.

Mr. WALSH of Massachusetts. How much?

Mr. ODDIE. Last year $19,460,000 was appropriated and this year only $19,000,000. The Budget estimate was $20,000,000 this year.

Mr. WALSH of Massachusetts. What does that reduction represent in dollars and cents?

Mr. ODDIE. It represents $460,000 below last year's appropriation.

Mr. WALSH of Massachusetts. So the House has reduced the appropriation under that made last year to the amount of $460,000.

Mr. ODDIE. Yes.

Mr. WALSH of Massachusetts. Has the Senate Committee on Appropriations reduced that amount?

Mr. ODDIE. No; it accepted the House figures.

Mr. WALSH of Massachusetts. Did the Senate Appropriations Committee hear evidence on the question of whether or not we should reduce this amount to a greater degree?

Mr. ODDIE. Yes.

Mr. WALSH of Massachusetts. What action did the committee take on the question of reducing the amount reported by the House?

Mr. ODDIE. The Senate committee approved the House figures and decided they could not safely be reduced.

Mr. WALSH of Massachusetts. Was the action of the committee unanimous?

Mr. ODDIE. It was not unanimous, but by a substantial majority.

Mr. WALSH of Massachusetts. Was any suggestion made in the committee to reduce this sum 50 per cent?

Mr. ODDIE. The Senator from Tennessee [Mr. McKELLAR] suggested such a reduction.

Mr. WALSH of Massachusetts. What troubles me is the question of relativity. We all agree there must be larger reductions in Federal expenses. We all agree—at least I am inclined to think we do—that this is one of the activities where some reduction might be made if we are to make reductions all along the line. But I do not like the idea of one Senator, without having the support of a minority at least of the committee members, presenting to us a proposal to cut a particular appropriation 50 per cent. I would like to know—and this, Mr. President, is in my own time.

The PRESIDENT pro tempore. That can not be. The Senator from Nevada has the floor and is yielding of his time.

Mr. ODDIE. I am not yielding the floor yet.

Mr. WALSH of Massachusetts. I would like to know what study of the problem has been made. Is there a point between 50 per cent and 1 per cent where a cut could be made so as not to destroy this service? Perhaps it is 25 per cent; perhaps it is 20 per cent; but it seems to me that 50 per cent is a very drastic cut. I am for curtailing, but not for destroying, this service. I want to vote to reduce the appropriation, but I am not prepared to cut it in one fell swoop on the motion of one Senator. I fear that a reduction of 50 per cent means the destruction of the air mail. Perhaps it can be eliminated, but I would like to have the Executive or a substantial number of the members of a committee who have studied the question advocate it.

Mr. ODDIE. I will answer that in a very few words. The question was in the minds of the members of the committee whether or not the service could be adequately maintained for less than $20,000,000. The department showed that it was very necessary that $20,000,000 be appropriated, but after studying the matter carefully and questioning those officials in the department who were posted it was decided that the amount could be cut to $19,000,000, but no further, without seriously crippling and injuring the service.

Mr. WALSH of Massachusetts. What is the basis for making a 50 per cent reduction rather than 75 per cent or 25 per cent?

Mr. McKELLAR. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nevada yield to the Senator from Tennessee?

Mr. ODDIE. I yield.

Mr. McKELLAR. The Senator made a statement which I think is more or less personal and should be answered. The Senator from Massachusetts said he did not like it because one member of the committee came here with a plan and sought to override the committee, and wants to know what backing it has. The amendment was offered in the committee and, as I remember it, the vote, after a most complete hearing and argument, was 8 to 10 against it in the committee. It is not a 1-man proposition at all.

Mr. WALSH of Massachusetts. I thank the Senator for the information. I tried to get that information from the Senator from Nevada, as the Senator from Tennessee knows, and I did not make the comment until the Senator from Nevada informed us that there was a vote or that the vote was greatly in the minority. I thank the Senator from Tennessee. He has enlightened me very much by informing me of the fact that his committee seriously considered his motion and did have a vote on the proposition and eight of his colleagues agreed with him.

Mr. ODDIE. Yes; we did have a vote. I do not remember definitely just what the vote was, but I remember that it was a substantial majority against the proposition of the Senator from Tennessee.

Mr. President, I would like to state in regard to the question of economy that I am a particularly strong advocate of economy, but not of what I consider false economy. I think that by crippling and ruining some of the Government activities which are public services a false economy will be worked and great harm will come.

Furthermore, in answer briefly to the statement of the Senator from Maryland [Mr. TYDINGS] that the country will go to ruin if it obligates itself with certain of these appropriations, I feel that the country will not go to destruction. The dark days are over us to-day, but I feel that the sun will shine before long. I am one of the optimists who feel that by maintaining and building up industry we will stop this crushing depression.

The PRESIDENT pro tempore. The time of the Senator from Nevada has expired. The question is on agreeing to the amendment of the Senator from Tennessee.

Mr. ODDIE. Mr. President, I am compelled to raise the point of order against the amendment because the latter part of it provides that the net receipts from the air mail, when reaching a certain point, shall be used by the Postmaster General for the payment of these expenses. I maintain that there is no legislation providing for that, and I am compelled to make the point of order.

Mr. McKELLAR. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Tennessee desire to address himself to the point of order?

Mr. McKELLAR. I do. In order that there may not be any suggestion of basis for a point of order to the amendment, I want to perfect my amendment by striking out everything after the word "then," at the end of line 3 of the amendment as printed, and inserting in lieu thereof the following:

An additional amount equal to such excess receipts is hereby appropriated, to be used for such air mail transportation.

The PRESIDENT pro tempore. The Senator from Tennessee has a right to perfect his amendment up to the time when it is voted upon. Does the Senator from Nevada make the point of order against the amendment as modified?

Mr. ODDIE. I do not. I withdraw the point of order.

Mr. SMOOT. Mr. President, I would like to have the modified amendment reported again.

Mr. LONG. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. LONG. Where are we? What is the situation?

The PRESIDENT pro tempore. The Senator from Tennessee offered an amendment in this language: On page 58, line 2, strike out "$19,000,000" and insert "$9,500,000: *Provided*, That when the net receipts for domestic air mail exceeds the sum of $9,500,000, then such excess shall be used for this purpose by the Postmaster General in addition to the said sum of $9,500,000."

To the amendment in that form the Senator from Nevada raised a point of order, which in the opinion of the present occupant of the chair was clearly to be sustained, inasmuch as all the postal receipts in every form whatever go directly into the Treasury and the Congress appropriates direct for all forms of postal activities, and it was legislation and could not be added to a general appropriation bill.

The Senator from Tennessee, however, the point of order having been made against the original form, exercised his right to modify his amendment, which is the right of every Senator offering an amendment or resolution up to the time the amendment or resolution is to be voted upon. The Senator from Tennessee, under these circumstances, modified his amendment by striking out all after the word "then," in line 3, in the printed form of the amendment and inserting the words:

An additional amount equal to such excess receipts is hereby appropriated, to be used for such air mail transportation.

That language is clearly within the rule; and that modification having been made, the Senator from Nevada withdrew his point of order. Therefore, the question now is upon the amendment of the Senator from Tennessee as modified.

Mr. LONG. Mr. President, a further parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. LONG. Inasmuch as we have now practically a new amendment, can a Senator be heard again on it?

The PRESIDENT pro tempore. Not on the modified amendment, because the form of words used by the Senator from Tennessee merely perfected the language of the amendment which he first offered.

Mr. LONG. Have I any time left? I want about one minute. If I have no time left, I ask unanimous consent to proceed for one minute.

The PRESIDENT pro tempore. The clerk informs the Chair that the Senator has occupied his 15 minutes, and inasmuch as he may not speak more than once the Senator has no time left to him on the amendment.

Mr. LONG. I ask unanimous consent to proceed for one minute.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the Senator from Louisiana is recognized for one minute.

Mr. LONG. Mr. President, apparently the Senator from Tennessee himself does not exactly know what he wants to do.

Mr. McKELLAR. The Senator is very kind. However, I do not care anything about the opinion of the Senator.

Mr. LONG. I mean that in a charitable sense.

Mr. McKELLAR. I do not care in what sense the Senator means it; I resent it.

Mr. LONG. I mean that the Senator——

The PRESIDENT pro tempore. The Chair will state that this debate all comes out of the Senator's one minute.

Mr. LONG. Then my minute is gone, Mr. President. [Laughter.]

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Tennessee, as modified by him.

Mr. McKELLAR. I ask for the yeas and nays, Mr. President.

Mr. VANDENBERG. Mr. President, the final paragraph in the amendment which has been submitted by the Senator from Tennessee was upon my original suggestion. I think it will make a useful addition to the amendment, if it is to be adopted, because I think it will put a new premium, a new stimulus, upon the study of the sufficiency of air mail postal rates. It does seem to me that the air mail service could well sustain a larger self-supporting share of its cost than it does at present. I understand when the rates were increased the last time by the department that the net increase was about $800,000. I submit that there are other eligible increases that can be made in these air postage rates. It seems to me, for example, that if it is worth a 10-cent stamp for the special delivery of a letter within the confines of one city, it ought to be worth 10 cents for what is most emphatically special delivery half way across this country by air. It seems to me that the 8-cent air postage rate might well be increased. So I am wholly in sympathy with the stimulus contained in this portion of the amendment. However, Mr. President, I also agree with the viewpoint originally expressed by the Senator from Massachusetts, namely, that we are asking the air mail to carry too much of the cut when we seek to reduce the appropriation 50 per cent. Therefore in the form now pending I regret to say I can not support the amendment. I will support a lesser cut.

Lest this observation should invite a renewal of the strictures repeatedly submitted by my able friend the Senator from Maryland [Mr. TYDINGS], I want to say a word on the general subject of economy to which we both have addressed ourselves. I regret that the Senator from Maryland is not in the Chamber. In the first place I want to say to my able friend that the colloquy which occurred between us on last Friday or Saturday contained no criticism, so far as I am concerned, respecting his attitude toward this or any other legislation. I was simply calling attention to the fact that on the previous day he had said political fear was the only factor interfering with many of these reductions, and I was pointing out that he had discovered for himself that there are other factors, and, of course, there are many other factors. Nothing that I said was intended in any degree to criticize the Senator from Maryland. He does not surrender to political fear. I hope the same thing may be said for me.

There are ways to economize besides the methods indicated in this particular amendment. The Senator from Maryland is entitled to know how I would pursue those methods. I want to submit, Mr. President, that I demonstrated a year ago the fundamental way that I would pursue them, namely, by clothing the Executive with complete authority, not subject to veto by Congress, to rearrange the departments and bureaus and to consolidate and eliminate, and to save duplications and wastes. I fought here for 90 days trying to have such authority placed in the hands of a Republican President, and I have already said to the Senate that I shall move to amend the pending bill, if no other amendment of the same nature shall be submitted, to permit that type of unrestricted power to be lodged in the incoming Democratic Chief Executive. That is the fundamental principle by which, it seems to me, we can demonstrate our belief in practical and effectual economy. I stand upon that

principle without reservation and I pursue it whether under Republican or Democratic auspices. I further favor a final blanket reduction in the total appropriations for each department, the saving to be allocated as the responsible head of the department finds advisable. I so stated last week upon the Senate floor. I shall support the Senator from New Mexico [Mr. BRATTON] when he offers such amendments.

Respecting veterans' allowances, I want to say to my friend from Maryland that a significant test came upon a roll call about a year ago when an economy committee of a previous Congress proposed certain reasonable veterans' reductions, and I was one of the lonesome minority of 12 or 13 or 14 Senators who insisted that we should have proceeded then to consider the thoroughly practical and reasonable reductions then recommended by that committee. So there is no question, I hope, between the Senator from Maryland and myself respecting our very real dedication to the pursuit of economy. I acknowledge his dedication and I proclaim my own. I am sure he will pursue it with perfect good faith, and I know I shall make every such attempt. It is not a test of a man's attitude respecting economy to consider every single motion that is made as the beginning and end of a sympathetic attitude respecting reductions. I decline to support false economies. I decline to support unfair limitations. But I join whole-heartedly with my able friend from Maryland in the larger view. We must make real reductions. We must perform major operations. I am ready for these realities.

I conclude, Mr. President, by saying again that much as this amendment is improved by the supplement that has been added to it, it seems to me that the reduction proposed is all out of line respecting the air mail share of the total reduction which we are seeking to make in the expenditures of the Government.

Mr. BLACK. Mr. President, I do not desire longer to delay a vote on this amendment. I wish, however, to call attention to the fact that, so far as I have observed, one of the greatest arguments that has been made recently for governmental economy was contained in a bulletin issued by the National City Bank of New York. The suggestion was made in that bulletin that the Budget must be balanced; the suggestion was made that the Congress must reduce governmental expenditures, and insistence has been made by this bank that we must liquidate wages.

There will come before us various proposals for reducing Government expenditures. One of them, I understand, is to reduce the appropriation for the Federal Trade Commission. Doubtless, that would come within the list of governmental expenditures the reduction of which would meet with the approval of the National City Bank. It has been called to the attention of the Senate that the same National City Bank that is so insistently urging upon Congress a reduction of governmental expenditures is a beneficiary from the very subsidy which the Senator from Tennessee is seeking to reduce. What better advice and counsel could we have in voting upon a reduction of governmental expenditures than to accept the argument presented by the National City Bank that Government expenditures must be reduced, particularly in view of the fact that directors of the National City Bank are also directors of the companies that are the beneficiaries of this subsidy?

Mr. President, I desired to say these few words because I am not voting for this amendment wholly and completely upon the grounds asserted by some Senators who have spoken in favor of it.

I do not believe that it is incumbent upon us to vote for every reduction that is offered to an appropriation bill, but if there are to be any reductions, I ask where should we begin? Should we begin those reductions on the salaries of Government employees? There are those who are here impatiently waiting, I understand, for the opportunity to vote for a reduction of veterans' benefits. Are the veterans any less entitled to benefits than the National City Bank? Are the veterans any less entitled to benefits than the J. P. Morgan banking house of New York? It has recently come out before the committee investigating interlocking directorates that in granting these subsidies, both to the mail contractors and to the shipping interests, we are voting subsidies to the house of Morgan and to the National City Bank and to the Chase National Bank.

I do not criticize those Senators who believe that it is appropriate and right to vote subsidies to Mr. Morgan or to vote subsidies to the National City Bank, but I do say that it would seem a strange and unusual position to assume that it is justifiable to vote subsidies to the house of Morgan and to the National City Bank and to the Chase National Bank, and then stand upon this floor and wait for the time to put the hatchet on the heads of the veterans and on the heads of the employees who are working for the Government. So, Mr. President, let it be clearly understood that in voting for this reduction we are voting for a reduction in a subsidy.

In so far as I am concerned, the only objection I have to the amendment is that it does not completely wipe out the subsidy. The only objection I have to the proposals that are to be made with reference to subsidies to the shipping interests is that they will not completely wipe out the subsidies. It is my judgment that the history of this Nation shows, from the very first subsidy which was granted to the shipping interests, that it is wholly and completely impossible to vote Government taxpayers' money into the pockets of a private enterprise as a subsidy without bringing down upon ourselves the evils of political corruption and overpayment to those who least need the overpayment for their services.

Some say that the adoption of the amendment would jeopardize and cripple the mail contracts and the aviation mail service. Suppose it should; let us assume that that statement is true; yet, as pointed out by the Senator from Maryland, the Government is running at a tremendous loss every day. We hear it frequently said by the same exponents of the subsidy idea, those who are the chief beneficiaries, the same banking interests in New York with their ramifications extending into every business enterprise of this Nation, that we should liquidate individually and collectively and do away with luxuries. If it be true that the air mail service would be eliminated, as has been suggested and as I do not believe, which would be the more important, to follow the gospel announced by the National City Bank in the bulletin which I have of liquidating wages in this country—and liquidation, by the way means finished, dead—or whether we should continue to vote subsidies from the taxpayers' money for the benefit of whom? For the benefit of those who are operating the services. Do not be deceived; the great interests that are behind the idea of subsidies are not backing them for the interest of the common man. They are backing them because from the beginning of the history of such subsidies in this country they have been utilized for the advantage not of those whom they claim they want it to benefit, but for the advantage of those who draw the profits that come from the pockets of the millions of people who contribute their nickels and dimes in taxes.

So, Mr. President, I place my opposition to this subsidy upon the straight, simple proposition that it is contrary to good business judgment, particularly in times of economic distress, to tax all the people for the benefit of those who need it the least.

What interest do we serve by voting the money of taxpayers of Maine, California, Alabama, Montana, and New York to sustain an enterprise which, if it is worth sustaining, can be sustained by the National City Bank and the Chase National Bank with their control upon the credit and the money of this country. They are the directors; they are the controlling factors in these institutions that we hear it said will topple and fall if we do not exact more hard-earned nickels and dimes out of the pockets of the people of this country in order to sustain these business enterprises operated by the large banking interests of this Nation.

Mr. BROOKHART. Mr. President——

The VICE PRESIDENT. Does the Senator from Alabama yield to the Senator from Iowa?

Mr. BLACK. I yield to the Senator.

Mr. BROOKHART. I should like to ask the Senator what is the attitude of the railroads and the telegraph companies, the Morgan-controlled crowd, toward this amendment.

Mr. BLACK. I do not know what their attitude is. I know that the evidence shows that the same interests control the railroads; and, in so far as I am concerned, I am not speaking merely against this subsidy. I am just as much opposed to giving a subsidy to the railroads controlled by the Morgan and banking interests as I am to giving a subsidy to the airplane companies. I was just as much opposed to the subsidy provided in the Reconstruction Finance Corporation act as I am to this subsidy. I found, I believe, only eight Members who would vote that way in the Senate; but there were eight, as I recall, who voted against that subsidy. It also went to the same place, as has been shown by the activities. It went right back to the very interests that they said needed bolstering up—the Morgan interests and the banking interests that controlled them. In so far as I am concerned, Mr. President, if we are going to have governmental economy, let us begin by cutting the appropriations away from those who are best able to stand the loss.

Who are they? If it be true that the National City Bank and the Chase National Bank and the Morgan interests are more in need of that money which comes from the taxpayers of this Nation than are any other people, then this subsidy should be sustained; but, in so far as I am concerned, the only regret I have is that the Senator from Tennessee [Mr. McKELLAR] has not seen fit to strike all of this subsidy from the bill, as well as all of the subsidies for the shipping interests which are contained in the various subsidy measures here.

I desire to call attention to one fact, and then I am through, Mr. President.

The evidence shows that the same people who will get the air mail subsidy get the railroad subsidy; that the same people who will get the air mail subsidy get the shipping subsidy; and so it goes. As we walk along singing about economy and talking about balancing the Budget we merrily vote millions of the people's money for the purpose of subsidizing whom? The Morgan interests, the National City Bank, and the Chase National Bank, that control the institutions for which some have expressed such great solicitude on this floor!

Mr. METCALF. Mr. President, while I am in favor of just as much economy as any department of the Government can stand, I feel that we are going a little too far at this time in changing this amount from $19,000,000 to $9,500,000. Therefore I move to amend those figures by inserting "$16,000,000" instead of "$9,500,000."

The VICE PRESIDENT. The Senator from Rhode Island proposes an amendment to the amendment of the Senator from Tennessee, which will be stated.

The LEGISLATIVE CLERK. The Senator from Rhode Island proposes to amend the amendment of the Senator from Tennessee by striking out the numerals "$9,500,000" and inserting "$16,000,000," so that the amendment will read:

On page 58, line 2, strike out "$19,000,000" and insert "$16,000,000": *Provided*, That when the net receipts from domestic air mail exceeds the sum of $16,000,000, then an additional amount equal to such excess receipts is hereby appropriated, to be used for such air mail transportation.

Mr. WALSH of Massachusetts. Mr. President, may I ask the Senator from Rhode Island if his amendment is equivalent to reducing the amount of the appropriation for this purpose 25 per cent instead of 50 per cent?

Mr. METCALF. It is not quite 25 per cent.

Mr. WALSH of Massachusetts. It approximates 25 per cent of the amount of the subsidy, but is much less per cent of the amount of the appropriation.

Mr. METCALF. It is something like 21 to 22 per cent.

Mr. WALSH of Massachusetts. About 15 per cent, I am informed, of the appropriation.

Mr. BARKLEY. Mr. President, I will say to the Senator from Massachusetts that I had contemplated offering an amendment to the amendment of the Senator from Tennessee making a reduction of exactly 25 per cent, which would make the amount $14,250,000 instead of $16,000,000, as carried in the amendment of the Senator from Rhode Island. That would be the exact figure represented by a 25 per cent reduction.

Mr. WALSH of Massachusetts. I was hopeful that some less extreme amendment reducing the amount of the appropriation might be offered.

Mr. BARKLEY. Of course, that amendment would not be in order until the amendment of the Senator from Rhode Island is disposed of.

Mr. VANDENBERG. Mr. President, will the Senator yield for a question?

The VICE PRESIDENT. Does the Senator from Kentucky yield to the Senator from Michigan?

Mr. BARKLEY. Yes.

Mr. VANDENBERG. The amendment offered by the Senator from Rhode Island does reduce by 25 per cent that portion of the appropriation which gives a subsidy and which is not reimbursed by the receipts from the service.

Mr. BARKLEY. Of course, it does not reduce by 25 per cent the $19,000,000 carried in the bill. I do not know what part of that is a subsidy and what part is not.

Mr. VANDENBERG. Eight million dollars comes back in postage. Therefore, the subsidy is $11,000,000.

Mr. BARKLEY. That is one of the things I rose to inquire about; and I should like to have the attention of the Senator from Tennessee [Mr. McKELLAR].

This appropriation which the Senator seeks to reduce to $9,500,000 from $19,000,000 is, of course, money appropriated out of the Treasury for the purpose of compensating airplanes for carrying the mail of the United States. How much of that is returned to the Treasury in postal receipts derived from air mail?

Mr. McKELLAR. Mr. President, I have just been looking for that amount in the hearings. My recollection is that it is $6,000,000, but another member of the committee stated that it was $8,000,000. I do not know which of those figures is correct.

Mr. BINGHAM. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Kentucky yield to the Senator from Connecticut?

Mr. BARKLEY. I do.

Mr. BINGHAM. I asked the Postmaster General this morning what the receipts would amount to this year, and he said about $9,000,000.

Mr. BARKLEY. That is for the fiscal year 1933 ending next June.

Mr. BINGHAM. He said that with the increased service the amount would be considerably greater than that in the next fiscal year.

Mr. McKELLAR. Mr. President, if the Senator from Kentucky, having asked me a question, will allow me to answer it just a little further, I should like to say that my recollection is that the agent of the Ludington Line stated that they would be happy to carry the mail and could make money on a contract to carry it for just one-half of what the Postmaster General is now paying out under these various contracts. He pays 45 cents a mile. The rate used to be 67 cents per mile. In other words, the bigger the appropriations the more contracts are made and the less the payment per mile is reduced; but the rate now is 45 cents a mile. Here is a splendid line that would be perfectly willing to carry the mails at one-half of what is now being paid. For that reason the 50 per cent proposal ought to carry.

Mr. BINGHAM. But, Mr. President, that is only between two cities.

Mr. BARKLEY. Mr. President, of course, I have not read the hearings, and I do not know what any of these airplane lines would be willing to do if they had to do it. The Ludington Line runs only between Washington and New York. I see in the papers that it is about to be taken over by another airplane line for $250,000. I do not know whether that is authentic or not, but the papers yesterday and this morning indicated that they were negotiating.

That, however, is neither here nor there. Of course, it is difficult to draw a straight line in a matter of this sort and

say that any particular amount is absolutely necessary as a subsidy or subvention or contribution on the part of the Federal Government toward any new enterprise or transportation facility engaged in carrying the mail. To undertake to do that would require that we say something about what mail ought to be carried by airplane and what ought not, and that is not my function or the function of the Senate.

I have gotten a lot of letters by air mail that would have been just as well if they had not been mailed at all, and I have sent some of the same kind. There was no special reason why they should go by air mail except that I wanted to enjoy the experience of sending one by air mail to somebody who would get it a little quicker than he would by train; but, so far as the absolute necessity for getting it a day sooner was concerned, it did not exist. So it is difficult to draw a line and say where the air mail is indispensable or essential and where it is not.

I agree with the suggestion that the 50 per cent reduction, if there has been any virtue at all in this thing, is rather drastic. I might be willing to vote for a 50 per cent reduction if I were convinced that it ought to be made, but I am frank to say that I have not been so convinced. I am willing, however, to go to the extent of 25 per cent, and I had intended to offer an amendment making this appropriation $14,250,000 instead of $19,000,000 had the Senator from Rhode Island [Mr. METCALF] not offered his $16,000,000 amendment. If his amendment is defeated, I shall still offer the amendment providing for a 25 per cent reduction instead of a 50 per cent reduction.

Mr. LONG and Mr. BINGHAM addressed the Chair.

The VICE PRESIDENT. Does the Senator from Kentucky yield; and if so, to whom?

Mr. BARKLEY. I yield first to the Senator from Louisiana.

Mr. LONG. Mr. President, I was just thinking that there is a difference of only a million dollars or so. Cutting off $3,000,000 is quite a little bit. We have practically no record here, of course, of what they can make out with. Does the Senator think that we could compromise on the $16,000,000? There is not a great deal of controversy over it. Let us cut the amount $3,000,000.

Mr. KING. Mr. President, some of us are not willing to compromise on that amount.

Mr. BARKLEY. I do not know, Mr. President. I like to go by quarters. I should like to make the reduction 25 per cent, or some even percentage like that, rather than 16⅔ per cent, or 21 and a fraction.

Mr. LONG. Two bits—four bits.

Mr. BARKLEY. If there is any virtue in cutting it at all, a cut of $3,000,000, of course, is better than none.

Mr. GLASS. Mr. President——

The VICE PRESIDENT. Does the Senator from Kentucky yield to the Senator from Virginia?

Mr. BARKLEY. I do.

Mr. GLASS. I should like to propose a compromise to strike it out altogether, and save the taxpayers that much money.

Mr. BINGHAM. Mr. President——

The VICE PRESIDENT. Does the Senator from Kentucky yield to the Senator from Connecticut?

Mr. BARKLEY. I yield to the Senator.

Mr. BINGHAM. May I suggest to the Senator that in view of the fact that the Postmaster General told us this morning that the receipts were about $9,000,000, there is a subsidy of only $10,000,000 here. Therefore, the proposal of the Senator from Rhode Island to cut $3,000,000 from the amount in the bill is virtually a cut of the subsidy of 33⅓ per cent. It is more than a cut of 25 per cent.

Mr. BARKLEY. Of course, I suppose the Postmaster General is speculating somewhat in the statement that the receipts for the present fiscal year will be $9,000,000. They have not been that so far in any fiscal year. They were not that for last year; and unless it is contemplated—as I suppose it ought to be—that under the régime that is coming in soon, business will pick up, and there will be more money to spend for mail pay and otherwise, probably we need not go too far in accepting the speculative figure of $9,000,000 as the income for the present year. So I do not think it is material whether it is eight or nine million, and we might as well accept the lower figure.

I shall feel inclined to vote for the amendment of the Senator from Rhode Island. If it is defeated, then I shall offer my amendment to make a flat reduction of 25 per cent.

Mr. GLASS. The Senator from Kentucky, I think, has voiced a fear about this whole program that is quite common in the Senate. We do not know precisely what we are doing under either amendment. I am wondering whether the Senator from Kentucky would not concur in some opinion that has been voiced here in the Chamber, to the effect that the Senate would do much better if it would strike out the paragraph providing for air mail altogether at this time and let the matter ride until we deal with it in a deficiency bill some time before the 1st of July.

Mr. BARKLEY. The trouble is that if we strike it out, it may not ride. That is one of the contentions, that we have to have this appropriation, at least to some extent.

I appreciate the fact that it may be a dangerous venture for the Government to undertake to supplement by public appropriations the ordinary receipts of the functions of the Government. We are doing it in connection with the carriage of the mail by steamships. We are giving the companies operating the ships what we call a subvention because that sounds better than "subsidy," but it is the same thing. We are subsidizing all sorts of mail service, not only that carried by water and air and rail, but we are also subsidizing that carried by horse and by automobile.

If we are to cut out all of the subsidies we are giving to people who carry the mail, and, indirectly, to people who receive mail, then we could probably reduce the appropriation for postal services altogether about one-half. But we are not going to do that, and I do not know that we ought to do it. I am not recommending that we do it. If we could be absolutely sure that, by eliminating all these subsidies, by eliminating all appropriations over and above the receipts of the Post Office Department, and require that department to be self-sustaining in all its branches, it might be a good thing, after all, to do it; assuming that for a year or two there would be considerable objection on the part of the patrons of the Post Office, the receivers of mail, to any such program.

In the light of the information I have, or the lack of information, I do not feel justified in voting to eliminate this appropriation altogether. That is my answer to the Senator's suggestion.

Mr. ODDIE. Mr. President, I hope the amendment offered by the Senator from Rhode Island will not be agreed to. I am sure that it would deal a blow to the air mail service which would be most serious.

I mentioned the fact the other day that a cut in this appropriation might mean a reduction of pay of the air mail pilots, and I believe that would be wrong. I have had some experience in day and night flying, and I know what those men have to contend with. They are obliged to fly day and night in all kinds of weather. I repeat what I said here several days ago, that they are a splendid and brave lot of men. They are a vital part of this great industry, and cutting this appropriation would injure them. It would also do an injury to aviation which could not be undone for a long time to come.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. ODDIE. I yield.

Mr. BARKLEY. I realize the importance of efficient, competent, experienced, skilled, nervy pilots of airplanes, whether they are in the mail service or any other service, and I would be the last man in the world who would want to cripple their efficiency, or show any lack of appreciation for their spirit, by a reduction in their pay. They are not publicly employed, as I understand; they are employed by the air lines which have these contracts. Is that true?

Mr. ODDIE. That is true.

Mr. BARKLEY. Does the Senator know how many of them there are?

Mr. ODDIE. I can not state the exact number of pilots. I gave some figures a few minutes ago which showed roughly the number of men employed in the aviation industry. Those figures showed that there are 30,000 persons employed, that about 6,500 are engaged in air transportation. I can not tell just how many of those are pilots.

Mr. BARKLEY. Of course that figure includes all those who work around the hangars, the entire force.

Mr. ODDIE. There are necessarily many men employed in and about the hangars.

Mr. BARKLEY. I suppose there are not over a hundred men actually engaged in flying the planes which carry the mail.

Mr. ODDIE. Oh, there must be far more than that.

Mr. BARKLEY. Of course I am only guessing.

Mr. ODDIE. It is a great and growing industry.

Mr. REED. Mr. President, will the Senator from Nevada yield for a question?

Mr. ODDIE. Certainly.

Mr. REED. I am perplexed at the Senator's position in opposing the amendment offered by the Senator from Rhode Island. If that amendment is beaten, the alternative then will be between an appropriation of $9,000,000 and one of about $3,000,000, while if the amendment prevails, the alternatives for the Senate to choose from will be between $16,000,000 and $19,000,000. Why does not the Senator take the risk, so to speak, by accepting the amendment of the Senator from Rhode Island? It could not hurt his bill, and it might save $6,000,000.

Mr. ODDIE. Mr. President, I can not accept it because I think it is wrong and unwise. I feel that we must reject both these amendments if we are to retain our air mail service. I know that these companies which are carrying mail and passengers day and night are spending millions of dollars in buying new equipment and new planes. They are spending large sums of money in experimenting in safety devices and improvements, and if we make this cut, it will be wrong. I believe that the amendment of the Senator from Rhode Island should be rejected, and the amendment of the Senator from Tennessee should then be rejected. I am perfectly frank about it. I think we should face this issue squarely.

The VICE PRESIDENT. The time of the Senator has expired.

Mr. NYE. Mr. President, I desire to speak only briefly upon the pending amendment. The fact that I find myself compelled to oppose the amendment offered by the Senator from Tennessee is a matter of regret to me, because I realize only too well how much foundation there is for the belief that there is much room for economy in the matter of these air mail contracts. I should like to go with the Senator in his amendment, and might do so if we had access to more definite information as to just what the result of the amendment would be. I might go the entire route with him.

I fear, however, that instead of effecting an economy, we might, instead, under the Senator's amendment, be only crippling this institution, and, through that crippling, find ourselves wasting the nine and a half million dollars provided for air mail service.

If I could have my way at this time, I should ask that the entire appropriation for air mail be dropped from the bill, and that we seek to provide for the future, starting with July 1 next, through a deficiency bill, such as we will have between now and that time. In the meantime, I should like to see the new administrators of the Post Office Department devote themselves to a study of what economies could be effected. I should like to see them go a step farther, and ascertain just how large the monopoly is which these subsidies seem to have encouraged.

Mr. McKELLAR. Mr. President, I am just wondering whether the Senator is for economy "just around the corner."

Mr. NYE. No; I am for economy in the fiscal year starting July 1 next, the same sort of economy the Senator is appealing for in connection with the Post Office-Treasury appropriation bill, and I believe we could effect economies if we afforded the new administration an opportunity to furnish to the Congress the details as to just what economies could be effected. Or, to take it another way, let the Congress know just what would be the result to the air mail service if such an amendment as that offered by the Senator from Tennessee were to prevail.

The question might be asked why we are not ready now to resubmit this question to the committee and ask them to invite information from the present administrators of the Post Office Department. I do not feel that there is any hope of any real worth-while information from that source. I can not feel other than that the Postmaster General has lent his hand to the building of a gigantic monopoly, utilizing Federal funds in the form of this subsidy to encourage that monopoly, much to the detriment of the service which does accrue through air mail.

To-day's Washington Daily News contains a story by their writer on aviation, Mr. Bob Ball, which I think ought to be made a part of the RECORD, revealing, as it does, how this monopoly has grown and grown, until now, under contracts which are pending, when they are granted, we will find the air mail subsidies going to the advantage and to the benefit of two or three holding companies in the United States.

For the reasons I have stated I am going to have to vote against the amendment offered by the Senator from Tennessee, but when this matter shall have been disposed of, no matter what the outcome may be, it is my intention to move that the entire item as it relates to air mail contracts, the entire item of $19,000,000, be dropped from the bill, and then we can hope to deal with it in a deficiency bill some time before the 1st of July next, at which date this bill, if enacted, will become effective.

Mr. KING. Mr. President, I regret that the Senator from North Dakota, in his concluding sentence, indicated a purpose to vote against the amendment offered by the Senator from Tennessee. As I understood him, however, he is opposed to the provision appropriating $19,000,000 for air mail contracts. I associate myself with him in his proposition that the entire appropriation be eliminated from the bill in order that the next administration may have an opportunity to examine this question and work out a plan just and proper under which airplane mail-carrying contracts may be entered into, or at least that contracts now existing and which should be modified or changed should be so adjusted as to do justice to all parties interested and at the same time protect the taxpayers of the United States. Undoubtedly a comprehensive plan dealing with air mail contracts will be adopted under the next administration.

It is obvious from the discussion which has taken place that no satisfactory plan has been evolved and that no sound and suitable policy has been adopted by the Post Office Department in providing for the carrying of mail by airplanes. Facts which were developed at the hearing—and I submit that all the facts were not presented—demonstrate, in my opinion, that improvident contracts have been let; that duplication of air mail routes has been permitted; and that the interests of the taxpayers have not received proper consideration. I can not help but believe from the facts developed at the hearings, and from the information which has been brought to my attention, that there has been too much solicitude for the manufacturers of airplanes, and for operating airplane companies, and that this solicitude has led to unwarranted subsidies and has been promotive of monopolies.

I think the facts fully justify the conclusion that a very few large corporations in which important financial interests have been concerned have largely dominated the air mail situation. It is also, I think, established that the subsidies granted have not been justified and that with respect to some of the corporations inordinate profits have been realized. I agree substantially with what the Senator from

North Dakota has said respecting the policies pursued by the Post Office Department in giving air mail contracts. He has indicated that there is a monopolistic control over many of the important air mail routes in the United States, and that under the present policy of the department this monopolistic control will become more formidable and oppressive. Certainly there is no reason justifying the large subsidies which have been paid air mail contractors, and there is less justification for continuing these large subsidies. That is particularly true at the present time, when the appropriations of the Government greatly exceed the revenues, and the deficits which result will inevitably impair the credit of the National Government. The constant asservations of Senators that they are for economy, that they desire to introduce reforms in the administration of the Government and bring the operating expenses of the Government within the revenue, are negatived by appropriation bills which are reported and by the repeated votes in favor of these large appropriations which result in increased deficits.

It is important that we square our avowals for economy with our votes. Apparently it is easy to promise reforms and reductions in appropriations, but it is difficult, and it seems impossible, to redeem the promises made and live up to the avowals which so glibly are made. States and political subdivisions are reducing appropriations. Many of the people are demanding that Federal appropriations be reduced. I should add, however, that from many quarters of the United States requests are made for increased appropriations. It is manifest that the constant invasion by the Federal Government of the functions of the States and local communities has whetted the appetites of many of the people to demand continued appropriations by the Federal Government. One transgression leads to other transgressions. When the Federal Government intrudes into the circle which should be occupied by the States and their political subdivisions, it is difficult to retrace its steps and to return to the path of safety and constitutional government.

It must be obvious to all of the people that the Federal Government must adopt policies of retrenchment; that it must reduce its expenditures or it will soon, like many improvident individuals, end in a court of bankruptcy. Governments may become bankrupt as corporations and individuals, by unwise and profligate expenditures, are precipitated into that abyss. It is a dangerous thing to impair the credit of a government. It would be a catastrophe for this Republic to have its credit impaired, but there seems to be a lack of appreciation of the functions of government or the limitations imposed upon it, and of the fate which awaits it if it transgresses fundamental principles and pursues a spendthrift course like those who are indifferent to the consequences of injudicious and foolish acts. This Republic has no promise of immortality.

It may adopt policies that will result in serious consequences if not national ruin. More than $5,000,000,000 of deficits have resulted from extravagance and folly during the past two or three years. Deficits will continue if there shall not be an immediate halt in the reckless spending and in the waste and extravagance characterizing the national administration.

Many persons like the easiest way, and the easiest way upon the part of Congress seems to be to accede to the demands for Federal appropriations, many of which are not justified. It is obvious that the credit of the Government will not forever be maintained against the demands made for Federal appropriations. The greater part of the revenue which sustains the Government is derived from corporate and individual profits. In these dark hours corporate profits are vanishing and individual incomes are shrinking. The revenues derived from customs duties are less than half of the aggregate derived a few years ago. As State and municipal revenues are being materially reduced, so also Federal revenues are subjected to most serious reductions. But these reductions do not compel, as they should, an increasing diminution in Federal appropriations. When it is suggested that the Budget be balanced, there are many cynical observations and derisive comments. In my opinion, those charged with the responsibility of carrying on the Government must immediately inaugurate reforms. Bureaus must be abolished, consolidations in executive instrumentalities must be effected, tax burdens must be diminished, and appropriations drastically cut.

Of course, there will be protests, but I insist that Congress can not continue a policy which will inevitably increase the economic disorder and aggravate the industrial situation. Congress should let it be known that the Government is not an unfailing fountain and that it can not yield to every demand made for subsidies, bounties, gratuities, and appropriations. It is conceded that the greater part of the nineteen millions involved in the item under consideration is a subsidy, but it is contended by some that subsidies are warranted and that this particular subsidy is vitally important to the Republic.

Mr. President, that most subsidies are pernicious, that they are an evil which ultimately invades the entire body politic, is well known. If subsidies are granted to one industry or activity, demands are made that subsidies shall be granted to other activities or industries. One vice develops another and one transgression not infrequently breaks down the ethical and moral and constitutional wall, resulting in other vices. In times of exigencies policies may be defended which in peace times call for condemnation. We have, however, by unjust tariff policies, subsidized various industries and the result is that demands are made for further subsidies, gratuities, and legislation special in character. It were well if we could return to sound, safe, constitutional, democratic policies, and declare that there shall be equal rights to all and special privileges to none.

Mr. President, I affirm that there is no justification for this large subsidy. The Senator from Nevada has appealed for it upon the ground that a number of pilots are employed and that they need protection. We all appreciate the courage, the intrepidity of the American pilots, but there would be pilots without subsidies, and the American pilots are not asking subsidies; it is corporations, many of which are fly-by-night organizations, that are demanding subsidies. It is corporations that have small capital but vast amounts of water in their stock that are demanding large subsidies.

Mr. President, it is known that many corporations were formed a few years ago with but limited capital but with stock and bond issues for the purpose of buying or operating airplanes. Some of these corporations had no justification for their existence. They were speculative ventures. They responded to the gambling, speculative mania that possessed the American people. During the years from 1924 to 1929 billions of dollars of stocks and bonds were issued, not resting upon solid foundations. They were unloaded upon the people, and billions of dollars were lost by those who were induced to buy these speculative and, too often, worthless securities. Some of these airplane organizations on the eve of bankruptcy undoubtedly sought appropriations from the Federal Treasury to replete their exhausted treasuries and to save them from complete bankruptcy. Some of the corporations, in addition to issuing stocks and bonds far beyond what would be fair and just, paid enormous salaries to lawyers and directors and officials, some of whom rendered but little if any service. It has been brought to my attention that persons have left the Government service and accepted employment at the hands of some of these organizations at salaries far beyond what would have been a fair and just compensation.

The airplane industry is an important one. It will continue to grow as all other essential activities will grow, but the airplane industry can not expect to be a hothouse plant; it must rest upon safe and sound principles, not upon subsidies. It must have real capital, not ornamental stock issues. It must be governed by rational and sound business principles and not by stimulants and hot air.

Mr. President, I have before me a map of airplane routes in the United States. They gridiron the country; they parallel each other. They demonstrate that many of these

routes are unnecessary and should be abandoned. Certainly the taxpayers of the United States should not be called upon to carry the burden of some of these ill-advised and unnecessary airplane experiments. Most of these routes are subsidized by the Government. In my opinion, the Post Office Department has been unjust to the American taxpayers in entering into many of the contracts under which these routes are maintained. My information is that improvident contracts have been entered into, and unnecessary routes have been established, and that the Post Office Department intends to enter into other contracts and to parallel some existing lines and to contract for extensions in order that the full subsidy provided in the last appropriation bill shall be absorbed and, perhaps, constitute a basis for large subsidies to be voted by Congress in the future.

I submit, Mr. President, that we are justified in the conclusion that some of these contracts were not in the interest of the public but were in the interest of airplane corporations, some of which are monopolistic and others of which have no justification for existence, and can only survive by liberal doses of financial aid obtained from the Treasury of the United States.

Mr. President, millions of dollars have been appropriated and expended by the Army and Navy for the building and operation of airplanes. No one denies the importance of airplanes in peace and in war. Congress has been liberal—perhaps too liberal—in the subsidies granted to what might be denominated commercial aeronautics. I believe that existing contracts should be investigated; that some of the so-called airplane routes should be abandoned; that monopolistic control of routes should be prevented; and that the subsidies granted by the Federal Government should be reduced and finally terminated. I am willing to support a measure that will deal with this question in a fair and just manner, and shall support the amendment offered by the Senator from Tennessee. If it fails I shall support a motion to strike out the entire paragraph carrying $19,000,000 appropriation, in order that the new administration may take this question up and, after a thorough and careful examination, recommend a plan for the carrying of the mail by airplanes that will be just and fair to the taxpayers of the United States and at the same time meet all legitimate demands from this industry to which the Government should respond.

Mr. FESS. Mr. President, I had not intended to make any statement until I heard the references of the Senator from Utah [Mr. KING] indicating a certain type of policy pursued by the present Postmaster General. I had a talk with the junior Senator from Utah the other day and tried to impress upon him that I thought he was laboring under a misapprehension when he was charging the Postmaster General with refusing to accept bids from competitors and in the interest of building up a monopoly.

The matter was called to my attention more than a year ago by one of the distinguished lawyers of the country who came to say that he thought the Postmaster General, in the administration of the office, was unfair to the public and to organizations which wanted to enter into the mail-carrying business. After I listened to his statement, I thought there might be something to it. I accompanied the man to the Postmaster General to present the matter to him myself. It was charged that he was establishing conditions that made it impossible for anyone except certain people or certain corporations to make application; that he was foreclosing all others, and that, therefore, that was equivalent to a Government monopoly. I found, however, Mr. President, that the person who was making the complaint was at the time organizing a company in order to get a contract with the Government to carry mail. The company had not yet been organized.

The Postmaster General in commenting upon laying down these conditions that were necessary to enter a contract, stated specifically that in the first place every corporation would have to establish its responsibility when it was entering into a contract with the Government on the one hand, and, secondly, that the Government had to have some assurance for the protection of the pilots who had to fly at night, in bad weather as well as good weather, and that the conditions which had been stipulated upon which a contract was to be made would not include an unorganized company and especially a company that had no guaranty for the protection of the men who were working for the companies rendering the service under the Government contracts. So far as I could ascertain, the assumption that there was any particular favor or discrimination in favor of a particular company was without foundation whatever.

I know that it is absolutely impossible for any public man to be free of criticism at any time and especially at this time. That is the one reason why I deplore the Government going into business, entering on any activity that might be conducted otherwise, because this body as well as the other body will always respond through some Member finding fault and making charges against an official who might be subject to political pressure. It is one of the vices in the Government operation of any business enterprise. I do not know any example that is more glaring than the constant charge against the Postmaster General with reference to what he is doing on the basis that he is favoring a monopoly or discriminating against this or that person or company.

Mr. President, I am making this statement because it was represented to me at one time that there were discriminations to such an extent that I went to see the Postmaster General in company with the man making the charge, and became convinced that the charge was wholly without any foundation.

Mr. BRATTON. Mr. President, before the vote is taken, I want to say a word on the general subject of economy.

Mr. McKELLAR. Mr. President, before the Senator proceeds will he yield to enable me to make one brief statement?

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Tennessee?

Mr. BRATTON. I yield.

Mr. McKELLAR. In order to find out exactly what the service produced last year in the way of revenue, I have taken it up with the Second Assistant Postmaster General, and he advises me that the sum for last year was $7,000,000. I thank the Senator from New Mexico.

Mr. BRATTON. Mr. President, adverting to the remarks just made by the senior Senator from Ohio [Mr. FESS], I too have heard the charge made often and repeated frequently during the last year or so that in the administration of the air mail service the Postmaster General had permitted monopolistic control. The charge did not come through anyone intending to form a company to carry mail or having any pecuniary interest in the subject. I am not discussing that charge now, except to say that the service has gravitated into the hands of a limited number of large companies.

Mr. President, the amendment of the Senator from Tennessee should be adopted. It does not involve the cancellation or revocation of a contract without warrant of law nor a breach of faith on the part of the Government. Each of the contracts contains a provision authorizing its cancellation or termination. This can be done without violating any obligation on the part of the Government.

We are confronted again with the assertion that to economize here would disrupt an indispensable service, something without which we can not get along. That argument is made at every attempt to economize, but unless we begin somewhere we will not economize at all. I think that $9,500,000 is enough for air mail subsidies under existing conditions. We may as well face the argument advanced by the Senator from Connecticut [Mr. BINGHAM] and the Senator from Nevada [Mr. ODDIE] having the bill in charge, because it will confront us every time an effort is made to reduce expenditures and lighten the burden upon the taxpayers of the country.

A large company traversing my own State will be affected, and that will confront every one of us at every step in the program. But let no Member of this body be dissuaded by a

consideration of that character. If we are going to economize, let us begin now. Let us adopt the amendment of the Senator from Tennessee. If necessary, we can curtail the air mail service during the next fiscal year. The time has arrived when we must do without some of the things we would like to have, some of the things we have enjoyed, some of the conveniences which have added to our pleasure, some of the things which have contributed to commercial intercourse; but those things must be dispensed with now. We can not afford them longer. The Government must do what an individual must do and what a family must do and what industry must do, and that is to dispense with the unnecessary things and confine disbursements and expenditures to those things which are essential and which are indispensable.

With this brief observation, merely outlining the considerations which govern me in casting my vote for the amendment, I surrender the floor.

Mr. FRAZIER. Mr. President, I appreciate the need for cutting down expenses wherever possible, but I do not like either of the amendments because they would in my estimation cripple the air mail service. I think if either is adopted, it would mean the cutting out of the newer air lines and probably leaving just the old ones. If the amendment is changed to strike out the total amount of the appropriation for air mail service, I shall vote for it, but I do not feel justified in voting for either of the amendments which would, in my opinion, cripple the air mail service. It would be a great deal better to dispense with it altogether.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from Tennessee.

Mr. McKELLAR. I demand the yeas and nays.

The yeas and nays were ordered.

Mr. McKELLAR. I suggest the absence of a quorum.

Mr. ODDIE. Mr. President, may I make a statement first?

The VICE PRESIDENT. The Senator from Nevada is not permitted to make a further statement. He has already spoken once on the amendment and that is all that is permitted under the unanimous-consent agreement. The absence of a quorum having been suggested, the clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names.

Ashurst	Cutting	Kean	Schuyler
Austin	Dale	Keyes	Sheppard
Bankhead	Davis	King	Shipstead
Barbour	Dickinson	La Follette	Shortridge
Barkley	Dill	Logan	Smith
Bingham	Fess	Long	Smoot
Black	Fletcher	McGill	Steiwer
Blaine	Frazier	McKellar	Swanson
Borah	George	McNary	Thomas, Okla.
Bratton	Glass	Metcalf	Townsend
Brookhart	Glenn	Moses	Trammell
Bulkley	Goldsborough	Neely	Tydings
Bulow	Gore	Norris	Vandenberg
Byrnes	Grammer	Nye	Wagner
Caraway	Hale	Oddie	Walcott
Carey	Harrison	Reed	Walsh, Mass.
Connally	Hastings	Reynolds	Walsh, Mont.
Coolidge	Hatfield	Robinson, Ark.	Watson
Copeland	Hayden	Robinson, Ind.	Wheeler
Costigan	Hebert	Russell	White
Couzens	Johnson	Schall	

The VICE PRESIDENT. Eighty-three Senators having answered to their names, a quorum is present. The question is on the amendment of the Senator from Rhode Island [Mr. METCALF] to the amendment of the Senator from Tennessee [Mr. McKELLAR]. The yeas and nays have been ordered.

Mr. BINGHAM. Mr. President, the Senator from Rhode Island [Mr. METCALF] has offered as an amendment to substitute $16,000,000 for $9,500,000 as proposed in the amendment offered by the Senator from Tennessee [Mr. McKELLAR]. Greatly as I regret to see the amount appropriated for commercial aviation reduced, I appreciate the arguments that have been advanced in favor of economy and the necessity for economy. Perhaps also it is true that there are quite a number of routes on which airplanes are now engaged in carrying the mail in States which I mentioned previously to-day that might well be abandoned because so little mail is carried over those routes.

Of course, Mr. President, no one is suggesting that we reduce the amount paid to the railroads for carrying magazines and newspapers, because we do not receive for transporting them an amount equivalent to the cost of carrying them. We perform that service at the expense of the people of the United States because we believe that it is a useful service for which they are willing to pay. For that reason, it seems to me that we ought to be willing to pay to those who carry the air mail more than the air mail earns.

At the present time the air mail is earning, through air mail postage, at the rate of about $9,000,000 a year. It is proposed by the amendment of the Senator from Rhode Island, which I hope will be adopted, to add to what is earned by air mail postage an amount equivalent to about $7,000,000. It seems to me, Mr. President, that, for the sake of keeping most of the air mail lines running, that is the least we could do. I, therefore, hope the amendment to the amendment will be adopted, because I am convinced, Mr. President, that if it shall not be adopted, and the amendment offered by the Senator from Tennessee shall prevail, there will be a very serious disruption of that service, equivalent to taking off many mail trains if we were to apply the same principle to carrying the mail by rail; and if we were to apply the same principle to rural free delivery, it would take virtually all the rural free delivery routes out of existence. So I hope the amendment offered by the Senator from Rhode Island, which virtually saves about 30 per cent of the amount of the subsidy, will be adopted.

Mr. ODDIE. Mr. President——

The VICE PRESIDENT. The Senator from Nevada has already spoken on the pending amendment.

Mr. ODDIE. I ask unanimous consent that I may make a further statement regarding the amendment.

The VICE PRESIDENT. Is there objection? The Chair hears none.

Mr. ODDIE. Mr. President, I have just discussed the question involved in the amendment of the Senator from Rhode Island, with numbers of Members on both sides of the Chamber about it; and while I disagree with it, I have decided that it is good policy for me, under the circumstances, to accept the amendment, which I do.

Mr. McKELLAR. Mr. President, I merely wish to say in a word that I hope the amendment of the Senator from Rhode Island, my good friend over there, will be voted down. Cutting off $3,000,000 does not mean economy; it constitutes only about 15 per cent of the total expenditure. I hope the amendment will be voted down and the amendment offered by myself will be adopted.

The VICE PRESIDENT. The yeas and nays have been ordered on the amendment.

Mr. LA FOLLETTE. Mr. President, I wish to make the statement that I shall object to any further requests made by Senators to extend the time for speeches under the unanimous-consent agreement. I did not wish to object to the Senator from Nevada [Mr. ODDIE], who is in charge of the bill, making a statement, but in order that my making objections in the future may not be regarded as a personal slight by any Senator who may ask that privilege, I wish to announce that hereafter I shall object to such requests.

The VICE PRESIDENT. The question is on the amendment of the Senator from Rhode Island [Mr. METCALF] to the amendment of the Senator from Tennessee [Mr. McKELLAR], on which the yeas and nays have been ordered. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. HEBERT (when his name was called). I inquire if the senior Senator from North Carolina [Mr. BAILEY] has voted?

The PRESIDENT pro tempore. That Senator has not voted.

Mr. HEBERT. I have a general pair with that Senator, and in his absence I withhold my vote. If permitted to vote, I should vote "yea."

Mr. KEYES (when his name was called). I have a pair with the Senator from Oklahoma [Mr. THOMAS]. In his

absence I withhold my vote. If permitted to vote, I should vote "yea."

Mr. ROBINSON of Indiana (when his name was called). I have a general pair with the senior Senator from Mississippi [Mr. STEPHENS], who is necessarily detained from the Senate. In his absence I withhold my vote.

The roll call was concluded.

Mr. WAGNER (after having voted in the affirmative). On this vote I am paired with the junior Senator from Missouri [Mr. PATTERSON], who is absent from Washington because of a death in his family. I therefore withdraw my vote.

Mr. BRATTON (after having voted in the negative). I have a general pair with the junior Senator from Nebraska [Mr. HOWELL], who is absent on account of official business. I transfer that pair to the senior Senator from Louisiana [Mr. BROUSSARD] and allow my vote to stand.

Mr. FESS. I wish to announce the following general pairs:

The Senator from Kansas [Mr. CAPPER] with the Senator from Wyoming [Mr. KENDRICK]; and

The Senator from South Dakota [Mr. NORBECK] with the Senator from Nevada [Mr. PITTMAN].

Mr. NORRIS. I desire to announce that my colleague [Mr. HOWELL] is absent from the Senate on official business.

Mr. SHEPPARD. I desire to announce that the Senator from Nevada [Mr. PITTMAN], the Senator from Wyoming [Mr. KENDRICK], the Senator from Missouri [Mr. HAWES], the Senator from Louisiana [Mr. BROUSSARD], the Senator from Illinois [Mr. LEWIS], and the Senator from Oklahoma [Mr. THOMAS] are necessarily detained on official business.

The result was announced—yeas 46, nays 33, as follows:

YEAS—46

Austin	Davis	McGill	Smoot
Barbour	Dickinson	McNary	Steiwer
Barkley	Fess	Metcalf	Thomas, Idaho
Bingham	Fletcher	Moses	Townsend
Brookhart	George	Oddie	Trammell
Bulkley	Goldsborough	Reed	Vandenberg
Caraway	Grammer	Reynolds	Walcott
Carey	Hale	Russell	Walsh, Mass.
Coolidge	Hastings	Schall	Watson
Copeland	Hatfield	Schuyler	White
Couzens	Kean	Shortridge	
Dale	Long	Smith	

NAYS—33

Ashurst	Costigan	Johnson	Sheppard
Bankhead	Cutting	King	Shipstead
Black	Dill	La Follette	Swanson
Blaine	Frazier	Logan	Tydings
Borah	Glass	McKellar	Walsh, Mont.
Bratton	Glenn	Neely	Wheeler
Bulow	Gore	Norris	
Byrnes	Harrison	Nye	
Connally	Hayden	Robinson, Ark.	

NOT VOTING—17

Bailey	Howell	Lewis	Robinson, Ind.
Broussard	Hull	Norbeck	Stephens
Capper	Kendrick	Patterson	Thomas, Okla.
Hawes	Keyes	Pittman	Wagner
Hebert			

So Mr. METCALF'S amendment to the amendment proposed by Mr. MCKELLAR was agreed to.

The PRESIDENT pro tempore. The question now recurs upon the amendment proposed by the Senator from Tennessee [Mr. MCKELLAR], as amended.

Mr. NORRIS. I call for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. BRATTON (when his name was called). Repeating the announcement of my pair and its transfer that I made on the previous roll call, I vote "yea."

Mr. HEBERT (when his name was called). Again announcing my pair with the senior Senator from North Carolina [Mr. BAILEY], I withhold my vote.

Mr. KEYES (when his name was called). Again announcing my pair with the Senator from Oklahoma [Mr. THOMAS], I withhold my vote. If at liberty to vote, I should vote "nay."

Mr. ROBINSON of Indiana (when his name was called). Making the same announcement as before with reference to my general pair with the junior Senator from Mississippi [Mr. STEPHENS], I withhold my vote.

Mr. WAGNER (when his name was called). I transfer my pair with the junior Senator from Missouri [Mr. PATTERSON] to the junior Senator from Tennessee [Mr. HULL] and will vote. I vote "yea."

The roll call was concluded.

Mr. FESS. I desire to announce the general pair of the Senator from Kansas [Mr. CAPPER] with the Senator from Wyoming [Mr. KENDRICK].

Mr. SHEPPARD. I desire to announce that the Senator from Nevada [Mr. PITTMAN], the Senator from Wyoming [Mr. KENDRICK], the Senator from Missouri [Mr. HAWES], the Senator from Louisiana [Mr. BROUSSARD], the Senator from Illinois [Mr. LEWIS], and the Senator from Oklahoma [Mr. THOMAS] are necessarily detained on official business.

Mr. NORRIS. I desire to announce that my colleague [Mr. HOWELL] is absent from the Senate on official business.

The result was announced—yeas 49, nays 31, as follows:

YEAS—49

Austin	Coolidge	Kean	Shipstead
Bankhead	Couzens	King	Smith
Barbour	Cutting	La Follette	Swanson
Barkley	Dale	Long	Trammell
Black	Davis	McGill	Tydings
Blaine	Dickinson	McKellar	Vandenberg
Borah	Dill	Metcalf	Wagner
Bratton	Fletcher	Neely	Walsh, Mass.
Brookhart	George	Norris	Walsh, Mont.
Bulkley	Glass	Robinson, Ark.	Wheeler
Bulow	Glenn	Russell	
Byrnes	Gore	Schall	
Caraway	Harrison	Sheppard	

NAYS—31

Ashurst	Grammer	Moses	Smoot
Bingham	Hale	Norbeck	Steiwer
Carey	Hastings	Nye	Thomas, Idaho
Copeland	Hatfield	Oddie	Townsend
Costigan	Hayden	Reed	Walcott
Fess	Johnson	Reynolds	Watson
Frazier	Logan	Schuyler	White

NOT VOTING—16

Bailey	Hawes	Kendrick	Pittman
Broussard	Hebert	Keyes	Robinson, Ind.
Capper	Howell	Lewis	Stephens
Connally	Hull	Patterson	Thomas, Okla.

So Mr. MCKELLAR'S amendment, as amended, was agreed to.

Mr. ROBINSON of Arkansas. Mr. President, I inquire whether it is in order to move to strike out the paragraph as amended commencing with line 21, on page 57, and ending with line 2, on page 58, of the bill. It is the amendment agreed to, as modified by the amendment of the Senator from Rhode Island.

The PRESIDENT pro tempore. That is in order.

Mr. ROBINSON of Arkansas. I move to strike out the paragraph commencing on line 21, page 57, down to the end of line 2 on page 58.

The PRESIDENT pro tempore. As it now stands with reference to the amendment proposed by the Senator from Tennessee, as modified by the amendment proposed by the Senator from Rhode Island.

Mr. ROBINSON of Arkansas. As amended, of course.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Arkansas [Mr. ROBINSON].

Mr. ASHURST. I will ask that the question be stated.

Mr. ROBINSON of Arkansas. Mr. President, I will state the motion, if I may have an opportunity of so doing. My motion would strike out the provision in the bill for a subsidy to air mail companies. It would leave no appropriation in the nature of a subsidy for that purpose.

It is my object to test the sense of the Senate on this proposition. We are talking here every day about reducing appropriations, but we do nothing that is worth while along that line. Here is an instance in which the service, according to one statement that is made, is earning $6,000,000 a year, and, according to another, promising to earn $9,000,000 the next year, and we are asked to appropriate $19,000,000 for a service which is at best very unprofitable.

I do not wish to cripple or destroy the air mail service but I believe it is in the nature of a luxury, and that it ought to be reorganized so as to pay for itself within a reasonable time; and if we can not terminate or reduce subsidies of this character, or take steps toward accomplishing that end, it is foolish for us to waste time here talking about economizing in the expenditures of the Government.

We talk and talk and talk and do little or nothing. If this appropriation is stricken out, if the matter is not worked out in conference, there will be ample time before the beginning of the next fiscal year to work out a policy on this subject which may be regarded as fair to the service and fair to the general public. It is almost hopeless to talk about reducing appropriations if we make reductions as have just been made in this item and conclude that we have performed our duty to the Government.

There is an enormous deficit in the revenue. We are talking about increasing taxes, we are talking about cutting down expenditures, but when we come to vote on the details of these measures we sustain the items of the appropriation.

There is not an appropriation in any of these appropriation bills that can not be justified from the standpoint of those who wish to expand and develop the activities of the Government. There is not an appropriation in any of the bills which will be substantially reduced if we proceed upon the theory on which we are now proceeding, and we may just as well abandon the theory of reducing Government costs.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield?

Mr. ROBINSON of Arkansas. I yield.

Mr. WALSH of Massachusetts. Is it the Senator's idea that the appropriation for the activity now under consideration should be left to the new administration?

Mr. ROBINSON of Arkansas. I feel that should be done unless a satisfactory conference agreement is reached, and I think there are a good many reasons for it that do not yet appear in the RECORD.

Mr. WALSH of Massachusetts. In other words, the Senator thinks that the new administration which will have the duty of balancing the Budget and will have to find revenue to meet the appropriations ought to have something to do with appropriations of this character?

Mr. ROBINSON of Arkansas. Oh, yes; if we make the appropriation now, the contracts will be made, and then we will be estopped from any attempt to reduce them, and next year we will have still further increases in the expenditures.

Mr. President, speaking now from the standpoint of one who wishes to do the right thing, let me ask, Why should we commit ourselves at this time to an enormous expenditure for subsidizing air mail when there will be an opportunity to work out the problem and reach a conclusion that will be fair and just before there will be any real necessity for making or carrying out the contracts or expending the money?

Mr. LONG. Mr. President, will the Senator yield?

Mr. ROBINSON of Arkansas. I yield.

Mr. LONG. Could not these other items also wait? The money proposed to be appropriated would not have to be used until July 1.

Mr. ROBINSON of Arkansas. Which other items?

Mr. LONG. I mean the other items in the pending bill. The pending question relates to the air mail contract. The Senator has stated that we will have plenty of time to make the appropriation for the air mail service. Could not the other items in the bill, the other appropriations, wait until July 1?

Mr. ROBINSON of Arkansas. I have to deal with the amendments as they are presented. I do not know what other items the Senator has in mind.

Mr. LONG. My understanding is that about 95 per cent or perhaps 100 per cent, of the items in the bill are appropriations to be made for the year beginning July 1.

Mr. ROBINSON of Arkansas. Mr. President, I can not concede the conclusion of the Senator from Louisiana. I do not wish to pursue a course which would in effect carry over the appropriation bill, but I am making the point that, as to this particular provision, there is no occasion for committing the Government now to this expenditure, at a time when there is such an enormous deficit in the revenue. I am entirely content to let the Senate express its judgment on the subject.

Mr. ODDIE. Mr. President, will the Senator yield to me?

Mr. ROBINSON of Arkansas. I yield.

Mr. ODDIE. Is not the Senator familiar with the fact that the Government has made actual contracts with the airplane companies for the carrying of the mail?

Mr. ROBINSON of Arkansas. We have been told, during the course of the discussion here, that the contracts are revocable on the part of either party, and that they are not enforceable on the part of either party.

Mr. ODDIE. Does the Senator think that even if a contract is revocable, one party to the contract which makes expenditures in the belief that the contract will be continued and carried out should be made to lose?

Mr. ROBINSON of Arkansas. That is the very point. The Senator is taking the position now that the present administration, by its course and policy, has bound the next administration to the expenditure during the fiscal year beginning July 1, 1933, of $19,000,000 for air mail service, when we are told all the while that thousands of people in the country are suffering for the necessities of life and that it is necessary for the Federal Government to make contributions to their necessities.

Mr. ODDIE. Mr. President, is it not a question of good faith to a large extent on the part of the Government to carry out its contracts, under which one party has expended large sums of money?

Mr. ROBINSON of Arkansas. Mr. President, if the contract expressly permits and provides for revocation, the object of inserting a provision of that sort is to prevent the Government from being bound to the execution of the contract. Of course, the question of the Senator from Nevada is primary, as I see it.

I shall insist on a vote on the amendment.

Mr. BINGHAM. Mr. President, I think the Senator from Arkansas was not in the Chamber this morning when I stated that all of the contracts made between the Government and the companies carrying the air mail which contain the clause to which he refers have been abrogated, voluntarily given up by both sides. They are not any longer in existence. The contract which the Senator from Tennessee read yesterday was given up six years ago.

Mr. McKELLAR. Mr. President——

Mr. BINGHAM. Just permit me to make the statement.

Mr. McKELLAR. If that is true, then the report of the Postmaster General is entirely misleading, to say the least about it, because these contracts are found in the book which the Postmaster General has sent to us, and he has testified they were the contracts with the Government.

Mr. BINGHAM. Those were the contracts. That is not misleading. Those contracts could be voluntarily given up by agreement between the two parties, and that has been done. No person carrying the air mail to-day is operating under one of those contracts. The contracts have been given up in exchange for a certificate provided for under the Watres Act. If the Senator from Arkansas will study those certificates which have been issued, he will find that they are to be canceled on a certain date, I think it is the 5th of April, 1936, and, under the statement given in the same book to which the Senator referred, on page 343, paragraph 16, the certificate reads:

> This certificate may be canceled by the Postmaster General at any time for willful neglect on the part of the holder to carry out any rules, regulations, or orders made for its guidance, notice of such intended cancellation to be given in writing by the Postmaster General and 45 days allowed the holder in which to show cause why the certificate should not be canceled.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield for a question?

Mr. BINGHAM. Certainly.

Mr. ROBINSON of Arkansas. Have air mail contracts for the fiscal year 1933–34 been entered into?

Mr. BINGHAM. There are no persons carrying air mail at present under contract.

Mr. ROBINSON of Arkansas. Very well. That is a complete answer to the suggestion of the Senator from Nevada.

Mr. BINGHAM. I do not think the Senator realizes the fact that in surrendering those contracts, persons carrying the air mail accepted certificates provided for in the Watres Act, and these certificates can not be canceled except for willful neglect on the part of the holders to carry out the provisions. The rates under which the companies operate under these certificates are changed from year to year. As I pointed out this morning, they have been reduced in the past three years by nearly 50 per cent. The average rate when the certificate first went into effect, in 1930, was 85 cents a mile, and that was reduced in April, 1931, to an average of 72 cents a mile, and in 1932, on January 1, to 62 cents a mile, and again reduced on November 1, 1932, to 45 cents a mile.

May I say to the Senator that it will be entirely within the option of the Postmaster General in the new administration to work out fair and equitable rates with the persons holding these certificates, but since these persons have all given up their contracts and accepted certificates, the clause to which the Senator refers is not subject to operation at this time.

Mr. ROBINSON of Arkansas, Mr. BORAH, and Mr. GLASS addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Connecticut yield; and if so, to whom?

Mr. BINGHAM. I yield first to the Senator from Arkansas.

Mr. ROBINSON of Arkansas. What is the certificate? Does it bind the Government indefinitely to the payment of these rates?

Mr. BORAH. That is the question I was going to ask.

Mr. GLASS. I wanted to ask, too, if the certificate issued by the Postmaster General could supersede a contract provided by law.

Mr. BINGHAM. The certificate to which I referred, which is set forth at page 343 of the hearings, was granted by the Postmaster General on the 22d of October, 1930, and was accepted upon the terms and conditions set forth by the National Air Transport, that being one of the certificates which is in the record. As I said, by arrangement with the Postmaster General, none of the certificates is to be continued any longer than the 5th of April, 1936. With that understanding these companies went to work, built hangars, purchased expensive planes, and went into the operation of the contracts. I use the word "contracts" not in its extensive legal sense, as referring to the original air mail contract, but as an agreement between the transport people and the Government.

Mr. ROBINSON of Arkansas. Then it developed, as I understand the Senator from Connecticut, that the present Postmaster General has entered into contracts for the carriage of air mail which do not expire until 1936, and it does not matter that they are called certificates. If it is not a contract, it is not enforceable.

Mr. BINGHAM. The Senator referred to the clause in the contract which he said made it possible to cancel the contract. That clause does not occur in the certificate which, in the nature of a contract, is now in existence.

Mr. ROBINSON of Arkansas. Why was the certificate arrangement substituted for the contract?

Mr. BINGHAM. After the passage of the Watres Act.

Mr. ROBINSON of Arkansas. That does not answer my question. Why does the Postmaster General substitute the certificates for something else that preceded them?

Mr. BINGHAM. The certificates are in existence. The point I was trying to make was that the remark of the Senator from Arkansas was to the effect that in the contract there is a clause which permits the contracts to be canceled, but which does not exist in the present situation in the arrangement between the carrier and the Government.

Mr. ROBINSON of Arkansas. In other words, the certificates are not revocable?

Mr. BINGHAM. The certificates are not revocable except, I repeat, for willful neglect on the part of the operator.

Mr. ROBINSON of Arkansas. What was the object of the Postmaster General in seeking to tie the Government up in what are essentially contracts until the year 1936? How did it happen that that very remarkable action was taken?

Mr. BINGHAM. It was to carry out the Watres Act passed by Congress.

Mr. ROBINSON of Arkansas. Did the Congress provide for or authorize the issuance of certificates by the Government effective for several years?

Mr. BINGHAM. Even longer than the Postmaster General provided. Under the Watres Act the certificates might have been granted for 10 years.

Mr. ROBINSON of Arkansas. The Senator says the certificates are issued in accordance with law?

Mr. BINGHAM. Yes; and under the Watres Act might have been given for 10 years, but actually they all expire the 5th of April, 1936.

Mr. ROBINSON of Arkansas. They had to be advertised; but no advertisement was made of them, I understand.

Mr. BINGHAM. The Senator makes a very extraordinary statement.

Mr. ROBINSON of Arkansas. If it is not correct, I wish to be corrected, but I do not care to have the Senator characterize my statement as an "extraordinary statement."

Mr. BINGHAM. In my opinion the terms of the Watres Act were carried out accurately by the Postmaster General, but that issue was not in the hearing and was not raised in the committee.

Mr. ROBINSON of Arkansas. I am raising it now. Does the statute permit the Postmaster General to issue these certificates without notice, without bids, without advertisement, and to make contracts with just any person with whom he chooses to enter into contract?

Mr. BINGHAM. The comptroller has ruled that the payments under the certificates are entirely within the law, and his opinion is worth so much more than mine that I refer the Senator from Arkansas to the opinion of the comptroller rather than to give him my own opinion. There is no question about the legality of the certificates.

Mr. GLASS. Mr. President, may I inquire if the comptroller has stated that it is incompetent for Congress to abrogate the certificates?

Mr. BINGHAM. Congress, of course, being supreme, can change the law and take away anyone's rights at any time.

Mr. GLASS. Oh, no!

Mr. ROBINSON of Arkansas. No, indeed.

Mr. BINGHAM. That is what the Senator is trying to do.

Mr. ROBINSON of Arkansas. No; I do not think so at all.

Mr. BINGHAM. These companies have set up expensive operations and acquired expensive planes on the theory that Congress meant what it said and that by giving up their contracts they would get certificates for a certain length of time. That they have done, and they have voluntarily agreed to lower the rates from year to year for the benefit of the Government. The mail to-day is being carried for one-half of what it was carried for several years ago.

Mr. ROBINSON of Arkansas. The fact remains that at a time when we are straining every nerve to balance the Budget, when we have an enormous deficit, we are actually paying out a tremendous bonus or subsidy for a service that is, in part at least, dispensable. The question is whether under the condition of the Treasury we wish to demonstrate our inability to meet our obligations as they are maturing and at the same time go on expanding those obligations. It would seem to me that it is about time we called a halt on that proceeding.

Mr. BINGHAM. Mr. President, I have only a few minutes left and the Senator from Arkansas is taking a good deal of my time. I merely want to refer to the fact that at another page of the bill we are providing $100,000,000 for railroad

mail service, and no one pretends that that service is self-supporting. In another place in the bill we are providing many millions of dollars for rural free delivery.

Mr. ROBINSON of Arkansas. But amendments may be made to reduce those appropriations. We have been very liberal in everything.

Mr. LONG. Mr. President, I move that the Senator from Connecticut be given 15 minutes more time.

Mr. McKELLAR and Mr. LA FOLLETTE. I object.

The PRESIDENT pro tempore. Objection is made.

Mr. BINGHAM. Mr. President, we have reduced the amount of the appropriation from $19,000,000 to $16,000,000, which seems to me a very reasonable reduction, although I am sorry to see it made. I hope the Senate will not strike out the entire $19,000,000 unless it is intended to strike out all appropriations for the Post Office Department and let the next administration decide whether they want to spend anything for carrying the mail or not.

The PRESIDENT pro tempore. The time of the Senator from Connecticut has expired.

Mr. BORAH. Mr. President, as I understand, the original contract was revocable at will, according to the provision read by the Senator from Arkansas. In lieu of that a certificate has been issued which is only revocable by reason of willful misconduct on the part of the carrier. Is that correct, may I ask the Senator from Connecticut?

Mr. BINGHAM. That is correct.

Mr. BORAH. And that certificate is valid until April, 1936?

Mr. BINGHAM. Until April 5, 1936. At that date all of the certificates expire.

Mr. BORAH. We find ourselves in the position, according to the contention of the Senator from Connecticut, that we must pay this subsidy until 1936 whether Congress thinks it wise or not.

Mr. BINGHAM. Of course, if the Senate does not choose to provide the money, they can not be paid, but it seems to me under the certificates which were issued we are at least morally responsible for carrying out the terms we made with these different companies that they would engage in the business and purchase airplanes and build hangars and go to the expense of setting up their business with the understanding that we would see that they should receive fair compensation.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator from Idaho yield in order that I may ask the Senator from Connecticut a question?

Mr. BORAH. I yield.

Mr. ROBINSON of Arkansas. We have reduced the compensation by $3,000,000 by means of the Metcalf amendment. If we may reduce it by $3,000,000, as we have done, why may we not reduce it further if we see fit to do so?

Mr. BINGHAM. The answer to that is that we may cut out the whole bill if we see fit to do so.

Mr. ROBINSON of Arkansas. No; there is no proposition of that kind under consideration.

May I ask the Senator a further question? If the amendment prevails and the provision goes out, the whole subject will be in conference. If the conferees should fail to agree and should leave out the provision, there would still be several months before the beginning of the next fiscal year in which to work out a fair arrangement for the administration that is to administer the act. Is not that true?

Mr. BINGHAM. Not according to my understanding. Since the certificates have been issued by the Government and accepted by the comptroller and can only be canceled for willful neglect, it appears to me that except by a breach of faith on the part of the Government the certificates could not be canceled. Of course, the Postmaster General may from time to time, as he has done, reduce the amount which he believes should be paid under the formula which he has worked out.

Mr. ROBINSON of Arkansas. We have already reduced it by $3,000,000. If we can reduce it by $3,000,000, where is the moral principle involved in reducing it still further?

Mr. BINGHAM. There is a little difference between making a reduction of 12 per cent in the subsidy and cutting out everything for the service including that which is earning in the present year $9,000,000 through the use of the air mail service.

Mr. BORAH. Mr. President, I am not sufficiently familiar with the Watres Act to know under what obligation the Postmaster General was to give these men an irrevocable contract for a revocable contract. There certainly was nothing in the Watres Act to require the Postmaster General to do that. It must have been within his discretion to do so. If it was within his discretion, it occurs to me these people took it with notice.

Mr. LONG. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Idaho yield to the Senator from Louisiana?

Mr. BORAH. I yield.

Mr. LONG. I have the Watres Act here. As I read the Watres Act, if any mistake has been made, it has been made by Congress. It very specifically empowers the Postmaster General to make these permit contracts upon surrender of the old contracts, for a period not to exceed 10 years, after public advertisement, to the lowest bidder.

Mr. BORAH. What I desire to know is if there was anything in the act which would require the Postmaster General to give these carriers an irrevocable contract for a revocable contract.

Mr. LONG. It appears from the text that they could get a reduction in the rates. It seems that they could make contracts providing for certain rates and they could get them for a certainty for a period of 10 years instead of for a shorter period of uncertainty.

Mr. BINGHAM. Mr. President——

Mr. BORAH. I yield to the Senator from Connecticut.

Mr. BINGHAM. In the original contract the Postmaster General could, upon giving 45 days' notice, revoke the contract. It left the air mail contractors in a position of holding a contract which might, at the end of 45 days, be revoked. Many of the contracts carried very high rates which could not be reduced. The Government was in some cases paying $3 per mile for carrying mail when it could secure a rate of about $1 or $1.25 by exchanging the revocable contracts for certificates available over a certain number of years. The Watres Act provides for 10 years. The contractors were willing to accept a certificate which would give them a longer period of time definitely than they actually held under the contract and at very much lower rates.

Mr. BORAH. The contention of the Senator is that the Government exchanged an irrevocable contract for a lower rate?

Mr. BINGHAM. They got lower rates then, and they have since then had the rates cut down. Since the Postmaster General has access to all their books and papers he repeatedly brings pressure to bear upon them every 9 or 10 months to lower the rates, and they have been lowered about 95 per cent in the last three years.

Mr. McKELLAR. May I ask the Senator a question?

Mr. BORAH. May I yield the floor?

Mr. McKELLAR. I just want to call attention——

The PRESIDENT pro tempore. The Senator from Idaho has the floor.

Mr. McKELLAR. Will the Senator yield to me?

Mr. BORAH. Yes; I will yield to the Senator, and also yield the floor.

The PRESIDENT pro tempore. The Senator from Idaho yields the floor.

Mr. BORAH. Perhaps I cut the Senator from Tennessee off from asking his question. If I did, I will remain on the floor until he asks it.

The PRESIDENT pro tempore. The Senator from Idaho has three minutes left. If he desires to retain the floor in order to permit the Senator from Tennessee to speak in his time, he may do so.

Mr. BORAH. Very well.

Mr. McKELLAR. Section 6 of the Watres Act as amended provides:

SEC. 6. The Postmaster General may, if in his judgment the public interest will be promoted thereby, upon the surrender of any air mail contract, issue in substitution therefor a route certificate for a period of not exceeding 10 years from the date service started under such contract to any contractor or subcontractor who has satisfactorily operated an air mail route for a period of not less than two years, which certificate shall provide that the holder thereof shall have the right, so long as he complies with all rules, regulations, and orders that may be issued by the Postmaster General for meeting the needs of the Postal Service and adjusting mail operations to the advances in the art of flying and passenger transportation, to carry air mail over the route set out in the certificate or any modification thereof—

The Postmaster General has the power to modify it as he pleases—

or any modification thereof at rates of compensation to be fixed from time to time, at least annually, by the Postmaster General—

He has absolute control even under the certificate.

and he—

That is, the Postmaster General—

and he shall publish in his annual report his reasons for the continuance or the modification of any rates.

It is all in his hands. It does not attempt to give him the authority to make a binding and perpetual contract with these companies. The first act did not provide for that. It provided that a specific contract would be revocable at the instance of either the Postmaster General or the contractor.

Mr. HASTINGS. Mr. President, I think there is a great deal of confusion as to whether it is necessary to make this appropriation to meet existing and binding contracts. I myself am a good deal confused about it. It is contended on one side that the contracts may be modified, and it is doubted on the other side whether it is possible to modify them. I think it is generally conceded that if the Congress were to pass upon the expenditure of this much money at this time for the purpose in question it would undoubtedly greatly reduce the appropriation. I do not know to what extent it would be reduced, because I do not know enough about the importance of carrying the mail in this way.

Certainly I do not want, and I do not believe any Senator on this side of the Chamber wants, to have this provision of the bill passed for the purpose of giving the present Postmaster General any additional authority or to perfect any contract which he may have in his mind. Certainly I have no such thought as that. It seems to me if the distinguished Senator from Arkansas [Mr. ROBINSON], the leader on the other side of the Chamber, desires and is willing to take the responsibility of the next administration having to meet this situation, whether it be a violation of a contract, or whatever it may be—if he, speaking for his side of the Chamber, is willing that the next administration shall meet this difficulty when it comes, I myself think that we ought to give him that opportunity.

I merely rose for the purpose of making it clear that I should not want to vote to strike out this provision of the bill if I were sure that there were binding contracts. I do not want to place upon the next administration or any other administration the responsibility of meeting an obligation without proper appropriations with which to meet it. I repeat, if the Senator from Arkansas wants to take the responsibility of the next administration determining for itself whether there exist binding contracts, and if such contracts do exist, then being compelled to return to the Congress for additional appropriations, and if they do not exist, to modify them as that administration may think desirable, we on this side of the Chamber ought to be willing to let him take it and vote for the amendment he has proposed.

Mr. LONG. Mr. President, I do not take my position from the standpoint of any party at all. As I said before, if the contractors were the only persons concerned, that would be one thing; but I wish to give the Senator from Delaware another view. We depended upon these contracts down in my State; we erected airports at a cost of several million dollars, and similar work has been undertaken by practically every State in the Union. They have worked hard, as we have worked hard, to get ourselves established on one of the air routes shown on the map now hanging on the wall. We managed to borrow from the Government the other day about a million and a half dollars to enable us to complete our main airport. The Government let us have that amount. Now we come along with the most haphazard proposition that I have ever seen in government. What are people going to depend on? After the Government has encouraged us to go ahead and make all these expenditures, to make unusual bond issues for which we were criticized most severely, now Senators come along in the case of the air mail contracts and at one fell swoop move to strike the whole dad-gummed thing out of the bill. What kind of a Government have we? We are supposed to be able to rely upon the Government.

I am not interested in this contract particularly; I do not care whether Mr. Morgan has the contract. I have a better man down in Louisiana to handle this mail than he is, a much better friend of mine [laughter], and I have been hoping some day he might get one of these contracts; he has not any now.

Here is how the law reads. My friend from Tennessee read it one way; yet I think there is another way. It does not give the Postmaster General the right to revoke these contracts; it does not give the Postmaster General any such authority at all. It does provide that the contract must be performed according to such rates as may be fixed or changed from time to time by the Postmaster General. In other words, the Postmaster General is a public service commission on the question of regulating rates. He can change the rate, he can lower it or he can raise it, under the law, in accordance with what seems to be reasonable and just; but so far as the canceling of the contract is concerned, there is no such authority in the law.

I want to read the language:

SEC. 6. The Postmaster General may, if in his judgment the public interest will be promoted thereby, upon the surrender of any air mail contract, issue in substitution therefor a route certificate for a period of not exceeding 10 years from the date service started under such contract to any contractor or subcontractor who has satisfactorily operated an air mail route for a period of not less than two years, which certificate shall provide that the holder thereof shall have the right—

Shall have the right—

so long as he complies with all rules, regulations, and orders that may be issued by the Postmaster General for meeting the needs of the Postal Service and adjusting mail operations to the advances in the art of flying and passenger transportation, to carry air mail—

Shall have the right so long as he complies with the rules and regulations prescribed—

to carry air mail over the route set out in the certificate or any modification thereof at rates of compensation to be fixed from time to time, at least annually, by the Postmaster General, and he shall publish in his annual report his reasons for the continuance or the modification of any rates.

In other words, he has the right as the science progresses and the rates lessen to reform the contracts to provide what would be reasonable charges and to improve the service; but there is not any such thing in this contract in words or by implication that would to any extent suggest that the contracts could be abrogated as with the falling of the nighttime. There is nothing of that kind.

Mr. President, I am interested in the people of this country who have spent their money for airplane service. I am interested not only in the people of my State but in those of New York and Arkansas and Tennessee and everywhere else who have spent their money because the Congress of the United States gave them to understand that we had a dependable air mail service.

I was not here when this act was passed; but if the Congress had not passed this kind of an act, we would not have voted five or ten million dollars in bonds in my State, if the Congress of the United States had not meant what it said. We would not have been in this kind of a condition to-day if the Congress had delayed long enough to decide what it wanted to do about air mail contracts.

It is true that we might wait for the next administration. I was one of those who suggested this morning, in order to

end the row, that we leave it to the next administration to apportion it and to have no appropriation at all now; but I now see the danger. I see that we have in this Chamber, which is very surprising to me, some distinguished Senators who actually want to discontinue the air mail service altogether and leave us practically penniless so far as revenue is concerned and for patronage to meet the expenses incurred in the States. It would be a disastrous thing for the people, Republicans and Democrats, and for States and municipalities as well as for the Government, to have the United States throw up its hands and discontinue the air mail service at one fell swoop.

I think some of us have let our tempers get a little bit the best of us. The Senator from Tennessee had an amendment, and we amended the amendment of the Senator from Tennessee, and some of us voted "no" on the amendment of the Senator from Tennessee as amended, and then changed our vote. I was one of them. We have acted a little bit hastily about this matter. I do not think we have studied it in that calm atmosphere in which it rightly should be considered. I believe we would make a big mistake to act hastily here and overturn the entire policy of the Government that we have been many years in formulating.

This has not been any haphazard thing. Congress had this matter before it for a considerable time; it enacted the law; it reenacted the law and modified the law. There has been a steady growth and advance in the science of aviation, and this country needs it as much as does any other country. Why pick on the air mail service? The appropriation is only $19,000,000. Why not pick on the United States Army's $200,000,000, or why not pick on the United States Navy's $400,000,000?

We come here and fight over a fly speck by comparison, and propose to cripple a service to provide facilities for which municipalities and States have gone out and floated bonds. The public is actually getting some service from the air mail. It is a reasonable service they are now getting; it is bound to be a reasonable service, and the appropriation is certainly a whole lot more reasonable than the second-class mail subsidy that the newspapers have today, for which the United States Government probably spends a hundred million dollars. Why do you not talk about cutting off $50,000,000 from that service if you want to save some money that the Government is losing on subsidies? But we are not hearing anybody talk about that, and I am not talking about it either. Do not let me be misunderstood. I have had enough trouble with them already. [Laughter on the floor and in the galleries.]

The PRESIDING OFFICER (Mr. FESS in the chair). There must be no demonstration in the galleries.

Mr. LONG. Mr. President, I submit that we not only have contracts with the air mail concerns but our municipalities have contracts which the air mail concerns have made with them. They have contracts with the people who have contracts with the Government, and we are depending upon the revenue thus derived in order to retire our bonds and pay ourselves out. The service ought not to be discontinued in this kind of fashion.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Arkansas [Mr. ROBINSON].

SEVERAL SENATORS. Vote!

Mr. McKELLAR. I ask for the yeas and nays.

The yeas and nays were ordered, and the legislative clerk proceeded to call the roll.

Mr. HEBERT (when his name was called). Again announcing my pair with the senior Senator from North Carolina [Mr. BAILEY], I withhold my vote. If at liberty to vote, I should vote "nay."

Mr. KEYES (when his name was called). I have a pair with the Senator from Oklahoma [Mr. THOMAS]. In his absence I withhold my vote. If at liberty to vote, I should vote "nay."

The roll call was concluded.

Mr. MOSES. I have a general pair with the senior Senator from Louisiana [Mr. BROUSSARD]. I transfer that pair to the senior Senator from New Jersey [Mr. KEAN] and will vote. I vote "nay."

Mr. KEYES. I find that I can transfer my pair with the Senator from Oklahoma [Mr. THOMAS] to the junior Senator from New Jersey [Mr. BARBOUR]. I do so and vote "nay."

Mr. McKELLAR (after having voted in the affirmative). I understand that my pair, the Senator from Delaware [Mr. TOWNSEND], is absent. I transfer that pair to the Senator from Missouri [Mr. HAWES] and will allow my vote to stand.

Mr. BRATTON. I have a pair with the junior Senator from Nebraska [Mr. HOWELL]. I transfer that pair to the junior Senator from Tennessee [Mr. HULL] and will vote. I vote "yea."

Mr. TYDINGS (after having voted in the affirmative). Has the senior Senator from Rhode Island [Mr. METCALF] voted?

The VICE PRESIDENT. That Senator has not voted.

Mr. TYDINGS. I have a general pair with the senior Senator from Rhode Island. I transfer that pair to the senior Senator from Nevada [Mr. PITTMAN], and will let my vote stand.

Mr. HEBERT. I find that I can transfer my pair with the senior Senator from North Carolina [Mr. BAILEY] to the junior Senator from California [Mr. SHORTRIDGE]. I do so and vote "nay."

Mr. WAGNER (after having voted in the affirmative). I transfer my pair with the Senator from Missouri [Mr. PATTERSON] to the Senator from Illinois [Mr. LEWIS], and will let my vote stand.

Mr. FESS. I desire to announce the following general pairs:

The Senator from Indiana [Mr. ROBINSON] with the Senator from Mississippi [Mr. STEPHENS];

The Senator from Kansas [Mr. CAPPER] with the Senator from Wyoming [Mr. KENDRICKS]; and

The Senator from Illinois [Mr. GLENN] with the Senator from Virginia [Mr. SWANSON].

Mr. GLASS. I desire to announce that my colleague, the senior Senator from Virginia [Mr. SWANSON], is detained from the Senate on official business. He has a general pair with the Senator from Illinois [Mr. GLENN].

Mr. NORRIS. I desire to announce that my colleague, the junior Senator from Nebraska [Mr. HOWELL], is absent on official business of the Senate. I should like to have this announcement appear on all of the votes that are taken to-day.

Mr. SHEPPARD. I desire to announce that the Senator from Arizona [Mr. HAYDEN], the Senator from Wyoming [Mr. KENDRICK], the Senator from Illinois [Mr. LEWIS], the Senator from Nevada [Mr. PITTMAN], the Senator from Mississippi [Mr. HAWES], and the Senator from Oklahoma [Mr. THOMAS] are detained on official business.

The result was announced—yeas 39, nays 35, as follows:

YEAS—39

Ashurst	Caraway	Gore	Russell
Bankhead	Connally	Harrison	Sheppard
Barkley	Coolidge	King	Shipstead
Black	Couzens	La Follette	Trammell
Blaine	Cutting	Logan	Tydings
Borah	Dill	McKellar	Wagner
Bratton	Fletcher	Neely	Walsh, Mass.
Bulkley	Frazier	Norris	Walsh, Mont.
Bulow	George	Nye	Wheeler
Byrnes	Glass	Robinson, Ark.	

NAYS—35

Austin	Fess	Long	Schuyler
Bingham	Goldsborough	McGill	Smoot
Brookhart	Grammer	McNary	Steiwer
Carey	Hale	Moses	Thomas, Idaho
Copeland	Hastings	Norbeck	Vandenberg
Costigan	Hatfield	Oddie	Walcott
Dale	Hebert	Reed	Watson
Davis	Johnson	Reynolds	White
Dickinson	Keyes	Schall	

NOT VOTING—22

Bailey	Hayden	Metcalf	Stephens
Barbour	Howell	Patterson	Swanson
Broussard	Hull	Pittman	Thomas, Okla.
Capper	Kean	Robinson, Ind.	Townsend
Glenn	Kendrick	Shortridge	
Hawes	Lewis	Smith	

So the amendment of Mr. ROBINSON of Arkansas was agreed to.

Mr. BRATTON. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. The Senator from New Mexico offers the following amendment:

On page 46, after line 7, insert the following:

"The Secretary of the Treasury is authorized and directed to make such reductions in the expenditures from the appropriations made in this act for the several purposes of the Treasury Department (except appropriations for acquisition of sites for and construction of public buildings and the appropriation for addition to the cumulative sinking fund pursuant to section 308 of the emergency relief and construction act of 1932) as will in the aggregate equal at least 5 per cent of the total amount appropriated for the Treasury Department by this act (excluding amounts appropriated for acquisition of sites for and construction of public buildings and the appropriation for addition to the cumulative sinking fund pursuant to section 308 of the emergency relief and construction act of 1932). Such reductions shall be made in a manner calculated to bring about the greatest economy in expenditure consistent with the efficiency of the service."

Mr. BRATTON. Mr. President, I have another amendment which is intended to accomplish exactly the same purpose with respect to the appropriations made for the Post Office Department. I ask unanimous consent to offer both amendments together, as they should be either voted in or voted out of the bill together. I send the second amendment to the desk, and ask to have it stated.

The VICE PRESIDENT. Is there objection to the presentation of the amendment? The Chair hears none, and the amendment will be stated.

The CHIEF CLERK. On page 64, after line 9, it is proposed to insert:

The Postmaster General is authorized and directed to make such reductions in the expenditures from the appropriations made in this act for the several purposes of the Post Office Department as will in the aggregate equal at least 5 per cent of the total amount appropriated for the Post Office Department by this act. Such reductions shall be made in a manner calculated to bring about the greatest economy in expenditure consistent with the efficiency of the service.

Mr. WALSH of Massachusetts. Mr. President——

The VICE PRESIDENT. Does the Senator from New Mexico yield to the Senator from Massachusetts?

Mr. BRATTON. I yield.

Mr. WALSH of Massachusetts. Can the Senator state what would be the savings to the Public Treasury if either of these amendments is adopted?

Mr. BRATTON. Yes, Mr. President. The saving in the Post Office bill alone will be slightly more than $35,851,000. The saving in the Treasury bill will be in excess of $9,720,000. The two together will accomplish reductions of $45,000,000 plus.

Mr. President, the two amendments are perfectly obvious, simple, and easily understood. They direct the Postmaster General in the one case, and the Secretary of the Treasury in the other, to make such reductions in the expenditure of the appropriations for their respective departments as will equal at least 5 per cent of the total appropriation contained in the bill.

Mr. President, we have been talking a great deal about economy. It is difficult to economize in these departments because we are on the outside. We do not know the technique, we do not know the structure of these departments. We do not know where economies can be made in the most efficient manner and with the least sacrifice to service.

I am perfectly confident, Mr. President, that the Postmaster General can reduce the expenditures authorized by this bill by 5 per cent without sacrificing the efficiency of the department. In doing that he will save the taxpayers of this country $35,850,000.

Mr. WAGNER. Mr. President, will the Senator yield to me?

Mr. BRATTON. I yield.

Mr. WAGNER. I was not able to follow the amendment in detail. Is the Senator proposing to reduce the public works program in the respective departments?

Mr. BRATTON. No, Mr. President. In the amendment offered public works sinking funds are expressly excluded. The 5 per cent reduction would not attach to those funds.

Mr. COSTIGAN. Mr. President, will the Senator from New Mexico state whether the reductions contemplate dismissals in the personnel or reductions in the salaries of Government employees?

Mr. BRATTON. It is possible, Mr. President, that there would be some additional furloughs; it is possible that there would be some dismissals. It is possible that both could be avoided. I believe that an efficient administrative officer can reduce his expenditures 5 per cent without imposing substantial additional furloughs or substantial dismissals. By doing away with overlaps and duplications and by eliminating waste this economy could be effected.

Mr. President, it is my purpose to offer a similar amendment to each of the appropriation bills as it comes forward. If they are adopted, the savings will be approximately $130,000,000.

It seems to me that the proposal is quite akin to a situation where a board of directors of a large industry who are not familiar with the details of it summon the manager and say, "We must reduce expenses. We do not know the best way to do it, but you do. You scale down the total figure 5 per cent and do it in the best way."

Obviously, Mr. President, that would be better than for the directors themselves to undertake the job. Equally so, it is better for the Congress to say to the Cabinet officer in each instance, "Call your chiefs in; tell them that by a mandate of Congress the total appropriation must be scaled down 5 per cent. Let them get together and devise ways and means of doing it in the most efficient manner."

Obviously, that is more scientific than for 600 minds in the two Chambers of Congress, unfamiliar with the technique of any one department, to undertake to do the job, and that is what the proposal is intended to accomplish.

Mr. President, this is not a new proposal. We have written a provision similar to this one in the bill making appropriations for the Bureau of Indian Affairs for several years, and they have scaled and kept within the appropriation as reduced in that manner.

If we insert a provision of this kind in each appropriation bill, I forecast that the taxpayers will save $130,000,000, and that we will hear very little complaint from the departments involved. This is the safest way, it is the most scientific way, of scaling these tremendous figures with the least possible sacrifice of efficiency.

It will be noted that the provision expressly stipulates that "such reductions shall be made in a manner calculated to bring about the greatest economy in expenditure consistent with the efficiency of the service." That is the meat in the coconut. It is the crux of the proposal. The head of the department knows how that can be done vastly better than we do.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. BRATTON. I yield.

Mr. COPELAND. The Senator may have already answered what I have in mind to ask; but does this mean a cut in salaries of employees?

Mr. BRATTON. The distinguished Senator from Colorado propounded that question a few moments ago, perhaps during the absence of the Senator from New York from the Chamber. To the inquiry I answered then, and I repeat now, it is possible that some additional furloughs would be required, it is possible that some dismissals would be necessitated, but I think not. I think that with scientific paring, 5 per cent can be saved by those familiar with the technique of the departments without imposing any furloughs or any dismissals, through eliminating waste, overlapping, and duplications.

Mr. COPELAND. Who would have the discretion in the matter?

Mr. BRATTON. The Postmaster General in the one case and the Secretary of the Treasury in the other. I am offering the two amendments together.

Mr. COPELAND. They would have the authority, under the amendments, to determine how they would be applied?

Mr. BRATTON. Yes. Let me read the amendment to the Senator. It is as follows:

The Postmaster General is authorized and directed to make such reductions in the expenditures from the appropriations made in this act for the several purposes of the Post Office Department as will in the aggregate equal at least 5 per cent of the total amount appropriated for the Post Office Department by this act. Such reductions shall be made in a manner calculated to bring about the greatest economy in expenditure consistent with the efficiency of the service.

The Senator will bear in mind that under a provision contained in the economy act transfers can be made from one fund to another. Keeping that authority in mind, it occurs to me that the Postmaster General in the one case, and the Secretary of the Treasury in the other, can economize to the extent of 5 per cent without sacrifice to the service and without undue hardship to anyone.

Mr. COPELAND. I thank the Senator.

Mr. BARKLEY. Mr. President, will the Senator yield to me?

Mr. BRATTON. I yield.

Mr. BARKLEY. Suppose it turned out that the head of a department could accomplish 5 per cent or 10 per cent reduction in the total expenses by lopping off unnecessary employees, or in any other way that would not affect the efficiency of the Government. Would that be any reason why we ought not to adopt these amendments? How else are we ever going to reduce expenditures? We are all giving lip service to economy; but when an amendment is offered intended to bring it about, we begin to express doubt whether it is going to result in the discharge of some one from his employment. My theory is that we will never be able to reduce Government expenditures unless we authorize somebody to reduce somewhere.

Mr. BRATTON. Mr. President, that is the thought I had in mind, and in approaching it I was led to the conviction that a Postmaster General in the Post Office Department and a Secretary of the Treasury in the Treasury Department could make these economies vastly better and with vastly less hardship than we could make them. We now have an opportunity to save $45,000,000; and if we adopt the policy in connection with this item and pursue it in the subsequent appropriation bills, we will save $130,000,000, no small sum, especially during these times.

Mr. COPELAND. Mr. President, does the Postmaster General need to have legislation to do what the Senator proposes?

Mr. BRATTON. He does not need it, but this is a mandate. He will be authorized and directed to do it. He has the authority, but this provision carries compulsion. He will be obliged to do it.

Mr. President, I do not desire to consume further time of the Senate in discussing the amendment. Its object is perfectly plain. The question is perfectly apparent. It is one of whether we are going to undertake to economize to this extent by this method.

I hope to have a record vote on the two amendments together.

Mr. VANDENBERG. Mr. President, I rise to support the amendment submitted by the Senator from New Mexico. It grows out of a colloquy which we had upon the floor last week. The suggestion was originally made by me in connection with my discussion with the Senator from Maryland and the discussion with the Senator from New Mexico. The Senator from New Mexico and I subsequently consulted on the subject, and his amendment is the outcome.

I concur in all the logic which the Senator from New Mexico has submitted in support of the amendment. It seems to me that if there is any analogy between private business and public business, the analogy finds its expression in the amendment. If this were private business, the board of directors certainly would undertake to hold the responsible executive to answer for a rational allocation of administrative savings. That is precisely the thing which we would undertake to do under this amendment.

After making all other direct reductions in these appropriations by direct amendment, we would undertake finally to cut the total, and to leave to those who know best where the cut can be made the responsibility and the decision for the precise application of the final economy to which we are committing ourselves.

Mr. President, as the Senator from New Mexico has said, there is a precedent for this amendment. It is found in the Interior Department appropriation bill, which is now on the calendar, and will be taken up immediately after the bill upon which we are now at work.

I call attention to the fact that on page 41 of the Interior Department appropriation bill the sum total appropriated for Indian boarding schools is $102,000 less than the actual sum total of the listed items in that section of the bill. That process has been followed for several years in handling the appropriations for the Indian schools. In other words, the system has been to put the upset figure for each school in the bill, and then to reduce the sum total and leave to the executive authority the responsibility and the opportunity to allocate an ultimate, final economy in respect to the expenditure of the money. The amendment submitted by the Senator from New Mexico simply proposes to apply that general system to all of the bills and all of the appropriations.

Mr. President, there is one further reason why I think the amendment is absolutely justified. Certainly in some form or other we are going to clothe the incoming Executive with more authority than any Executive has ever heretofore had to consolidate bureaus and departments, to eliminate waste, and so forth. Inevitably that power is to be used, because the American people will not much longer be satisfied to have the power lapse, regardless of whether the responsibility is in the Executive or in the Congress.

Let us assume that this bill is to carry adequate power under which the Executive can operate. Let us assume that the Executive confronts the question of deciding whether the power shall be used or not. I submit that the amendment of the Senator from New Mexico simply puts the Executive under final and inescapable compulsion to use the power which we intend to place in his hands at least to this minimum extent.

Therefore, for every possible reason, it seems to me that logic and consistency and a rational pursuit of economy support the amendment submitted by the Senator from New Mexico, and which I had the honor originally to suggest.

Mr. TYDINGS. Mr. President, I just want to say that my experience as a member of the Committee on Appropriations is such that I am led to say that the committee has only two or three days, in considering the appropriation bill for each department, in which to effect economy; and obviously, in two or three days, being unfamiliar with it in the first instance, it can not be as accurate in determining where economies can justly be effected as the head of the department can be with years of experience.

Mr. SMOOT. Mr. President, if I understood the Senator from Michigan correctly, he said there was a precedent for the amendment now offered by the Senator from New Mexico found on page 41 of the Interior Department appropriation bill.

Mr. VANDENBERG. That is correct.

Mr. SMOOT. I think this is quite a different proposition from that of the Senator from New Mexico. This provides that 10 per cent of the amount shall be available interchangeably for expenditures for similar purposes in the various boarding schools named and that no more than 10 per cent shall be added to the amount appropriated for any of the schools or for any particular item for any of the schools. That is quite a different proposition from that offered by the Senator from New Mexico.

Mr. VANDENBERG. But the Senator overlooks the fact that the figure in line 15, to wit, $3,755,000, which is the total appropriation for all of the previous purposes, is $102,000 less than the sum total of the specific items in the appropriation. I submit to the Senator that that is precisely a precedent for the thing which the Senator from New Mexico is undertaking to cure.

Mr. SMOOT. In the amendments in the Interior appropriation bill there are reductions made. They are over and above the House provision. But the proposal of the Senator is to make a flat 5 per cent reduction on the total. It often happens, indeed—in every appropriation bill—that there is an increase or decrease, but the amendment in the Interior appropriation bill is one that I do not remember of ever having added to an appropriation bill before.

Mr. BRATTON. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from New Mexico?

Mr. SMOOT. I yield.

Mr. BRATTON. The Senator will recall that the economy bill of last year contains a general provision authorizing the interchange of funds, under which the Postmaster General and the Secretary of the Treasury each could do substantially what could be done under the language just read by the Senator from Utah.

Mr. SMOOT. I am not objecting to the language in the Interior Department appropriation bill, but I do not want it construed as the same sort of an amendment that is now pending before the Senate.

Mr. BRATTON. It would operate in identically the same way.

Mr. BYRNES. Mr. President, I only desire to lend my support to the amendment offered by the Senator from New Mexico. It is not quite correct to state that appropriations are framed only after casual investigation by the Congress. The fact is that in the House elaborate hearings are held upon each and every appropriation bill, but the difficulty always is that the head of a bureau possessing the ability to present his case in an effective manner, as a general thing, is able to secure better treatment at the hands of a subcommittee than the chief of a bureau who is unable to express himself with the same facility. The head of the bureau naturally is urging the importance of his particular bureau. The Congress can not, through its subcommittees in the House and the Senate, pass upon the merits of the Budget proposals of the various bureaus with the same exactness that the head of the department can.

By this amendment the Postmaster General is directed to make a saving of 5 per cent wherever he finds that it can be done. Under the existing law the so-called economy bill of last year, which by the provisions of this bill is made effective for the next 12 months, not to exceed 12 per cent of any appropriation for an executive department or independent establishment, including the municipal government of the District of Columbia, may be transferred with the approval of the Director of the Budget; so that he has the power as Postmaster General to transfer not to exceed 12 per cent from one bureau to another bureau. The result of the adoption of the amendment will simply mean that $130,000,000 will be deducted from the appropriation bill.

Mr. DICKINSON. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from Iowa?

Mr. BYRNES. I yield.

Mr. DICKINSON. I would like to submit this inquiry: Under the language of the amendment suppose we had $500,000, which represented the 5 per cent reduction in two services, one the Customs Service and the other Internal Revenue Service. Under the amendment would it not be possible for the Secretary of the Treasury to take all of the reduction out of the Customs Service and permit the other bureau to have the full allotment of funds?

Mr. BYRNES. Yes; if the Secretary of the Treasury would exercise the power in that way. There is nothing in the language of the amendment that would prohibit the exercise of his discretion. It is left to him. He lives with the problem. In a few conferences with the Appropriations Committee we can inquire into it. The Secretary of the Treasury is with the problems of his department every day in the year. He knows whether it can best be taken from the Customs Service. Under this amendment he could take it from any particular bureau in the Treasury Department.

Mr. DICKINSON. The question I had in mind was that if he could do that with two bureaus he might do it with several bureaus, and therefore he might take all of the saving out of the Prohibition Bureau and starve it and help the other bureaus in his department.

Mr. BYRNES. If he saw fit to do that, under this language he could do so either with reference to the Prohibition Bureau or the Customs Service or any other bureau. We must assume, however, that in the exercise of discretion by the head of an executive department that discretion will be exercised intelligently.

Mr. LOGAN. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from Kentucky?

Mr. BYRNES. I yield.

Mr. LOGAN. Is it not true that the Secretary of the Treasury now goes with his recommendations to the Budget and also to the committees of Congress, and he could do the same thing now by recommendation if he so desired?

Mr. BYRNES. He could. The language of the amendment contains no restriction other than that it must be done in a manner calculated to bring about the greatest economy consistent with efficiency of the service.

Senators may as well realize that if we are to accomplish any material saving in the appropriation bills that material saving is going to be accomplished by the adoption of the amendment offered by the Senator from New Mexico. As the appropriation bills stand to-day, they have been reduced $66,000,000 below the estimates submitted by the Budget. The estimate of saving to be effected by the adoption of this amendment is approximately $130,000,000, so that there will be a reduction of $200,000,000 below the estimates submitted by the President and the Budget at the beginning of the Congress.

Mr. COPELAND. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from New York?

Mr. BYRNES. I yield.

Mr. COPELAND. Let me ask the Senator this question. I can understand why Senators on the other side of the aisle, who are truly anxious for economy, would jump at the chance to vote for the amendment, but I want to ask the Senator if he has lost confidence in our ability to adopt Title IV of the bill seeking reorganization of the executive departments?

Mr. BYRNES. No; I have not; but it would make it distinctly easier to accomplish the saving thereby hoped for if the Congress shall now adopt this amendment. It is unnecessary to take any chances on the adoption of any legislation by the Congress if the Congress will thus act and reduce by 5 per cent the amount of the appropriations. I say to the Senator from New York that it means that the Congress, when it comes to the levying of taxes, may be spared the necessity of levying burdensome taxes at a time when the people of America can not afford to pay any additional taxes.

The extension of the gas tax would bring about $137,000,000. By this amendment we save the total amount of the gas tax. It has been urged that there should be an increase of 1 cent in the tax on gas. Instead of doing that, let us adopt this amendment. It is estimated that from the beer bill $125,000,000 of revenue will come. By the adoption of this amendment we will bring about a saving of as much as the revenue under the beer bill would bring to the Government. Therefore why not adopt the amendment of the Senator from New Mexico?

Mr. COPELAND. Mr. President, I have the feeling—and I say it in all kindness—that this is a reflection upon the incoming officials of our Government. If we pass Title IV of the bill, we are giving the pledge of Congress actually to the point of giving dictatorial powers to the incoming administration. We are expecting radical economy. Yet here, in the face of what we are hoping to do in the way of reorganization, it is proposed to have a 5 per cent cut, which is not sufficient at all for the purposes of the taxpayers' pocketbook. It seems to me that we ought to take Title IV, pin our faith to that, and give the Executive the power to effect

the economies which the country is demanding. But failing to have confidence in the incoming officials, we say, in spite of the fact that we are giving dictatorial powers to the incoming administration, that we direct it to reduce its Budget 5 per cent.

Mr. BYRNES. The Senator from New York is entirely mistaken in his judgment. The incoming administration is interested only in one thing, and that is the redemption of platform pledges, one of which was to accomplish a reduction of 25 per cent in the current expenses of the Government. This is a step toward the redemption of a solemn pledge, a covenant with the people of the United States. When it comes to the adoption of the reorganization section of the bill, I hope it will be adopted, and, with the power thus given, the incoming administration can proceed to accomplish additional savings, added to the savings effected by the Bratton amendment. Thus we may be enabled to redeem our pledge to the people.

Mr. BRATTON. Mr. President——

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from New Mexico?

Mr. BYRNES. I yield.

Mr. BRATTON. Does not the Senator from South Carolina think that we should share with others the responsibility to effect economies and carry out our platform pledge? That is what this amendment will do without reflecting on anyone or any department or any service.

Mr. BYRNES. I doubt if the Senator from New York was serious, because the Congress of the United States has the duty to legislate, and in legislating to determine where it is possible to effect economies, and this is the most effective way of reducing the expenditures of the Government.

Mr. ODDIE and Mr. VANDENBERG addressed the Chair.

The VICE PRESIDENT. Does the Senator from South Carolina yield; and if so, to whom?

Mr. ODDIE. Will the Senator yield to enable me to make a point of order?

Mr. BYRNES. No; I will not yield for that purpose. I yield to the Senator from Michigan.

Mr. VANDENBERG. I suggest to the Senator from New York that he has his logic in precise reverse. If any of us have any confidence in the final title of this bill and that under it the incoming Executive is going to produce any consolidations and any eliminations and any economic changes, then certainly we are safe in expecting at least a 5 per cent reduction as a result of that action. The two things are in harmony.

Mr. BYRNES. It places the departments in direct line under the appropriation if we effect the economies we hope to secure.

Mr. COPELAND. Mr. President, will the Senator yield further?

Mr. BYRNES. I will yield the floor to the Senator, as I having nothing more to say.

The VICE PRESIDENT. The Senator from South Carolina has three minutes of his time left.

Mr. BYRNES. Under no necessity to use it, I yield the floor.

The VICE PRESIDENT. The Senator from New York is recognized.

Mr. COPELAND. Mr. President, I have no desire to take more than three minutes, but if the purpose of Title IV is merely to carry out a campaign promise, a promise of the platform, I am interested in it only to that extent. But I thought Title IV was intended to do exactly what the declaration of policy states, to reduce expenditures and to increase efficiency of Government.

Mr. BYRNES. That is exactly what it is.

Mr. LOGAN. Mr. President——

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from Kentucky?

Mr. COPELAND. I yield.

Mr. LOGAN. I was wondering if it has occurred to the Senator from New York that there might be some doubt about the Chief Executive's reducing the expenses arbitrarily without the approval of Congress, whether or not the Congress has the power to delegate to the President the power to do these things without his coming back to Congress and Congress then approving his action? I doubt whether we can put the full responsibility on the Chief Executive, although the bill seems to contain a provision that might be so understood.

Mr. COPELAND. I can well understand how the distinguished Senator from Kentucky, himself a great judge, would appeal to me for a constitutional opinion on this matter.

Mr. LOGAN. Remembering the very able constitutional address delivered by the Senator from New York a short time ago, I had forgotten for the moment that he is a layman, or claims to be. [Laughter.]

Mr. COPELAND. I thank the Senator for his compliment. I am convinced that unless we make a declaration of policy more definite than the one we have here, presenting the fact that there is an emergency and it must be dealt with, my judgment coincides with that of my eminent friend that we would have hard work to sustain the constitutionality of it.

But aside from that, if we have presented this in good faith, we are going to give the President such power as a President has never before had in peace times, the power to do almost anything that he may choose to do. I have confidence enough in the incoming President to believe that he will do the sensible thing, the honorable thing, and the thing which will appeal to the country. But we do not have faith in it; we do not believe that we are going to accomplish this economy; and so now we propose this 5 per cent reduction, which will probably mean that, on top of the reductions which the employees of the Government have had, they will have an additional burden and perhaps carry the entire burden of this 5 per cent reduction. It was that that I wanted to say, Mr. President, merely in reply to the suggestion made by the Senator from South Carolina.

Mr. CONNALLY. Mr. President, I believe it was Secretary Sherman who was quoted as once having said with regard to the resumption of specie payments that the way to resume was to resume. Senators have been talking about economy ever since I have been in the Senate, now over three years. Senators have been talking about economy during all that time. I believe that we have now arrived at that particular juncture where Secretary Sherman's observation may be very well applied by analogy to the situation here. The way to economize is to economize. I strongly favor the amendment offered by the Senator from New Mexico [Mr. BRATTON]. In addition to the reduction of expenditures provided by the bill, it directs a further cut by the department chiefs in the administration of their departments.

All of us know that money is appropriated by Congress but that it is spent by the executive departments. All of us know that the executive departments find ways of spending every dollar, if they so desire, which Congress appropriates and then call upon Congress for deficiency appropriations. On the other hand, we know that the executive departments, when they so desire, can save money to the Treasury by not spending appropriations for various items. So the declaration of policy in the amendment of the Senator from New Mexico, calling upon the Secretary of the Treasury to undertake to reduce the appropriations by 5 per cent, if it were carried out in the proper spirit by that official, would, in fact, result in the appropriations' being reduced by millions of dollars.

BALANCING THE BUDGET

Mr. President, we have heard much talk about "balancing the Budget." My view is that the first step in balancing the Budget is that this Congress—not the next one, but that this Congress—must reduce appropriations absolutely to the lowest practicable point. Because of that I have to-day voted to cut the air mail contracts, even though we have a number of them in my State, and chambers of commerce are telegraphing us not to cut them.

GOVERNMENT REORGANIZATION

The second step in balancing the Budget is to give President Roosevelt power to reorganize Government departments.

I have just listened to the Senator from New York [Mr. COPELAND] expressing a fear of giving the President too much power in this reorganization plan. That is the second step in any well-balanced plan for economy. First, reduce appropriations now to the very lowest possible point; second, give the incoming President wide powers to reorganize and reduce departments.

I have seen Senators with vehemence and heat stand upon this floor and declaim about doing away with useless bureaus and abolishing boards and commissions, and yet when the roll is called on cutting an appropriation they answer "no." I trust that President-elect Roosevelt may be vested with the widest possible powers to go through the departments and lop off a great many of them. I, for one, think he could lop off the Department of Commerce by 50 per cent, perhaps 75 per cent, without any detriment to the public interest. I believe that he could withdraw from foreign lands a great army of Department of Commerce employees, and let the consuls, whose duty it already is, do the same work that these representatives of the Department of Commerce do.

The Senator from New York fears that we are going to give the President some unconstitutional power. The Congress will be here, and both Houses of Congress can undo, if they so desire, anything which the President does, and I am in favor of giving him the power and letting him cut and prune and lop off bureaus, and those he does not lop off give him the power to trim down to a "stand." The Senator from New York, perhaps, does not understand what a "stand" is, but that is thinning them to a point where they will do the most work and get the best results.

Mr. COPELAND. Mr. President——

The VICE PRESIDENT. Does the Senator from Texas yield to the Senator from New York?

Mr. CONNALLY. I yield.

Mr. COPELAND. I would not have the Senator from Texas feel that I am in opposition to the reorganization plan; that was not my point.

Mr. CONNALLY. I did not charge that to the Senator.

Mr. COPELAND. But I am anxious that this power shall be conferred in such a way that it will be upheld by the courts; and I have, as I have stated, confidence enough in the incoming President to believe that he will deal wisely with the power placed in his hands.

Mr. CONNALLY. I thank the Senator from New York, and I am sure of the purity of his motives.

REFUNDING DEBTS

Mr. President, that is not the only economy that we can effect. After the departments are reorganized, the next step, in a proper balancing of the Budget, according to my view, would be for the new Secretary of the Treasury to inaugurate a widespread refunding of Government obligations. The Government of the United States annually pays out over $700,000,000 in interest. Many of its bonds are bearing 4¼ and 4½ per cent interest, and about $6,000,000,000 of them are callable within the next year or so. The money market is such that money can be obtained for much lower rates of interest; and I believe that if the new Secretary of the Treasury would inaugurate a refunding program, he could probably save the American people from $200,000,000 to $300,000,000 annually in the interest rates on the Government bonds.

NO NEW TAXES

Mr. President, what is the fourth step in balancing the Budget? I, for one, do not propose to vote for any additional taxes until the Congress shall make greater progress in reducing expenditures. I do not believe that the yearly balancing of the Budget is a sound program to undertake. To keep the Budget in yearly balance on the 1st day of January means that when we are prosperous, when it is easy to pay taxes, when we have incomes, our taxes are low; and, on the other hand, when we have hard times, when the people can not pay taxes, when they have slight income, when their resources have shrunk, in order to preserve a balanced Budget on the 1st day of each January or the 1st day of each July, we have got to tax the people down to the point where they suffer and almost bleed with their burden. Any sound program of balancing the Budget ought to be spread over a longer period than a year; it ought to be over an administration of four years or over a period of five years, so that the slack, so that the deficit which has accumulated in times of peril and stress and strife may be taken up by increased taxes when we are prosperous and when the people have incomes and can bear the burden of taxation.

When we have a great war we do not undertake to pay all the running expenses of that war during its continuance; we borrow for the future, trusting that the American people will redeem the obligations thus incurred, as they have always redeemed them. We are in war to-day, not with men, not with an enemy with guns in his hands and with artillery thundering and destroying, but we are in war; we are in war with great economic forces which are more unconquerable than are men with guns in their hands. We are in a war with the unseen forces of a terrible depression; we are in war with the miners and sappers that go down under the surface of things and destroy the commerce and business fabric of the people of the United States. So, it is as justifiable now to take care of any reasonable or temporary deficit by a reasonable amount of borrowing on the future or on future prosperity as it would be in any other great crisis.

Summarizing, Mr. President, let me observe that the first process in a proper revamping of the Government finances is now to reduce taxation to the lowest point; second, to give the President wide and plenary authority to reorganize the Federal Government and to remove useless activities; third, have the Secretary of the Treasury refinance and refund at lower rates of interest the six or seven billion dollars of Government obligations that are outstanding at high rates of interest, and thus save to us $300,000,000; and, finally, for the Congress to hesitate long before it undertakes in such a period as this to lay a more galling burden upon the people in the form of taxes which they can not pay.

Mr. President, according to my view, the adoption of these four proposals would complete a program of Federal financing and Federal reorganization that would not only be of great public service to the people of this Republic but would meet with their whole-souled and whole-hearted approval.

Mr. ODDIE. Mr. President, a few moments ago I said that I would raise the point of order against this amendment. Since then I have been reliably informed that if a point of order should be sustained, as I believe it would be as legislation on the appropriation bill, it will be offered later to the economy section of the bill, in which event it might be ruled to be in order. With that condition in mind, I will refrain from making the point of order at this time.

Mr. VANDENBERG. Mr. President, I ask for the yeas and nays on the amendment of the Senator from New Mexico.

Mr. BRATTON. I thank the Senator from Nevada for his courtesy, because if the point should be made and sustained I would feel obliged to offer the amendment to the economy section and we would uselessly consume time in redebating the matter. It will expedite the passage of the bill, so let us vote it now; so I thank the Senator for cooperating to that end.

Mr. BARKLEY. Mr. President, I do not desire to delay a vote on this amendment for any length of time, but I do, in just a word, want to emphasize, if I can, the position taken by the Senator from Texas [Mr. CONNALLY] who has just spoken.

When we compare the condition of our Treasury and the aggregate expenditures of the United States Government at this time with the normal expenditures of the Government prior to the World War, it almost stuns me, and I am struck with the magnitude of the task of attempting in any way to bring about a reduction of the expenses of the United States of America.

We are now paying per annum much more in interest on our war debts than we paid out entirely for all governmental purposes in 1913, 1914, 1915, and 1916, prior to our entry into the World War. Outside of the Post Office Department, which was self-sustaining and cost about $350,000,000, it only cost a total of $650,000,000 to operate the entire machinery of all the departments and bureaus of the United States Government prior to the World War. We are now paying out about $750,000,000 a year for interest on our public debt.

Mr. BROOKHART. Mr. President——

The VICE PRESIDENT. Does the Senator from Kentucky yield to the Senator from Iowa?

Mr. BARKLEY. I yield.

Mr. BROOKHART. If we wanted some real economy, I will ask the Senator if it would not be a good thing to replace those bonds with non-interest-bearing Treasury notes.

Mr. BARKLEY. If the Senator wants a categorical answer to that question, I should say no; I do not think so. I have not time to go into that subject, however. I have only 15 minutes.

Mr. BROOKHART. We would save the interest in that way, would we not?

Mr. BARKLEY. Of course, we would save the interest, but we probably would create a situation like that which existed in Germany when I was there in 1921. I had a $100 American bill that I wanted to get changed. I took it across the street and had it changed, and it took two wheelbarrows to bring back to the hotel the money that I got for it. [Laughter.] I do not want that to occur to our own currency in the United States.

Mr. BROOKHART. Yes; I was through that German situation myself, but that was an unlimited money issue. I am not talking about that.

Mr. BARKLEY. The Senator has asked a very profound question, and I have not time to discuss it. In the next place, we could not swap our interest-bearing bonds that are now in the hands of the public for non-interest-bearing bonds unless the present holders would be willing to accept them. We could not force them upon them.

What I rose to say, however, was not along that line. We are now paying out on our war debt about a billion and a quarter dollars a year in interest and annual amortization. It is costing about $700,000,000 a year to operate the Army and the Navy; and whether we be for a large Army or Navy or for a small Army or Navy, we might as well admit that we can not make any very great economies in the Army and the Navy under present circumstances. We are expending about $900,000,000 for veterans' relief, and we all know in our own minds whether there is any chance to make much of a reduction in the amount of money we are paying out for compensation and hospitalization to war veterans.

That leaves only about $1,000,000,000 of the normal expenses of the United States where we can bring about any economy whatever. If we are not willing to vote to instruct the heads of all these departments to reduce the total amount of our expenses at least 5 per cent, then we are not in favor of any economy at all, and we might as well quit talking about it and pass the bills as they are sent over here by the House and adjourn and go home.

I am going to vote for this amendment. I am sorry the reduction called for by it is not 10 per cent instead of 5 per cent. I should be glad to vote for a 10 per cent reduction. I am going to vote for the amendment to this bill authorizing the incoming President to reorganize, coordinate, and eliminate wherever he can; and I hope he will use not only a pruning knife but a meat ax when he gets into power.

That is the only way we are ever going to reduce the Government expenses. We see how hard it is to do it here on the floor of the Senate. We know how hard it is in committees, and we know how hard it is on the floor of the House of Representatives. We know that unless it is done in a very drastic way, by somebody who has the centralized power to do it, we never will accomplish anything in behalf of the taxpayers of this country.

Mr. CONNALLY. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Kentucky yield to the Senator from Texas?

Mr. BARKLEY. I yield to the Senator from Texas.

Mr. CONNALLY. It will have to be done by some centralized authority like the President, who has not all these industries and activities in his own State?

Mr. BARKLEY. Of course the President is the only man who can do it, regardless of whether he has industries in his State or not. Of course he has all of them within his constituency, in a broad sense, when he is elected President of the United States.

Mr. NORRIS. Mr. President, I was called out of the Chamber on a conference committee just before this amendment was offered. I have just returned to the Chamber. I have not heard the amendment read, and I have heard but little of the discussion. I should like to have the amendment stated.

The VICE PRESIDENT. The amendment will be stated in the Senator's time.

The legislative clerk restated the amendment on page 46, line 7.

The VICE PRESIDENT. The Chair will state to the Senator from Nebraska that a similar amendment was offered to the Post Office section of the bill, and unanimous consent was given to consider the two amendments together.

Mr. NORRIS. Is not this the Post Office appropriation bill that we have before us?

The VICE PRESIDENT. It is the Treasury and Post Office appropriation bill. One of the two amendments applies to the Treasury part of the bill, and the other to the Post Office part of the bill.

Mr. NORRIS. I do not know who offered the amendment. I should like to inquire who offered it.

Mr. BRATTON. Mr. President, I offered it.

Mr. NORRIS. I should like to ask a question or two. Why does the Senator divide his proposal into two amendments?

Mr. BRATTON. Because one part of the bill makes appropriations for the Treasury Department, and the other part makes appropriations for the Post Office Department. At the appropriate place in each bill I offer an amendment directing the Secretary of the Treasury in the one instance, and the Postmaster General in the other, to reduce the expenditures at least 5 per cent under the total amount appropriated.

Mr. NORRIS. Still it seems to me, notwithstanding we have two departments that we are appropriating for here, that the Senator could draft the amendment so that it would be only one amendment.

Mr. BRATTON. It could be done, Mr. President; but in the one instance we must exclude the fixed charges for the acquisition of sites and the construction of public works.

Mr. NORRIS. Why not decrease the appropriation for the acquisition of sites?

Mr. BRATTON. Because in the economy act we already have reduced those appropriations 10 per cent.

Mr. NORRIS. The economy act, however, is part of this bill, is it not?

Mr. BRATTON. I am referring to the economy act of last year, which is permanent law.

Mr. NORRIS. I was referring to the economy portion of this bill.

Mr. BRATTON. In the economy act of last year, which is permanent law, the appropriations for public buildings were reduced 10 per cent.

Let me say to the Senator that each amendment directs the head of the department in question to reduce the expenditures at least 5 per cent under the total appropriated in the bill, and in making such reductions he shall do it in a manner calculated to bring about the greatest economy in expenditure consistent with the efficiency of the service. In the case of the Post Office Department the reduction is slightly more than $35,000,000. In the case of the Treasury Department it exceeds $9,000,000. The two savings combined, if these amendments are adopted together, will be more than $45,000,000.

Mr. NORRIS. Mr. President, I am not asking these questions in any critical sense. It seems to me that there is a practical objection to having them separate. I believe the Senator could draft an amendment that would put them together.

Suppose we adopt one of these amendments to-day, and before the bill is disposed of to-morrow, or next day, we vote on the other one and reject it.

Mr. BRATTON. They are offered together, and unanimous consent has been given to consider and vote on them together.

Mr. NORRIS. Oh, I was not aware of that. I thank the Senator.

Mr. SMITH. Mr. President, may I ask the Senator from New Mexico a question?

The VICE PRESIDENT. The Senator from Nebraska has the floor.

Mr. NORRIS. I did not know I had the floor. If I have, I desire to make a few remarks.

Mr. President, it seems to me that the amendment offered is a practical one. I am not sure that it ought to be voted on now, however, unless we have disposed of all the other amendments that are going to be offered to this appropriation bill.

Mr. BRATTON. Mr. President, if the Senator will yield, permit me to say that the amendment is couched in terms of percentage. In other words, the 5 per cent will operate on whatever sum is in the bill as finally passed and approved.

Mr. NORRIS. Yes; I understand, but if we agree to this amendment now it probably will have a very material effect upon the various votes that are taken on other amendments that will be offered hereafter. It ought to have been the last amendment to be voted on.

Mr. President, while I have the floor I should like to say that whether we vote on this matter now or wait until we dispose of all other amendments we are confronted with practical difficulties, not any difficulty of theory. I have not any doubt but that every single Member of the Senate and the House also is in favor, and honestly in favor, of economy and wants to reduce the appropriations as much as a reduction can be had; but we have seen, not only in this session of Congress but in the preceding session of Congress, the practical results of trying to apply the theories of 96 men to an appropriation bill. We have found, I think, that it is almost impossible to do good work and carry out a plan of real economy.

For instance, in the amendment we have just voted on, some Senators felt that one of the most important things in the activities of the Government was keeping up the airplane activities, and that we were justified in giving a subsidy to various corporations for carrying the mail, using that as a means by which we could justify a governmental subsidy—because I believe as practical men we would have to agree that the airplane appropriation was, after all, a subsidy and nothing but a subsidy; that as far as the necessity of getting prompt delivery of mail within the limits of the airplane activities is concerned, there was really nothing to it. There was no delay of any material kind without airplane delivery of any mail. I do not want, however, to criticize the theory of using the mail to give a subsidy to the airplane. If I ever voted for a subsidy in my life, I would vote for a subsidy to the airplane in any normal times.

It seems to me, however, that we are now confronted with a proposition where we can not follow our own inclinations. If we are going to reach any just conclusion on economy, we must surrender to a great extent, at least, our own ideas of this particular governmental activity or of that. All of us will have to be willing to concede something in order to reach an economical result. Otherwise, we never will reach one.

I will very cheerfully vote for this amendment. I believe in it. Nevertheless, I anticipate that before this session is over, if we get some of the other appropriation bills here—for instance, the Army and the Navy appropriation bills—we shall be unable to apply any amendment of that kind to either one of those appropriation bills.

When I say that, I am not charging anybody with doing anything that he does not honestly and conscientiously believe ought to be done; and perhaps he may be right. He has an idea that one of the things we can not economize on is this thing or that thing, and he carries it out, as he ought to do, of course. Nevertheless, when we come to take all of the appropriations together, we have found from our experience that what will apply to one appropriation bill we will not be able to apply to another one.

Mr. BRATTON. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from New Mexico?

Mr. NORRIS. I yield to the Senator.

Mr. BRATTON. I may say to the Senator that it is my purpose to offer a similar amendment to each appropriation bill as it comes to us, and give the Senate an opportunity to vote on it.

Mr. NORRIS. Of course we have a practical difficulty along that line that I do not believe we can avoid. I see no way to avoid it. Those who are framing these appropriation bills, if they know that the Senate is going to adopt a general amendment like the one now before us to reduce in the aggregate the appropriations of the bill, can easily meet that contingency by bringing in an appropriation bill with larger appropriations, so that they could stand the 5 per cent cut and still get all they want. I do not know how to obviate that difficulty.

Mr. President, I do feel that unless we can have a reasonable assurance that we are to apply the same methods to every appropriation bill that is to follow this one, I would not be one who would be anxious to apply it to this bill or any other appropriation bill. Unless we are going to treat them all alike, unless we are to enter upon the consideration of all these appropriations with the feeling that we must surrender some of our cherished ideas and our cherished notions for the good of the country, facing this depression, I do not care to try to make a haphazard job of it and apply it to some, and have no application of it to others.

I was interested in a debate which occurred on an amendment involving the aviation question. I probably ought to have said, before that amendment was voted on, that I should not want the Government to go back on a contract that had been legally made by an officer having jurisdiction; and although I voted for the amendment, and did so with the idea that if upon further study it was discovered that we had done such a thing by voting the amendment out, we would have plenty of time before the 1st of July to rectify the mistake. Yet it is hard for me to admit that we must in that kind of a case be helpless. If that is true, we have our hands tied for the future; we have our hands tied by contracts in which the greatest financial institutions of the country have a direct financial interest; our hands are tied for the future, and we must give to them their pound of flesh. While millions of people are suffering for the necessaries of life, we must give to them the luxuries of life.

I have on my desk before me a letter written by a representative of a corporation operating airplanes, and in that letter he narrates how some of these contracts were entered into by airplane corporations for carrying the mail. I have nothing but his word in the letter, I have no other evidence of it, but I have no reason on earth to doubt the truth of his statement; and if he tells the truth, some of these contracts which we have voted out of the bill were entered into without notice—not only entered into without notice, but they were entered into in the face of the fact that this particular corporation for which this man writes had offered to enter into contracts and carry the mail for one-half of what is being charged.

Mr. President, I want to read one or two extracts from the letter. I admit that before we should act on this kind of evidence we ought to make the proper investigation, but the letter came to me at my desk here while the debate was going on, and it had something to do with my vote on that proposition, because I realized that this appropriation will

not go into effect until the 1st of next July, and if we have made a mistake we will have plenty of time to rectify it.

The PRESIDENT pro tempore. The time of the Senator from Nebraska has expired.

Mr. NORRIS. I shall have to read the letter when discussing some other amendment.

Mr. COPELAND. Mr. President, I wish the Senator would read me that letter. I am anxious to hear what the writer says.

Mr. NORRIS. In answer to the query of the Senator from New York——

The PRESIDENT pro tempore. The Chair is informed by the clerk keeping the time that the Senator from New York has used up all his time on the amendment.

Mr. NEELY. Mr. President, I offer an amendment to both the amendments which have been presented and ask that it be read.

The PRESIDENT pro tempore. The clerk will state the amendment to the amendment.

The LEGISLATIVE CLERK. The Senator from West Virginia proposes to add at the end of each of the amendments the words "but in no event shall any employee whose salary does not exceed $2,000 a year be affected by the provisions of this paragraph."

Mr. NEELY. Mr. President, if the amendments which are now before the Senate are adopted, if history repeats itself, as I suspect it always will, the reductions will be made at the expense of the employees who are receiving salaries of $1,400 to $1,800 a year. As a rule, they do not have as many influential friends to protect them as do those who are in the higher brackets. In order that those employees may be protected by the very phraseology of the amendment I hope that the amendment to the amendments I have offered will be adopted.

Mr. HALE obtained the floor.

Mr. BINGHAM. Mr. President, will the Senator yield?

Mr. HALE. I yield.

Mr. BINGHAM. Mr. President, I want to call to the attention of the Senator from Nebraska the fact that the law which Congress passed provided that bids shall be submitted to those who have operated for two years and shown, by their successful operation of a line of more than 250 miles, their ability to operate. I had nothing to do with writing the law, but I understand the reason for putting in that provision was that frequently people got a contract not knowing how much it would cost to operate the line, and after two months or so they would give it up and the public service would suffer thereby.

Mr. NORRIS. Mr. President, will the Senator from Maine yield to me?

Mr. HALE. I yield.

Mr. NORRIS. I would like to say, in reply to what the Senator from Connecticut has said, that I was familiar with that provision of the law; I read it this afternoon; but my correspondent states that his corporation was an existing one, that it was in business, and had been for several years, although it had not been carrying the mail. That much is true. But he goes farther and states that these contracts were let without any advertisement, without any notice, even after the department knew that they could have the mail carried, according to their stipulations, for half the sum they were giving to the people who got the contract.

Mr. HALE. Mr. President, things are coming to a strange pass in our Government when, not content to do as we are about to do—namely, turn over to the President of the United States the practically unlimited right to reorganize our Government, we are to follow that up, as we are about to do on this bill, with a provision allowing a Cabinet officer to cut down the appropriations we have made in this body and to cut them down in any way he sees fit.

I realize from my own correspondence the pressure under which we are all laboring to make us economize, and I agree with the Senator from Nebraska that practically everybody in the Senate and in the House wants to economize. I think we could probably economize in a more efficient manner if we were willing to pass certain legislation which has already been referred to this body, but very clearly we are not going to do anything of the sort at this session of the Congress.

Now comes this proposal of the Senator from New Mexico. Undoubtedly, if the Senate adopts it, as it will, and it is agreed to by the House, it will cut down the expenditures of the Government. But whether it will do so wisely or not remains to be seen.

The President of the United States, who has been trying to bring about economy and who has gone into the subject very thoroughly, tells us that to only a very limited extent can the appropriations recommended in the Budget be cut down by the Congress without interfering with the existing law, or with obligations of the Government. In his recent message he stated that not over $461,000,000 of appropriations were available on which cuts could be made outside of the Army, Navy and District of Columbia bills.

In this computation the President included a certain salary reduction which had been recommended by him. Without that reduction the amount would be about $500,000,000, instead of $461,000,000.

These cuts suggested by the Senator from New Mexico in the Post Office part of the pending bill amount to about $35,000,000, in the Treasury part of the bill to about $9,000,000. If Senators will look at the report on the Treasury part of the bill, they will see that the appropriations amount to $244,000,000, and from that is to be taken, by the Senator's amendment, the public-building fund of $50,000,000. That would bring it down to $194,000,000, substantially. Also, in the Treasury part of the bill appears an item of $55,000,000 for refunds. If the Government is to meet its obligations, those refunds will have to be made in full, and we will have to take that amount away from the $194,000,000, leaving about $140,000,000.

The amount for the pay and subsistence and allowances of the Coast Guard, amounting to $18,000,000, can not further be cut down, and, of course, there are other irreducible items which I can not give you at the moment. So that the cut will have to be made in the Treasury on some amount slightly over $100,000,000, and instead of being a 5 per cent cut of the total amount, it will be a 10 per cent cut in the administrative features of the bill.

I am afraid that by going ahead and following out the suggestion of the Senator from New Mexico and adopting his amendment we will put ourselves in a position of seriously crippling the Government of the United States. This is really a matter of far more importance to Senators on the other side of the Chamber than to those on this side of the Chamber, because their party is the one which will have to administer the Government during the next four years.

I realize that, with the temper of the Senate as it is at present, there is no possibility of defeating the amendment of the Senator from New Mexico. I do want to say, however, and I want it distinctly understood, that whatever the case may be with the other appropriation bills, I do not believe that we can possibly cut down 5 per cent the appropriations for the Army and for the Navy without seriously crippling the national defense of the country, and with world conditions as they are at present, we are in no condition to do that. I do not want to prevent action on the amendment. I am one of those who wants to see the appropriation bills passed, and passed as soon as possible.

The PRESIDENT pro tempore. The question is on agreeing to the amendments proposed by the Senator from West Virginia to the amendment of the Senator from New Mexico.

Mr. NORRIS. Mr. President, I understand the Senator from West Virginia has offered an amendment that is now pending. Is that correct? I have spoken on the amendment of the Senator from New Mexico.

The PRESIDENT pro tempore. The Chair understood the Senator from West Virginia to offer his proviso at the end of each of the amendments proposed by the Senator from New Mexico. The Senator from Nebraska is recognized for 15 minutes.

Mr. NORRIS. I am speaking now on the amendment offered by the Senator from West Virginia. My remarks, of course, will have a very direct bearing upon that amendment.

Mr. President, when I was interrupted by the Presiding Officer and cut off in the middle of a sentence at the expiration of my 15 minutes on the amendment of the Senator from New Mexico, I was about to read extracts from the letter which I had described at that time. Now I will proceed where I left off at that time.

This letter in part says:

Last year air mail service was established between Omaha and Watertown, S. Dak.—

I would be glad if Senators would notice that particular line on the map on the wall of the Chamber—

We made a great effort to get this service, offering to carry this mail and equip our line exactly as required, for a much less sum than is being paid the United Air Lines (formerly the Boeing Co.) which was given this contract. Prior to letting the contract promises were made to us by both the United Air Lines and the Post Office Department, none of which were ever kept or fulfilled. The contract was given to the United Air Lines on the ground that it was an extension of their line and not a new branch line. How this can be an extension I do not know, as their eastern terminal has always been the city of Chicago and their western terminal in the city of San Francisco. This contract was let without asking for bids or allowing any other line to compete for the business. All this passed into history some months ago and now comes another deal of the same kind.

I presume it might be argued that that was an extension of the line, although Senators can see upon the map that the company which got the contract had an eastern terminal at Chicago and a western terminal at San Francisco. The new line from Omaha to Watertown, S. Dak., was not an extension of that line in my judgment, although we might concede for argument's sake that it could be called an extension. In other words, the airplanes did not come from Chicago to Omaha and go up to Watertown, back to Omaha, and on west again. Whatever mail they carried was unloaded at Omaha and had to be picked up by another airplane which carried it to Watertown.

It seems to me, therefore, there is something in the argument which the competing line makes; at least it seems to me their argument is good if it is true, and I do not doubt that all this was done without advertisement, without any possibility of anybody else competing, and done in the face of the fact that the other company, equipped as well as was the Morgan company to carry the mail, offered to do the work for much less money than was paid to the favored Morgan line.

The letter continues:

For several years air mail has been carried between Omaha and St. Louis via Kansas City by American Airways, and between Kansas City and St. Louis there has been double service, the Transcontinental and Western Air coming into Kansas City from the Southwest and proceeding to St. Louis.

That has no direct bearing on the point I want to make, but it is fairly introductory to what I want to read now:

A few days ago the Post Office Department announced the discontinuance of the double service between Kansas City and St. Louis and the awarding of the north end of the route, Omaha to Kansas City, to United Air Lines (Boeing Co.) without asking for bids or anyone knowing anything about it.

This is the same route over which we have operated a passenger line for three years, and the United Air Lines have never operated in any way over the route, Omaha to Kansas City. On learning what was about to take place we wired the Postmaster General several times concerning the matter, offering to furnish the service for one-half the sum paid to the American Airways, the former contractors. Of course, no attention was paid to these telegrams.

It would seem that this corporation, engaged in the operation of airplanes, not having any subsidy, not getting anything from the Government, has for three years been operating over this line, operating from Omaha south to Kansas City, Mo. Equipped as the writers of the letter are and as they have been for the carrying of passengers from Omaha to Kansas City and return, with the Morgan Line having no line out of there, then the Post Office Department delivers to the Morgan Co. a contract to carry the mail over this route already supplied with passenger service by the line that offered to do the work for half the sum if they would let them have the contract.

It all indicates that the Post Office Department in the air mail business is not acting in an economical way for the benefit of the taxpayers of the United States and is not fair to competing lines. Here was a line already established, operating back and forth, ready to carry the mail at one-half the cost paid to the company which was carrying mail through from Chicago to San Francisco.

Under these circumstances and with these facts as I believe them to exist, the Senate was justified in striking out the entire appropriation. But, Mr. President, there is only one possible reason in my humble judgment why that should not be done in these distressing times; and that is that if we have a contract which legally binds us, we will probably have to carry it out. Whatever we do about the airplane business, I maintain that it is not a necessity. The law providing for the carrying of the mail, as I believe every fair-minded man looking at it in a fair way will agree, provides a subsidy pure and simple, perhaps justified under ordinary conditions, but absolutely unjustified when we are on the verge of seeing our Government go into bankruptcy. The first thing we know, under the bankruptcy bill which we will probably pass in a few days, we will have Uncle Sam himself making the first application to have a receiver appointed for the United States Government!

Something must be done to preserve our governmental institutions and our governmental activities. When we find a department is letting such contracts as it is quite evident are being let for the carrying of the mail, not a necessity, and granting a subsidy in these times under the circumstances which I have just related, it would seem to indicate that we are justified in striking out the entire appropriation.

The PRESIDENT pro tempore. The question is on the amendment of the Senator from West Virginia to the amendment of the Senator from New Mexico.

Mr. NEELY. I demand the yeas and nays.

Mr. BLAINE. Mr. President, may we have the amendment to the amendment reported?

The PRESIDENT pro tempore. It will be reported for the information of the Senate.

The LEGISLATIVE CLERK. Add at the end of each of the amendments offered by the Senator from New Mexico the following:

But in no event shall any employee whose salary does not exceed $2,000 a year be affected by the provisions of this paragraph.

Mr. BARKLEY. Mr. President, it seems to me the amendment practically nullifies the effect of the amendment offered by the Senator from New Mexico. Not only that, but it flies in the teeth of the economy act which passed the last Congress.

Mr. NEELY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kentucky yield to the Senator from West Virginia?

Mr. BARKLEY. I yield.

Mr. NEELY. If the observation just made by the Senator from Kentucky is correct, and I do not question it, then one made by the sponsor of the two amendments to which my amendment was offered is incorrect, because he said he did not believe that his amendment would result in the reduction of salaries.

Mr. BARKLEY. Of course, I do not know whether it will or not. I supported it in good faith, regardless of whether it does or not.

Mr. NORRIS. Mr. President, may I interrupt the Senator?

Mr. BARKLEY. Certainly.

Mr. NORRIS. While talking about the particular amendment, I neglected to say what I should like to suggest now to the Senator from Kentucky. I am in entire sympathy with the amendment, and still I am sorry he offered it because the President will have authority and will undoubtedly take all of these things into consideration. There may be places

in the Government where men are drawing $2,000 a year where the salaries ought to be reduced.

Mr. ROBINSON of Arkansas. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kentucky yield to the Senator from Arkansas?

Mr. BARKLEY. Certainly.

Mr. ROBINSON of Arkansas. There also may be places where men are drawing $2,000 a year salary where their services are not at all needed.

Mr. NORRIS. That is true.

Mr. ROBINSON of Arkansas. This amendment would prevent the incoming administration from dismissing such employees; that is to say, after a place has been filled it would be difficult to discharge an employee; but if we are going to require by law that all persons who have been employed under the present administration shall be continued in service if they draw over $2,000 salary, we will render ineffective the provisions for the consolidation of bureaus and for the abolition of functions. For that reason I think the amendment is inconsistent with the amendment of the Senator from New Mexico.

Mr. BARKLEY. Not only that, but the head of some department, in attempting to carry out the 5 per cent reduction in good faith, may be confronted with the dilemma of either reducing somebody's compensation or discharging him entirely. Without being able to reduce the number of compensations, he might keep any given number of people at work; whereas if he could not reduce them, he might be confronted with the necessity of discharging them entirely. I think if the Senator from West Virginia will think it over, he will find that his amendment is liable to do more harm than good.

The PRESIDENT pro tempore. The question is on the amendment proposed by the Senator from West Virginia [Mr. NEELY] to the amendment offered by the Senator from New Mexico [Mr. BRATTON].

Mr. NEELY. I ask for the yeas and nays.

The PRESIDENT pro tempore. On this question the yeas and nays are demanded. Is the demand sufficiently seconded?

The yeas and nays were ordered, and the legislative clerk proceeded to call the roll.

Mr. HEBERT (when his name was called). Again announcing my pair with the Senator from North Carolina [Mr. BAILEY], I withhold my vote.

The PRESIDENT pro tempore (when Mr. MOSES's name was called). The present occupant of the chair has a general pair with the senior Senator from Louisiana [Mr. BROUSSARD]. He being absent, and the present occupant of the chair being uncertain as to how he would vote, the present occupant of the chair withholds his vote. If permitted to vote, he would vote "nay."

The roll call was concluded.

Mr. ROBINSON of Indiana. I have a general pair with the junior Senator from Mississippi [Mr. STEPHENS], who is unavoidably absent from the Senate. In his absence I withhold my vote. If permitted to vote, I should vote "yea."

Mr. MCKELLAR (after having voted in the negative). I have a pair with the junior Senator from Delaware [Mr. TOWNSEND]. I transfer that pair to the senior Senator from Missouri [Mr. HAWES] and will let my vote stand.

Mr. BRATTON (after having voted in the negative). I transfer my pair with the Senator from Nebraska [Mr. HOWELL] to the Senator from Tennessee [Mr. HULL] and will let my vote stand.

Mr. FESS. I wish to announce the following general pairs:

The Senator from Kansas [Mr. CAPPER] with the Senator from Nevada [Mr. PITTMAN];

The Senator from New Hampshire [Mr. KEYES] with the Senator from Oklahoma [Mr. THOMAS];

The Senator from Wyoming [Mr. CAREY] with the Senator from Louisiana [Mr. LONG];

The Senator from Vermont [Mr. DALE] with the Senator from Arkansas [Mrs. CARAWAY];

The Senator from Illinois [Mr. GLENN] with the Senator from Virginia [Mr. SWANSON]; and

The Senator from Idaho [Mr. THOMAS] with the Senator from Montana [Mr. WHEELER].

Mr. ROBINSON of Arkansas. I wish to announce that my colleague [Mrs. CARAWAY] is necessarily detained on official business.

Mr. WAGNER (after having voted in the affirmative). I transfer my pair with the Senator from Missouri [Mr. PATTERSON] to the Senator from Washington [Mr. DILL] and will let my vote stand.

Mr. DAVIS (after having voted in the negative). I transfer my pair with the Senator from Kentucky [Mr. LOGAN] to the Senator from California [Mr. SHORTRIDGE] and will let my vote stand.

Mr. NORRIS. I desire to announce that my colleague [Mr. HOWELL] is absent on official business.

Mr. GLASS. I desire to announce that my colleague the senior Senator from Virginia [Mr. SWANSON] is detained from the Senate on official business. He has a general pair with the Senator from Illinois [Mr. GLENN].

Mr. SHEPPARD. I desire to announce that the Senator from Massachusetts [Mr. WALSH] is necessarily detained on official business.

The result was announced—yeas 20, nays 47, as follows:

YEAS—20

Ashurst	Copeland	Hayden	Shipstead
Black	Costigan	Johnson	Smith
Blaine	Cutting	La Follette	Steiwer
Brookhart	Frazier	Neely	Wagner
Bulow	Hatfield	Nye	Walsh, Mont.

NAYS—47

Austin	Davis	Kean	Russell
Bankhead	Dickinson	Kendrick	Schall
Barbour	Fess	King	Schuyler
Barkley	Fletcher	McGill	Sheppard
Bingham	George	McKellar	Smoot
Borah	Glass	McNary	Trammell
Bratton	Goldsborough	Metcalf	Tydings
Bulkley	Gore	Norris	Vandenberg
Byrnes	Grammer	Oddie	Walcott
Connally	Hale	Reed	Watson
Coolidge	Harrison	Reynolds	White
Couzens	Hastings	Robinson, Ark.	

NOT VOTING—29

Bailey	Hawes	Moses	Thomas, Idaho
Broussard	Hebert	Norbeck	Thomas, Okla.
Capper	Howell	Patterson	Townsend
Caraway	Hull	Pittman	Walsh, Mass.
Carey	Keyes	Robinson, Ind.	Wheeler
Dale	Lewis	Shortridge	
Dill	Logan	Stephens	
Glenn	Long	Swanson	

So Mr. NEELY's amendment to the amendment of Mr. BRATTON was rejected.

The PRESIDENT pro tempore. The question recurs to the amendment offered by the Senator from New Mexico.

Mr. BLAINE. Mr. President, it is not my purpose to delay a vote upon this amendment, but to me the amendment embodies a rather strange proposal. The Congress of the United States makes appropriations for the various departments. This amendment proposes to authorize and direct the agency for which the appropriations are made to make a reduction of 5 per cent. Since the Congress is the governmental agency, the constitutional authority to make appropriations, having that authority, it is very strange indeed that Congress should pass this authority on to the agency of the Congress.

I assume that the amendment would not be subject to a point of order if it were offered to the economy features of the pending bill; and if it were offered as an amendment to the economy provisions, then the Senate would be in a situation whereby it could harmonize the economy reductions and the proposed reductions by adopting the amendment offered by the Senator from New Mexico. Therefore, Mr. President, it seems to me this amendment is subject to a point of order as new legislation on an appropriation bill, conferring special authority upon the Secretary of the Treasury in the one instance and in the other instance upon the Postmaster General. I make the point of order against the amendment.

The PRESIDENT pro tempore. The point of order is sustained.

Mr. ASHURST. Mr. President, I offer an amendment at this time, if I am in order.

The PRESIDENT pro tempore. The bill is on its second reading, and the amendment is in order.

Mr. ASHURST. On page 76 of the bill I move to strike out section 11.

The PRESIDENT pro tempore. Under the agreement the Senate is proceeding with this bill by titles; that title has not yet been reached, and the amendment is not yet in order.

Mr. ODDIE. Mr. President, I move that the Senate take a recess until 12 o'clock to-morrow.

Mr. BARKLEY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nevada yield to the Senator from Kentucky?

Mr. ODDIE. I withhold the motion.

Mr. BARKLEY. Mr. President, if the Senator from New Mexico does not take an appeal from the decision which the Chair just rendered, I myself intend to take an appeal.

The PRESIDENT pro tempore. The Chair having upheld the point of order made by the senior Senator from Wisconsin, there seems to be some question on the floor whether an appeal will be taken from the ruling of the Chair.

Mr. BRATTON. If I may do so, I do appeal from the ruling of the Chair.

The PRESIDENT pro tempore. The Senator from New Mexico appeals from the decision of the Chair. The question is, Shall the ruling of the Chair stand as the judgment of the Senate?

Mr. BARKLEY. Mr. President, is that question debatable?

The PRESIDENT pro tempore. Oh, yes.

Mr. BARKLEY. Mr. President, I do not want to take the floor from the Senator from New Mexico if he desires it; but if he does not wish to speak at this time, I wish to make an observation about it.

Mr. BRATTON. I will follow the Senator from Kentucky.

Mr. BARKLEY. Mr. President, ordinarily I have great regard for the rulings of the present occupant of the Chair.

The PRESIDENT pro tempore. Before the Senator from Kentucky proceeds, may the Chair state that he sustained the point of order for the reason that he thinks in the form of words in which it was presented it was clearly legislation upon a general appropriation bill inasmuch as it proposed to add new duties to the head of an executive department.

The Chair, however, will go farther and say that the amendment might have been submitted in another form of words which would have made it a limitation upon an appropriation, and therefore in order; but in the form of words in which it came before the Senate and upon which the Chair had to rule, the Chair is clearly of the opinion that it is legislation upon an appropriation bill and therefore not in order.

Mr. NORRIS. Mr. President——

The PRESIDENT pro tempore. The Senator from Kentucky has the floor.

Mr. NORRIS. I desire to ask a question of the Chair.

Mr. BARKLEY. I yield to the Senator from Nebraska.

Mr. NORRIS. I do not want to take up the time of the Senator from Kentucky.

The PRESIDENT pro tempore. No; this time, being taken on an appeal from the Chair, is not in connection with the bill.

Mr. NORRIS. Very well.

As I understand, there is a part of the bill, known as the economy part of the bill, that is in itself legislation. If this amendment, in the same form in which the Senator from New Mexico has offered it, were offered to that part of the bill known as the economy part of the bill would it then be in order?

The PRESIDENT pro tempore. The President pro tempore would think so.

Mr. BRATTON. Mr. President, will the Senator yield in order that I may propose a unanimous-consent agreement?

Mr. BARKLEY. I yield to the Senator.

Mr. NORRIS. Then may I interrupt the Senator from New Mexico or the Senator from Kentucky, if he has the floor?

Mr. BARKLEY. I yield to the Senator.

Mr. NORRIS. Why not, to save time, offer the amendment at another place in the bill, affecting legislation that itself would not be in order under ordinary circumstances, and yet that would make this amendment in order and save the debate on an appeal?

Mr. BARKLEY. As far as I am concerned, I shall yield to the wishes of the Senator from New Mexico. I rose simply to reserve the right to take an appeal, because I did not know whether he intended to do so or not.

The PRESIDENT pro tempore. The Senator has already done so.

Mr. BARKLEY. I am willing to yield the floor to the Senator from New Mexico.

Mr. BRATTON. Mr. President, we have debated this amendment for about two hours. It was suggested earlier, about an hour ago, that the amendment might be subject to a point of order; but inasmuch as we had consumed an hour in debating it, and it obviously would be in order to the economy section of the bill, it would save time to go ahead and vote on the two amendments together. Logically, they belong at the respective specified places in the bill; and, with great respect to the distinguished Presiding Officer—whose skill in parliamentary procedure is unquestioned except on this occasion—I think the amendment is a limitation.

I wonder, however, if the Senator from Wisconsin, who made the point, and others who would not consent that we vote on the amendment as an amendment to the economy section of the bill, instead of having to devote probably two hours more of the time of the Senate in debating it. It is just a question as to where the amendments now being considered together come in the text of the bill. That is all that the point made by the Senator would accomplish. Since those of us who are interested in the amendment have now exhausted the subject by consuming two hours of the time of the Senate, would not the Senator from Wisconsin consent that we go ahead and vote on it as an amendment to the economy section of the bill?

Mr. BLAINE. Mr. President, will the Senator yield for a statement and a suggestion?

Mr. BRATTON. Certainly.

Mr. BLAINE. First, I want to make it plain in the RECORD that during the discussion on this particular amendment I was in the Chamber most of the time.

Let me suggest to the Senator from New Mexico that the senior Senator from Nebraska [Mr. NORRIS], in debating this amendment, placed particular emphasis upon the proposition whether or not, if the proposed amendments to the present bill are adopted, all other appropriation bills would be treated in the same way. Neither the Senator from New Mexico nor any other Senator, of course, can give any guaranty on that proposition.

Mr. BRATTON. Certainly not.

Mr. BLAINE. He can not give any assurance to that effect. Therefore, in order to carry out what I believe to be in the mind of the Senator from New Mexico, so that the provisions for reduction contained in the amendments may become a part of the permanent law so far as appropriations are concerned for the next fiscal year, why should not the amendments be made a part of the economy measure, thus assuring that the provisions of the two amendments offered would attach to all appropriation bills alike? Then we would not have to spend any more time in discussing these amendments when the Army and Navy bills come along, and the Department of Justice bill, and the Agricultural Department bill, and the Interior Department bill, and the various other bills that will be reported.

Mr. BRATTON. Because these two amendments would not have that effect if they were attached to the economy section of the bill or anywhere else. Their text would be the same wherever they appear in the bill.

Mr. BLAINE. But the proposals of the two amendments would have the same effect in the economy part of the bill if the Senator would redraft the amendments so as to make them general legislation affecting all appropriation bills, exactly the same as the economy provisions are going to affect all appropriation bills.

Mr. BRATTON. That could be done, of course.

Mr. BLAINE. I suggest that that be done in the interest of expedition.

The PRESIDENT pro tempore. The question before the Senate is the appeal from the ruling of the Chair.

Mr. BRATTON. Is that debatable, Mr. President?

The PRESIDENT pro tempore. Oh, yes. The Chair has already said that.

Mr. BRATTON. Then, having the floor, I shall exercise that privilege for a short while.

Mr. President, as I said before, and I repeat now, in all seriousness, the skill of the present occupant of the Chair in parliamentary procedure is recognized everywhere; but I think the ruling in this case is an error, because this amendment is a limitation on the particular appropriation. The effect of it is to curtail the appropriation by 5 per cent. It is a limitation upon the appropriation to that extent. It suspends the power of the department in question to expend 5 per cent of the amount carried in this particular appropriation bill. That is all it does. It simply says that if, for instance, the appropriation is a million dollars, as to $50,000 of it the appropriation shall not be expended. It is essentially a limitation upon that part of the appropriation. It does not affect the other part. As to the $950,000 appropriated by the bill, it can be spent in the manner specified; but as to the $50,000, it is a limitation upon that by denying the privilege of expending it.

It seems to me that the amendment is purely, simply, solely, and exclusively a limitation upon the appropriation bill. Upon the appeal I ask for the yeas and nays.

Mr. BARKLEY. Mr. President, in support of the contention of the Senator from New Mexico [Mr. BRATTON], I wish simply to read this amendment and comment on it in a word or two.

As I read the amendment, it does not contain any general legislation whatever. It does not direct the Postmaster General to change any law now in existence as the basis for appropriations carried in this bill. It merely says:

> The Postmaster General is authorized and directed to make such reductions in the expenditures—

That is, in the aggregate amount. It does not authorize him to cut anybody's salary. It does not direct him to do it. He might do it, of course, in preference to discharging somebody, as a means of carrying out this reduction of 5 per cent; but the amendment does not direct him to do it. It does not direct him to discharge anybody in the Post Office Department. It does not direct him or give him any authority to change a single basic law under which the Post Office Department operates.

The amendment merely directs and authorizes the Postmaster General to make a 5 per cent reduction in the total, aggregate expenses carried in this bill. In that sense it seems to me purely a limitation, because there is not a sentence nor a word in the amendment that can be pointed out that changes any law, or directs the Postmaster General to change any law, or to do anything else except in a general way to work such economies in the department as will bring about a 5 per cent reduction.

Mr. BLAINE. Mr. President, will the Senator yield for a question?

The PRESIDENT pro tempore. Does the Senator from Kentucky yield to the Senator from Wisconsin?

Mr. BARKLEY. I yield.

Mr. BLAINE. But the Senator will admit that under that authority the Postmaster General could reduce any employee's salary 5 per cent.

Mr. BARKLEY. He has that authority already, under the economy act that we passed in the last session, by furloughing. He may bring about this 5 per cent economy by furloughing employees in the department. He might do it by readvertising for bids on contracts under the department in the hope that a smaller contract could be awarded. In any way that he sees that he can bring about economies by reduction in expenses, he is authorized to do it. In the purchase of supplies for the Post Office Department, whether by competitive contract or whether they are simply purchased in the open market, he might be able to bring about this entire 5 per cent economy. He might be able to do it by a reduction in the cost of the supplies or on contracts which are not fixed by law, in which he has a discretion.

Mr. BLAINE. Mr. President, will the Senator yield for another question?

Mr. BARKLEY. I yield.

Mr. BLAINE. Of course either department could do that very thing, without any authority from the Congress, by refusing to purchase, and thus reduce the total amount expended.

Mr. BARKLEY. Yes; of course.

Mr. BLAINE. With respect to the employee under the economy bill, the reduction may be made, as I understand, by the furlough; but this is 5 per cent reduction in addition thereto that may be made upon the actual salary that is paid. That is, the Postmaster General is authorized to do it; he is directed to do it, and he may do it, as the Senator, I am sure, will admit.

Mr. BARKLEY. He is authorized in general language to bring about a general reduction of 5 per cent; but he is not specifically directed by this amendment to reduce any man's salary, or to discharge any man. Therefore this amendment is not in violation of the law, because it does not authorize the Postmaster General to change the fundamental law that governs the operation of the Post Office Department.

As I understand the rule to be, an amendment must be general legislation of such a kind as to change the existing law on the subject before it is in violation of the rules of the Senate.

Mr. BLAINE. Another question: The Postmaster General or the Secretary of the Treasury can not go beyond the economy measure passed at the last session respecting the system by which reductions are made, the furlough plan. The Senator will admit that.

Mr. BARKLEY. No; I do not admit that, because I think it is not only the duty but the obligation of the head of every department, without any amendment of this sort and without any specific authority, when he finds that a reduction can be made in the expenses of the Government, to do it; and they are doing it in all the departments now. When they find that they have more people employed than are necessary, they have the authority to discharge them. Congress does not have to specify every particular employee in any department who is kept on the rolls for an indefinite length of time, or who is compelled to be discharged at any particular time.

Mr. BLAINE. Evidently I have not put my question very clearly. The Senator does not contend that the Postmaster General or the Secretary of the Treasury can grant a longer or shorter furlough under the economy plan of the last session.

Mr. BARKLEY. I will say that he could not compel a longer furlough than that carried in the bill.

Mr. BLAINE. Exactly. Now, the result of this provision is to amend the economy act of the last session, authorizing and directing the department head to make a reduction. Therefore he is authorized and directed, if he so chooses, to reduce salaries 5 per cent.

Mr. BARKLEY. It is entirely conceivable that he may make the entire 5 per cent reduction without touching the salary of anybody at all.

Mr. BLAINE. Oh, that is true; but he may make and is directed to make a 5 per cent reduction, which means that he may apply it to salaries only.

Mr. BARKLEY. There are so many ways in which economy can be brought about, in the rent of buildings under the jurisdiction of the Post Office Department and otherwise, that I think he can bring it about without affecting the salary of anybody in the department.

Mr. BLAINE. Then why have this amendment at all if that is true?

Mr. BYRNES. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kentucky yield to the Senator from South Carolina?

Mr. BARKLEY. I yield to the Senator.

Mr. BYRNES. The existing economy act authorizes the furloughing of an employee for an indefinite period, in addition to the 24-day furlough which is specifically provided.

Mr. BARKLEY. Yes.

Mr. BYRNES. And the provision that 5 per cent of the appropriations for the Post Office Department shall not be expended does not thereby give to the Postmaster General the right to change the existing law as to the salaries fixed in the classification act. He can furlough employees under this provision for an indefinite period.

Mr. BARKLEY. That is only one of the many ways by which this 5 per cent reduction can be brought about without any change of the fundamental law.

The PRESIDENT pro tempore. Before stating the question, the Chair thinks it is desirable for him to state, in order that it may go into the book of precedents, regardless of what the decision of the Senate may be, the grounds upon which the point of order was sustained.

This is a question which has often arisen in both Houses of Congress, and especially so since the Budget legislation, and among all the precedents which have been established is one set up in another place where, in the course of a ruling by Chairman Tilson in Committee of the Whole, he said, referring to the present junior Senator from Texas [Mr. CONNALLY], then a Member of the House of Representatives:

> The gentleman from Texas [Mr. CONNALLY], in an argument made to you on either this amendment or one very similar to it, stated the rule as clearly as the Chair is able to state it, or even more so. I cite from the proceedings of January 19, 1923, page 1979. Mr. CONNALLY said:
>
> "Now, if the Chair please, my understanding of a limitation of an appropriation is as follows: In the face of a point of order Congress can only appropriate in an appropriation bill for purposes already authorized by law. The Congress can appropriate for all purposes authorized by law or appropriate for none of the purposes authorized by law. Within those limits Congress can limit an appropriation. Congress can say that no part of an appropriation shall be expended for a part of the purposes which the law authorized. But a limitation must be absolutely negative. It must be in the nature simply of a veto. It can not direct an executive officer in the dicharge of his duties under existing law. Whenever it does it ceases to be a limitation and becomes legislation in violation of the rule."

The Chair ruled shortly ago in these words, referring to the amendment offered by the Senator from New Mexico:

> He thinks in the form of words in which it is presented it is clearly legislation upon a general appropriation bill inasmuch as it adds new duties to the head of an executive department.
>
> The Chair, however, will go farther and say that the amendment might have been submitted in another form of words which would have made it a limitation upon an appropriation, and therefore in order; but in the form of words in which it came before the Senate and upon which the Chair had to rule, the Chair is clearly of the opinion that it is legislation upon an appropriation bill and therefore not in order.

From that opinion the Senator from New Mexico appealed, and the question is, Shall the decision of the Chair stand as the judgment of the Senate?

Mr. CONNALLY. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. CONNALLY. Does the Chair regard himself as being bound by the decision he has just read?

The PRESIDENT pro tempore. The Chair does in the present instance, under the form of words in which the amendment has been offered.

Mr. CONNALLY. Does the Chair regard the Senator from Texas as being bound by his former views?

The PRESIDENT pro tempore. The Chair can not possibly set precedents of honor or procedure for the Senator from Texas.

Mr. ODDIE obtained the floor.

Mr. BINGHAM. Mr. President, will the Senator yield to me?

Mr. ODDIE. For just a moment.

Mr. BINGHAM. Mr. President, there has been troubling me all day a recollection of the speech made this morning by the Senator from Maryland. It seemed to me that somewhere in my distant childhood I had heard that speech made before. He stated that he had been deserted by those on his side of the aisle and that those on this side of the aisle had likewise deserted him. I knew I had heard that story before, and I appealed to the junior Senator from Oklahoma [Mr. GORE], who with his wonderful memory was able to give me the reference, and I would like to take just a second to read it. It is found in the Book of Job, Chapter I, verse 19:

> And, behold, there came a great wind from the wilderness and smote the four corners of the house, and it fell upon the young men, and they are dead; and I only am escaped alone to tell thee.

Mr. TYDINGS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nevada yield to the Senator from Maryland?

Mr. ODDIE. I yield for a question.

Mr. TYDINGS. I want the Senator to give me an opportunity to reply to the Senator from Connecticut.

Mr. ODDIE. I yield, if it is to be a brief reply.

Mr. TYDINGS. I was wondering whether the wind to which the Senator from Connecticut referred was the wind that blew on election day in 1932. If it was, then I can understand how the Senator has turned to the Bible in his declining senatorial term.

RECESS

Mr. ODDIE. I move that the Senate take a recess until to-morrow at 12 o'clock.

The motion was agreed to; and the Senate (at 5 o'clock and 50 minutes p. m.) took a recess until to-morrow, Thursday, February 2, 1933, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 1 (legislative day of January 10), 1933

PROMOTIONS IN THE NAVY

Commander Rufus W. Mathewson to be a captain in the Navy from the 23d day of October, 1932.

Commander Augustin T. Beauregard to be a captain in the Navy from the 8th day of November, 1932.

Lieut. Commander Robert R. Thompson to be a commander in the Navy from the 8th day of November, 1932.

The following-named lieutenant commanders to be commanders in the Navy from the 1st day of January, 1933:

Walter S. DeLany.

Emory P. Eldredge.

Lieut. Ernest H. von Heimburg to be a lieutenant commander in the Navy from the 5th day of January, 1933.

Lieut. (Junior Grade) William A. Bowers to be a lieutenant in the Navy from the 1st day of March, 1932.

Lieut. (Junior Grade) Joseph H. Garvin to be a lieutenant in the Navy from the 1st day of July, 1932.

Lieut. (Junior Grade) Joseph E. Wolowsky to be a lieutenant in the Navy from the 1st day of October, 1932.

Lieut. (Junior Grade) John N. Opie, 3d, to be a lieutenant in the Navy, from the 1st day of December, 1932.

Lieut. (Junior Grade) Aurelius B. Vosseller to be a lieutenant in the Navy, from the 14th day of December, 1932.

Lieut. (Junior Grade) John R. Ruhsenberger to be a lieutenant in the Navy, from the 1st day of January, 1933.

Lieut. (Junior Grade) Alfred J. Bolton to be a lieutenant in the Navy, from the 18th day of January, 1933.

Ensign William B. Epps to be a lieutenant (junior grade) in the Navy, from the 6th day of June, 1932.

Assistant Dental Surgeon William D. Bryan (temporary) to be an assistant dental surgeon in the Navy, with the rank of lieutenant (junior grade), from the 3d day of January, 1933.

WITHDRAWAL

Executive nomination withdrawn from the Senate February 1 (legislative day of January 10), 1933

REGISTER OF THE LAND OFFICE

Elbert G. Laing, of Nebraska, to be register of the land office at Alliance, Nebr.

HOUSE OF REPRESENTATIVES

WEDNESDAY, FEBRUARY 1, 1933

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Most Gracious Father in Heaven, we thank Thee for Him whose voice is the music of heaven and whose word is the message of a righteous and a redeeming God. O do Thou increase the power of all agencies and movements that are seeking and laboring to lift the burdens of the unemployed and the unfortunate. With vigor and devotion may we seize the social law of mutual love and service. Let the teachings of the Master be turned loose until they overrun the homes and flood the firesides of our whole country. Inspire us to serve in lifting our fellows into the kingdom of peace and self-respect. As Thy glorious promises are to them that overcome, crown us this day with that strength of character that sustains in the hour of trial and temptation. Through Christ our Savior. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Latta, one of his secretaries, who also informed the House that on the following dates the President approved and signed a joint resolution and bills of the House of the following titles:

On January 24, 1933:

H. J. Res. 559. Joint resolution to exempt from the tax on admissions amounts paid for admission tickets sold by authority of the Committee on Inaugural Ceremonies on the occasion of the inauguration of the President elect in March, 1933.

On January 27, 1933:

H. R. 8750. An act relative to restrictions applicable to Indians of the Five Civilized Tribes in Oklahoma.

On January 30, 1933:

H. R. 14436. An act making appropriations to supply urgent deficiencies in certain appropriations for the fiscal year ending June 30, 1933, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1933, and for other purposes.

DISTRIBUTION OF COTTON TO RED CROSS

Mr. JONES. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill, H. R. 13607, to authorize the distribution of Government-owned cotton to the American National Red Cross and other organizations for relief of distressed, with Senate amendments, further disagree to the amendments of the Senate and agree to the conference asked by the Senate.

The Clerk read the title of the bill.

Mr. SNELL. Reserving the right to object, what is the difference now?

Mr. JONES. The only difference that seems to be a matter of contention is the different provision as to the paying off of the commercial liens against the cotton, and the carrying charges against it.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. JONES. I yield.

Mr. STAFFORD. Personally, I am much more in favor of the Senate amendment which would take $12,000,000 from the revolving fund, rather than have it deducted from the Treasury of the United States. I hope when the gentleman brings the bill back from conference, he will give the House an opportunity to express itself about having the money deducted from the revolving fund, rather than as provided in the House bill, having it taken out of the Treasury.

Mr. JONES. If the gentleman will read the Senate amendment carefully, he will find it provides for an appropriation for the full net market value of the cotton, and, in the long run, it will cost more than the House provision. However, the committee expects to get full information on that in conference.

Mr. STAFFORD. If the gentleman will permit, I examined in detail the report of the proceedings of the Senate on yesterday and the reason they reconsidered their vote. I was in sympathy with that principle, and I think the bill will go through much faster if we accept the Senate amendment.

Mr. JONES. Let me read the gentleman the first sentence of the Senate amendment:

> There is hereby authorized to be appropriated for credit to the revolving fund established by the agricultural marketing act an amount equal to the current market value of all cotton delivered to relief agencies under this act.

Thus the Senate amendment carries a larger appropriation than the House provision.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none and appoints the following conferees: Messrs. JONES, FULMER, LARSEN, HAUGEN, AND PURNELL.

INDEPENDENT OFFICES APPROPRIATION BILL, FISCAL YEAR 1934

Mr. WOODRUM. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 14458) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1934, and for other purposes. Pending that motion, Mr. Speaker, it was agreed yesterday that the gentleman from Pennsylvania [Mr. MCFADDEN] might have time to-day in general debate to answer certain charges made against him in the newspapers. I have an understanding with the gentleman from Washington [Mr. SUMMERS] that each of us will yield the gentleman from Pennsylvania [Mr. MCFADDEN] 20 minutes.

I ask unanimous consent, Mr. Speaker, that at the conclusion of the time occupied by the gentleman from Pennsylvania [Mr. MCFADDEN] general debate on the independent offices appropriation bill shall continue until 4 o'clock, the time to be equally divided between the gentleman from Washington [Mr. SUMMERS] and myself.

Mr. SUMMERS of Washington. Reserving the right to object, I think more time has been used on the other side of the aisle than on this side, and a great many Members have requested 15 minutes. Even if that time is reduced, I am not sure that one-half of the time remaining after the conclusion of the remarks by the gentleman from Pennsylvania [Mr. MCFADDEN] will accommodate all Members who have requested time on this side.

Mr. WOODRUM. Mr. Speaker, it is very necessary to get started reading this bill to-day if we finish it to-morrow. The Members of the House know how absolutely imperative it is to get these bills passed and to the Senate. We must finish this bill to-morrow. I hope the gentleman from Washington will get his colleagues, as I am getting mine, to cooperate with him in cutting down their requests for time.

Mr. SUMMERS of Washington. I have been cutting it down, but I do not know just how the time is divided between the two sides now.

Mr. WOODRUM. Mr. Speaker, I will modify my request that general debate shall continue until 4.30 o'clock to-day, and then I will ask the committee to allow us to read until 5.30.

Mr. UNDERHILL. Suppose we have a roll call in the meantime?

Mr. WOODRUM. Of course, that would come out of that time.

Mr. PATMAN. Reserving the right to object, we were very patient with the gentleman from Virginia [Mr. WOODRUM] yesterday when he was explaining the bill. I think

the gentleman consumed about two hours. He made a very fine, interesting speech, but the gentleman made some statements that I think should be explained by some of us who entertain contrary views. I think the gentleman should give us a chance to explain those items. I wonder if the gentleman has in mind allowing me some time?

Mr. WOODRUM. I told the gentleman from Texas a few moments ago that I would allow some time. I have not changed my mind since about two seconds ago.

Mr. PATMAN. The gentleman said he would try to, and it was rather doubtful. I should like to know if I shall get some time. Is that the understanding?

The SPEAKER. Pending the motion, the gentleman from Virginia asks unanimous consent that general debate on this bill close at 4.30 o'clock this afternoon, the time to be equally divided between himself and the gentleman from Washington [Mr. SUMMERS]. Is there objection?

Mr. PATMAN. Reserving the right to object, I hope the gentleman will give me some time on that to discuss the Veterans' Administration and the Federal Trade Commission.

Mr. WOODRUM. I may state that the gentleman was given time before our subcommittee, I think 20 or 30 minutes.

Mr. PATMAN. No. Ten minutes.

Mr. WOODRUM. I certainly have every intention of being courteous to the gentleman from Texas and to every gentleman so far as it is possible to be consistent with expediting consideration of the bill.

The SPEAKER. The gentleman from Virginia asks unanimous consent that general debate on the bill close at 4.30, the time to be equally divided between himself and the gentleman from Washington. Is there objection?

Mr. PARKER of Georgia. Mr. Speaker, reserving the right to object, does the request include the proposal that the debate be limited to the bill?

The SPEAKER. It is to be general debate.

Mr. PARKER of Georgia. Then, Mr. Speaker, I object. If debate were to be limited to the bill, I would have no objection.

Mr. WOODRUM. Mr. Speaker, I move that general debate on the bill close at 4.30 p. m., the time to be equally divided between the gentleman from Washington and myself.

Mr. BECK. Mr. Speaker, will the gentleman from Virginia withhold his motion long enough for me to present a unanimous-consent request?

Mr. WOODRUM. Mr. Speaker, I am glad to withhold the motion in order that the gentleman from Pennsylvania may present his unanimous consent request.

PERMISSION TO ADDRESS THE HOUSE

Mr. BECK. Mr. Speaker, I ask unanimous consent to address the House for two minutes.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. BECK. Mr. Speaker, last evening I had the privilege under the auspices of the National Committee on Civic Education of talking over the radio upon Congress. I endeavored in the course of that speech, which I believe was broadcast over a nation-wide hook-up, to discuss briefly and inadequately what Congress is not and I endeavored to remove the popular suspicion that Congress has either horns in its head or cloven feet. The speech was only novel in the fact that I had a good word to say for Congress. [Applause.]

My colleagues of the House may be interested in this speech which was made, according to the old medieval expression, as advocatus diaboli, and it may serve the further purpose that the numerous public, who read the CONGRESSIONAL RECORD, may have the evidence of a modest and inconspicuous Member of the House that it does not deserve the widespread criticism which it has always had from the very beginning of the Republic. I took occasion to say that in my judgment the House of Representatives was one of the most efficient legislative bodies in the world if it be measured by the many and complex problems with which it is compelled to deal. [Applause.]

Mr. Speaker, under the permission to speak to the House I ask unanimous consent to extend my remarks by adding the radio address in question.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The matter referred to follows:

HOW CONGRESS WORKS

(An address delivered by Representative JAMES M. BECK under the auspices of the Committee on Civic Education by Radio, over the National Broadcasting Co., on Tuesday evening, January 31, 1933)

My fellow citizens, the subject allotted to me this evening is your Congress. To many it will not be an agreeable subject, for it may be admitted that the Congress is not a popular body. It is the victim of much misrepresentation, and gets very little appreciation for its useful and most necessary work.

Within the time allotted to me I can not say much, for I am like the New York farmer who entered his farm nag in the Saratoga races and who, when asked to explain why the farm horse came in last, replied that "the course was too long and the time too short."

Our Constitution was formed at a time when the American people were greatly influenced by the traditions of the English revolution of 1689, which firmly established the supremacy of Parliament. Following those traditions, the purpose of the Constitution was to make the Congress the great council of the Republic and the Chief Executive the first servant of the people in carrying into effect its policies.

Of course the practice has long since diverged from the theory. The American people have long had great faith in the Executive and very little in Congress. They can make a legend of a President, but there is no human interest in a many-headed Congress.

Benjamin Franklin advocated a 1-chambered legislature; and in such critical times as those through which we are now passing, it might make for efficiency if Congress consisted only of a House of Representatives. But in normal times the requisite concurrent action of two branches to pass legislation, while it may not make for speed, does make for the greater consideration of security, as the mistakes of one House are often corrected in the other. It gives time for deliberation, and this is essential in good government.

The Constitution intended the House of Representatives to be the more important body, for it committed to it the most important matter of initiating all measures for the public revenues. In the Constitutional Convention of 1787, the Senate, far from being regarded as an upper house or a superior body, was consistently referred to as the second chamber. Moreover, the convention gave to the House of Representatives a greater moral authority in that it represented the American people by population, and the 2-year period of office made it more directly representative of the popular will.

The Congress has been the accepted theme for abuse from the beginning of our Government, and few are fair enough to recognize that our Congress, like the legislative bodies of every other nation, is, in this complex civilization, crushed under the weight of impossible burdens. While it has little of the pomp and ceremonial of an old-world legislature, yet it is a good cross section of American life, and measured by results it may not suffer in comparison with any other legislative body. It does the best it can under impossible conditions and deserves more of the confidence of the people than it actually receives.

Two features of the Constitution unhappily limit the efficiency of the House of Representatives. One is the short tenure of office, which is highly prejudicial to the spirit of statesmanship, for a Member no sooner takes his seat than he is confronted with the necessity of running in the primaries for his party nomination, and later, if successful, standing as a candidate of his party for election. He is, therefore, subjected to unceasing pressure of numerous bodies of men who may know little or nothing of the merits of a question upon which the Representative must vote according to his conscience and best judgment.

If the only result of this was to subject him to the constant pressure of a majority of his constituency, it might be tolerable, even though it is not in accord with the highest ideals of representative government. But in its practical workings, it means that the unhappy Representative must constantly bear in mind, if he desires to continue in the public service, the importunate demands of minorities in his constituency, who too often hold the balance of power, either in the primaries or at the general elections. We owe the primary system, not to the despised politicians, but to the misguided reformers, and no more destructive system was ever introduced into the politics of a democratic nation than the primary system.

Under these circumstances the marvel is that the House of Representatives is as efficient as it generally is.

It is obviously impossible for the House, or any Member, to consider intelligently all the many problems, some of them infinitely complex, that come before the Congress. Of necessity, the House must divide its work among some 30 committees, each of which has some special feature of Government work, and the real fate

of governmental policies is generally determined by these committees. Many of their members are experienced and patriotic men, who have made a close study of the subject committed to that committee, and, speaking generally, these committees function admirably.

The recommendations of a committee can be overruled by Congress, but this is infrequent, for the whole body of the House can not consider any question with the same care that a committee does. If the American people could view the work of these committees, which sit in the forenoon, and see with what earnestness and zeal they try to grapple with the impossible burdens of this great Republic, they would have a better opinion of Congress. But their conception of that body is generally influenced by the fact that when they view the proceedings of Congress from the gallery they carry away an impression of an apparent lack of orderliness and decorum. This, however, is only on the surface; and when the real work of the Congress is not done by committees, it is at least guided and greatly influenced by responsible leaders, and many of these are outstanding men, even if the country does not appreciate it.

The House of Representatives generally acts with great speed—often with too much speed. Occasionally there are opportunities for extended speeches, many of which are of marked ability; but when the time for action arises, a few hours is allowed for general debate and then the proposed law is considered, section by section, on a rule which forbids any Member to speak for more than five minutes.

My activities for over 40 years have been largely spent in the more leisurely and decorous atmosphere of the Supreme Court of the United States, but the fact that has most deeply impressed me since I became a Member of the House of Representatives is how much useful work is done, when bills are proposed for amendment, under a rule which forbids any Member to speak for more than five minutes. I question whether there is any legislative body in the world in which so much useful argument is compressed in short speeches as in the House of Representatives.

It is often suggested that the English Parliament has a distinct advantage over the American Congress in that no measure can come before the House of Commons except with the consent of the Cabinet, which controls the order of business. This is an error, for our Republic has the same advantage, although with a different method.

Apart from the great influence that the President has over Congress by reason of his party leadership, each branch of Congress is itself controlled by a Rules Committee, a majority of whom are adherents of the party which at the time controls the particular branch of Congress, and to a very large extent the Rules Committee determines the measures which Congress will be asked to consider and decide.

It is true that any Member can propose a bill, which thereupon goes upon the calendar; but, as the calendar is congested, thousands of proposed bills, while they may be referred to committees, never reach the floor of the House.

In this connection, I want to correct a misrepresentation to which publicists of this and other countries have given currency. It is often said that the Congress and the legislatures of the States pass each year hundreds of thousands of laws and that we are thus a grossly overgoverned Nation. So far as Congress is concerned, it adds very little to the substantive law of the Nation in any session. Nearly all the so-called laws that are passed are merely administrative measures and are largely fiscal in character. We are, in fact, a very conservative Nation in the matter of changing substantive law, although it is true that thousands of laws are proposed, most of them being merely duplicates, but the body of the law suffers little change from session to session. No proposal to change the rules of law can be acted upon unless it is favorably reported by a committee; and then only, speaking generally, can it be reached for a vote until the Rules Committee regards it of sufficient importance to include it in the schedule of the legislation. Thus, the Rules Committee, in effect, renders the same service as an English cabinet does in the House of Commons.

Moreover, this committee, if it thinks the legislation worthy of consideration by the House, assigns a specific day for its consideration, determines the length of time to be allowed for general debate (which is usually a matter of hours), and determines even the extent to which amendments can be proposed. When the time for general debate has been exhausted, then, within the limitations of the special rule, Members can offer amendments and can be heard as a matter of right for five minutes, and no more.

The result is, that outside of appropriation bills, nearly all great questions are debated and passed by the House of Representatives in not more than 2 days, often in 2 hours, sometimes in 20 minutes. It would greatly lessen the widespread criticism of Congress if the Senate were disposed to follow this example of the House, but it is the best judge of the propriety of its own methods, and it is not for a Member of the House to sit in judgment upon methods of the Senate which have the sanction of long usage.

The House is not wholly subject to the will of the Rules Committee; for, by a recent rule, if 145 Members (being one-third of the House) sign a petition to discharge a committee, which has proposed legislation under consideration, then the bill is brought up in the House for immediate consideration and action. Only 20 minutes are allowed for debate, and a vote is immediately taken as to whether the committee shall be discharged. If discharged, the measure is then before the House under the general rules, which allow a longer but still very limited opportunity for debate.

Until recently Congress was operated on the biparty system. If there be one fact that the events of the last 10 years have made clear, it is that democratic institutions can not function except through the party system. The German Republic is slowly crumbling because it has not a sufficient genius for democracy to govern through two or at most three parties, and the cinematographic rapidity with which the cabinets of France pass in and out of power is due to the same cause. Until recent years England and the United States have vindicated the practicability of democratic institutions by having two or at most three parties; and as long as party solidarity was thus maintained, popular government vindicated itself.

There is no more sinister and menacing development in our politics than the destruction of party government in Congress by the infiltration of both parties by large and organized groups and blocs, which have for their objective some special purpose, generally a selfish one, which they seek to attain at a sacrifice of every other consideration of the public welfare. In the last 10 years the integrity of the party system in our country has been largely destroyed; and if this continues, it may ultimately menace our institutions. A people will tolerate for a long while the evils of government, but a time may come when they will regard the destruction of a representative democracy as preferable to the perpetuation of intolerable evils. The sooner the American people wake up to this danger, the better it will be for them and their Government.

At present the results have been most prejudicial. Let any question arise in Congress, which affects the great objective of a bloc, and at once its members are disloyal to their party, and its influence is destroyed. The two great historical political parties of America, while they often indulge in political shadow boxing, are at heart patriotic and could cooperate with each other effectively for the common good, but they can do nothing when the solidarity of each party is broken by a bloc. The failure to pass a general sales tax in the last session is the most recent example.

The result of the bloc system in many nations has been the destruction of democratic institutions in everything but in form. If democracy means anything, it means the rule of the majority. To-day such rule is largely a fiction. In the primaries a minority often governs by holding the balance of power. The same is true at the general elections, and the same is true in Congress, where a minority group often dictates to both parties the policies of the Nation.

Much more could be said, and much more I should like to say, but time forbids. Unless we can revive the essential spirit of democratic institutions, then, the very foundations of the Republic may slowly crumble. There are, to-day, only too many evidences of the slow settling of our constitutional fabric. The American people are confronted with a greater peril than an unbalanced Budget, for the danger to-day is that of an unbalanced constitutional system, resulting in unbearable evils to the public good, and justifying the fear that the time may come, when the essential spirit of a republic, namely, faith in its wisdom and justice, will be destroyed.

INDEPENDENT OFFICES APPROPRIATION BILL, 1934

The SPEAKER. The gentleman from Virginia moves that all debate on the pending bill close at 4.30, the time to be equally divided between himself and the gentleman from Washington.

The motion was agreed to.

Mr. WOODRUM. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 14458) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1934, and for other purposes.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 14458, with Mr. RAYBURN in the chair.

The Clerk read the title of the bill.

Mr. WOODRUM. Mr. Chairman, I yield 20 minutes to the gentleman from Pennsylvania [Mr. MCFADDEN].

Mr. SUMMERS of Washington. Mr. Chairman, I yield 20 minutes to the gentleman from Pennsylvania [Mr. MCFADDEN].

Mr. MCFADDEN. Mr. Chairman, I am very much obliged to the honorable gentlemen from Virginia [Mr. WOODRUM] and from Washington [Mr. SUMMERS] for yielding me 40 minutes of time. On the 23d of January, I rose to defend my rights as a Representative on a question of personal privilege. The Speaker of the House then ruled that published articles attacking me for having impeached Mr. Hoover, President of the United States, violated my rights, and I was accorded time in which to make a communi-

cation. Upon that occasion, in the course of my remarks, points of order were raised. It was stated that a quotation from a speech made in the House of Commons did not come within the scope of my privilege. Mr. Chairman, the interruptions interfering with my task of making the House acquainted with the peculiar manner in which my rights had been invaded, I took my seat. If I went beyond my privilege in anything I said upon that occasion, it was not done for the purpose of extending the privilege. I proceeded according to my best judgment in regard to what might justly be communicated to the House.

Mr. Chairman, I have a high regard for the office I hold. I have a high regard for the rights of every Member of the House and for the House of Representatives as a whole. This respect for the House of Representatives and for the Constitution, by the grace of which we come together here, counseled me to claim my privilege a second time, and I did so yesterday, with the result that the honorable, just, and impartial Speaker of the House read into the RECORD a statement to the effect that my rights had been violated by the published articles to which I had called attention and by other articles of like tenor which assailed me in my capacity as a Member of the House of Representatives.

Mr. Chairman, the House of Representatives has once again affirmed the rights of the representatives of the people. The House of Representatives has once again served notice on those who would disparage any one of us that we may not be attacked or maligned or libeled when we act here as representatives of the people of the United States. All the people in the United States are represented here and it is here that the sovereignty of the people is made manifest. The great principle of human liberty has been defended here by the elected representatives of the people for over a hundred years and no man or group of men can with impunity deride us when as Members of this body we act in our representative capacity under the Constitution.

Mr. Chairman, it has been reaffirmed in this, one of the greatest deliberative bodies in the world, that the motives of a Member when he rises here to a question of constitutional privilege to defend the integrity of the Government may not be questioned or his privilege limited. Mr. Chairman, it has been demonstrated here for all people to know and to understand that it is a proper and constitutional proceeding for a Member to move here for an investigation of the official conduct of any President of the United States when, in his opinion, the circumstances require it. I came here as a young man and I have grown old and gray within these walls. I have seen Presidents come and go. One I admired; and one I truly loved; but there has never been a President in the White House and there never will be a President there while I am here that would not have been, or that will not be, impeached by me if I find or have reason to believe that he is exceeding the limits of his constitutional powers or acting in any manner whatsoever against the honor and integrity of the Government and the rights of the people.

When we enter this body we are required to take an oath of office. That oath is not a mere formula. It is not a fair-weather promise. It is not a part of an entertainment staged here at the beginning of Congress to be forgotten as soon as uttered or to be evaded when it is needed. It is a definite undertaking. It is a prescribed oath. It is an oath which is as old as the Government itself. It is the oath upon which the Union and the flag of the Union rests. Here it is in the words of the statute:

> I do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion, and that I will well and faithfully discharge the duties of the office on which I am about to enter. So help me God.

That oath, Mr. Chairman, I intend to keep. When I rise here in defense of the Constitution I rise in defense of the Union. If my disclosures are inconvenient and embarrassing to those who have touched pitch and have become defiled by it, nevertheless I will fulfill the obligations of my office. I will keep my oath.

When Montagu Norman, governor of the Bank of England, came to the United States in the late summer of 1932, when it was said that he had come from England under the name of Clarence Skinner, the American correspondent of the London Observer indicated that his visit was ill timed and suggested that "common human kindliness" would have caused him to defer it since there was reason to believe that his visit might defeat Mr. Hoover in the presidential election.

So you see, Mr. Chairman, we have come to the place where the conspiracy is so well known that when Montagu Norman comes here in disguise to hold a secret meeting with Mr. Hoover, President of the United States, doubts are expressed as to the timeliness of his visit. It is feared that the people of the United States may become suspicious and demand an explanation. It is feared that his visit may arouse suspicions that will defeat Herbert Hoover in the presidential election.

Mr. Chairman, although England now regards this country as a land which is in strict economic subjection to the British Empire, it is nevertheless a dangerous thing for the agent of a foreign power to come here secretly for the purpose of executing a sinister design by connivance with the President of the United States.

The visit of Montagu Norman to the United States last August coincided with a visit paid to this country by Andrew W. Mellon, Ambassador to Great Britain. At Washington, on August 28, 1932, Mr. Mellon denied all knowledge of Montagu Norman's visit to this country. He said he had not known when he left England that Montagu Norman intended to come here. On August 29, 1932, the State Department informed the press that there had been no conference between officials of the State Department and Montagu Norman during his visit. On that same day, or within the next two days, Mr. Ogden Mills, Secretary of the Treasury, when asked if he had conferred with Montagu Norman, looked peevish and answered that there would not be so much talk about Montagu Norman's visit to this country if a political campaign were not under way.

On all sides, it was strenuously denied that Montagu Norman's surreptitious visit here was anything other than a holiday jaunt. It was denied that he had transacted any business here with officials of the United States Government. Those denials were uttered for the purpose of deceiving the people of the United States and preventing them from discovering that Montagu Norman was in consultation with the Executive here during the week ending August 28, 1932.

Mr. Chairman, when Montague Norman surreptitiously came here in disguise last August for the purpose of consulting Herbert Hoover, President of the United States, he transacted business here which was very profitable for England. Upon his return to England he was publicly thanked for the services he had rendered Great Britain while he was here. When he was asked by an Englishman to state whether or not the Bank of England had paid the expenses of his frequent trips to the United States he evaded the question.

Mr. Chairman, before citizens of the United States are invited to pay any more tax money into the United States Treasury it is imperative for us to let them know what the relationship between Montagu Norman and the President of the United States is at the present time and what business Montagu Norman transacted with the President of the United States last summer when "common human kindliness" would have suggested that he refrain from approaching Mr. Hoover during the presidential campaign.

Mr. Chairman, what did Montagu Norman receive when he came here surreptitiously last August? What control over the Federal Reserve Board and the Federal reserve banks is Montagu Norman exercising at the present time?

By all means, let us balance the Budget, but first let us balance the record. Let us find out who has received the immense sums of money which have been drained out of this

country and the United States Treasury during the Hoover administration. Some one received it, and those who have it now are the proper persons to interview in an attempt to balance the Budget.

Mr. Chairman, my charges of impeachment against Herbert Hoover in so far as they relate to Montagu Norman's connection with the so-called Hoover moratorium are fully borne out by Montagu Norman himself in a book, the publication of which he sanctions. I quote the following extract from that book.

President Hoover is understood to have intimated to the British Government that he intended to propose a one year's moratorium, but he was undecided as to the form in which the proposal should be presented. The question was discussed on the occasion of the Chequers meeting in June between the British and German Prime Ministers and foreign secretaries. It is a well-known fact that Mr. Norman attended that meeting, but few people are aware of the important part he played there. * * * Mr. Henderson's personal idea was to put President Hoover's proposal through the apparatus of the League of Nations. Although Mr. MacDonald himself did not like this proposal, several members of the Labour Government supported Mr. Henderson. Anyone acquainted with the cumbersome nature of league procedure must realize what the choice of that solution would have meant. * * * The idea of the League of Nations dealing with questions of war debts would in itself have been extremely unpopular in the Middle West. * * * Mr. MacDonald was well aware of these considerations, but Mr. Henderson insisted upon his proposal.

It was at this stage that Mr. Montagu Norman's advice was called in, and he threw the full weight of his authority in favour of suggesting to President Hoover that he should make a direct proposal to all Governments concerned. * * * He succeeded in convincing the Government that it would be a fatal mistake to arrange the matter through the league. He was equally opposed to the suggestion that a solution should be sought within the framework of the Young plan. * * * It is a historical fact that it was the weight of Mr. Norman's advice that turned the balance of opinion within the Government in favour of advising President Hoover to take the course he actually took.

His intervention was not the act of a mere technical expert, but of a statesman who was fully aware of the immense consequences of his action. Indeed, it may be said without exaggeration that but for his influence the Hoover moratorium, which was the most important act since the treaty of Versailles, would not have produced its immense effect upon the course of events. * * * Nevertheless it would be a mistake to underestimate the significance of the moratorium. It was the first departure from the rigid attitude adopted by the United States in the matter of war debts and the first admission that these debts are connected with reparations. There is no doubt that the Hoover moratorium was the beginning of the end of reparations, and war debts. And there is no doubt that Mr. Montagu Norman has played a decisive part in this.

Mr. Chairman, is there nothing in this of shame and humiliation for the United States, the proud land given to us by our great ancestors? Was it for this that Washington's men at Valley Forge went barefoot in the snow? Was it for this that men broke their backs lifting heavy wagons over the Cumberlands in the long-drawn agony of the Civil War? Was it for this that a Democratic President conscripted millions of young Americans and sent them overseas to make the world safe for democracy? Were all of this Nation's great endeavors to come in the end to nothing more than foreign dictation by a jealous foreign foe?

Mr. Chairman, concerning the unlawful efforts of Herbert Hoover, President of the United States, to obtain a reduction of the debt owed by England to the United States, it has been said that England would be able to obtain financial advantages here by means of arguments which, while they might not appeal to the Middle West, would appeal to the more informed and responsible section of opinion in the United States.

Mr. Chairman, this slur against the people of the Middle West was uttered in the British Parliament as a direct result of Hoover's unlawful attempts to deprive the people of the United States of the money which is lawfully due to them from Great Britain. The people of the United States are being deceived and cheated out of the war debts by Herbert Hoover's unlawful activities. Our people have had a gigantic banking swindle practiced upon them so that they would fall into a condition of misery and despair and in that condition be led by false propaganda to give up their just claims.

Mr. Chairman, the taxpayers of the United States will not pay $10,000,000,000 or any other sum through the future years as a result of the Hoover conspiracy against them. The people who boarded the British tea ships in Boston harbor will not come under the lash of England. The American people have been put on the auction block and knocked down by Hoover to his European friends, but it is one thing to sell out a free people and another to deliver them. The people, not the banks, are sovereign here, and so long as our Treasury is controlled by the Bank for International Settlements, acting as "the executive agent" of an international political conference which was conceived in a conspiracy against the people of the United States, the people will be well within their rights if they refuse to pay taxes into it until steps are taken to bring the men who entered into that conspiracy to justice. When Herbert Hoover declared the moratorium in June, 1931, and in connection therewith had the seven-power conference called at London in July, 1931, and sent Andrew W. Mellon and Henry L. Stimson to it to represent the United States, and when those two Cabinet officers of his administration carried out his instructions and entered into an agreement to put the financial affairs of the United States under the control of foreign nations, with the Bank for International Settlements acting as their executive agent, the foulest injury that could be done to the United States was accomplished.

In 1931, when Herbert Hoover declared the moratorium and had the 7-power conference called at London to take over financial control of the United States, the Washington correspondent of the London Times described his actions as follows:

WASHINGTON, July 17.—At the urgent request of Mr. Hoover, General Dawes has agreed to curtail his stay in Chicago and will sail on the *Mauretania* on July 22. As announced by Mr. Hoover yesterday afternoon, Mr. Mellon has been asked to accompany Mr. Stimson to London. In spite of the guarded attitude which it must maintain with the object of allaying domestic suspicion in regard to the possible outcome of this new "European entanglement," the administration recognizes that the scope of the coming conference is likely to be extremely wide and that its decisions will in all probability involve major questions of United States policy. Having screwed its courage to the sticking point in making the momentous decision to take part in the conference on equal terms with European powers, the administration is endeavoring to insure that its representation at the conference be full and effective.

The excitement aroused here by the decision to participate in the conference is almost equal to that aroused by the Hoover proposal. It is the general opinion that by way first of the Hoover plan and now the London conference United States policy toward the outside world is undergoing a change so rapid and so radical that it would have seemed incredible only a few weeks ago. In official statements the administration leaders necessarily emphasize and reemphasize the belief that this is purely an "emergency conference." They repeat, too, that the problem is a "banking problem," not a political one. But the soothing pretense that the United States representatives will not necessarily have to take part in political as well as "purely banking" discussions in London is only half-heartedly maintained.

The administration is perfectly aware that in trying to reach any durable plan for dealing with the present emergency much wider questions, involving far-reaching political and economic readjustment, are almost certain to be raised. It is known that the administration has considered the possibility of the scaling down of the interest rate on the British debt to the United States, which is no higher than the rate on the latest domestic issues. At the same time there exists in the mind of Mr. Hoover himself, first, an almost passionate desire to see a successful plan for disarmament worked out; and, secondly, a very firm conviction that the problem of disarmament is and ought to be, closely related to the problem of debt reduction.

It is a shameful thing for us to have an administration which can justly be described in the fashion of the foregoing article. It is a humiliating thing for us to have an administration which spreads false and misleading information among us. It is a disgraceful thing for us to have for an administration the one which mendaciously asserted that the London conference was purely an "emergency conference" and not a political one, when in reality the London conference was one of the most important international political conferences that has ever taken place, and, for us, the most sinister.

Mr. Chairman, I am against secrecy and furtiveness in the conduct of this Government and its affairs. What is done at Washington should be seen. What is said here should be heard. The people of the United States own this

Government. They pay the bills. Why should attempts be made to deceive them?

On July 10, 1932, a day or two after the Lausanne conference, which was secretly directed by Herbert Hoover, President of the United States, made its provisional decision and entered into its so-called gentleman's agreement, the London Observer published the following comment on the activities of the State Department at Washington:

The State Department, while awaiting official confirmations, is ceaselessly endeavoring to soothe excited Senators and Congressmen, who throng the building seeking news, opinions, and precedents.

Mr. Chairman, the Washington correspondent of the London Observer is more in the confidence of Henry L. Stimson than we are. How many excited Senators and Congressmen knew on that day when they called at the State Department that they were being soothed by Stimson and cajoled into silence and flattered into acquiescence? It will be news to most of them, in my opinion.

In connection with the position in which the United States has been placed by the acts of Herbert Hoover in declaring a moratorium and having the 7-power conference called at London to receive his proposal from Henry L. Stimson, I point out the following matter which appeared in the New English Weekly on July 14, 1932:

The ball, or shall we say the buck, has now been passed to America; and we can not but objectively admire the skill with which it has been placed.

A world conference held under the auspices of England alone and with a divided Europe as a factor would have permitted America to attend and do nothing further about it.

But by producing the semblance of a Christian agreement among the nations of Europe and by inviting the League of Nations to convoke the world conference, it will be exceedingly difficult for America to appear in anything but the rôle of Shylock under cross-examination by the whole of the rest of the world.

The choice of an authority, moreover, for the custody of the proposed German bonds is an additional constraint upon the present unwillingness of American public opinion to forego payments as the expense of higher taxes.

The Bank for International Settlements, closely interwoven, as it is, with the League of Nations, will in all probability become, from its custody of the German bonds, the central bank of all the central banks of the world. In so far as American financiers desire to play on the world's green tables, it is eventually by the good will of the Bank for International Settlements that they will be permitted to do it.

What is then more probable than that, after the election, be the new President Republican or Democrat and be public opinion in America what it may, the agreement registered at Lausanne last week will be indorsed and confirmed by the American delegates at the forthcoming world conference?

It is by no means, however, smooth sailing or easy steering. America, no doubt, for all her policy of "isolation," is extremely susceptible to world opinion.

A world united under the League of Nations, with its cashier in attendance to accept signatures on the dotted line, will be hard for America to refuse.

On the other hand, the incalculable and the unreasonable happen just as often in America as elsewhere and perhaps more often. Should the unexpected occur and America decline to indorse the policy of the league, the result must be left to be guessed. We do not choose to put it into words.

Mr. Chairman, the United States should not only refuse to sign on the dotted line; it should refuse to participate in the proposed world economic and financial conference. The United States should remember George Washington's advice and get out of Europe.

Mr. Chairman, the world economic and financial conference will meet under the contract surreptitiously entered into by Stimson and Mellon at the London conference, in July, 1931. It will meet as a result of an act of high treason perpetrated against the United States by Herbert Hoover. It will be a conference at which the Bank for International Settlements will function in its new power as "the executive agent of international political and financial conferences." The Bank for International Settlements will compel economic and financial obedience to its resolutions. The whole force of certain of the disarmament proposals is to give to the Bank for International Settlements concentrated international military power to enable it to enforce the decrees of its principals. The program for the world economic and financial conference as the Bank for International Settlements has arranged it is outlined in an article which was published in the London Times of November 14, 1932, as follows:

The twenty-sixth session of the board of the Bank for International Settlements will open to-morrow, when various reports on the new functions of the bank as executive organ of international conferences will be discussed. The first report will be presented by Doctor Trip (who is president of the Netherlands Bank and also president of the preparatory committee for the world economic conference) and will summarize what has been agreed upon so far by the committee. This includes the following points: (1) All resolutions of the conference must be applied simultaneously by the contracting countries; (2) all trade restrictions imposed since the world depression must be repealed or modified; (3) protective tariffs must be brought down to a reasonable level; (4) facility shall be given for the payment of debts by the export of goods or services; (5) the "most-favored-nation" principle must be maintained; (6) for the central and east European countries preference agreements will exceptionally be admitted; (7) the program of the international labor office for public works for unemployed relief is considered to be of great utility, but will require study on its financial side.

Thus it has already been agreed upon that all resolutions of the world economic and financial conference must be applied simultaneously by the contracting countries. If the United States does not bow to the wishes of the other countries, she will find herself hopelessly in the minority and faced by the "united front" which England has created in Europe, Asia, and Africa against her. If the United States does not accept what the other contracting countries decree as international law, the resolutions of the conference will be simultaneously applied against her. In other words, the United States will be punished by her European and Asiatic overlords.

Mr. Chairman, why should the Government of the United States abdicate in favor of foreign powers? Why should it surrender the independence our forefathers won for us? We are supposed to make our own laws, and now we hear that an international conference is to compel the United States to remove all trade restrictions, to lower its protective tariff, to accept foreign goods or services in payment of debt, to maintain the most-favored-nation principle, to make preferential agreements for certain countries which the conference will designate, to help to maintain an international labor office.

Mr. Chairman, I will have none of it, not if I am the first man to be shot resisting it. We will not internationalize the United States and give to any world economic and financial conference the right to dictate to us. We will not honor Mr. Hoover's contract with foreign powers. We will not sink to the level of a coolie country.

There is an issue here, and that issue is the Constitution. Are we to abide by it and to live under it or will we allow foreign nations to dismember us and to make of us a second India or another China? The day is rapidly approaching in the United States when the sheep and the goats will have to be separated. The men of the old order who stand in the light of Valley Forge will face the men who go muffled in foreign cloaks to meet the receiving agents of foreign powers at the Rapidan and on the soil of Canada and in the coastal waters of the United States.

Mr. Chairman, if the President of the United States is to be permitted to violate the Constitution, we shall not be respected either at home or abroad. Already complaints are being uttered in England against the Constitution of the United States. The English are saying that they have to pay for its peculiarities. Such disrespect is, in my opinion, a direct result of the unlawful conduct of Herbert Hoover. In this connection I quote the following article from a late issue of the Saturday Review, of London:

On cursing America with whole and full hearts, on a conviction that the demand for payment is not only inequitable but insane, Cabinet, Parliament, and people are wholly agreed. Even in the notorious Middle West, where, in the face of general ruin, there is a natural but ignorant belief in the usefulness of collecting money that can be squeezed out of one proud debtor, there should be no doubt about that.

* * * It is the price which they and we have to pay, as we have paid before, for the peculiarities of the American Constitution and the divorce of American reason and experience from the control of American affairs.

There is scarcely a man or woman in England who does not bear in the inner heart a positive dislike of America and Americans in the lump.

Thus speaks the harlot among nations, who will debase herself to any extent to get her fingers on another nation's wealth and stoop to any dishonor to avoid paying what she owes.

Mr. Chairman, if the day ever comes when England or any other foreign nation is able, by control of this Government, to secure a cancellation or a reduction of the war debts, that day our people will know that they have been delivered into everlasting bondage. Then "the long, long patience of the plundered poor" in this country will give way and there will be a disinfecting of certain Government premises here and a riddance of rats unparalleled in the history of the world.

Mr. Chairman, this is said to be an "ermine" winter in New York. Not in years have there been so many Russian ermine coats and such a lavish display of jewelry. Russian caviar is openly displayed in New York shop windows at $9 a pound. Orchids are being sold in New York at $10 apiece. When a lot of people lose their money and their homes and their farms and their children, a few people grow richer and richer. I see lost homes and foreclosed farms in those Russian ermine coats, long-petaled orchids, and diamond necklaces. While the predatory element in New York is thus adorning itself with gewgaws and stuffing itself on imported food, homeless men and boys these cold nights are carrying newspapers into outlying subway stations, trying to make beds for themselves on the cold, wet stone. Is it any wonder that the acting mayor of New York was moved to tears recently when he made a tour of the public shelters of the city and witnessed the sufferings of American citizens who have been broken on the wheel of the Hoover conspiracy? As a village skinflint will fight like a panther or a snake to get possession of a poor widow's cottage, so have the international bankers fought to get the last drop of blood out of the people of the United States. They have even taken public funds from the people's Treasury to finance the importation of the Russian ermine which is now being flaunted before the eyes of the unemployed.

Mr. Chairman, it was humiliating to the United States to have such men as the Labor Party deserter, Ramsay MacDonald, and Montagau Norman sent here by England to deal secretly with Herbert Hoover, President of the United States. MacDonald came to the Rapidan as early as 1929. Montagau Norman has come to various places at various times, not openly, but furtively, with the stealthy gait of a pickpocket.

If they had no business here, why did they come? When the Prime Minister of England left his residence and crossed the Atlantic to engage in secret conversations with the President of the United States, he had a deadly purpose in his heart. He came here in the interest of England. He did not come here to confer any benefit upon the people of the United States. He came to a friendly Nation, to a Nation that had saved England in the darkest hour of her existence, and he came to conspire against us. He came here to assist in the formation of a dishonest scheme for the cancellation of the war debt England owes to the United States.

Does the President of the United States, with his unlawful benefactions to foreigners, think that the people have no rights when they are betrayed? Does he think that the farmer has no rights when his farm and his livestock are taken from him? Does he think that the rights of such a man in this country are extinguished? Does he think that a veteran who has been forced to pay interest on a loan to a bank of rediscount which takes funds unlawfully from the United States Treasury—does he think that such a man has no rights here in his own country? Does he think that such a man can be compelled to sleep forever under culverts and to beg his way from door to door because he is an outcast in the country that gave him birth? Does he think that a boy who leaves home—telling his mother that there will be more food for the younger children if he goes away—does he think that that boy can be forced to accept the life of a tramp as his lawful portion under the Stars and Stripes? If that is what Mr. Hoover thinks, he is wrong. The people have rights here and rights which must speedily be enforced.

On January 13, 1848, in a speech on the floor here, Abraham Lincoln said:

Any people anywhere being inclined and having the power have the right to rise up and shake off the existing government, and form a new one that suits them better. This is a most valuable, a most sacred right—a right which we hope and believe is to liberate the world.

Nor is this right confined to cases in which the whole people of an existing government may choose to exercise it. Any portion of such people that can may revolutionize and make their own so much of the territory as they inhabit. More than this, a majority of any portion may revolutionize, putting down a minority, intermingled with or near about them, who may oppose this movement. Such minority was precisely the case of the Tories of our own Revolution. It is a quality of revolutions not to go by old lines or old laws; but to break up both, and make new ones.

Mr. Chairman, if there should be a revolution in this country it will not be a revolution that will establish a dictatorship here of the kind Colonel House and his masters in Wall Street are endeavoring to bring about. It will be a revolution that will put the Constitution of the United States back into place where it belongs as the supreme law of the land. It will be a revolution that will destroy the looters of the United States Treasury and sweep out of existence for all time to come the infamous Federal Reserve Board and the Federal reserve banks. It will be a revolution that will restore America to Americans. Let no man think the Constitution has no friends in the United States or that it will ever lack defenders.

When a right-minded man sees a house on fire, he loses no time in sounding an alarm. More than once some of us who have seen the progress of the present conflagration have called attention to it here in Congress. Had our warnings been sooner heeded, we might not now have a myriad new graves filled with victims of the Hoover depression and a multitude of homeless people dying of slow starvation on the streets. When I find that all this which has happened was a prearranged affair; that it was a deflation not brought about by natural causes—as indeed it could never have been brought about by natural causes—that it was decided upon with the same cold-bloodedness that decreed the agricultural deflation of 1920 and that greed and disloyalty to the United States are at the bottom of it, I am determined to warn the American people in their own interests upon every possible occasion so that they themselves and not foreign nations may be the arbiters of American destiny. I was not sent here for the sake of exercising what is called patronage. I was not sent here to act as secretary of any delegation. I was sent here to uphold the Constitution and the laws of the United States.

Mr. SUMMERS of Washington. Mr. Chairman, I yield 10 minutes to the gentleman from Massachusetts [Mr. UNDERHILL].

Mr. UNDERHILL. Mr. Chairman, no one who listened to the speech that has just been read to the House would believe for a moment that it was written by a friend of our Government. This is not the time to rock the boat, and such utterances which bear the imprint of communist propaganda but weaken the confidence of the people in the only form of government which they have, and which has existed over a period of 150 years. It reflects not only upon the Executive branch but upon all branches of the Government, including this House.

Mr. Chairman, I would not abridge the right of any Member in the only forum he has to defend himself against attacks from without this Chamber, but the gentleman from Pennsylvania had his day in court, and if he continued day after day to interrupt the proceedings of this House he would not only infringe upon the rights and patience of all Members of Congress, but he would violate the rights of the people of this country whose time he is taking up in fruitless frothing and the taxpayers who are meeting the expense of printing of these newspaper extracts in the RECORD.

If the gentleman is such a glutton for punishment that he wants these newspaper editorials written down for posterity in the RECORD of the House, I will be the last to object, because they represent universal public opinion throughout the land, and I think they represent largely the opinion of his colleagues.

Mr. Chairman, almost all the Presidents of the United States have had their detractors. Johnson came within one vote of being impeached by the Senate. Feeling ran high. Yet, history has written down the fact that Johnson was one of the ablest and one of the most courageous Presidents we ever had. [Applause.] He stuck to his guns.

Mr. BECK. Mr. Chairman, will the gentleman yield?

Mr. UNDERHILL. I yield.

Mr. BECK. I may add to what the gentleman has said as to President Johnson that the Supreme Court vindicated Johnson in what he did and as to which he was impeached.

Mr. UNDERHILL. I was coming to that.

Washington had his enemies, and at a serious crisis during the Revolutionary War they would have relieved him of the command of the American Army.

Jackson was hounded throughout his administration by scandal mongers, who were not content with attacking him, but attacked others who were dearer to him than life itself.

Lincoln had his detractors, and all through that Gethsemane he was nailed to the cross daily, not by those who were fighting him in the open, but by those who were fighting him behind the lines in the North.

Cleveland was loved for the enemies he made, and I believe that his second election was due largely to the attacks that were made upon him personally and upon his family life.

Wilson was traduced. I am a Republican and many things that Wilson did do not meet with my approval; but he was President in one of the greatest crises in the world's history. If he made mistakes it was because he was trying to do something, and only those who try to do something ever make mistakes. It is those who do nothing that make no mistakes. [Applause.]

Hoover has been abused. He needs no defense from me. History will write him down because of his accomplishments. Hoover has been a savior of lives, not a destroyer of life. Hoover is a humanitarian, not a demagogue. [Applause.] Hoover has tried. Whatever the result may be, he has tried in this world-wide crisis to save the people of this country from greater suffering than has been their lot. If the yardstick of abuse were to be used in measuring the greatness of a man, Hoover has received more abuse, probably, than all the rest put together; and, consequently, would lead the line of illustrious Presidents who have had the abuse of enemies within and without their own country. He will be judged by his accomplishments, though it may take years, as it did in the case of President Taft. His administration was discredited to a greater degree than any other administration in the history of this country, but before his death history had written down his administration as an honest, upright, and successful one, and he was beloved by all the people.

I want at this moment to digress to pay a compliment to my Democratic colleagues. They have been good sportsmen during this session. They have not gloated over their success during the last election. They have not tried to hit a man when he is down. They may have differed with him, an honest difference of opinion, but I have not heard one man on that side of the House utter a detraction or abuse of the President of the United States from a personal standpoint. [Applause.]

Mr. Chairman, there is one thing that is sacred up here on the hill, and that is patronage. You may safely annul the Constitution, you may repudiate the Ten Commandments, you may deny the existence of Almighty God, but do not face the withering hand of patronage up here unless you want to be executed. [Applause.]

During my 12 years' service in the House I have seen many men destroyed by patronage, and it seems to me that Congress is a glutton for punishment when it still maintains that archaic institution. Any man who attempts, as I said before, to bring about a change in the existing condition will wander through these halls friendless and alone. I wonder if the question of patronage does not enter into this discussion to a greater degree by far than the international situation. [Applause.]

But, Mr. Chairman, this is a serious situation. The country is ready to believe almost anything. It took an eminent jurist of New York City to come to the defense of the President of the United States as against two jailbirds who had written a book purporting to be a history. A convict wrote a book about a dead President of the United States, going into the grave to besmirch his character. It was published and went into its fourth and fifth editions, and the people that read it believed it. And that convict is again a convict, incarcerated, and those who collaborated with him have denied every statement that was made within the covers of that book. And yet people are buying it and believing it. This is not the time, and surely not the place, to traduce officials of the United States, whether they be Representatives, Senators, or the President. There can be honest differences of opinion and just criticism without personal or political demagoguery, abuse, sophistry, or the seeking of questionable publicity. [Applause.]

[Here the gavel fell.]

Mr. WOODRUM. Mr. Chairman, I yield 10 minutes to the gentleman from Mississippi [Mr. RANKIN].

Mr. RANKIN. Mr. Chairman, I desire to discuss briefly the greatest question now before the American people, that is, a proper, liberal, controlled expansion of the currency that will bring back commodity prices, restore the purchasing power of our people, and break the force of this terrible depression in which we have suffered for the last three years. And I want to appeal to you again to join me in a speedy solution of one of the greatest economic problems of all times.

We need not deceive ourselves; we are face to face with the most critical situation that has ever confronted the American people. Our very civilization is shaken to its foundation. Our trade is dead, our factories are closed, our cities are crowded with the unemployed and streaming with bread lines. Men, women, and children from the best families of our country are forced to beg from door to door.

Our farmers are in revolt. That patient, long-suffering element of our people, who sustain the Nation in times of peace and fight its battles in times of war, have now reached the limit of their endurance. They can stand no more. They are seeing their homes swept away for debts or confiscated for taxes, as a result of a condition for which they are not responsible, but which has been produced by governmental policies against which they have protested in vain.

All this is happening in a land teeming with abundance; where we have more wheat, more corn, more cotton, more hogs, cattle, lumber, clothes, and other manufactured articles than were ever known before in all the history of mankind.

All this is happening in a land that, in natural resources, is rich beyond the dreams of avarice, and at a time when we have gained the greatest ascendency over the forces of nature, and the greatest command over our surroundings ever known before in all the ages.

What is the cause of all this? The answer is simple. We are in a money panic. Our circulating medium, the lifeblood of the Nation, has dried up as a result of a course of misconduct on the part of those selfish interests that control the purse strings of the country. They now have packed away in their vaults the money that is supposed to be in circulation, and have gathered unto themselves the tax-exempt bonds of the country. With the decline of commodity prices the value of their money, and incidentally their tax-exempt bonds, have more than doubled, and sometimes redoubled, in purchasing power.

Any man who owns a Government bond due to-morrow for $10,000, or who has $10,000 in money, is worth $40,000, measured in terms of farm commodities. It would take four times as much wheat, corn, land, lumber, cotton, or clothes to pay that $10,000 as it would have taken in 1929.

He is four times as rich and the farmer is four times as poor as they were three and one-half years ago.

These large financial interests have gained complete control of our monetary system. They have Ogden L. Mills, formerly of the house of Morgan, a Wall Street banker with an international "slant," as Secretary of the Treasury, who is now parading over the country telling the people what a calamity it would be to expand the currency and bring back commodity prices. The suffering of the millions of Americans seems to mean nothing to him. They also have Eugene Meyer, another international banker, at the head of our Federal reserve system, and are now turning heaven and earth trying to induce the President elect to perpetuate him in that position and to appoint one of their friends, subservients or sympathizers, to succeed Mr. Mills as Secretary of the Treasury.

They do not want any expansion. They prefer to stabilize the American people in their present misery and continue to exact their pound of flesh.

They are not only trying to control this Congress but to dictate the organization and perpetuate that control in the next one—as I expect to show before the present session adjourns.

Congress can relieve this depression in 30 days. The people know this. That is what this election was about. The people want relief. They know that Congress has the power to give it to them. Let us not delay until it is too late.

One of three things is going to happen. We are going to have a liberal, controlled expansion of the currency, such as is provided in the Rankin-Thomas bill, introduced by me in the House and by Senator THOMAS of Oklahoma in the Senate, to bring commodity prices back to the 1926 level, or we are going to have a remonetization of silver for the same purpose, or we are going to have to scale down public and private debts, reduce interest rates, and give extensions of time to enable the people of this country to meet their outstanding obligations.

Unless one of these courses is pursued, we are likely to be swept into a saturnalia of wholesale repudiation of public and private debts that would have a deadening effect on our civilization, from which our people would not recover for a hundred years, and would leave in its wake a demoralized condition which our American institutions might not survive.

Conditions have gradually grown worse for the last three years. We have tried everything that has been advocated by the ones most responsible for this depression. What has been the result? The depression has grown worse, just as I told you a year ago it would do. It will continue to grow worse until one of the courses I have outlined is pursued.

The Congress and the President have been derelict in their failure to pass legislation providing adequate relief. The people have reached the point of revolt in almost every State in this Union. Something must be done! The only hope for real relief is through a liberal, controlled expansion of the currency to bring commodity prices back to what they were when our debts were contracted, our bonds floated, our taxes levied, our wage and salary scales and our standard of living adopted.

I know that some of you who are suffering from the gold complex are going to say that I am advocating going off the gold standard. I am doing nothing of the kind. I am advocating a controlled expansion of the currency to restore normal price levels and then stabilize them so as to prevent disastrous fluctuations in the future. It can be done by the passage of this bill without in any way affecting the gold standard. But if the time comes when we have to abandon the gold standard in order to save the country, then I will be for abandoning the gold standard.

I am going to insert a copy of this bill following these remarks, and with it a copy of a letter from former ex-Senator Robert L. Owen, coauthor of our Federal reserve law, former chairman of the Committee on Banking and Currency in the Senate, and one of the ablest authorities on the money question there is in the world to-day.

Two things are necessary in order to hold up commodity prices. One of them is a sufficient amount of circulating medium and the other is sufficient velocity of its circulation.

In 1914 we had $34 per capita in circulation, or $3,400,000,000. We began to expand, and by 1920 we had $53 per capita, or $5,600,000,000. What was the result? Cotton went to 30 cents a pound; wheat went to $2.50 a bushel; corn, hogs, poultry, land, dairy products, lumber, and labor—all advanced. But when the present rulers got in power—and I am talking about the great financial interests that are represented by Andrew Mellon, Ogden L. Mills, Eugene Meyer, and others—when they took control of our finances and began to use the Federal reserve system and the Treasury Department for the very opposite purpose to that for which they were created, they began to contract the currency, and by 1929 they had it down to approximately $35 per capita. Then when the crash came, after this Wall Street inspired jamboree on the stock market, our international trade collapsed, our factories closed down, the circulation of what money we had stopped, and farm commodity prices swept to the lowest level in all our history, lower than they had been for more than 400 years. That was when the sad march toward bankruptcy began. It has spread to every community. It has reached almost every farm. It will last until the prices of farm products are restored.

I saw a statement to the effect that 50 per cent of the farms of Iowa had been sold under the hammer and that 33⅓ per cent more are now scheduled to be sold. No wonder those people are rising in revolt. The same thing is happening in Mississippi, in Kansas, in Ohio, and in every other State. Yet we sit here and listen to men talk about relieving the situation by paying out money through the Reconstruction Finance Corporation. I told you when you passed that act that you would pour $3,800,000,000 into a sink hole and that the American people would be worse off when it was exhausted than they were when you started. And that is what has happened. Yet the big corporations and large banks that have taken this money and are now hoarding it come here and resist every effort at expansion, because they think it will reduce the value of their holdings and their power to control.

This bill will do the work. The idea is not original with me. It has been advanced by others and has been discussed at various times on this floor. It is safe, it is sound, and it outlines a plan to which we must ultimately come if we are to survive the wreck and ruin which this unprecedented panic has produced. [Applause.]

I hope you will all read the bill and the statement of Senator Owen, which I am inserting for your information.

Mr. Chairman, I ask unanimous consent to insert in the RECORD a copy of this bill and a copy of Senator Owen's letter to me in regard to it, and also to further revise and extend my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

[Here the gavel fell.]

H. R. 13012

A bill to regulate the value of money, to stabilize its purchasing power by the controlled expansion and contraction of the currency, and for other purposes

Be it enacted, etc., That the Secretary of the Treasury is hereby directed to have prepared United States Treasury notes, noninterest bearing, in the same general form, size, and denominations as the United States Treasury notes loaned to the Federal reserve banks and known as Federal reserve notes but omitting on such new notes all reference to the Federal reserve banks. An engraving of the goddess of Liberty shall be placed in the center of such notes and they shall be designated and known as "Liberty notes."

The volume of Liberty notes shall be made available in the Treasury at all times, in a minimum amount equal to $4 per capita of the people of the continental United States.

In the event of any deficit in the current revenues the Secretary of the Treasury shall meet such deficit accrued or accruing by using Liberty notes and paying current expenses of the Government therefrom until the general commodity index of the United States Department of Labor returns to 100.

If the general commodity index rises above 103, the Secretary shall retire such Liberty notes from circulation out of current revenues, or if necessary he may issue and sell United States bonds bearing such rate of interest, in such form and running for such periods of time as he may determine, and from the proceeds thereof withdraw such Liberty notes from circulation to the extent necessary to reduce the general commodity index to 100.

In the event such index shall at any time fall below 97, the Secretary of the Treasury shall put in circulation such Liberty notes by paying the current expense of the Government therewith or by the purchase of outstanding interest-bearing obligations of the United States with such Liberty notes until such index shall rise again to 100.

The Secretary of the Treasury is hereby charged with the duty of maintaining the general commodity index aforesaid and the value of money as nearly at the normal index of 100 as may be found practicable by the controlled expansion and contraction of the Liberty notes aforesaid and in the manner as indicated by this act.

SEC. 2. In the event the Secretary of the Treasury should issue bonds as authorized herein, he shall provide a sinking fund for the amortization of such bonds in the same manner as provided by law for other bond issues of the United States, and under such rules and regulations as he may prescribe.

SEC. 3. All Liberty notes issued and placed in circulation shall be kept by the Secretary of the Treasury at parity with gold in pursuance of the provisions of the gold standard act of March 14, 1900, and by the means therein provided.

SEC. 4. That this act shall take effect and be in force from and after its passage.

WASHINGTON, D. C., *December 8, 1932.*

Subject: Regulating the value of money—H. R. 13012.

Hon. JOHN E. RANKIN, M. C.,
House of Representatives, Washington, D. C.

MY DEAR MR. RANKIN: Accept my thanks for a copy of your bill, H. R. 13012, "to regulate the value of money." I comment on it, as you request.

The United States Government alone has the financial power "to regulate the value of money" and, therefore, to stabilize it. It is surely a financial, commercial, and social necessity.

As the United States Constitution, Article I, paragraph 8, authorizes Congress "to coin money and regulate the value thereof," Congress alone has the political power to perform this duty.

The supreme need for regulating the value and volume of money should be self-evident to thoughtful, informed people.

The failure "to regulate the value of money" has resulted in or permitted the most destructive changes in its purchasing power, as we have seen within the last three years—where money, in terms of commodities, has increased in purchasing power over 50 per cent and, in terms of stocks and bonds, from 100 per cent to 1,000 per cent and more; and the same thing is true with regard to other forms of property.

To regulate the value of money and make it relatively stable in purchasing power is required to make it a just medium of exchange between debtor and creditor—a matter of imperative importance, considering that the debts in the United States exceed $200,000,000,000; and the debt burden has been increased over 50 per cent by the unintelligent breaking down of our national credit structure.

Moreover, the manufacturer, merchant, and business man must be able to know that money shall continuously have a stable value in measuring the goods which they create and distribute, so that they can make their contracts on a basis of dependable security.

The fluctuation in the value of money within the last three years has caused the bankruptcy of 76,000 commercial and manufacturing companies and the suspension of over 5,000 banks, and ruined millions of our people. It needs no argument to establish the controlling importance of stability in the purchasing power of money, for that means stability in the rewards of human labor and of its employment.

THE BILL H. R. 13012

The bill presents in concrete terms a method for making effective the principle of the Goldsborough bill, which declared the public policy of restoring and maintaining the purchasing power of money; and the plan you propose of controlled expansion and controlled contraction in the volume of money is a sound method upon which it can be adequately done.

The bill proposes to expand the currency with Treasury notes until the general commodity index rises to 100; if it goes above 103, to contract the currency until the index falls; if it goes below 97, to expand the currency again; and by controlled expansion and controlled contraction, to keep the general commodity index—that is, the value of money and commodities—as nearly as practicable at 100.

Some do not understand what the general commodity index is. For that reason I think you should explain it on convenient occasions.

THE GENERAL COMMODITY INDEX

The general commodity index is a number selected by the United States Department of Labor to show the relative average value of commodities on the wholesale markets or the purchasing power of money by comparison of one month with another month, of one year with another year. The index was based on 550 (now 784) commodities selling on the wholesale markets.

The year 1926 was taken at 100 by the Department of Labor as a basis of this comparison. It is a fair average approximately of the value of commodities and of the purchasing power of money for the years 1921–1929, inclusive. During these nine years there was a fluctuation only of 3 or 4 per cent, and there was no fluctuation in 1926. Even the bull market in stocks and bonds of 1927 to 1929 did not affect the general commodity index. The general commodity index stood at 98 in July, 1929. The index of the purchasing power of money of 1926 was also 100, for the obvious reason that the general commodity index represents the relative purchasing power of money in terms of commodities.

When the general commodity index falls below 100, the index representing the purchasing power of money rises by inverse ratio, so that at present when the general commodity index is 64 (as it has been substantially for many months), the index of the average purchasing power of money in commodities is 156, obtained by dividing 100 by 64. If the general commodity index should go down to 50, the index of the average purchasing power of money would be 200; and if the general commodity index should rise to 200, the index of the purchasing power of money would fall to 50.

In Bulletin 493, issued by the Department of Labor, on page 30 and on page 246 will be found the general commodity index of average commodity values and the index of the average purchasing power of money running for many years. It is the best practical standard of the comparative measure of the average value of commodities and the average purchasing power of money which has ever been established by any government and has cost very many millions of dollars to accomplish it.

Your using the general commodity index, therefore, as a standard is not only advisable, it is absolutely essential and necessary, and furnishes a dependable basis upon which, by controlled expansion and controlled contraction of money, Congress can discharge its constitutional function and automatically "regulate the value of money."

THE GOLD STANDARD

Your bill in section 3 expressly provides that the new money proposed to be issued and retired under controlled expansion and contraction shall be kept at parity with gold in pursuance of the provisions of the gold standard act of March 14, 1900, and by the means therein provided.

The gold standard act referred to requires all money issued by the United States to be kept at parity with gold. It established a fund of $150,000,000 of gold coin for this purpose and authorized and directed the Secretary of the Treasury to keep all forms of money at parity with gold. It further authorized him to issue 3 per cent gold bonds whenever necessary to prevent the gold coin from going below $100,000,000. The gold coin of $150,000,000 remains untouched in the Treasury after 32 years. The United States now has nearly $4,500,000,000 of gold, and it is steadily growing. There is not the slightest danger of our going off the gold standard. There is no necessity for going off the gold standard.

The purchasing power of gold does not control the purchasing power of the United States dollar, but the purchasing power of the United States dollar controls the purchasing power of gold. This has been pointed out by such men as Sir Edward Holden (deceased), former Chancellor of the British Exchequer and head of the London City and Midland Bank; by Sir Reginald McKenna, former Chancellor of the British Exchequer and now head of the London City and Midland Bank, the greatest bank in the world; by Hon. John M. Keynes, the greatest economist in England; by Gustave Cassel, world-known international economist of Sweden; etc.

There is a sound reason for this. The value of anything depends upon the demand for it. The demand for gold in the United States is—

(1) For industrial purposes, which is comparatively small—probably not exceeding $50,000,000 annually.

(2) For redemption purposes, which is negligible and consumes no gold at all, the redemption taking place by mere bookkeeping cross entries.

(3) For international shipments, where the net annual balances for a very long period of time have been running in favor of the United States.

Even in the year 1931, when there were heavy withdrawals of gold from the United States, there was a net gain of gold by the United States of $145,000,000; and when the figures shall have been made up for 1932, it will be found that our loss of gold will be of no importance. But while the demand for gold is small, as above stated, the demand for dollars has been and is absolutely colossal.

The demand for dollars is demonstrated by the extent to which dollars are used. For example, in 1929 the actual payments by the banks against individual, corporate, and Government deposits amounted to $1,200,000,000,000, and for the 12 months past amounted to approximately $600,000,000,000. These figures are obtained from the Federal Reserve Board's Bureau of Research. The demand for dollars in 1929 was over one hundred times all the gold in the world and is over fifty times all the gold in the world for the last year.

This demand for dollars and the relative contraction of credit and of currency by hoarding have caused the purchasing power of the dollar in terms of commodities to rise to 156; and that means that gold, which is pegged to the dollar by weight (25.8 grains troy nine-tenths fine being a statutory dollar), has also risen in purchasing power 56 per cent.

When the purchasing power of gold, therefore, is thus raised 56 per cent in the United States, it is raised throughout the world in the same way—because all nations, even if they are for the time being off the gold standard, still think in terms of gold and their commodities have fallen in inverse ratio in terms of gold to

approximately 64 per cent. Gold is a commodity and we have caused its value to increase 56 per cent throughout the world by pegging it to the American dollar. We can bring it back to normal by restoring the American dollar to normal.

CAUSE OF THE INCREASED PURCHASING POWER OF THE AMERICAN DOLLAR

We have about $5,500,000,000 of currency outside of the Treasury and reserve banks, of which about $1,000,000,000 is in the bank vaults and about $4,000,000,000 is in the pockets of the people now very rigidly hoarded.

During the years 1927, 1928, and 1929 (the bull market) brokers' loans were expanded to about $11,000,000,000, secured by margined stocks of about $14,000,000,000. Most of these loans were subject to call within 24 hours. These loans were obtained from the New York City banks in about $1,000,000,000, outside banks in about a like amount, and the balance from bank deposits belonging to our industrial corporations and citizens and from foreigners.

Between October 23 and November 30, 1929, about $6,000,000,000 of these loans were suddenly called—precipitating short selling, bear raiding, intense fear, and loss of confidence, and a violent crash in the stock market with a loss in market value of listed securities of about $30,000,000,000. A great major bear movement ensued. The calling of these loans continued until over $10,500,000,000 were called by July, 1932, at which time listed and unlisted stocks and bonds had fallen in value under the mass psychology of fear about $100,000,000,000, and other forms of property almost a like amount.

But the $200,000,000,000 of debts of the people of the United States—personal, corporate, and Government—remained due and payable with interest; and there was the demand for dollars to pay these debts, to pay the interest on them, to pay taxes, to pay fixed charges and the cost of living, and to carry on the business of the country; so that the demand for dollars was very great while the available supply of dollars had decreased:

(1) By contraction of bank loans $14,500,000,000;

(2) By the hoarding of deposits which were not used any further than necessity compelled;

(3) By the calling, hoarding, or refusal of bank credits;

(4) By the withdrawal of bank deposits by $13,500,000,000;

(5) By the rigid hoarding of nearly all the money in the pockets of the people.

As a consequence commodity values fell to 64 per cent of what they had been before and individual stock values fell to one-fourth or one-tenth or one-twentieth of what they had been. Stock values fell far more than commodities, for the reason that commodities as a whole were not overproduced—they were actually of much less volume. Our national annual production income fell from $90,000,000,000 to $42,000,000,000; but stocks had been expanded in volume approximately from 220,000,000 shares in 1922 to about 1,290,000,000 shares in 1930, and therefore when the stock-market crash took place there was a great oversupply of stocks and an undersupply of money and credit with which to buy them.

Moreover, when the colossal losses above cited took place in stock and bond values, they were distributed among 20,000,000 shareholders, and the loss in value of other forms of property was distributed among 120,000,000 people. As a consequence, all the people began to economize rigidly. During the fall of 1929 consumption, production, and employment immediately fell 25 per cent—and the less employment, the less consumption, production, and employment—until we reached the point where we have now less than half our previous consumption and production and probably 12,000,000 persons unemployed and 30,000,000 on part time, cut wages, or at labor which is receiving no compensation.

THE REMEDY

There is but one way of promptly beginning the restoration of consumption, production, and employment, and to cut down the enormous burden on the people being compelled to pay debts, interest, taxes, etc., in such costly dollars, and that is to raise the value of property by controlled expansion of money—the basis of all credit and of all values measured by money—and thus restore confidence.

It is futile to say that there is plenty of money and credit, when the money is congealed and credit is frozen.

Your bill provides this remedy, and it wisely provides at the same time for both controlled expansion and controlled contraction, by an agency of the Government alone. When money is expanded it will immediately have an effect on commodities, and as commodities rise the value of all forms of property will rise. With the expansion of money, credit will be relaxed and hoarded money will begin to flow. For that reason the law must provide, as you have proposed, for controlling expansion and preventing its going too far.

OBJECTIONS

You will be opposed with the cry of "inflation." But inflation means an unjustified expansion, and you are not inflating—you are expanding because of a great national exigency, and you are controlling the expansion by automatic contraction so that it shall not go too far.

You will be met with the charge of "fiat" money. But fiat money is money not redeemable in gold, and the money you propose is redeemable in gold and therefore is not fiat money and is not inflationary money.

You will be met with the charge that there is plenty of money. This is obviously untrue, because the money is largely not functioning and, to that extent, might as well not exist.

You will be met with the charge that there is plenty of credit. This is not true, for the reason that the normal credit is not available for normal purposes.

You will be met with the charge that the money you emit will flow into the banks and by the banks be paid over to the reserve banks and will retire just as many Federal notes as your issue of Liberty notes.

The answer to the last point is that if this were true—and it is partly true to the extent that the Liberty notes should pass into the banks and from the banks to the reserve banks and replace Federal reserve notes, but in that event the banks will receive in exchange for the Liberty notes (or the Federal reserve notes retired) their bonds and their eligible bills on which the reserve notes were issued and will gain quick assets just in that amount, and therefore will be made more liquid and stronger than ever. They can, then, better pay back the loans of the Reconstruction Finance Corporation.

When the banks have accumulated unemployed cash, they will have a strong motive to lend it for productive purposes. When the banks have an oversupply of cash, they will no longer be afraid of their depositors withdrawing cash; and, what is more important, the depositors will not be afraid of the banks as they have been in the past.

With rising value of commodities, of stocks, bonds, lands, and property, the courage and optimism of the people will be stimulated and the spirit of the depression will pass away. With the rise of commodity values, merchants will more readily buy and factories produce, and those who have been waiting for a reaction of the stock market will soon begin buying stocks, and you will find that stocks which are now far below their book value will steadily rise.

As the value of commodities rises and as the value of property rises, the people will be stimulated to consume more and to gratify their needs and desires by buying, because they will realize and anticipate the increasing value of their property. With increased consumption will come increased production and employment.

PRODUCTIVE POWER

The potential productive power of the people is as great now as it was in 1929, when we had a production income of $90,000,000,000. We have the same valuable raw materials, the same fertile fields, forests, mines, transportation and distributing facilities, the same magnificently equipped factories with their powers of mass production. We have the same intelligent trained people, willing, anxious, and even begging to work. When we stabilize the purchasing power of money and restore commodity and property values and confidence based thereon, the energy of the American people will again produce as they did in 1927, 1928, and 1929, and with shorter working hours unemployment should cease.

SOME OTHER EFFECTS OF CONTROLLED EXPANSION

It will balance the Budget permanently by restoring income and taxable values and the means by which to pay taxes. You can not balance the Budget by taxing a vacuum. Men with common sense should realize this.

You can not liquidate labor and the debts of the world on the present increased purchasing power of money and decreased value of commodities and property without universal bankruptcy. The debts of Europe and America amount to $500,000,000,000; and an increase of 56 per cent in the purchasing power of money and gold means an increase of over $250,000,000,000 in these debts measured in commodity values and labor.

Bringing the purchasing power of money back to normal will raise the commodity values in Europe and will enable them to liquidate their debts to us in commodities and services and labor without paying a penalty of 56 per cent—of which they might justly complain.

SOUND MONEY

The Democratic platform stands for sound money, and with that principle we all are in vigorous accord. We all believe in an honest, sound dollar—but the present dollar is not an honest dollar. It is not a sound dollar. It is a dollar buying 56 per cent more in commodities and 500 per cent more in stocks and other forms of property than normally. It is a thief stealing the property of the debtor under the color and protection of law; it is stealing the savings of a lifetime from innocent people who are the victims of a national financial mismanagement or worse.

OTHER METHODS HAVE PROVED UNAVAILING

Other methods have been tried by the administration and have failed. We have authorized the public credit to be used through the Reconstruction Finance Corporation to the extent of $3,800,000,000. This has been no expansion of credit.

It has been merely a substitution of public credit for the benefit of the private creditor, under the color or need of saving the private debtor from bankruptcy threatened by private creditors. The debts still have to be paid with interest—with dollars as difficult to get; and the private creditor has his funds released at a most opportune time when he can buy at bargain prices. We have substituted the public credit for private credit.

The administration—after three years of waging an uproarious "battle on a thousand fronts" against depression and making a great physical effort—has had not the slightest effect in raising commodity values which have gone steadily down, nor any noteworthy effect in balancing the Budget nor in relieving the country of increasing distress. The remedies tried have proved inadequate.

The contraction of credit and currency has been permitted to proceed when it is perfectly well known that it is the contraction of credit and currency—as the Democratic platform proclaims and the Republican platform confesses—which has caused these evils and created our distress. There is but one way to correct the evil consequences of contraction, and that is to reverse the process of contraction and expand the currency upon which the credit structure rests, upon which it is compelled to rest.

THE CREDIT STRUCTURE

The credit structure rests on currency. The colossal activities of the American people using $600,000,000,000 during the last year is cleared by checks drawn against deposits; and the security, stability, and velocity of use of these deposits depends upon confidence that the banks can pay cash on demand.

The banks, with $900,000,000 of cash in their vaults and $2,300,000,000 of cash in the reserve banks, are carrying deposits of over $40,000,000,000, and in 1929 with the same cash were carrying over $55,000,000,000 of deposits. The paralysis of credit and the congealing and withdrawal of deposits and hoarding of cash are due to fear of not being able to get cash. The way to remove the fear is to issue cash in volume sufficient to accomplish that end; and the way to prevent an overissue is by controlled automatic contraction. Hon. KENT KELLER introduced last session two different bills, both containing this principle, to which I call your attention.

I recall that the bill introduced by Congressman GOLDSBOROUGH declaring the same principle as a national policy received the unanimous support, barring one vote, of the Committee on Banking and Currency of the House of Representatives; and, after several days' debate received the votes of 117 Republican Congressmen and 172 Democratic Congressmen. Before the committee it was supported by the representatives of the National Farmers Union, of the National Grange, of the National Federation of Farm Bureaus, of the American Federation of Labor, and by the ablest economists. I have no doubt that you will find in the House of Representatives and in the people of the United States the support needed to secure their relief.

Do not indulge in any overconfidence because there are powerful forces determined to liquidate labor and property on the present basis. Their friends, allies, and agencies will denounce your effort as "inflation," as "fiat money," as "unsound money," as "printing-press money," as an "impossible" effort to "manipulate commodity prices"—as Mr. Ogden Mills proclaimed from Portland to Los Angeles.

The American people passed on these leading issues of this administration, but now their efforts will be to submerge and divert this vitally needed relief by consuming the short session with other questions and preventing an extra session in which the needed relief could be worked out. The ancient struggle between the policies of Hamilton and Jefferson is in vigorous existence right now, in spite of the imperative mandate of the last election which demanded and was promised every effort for prompt relief.

Justice delayed is justice denied, and in this national exigency would be unpardonable.

This country has no time to lose. Immediate, energetic attention should be given to this relief by those whom the people have trusted with their power.

It is my profound conviction from a very careful study of this question that the principles of this bill, if carried out, will give the country prompt relief, will give the world relief, and lay the foundation for an era of continuous stability in industry, commerce, transportation, and employment, and will restore the American people to a condition of permanent and unprecedented prosperity and happiness.

Yours very respectfully,

ROBERT L. OWEN.

Mr. WOODRUM. Mr. Chairman, I yield 10 minutes to the gentleman from Michigan [Mr. HART].

Mr. HART. Mr. Chairman, I desire to speak directly upon one of the appropriations for a bureau carried in this bill. Last year we appropriated for the Federal Farm Board $800,000 for the year. The committee this year has appropriated $500,000, to be applicable only for six months. This is a direct increase of $200,000 annually.

The fact that the committee has only made the authorization for six months is evidence that they intend that the Federal Farm Board shall be dissolved, and its work left shall be put into the hands of some other department.

If this bureau is going out of existence and going to be liquidated, I can see no reason for increasing the appropriation at this time.

I want to call your attention in connection with that to the language on page 18 of the bill, beginning at line 15. Here is a clause that reads as follows:

Payment of actual transportation expenses and not to exceed $10 per diem to cover subsistence and other expenses while in conference and en route from and to his home to any person other than an employee or a member of an advisory commodity committee whom the board may from time to time invite to the city of Washington and elsewhere for conference and advisory purposes in furthering the work of the board.

This clause is for the direct purpose of financing a group of propagandists and lobbyists who visit this city. I have noticed around the corridors a group of farm lobbyists who obtain their money, directly or indirectly, from the Federal Treasury.

Here they provide for the payment of travel expenses and subsistence in Washington for these people from all over the United States to come down here and lobby on Members of Congress to get these appropriations increased.

I am going to read the names of the lobbyists now in the Capitol and the salaries they draw:

E. F. Creekmore, of the Cotton Cooperative Association, who owes the Government $50,000.

Mr. COX. Will the gentleman yield?

Mr. HART. I yield.

Mr. COX. Does the gentleman know that Mr. Creekmore was invited here by advocates of farm relief, in the interest of the relief of the cotton farmers of the South?

Mr. HART. I will say to the gentleman from Georgia that the State of Texas passed a resolution the other day which I will read to him. It was passed by the Legislature of Texas.

Resolved by the Senate of Texas (the House of Representatives concurring), That we implore our Representatives and Senators in Congress to desist from further attempting to interfere with the natural economic laws, and further meddlesomeness to control production and price-fixing, and urge especially upon Congressmen and Senators to oppose the passage of this bill, and take from the necks of the producers of this Nation the yoke of governmental control and dictation.

I shall finish the list of lobbyists who are here and who obtain their money directly or indirectly from the Treasury of the United States. I have already mentioned Mr. Creekmore, with a salary of $50,000. Then comes Mr. C. G. Henry, general manager Mid-South Cooperatives, with a salary of $8,800; next Mr. C. O. Moser, vice president American Cotton Cooperative Association, in charge of propaganda work, $13,500; U. B. Blalock, president American Cotton Cooperative Association, $10,000; Homer T. Wade, in charge of propaganda work in Texas, $5,000; W. M. Thatcher, permanently located here as a lobbyist for the Farmers National Grain Co. on a salary of $18,000 a year.

The total of these salaries is $105,300. They insert in a bill here a provision which will enable them to be brought here from distant parts of the United States for the purpose of obtaining further appropriations under this very bill. This man Thatcher, who is down here representing the Farmers National Grain Co., is an old friend of the farmer. He comes down from the Non-Partisan League days and was indicted with another bunch for swindling the farmers. He turned State's evidence and got off free. He is now in the employ of the Farmers' National, who just before election funded a debt of $16,000,000 for a 10-year period upon a capital of $76,000. I have often wondered why, with my knowledge of this racket, I ever came to Congress, when men can get their hands into the Federal Treasury so easily. If it were not for the fact that I have to live with myself, I would be engaged in some other kind of work.

Mr. BURTNESS. Mr. Chairman, will the gentleman yield?

Mr. HART. Yes.

Mr. BURTNESS. I hold no brief for Mr. Thatcher, the Farm Board, or anyone else, but I wish the gentleman would explain that statement as to how the Farmers' Nationals funded a $16,000,000 debt on a capital of $76,000. Surely the gentleman does not mean to imply that there is no security whatsoever for the funded indebtedness of $16,000,000.

Mr. HART. If there is any security for it, the security is given on money they obtained from the Federal Farm Board, because their original investment is only $76,000.

Mr. BURTNESS. What is the security now held by the Farm Board for this $16,000,000? Is it not a fact that it consists of elevators and facilities more or less throughout the entire wheat section of the country?

Mr. HART. Bought with Government money.

Mr. BURTNESS. Entirely so, does the gentleman think?

Mr. HART. Yes; all but $76,000.

Mr. BURTNESS. I think the gentleman is in error.

Mr. HART. No; their own testimony is that they never paid in a dollar to this company to exceed $76,000.

Mr. BURTNESS. But the gentleman proceeds upon the theory that the owners of these elevators and facilities in the first place had no equity whatsoever in the equipment or buildings. Possibly some of them did not, but many of them did. In any event, I think the gentleman ought to be fair enough to tell the House that there is security, whether good or not I do not know, but that there is very substantial security for every dollar that has been loaned.

Mr. HART. No; there is not. The only security furnished is the very properties which they bought with this money. That is the only security which they had. You take $76,000, and try to go out and buy $16,000,000 worth of property, and then get anybody to make a loan on that basis.

Mr. BURTNESS. If the gentleman has patience to yield further, is not this substantially the situation? A local cooperative association doing business somewhere in the country borrowed money—borrowed money from the Farmers National.

Mr. HART. No; that is not substantially the situation. Not a local cooperative, but they took over large terminal operations which were broke, and took them over at a large price. They took over a speculative concern, a bucket shop, in Omaha, as one of their securities.

Mr. HART. Mr. Chairman, for the benefit of the gentleman who comes from the Non-Partisan League territory, North Dakota, he can find on page 262 of the hearings before the Committee on Agriculture and Forestry of the Senate, November, 1931, a statement from Mr. Milnor, who is the vice president of the Farmers' National Grain Corporation, that its total operating capital is $76,000. I quote from those hearings:

> Senator GORE. But few private concerns could operate on a paid-in capital of $76,000 as your organization did without vast reserves of credit.
>
> Mr. MILNOR. Quite right; but, as I understand it, that was the intent of the law, to make it possible for active cooperative organizations to market their grain and to furnish the credit to assist them in doing so.

If the gentleman from North Dakota will proceed a little farther along that testimony he will find out that the farmer back in the country got less for his grain when he sold it to the local cooperative, which is a member of Mr. Milnor's organization, which was operating on a capital of $76,000 and loans running into untold millions. That the farmer should receive less is patent because of the enormous salaries paid by this institution. Mr. Milnor is drawing $50,000 a year.

What I am trying to convey to the Members of this House is that these men whom I have listed as lobbyists, drawing these enormous salaries, do not represent the viewpoint of the farmer; that they do not assist the farmer in any way; that the farmer who deals through them gets not one cent more for his grain or his cotton.

If my friend from North Dakota will pursue the testimony given by Mr. Milnor, he will find that Mr. Milnor stated that not one cent of dividend has even been paid to an actual farmer. These so-called supercooperatives are nothing more than mere rackets which bleed the small local cooperatives, lead them into speculative schemes, and the small ones only serve as a reservoir for the fellows at the top to draw from them sufficient commissions to pay these enormous salaries. Failing to draw sufficient money from the small cooperatives, it comes directly from the Treasury of the United States, because the Government has loaned them more money than they will ever be able to pay.

I predict that they will sponsor legislation here later to cancel the debts of these cooperatives. I am told their books are so kept that whatever profits they have made are segregated in one account and their losses in another; and if these losses are canceled, they will be left with considerable money which these high-priced gentlemen can play with.

If it were not for the tragic condition in which the farmer finds himself and if it were not for the fact that the Government is in financial difficulties in its endeavor to balance its Budget, the spectacle of seeing this group of slick gentlemen whom I have named, drawing fat salaries coming from the Treasury, would be a joke upon Congress.

These men and their organizations represent in no way or manner the average farmer of the United States. They are a fungous growth upon the good old tree of agriculture, and this fungus, if it is not amputated, will destroy agriculture itself with its patent nostrums to create more jobs and to fool with the farmers' economic life so that they may remain in the national picture.

It is now admitted by the Farm Board members and all their allies that stabilization is a failure, and the only justification they have for its continued existence is cooperative marketing. That would be natural because out of the cooperative organizations which the Farm Board set up is where these men obtain their large salaries. The Farm Board itself limited salaries.

If cooperative marketing is the only excuse for the continued existence of the Farm Board, then it should be immediately put out of business. All the cooperatives they have had anything to do with and whose affairs they have directed through large loans are now broke. They took over the management of the Mississippi Long Staple Cotton Association, which had a nice surplus. Now they owe the Farm Board about $5,000,000, without any assets. They took over a cherry cooperative at Traverse City, Mich., that was prosperous and linked it up with another cherry cooperative in Wisconsin. Both are broke to-day.

So far as cooperative marketing is concerned, they have set it back 20 years. They have instilled in them wrong principles of doing business. They have encouraged speculation, and generally have wrought havoc among the cooperatives.

Mr. WOODRUM. Mr. Chairman, I yield two minutes to the gentleman from Georgia [Mr. Cox].

Mr. COX. Mr. Chairman, I very much regret the statement of my friend from Michigan [Mr. HART], who has just left the floor. I regret it because I think that it is made upon a basis of misinformation or a lack of information, not only with respect to the reason for these gentlemen whose names are given being here at this particular time but as to the manner in which the cooperative associations of this country are carrying on their business. I have no interest in defending those he has designated as lobbyists, but he has named the most outstanding representative men, that is, men representing agricultural groups of this country, that there are in the country. He referred to Mr. Moser. I happen to know that Mr. Moser has avoided playing the rôle of lobbyist. He is an outstanding economist and a profound student of agriculture and all kindred problems. He mentioned Mr. Henry, who is also a representative of a great cotton association, as well as others. These gentlemen are here as representatives of these associations, made up of the farmers of the country, and if they did not come here and present the case of the farmers, then the farmers would not be heard except as members of this body undertake to represent them specially.

We have heard much in recent years regarding what is commonly referred to as the farm problem. In its broader aspects and in its significance to the country as a whole, it is not only economic but social as well. But the latter phase of the subject is so intimately tied up with the economic one, that is, the financial ability of the farmers to perform their proper part in the social order, that sociologists, as well as economists, approach the problem first from the economic standpoint.

A man who is in danger of losing his home is in no frame of mind to give serious thought to the higher purposes of life and living, but, on the contrary, given economic independence, he and his family are quite as apt to improve their standard of living, culture, and community interest as is any other type of citizen.

The purpose of an increased financial income is primarily not one of accumulating more dollars, or more land and better equipment, but to raise the standard of living and the type of citizenship. In other words, while we aim at the dollar, we shoot through it to those higher purposes and ideals for which we strive as our social objectives. We are all familiar with the fact that the economic status of American farmers, and particularly those who live in the cotton-producing States, is so low that we have an enforced standard of living at least one generation behind that of the urban workers in other industries. In some places the standard of living is fully two generations behind that of other groups. We can not have social equilibrium in our country and stability and permanence of the institutions of democratic government without equality of economic opportunity, and it is such equality that must precede equality of social advantages.

Let it be remembered that agriculture in all of the older countries is a peasant occupation, and agricultural peasantry threatens even the United States, Canada, Australia, and New Zealand, the newer countries of the world which have escaped peasantry thus far. My conception of the term "peasantry" is not limited to those who wear wooden shoes or sandals, but rather to those human beings who are so discouraged with their economic and social conditions that they are unable or unwilling to make the struggle to throw off the yoke of discrimination and injustice from which they are suffering and who consequently accept their condition as inevitable and impossible of correction.

No country in the world has yet solved its farm problem, but those making the greatest strides in that direction are the ones which have made the most progress in organized cooperation among their farmers. Typical and outstanding along this line is the little country of Denmark, once barren, destitute, and poverty stricken, and now offering its farmers the highest standard of living of any country in the world—a country in which there is no poverty or illiteracy among its agricultural producers.

The attempts on the part of American farmers to join themselves into farmer-owned and farmer-controlled business organizations have always met with the organized opposition of those engaged in private trade; and not only have the organized agricultural trades sought by fair and foul means to undermine and otherwise defeat the efforts of farmers to set up their own business organizations in buying and selling but they have likewise opposed every attempt on the part of farmers to obtain for themselves equality under our protective system.

As a result of their difficulty in availing themselves of their combined strength in carrying on their business enterprises, and as a result of the artificial prices of the products and services of other groups entering into the cost of production and the living of the farmers, the farm problem in this country has become aggravated and intensified during the past 12 years. It has finally undermined the entire economic structure of the country. The farm problem, therefore, now is not only one of vital concern to the farmers themselves but in no less a degree to the country as a whole. The free movement of commerce and trade, the employment of workers in other industries, the ability to pay the increased cost of government are all dependent on the resumption of the exchange of goods and services among the various workers in the different industries. This can not be done unless every group is equally capable of influencing or controlling the economic and political forces responsible for the exchange value of their products and services.

We are living in a highly organized age. The unit of society is the group and not the individual. The bargaining power in the exchange of products and services between and among the groups is determined largely by the organized strength of the group. The unorganized or poorly organized group is in no better position to obtain a fair share of the national annual income in competition with the better organized group than is an unarmed mob to cope with a modernly equipped and capably led army. And yet in a country dedicated to the principles of fair play, the very groups which themselves are thoroughly organized, adequately financed, and competently led, and who themselves have been the beneficiaries of governmental favors and bounties, are openly and boastfully using that influence to discourage and, if possible, prevent farmers from utilizing similar devices and instrumentalities looking to the protection of their interests. If agriculture is a necessary industry to our national well-being and the prosperity of farmers is essential to the prosperity of the country as a whole, as business men will readily acknowledge, and if farmers through their individual and collective efforts have been unable to cope with the powerful forces essential to their proper place in the economic system as a whole, then it is a proper function of government to assist them in whatever way may be necessary to effect such organization of their industry. No student of government will deny that wherever any essential group is unable to do those things necessary to their own advancement, the doing of which is in the interest of the public welfare, then the Government not only may but should supply the means and, if necessary, the facilities to accomplish such ends.

When the railroads of this country were without necessary means to extend their lines across the Rocky Mountains to connect the Pacific and Atlantic coasts and the intermediary territories, the Government financed such construction. And it was a sound national policy.

When the shipping interests of the country were unable to dig a canal in Central America necessary to avoid traveling around Cape Horn, again the Government of the United States provided the means in the interest of the public welfare. That was a sound national policy.

When the banks of this country were unable to provide necessary reservoirs of money to finance commerce and industry, regardless of the demand or condition of business, it was a sound national policy for the Government to set up a Federal reserve system to do those things which the banks themselves were unable to do in the interest of the public welfare. A recitation of all of the precedents that have been established in the pursuance of such a national policy would be practically an endless undertaking.

It would appear, therefore, that the only thing necessary to establish is whether or not agriculture is an essential industry, and whether, in the proper functioning of agriculture as a part of society as organized, it can accomplish its indispensable ends without the aid of society as carried on through organized government. Granting these hypotheses, then there is but one consideration, and that is, how?

With the knowledge of the controlling and limiting factors in the success of any economic group, and with the experience of 150 years in the way other groups have attained the full measure of their economic independence, there is little unknown as to how the Government may help agriculture. The particular device required in the specific application of proven principles, considering the difficulties and peculiarities in agriculture, however, may be a debatable question. But with the knowledge of the fundamentals and through experience in this and other countries, there are many positive formulæ which have passed the controversial stage in so far as their practicability is concerned.

In an honest attempt to encourage the business organization of farmers in line with proven successful experience, both major political parties have committed themselves to encouraging cooperative marketing. Even the trades, which have consistently and continuously opposed such organizations, acknowledge its soundness in principle. To do otherwise would point them out and indelibly mark them as enemies of the farmers and of the public welfare. So, masqueraded in the cloak of the shepherd, their wolflike natures exhibit themselves whenever a cooperative is effective or shows promise of becoming effective to the point where it interferes with the dominance which they have had over the markets, or the profits which they have made out of handling farm products. As long as the cooperative is weak and ineffective, they are its espoused friends, but the instant it becomes capable of doing the things which its

members desire, that is, to protect their interests, it then becomes the object of their powerful destructive influence.

Let there be no misunderstanding of the reason for the opposition of the agricultural trades to the agricultural marketing act and the Federal Farm Board. It is because the Federal Farm Board is not only endeavoring but is succeeding in bringing to the organizations of growers those limiting factors in their success necessary to their effectiveness, namely, capital, world information on supply and demand, and facilities for correcting abuses of the trade. It is no surprise, therefore, that the greatest opposition to the Federal Farm Board and the cooperative movement should come from the centers of activities of the traders in these commodities and from the places where the cooperative organizations are most effective.

Largely through the encouragement of the Federal Farm Board 200,000 new members were added the past year to cooperative associations. The Farm Board loaned to cooperatives in the three years of its existence more than a billion dollars. The board loaned more than a million dollars the past year to new cooperatives for organization purposes. One-half of these organization loans have already been repaid the first year, showing how sound these organizations are and what support they are receiving from farmers. Loans to many worth-while cooperative enterprises were refused because Farm Board funds were inadequate. Many illustrations could be cited as to the advantages the growers receive through their cooperatives. Only a few will be referred to here.

In the 7 large milk markets where producers are well organized the net price to producers declined 22 per cent last year, while in 19 other markets not so well organized the price declined 31 per cent, although it was already 79 cents a hundred pounds below the organized markets.

Since the organization of the National Wool Marketing Association prices of wool are 11.2 cents per pound higher in relation to London markets than in the previous 10 years.

Butterfat is 5 cents a pound higher in Minnesota than in Kansas, largely because Minnesota has 644 cooperative associations marketing dairy products while Kansas has only 8. And prices in Kansas are higher than they are in the Southern States.

Eggs are 4 cents a dozen higher on the Pacific coast than in the Corn Belt, although 1,000 miles more distant from the consumer markets. The reason is that there are ten times more poultrymen enrolled in strong cooperatives on the Pacific coast than in the Corn Belt. And in the unorganized sections of the South there were times when there was practically no market for eggs, the price in many local markets being as low as 5 cents a dozen.

In the case of cotton it is common knowledge that when the cotton cooperatives set up local offices, cotton often advances several dollars a bale in those communities, based on an unchanged world price. And when the cooperative offices are closed the local markets similarly decline. It is likewise common knowledge, ascertained by research of the United States Department of Agriculture and State experiment stations, that the difference between market price of cotton at interior points and central markets has been improved to the advantage of the farmer from $5 to $20 a bale, largely as a result of cooperative activities.

It has been the assistance which the Farm Board has given these cooperatives that has made these results to farmers possible, and that is the object of the trades' opposition.

The agricultural marketing act has the indorsement and support of not only the cooperatives but also the general farm organizations of the country. In these organizations are enrolled approximately one-half of all the farmers of the country. They are some of the most progressive and intelligent farmers in the country, and the leadership is of their own selection. They are men of intelligence, character, and business experience. Many of them are among the ablest students of the problem, with a full and complete knowledge of the fundamental economic conditions underlying their solution. They are the men responsible for the leadership of the farmers themselves in the solution of their problem. Without exception, so far as I know, these men are unitedly and determinedly for the agricultural marketing act and favor its continuance. They are likewise highly appreciative of the honest, conscientious, and intelligent effort which the Farm Board has made as an agency established by Congress to administer the agricultural marketing act. These leaders know the long hours of hard work, devotion to duty, and consecration of effort and purpose which the members of the Farm Board have given to the cause of farmer cooperation. They are mindful and resentful of the unfair criticism to which the Farm Board has been subjected by the agricultural trades and their sympathizers. The pity is that their misrepresentations and innuendoes have found lodgment in the minds of some well-meaning friends of the farmers, and even among some farmers themselves.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. SUMMERS of Washington. Mr. Chairman, I yield seven minutes to the gentleman from Utah [Mr. COLTON].

Mr. COLTON. Mr. Chairman, I have never been approached by one of these lobbyists from the Federal Farm Board of whom the gentleman has been speaking; but I have given this matter a very great deal of study on my own initiative. This agitation for the abolition of the Federal Farm Board and the criticism that is being made against it, in my judgment, are not well founded.

Mr. COX. Will the gentleman yield to me for a statement right there?

Mr. COLTON. I yield; yes.

Mr. COX. The opposition of the trader is not to the Farm Board but is to the cooperative organizations of this country; and if this Congress wants to strike down that movement, it can do so or give it a setback for 20 years by striking down the Farm Board. [Applause.]

Mr. COLTON. I agree exactly with the gentleman. There is no question about it.

Surely the gentleman from Michigan [Mr. HART], who has just left the floor, does not mean to infer that the Federal Farm Board is furnishing money for the purpose of lobbying. I happen to be personally acquainted with two or three of the members of the Federal Farm Board, and I say without any hesitation that I know of no men in public life who are more honest and more devoted to public service than they are. I am sure this can be said of all members of the Federal Farm Board. They are high-class men, and, Mr. Chairman, the Federal Farm Board is doing a good work, notwithstanding all this criticism.

We know the struggle that agriculture made for so many years to work out some plan to take up the stretch between the producer and the consumer. We know how long and how hard that fight was. Finally, after years of effort, they partially succeeded. I am not saying that the Federal Farm Board has not made mistakes. It probably has. It was probably a mistake to engage in stabilization work, but that work was undertaken after very great pressure was brought to bear on the board by Members of Congress and by other responsible people. There was never a thought that they could keep price levels as high as they were in 1929 in view of world conditions.

The stabilization work was only for the purpose of preventing a precipitate fall, to cushion the fall, so to speak. They entered into that work to prevent a sudden crash. No one could have anticipated the conditions which followed. We must not forget that their great task—and a worthy and splendid one, too—has been to organize the farmers of this country so that when conditions do come back they will be in a position to partly control the prices of their own commodities. They have been extremely helpful even during these depressing and distressful times. They have organized and fostered 12,000 cooperative marketing associations in this country, and they have loaned to nearly all of those associations.

Their record for loaning is equal to or exceeds that of any other loaning agency in this country. Of all the loans they

have made probably less than 100 have been found to be wholly unsound. They have already had paid back from something like $367,000,000 loaned all but about $158,000,000. Their record is a good one. They came into the picture at a time when agriculture was sinking and sinking rapidly. They have prevented, to a very large extent, the utter collapse of the agriculture industry, and now if you take away this help, if you abolish that board, you will cause agriculture to take a step backward a quarter of a century. It has taken that long to get any concrete working plan for the benefit of agriculture. We fought every inch of the road up to this point. I hope the Members of this Congress will not be stampeded. If you abolish this board and put the work under a bureau of the Department of Agriculture, where the Secretary of Agriculture has more work now than he can do, you dim the hope of the men who have worked consistently so long to bring about this sort of an organization. This board, if left alone, will be, and is now, helpful. They are creating organizations that will enable the farmers to get their commodities to the consumer without the great stretch that has heretofore existed. Do not hamstring them just as they are getting started.

I am disappointed in the action of the subcommittee and of the Committee on Appropriations in even indicating there is a possibility that the Federal Farm Board will be abolished. The gentleman from Michigan [Mr. HART] seems to take it for granted that it will be abolished. There is danger of demoralizing the morale of the great organization that has been set up to help the farmer. We are already creating fear in the minds of the farm organizations. I am glad that recently the Cooperative Council at a meeting here in Washington—and it is one of the influential and strong marketing associations of this country—indorsed the Federal Farm Board and its activities. They are not in favor of abolishing it. These marketing associations which have been succored financially by the board have been a godsend to agriculture.

Mr. Chairman, sometimes in our hysteria we forget the very purpose for which this board was organized. Its purpose was not to stabilize. Its purpose was to help the farmers sell their products. I am here to say to you to-day that these men are conscientiously working to that end and have accomplished a great work. I hope that neither this nor any succeeding Congress will seriously consider any proposition to abolish the Federal Farm Board. Talk about lobbying, those who are against the board have done far more than those who favor it. Its enemies are doing the lobbying. The board is too busy with its great task to lobby.

The CHAIRMAN. The time of the gentleman from Utah [Mr. COLTON] has expired.

Mr. SUMMERS of Washington. Mr. Chairman, I yield 10 minutes to the gentleman from Washington [Mr. HORR].

Mr. HORR. Mr. Chairman, while we are discussing the matter of appropriations, it seems to me at this time we would do well to consider some of the legislation that is now before this House.

I presume all of the Members are cognizant of the fact that the Members on our side have signed a petition which will force a vote on the depreciated-currency legislation which is now before the Committee on Ways and Means of this House and has been there for over a year. I think we should call to the attention of the House the method that is being employed to stifle this all-important legislation, which affects every industry in the United States.

I hesitate, indeed, to bring the charge that any body of men would, for a moment, place any obstacle in the way of legislation so beneficial to the country, but I feel it my duty to call to the attention of the House and the country the fact that the Democratic majority in the Ways and Means Committee must be charged and held responsible for the delay of almost a year in the consideration of this all-important legislation.

It was my honor to have introduced the first bill on depreciated currency in the House, over a year ago, along the lines of the Hill and Crowther bills now being heard before the Ways and Means Committee. Other bills were introduced later and with my bill came before the committee last session. The Democratic members would not report any of these bills out to the House.

We came back this year and new and similar bills have been sent to the committee. I desire to call to your attention the fact that there was already sufficient hearings to have permitted that committee to report out a bill.

The Democratic majority, using dilatory tactics, referred the matter to a subcommittee. Whether or not the charge is correct, the supposition seems to be general that this is merely a method of having this legislation placed in abeyance in order that it may not reach a vote in the House during this session of Congress. This opinion is further substantiated by press accounts which we read in last night's paper wherein it was stated that our friends on the majority side anticipated calling a caucus with the idea in mind of taking up this "tariff legislation" as it is termed by them, with the further idea of delaying action until the next Congress.

Fortunately for the depreciated-currency legislation the Democrats could not agree, especially when it was apparent that the Republicans had enough signers on their petition to force a vote.

I think the country should know that the Democrats, who have, and who have had, a majority in Congress, are responsible for the failure to bring out this much-needed legislation. For over a year they have refused to bring out a bill, and only after the Republican Members had forced a vote by petition under the rules of the House was some action taken. Through Republican activity and over the protests of the Democrats we shall have an opportunity to vote, in effect, on this measure on February 13 next.

May I say to those who are opposing this legislation on the ground that the bills under consideration call for an increase in tariffs that in my opinion such is not a proper interpretation.

This legislation merely protects the tariffs that are now operating. I am of the opinion, and I am now addressing my remarks to the Democratic side of the House, that if your tariff were in operation and you found that depreciated currency was tearing down the tariff walls of protection on products you believed should be protected that you would have no compunction in voting for a bill that would maintain such tariff.

That is all these bills under consideration do. They merely protect our present tariff, which has been torn down by the difference in foreign exchange money values. Furthermore, they protect the articles on the free list by insisting that foreign money values meet our money values.

You can not expect our manufacturers of goods on the free list to compete with not only cheap foreign labor but also cheap foreign money.

May I call attention to the fact that one of the newspaper syndicates which is responsible in large part for the success of Democrats during the last campaign, the Hearst publications, has come out squarely and fairly in editorials demanding that the Democrats, as well as the Republicans, in order to protect these industries, enact legislation that will protect the industries that to-day are being paralyzed on account of the depreciated currencies.

Mr. Hearst in his statement in that editorial showed himself to be a real patriot. When you consider that the purchases of pulp paper for his numerous publications average from five to six hundred thousand tons every year, that he is now compelled, because American pulp mills are closed, to buy approximately 400,000 tons in foreign markets, this declaration of his means he will buy from an American industry when it is revived, and will thus be compelled to pay approximately $5 a ton more for his pulp paper than he now pays. In other words his editorial has cost him between $2,000,000 and $5,000,000 a year.

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. HORR. I yield.

Mr. SCHAFER. The Saturday Evening Post also editorially has taken a position in favor of this legislation.

Mr. LAGUARDIA. Is the pulp available in this country?

Mr. HORR. The pulp is not available in this country at the present time. In my State alone 6 of the 10 mills are closed down and the remaining 4 are running half time, because of this unfair competition. Now when orders come in they are unable to fill them and meet the prices caused by this reduced currency.

With pulp on the free list we were able to compete and did compete and did reduce the price on pulp paper from eight to five dollars per ton, until depreciated currency came. During the first nine months of 1932 there were shipped into the Pacific Coast States alone 114,821 tons of foreign print paper, valued at $5,166,945, besides 19,384 tons of foreign pulp, valued at $518,000, or a total of $5,684,942, which amount went to pay wages and dividends to foreign pulp and paper mills.

These figures do not take into consideration the eastern markets taken over by the foreign producers in this industry. It must be apparent that this $5,000,000 loss to the Pacific States is a very small part of the American loss, as a whole.

Pulp is not the only product affected by this differential rate of exchange. The fisheries on both the Atlantic and Pacific coasts are being destroyed.

Canned pink salmon packed in Japan and Siberian waters is being offered in the American markets at $2.25 to $2.40, duty paid, as compared with a domestic price of $3.40 a case of forty-eight 1-pound tins.

Fancy red salmon in ½-pound cans, 96 to the case, has been delivered at Honolulu, duty paid, for $3.57 a case, as compared with a domestic price of $8 a case for this product, f. o. b. Pacific coast ports. A single Japanese freighter recently took to our eastern ports nearly a million pounds of pink salmon for distribution in our markets.

The Calvert Co. of Seattle, wholesalers of canned Alaska salmon, received the following telegram from Young & Roberts (Inc.), their brokers at Columbia, S. C., on December 23, 1932:

> Answering account large lot of Japanese pinks now arrived at Charleston unable to furnish instructions balance pinks, although we regret to do it must release them every case sold, buyers canceling.

The American packers of salmon, who since 1924 have lost 65 per cent of their export market, now face ruinous competition in the domestic market as well. With the new pack of the current season now entering the market, the situation is further aggravated by this influx of foreign goods, and by the imposition of lower duties on the product from some other producing countries than is imposed on the American goods in those markets. According to the report, the Japanese packed 10,000,000 pounds of tuna, chiefly for marketing in this country. Already over 4,000,000 pounds, valued at more than $525,000, have been imported.

The canned-sardine industry of Maine and California is also being affected. Imports of canned sardines from Norway, which compete with the Maine pack, increased from about 285,000 cases in 1930 to 780,000 cases in 1931 to over 900,000 cases for the first nine months of 1932. The Maine pack of sardines amounted to 1,400,000 cases in 1930, 885,000 cases in 1931, and an estimated pack of about 385,000 cases in 1932. At the present rate of imports from Norway, the volume will have increased over 400 per cent in the three years, whereas the Maine pack this year is about one-fourth that of 1930.

The Japanese are now offering pound oval sardines packed in tomato sauce similar to the California pack at $2 a case of forty-eight 1-pound cans, duty paid, Pacific ports, as compared with a domestic cost of production of $2.65. Both the sardines and salmon are packed so as to be undistinguishable from the American products.

Imports of fish oils and fish meals have forced the prices of these commodities down to 10 to 12 cents a gallon for fish oils and $19 to $21 a ton for fish meals, which is below domestic costs of production and far below any recent level of prices.

Swordfish from Japan have been landed at Boston, Mass., the heart of the domestic fishery, to sell in our market for 8 cents a pound, as compared with domestic prices of 20 to 22 cents, and offers have been made to deliver from abroad frozen fish fillets at 4½ cents a pound, packed to resemble domestic goods which in normal times can not be produced for less than 14 cents a pound.

Until this year the fisheries industry brought annually to the Pacific coast alone more than $90,000,000.

To the Northwest, Oregon, the Puget Sound country, and Alaska, it brought approximately $40,000,000 a year.

If this industry dies, 50,000 men will be thrown out of work, and of these 10,000 live in the Puget Sound district.

Japanese fishermen are paid only a few cents a day. Japanese cannery employees receive wages averaging from 25 cents to 40 cents a day.

Last year Wall Street financed two bond issues of $19,000,000 each, which was sold in the United States by the Oriental Investment Co. The bonds were guaranteed by the Japanese Government. The Oriental Investment Co. owns the Japanese fisheries and canneries.

Dairy products are suffering from competition, unfair because of the advantage that the foreign importer has by virtue of this difference in exchange value of moneys.

Chinese eggs enter with the effect of the prohibitive tariff removed. Butter of European make is selling with duty and transportation charges prepaid for 26 cents a pound in Pacific coast points. The importation of fats for oleomargarine, while not affecting my State, is undermining the butter market of the country at large.

The primary interest of dairy farmers is in the competition between butter and oleomargarine. Competition of foreign oils from countries of depreciated currencies is lowering the cost of the components of oleomargarine.

The majority of the domestic oleomargarines can be made at from 5 to 5½ cents a pound. In the face of such competition it is very hard for butterfat producers to obtain a living.

The imports of organic oils have increased from 418,000,000 pounds in 1914 to 726,000,000 pounds in 1931.

These are not the only industries that have felt the effects of this depreciated currency. The cement manufacturers show a reduction of wages of 20 per cent to meet the British competition. The public buildings in my own city have been using British cement. There has been no provision made in their contracts for the use of American-made goods. We are using British-produced cement to-day in the public buildings in the city of Seattle.

Rubber shoes are not produced by us out here. We see them go through our port of Seattle bound for eastern points, with Japanese labels. May I call your attention to the fact that in one of the trade journals is the notice that—I do not know whether the statement is correct, but I am going to quote it—Woolworth's has placed an order for 150,000 pairs of these rubber shoes with cloth tops for delivery into the United States from Japan, to be delivered every two weeks to take care of their customers in this country. Carloads of Japanese goods are constantly going through our port. You can not tell me that they are not in competition with our own goods.

Japan is not the only nation taking advantage of our trade conditions caused by depreciated currency.

We are importing rubber boots and shoes from Czechoslovakia, hardware from Germany, and many other manufactured products from other nations, and selling them on our markets for less than these articles can be produced by the American manufacturers.

There was an increase of 100 per cent in imports of newsprint during the first 10 months in 1932, as compared with the first 10 months in 1931. It is safe to say that every article manufactured in the United States which is thrown into competition with similar foreign articles has felt the effect of the debased currency of these foreign countries.

Mr. McGUGIN. Mr. Chairman, will the gentleman yield?

Mr. HORR. I am sorry, my time is limited; I can not yield.

I will answer the argument which the gentleman from Kansas would make. He, like myself, has been in favor of reducing the purchasing power of the dollar, and he is afraid if we pass this bill it will adversely affect legislation he has in mind, of bringing back the dollar to the purchasing power of the dollar of normal times.

This depreciated-currency legislation is only effective during the time there is a difference between the value of American money and the currencies of foreign countries shipping goods to this country, and when the legislation the gentleman from Kansas favors becomes effective this legislation now before us will become ineffective, because the difference in exchange will be eliminated.

Mr. Chairman, this depreciated-currency legislation is not new in matters of international trade. You will find legislation of this type adopted by France in 1931. Through the means of orders in council, measures were adopted similar to those proposed in the Hill and the Crowther bills; and I ask consent to place in the RECORD this order in council of the French Government, wherein we find France assessing the different nations in surcharge taxes the difference between its currency and the currency of the countries with debased currency from which imports have come into France.

The matter referred to follows:

COMPENSATING EXCHANGE SURTAX—REPORT TO THE PRESIDENT OF THE FRENCH REPUBLIC

PARIS, *November 12, 1931.*

Mr. PRESIDENT: The fall in value of the monetary units of certain countries has made it necessary to make provisions for the application of compensation surtaxes for exchange variations, in order to protect our market against the influx of imports from those countries.

The decree of August 1, 1931, has established the principle of the creation of such surtaxes and laid the basis for the methods of computing them.

For that reason it specified in the most explicit manner that such surtaxes could only offset the effects of currency depreciation on the cost price of foreign products.

In other words, the surtaxes in question are not intended to increase, by indirect methods, the tariff protection established by Parliament.

Their only object is to offset exactly the decrease in prices brought about by the depreciation of exchange in certain foreign countries.

Therefore, it tends to restore strictly the tariff balance just as it was before it was broken to the detriment of our production by the depreciation of foreign currency.

The complaints from numerous national industries have recently taken on an increasingly urgent character. After an intensive study of the situation the Government has deemed that it could no longer postpone the application of protective steps intended to avoid the crowding of our market and great difficulties for our industries.

Such is the purpose of the attached draft decree which creates various provisional exchange surtaxes. Please accept, Mr. President, the assurance of our deep respect.

PIERRE LAVAL,
President of the Council, Ministry of the Interior.
LOUIS ROLLIN,
Minister of Commerce and Industry.
ARISTIDE BRIAND,
Minister of Foreign Affairs.
P.-E. FLANDIN,
Minister of Finance.
FRANÇOIS PIÉTRI,
Minister of the Budget.
ANDRÉ TARDIEU,
Minister of Agriculture.
ANDRÉ MAGINOT,
Minister of War, Minister of Colonies ad interim.

The PRESIDENT OF THE FRENCH REPUBLIC:

In view of article 17 of the decree of December 28, 1926, providing for the codification of the tariff laws;

In view of the decree of August 1, 1931, concerning the establishment of surtaxes compensating the currency variations;

Following the report of the president of the council, Minister of the Interior, of the ministries of commerce and industry, of foreign affairs, of finance, of the budget, of agriculture, and of colonies;

The council of ministers, by agreement, decrees that:

ARTICLE 1. In order to offset the indirect premium on export which results from the depreciation of certain foreign currencies with reference to their legal par, the following surtaxes shall be established as applying to the countries enumerated below for commodities originating in those countries and those shipped from those countries, where it is not shown that they have originated in another country.

ART. 2. The following shall be exempt from the payment of the above surtaxes:

First. Commodities which, upon their entry into France, are favored with exemption from customs duties in minimum tariff, by virtue of the tariff law.

Second. Products for which there is a world market or the marketing of which is not influenced by the national currency variations and the list of which shall be drawn up by interministerial decisions.

ART. 3. Commodities which will be shown in accordance with the conditions stipulated in article 11 of the codified tariff laws to have been shipped directly to France before the insertion in the Journal Officiel of the present decree, as well as those which will have been deposited in warehouses or stored before the same date, shall be admitted for importation and exempted from the surtaxes created by article 1.

ART. 4. The provisions of the present ruling shall be applicable to Algeria.

ART. 5. The president of the council, Minister of the Interior, the Ministers of Commerce and Industry, Foreign Affairs, Finance, Budget, Agriculture, and Colonies shall be charged with the execution of the present decree within their respective fields.

Done at Paris, November 12, 1931.

PAUL DOUMER.

By the President of the French Republic:

PIERRE LAVAL,
President of the Council, Minister of the Interior.
LOUIS ROLLIN,
Minister of Commerce and Industry.
ARISTIDE BRIAND,
Minister of Foreign Affairs.
P. E. FLANDIN,
Minister of Finance.
FRANÇOIS PIÉTRI,
Minister of the Budget.
ANDRÉ TARDIEU,
Minister of Agriculture.
ANDRÉ MAGINOT,
Minister of War, Minister of Colonies, ad interim.

Table annexed to the decree of November 12, 1931, to create compensating exchange surtaxes.

Amount of the surtaxes	Per cent
Australia	15
Denmark	15
Great Britain	15
British India and combined native states	7
Mexico	15
Norway	8
Republic of Argentina	10
Sweden	15
Uruguay	10

The president of the council, Minister of the Interior, the Minister of Commerce and Industry, the Minister of Agriculture, the Minister of the Budget, and the Minister of Colonies, in view of the decree of November 12, 1931, which created compensating surtaxes for exchange surtaxes, order that:

ARTICLE 1. The products listed below shall be free, for importation into France, from the payment of compensating surtaxes for exchange variations, created by the decree on November 12, 1931:

Tariff number	Description of the commodities
53	Hard roe of cod and of mackerel.
Ex. 68	Wheat, spelt, and maslin in grain.
88	Oilseeds and fruit.
108	Tea.

ART. 2. The counselor of state, general administrator of tariffs, shall be charged with the execution of the present decree.

Done at Paris, November 12, 1931.

THE MINISTER OF COMMERCE AND OF INDUSTRY—SURTAXES OFFSETTING EXCHANGE VARIATIONS

The President of the French Republic, following the report of the President of the Council, Minister of the Interior, of the Minister of Commerce and Industry, of the Minister of Foreign Affairs, of the Minister of Finance, of the Minister of the Budget, of the Minister of Agriculture, and of the Minister of Colonies, the Council of Ministers, by agreement, rules:

Single article. The decree of August 1, 1931, shall be modified as follows:

ARTICLE 1. When the indirect premium covered by article 17, section 4, of the codified tariff laws, which results in a depreciation of the currency with reference to its legal par, the surtaxes which may be established must be computed in such a way as to offset the effects of such depreciation upon the cost price of foreign products.

ART. 2. They shall be established by comparing the actual difference between the present prices in the countries concerned expressed in gold values and those which were used in those countries when the depreciation of the national currency was brought about.

ART. 3. For countries with which France has signed commercial agreements account shall be taken of the depreciation of their currency only in so far as depreciation will have occurred since the conclusion of the last commercial accord between France and those countries.

Done at Paris, December 9, 1931.

PAUL DOUMER.

By the President of the Republic:

PRESIDENT OF THE COUNCIL.
PIERRE LAVAL,
Minister of the Interior.
LOUIS ROLLIN,
Minister of Commerce and Industry.
ARISTIDE BRIAND,
Minister of Foreign Affairs.
P. E. FLANDIN,
Minister of Finance.
FRANÇOIS PIÉTRI,
Minister of the Budget.
ANDRÉ TARDIEU,
Minister of Agriculture.
PAUL REYNAUD,
Minister of Colonies.

The President of the French Republic, in view of article 17 of the codified tariff laws; in view of the decree of August 1, 1931, relating to the establishment of surtaxes compensating exchange variations; in view of the decree of November 12, 1931, creating surtaxes for compensating exchange variations; following the report of the president of the council, Minister of the Interior, Minister of Commerce and Industry, of Foreign Affairs, of Finance, of the Budget, of Agriculture, and of Colonies; the Council of Ministers, by agreement, decrees that:

ARTICLE 1. The following surtaxes compensating exchange variations shall be established or modified for commodities which have originated in the countries enumerated below and for those shipped from such countries, where it has not been shown that they have originated in another country:

Canada, 11 per cent of the value.
Egypt, 15 per cent of the value.
Finland, 15 per cent of the value.
British India and combined native states, 15 per cent of the value.
Ireland, 15 per cent of the value.
Norway, 15 per cent of the value.
The Republic of Argentina, 15 per cent of the value.
Uruguay, 15 per cent of the value.

ART. 2. The provisions of articles 2, 3, and 4 of the decree of November 12, 1931, which established compensating exchange surtaxes shall apply or shall remain applicable. In particular, the commodities shipped before the date of the insertion of the present decree in the Journal Officiel, on the conditions stipulated by article 3 of the above-mentioned decree, shall remain subject to the previous regulations.

ART. 3. The president of the council, Minister of the Interior, Ministers of Commerce and Industry, the Minister of Foreign Affairs, the Minister of Finance, the Minister of the Budget, the Minister of Agriculture, and the Minister of Colonies shall be charged with the execution of the present decree within their respective fields.

Done at Paris, December 9, 1931.

PAUL DOUMER.

By the President of the Republic:

PIERRE LAVAL,
President of the Council, Minister of Interior.
LOUIS ROLLIN,
Minister of Commerce and Industry.
ARISTIDE BRIAND,
Minister of Foreign Affairs.
P. E. FLANDIN,
Minister of Finance.
FRANÇOIS PIÉTRI,
Minister of the Budget.
ANDRÉ TARDIEU,
Minister of Agriculture.
PAUL REYNAUD,
Minister of Colonies.

Mr. HORR. This policy is in force likewise in Argentina, the Irish Free State, Australia, Belgium, and other countries.

If France, a gold-standard country, finds it necessary to make a charge to cover the difference in exchange, why should we not do the same to protect our industries. [Applause.]

Nine months ago the matter was considered as primarily a local matter. Since that time other States and commodities have been affected.

Both the President and the President elect have referred to the need of legislation along those lines in the last campaign, and the day before yesterday the President was quoted as favoring the enactment of laws affecting depreciated currency.

I anticipate that the President elect has not changed his opinion on this subject.

At the present time there is no adequate law to remedy this condition. The antidumping law is ineffective. There is no dumping unless the goods involved are sold in the United States at less cost than in the country of their production.

Besides, the Tariff Commission is ineffective. The Tariff Commission states that it takes an average of six months to determine on its decisions after complaint has been made. Then we get a decision that often is not a decision. We must provide a flexible method of meeting the situations as they arise.

We must have some kind of an organization or commission that can meet these orders in council, or otherwise we can not expect to compete in the markets of the world.

We received a tariff on lumber; and before it actually went into effect, gentlemen, Canada came back with a reciprocal tariff equivalent to ours. To make the State of Washington like it, because we were particularly active in securing that tariff, British Columbia put on for good measure a tariff on our fruits.

You ask me if this depreciated-currency legislation will help. It certainly will. There is not an industry in the State that has not written me, calling my attention to the fact that they can not continue and carry on without this assistance.

Agriculture, mining, fish, timber, everything we had, is gone, and I desire to lend my voice to tell you of the plight of my people. We are not asking for another tariff wall, we are just asking for the opportunity for a square deal. We want our dollar to equal the dollar of Canada and other nations, and without it, gentlemen, you can not expect our people to carry on.

You can not expect them much longer to withhold themselves and be as patriotic as they have always proven themselves in the past. [Applause.]

Mr. WOODRUM. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. MEAD].

Mr. MEAD. Mr. Chairman, very shortly we will be called upon to decide whether or not we intend to continue or destroy the air mail service. A reduction has been proposed in the other legislative body of approximately $9,500,000 in the appropriation, which passed the House a short time ago.

When we analyze the cost of operation of the air mail service, I believe we will come to the conclusion that such a drastic cut as proposed will absolutely ruin this service.

In 1933 we spent approximately $19,460,000 for the air mail service. This sum does not include the revenues resulting from its operation.

The Budget estimate for this year was $20,000,000. The House Committee on Appropriations reduced the amount to $19,000,000, and this amount was approved by the House.

The revenues resulting from air mail are not considered in this appropriation, because it stands by itself and is considered a subsidy to the extent of the appropriation. The revenue from this postal facility amounts to $9,000,000. This is an estimate made by our committee. Therefore, the actual subsidy amounts to $11,000,000; and if you cut $9,500,000 from that appropriation, you destroy the service. When you are doing that you must take into consideration the fact that we have certain contractual agreements with these companies that can not be destroyed without serious consequences.

This industry has been developing over a period of years, and every company has certain equities that ought to be considered before we act in the drastic manner proposed in the other branch of the Congress. Our committee proposes to submit legislation which will correct many of the ills and remedy some of the defects in the air mail industry.

We were authorized by the present Congress in the closing days of the last session, by the Sabath resolution, to make an investigation of this and other activities of the Post Office Department. We have made a complete and exhaustive survey of the air mail lines. An accountant from the department, together with our investigator, traversed every line and examined their equipment, making a trip of approximately 18,000 miles and visiting every air mail center in the United States. Our committee held hearings here in Washington and in the city of Chicago. We have gone into this subject very thoroughly. We are ready now to make a report to the Congress that will provide for substantial savings, permit of substantial reductions, and in my judgment eliminate the sudsidy in its entirety by 1941.

The conclusions reached are that the scope but not the volume of air mail service, judging from the motives underlying the subsidy policy and from the economic circumstances and conditions now existing, is excessive.

We believe that the air mail rates now being paid are higher than necessary, and that the air mail appropriations for the coming fiscal year can be reduced safely by $1,000,000, and this reduction was made by the House Committee on Appropriations and approved by the House; but any further reductions will seriously cripple this industry and defeat the fundamental objectives underlying the present governmental subsidy policy.

We believe also that certain of the extensions authorized by the Post Office Department before and since the passage of the Watres Act should be canceled. We believe that greater limitations should be placed upon the Postmaster General's power to grant extensions and to make rates.

We are convinced that a field audit, an audit of the accounts and the costs of the various lines, should be instituted at once and conducted by the Post Office Department. The results of such an audit, conducted by the department rather than by the companies themselves, will determine the savings that may be effected and the rates that are fair and equitable.

We are ready to propose a fixed rate which, in our judgment, will take 33 per cent of the air mail service out of the subsidized class. The rate that we propose will give the air mail contractor 2 mills per pound-mile, with a maximum of 75 cents per mile. When the mail volume increases so the amount per mile at the mileage rate would exceed 75 cents, that limit would apply. A rate of 2 mills per pound-mile, with a subsidy rate not to exceed 25 cents per mile, would be given to those lines which can not operate without a subsidy. Within a period of five years all of the lines in this class receiving a subsidy would have to go in with the first class and operate on a self-sustaining rate.

We are also going to recommend that interlocking financial interests and directorates in this industry be prevented by law. In last night's papers we read with alarm the report that two holding companies are now buying stock in several air mail lines as well as in aviation manufacturing concerns. If we allow this practice to continue, we will have a giant monopoly that will control the service and hinder the proper development of the industry.

Is it possible for us to reduce the subsidy by $9,500,000? Of course it is possible; but it can not be done, if we intend to continue the air mail development in this country.

It is my judgment that if the recommendations proposed by our committee are approved by the Congress, that we will eliminate this subsidy and within a few years we will make the savings that are now being proposed in the other body. If $9,500,000 is taken from the appropriation for the next fiscal year, the air mail service in many sections of the United States will have to be eliminated. This will certainly be an embarrassment to the incoming administration and a death blow to aviation in this country.

I hope, when the matter is finally acted upon in the other body, and also when the subject comes before our conferees, that the military value, the commercial value, and the social value of aviation will be taken into consideration, and that we will continue to advance this postal facility. [Applause.]

Mr. SUMMERS of Washington. Mr. Chairman, I yield five minutes to the gentleman from Pennsylvania [Mr. KELLY].

Mr. KELLY of Pennsylvania. Mr. Chairman, I am glad to follow the gentleman from New York [Mr. MEAD], after the constructive statement he has made as to the air mail service. He has done a real public service as presiding officer of the investigating committee. I say without hesitation, the work of that committee should result in the saving of millions of dollars in the operation of the Postal Service.

Judging by recent developments in another body, we may be faced with such a drastic cut in the air mail service that it would mean the destruction of this branch of the Postal Service. The report of the special committee headed by the gentleman from New York [Mr. MEAD] will show how the cost can be reduced in a constructive manner. We will propose a plan which will eliminate every dollar of the subsidy now paid the air mail contractors in a reasonable time and make the service pay for itself. The committee had that goal in mind, and is as much interested in reaching it as any Member of the other body could possibly be.

We have expanded more than we should, and we have developed greater mileage in the last two years than we should. Still the service here compares favorably with the air mail service in other countries of the world.

France in 1932 had 22,000 miles in operation and paid a subsidy of $9,683,000 and, in addition, gave the contractor every dollar in postal revenue.

Germany had 20,000 miles in operation and paid $6,868,000 besides the revenue. Great Britain had 13,000 miles in operation and paid $4,260,000 besides the postage revenue.

Italy had 9,500 miles in operation and paid $5,500,000 besides the postage revenue.

The United States had 26,000 miles in operation, flew 32,000,000 miles, and paid a subsidy of $9,500,000.

The figure $19,000,000 is often given as the air mail subsidy. The fact is that postage revenue on air mail equals about half the total appropriation. We actually expend half the appropriation for the purpose of helping establish a great new industry in the United States.

The committee will urge a new system of payment for those carrying air mail. Under it there will be two classes of air mail carriers. The first class will get a rate of 2 mills per pound-mile. The other class will get the fixed rate of 2 mills per pound-mile with a varying payment per mile in addition for a temporary period while mail volume is being increased to the point where the basic rate alone can be substituted.

Mr. Chairman, all air mail operations can continue until the 1st of April, 1936, on their present certificates. I believe several of the largest would come in immediately and take the 2 mills a pound-mile rate. That would take them outside of the subsidy class entirely, for their payments would come from revenues on postage received from air mail. The remaining contractors would for a period of time require the additional payment per mile, but at a fixed date that subsidy would end.

Your committee will undertake to present a plan which will at the expiration of five years take all subsidy from the United States air mail service. It will provide a great nation-wide network of air mail as a postal facility without attempting to subsidize passenger-carrying lines. It will be a post-office facility, furnishing speedy communication at a low rate, proving that it is possible to organize air mail service without a dollar of subsidy. I know the House will not permit the ruthless destruction of this valuable service. I hope you will support the plan to be presented in the committee report. [Applause.]

Mr. BOYLAN. Mr. Chairman, I yield 15 minutes to the gentleman from Texas [Mr. PATMAN].

Mr. PATMAN. Mr. Chairman, it is apparent that I will not be able to cover the subject I intend to discuss fully within the time allotted, and I ask unanimous consent that I may extend my remarks by inserting certain excerpts together with what I discuss.

The CHAIRMAN. Without objection, it is so ordered.

Mr. UNDERHILL. Mr. Chairman, I could not hear what the gentleman's request is.

Mr. RANKIN. I make the point of order that the gentleman from Massachusetts is too late. The question has been put and agreed to.

The CHAIRMAN. The Chair thinks if the gentleman did not hear he has a right to be heard at this time.

Mr. PATMAN. Mr. Chairman, I want to discuss veterans' legislation and the Federal Trade Commission; and as I will not have time to cover the subjects fully, I ask permission to extend my remarks, taking in certain excerpts that I have made up in connection with my remarks.

Mr. SCHAFER. Mr. Chairman, I reserve the right to object. In the gentleman's extension, is he going to cover his views on Andy Mellon also?

Mr. PATMAN. I think I have pretty well covered that subject.

Mr. SCHAFER. If the gentleman is going to cover his views on Andy Mellon, I would have to object, because we are going to have a Democratic Attorney General and a Democratic administration, and I suggest that he lay his views before them on that subject.

Mr. PATMAN. I have that in mind.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. PATMAN. Mr. Chairman, yesterday the gentleman from Virginia [Mr. WOODRUM] delivered a very interesting address about this bill; and although I do not agree with him on everything that he has said in regard to the appropriations contained in the bill, yet I think the gentleman and his committee have been fair with all of us who entertain contrary views. I shall not have the time to fully discuss veterans' affairs. I want to discuss a few of the most common statements that are being conveyed over the country at this time by means of radio, the newspaper, the stage, and the screen.

UNTRUE STATEMENTS

One statement is often made and was made again by the gentleman from Oregon [Mr. MARTIN] yesterday, to the effect that the veterans will cost the United States Government $4,000,000,000 annually by 1946. That statement has been made, and it has been carried in the newspapers. It is absolutely false; there is not a word of truth in that statement. The gentleman from Oregon has withdrawn the statement because it is not true. General Hines made the statement, I understand, before the joint committee, that the veterans will cost the Government $3,000,000,000 by 1946 and later said they would cost the Government $1,446,000,000 annually by 1946. Even the last statement is erroneous, and he asked to withdraw it from the joint committee in order that he may submit a new statement, which he did, and the gentleman from Virginia [Mr. WOODRUM] quoted that statement yesterday, which is that if the laws continue as they are to-day, by 1958, at the peak, at the highest point, the veterans of not only the World War, but of all wars, will cost this Nation only $1,081,000,000 a year.

MAILS USED TO DEFRAUD

These people who are going around the country getting money on the strength of these erroneous and false reports should be prosecuted for using the United States mails to defraud. That is exactly what they are doing, and the National Economy League is one group that is spreading false information.

Mr. RANKIN. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. Yes.

Mr. RANKIN. Before he leaves that point the gentleman from Oregon [Mr. MARTIN], who made that statement yesterday, is always attacking veterans' legislation and upholding Army and Navy appropriations. Suppose the Army and Navy appropriations increased at the velocity they have since the outbreak of the World War, what would they amount to in 1958?

Mr. PATMAN. They would amount to a considerable sum, I will state to the distinguished gentleman from Mississippi, who is chairman of the Committee on Veterans' Affairs. Mr. Chairman, on August 28 Admiral Byrd made the statement in Boston that the veterans of the World War have already cost the Government more than $6,000,000,000. That was not a correct statement. It is exaggerated.

PAID TO FIGHT THE VETERANS

Another statement that he makes is that the taxes raised from the people annually to support the National Government, the State governments, and the local governments aggregate $15,000,000,000, and this group is raising money from the rich people and other people of the country on the plea that they are trying to reduce the $15,000,000,000 annual tax burden. That statement is not true. It is not even two-thirds true. The tax burden, although very heavy, is nothing like that. The aggregate for all taxes—government, schools, roads, waterways, highways, drainage and irrigation systems, pensions, employees, and every function of government, whether it be local, State, or National—is less than $10,000,000,000 a year. They are making money by making these statements and using the mails to collect this money. Why? In order that they may create a little sentiment against the veterans who were honorably discharged from the United States Army, Navy, or Marine Corps, who had more than 90 days of service during the World War, and who are now drawing $12 a month for a 49 per cent disability. The money is also used to pay high salaries to workers and traveling and other expenses.

DOES IT REQUIRE COURAGE TO FIGHT VETERANS?

I have heard people say that it requires courage to oppose veterans' benefits. Does it? Those who oppose veterans have all the metropolitan daily newspapers praising them each day; they get lots of very fine publicity. These newspapers have the ability of the London barristers, who, according to Dickens, "can make the worst appear the better part." The radio, screen, and stage, the other great means of communication, are likewise on the alert to sing the praise of such so-called courageous spokesmen. All these mouthpieces have the ears of the public and are backed by billions of dollars. Does it require so much courage for one to have the side of a question where he will be so ably supported? Men are being paid to fight the veterans. They do not want the people to have the truth.

ANOTHER FALSE STATEMENT

The statement was made, and broadcast, that the World War veterans were costing the Government a billion dollars a year. Of course, that was so erroneous and false that honest and truthful people quit repeating it. It was not more than half true. A substantial part of the half was for insurance benefits, which the veterans themselves paid for with their own money when they were working for Uncle Sam at a dollar a day.

COST OF WAR

Mr. STOKES. Will the gentleman yield?

Mr. PATMAN. Yes. I yield briefly.

Mr. STOKES. Does the gentleman know what the veterans are costing the Government to-day?

Mr. PATMAN. Yes; I think I do. The cost of the last war was more than $30,000,000,000. Does the gentleman from Pennsylvania know how much the men received out of that war? They received less than four and one-half billion dollars out of it during the service, and the difference between four and one-half billion dollars and $30,000,000,000, a substantial part of it at least, went to the war profiteers, some of whom are backing the National Economy League and fighting the veterans who are getting $12 a month for a 49 per cent disability.

NOTHING ALARMING ABOUT PRESENT EXPENDITURES

It is true the war will cost the Government a considerable amount for veterans, but do not be alarmed, when we are assured by General Hines that the amount will never exceed

much what it is to-day, because as World War veterans go on the disability-allowance roll the Civil War veterans and their widows will go off. Spanish-American War veterans and their widows will go off. As one class goes off another class goes on, and in 1958 the amount, General Hines says, will not exceed $1,081,000,000, not much more than it is to-day, including all veterans of all wars.

Mr. WOODRUM. Will the gentleman yield?

Mr. PATMAN. I yield.

Mr. WOODRUM. The gentleman, of course, knows that there is a much greater difference between the cost in 1958 and the cost now than would appear on the surface of the statement the gentleman has just made, for the reason that now we are paying Civil War veterans, which will practically all be out of the way. Now we are paying adjusted compensation at the rate of over a hundred million dollars a year. All of that will be out of the way. As a matter of fact, the increase, according to the statement the gentleman refers to, is nearly $400,000,000.

Mr. PATMAN. That is true; and the insurance benefits will be out of the way. Many people have drawn for 12 or 14 years on their insurance. They can only draw 6 or 8 years longer, and so that will be out of the way. The Government is saving money as additional men and their widows are placed upon the pension rolls. So do not be misled by this talk of two or three or four billion dollars a year for veterans. It is not true and never will be true.

Mr. WHITTINGTON. Will the gentleman yield?

Mr. PATMAN. I yield.

Mr. WHITTINGTON. I am interested in the gentleman's statement that the total tax burden will not exceed $10,000,000,000 annually.

Mr. PATMAN. I did not say ten billion. I said one billion.

Mr. WHITTINGTON. The total tax burden of the people of the United States is $10,000,000,000, I understood the gentleman.

Mr. PATMAN. Oh, yes, indeed. I thought at first you were referring to expenditures for all veterans.

Mr. WHITTINGTON. I am wondering if the gentleman would give us the authority or the facts for those figures?

Mr. PATMAN. Yes, sir; I certainly can. We have recently had an investigation. The gentleman from Kentucky [Mr. VINSON], I think, was chairman of the subcommittee that made the investigation for the Ways and Means Committee, and the report has already been made, and I venture to say it is on the desk of the gentleman from Mississippi. The amount is approximately $9,500,000,000 for all Government enterprises.

Mr. WHITTINGTON. Yes. I am familiar with it. It occurred to me that the facts and figures would be interesting in support of the gentleman's statement.

Mr. PATMAN. Yes. I hope the gentleman will put them in in connection with his own remarks.

FEDERAL TRADE COMMISSION

Now, in regard to the Federal Trade Commission, I want to talk a little time about that. That is one bureau of this Government that can be abolished without interfering in any way with the efficiency of this Government. I suspect every Member of this House has at one time or another made the statement that he was in favor of abolishing bureaus and commissions, and when this bill is considered under the 5-minute rule you will have an opportunity to do so, as I expect to offer such an amendment.

NO REDUCTION FOR VETERANS

Before I go into that more fully I want to suggest to the membership that, as far as I am concerned, I am not going to vote at this time for any amendment which will reduce the veterans or widows' and orphans' compensation and allowance.

I understand the gentleman from Virginia [Mr. WOODRUM], is not going to introduce such an amendment, but I understand that some one else will, and if anyone does introduce an amendment to cut down veterans' benefits 10 per cent, I shall vote against it for this reason: No man who has a service-connected disability should be reduced one penny. The amount that would be saved by reducing the $12 a month veteran would not be sufficient to operate this Government for 8 hours, so why pick on the $12 a month man?

2,000,000 MORE CHARITY CASES

While I was out in the great West last summer and fall I would travel sometimes by stage, going over that beautiful country in New Mexico, Arizona, and Wyoming and other sections of the West, and I would see little shacks along the road, homesteads, the shacks containing perhaps just one room. A veteran in most cases would be living there on that homestead, supporting his wife and his children, sometimes his father and mother, and sometimes one of his grandparents. A great many of these people are afflicted with that dreaded disease tuberculosis. They are being cured in that climate. He raises chickens and sheep or cattle or hogs or something, enough to make a living, along with this $12 a month he is getting from the Government, which would provide flour, sugar, and coffee. He could not make a living without it. Whenever you cut out this $12 and $18 a month man you might just as well make up your minds to take those people, many of them afflicted, out of the great West and take the people off the little farms in all sections of the Nation who are now there and put them on the charity roll of the Government or the local community somewhere. They could not remain on those homesteads or on those little farms unless they got this $12 or $18 a month. At least 2,000,000 people would be placed upon the charity list of some government—city, county, State or National—if the disability allowance law is repealed. So if you are going to make any cuts and reductions, why start on the man who has been drawing, and is now drawing, the small, insignificant sum of $12 a month for a 49 per cent disability? If you want to make up that difference, Mr. Chairman, I can tell you how you can make it up, in a more painless way.

BANKERS' BONUS

Mr. WOODRUM. I was just going to ask the gentleman how he would make up the difference.

Mr. PATMAN. Cut off the bankers' bonus. They are getting a pretty big bonus. This Government can save each year on interest paid to a few powerful bankers more than World War veterans are costing the Government. It is not necessary to pay the bankers an annual bonus of several hundred million dollars.

Mr. WOODRUM. I am willing to join the gentleman in cutting the bankers wherever possible, but will the gentleman point out any place in this bill in the cost of veterans where he would be willing to suggest where we could save a little money or make a reduction?

Mr. PATMAN. There is an investigation of veteran affairs going on now by a joint committee of the House and Senate. That committee has not made its report. Why go into this question while it is pending before the committee? Why can we not wait until the committee makes its report and find out what its recommendations are?

Therefore, we are justified in voting against every one of these reductions, at least until we see the report of the joint committee composed of Members of the House and Senate. There are plenty of places to cut and save money but we will get on the toes of the rich and influential. Our so-called courageous men who are fighting the veterans may accept this as a suggestion as to how they may exercise real courage.

FEDERAL TRADE COMMISSION

Mr. LAGUARDIA. Tell us something about the Federal Trade Commission.

Mr. PATMAN. I shall place in the RECORD an argument that I believe will be convincing as to why the commission should be abolished. It is the most useless board in existence in Washington to-day. It was organized and created for a very useful purpose, but as most boards and commissions usually do, it has departed from the object of its creation and has gone to dabbling and nagging into the business of other boards and bureaus, making itself a nuisance generally, and doing little good, but doing much harm instead. It has no power to enforce laws. It has organized many trusts in violation of the laws. They are an obstacle to law enforcement. I had before the committee the

power hearings, consisting of about 50 volumes. The investigation has gone on four years. It has cost this Government more than a million dollars. They have disclosed some valuable information, but a grand jury could have disclosed all that was material in 30 days. We will find out more in a short time by reason of the Insull collapse than the Federal Trade found out in four years. The Federal Trade did nothing to protect the people against Insull. A good prosecuting attorney could have gone before a grand jury and disclosed that information in less than 30 days. Nobody will read these reports. Will you read them? They are too old. How many people have ever been punished because this commission was protecting the people's rights? Not one. It is a useless, unnecessary board. The statute of limitations has run against every criminal offense before it is disclosed by these investigations. [Applause.]

[Here the gavel fell.]

Mr. SUMMERS of Washington. Mr. Chairman, I yield 20 minutes to the gentleman from Indiana [Mr. WOOD].

Mr. WOOD of Indiana. Mr. Chairman, during the debate in the last two weeks much has been said in criticism of the President of the United States for the figures he has given to the public and this House with reference to his recommendations for economies and for appropriations.

It is my purpose, without injecting any political angle at all, if I can avoid it, to state the facts to this committee with reference to the manner in which these estimates should be considered.

There is always more or less confusion with reference to every appropriation bill that comes before the House. No appropriation bill ever came before the House that presented the exact picture.

The appropriation bills that we consider here are for the purpose of appropriating new money, money that is appropriated for the first time. There is nothing in the bills presented here that shows anything whatever with reference to the permanent appropriations. There is nothing in the bills that shows anything whatever with reference to nonrecurring appropriations.

To my mind, in order that the Congress itself might know and that the people of the country might know, there should be a change in the manner of presenting these money bills. I think either in the report, or through the chairman of the committee presenting the bill, there should be given a list of the permanent appropriations which occur under the jurisdiction of that particular subcommittee and also all the permanent appropriations. Then we would know exactly each year what the operation of the Government of the United States is costing the people. If time permits, I expect to show some of these things that are confusing and some of these things that would be enlightening to Congress if they could be presented at the time of the presentation of the bill.

I wish to take this opportunity to commend the chairman of the subcommittee in charge of the independent offices appropriation bill for the splendid fashion in which he presented his bill. In all my experience as a member of the Appropriations Committee and out of it, I have never known anyone to present his bill as fully and completely as he has done or to throw as much light upon it as he has upon this one. [Applause.] I commend him for it, and I recommend his practice for emulation by chairmen of every other subcommittee.

This measure does not present the true picture, and it does not do it because of some of the things I have referred to. It does not do it because of the nonrecurring appropriations that are not mentioned therein. It does not do it because of the permanent appropriations not being set out. On its face, this bill seems to show a reduction of expenditures as compared with the expenditures carried under the bill two years ago, but as a matter of fact this bill will cost the taxpayers of the country more than the bill of two years ago. This may be news to you, but it is absolutely correct.

When the President of the United States, on the 17th day of January, sent a message to the House calling attention to the fact that excesses were being had in appropriations with no provision being made for raising money for the purpose of balancing the Budget, our good friend, the splendid chairman of the Appropriations Committee, made a mistake when he assumed that the President was complaining because we had not adhered to the maximum appropriation. Had the gentleman read that message in its entirety, he would have seen that what the President was complaining about was that we did not stop at the maximum; that we did not adhere to the maximum, and that we paid no attention to the recommendations for economy.

The chairman of this subcommittee on yesterday made a statement with which I believe every Member of Congress will agree: That the one thing above all others that Congress should do is to balance the Budget. We never can expect to restore confidence in this country, we never can expect to bring money out of its hiding place until that confidence is restored and business is encouraged to start again, and it will never be restored until the Budget is balanced.

In order to balance the Budget two things are necessary. One of them is to reduce expenditures to the lowest possible ebb. The other is to provide measures whereby these expenditures can be met. These are two essentials, and without them our work is not what it should be. It does but little good, or it does only half the good that should be done, to reduce the expenditures of the Government if we do not at the same time provide means of defraying the expenses of Government.

Mr. THATCHER. Mr. Chairman, will the gentleman yield?

Mr. WOOD of Indiana. I yield.

Mr. THATCHER. In order to make wholesale reductions would there not be necessary further action by the Committee on Appropriations and would there not be needed wholesale legislation to curtail and eliminate departments and activities of the Government?

Mr. WOOD of Indiana. That is correct, and that is one of the things the President tried to get us to do in his Budget. The Constitution makes it the duty of the President to advise Congress with reference to existing conditions in the United States and the state of the Union.

It is just as much his duty to advise as to what his ideas are with reference to economy as it is with reference to providing ways and means whereby money may be raised. The President undertook to do this in his message. It seems not to have met with the favor of the Congress or this House.

In order that we may go before the people and square our action it occurs to me that if being not satisfied with the recommendation made by the President whereby means could be provided for the purpose of meeting the expenses of this Government, we at least ought to provide some scheme of our own. Up to this time nothing of that character has been done, and we are bound to adjourn this Congress and turn it over to the new President with an unbalanced Budget. It occurs to me that the best thing that the President elect would like to have done would be to commence running his administration on an even keel and a balanced Budget. Without that being done he can not expect the confidence of the business world to return. If it is not done, instead of conditions getting better in this country they will get worse.

I trust that I am not overpessimistic. I wish I could see in the future, and in the very near future, what a great many people in this country believe will transpire; that immediately after the 4th of March times will get better in this country. Conditions have got to change before times will get better, and conditions will not change through the waving of any magic wand. To my mind we could find no better means of employing our time between now and the adjournment of this Congress than by providing means for balancing the Budget. If this is not done by this Con-

gress, I fear it will not be done by the next one, for God alone knows what that Congress will do; we can only hope for the best.

Much confusion has been had and partisan criticism of the President because of his recommendations for economy and because he has been complaining of the excess of appropriations. There is no need for any confusion on this point. If every Member of the House will look at the first page of the Budget he will see that there are two sets of estimates. The first set of estimates is the preliminary set that comes to the various committees before the House even convenes. The permanent set of estimates does not come until after the Congress convenes and is delivered to the Congress by the President of the United States. For instance, take the Post Office-Treasury bill. This bill was formed, the evidence all heard, and it was marked up before Congress convened. In consequence we did not have the benefit of the revised addition of the Budget and did not obtain it until the 5th or 6th day of December, as I recall.

Mr. BOYLAN. Will the gentleman yield?

Mr. WOOD of Indiana. I yield.

Mr. BOYLAN. In the gentleman's experience as chairman of the committee did he ever receive two estimates from any President while he was chairman?

Mr. WOOD of Indiana. It is the ordinary practice and is done for this reason: In a short session there are only three months in which to pass not only the appropriation bills, but also to do whatever other business we may find time to do. If we have to depend upon the submission of the official Budget, which can not be submitted until after Congress convenes, there would be confusion worse confounded, and we would not pass but very few appropriation bills.

So, the first set of estimates is a working set, and it has been the practice ever since the Budget was adopted to do as we did this time. The preliminary Budget was submitted some time before the committees were called together in November. The official Budget was submitted on the 5th day of December.

Mr. BOYLAN. Will the gentleman yield further? In the submission of the second estimate was that not contingent upon the passing of certain legislation?

Mr. WOOD of Indiana. I shall explain that.

Mr. BOYLAN. The Committee on Appropriations is not a legislative committee.

Mr. WOOD of Indiana. Certainly, it is not a legislative committee, but one of the duties of the Appropriations Committee, as I understand it, is that whenever they submit any legislative proposal that is subject to a point of order, it is their duty to call it to the attention of the proper legislative committee. This has been the practice ever since I have been a member of the committee and is the practice now. We are laboring now under quite different conditions from those of any previous Appropriations Committee in my time, and I dare say, since the Civil War. There are new conditions arising every day. There are new emergencies presenting themselves constantly, so that it is no wonder that there was confusion between the preliminary estimates in the Budget and the official Budget. There is always more or less confusion, and never, in my experience, have we ever found the preliminary Budget to correspond with the official Budget. Sometimes it is greater, sometimes it is less, and this time, fortunately, it happens to be less. With this Budget came certain recommendations.

Upon the 17th day of December the President of the United States saw that nothing was being done toward carrying out his recommendations with reference to economy and also saw that there were excesses in the appropriations being reported at that time, the difference between the two amounting to $172,000,000 plus. Some things have modified this until it is now $163,000,000 plus.

This has occurred in very many different ways. It has occurred by reason of appropriations being made that might have been deferred. It has also occurred by reason of deferred appropriations that should have been made, which simply postpone the evil day. These, if you please, altogether aggregate $163,000,000 in the bills already provided for.

I have asked the Secretary of the Budget to give an analytical statement of what has occurred with reference to the budget and with reference to the economies that have been had and with reference to the deficit that is bound to occur in consequence of economies not having been made.

I shall cite only a few of these, because under my permission to extend my remarks I expect to set this all out in full, because I think you will find it very edifying.

Taking the Department of Agriculture alone, the annual appropriation is $105,130,181, and the permanent appropriation that you did not see in the agricultural bill and had no chance to consider and that you were not enlightened upon amounted to $10,753,166, and the increase by the House of Representatives or by the Appropriations Committee of the House, in consequence of not following the recommendation of the President of the United States or adopting something else in its stead, amounts to $2,931,612.

All the way through we find these facts occurring, so that I say that instead of our getting up here and criticizing the President because of the fact that he, in turn, has been criticizing the Congress for not doing something to balance the Budget, we ought to get busy and do something to that end.

I also think it would, perhaps, be edifying to call your attention to some other facts.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. WOOD of Indiana. Yes.

Mr. LAGUARDIA. Is the gentleman in favor of carrying out the President's recommendations as contained in the Budget message?

Mr. WOOD of Indiana. I will say to the gentleman that there are some things in the Budget estimates that I might not agree with in toto; but I wish to say further that before I would ignore the suggestions made by the President, I would find something to take their place.

I might not be in favor of reducing the Veterans' Bureau expenditures by the amount of $127,000,000, but I would be in favor of doing something else which could be done. My judgment is that, if proper work had been done with reference to investigating and uncovering the frauds that have been committed in that department, not by the department itself but by abuse of the laws passed by the Congress, there would have been a saving of more than $127,000,000.

[Here the gavel fell.]

Mr. SUMMERS of Washington. Mr. Chairman, I yield the gentleman five additional minutes.

Mr. WOOD of Indiana. The President recommended total appropriations for the Departments of Commerce, Justice, and Labor, together with the independent offices bill, a total appropriation for all the services of $1,058,741,556, including permanent appropriations amounting to $81,104,553, or $977,637,003, excluding permanent appropriations. The House committee recommended $1,106,172,818, excluding permanent appropriations, or $128,535,815 increase over the President's recommendations.

Now, what excuse has this Congress for going before the people and saying that we have ignored the President's recommendations with reference to reducing the expenses of Government, and we have been absolutely idle so far as supplanting something in place of his recommendations?

To this amount should be added $1,268,480 for deferments which will be required in the fiscal year, making the total increase for these services $129,804,925.

It is my purpose to insert in the RECORD the genuine cuts, so that this Congress and the Members thereof may know not only the genuine cuts—and there have been many of them made by the committee—but also the postponement of deficiency bills which in themselves are a deception so far as the public is concerned, and also the increases, so that the entire picture may be presented to the Congress. [Applause.]

Analysis of Budget estimates which have been acted upon by the House of Representatives or its Committee on Appropriations to January 27, 1933

Department and type of appropriation	President's recommendations for appropriations (second figure column on first page of Budget message)	Increases by House or by Appropriations Committee of the House		Decreases by House or by Appropriations Committee of the House		Amount approved by House or by Appropriations Committee of the House	Increases over (+) and decreases under (−) President's recommendations after adding amounts representing postponements to future deficiency bills
		By failure to accept the recommendations	Other increases	Genuine reductions	Postponements to future deficiency bills

[1] As passed by the House of Representatives.
[2] As reported by the Committee on Appropriations, House of Representatives.
[3] $331,000 of this amount represents no saving, being merely the reappropriation of unexpended balances.
[4] $60,000 of this amount represents no saving, being merely the reappropriation of an unexpended balance.
[5] As increased by supplemental estimate Jan. 14, 1933 (H. Doc. No. 526), in the sum of $10,000 and as reduced by subsequent reduction on Jan. 4, 1933, of $23,248,200 (H. Doc. No. 518).

The genuine cuts are summarized by departments as follows:

Agriculture	$1,138,315
Interior	846,425
Post Office	1,315,400
Treasury	12,167,521
War	8,070,455
Total	23,538,116

The postponements to deficiency bills are:

Agriculture	$6,814,387
Interior	2,044,600
Post Office	10,957,183
Treasury	13,650,000
War	7,901,951
Total	41,368,121

The increases are:

	Recommendations of economies not adopted	Other increases
Agriculture	$2,931,600	
Interior	1,596,300	$460,000
Post Office	29,784,600	5,177,800
Treasury	4,963,400	
War	4,033,400	9,285,793
	43,309,300	14,923,593
	14,923,593	
	58,232,893	

The details of these amounts are shown in the attached tabulations.

Statement of reductions below 1934 Budget estimates made in appropriation bills which have been reported by the House Committee on Appropriations or passed by the House of Representatives

Items	Total reductions	Reductions which would require appropriations later	Reductions which would result in savings
AGRICULTURE BILL			
Office of Information: Printing and binding	$50,000		$50,000
Extension Service:			
Farmers' cooperative demonstration work	20,000		20,000
Agriculture exhibits at fairs	89,085		89,085
Weather Bureau: Horticultural protection	7,448		7,448
Animal Industry:			
Tuberculosis eradication, indemnities	40,000		40,000
Diseases of animals	17,900		17,900
Eradication, hog cholera	14,390		14,390
Eradication, dourine	4,000		4,000
Plant Industry:			
Citrus-canker eradication	1,542		1,542
Cotton production and diseases	4,921		4,921
Dry-land agriculture	7,639		7,639
Forage crops and diseases	24,486		24,486
Sugar-plant investigations	8,409		8,409
Tobacco investigations	2,403		2,403
Western irrigation agriculture	1,655		1,655
Forest Service:			
Sanitary facilities	1,096		1,096
Planting	60,800		60,800
Range investigation	12,102		12,102
Forest economics	5,608		5,608
Forest-fire cooperation	13,720		13,720
Acquisition of lands	106,246		106,246
Chemistry and Soils:			
Agricultural chemical investigation	16,238		16,238
Color investigation	730		730
Fertilizer investigation	5,987		5,987
Soil Survey	13,792		13,792
Entomology:			
Fruit and shade tree insects	745		745
Truck and garden crop insects	5,100		5,100
Forest insects	13,730		13,730
Cereal and forage insects	36,400		36,400
Cotton insects	14,320		14,320
Insects affecting man and animals	4,850		4,850
Household and stored products insects	3,600		3,600
Identification and classification of insects	4,030		4,030
Bee culture	1,730		1,730
Biological Survey:			
Maintenance of mammal and bird reservations	3,601		3,601
Food habits, birds and animals	18,677		18,677
Control of predatory animals	10,454		10,454
Product of fur-bearing animals	3,791		3,791
Biological investigations	8,287		8,287
Enforcement Alaska game law	5,158		5,158
Bear River migratory bird refuge	2,114		2,114
Migratory bird conservation act	104,775		104,775
Public roads, Federal-aid highways	4,814,387	$4,814,387	
Agricultural engineering, agricultural engineering investigation	75,187		75,187
Agricultural economics:			
Farm management and practice	6,487		6,487
Marketing and distribution	17,270		17,270
Crop and livestock estimates	25,642		25,642
Foreign competition and demand	5,930		5,930
Market news service	4,400		4,400
Cotton statistics	3,477		3,477
Enforcement perishable agricultural commodities act	1,426		1,426
Cotton standards act	1,480		1,480
Grain standards act	6,630		6,630
Wool marketing studies	2,400		2,400
Plant quarantine:			
Plant quarantine act	1,481		1,481
Gipsy moth	35,000		35,000
Corn borer	171,900		171,900
Enforcement grain futures act	1,370		1,370
Food and Drug Administration:			
Enforcement food and drug act	3,224		3,224
Enforcement tea importation act	647		647
Enforcement insecticide act	2,805		2,805
Miscellaneous, forest roads and trails	2,000,000	2,000,000	
Total, Department of Agriculture	7,952,702	6,814,387	1,138,315
INTERIOR BILL			
General Land Office:			
Salaries	41,670		41,670
Surveying public lands	44,000		44,000
Contingent expenses of Land Office	17,170		17,170
Protecting public lands	10,000		10,000
Bureau of Indian Affairs:			
Salaries	22,460		22,460
Purchase and transportation of supplies	44,600	44,600	
Field representatives	620		620
Judges of Indian courts	2,000		2,000
Indian police	10,000		10,000
Determining heirs of deceased Indians	460		460
Probate attorneys	690		690
Surveying and allotting reservations	4,190		4,190

Civilian military training camps	1,000,000		1,000,000	Estimates, all camps.
Ordnance equipment for civilian rifle instruction	+50,000			

[1] In addition, new language inserted authorizes payment for printing survey reports from river and harbor appropriations.
[2] Committee report proposes no reduction in strengths, hence deficiency is indicated; exact amount indeterminate now.
[3] Possibly can be absorbed if cost of ration remains at 31.5 cents (or is less)—rate used by committee. Any increase in cost eats into working capital, which must be replaced by supplemental appropriation.
[4] Will create deficiency—amount can not now be determined. This figure is an estimate.
[5] Estimated deficiency if travel becomes military necessity. Total cut will result in grossly inadequate motor facilities.
[6] Of this cut, $1,203,700 is replaced by a reappropriation of unexpended funds. Net cut is, therefore, $725,025.

[1] Nullified by provision authorizing use of $2,000,000 of Panama R. R. dividends, reducing receipts by same amount.

Mr. WOODRUM. Mr. Chairman, I yield 10 minutes to the gentleman from Missouri [Mr. COCHRAN].

Mr. COCHRAN of Missouri. Mr. Chairman, I regret that I find myself in the position for the first time this session of being unable to follow the Committee on Appropriations. This bill carries the appropriation for the Federal Trade Commission. The Budget recommended $1,109,550, and the committee has reduced this amount to $510,000.

If the recommendation of the committee is approved by the House, then the fight that has been carried on in this body for the last five years will be won by those who are opposed to the Federal Trade Commission looking into the operations of large corporations that have been defrauding the people of this country out of billions of dollars.

Year after year powerful men of this body have attempted to reduce the appropriations for this commission in the House bill.

What does the present reduction mean? It means that the economic division will be practically wiped out. What is that division? That division has been carrying on the water-power investigation and other public-utility investigations, the chain-store investigation, and many others. The work of the investigation of the chain stores will be through by July, but the investigation of the public utilities will not be through.

How about the reports? If the reports are not prepared how will Congress know what legislation should be passed; how will it correct the abuses? Is the money already spent to be wasted?

They have new work proposed for the economic division, and that new work is most important to protect the masses of the people of this country. The millions of our citizens who lost their savings in the stock-market crash in 1929 are interested in these proposed investigations.

One new investigation that is proposed is a sweeping investigation of corporate practices and stock-market transactions. It is hoped that this investigation will result in legislation that will control to some extent stock issues, thus protecting citizens who purchase bonds and stocks. This is a service beneficial to the people and should in no way be curtailed. We do not want a repetition of what occurred in the fall of 1929.

The committee takes it upon itself to pass on the value of future investigations by the Trade Commission. I read from the report:

> The committee did not approve of the initiation of new economic investigations at this time and has stricken from the bill the entire amount estimated for the purpose. The committee is also of the opinion that the remaining activities of the commission can be substantially curtailed without injury to the public interest and has further cut the Budget estimate to the figure indicated.

It looks to me as though this committee is assuming a great responsibility when it takes this position. You are going a little too far when you seek to curtail the activities of the only commission that is supposed to function in a way that the masses of the people will receive some protection and benefit by reason of its investigations.

When the time comes I propose to offer an amendment to strike $500,000, on page 22, line 8, and substitute $1,000,000.

In support of my argument I want to call attention to the testimony of Mr. Walker, the head of the economic division. If you will read that testimony, you can not help but restore that appropriation when the amendment is offered.

He tells you what that commission is doing for the benefit of the people of the country. They want to go into the Insull investigation further. He states that in his testimony. He says that they are receiving complaints now from investors, and I tell you that millions and millions of people hardly have bread to-day who had plenty of money, who lost their savings in the Insull corporations, and yet we find the head of that corporation in a foreign country, refusing to come back to this country and face his accusers, because he knows that he has done wrong. If he did not know that he had done wrong, he would not be taking refuge in a foreign country. Something should be done by this Nation, by the President of the United States, to call upon that foreign country to send that man back here so he will be placed before a jury to determine whether or not he had violated the laws of this country.

If you will read Mr. Walker's testimony and see what he has to say with reference to the value of these investigations and the necessity for proceeding, I know that you will not fail to restore at least a portion of the amount that the Budget was willing to give to this most important commission. I hope that every Member of the House will give some attention to these hearings before this item is reached.

Mr. Chairman, I ask unanimous consent that as a part of my remarks I be permitted to place in the RECORD for the information of the House certain portions of Mr. Walker's testimony, so that Members will have an opportunity to know just what the situation is in the Federal Trade Commission at this time.

Mr. WOODRUM. Mr. Chairman, reserving the right to object, I hope the gentleman will not do that. To just a small portion of the testimony I would not object. I hope

the gentleman will not include a great amount of the testimony that has already been printed in the hearings.

Mr. COCHRAN of Missouri. I would not want to put in a great deal, but I would want to include six or seven paragraphs. The gentleman will claim that he bases his recommendation upon the testimony taken before the committee, and if that is so, he should be willing to put that testimony in the RECORD.

Mr. WOODRUM. But it has already been printed.

Mr. COCHRAN of Missouri. Yes; in the hearings which few Members see.

Mr. WOODRUM. And the gentleman is a great economist, and I know that he does not want to put his constituents to the expense of printing the testimony twice.

Mr. COCHRAN of Missouri. But this is one time where a little money will be well spent. If a reasonable amount is appropriated for this work to continue, my constituents are going to get some benefits, because this commission, with the new appointees that will be selected by President-elect Roosevelt, when he takes office, is going to conduct the Trade Commission in a different way from what it has been conducted in the past 12 years. [Applause.]

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. COCHRAN of Missouri. Here is what Doctor Walker, chief of the economic division, said in part before the committee:

The Government has done a great deal in the way of investigations. We have had an enormous amount of investigations of all kinds, of technological problems and scientific problems, and the amount spent comparatively on business and economic problems that are not technological or of a scientific character in the ordinary sense of the word "scientific," natural science, etc.—I say, the amount spent has been quite small. Yet the problems are much more serious, affecting the welfare of the country and the stability of its organization and its economic success, than most of these others. A great many of them now really amount to little more than making two blades of grass grow where one grew before. That is what the trouble has been; we have got too much production compared with the demand. What we need is to have order in the economic field, and a great deal of attention must be paid to that.

Our corporation laws are notoriously bad. There is not a proper control of accounting in this country. It is much inferior to that of England, for example. Reports of auditors do not mean anything, particularly when you read the certificates which do not themselves claim to verify the accounts. It is an enormous proposition, and the subject has only been attacked in spots. The need of it and the timeliness of it have sometimes been questioned.

I would like to make one or two remarks about the investigations we are conducting for your information. The public-utilities inquiry has been going on for some time, but I think you realize it is an inquiry into an industry that is comparable with the railroads; not quite so large, but of the same general magnitude. The investigation has involved going right through the books, sometimes for 20 years or more, and determining whether the property accounts were accurate as a statement of investment, whether the income was earned as stated, and whether the surplus claimed is a real surplus, and other related questions.

I have a list here which you may wish to have put in the record, possibly, that shows the companies covered by the hearings; that is to say, where the reports and testimony have been put in the record. It shows it by the main groups and the various companies under each group.

A second part of that list shows the companies that are under examination but have not yet been covered in the hearings. That is a smaller list, because we practically had notice—the commission, that is—that we could not expect an appropriation for this inquiry after the current fiscal year.

So our plan is to try to get in all this material, although it will be a very difficult job, before the close of the fiscal year. It can not be put in in the same effective way, I think, that all of it has been done heretofore that has been put in.

We realize that there are important gaps in the degree to which we have covered the public-utilities field with respect to the electrical companies.

We realize even more that the gas utilities will not be adequately covered. We will cover, or try to cover, the two principal groups in a partial way. We do not cover everything in every group. We will cover the two principal ones from certain points of view, namely, the Columbia Gas & Electric and the Cities Service. But there are others that ought to be covered.

I presume you know quite well that we have very recently developed an enormous network of gas-pipe lines, so immense that gas is now conveyed from gas fields in Texas, for example, to the north Atlantic seaboard. Of course, there are numerous gas fields in the country. This interstate movement of gas and the organization of complicated groups of companies, with holding companies and service companies, and so forth, has developed recently in the gas field somewhat in the same manner as in the electrical field, and it is growing rapidly.

This part of the inquiry we did not begin as early as the electrical side and we are in a position where we can not finish this year what we would consider even a reasonably adequate survey of the gas industry. I think the committee is entitled to that information.

You should consider the great many years that have been spent in getting a valuation of railroad properties, which we do not do for the utilities, but which is a subject not greater in magnitude than that we have attempted. We do not attempt to cover every operating company; if we did, it would take many years. But we cover a good many operating companies, the principal holding companies, the principal service companies, and the principal "security" companies, through which sometimes some companies manipulate the values as they pass through the organization.

If I may say a word or two more about utilities, there is one thing we have not got in that list that we intend, nevertheless, to try to get done this fiscal year, if possible; that is, to go through the Insull receivership reports. Some of the practices we found that have been most harmful, perhaps, to that group actually occurred after we had left their offices. The whole situation developing since we were there requires, in our opinion, attention and the receivers are cooperating and glad to cooperate with us in this matter.

There is a great deal of complaint coming to the commission about the finances of these utilities. We have scores of letters coming in from investors complaining about their treatment in regard to securities from all quarters of the country.

In speaking of the staff on duty in the economic division, Mr. Johnson, secretary of the commission, had this to say:

Mr. Chairman, this staff that the commission has in the economic division, and which it proposes to assign to these new investigations next year if funds are allowed, is a skeleton staff, more or less, and it is what we call our normal permanent staff—

It numbers about 100—

They are a group of professional persons, economists, accountants, and statisticians, many of whom came from the Bureau of Corporations. They have devoted their lives and talents to this phase of Government work. If this staff should be dissipated, in my opinion, it would be a most uneconomical and inefficient thing to do, because they could not be replaced. It would be almost impossible to reassemble them again if future work should make their services necessary.

Mr. Chairman, I know many Members are very bitter against the Trade Commission for some of its activities. I have complaints myself and my constituents have complained to me. The commission has in some instances strayed from the intent of Congress. Instead of protecting the little fellow it has to my knowledge in two cases acted in a way to subject it to severe criticism. Be that as it may, we should appropriate sufficient money to carry on these important investigations by the economic division.

Mr. SUMMERS of Washington. Mr. Chairman, I yield seven minutes to the gentleman from New York [Mr. LAGUARDIA].

Mr. LAGUARDIA. Mr. Chairman, I agree with the statement made by the gentleman from Missouri [Mr. COCHRAN], and just a little bit more. I fear that the Committee on Appropriations, unwittingly and innocently of course, has permitted itself to become the tool of dishonest and dirty business of this country. There is no doubt that there is a small group of business men that has been trying to put the Federal Trade Commission out of business for some time. This is particularly true of the power group. Commissioner Humphreys has repeatedly come to the Committee on Appropriations in his efforts to abolish the bureau of economics, and the gentleman from Tennessee [Mr. BYRNS] has repeatedly on the floor of the House, year after year, fought to retain the necessary appropriations. Are we at this crucial time to fall for the underhanded and insidious work of dishonest business and terminate this very useful and necessary investigation? To say that the Federal Trade Commission has not rendered a very useful public service is to ignore the record and to absolutely deny the facts. They have put the dirty power monopoly right out of business, and I am sure the gentleman from Virginia [Mr. WOODRUM] is not unacquainted with what has happened in the last few weeks in New York, because he must know that their lobbying, their bribing, and their propaganda department has gone out of business and they have reincorporated under a new game which they seek now to cover up their dirty and nefarious work of the past—and when I say bribery I

mean bribery—throughout the country in legislatures, municipal councils, public-service commissions, and even educational institutions. The facts revealed by the Federal Trade Commission leave no doubt as to that. They now call themselves the Edison Electric Committee, and are now under the personal direction of an experienced though slimy lobbyist.

Mr. WOODRUM. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. WOODRUM. The gentleman was present, I think, when I made my opening statement on the bill, and he will recall that I said in my opening statement that probably the Federal Trade Commission had been cut too much.

Mr. LAGUARDIA. Yes; and the gentleman so stated to me personally. I am glad to have him on our side. Our colleague from Texas [Mr. PATMAN] referred to the volumes and volumes of the record of investigation of the power interests, and yet, gentlemen, if we cut this appropriation to the extent recommended by the committee, all that work will be lost and they will be unable to complete their report, which runs into the next year. Of course, it will be necessary to complete that work. Naturally the individual culprits, the stock manipulators, and the crooked directors would want to see the the final report prevented. It does not affect perhaps the individuals in Virginia or the individuals from the State of Washington directly, but it interests the investing public of those and all States. Right in my own city there is a gang that wants to put the Federal Trade Commission out of commission, because the commission is now contemplating an investigation into the financial practices of corporations.

The people of this country have been mulcted and swindled to the extent of billions of dollars by confidence men posing as financiers and big business men. I have a letter on file in my office from an official of one of the biggest corporations in the world, and every gentleman here would recognize it in a moment, who writes me:

> I don't know whether my directors are double-crossing me at this very moment by running down the stock of their own corporations.

And the Federal Trade Commission, which is the one fact-finding body which we have at this time to go into these details properly, intelligently, with the necessary technicians and experts to get the information, is preparing to conduct just such an investigation. The crooks of big business and the cheats of power dare not come out in the open and oppose the commission, so they seek to cripple it by taking away appropriations. I was very happy to hear the gentleman from Indiana [Mr. WOOD], the former chairman of this great committee, after speaking for 20 minutes in defense of his administration, in defense of the recommendations of the Budget, defending the administration and criticizing Members for taking issue with the criticism of Congress and the Committee on Appropriations, say that he would go along with the Budget recommendations, because the Budget recommendations for the Federal Trade Commission are $599,000 more than the amount given by the committee. I expect the gentleman from Indiana, therefore, to fight with us for the restoration of this amount to the appropriations for the Federal Trade Commission. If Commissioner Humphreys desires to protect the crooks of business, he ought to take a retainer from them and resign his position. He is not doing his duty and carrying out the intent of the law by his covered attitude to defeat and destroy the purpose and function of the commission. I insist that we must continue the good work initiated by the commission.

I expect the gentleman from Indiana [Mr. WOOD] to support this item, although I know down deep in his heart he is one of the few who would want to put the Federal Trade Commission out of business.

Mr. HASTINGS. Will the gentleman yield?

Mr. LAGUARDIA. I yield.

Mr. HASTINGS. I wish to say in behalf of the committee, we appreciate the fact that the Federal Trade Commission has done some good work, but we think this appropriation is adequate. Those who voted to reduce this amount believe that every time a Senator rises in his place and offers a resolution to make some investigation, he ought to be compelled to see that the money is forthcoming to pay the expense of that investigation.

Mr. LAGUARDIA. Oh, I know the gentleman from Oklahoma [Mr. HASTINGS] acted in the best of good faith, but let me call attention to a plank in the platform of the gentleman's party. Let me say that it was a very attractive plank:

> We advocate the protection of the investing public by requiring to be filed with the Government and carried in advertisements of the offerings of foreign and domestic stocks and bonds, true information as to bonuses, commissions, and principal invested, and the interest of the sellers.

That is a part of the business-practice investigation which this commission is about to undertake. I am sure the gentleman from Oklahoma [Mr. HASTINGS] and other members of the committee do not want to lend themselves as agencies to destroy this very necessary information for the protection of the investing public.

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. LAGUARDIA. I yield.

Mr. SUMNERS of Washington. I would like to say, as one member of the committee, that I have always been a very staunch supporter of the Federal Trade Commission and a very great believer in the efficacy of its work in behalf of the public. That is still my attitude, although in our judgment we did believe there were some estimates that might be eliminated at this time, but we did not mean to cripple the work of the commission.

Mr. LAGUARDIA. Now that is very encouraging. I never utilized seven minutes in this House for a better purpose. The distinguished chairman of the subcommittee, the gentleman from Virginia [Mr. WOODRUM] admits that the cut was too drastic. The ranking member of the subcommittee on the minority side, the gentleman from Washington [Mr. SUMNERS], states he believes perhaps the appropriation is not large enough—it looks indeed as if the swindled investors and honest business will really have their day.

Mr. WOODRUM. If the gentleman will permit, I admitted that before the gentleman made his speech.

Mr. LAGUARDIA. Oh, certainly. I know I could not influence the gentleman from Virginia by anything I said, but I say it is comforting to have the gentleman repeat his stand, and to get that reassurance, and also that of the gentleman from Washington [Mr. SUMMERS] so that when the time comes, we ought to reinstate the appropriation necessary to carry on this very useful work. [Applause.]

The CHAIRMAN. The time of the gentleman from New York [Mr. LAGUARDIA] has expired.

Mr. WOODRUM. Mr. Chairman, I yield three minutes to the gentleman from Texas [Mr. RAYBURN].

Mr. RAYBURN. Mr. Chairman, I had not intended to say anything on this item in the bill. Frankly, I did not know what the Appropriation Committee had done until this morning when I read the remarks of the gentleman from Virginia [Mr. WOODRUM].

It so happens that I was a Member of this House when the act was passed creating the Federal Trade Commission, and I happened to be a member of the subcommittee of that committee which whipped the bill into form and brought it to the full committee. I remember it was one of President Wilson's recommendations. It was a part of his main program for legislation, during his term. I do not think there has been a law passed in the last 20 years that had a higher or nobler purpose than that which actuated the enactment of the Federal Trade Commission act. I have, however, at times, on this floor, criticized the set-up of that commission, and there have been times since its creation when its personnel, in my opinion, practically destroyed the efficiency of the law. I know and everyone here knows that when any function of government is committed to a board or to a commission, it matters not how good the law may be, if it is administered by men who are not right the administration

of the law is not right and it is a futility. I do think, however, that at this time, in the condition in which we find ourselves, and in view of the searching investigations that the commission has made in recent months, it would be most unfortunate if we now let it go to the country that we, in this appropriation bill, by refusing an appropriation, had crippled the Federal Trade Commission. [Applause.]

I think it would give courage to elements in this country that do not deserve to be encouraged at this time. I feel that the incoming President will realize that this commission, great in its inception, great in its possibilities, will be no more useful or helpful than the men who compose its membership. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. WOODRUM. Mr. Chairman, I yield 10 minutes to the gentleman from Nebraska [Mr. HOWARD].

Mr. HOWARD. Mr. Chairman, the Republic of the United States is at the crossroads, and both of the roads lead to revolution.

One of the roads leads to a revolution by physical force.

The other road leads to a revolution of law—law to be enacted by the new Congress, which has received a positive mandate from the American people.

This country can not stand long at the crossroads. Very soon a choice must be made. Very soon the torch which has been touched to the powder can in Iowa and Pennsylvania, where the landowners have offered physical resistance to lawful authority, will be applied to other powder cans in other States.

There is only one mighty arm which can be stretched out to prevent a revolution by physical force. That arm is a new President and a new Congress, elected by the country to revolutionize the style of government which has brought millions of citizens to the door of despair.

Under that style of government which has held sway in recent years the demands of wealth have reached official ears, which have been closed against the pleadings of the masses of the American people for equal rights to all and special privilege to none. The administration to be conducted by the new President of the United States and the new Congress will obey the mandate of the American people, as expressed at the polls in November, or will ignore that mandate. To ignore that mandate will be a direct invitation to the landowners in all the States to adopt the policy of the landowners in Iowa and Pennsylvania.

What is the policy of the Iowa and Pennsylvania landowners?

It is nothing less than organized opposition to the lawfully constituted authorities in those States. It follows naturally that the next step to be taken by the authorities in those States where the farmers are in open revolt will be an effort to subdue the revolting farmers by force. The local sheriffs have not been able to bring sufficient force to bear against the revolting farmers. Very soon some governor in some one of the farm States will call out his troops to subdue the revolting farmers.

What then?

Every student of the situation now knows what will happen in the day when a military force shall be called to subdue the revolting farmers.

Let us turn from contemplation of the horrors which must attend a revolution against existing law—a revolution against authority which the folks in all the farm States feel and believe has been created by and for the owners of great wealth rather than by and for the masses of the people. Let us look upon a picture of revolution by law rather than upon a picture of revolution against law. We must contemplate one of the two pictures. In a very near day the American people will be compelled to look upon one of the two pictures.

I have faith to believe that our new President and our new Congress will immediately begin a revolution by law, not delaying until the masses of the people shall rise in revolt against existing law. Our new President and our new Congress will come to Washington fresh from contact with the people. Among the new Members of the Congress will be found many—perhaps a majority—ready to begin the revolution by law rather than to delay until the day of actual revolution by the people against law. It has been written that in all great emergencies a leader appears. I believe Franklin D. Roosevelt will be that leader. He will need helpers in his leadership. He will find them in the ranks of the membership of the new Congress. He will find them in the ranks of the membership of the present Congress. I am not speaking now as a political partisan. I have talked with both Republicans and Democrats elected from the farm States as Members of the new Congress. And among them will arise from one farm State a Blücher, who will be the same kind of helper to Roosevelt that Blücher was to Wellington. And from another farm State will arise a Sheridan, who will be the same kind of helper to Roosevelt that Sheridan was to Grant. And from still another farm State will come a new Member of the Congress, with all the zeal of a Polish lancer, and who will be as loyal to Roosevelt in the bringing of a revolution by law as ever were Polish lancers in battle, loyal under the eye of the emperor. And from some farm State in the Southland will come a Congressman with Christian zeal to help Roosevelt as Stonewall Jackson helped Lee. And together the forces of right, under command of a Roosevelt, will accomplish a successful revolution by law against a style and type of government which has carried despair to the hearts of millions of the victims of that type of Government.

I now believe President Roosevelt and his helpers in the new Congress will immediately lay the foundations for a peaceful and bloodless revolution by law. To believe otherwise is to believe that a revolution of the other kind will appear like a thunderbolt from a clear sky.

May the God of men and nations attend the immediate launching of a revolution in the United States by law, to the end that the Republic may escape a revolution against the existing law which has brought the country to the very door of danger. [Applause.]

Mr. WOODRUM. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. THOMASON].

Mr. THOMASON. Mr. Chairman, several times during the last two months I have protested the unwarranted and arbitrary abandonment of Fort D. A. Russell, a military post on the Mexican border at the town of Marfa, Tex.

Several times I have made bold to predict that if that post were abandoned it would not be very long until the old border raids would be renewed.

I presume if there is a responsible news-gathering agency in this country it is the Associated Press, and with the permission of the Chair I shall read a brief clipping from an Associated Press report of day before yesterday.

BANDITS RAID RANCH STORES IN BIG BEND—MEXICANS CROSS RIVER AND STEAL CATTLE NEAR MARFA—CITIZENS ARM SELVES—REMOVAL OF TROOPS, LEAVING ISOLATED BORDER POINTS WITHOUT PROTECTION

JANUARY 28.

Reports reached here to-day that ranch men in the vicinity of Presidio, 70 miles south of Marfa on the Rio Grande, had armed themselves as a protection from raids by bandits crossing the river.

Stanley Casner, manager of the Chinati Plantations north of Presidio, said that a store which carried supplies and clothing for farmers had been looted and that an investigation proved the robbers were from Mexico.

Casner stated the Mexicans who crossed a shallow ford at that point had boasted openly that soldiers at the post at Fort D. A. Russell at Marfa had been removed and that they could do as they pleased.

Robbery of a small store at Ochoa and the burning of a dwelling near Presidio after it had been ransacked also were reported. Cattle and horses were said to have been driven across the river in large numbers.

I also read an article from a Washington paper carrying a dispatch of the Universal Service:

MEXICAN BANDITS RAID UNITED STATES STORE—BORDER ALARMED

MARFA, TEX., January 28.—Texas Rangers to-night were strung along the Rio Grande to prevent another raid on American property by Mexican bandits.

The increased vigilance followed a report that a band of 25 mounted Mexicans crossed the Rio Grande 8 miles below Presidio and raided a store of merchandise and $800 in cash.

A renewal of the reign of terror which was rampant before the war was feared by border residents as a result of the withdrawal from Fort D. A. Russell of United States Cavalry, which leaves the border unguarded except for the handful of Texas Rangers assigned to the 500-mile stretch of wild and uninhabited border country.

Mr. Stanley Casner is a friend and constituent of mine, a former mayor of the town of Marfa, and a prominent rancher in that section. I know him to be a truthful man, and I repeat and urge what I have tried to say several times on the floor of this House: That the abandonment of this post was absolutely unwarranted and without proper investigation of the facts.

Mr. Chairman, I also repeat the statement I have made several times: That in peace times the United States Army ought to be used for the protection of the lives and property of American citizens. If they are needed anywhere, it is on the Mexican border.

I know the border of Texas, because I have lived there many years. I am not going to recite the sordid details of the Columbus raid again, or of the Brite ranch raid, and I realize that Pancho Villa and Pascual Orosco are dead, but their successors are still running wild by the hundreds in northern Mexico. I say it is not fair to my people nor to this House that the War Department of the United States should deny any Member of Congress a fair and decent hearing before the Military Affairs Committee when a resolution to determine proper military policy is pending. The chairman of the Subcommittee on Appropriations announced that hereafter we were to have a mechanized army. The War Department issued an order almost overnight moving 600 men to the plains of Kentucky, at a cost of $75,000, to a place where they were not needed, scattering the horses over the country and leaving 500 miles of the Mexican border without a soldier on it.

If you followed the reading of the article carefully, you noticed that the bandits came in on horses, and I should like to see the $435,000 increased motorized equipment that was placed in the War Department bill the other day catch these 25 Mexican bandits. [Applause.] I know that country, every foot of it. An airplane can land in not more than half a dozen places in the Big Bend of Texas. These motor trucks and all of this motorized equipment that we talked about so much, and which came up by way of legislation on an appropriation bill the other day, can not get a mile off a road in the Big Bend country of Texas. Yet, without an announced policy by Congress, the War Department moved these troops twenty-five hundred miles to the interior, taking them from the place they were needed and leaving border protection to a small band of brave Texas Rangers. I am proud of the Texas Rangers, but my State is an empire, and they can not defend a thousand miles of wild border. My district alone is bigger than most of the States of the American Union. It is more than 600 miles long.

Mr. McKEOWN. Mr. Chairman, will the gentleman yield?

Mr. THOMASON. I yield.

Mr. McKEOWN. I may say to the gentleman that this last summer I was in that country. You can not catch bandits or get over that rough country without good horses.

Mr. THOMASON. That is the truth. General Pershing took a whole regiment of Cavalry and chased Pancho Villa 150 miles into Mexico and then did not catch him.

Mr. SCHAFER. Will the gentleman yield?

Mr. THOMASON. I yield.

Mr. SCHAFER. Has the gentleman heard Mr. COLLINS, chairman of the Subcommittee on Appropriations, say that we do not need any increase in the Army?

Mr. THOMASON. I am here to let you know that my prediction has come true, and not only that, but I make the further prediction that if the War Department will not listen to those who know the true situation and will not come before the great Committee on Military Affairs, of which my friend from South Carolina, Mr. McSWAIN, is the very able chairman, and give us a hearing to determine policies of national defense, we are going to find many little towns along the Mexican border wiped out just as Columbus, N. Mex., was wiped out, and the consequent loss of American lives and property.

In behalf of my people I beg and plead with Congress that if the War Department will not give us relief, that the Congress see that we get it and that the American citizens on that far-flung border have some measure of protection. I hope to renew my efforts with a larger measure of success after we have a new and sympathetic administration.

Mr. SUMMERS of Washington. I yield five minutes to the gentleman from Kansas [Mr. McGUGIN].

Mr. McGUGIN. Mr. Chairman, my friend from Washington, Mr. HORR, stood here this afternoon and discussed the need for additional tariffs. I am in sympathy with the gentleman from Washington in so far as he presents a most embarrassing situation. There is not any question but that depreciated foreign currencies are causing no end of trouble to American industry. There is no question about that. Depreciated foreign currencies are not only driving American industry out of its own American market, but depreciated foreign currencies are driving American industry out of the foreign market.

Any right-thinking person wants to meet this situation, but you simply can not meet the question brought about by depreciated foreign currencies with more tariff. You do not start to reach the real evil; all you do by increasing the tariff in proportion to the depreciation of foreign currencies is that you say to American industry, "We guarantee you a monopoly of the American market," but you stop there. You give American industry no relief in its foreign market, and you do not benefit the American manufacturing industry in the end. Why? Because the American manufacturing industry must depend on American agriculture for the principal source of its American market. Give to American industry a monopoly of the American market and yet not protect American agriculture from the evils of depreciated foreign currencies, and you have given American industry a gold brick, because American agriculture will be unable to buy the product of American manufacturing industry.

Let me give you the picture. There is nothing suffering quite so much to-day from depreciated foreign currencies as agriculture. Wheat and cotton are our two principal agricultural products, and they must suffer discriminatory freight rates from the point of origin to the Atlantic coast, then transportation charges to England, and then sell for the depreciated British pound, which is brought back to this country and is worth $3.30 instead of $4.86, the former established value of the British pound.

This tariff arrangement will not deliver wheat and cotton from the evils of depreciated foreign currencies; and unless you deliver wheat and cotton from the evils of depreciated foreign currencies, you will have no market for the manufacturing industry. You can come here and by legislation guarantee to industry a monopoly on the American agricultural market; but industry will have nothing, because agriculture must be sold for depreciated foreign currency.

We find ourselves to-day in this dilemma; we find one class here thinking it can deliver itself at the expense of the other class. That can not be done. The truth is we are all in the same boat, and we are either coming to shore together or we are not coming at all. That is particularly true with industrial labor and agriculture. They are both in the same boat, and they are either coming ashore together or they are not coming. This was the weakness of the allotment bill. Basically, the theory of it was that we could arbitrarily increase farm prices at a time when there are 12,000,000 unemployed who with their dependents make 48,000,000 people.

Mr. SUMMERS of Washington. Mr. Chairman, I yield the gentleman from Kansas two additional minutes.

Mr. McGUGIN. It is a false philosophy to assume that you can arbitrarily save agriculture at the expense of the 12,000,000 unemployed. This proposed tariff measure presents the same proposition, only the other way around. You are assuming that if you give industry a monopoly on the agricultural market, you can save industry at the expense of

agriculture. This will not work. Both propositions are just as wrong as one person who is pauperized thinking he can profit off another person who is also pauperized. The scheme will not work.

We hear it said that all that is asked by this bill is to restore the Hawley-Smoot tariff rates to where they were at the time of their enactment. All right; maybe you can on paper restore them to where they were at the time of their enactment by arbitrarily increasing them in keeping with the depreciation of foreign currency, but you are overlooking something. At the time of the enactment of the Hawley-Smoot tariff bill agriculture had an income which was from 60 to 70 per cent more than it is to-day. So you might restore the rates, but you can not restore your market for industry by following this policy. Unless you can restore the income of agriculture by increasing it from 50 to 60 per cent, and thereby restoring it to where it was at the time of the enactment of the Hawley-Smoot tariff bill, it is folly to try to increase these tariff rates.

Again, pass this bill, and England and every other foreign country would be justified in laying an embargo against American products. Then what will we do for a market for wheat, cotton, hogs, and other exportable products?

Mr. BOYLAN. Mr. Chairman, I yield 10 minutes to the gentleman from Kentucky [Mr. MAY].

Mr. MAY. Mr. Chairman, personally I am very much in favor of a well-controlled expansion of the currency. I am warmly in favor of the retention of the proper functions and activities of the Federal Trade Commission, and yet I believe very greatly in a more extended program of economy than we have yet undertaken. I agree with my distinguished colleague of long years of experience from the State of Indiana [Mr. WOOD] that if we hand over to the new administration the Government with an unbalanced Budget, we will have paralyzed its efforts in the beginning. In some instances cutting appropriations is practicing what is sometimes styled "penny wise and pound foolish" methods.

But I have not risen to talk to you about the question of either balancing the Budget or the necessary methods by which economy may be obtained. I have risen, with the indulgence of the committee, for a few moments to defend, if I may say so, not only the present Republican President of the United States but also the incoming Democratic President of the United States.

When I was a mere boy, my dear, old father, who journeyed upon this earth for more than 94 years, in good health and in sound mind, used to take me upon his knee in my spasms of impassioned and ill-considered expressions, and say to me, "Son, if you can not say something good about the man, for the Lord's sake do not say anything at all."

I take the position that it is not only in keeping with the dignity of the House of Representatives but it is the duty of the Membership of the House to maintain that high equilibrium set forth in Holy Writ, which says that it is our duty to maintain and support the magistrates and those in authority in the Nation.

I undertake to say, notwithstanding the exaggerated and inflammatory utterances of some of the subsidized press of this country, that it is infinitely unjust to the President of the United States or to the President elect for the press or the House of Representatives to criticize until they know what they are talking about.

The question of war debts is an international issue, and it involves complications of diplomatic relations and matters of diplomacy and of necessity must always be somewhat veiled in the discretion of wise men. Knowing the history and the career of the President elect, as I do; knowing that he is a great Democrat, perhaps as great a one as we have had since the day of Thomas Jefferson, and knowing the broad, actual practical experience he had as Assistant Secretary of the Navy during the troubled days of the Woodrow Wilson war Congress, I am unwilling to believe that he is so unwise, so inconsiderate, and so void of discretion as to either commit himself personally or as Chief Executive of the Nation, much less to assume the authority to commit the Congress of the United States to any definite terms in the settlement of war debts. Therefore, I undertake to say that it is the duty of this Congress, in good faith, upon the doctrine that he who would speak when he should not speak will not be permitted to speak when he would speak, to let the President elect and the President of the United States and the world and the nations of Europe know just where we stand upon this proposition, that they may not be misled or deceived by anything that we may do hereafter.

I want to read from the Democratic platform of 1932, adopted at the Chicago convention, this preamble, if you please:

> We believe that a party platform is a covenant with the people to be faithfully kept by the party when entrusted with power, and that the people are entitled to know in plain words the terms of the contract to which they are asked to subscribe. We therefore declare this to be the platform of the Democratic Party.

Then follows this declaration:

> We oppose the cancellation of debts owing to the United States by foreign nations.

When I realize that this precedent-breaking President elect, although disabled physically and yet a giant mentally, climbed into an airplane at Buffalo, N. Y., and broke the precedents of all time in a mad rush to Chicago to accept the Democratic nomination for President and there declared to the representative delegates of the American people and his party that he stood 100 per cent for this platform—I say I am unwilling, in the face of this declaration, to believe that he would be a party to any understanding, direct or indirect, with the ambassador of any country upon the face of the earth in any manner contrary to the wishes of the Congress of the United States.

Nevertheless, I say now, speaking to Democrats, in the face of our party's platform, in the face of similar declarations in the platform of the Republican Party, it is the duty of the Congress of the United States to let the President elect of the United States know where they stand upon this question, and I call attention to the policy of the Congress adopted in the resolution that granted a moratorium in December, 1931, and to a subsequent resolution of the Senate of the United States which declares the policy of this Congress to be against the surrender or cancellation of any of these debts. As for me, I propose to keep faith with the people who so generously supported me with their votes in the recent election when I stood upon the covenant contained in the party's platform adopted in Chicago last June. I do not propose to lift the burdens of these debts off the governments of Europe and place them upon the already burdened backs of my people. I refuse, Mr. Chairman, to transfer, by my vote, the benefits of these debts from the American people to the great international bankers and speculators of America and Europe and thus impose upon the American taxpayer burdens he must bear for generations to come. I have no enmity or animosity toward any other nation upon the earth; but when I hear the edict of Israel's first lawgiver, "Choose you this day whom ye will serve," I gladly choose to serve America.

Therefore, I say this in conclusion, that it is unfair to the membership of this House and the President elect that he should be even suspected of secret understandings in violation of the expressed policy of the Congress on the subject of war debts without first knowing what he has done. I have no fears of any rash or unwise action on his part, and, as for me, I shall not convict or condemn my party's leader until I hear all the evidence and am fully and adequately advised.

Mr. Chairman, I conclude by this statement, that if we should remain here during this Congress silently and quietly refusing to express ourselves on this proposition we will have done an injustice not only to our incoming President but an injustice to the people whom we represent and ourselves as well.

I am unwilling to agree to a cancellation of these debts. I shall not remain on the floor of this House and vote for the cancellation or the surrender of any of them, but I say I shall follow the leadership of the great and wise statesman

and leader, Franklin D. Roosevelt; and if he shall come to me and recommend some readjustment of war debts by the Congress, and his proposal shall seem expedient and wise, I will give it consideration, but I say I stand where I stood in 1931, when I voted against the moratorium on the European debts, which seems to have cast us into many difficuties. [Applause.]

These remarks are made with the hope that this House will make an effort to help the President elect settle this by diplomacy rather than by newspaper reports which are sometimes true and sometimes untrue, or at least often greatly exaggerated, especially when one acts upon a misunderstanding of the facts, or lack of sufficient information.

Mr. Chairman, I yield back the remainder of my time. [Applause.]

Mr. SUMMERS of Washington. Mr. Chairman, I yield one minute to myself, in order to say that as another who voted against the moratorium, I greatly appreciate and concur in what the gentleman from Kentucky [Mr. MAY] has said in regard to the advisability of this House letting the country know what its attitude is toward cancellation of debts by foreign governments. I am opposed to cancellation. I have always opposed cancellation. To do so would transfer the war burden to the backs of American taxpayers.

I can not conceive of the President elect engaging in any conversations that would forestall the action of the Congress or of attempting to do so as portrayed in the press during the last few days. I stand where I have always stood—I never voted for the moratorium, I never promised to do so, and I am against the cancellation now.

Mr. Chairman, I yield five minutes to the gentleman from New York [Mr. REED].

Mr. REED of New York. Mr. Chairman, there has been such a vigorous and concerted attack made upon the Hawley-Smoot Tariff Act, especially by its political opponents during the recent campaign, that I venture to say that much of the criticism has been inspired from foreign sources. The fact that its chief critics in this country have pictured the disaster it has caused, especially to our farming interests, makes it interesting to compare these assertions with those made by its foreign opponents.

There appeared in the Canadian Forum, under date of September, 1932, an article entitled "Canada and the American Tariff," in which the writer points to the effect of the Smoot-Hawley Tariff Act upon the Canadian farmers. This is what the writer had to say on this particular topic:

> This act practically wiped out Canadian export of feeder cattle, and of milk and cream to the United States. The farmers of the prairies found the cattle a welcome source of cash income in times of poor wheat crops, and the dairy farmers of eastern Quebec and of New Brunswick had built up a profitable business selling to the metropolitan centers along the eastern seaboard of the United States. Furthermore, they had gone to great pains to change their herds of cattle to conform to sanitary requirements of the consuming markets.

While it is claimed by the opponents of the Hawley-Smoot Act that it has not been beneficial to the American farmers, the foreign competitors complain bitterly because it has protected the American market by keeping foreign dairy products out. The Canadian critics admit that our tariff act has prevented them from invading our market in three important particulars: First, it has prevented the sale of a large number of Canadian cattle in our market; second, it has greatly reduced the sale of Canadian milk and cream in our market; third, it has forestalled Canadian plans to expand its dairy industry to take advantage of our market.

The assertion can not be made too often, lest the dairy interests forget, that the chief market for their dairy products is in the protected market of the United States. It is the best cash market in the world to-day. This is true even under the present depressed conditions. Not only this, were it not for the high duties on dairy products carried in the Hawley-Smoot Tariff Act, the domestic market would be flooded with the butter, cheese, milk, and cream from New Zealand, Australia, Denmark, and Canada.

Naturally, the critics of the Hawley-Smoot Tariff Act will challenge the statement that countries so far removed from the United States as those I have mentioned could not pay transportation rates and successfully compete with our farm products. On this point I again wish to refer to Canada. I refer to the action taken by the Dominion Government when New Zealand saw fit to ship dairy products into Canada under a special dispensation primarily intended for Australia under a trade agreement.

> I quote from the Canadian Year Book (1930–31): New Zealand had taken full advantage of the opportunity to export butter to Canada and this trade had reached such proportions as to alarm the dairy industry. In May, 1930, the Dominion Government gave notice to New Zealand that on October 12 the Australian treaty rates would be withdrawn on New Zealand products, the intention being that in the interval a new arrangement would be concluded.

This action was taken by Canada against a competition 10,000 miles from her markets. It was taken against a country composed of three islands, the aggregate area of which would about equal the area of Pennsylvania, Illinois, and half of Rhode Island combined.

I am not complaining about the action of Canada in the case nor do I question her wisdom in protecting her dairy industry. I think Canada acted wisely. I maintain that the Congress of the United States acted wisely when it took action to protect our farmers from the dairy imports from Canada.

The benefits derived from the Hawley-Smoot Tariff Act, to which I have referred, occurred before foreign countries had depreciated their currencies and largely nullified the protection which it was sought to give to the dairy interests.

It was impossible for the Ways and Means Committee when it framed the tariff act of 1930 to foresee the action that would be taken by foreign countries to circumvent the tariff rates intended for the complete protection of the dairy interests of this country. Since these countries have depreciated their currency the tariff wall is no longer effective. Therefore, this Congress should no longer delay action on a tariff measure to prevent disaster to the dairy industry because of foreign depreciated currency. This delay is causing untold hardships to this great industry and there is no excuse for aggravating the situation by further procrastination. There is no doubt that action taken by the present Congress to that end would have the cooperation of the Republican Members of the House and Senate. I believe that in a time of great emergency that it is the duty of every man, no matter how partisan, to realize that we face a condition and not a theory when it comes to protecting the interests of this country. It may be unpleasant for the majority in power, in view of the pledge made in its platform to reduce the tariff, to now take action to increase it. It may be a matter of personal embarrassment to many individual Members of Congress who so viciously attacked the Hawley-Smoot Tariff Act during the last campaign to now vote to make that act effective under present world conditions. The conditions of this country, however, demand it and we can not hope to increase commodity prices of farm products in the face of the large imports coming into our market at a time when it is difficult to dispose of our own domestic surplus.

The problem which confronts us, due to the depreciated currency of foreign countries, could and should be remedied at once. It is well known to every legislator that foreign countries have taken prompt and effective action to protect their interests with adequate tariff duties. While they are protecting their own markets they are invading ours with disastrous results to our home producers. [Applause.]

Mr. WOODRUM. Mr. Chairman, I yield five minutes to the gentleman from Indiana [Mr. CROWE].

Mr. CROWE. Madam Chairman, ladies and gentlemen of the House, I heartily agree with the gentleman from Kentucky [Mr. MAY] in his stand on the moratorium and war debts. I think Members of the House should express themselves in some manner in regard to that question. I am unalterably opposed to any cancellation of the foreign debts.

A few minutes ago I listened with interest to my good friend from Indiana [Mr. WOOD]. I appreciate the splendid

words of admonition that he always gives to the House. I agree with him that we should balance the Budget. I think that is one of the necessary and important things to be done, and must be done at the earliest possible date. But I think it is coming a little late. With the unbalanced Budget that we have had during the last three years, with a deficit of $903,000,000 for 1931, with $2,880,000,000 for 1932, and now so far this year running in red ink $200,000,000 a month, I think our President started a little late with his admonition. However, I agree with him and with the gentleman from Indiana [Mr. WOOD] that it is high time that the Budget be balanced. This country can not continue on and on indefinitely with an unbalanced Budget, going tremendously into the red as we are. In that connection, I disagree with a lot of people I hear over the radio and through the press, on the floor of the House, and other mediums, who are trying to make their attack entirely upon our veterans. I disagree with people who would attempt to balance the Budget by making a drive on the compensation paid the boys of the World War who are drawing to-day just a small stipend of perhaps $12 or $18 or $20 a month.

I listen at times to the remarks of some people against our generals, and I would not be among the group who would attempt to cast a slight upon any general of this country, either present or past. They have performed great service and there is no reason to believe that they are in any way cowardly. Just because General Pershing viewed the battle front through field glasses did not in any way reflect on him; it was the right and only way to do, but the humblest soldier is entitled to the same respect as the general and I resent it when they with their fat retired salaries say or do things to reduce the small compensation and pension given our soldiers. I am for them 100 per cent until they join with the Economy League among whom are income-tax evaders and those who made their millions while our veterans were in the trenches, in an attempt to take from our boys the small amount of money that is due them. In my district I find men who were shell shocked, who were on the front in the World War, one in particular for 11 months on the front, Toulon-Aisne-Marne offensive, Marbache sector, St. Mihiel offensive, Meuse-Argonne, and then in the Army of Occupation seven months, and who to-day is unable to get a cent of compensation. This poor man is a complete nervous wreck from shell shock, unable to work, family destitute, and yet he can not secure compensation.

Another man disabled in the World War—who was gassed in action, shot through the hip with two German machine-gun bullets, who received three citations for bravery under fire, who is now unable to work—who was granted disability allowance at the rate of $12 per month, and who just recently under the drive for economy was notified by the Veterans' Bureau, without even calling him in for an examination, that his compensation was discontinued. I am sure the veterans will bear me out that they are opposed to any veteran drawing a pension or compensation who is not deserving. They are the defenders of our country. But where I find boys who were on the front in France for months, in dugouts, in the mud and rain, and shot and shell, disabled, wounded, and yet I am unable to secure for them a small bit of compensation, I am inclined to believe there are not many drawing compensations or pensions who are not entitled to every cent they are receiving.

History shows us that nations which do not protect and take care of their veterans soon fall. I have no patience with the man or organization that calls our veterans treasury looters. Without our veterans we would not have had a Treasury in the first place.

I do not believe that we will find many men among our veterans who are drawing compensation illegally. For that reason I am opposed to any drives to make the veterans of the World War bear the burden in our attempt to balance the Budget. Understand, I am unalterably opposed to our Government spending more than they receive in taxes. I am opposed to levying more taxes. We are already paying more for taxes than we can afford. But in that connection why not make a special effort to collect part or all of the $1,000,000,000 income tax now due the Government and unpaid? But there are many ways to balance the Budget. For instance, last week I attempted to save three quarters of a million dollars in the construction of one building, the New York courthouse. They could save there three quarters of a million dollars by using Indiana limestone. Indiana limestone, according to the Government survey, is one of the best, strongest, longest-lived of building materials. It is beautiful and imposing. There are many ways in this country to balance the Budget without going to the soldiers.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. CROWE. Yes.

Mr. LAGUARDIA. The gentleman would not wear a khaki shirt with a dress suit, would he?

Mr. CROWE. No; but I want to say that our Government gives Indiana limestone in its research as one of the greatest building stones in the country. It will not corrode at the rate of more than 1 inch in 1,100 years, and that is longer than you will let that building stand.

Mr. LAGUARDIA. But the gentleman knows that that building is in a setting of beautiful monumental structures.

Mr. CROWE. How many?

Mr. LAGUARDIA. There is the courthouse and the new health department movement building, all beautiful, in a beautiful setting. I am sure the gentleman would not want to mar that setting by the use of Indiana limestone in the courthouse.

Mr. CROWE. There are only three structures in the setting you mention, and they are all old buildings and unsightly and low buildings. While on the other hand, all over New York City are beautiful edifices, built by our industrial giants, by churches, and so forth, such as the Empire State Building, Waldorf-Astoria Hotel, City Service Building, National City Farmers Trust, Bankers Trust, Metropolitan Life Insurance Building, New York Life Insurance Building, Parcel Post Building, Bronx County Courthouse, Cathedral of St. John the Divine, Radio City, and others of magnitude in every State in the Union, in which Indiana limestone is used and at tremendous savings to the builders, and at the same time they are buildings of strength, durability, and beauty.

What about this post-office building on Pennsylvania Avenue, Washington, D. C., only 33 years old, built of granite? Why destroy it after only 33 years? Will you deny it is largely because of the black, unsightly condition and ugly appearance of the building? A limestone building of the same age would still be beautiful and usable.

Mr. LAGUARDIA. But that is in a different setting.

Mr. CROWE. Yes; a setting made because of the splendid building qualities of Indiana limestone.

The CHAIRMAN. The time of the gentleman from Indiana has expired. [Applause.]

Mr. SUMMERS of Washington. Mr. Chairman, I yield 10 minutes to the gentleman from Wisconsin [Mr. SCHAFER].

Mr. SCHAFER. Mr. Chairman, I did not intend to speak to-day, but after listening to the addresses delivered a few moments ago by our Democratic colleagues, I am forced to do so. I am one of those who agrees that the Budget should be balanced, and that we should be fair with the next President of the United States and give him a balanced Budget. One of our Democratic Members indicated that the Budget should have been balanced several years ago. The reason why it has not been balanced is not due to the Republican Party or its failure to act. In this very well on the floor of the House your Democratic Speaker of the House during the last session and your Democratic floor leader in eloquent addresses indicated that the Budget must be balanced, and then, after making a trip with several other Democratic leaders to New York, they came back in disorder, retreated, and said that they would wait and let the next administration balance the Budget.

The Democratic Party for two years has had control of this House, in which revenue legislation must originate, under the Constitution, and in which appropriation bills originate. If the Budget is not balanced when your next

Democratic administration takes office, the responsibility rests fairly and squarely upon the Democratic majority in this House. I was somewhat surprised to find one of the Democratic Members of this body to-day, and a Democratic Member in the other great legislative body yesterday, by indirection, at least, criticize the reception by the President elect of the ambassador of Great Britain at Warm Springs, with particular reference to press releases concerning foreign-debt settlements.

This Congress does not have to again reiterate its position as against cancellation or reduction of these foreign debts in order to give the President elect light, as the gentleman desired. The record speaks for itself. The Democratic Party in the last campaign pledged itself against any debt cancellation, but you now find that you have made so many conflicting promises, and the day is approaching when you must deliver, and you can not do so. Why should the President elect of the United States be condemned by members of his own party for receiving the ambassador of the British Government and indicating through press releases by those close to him that there were going to be certain terms under which the debts or part of them would be canceled, when we consider that the President elect himself in his acceptance speech in the fifth paragraph thereof pledged the Democratic Party to continue the interrupted march and policy of the last Democratic administration. The last Democratic administration gave the foreign nations billions of dollars and even after the armistice received the French ambassador day after day and gave him hundreds of millions of dollars of the American taxpayers' money.

Just because the President elect is apparently going to continue the Democratic policy of foreign nations and foreign people first, and the American Nation and American people second, I think it is a little out of turn for members of his own party, by indirection, at least, to condemn him before he assumes office.

Of course, we know that a few weeks ago the President elect disowned this war-debt-baby problem, but recently we find that he has now accepted its parentage, according to reliable newspaper reports coming from Warm Springs. His position on the war debts is only an indication that for the next four years the Democratic principle of foreigners and foreign governments first is going to be carried out. You take this position with reference to a protective tariff. "Oh," you say, "keep the aliens out, but let the aliens stay in foreign lands and produce on foreign farms and in foreign factories and send the products of those foreign farms and factories and foreign labor into America without tariff protection." You Democrats in the House during the last four years and on the stump during the last campaign indicated that the prosperity of this Nation rested upon tearing down our tariff walls and allowing cheaply produced foreign importations to flood and destroy the American markets for American products. I call upon you Democrats to follow the leadership of your leading Democratic campaigner, Mr. Hearst, and support legislation to raise and bolster our tariff walls, which are now being leveled like the walls of Jericho. Help to furnish jobs for unemployed workers in the cities, so that they will have a pay check with which to buy the surplus of the American farms. [Applause.]

I suggest that you do so, even though by doing so you admit that you demagogued on the tariff issue in the last campaign. You know that your party demagogued on that issue. The Hill bill that we now hear and read so much about all over the country, introduced by a Democrat who realized that the Hawley-Smoot tariff rates were not high enough, is practically identical with numerous bills introduced by Republican Members many months before the Hill bill was ever thought of. These Republican bills were chloroformed in the Democratic-controlled Ways and Means Committee. It appears from press releases, particularly with reference to international negotiations, that in the next four years, as in the last Democratic administration, the Stars and Stripes will be pulled down and the tricolor of France and the Union Jack of Great Britain raised above Old Glory.

Mr. BOYLAN. Will the gentleman yield?

Mr. BLACK. Will the gentleman yield?

Mr. SCHAFER. And we will perhaps be singing the Marseillaise and God Save the King instead of America and the Star-Spangled Banner, because the Democratic record is for foreign nations and foreign peoples first and the American Nation and American people second.

Mr. BLACK. Will the gentleman yield?

Mr. SCHAFER. I yield to the distinguished gentleman from New York.

Mr. BLACK. I just wanted to remind the gentleman that Hoover will not be President during the next four years.

Mr. SCHAFER. The record speaks for itself. It was not the Hoover administration but the last Democratic administration which tried to crucify America for the benefit of foreign nations. You will wish to God, and millions of people who voted for Roosevelt and the Democrats last November will wish to God, before two years roll around that you had put Hoover in the White House again, with a Republican majority in both the House and the Senate.

You Democrats have no program. You promised everything under the sun, and every Democratic Member of the House and the Senate and the President elect would veritably have to be a political Houdini to carry out all the conflicting promises you made in your mad scramble to obtain votes and public office and control of the Federal Government.

Mr. BOYLAN. Will the gentleman yield?

Mr. SCHAFER. Yes; I yield.

Mr. BOYLAN. I wanted to ask the gentleman whether he is holding forth to-day as a prophet or the son of a prophet?

Mr. SCHAFER. As a historian. I am just relating the facts as they are. [Applause.]

Mr. BOYLAN. The gentleman must be a mind reader when he can see four years ahead the things that will occur.

Mr. SCHAFER. Oh, no. Many are occurring right now, and have occurred in the past.

Mr. BOYLAN. Well, the gentleman says in four years thus and so will happen.

Mr. SCHAFER. No. I say during the next four years.

Mr. BOYLAN. Is the gentleman a crystal gazer or a clairvoyant?

Mr. SCHAFER. Oh, we can observe what has been transpiring since the last election, not only with reference to the position taken by the Democratic President elect, but to the disorganized program—no, it is not a program, because you do not have a program—but the disorganized, disorderly rampage of the Democratic leaders and majority of the House of Representatives.

Mr. BOYLAN. May I ask the gentleman if he has read the excellent poetic effusion of the lady now presiding entitled "The Lame Duck's Lament"? [Laughter.]

Mr. SCHAFER. I will say that I have not read it, because I have something more important to do than read the poetic effusions inserted in the RECORD by Democrats. [Laughter and applause.]

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. SUMMERS of Washington. Mr. Chairman, I yield five additional minutes to the gentleman from Wisconsin.

Mr. SCHAFER. I will venture to say that the Democratic Members, if they continue to perform during the next two years as you have since the election, will have to write many poetic effusions with respect to lame-duck Democrat Members—many more than were written with reference to lame-duck Republicans.

I have received hundreds of letters from people who apologize for falling for the camouflaged and conflicting promises of the Democratic Party in the last campaign. The Democratic orators and spellbinders in the last campaign convinced many of the American people that President Hoover was the man who let the billions of dollars of American taxpayers go to foreign countries, much of it even after the armistice, and indicating that all they had to do was to vote for Roosevelt and the straight Democratic ticket and that the Democrats would send a collector overseas and

collect and bring back to the American taxpayers' Treasury more than the last Democratic administration gave to foreign governments. [Applause.] They announced to the rank and file that the Hawley-Smoot tariff bill was responsible for the most of the ills of the world and America, and that all we had to do was to reduce the Hawley-Smoot tariff rates and allow more cheaply produced foreign importations to come in from Asiatic countries, for instance, where they pay 10 cents for a day's labor. To-day the leading Democratic campaigner, Mr. Hearst, is taking the lead in showing to the American people the bad effects of a nonprotective tariff policy. For the benefit of the American people I ask you Democrats to follow Mr. Hearst, even though it is a retreat from your demagogic campaign position.

When the record of the next two years is made up we will find a multitude of Democratic campaign promises which were not kept. They will be like the promise of a good 5-cent glass of good beer before Christmas. I have received many letters from people wondering where this big glass of good beer for 5 cents, promised by the Democrats before Christmas, was. They still go to the bootlegger and the speakeasy and pay 25 cents for a little snit of beer, although many of them voted the straight Democratic ticket believing that the day after election they would be able to go to the corner and get a great, big, foaming pitcher of good potent beer for 5 cents.

Mr. BLACK. Mr. Chairman, will the gentleman yield?

Mr. SCHAFER. I yield.

Mr. BLACK. The Democratic House passed the beer bill, but the Republican Senate did not.

Mr. SCHAFER. Republican Senate, nothing! It may be a Republican Senate on paper, but when you look at the positions taken in the last campaign you will find that the majority of the other body were Roosevelt Democrats.

While the gentleman mentions beer, how about the eighteenth amendment? Why, every Democratic Member of this House from the State of Arkansas, the State of the Democratic leader in the other body, voted against the repeal of the eighteenth amendment, and the repeal resolution lost by only 6 votes. Seven Democratic Members from Arkansas voted against submitting the repeal.

Yesterday you tried to bind the Democratic Members in caucus on the Crowther bill, which the Republican Members petitioned the House to take from the Ways and Means Committee, and you could not. You may find that in the next Congress you will not be able to bind your Members by caucus, for the Republicans will be on the job and obtain roll calls that will put your fellows on the spot who were bound in caucus.

It is safe to say that when another year rolls around the eighteenth amendment will still be a part of the Constitution, because 44 State legislatures are now in session, or will be shortly, and even though you pass a repeal resolution at the special session, many of these legislatures will have adjourned. Even though you provide for ratification by conventions instead of by legislatures, the legislatures will certainly have to create the machinery for the conventions.

As to fulfillment of most of the Democratic campaign promises, the American people will find that they have been hoodwinked again, for the promises are so conflicting that they will be kept as was the promise of a national Democratic campaign committee made in an earlier campaign: "If you want war, vote for Hughes; if you want peace, vote for Wilson."

Mr. HASTINGS. Mr. Chairman, will the gentleman yield?

Mr. SCHAFER. I yield.

Mr. HASTINGS. Will the gentleman take the balance of his time to explain to the House and to the country where President Hoover stands on prohibition?

Mr. SCHAFER. The gentleman apparently has not read the record. The Democratic Party, lacking able Democrats during the war to perform duties such as those of Food Administrator, called on Mr. Hoover to do the job. In order to conserve food and man power the Democratic President issued an order prohibiting the manufacture and sale of cereal beverages. The order was later amended to prohibit the manufacture and sale only of intoxicating cereal beverages. The Republican Mr. Hoover, as Food Administrator, issued the order interpreting the intoxication point of cereal beverages at 2.75 by weight, and under his interpretation of the order of the President the people were permitted beer with an alcoholic content of 2.75 by weight. I think that answer's the gentleman's question.

Mr. Hoover in the last campaign also definitely and positively indicated his position in favor of a resubmission of the eighteenth amendment.

[Here the gavel fell.]

Mr. WOODRUM. Mr. Chairman, I yield one second to the gentleman from New York [Mr. BOYLAN].

Mr. BOYLAN. Deo gracias.

Mr. WOODRUM. Mr. Chairman, I yield five minutes to the gentleman from Pennsylvania [Mr. BOLAND].

Mr. BOLAND. Mr. Chairman, it is rather difficult to try to get the House serious after the very interesting discourse we just heard, but I wish to address you on the subject of balancing the Budget, about which we have heard so much. I call the attention of the House to the fact that on January 8, 1932, I presented a bill, H. R. 7246, that called for a tax on busses and trucks upon the highways. I will try to convince Congress that it should put this tax upon these carriers operating in intrastate commerce. Hearings were held before the Committee on Ways and Means upon this bus and truck bill. I told the Committee on Ways and Means that I had no connection whatsoever with railroads; that I was not interested in the management of the railroads in any capacity, but I was very, very much interested in the fact that statistics proved that over 25 per cent of the railway employees had lost their jobs because of this serious and unfair competition upon our highways.

You men have spent considerable time in trying to arrive at a fair and just way of raising money to balance the Budget. My bill creates a way for you to derive some of this revenue. If you figure the amount of mileage consumed by busses and trucks, you will readily see that a revenue tax placed upon them will accomplish the much-needed revenue at this time.

While it is true the railroads spent $30,000,000 in 1931 in the elimination of grade crossings, still there were more grade crossings after the $30,000,000 had been spent than there were before this expenditure, because of new road construction; and these roads and grade crossings are used by the busses and the trucks without the investment of one dollar and are receiving the benefit of the railroads and public moneys in the elimination of the danger to the public; in fact every State in the Union is passing legislation to protect the public on grade crossings.

In many parts of the country, particularly those of sparse population, the taxes received from railroads constitute the largest contribution toward the maintenance of schools and governmental and civic activities while this ever-growing menace on the highways is allowed to go unrestrained, unregulated, and untaxed proportionately.

The time has arrived when Congress must act upon this vital question. Effective legislation must be placed upon our statutes to regulate this hijacking of our highways.

Then again we have the so-called wildcat operator of trucks. He is an outlaw from every angle from which he may be viewed. He wholly disregards the laws relating to certificates of convenience and necessity and he fails to pay the proper authorities the taxes now levied upon legitimate operators in almost every State. As a rule, he has inferior equipment and carries no insurance for the protection of the persons and property entrusted to his care. Even the motor operators who are compelled to have certificates are now suffering from the depredations of these wildcat operators. We must make it impossible for this class to continue to prey upon the public.

One weakness of the present situation is the lack of established and dependable rates. This is due entirely to the fact that the interstate carrier is unregulated and that he

may and does make any rate necessary to secure business. His rates may be changed and are changed upon a moment's notice. With the establishment of effective regulation, all of this can be and will be changed.

The railroads are one of the largest employers of labor and purchasers of material, and they are one of our largest taxpayers. They perform a service which no other transportation system can furnish. They are, therefore, vital to the Nation.

Our highways were built mostly to take people out of the mud. What do we find? We find it absolutely impossible at some times of the day on certain highways for the motor vehicle to even have a chance to travel these highways.

Mr. FISH. Will the gentleman yield for a question?

Mr. BOLAND. I yield.

Mr. FISH. Will the gentleman state where this proposed legislation is, what is the status of it, and what can be done to get it out?

Mr. BOLAND. The Committee on Ways and Means heard this evidence; they had very material and expert witnesses appear before them who presented facts and figures along the lines that I am talking about; and that bill, I would say, was smothered in the committee.

When I came back to this session, after interviewing the chairman of the Ways and Means Committee, I asked him if there was any way that this bill could be brought before the House; and I am frank to say right now if this bill did come upon the floor of Congress, I am satisfied it would pass, because it raises revenue that would help balance the Budget. It is one of the most meritorious bills presented before the Committee on Ways and Means, and it has not been reported out.

I got a petition ready to put upon the Speaker's desk to take the bill out of the committee, and I was promised that they would give this bill proper consideration, so I refrained from placing same on the Speaker's desk. I was hoping it would come out, but it is not out yet, and I do not expect it out because of the statement of the chairman of the committee the other day that they would not take up any more revenue-raising legislation this session.

That is why I appeared before the House the other day to ask that this bill be given the proper consideration that it deserves, because the facts are that 25 per cent of the railway employees have lost their jobs due to this unfair competition taking freight away from the railroads. It is impossible for this country to get along without the railroads. They are part of our Nation's life and vital in many instances to our national defense. They have performed a very important part in the development of our country and are entitled to fair and just consideration of this unequal competition.

Just imagine statistics of this kind.

The extent of the burden placed upon general taxpayers by heavy commercial vehicles is not generally realized by the public. In the eight years from 1923 to 1930, inclusive, total expenditures for highway construction and maintenance in the United States exceeded $11,700,000,000. Of this great sum highway users of all kinds contributed in license fees and gasoline taxes less than $4,000,000,000, or little more than a third. The remainder of the cost, over $7,800,000,000, fell upon farm and other property owners and income-tax payers.

It is conceded by experts that heavy trucks contribute a smaller relative share to highway costs than the lighter vehicles, partly because of consuming less gasoline in proportion to length of haul and weight carried. Therefore, large trucks are paying even less than one-third of their fair share of highway expenses.

The more than two-thirds contributed by general taxpayers is a gift from the public to those who are using the highways for profit in the heavy transportation business.

This unfair competition of busses and trucks is very largely responsible for the present difficulties of the railroads. It makes it necessary for them to reduce their employees at least 25 per cent, according to statistics compiled by the Railroad Clerk's Association. Constructive national and State legislation is fundamentally necessary to correct the present chaotic conditions.

We find men who have spent the best part of their lives working on railroads now thrown out of employment, all because Congress has allowed this situation to develop.

Mr. MILLARD. Will the gentleman yield for a question?

Mr. BOLAND. I yield.

Mr. MILLARD. Should not your bill be before the Interstate and Foreign Commerce Committee rather than before the Ways and Means Committee?

Mr. BOLAND. No; this bill should be before the Ways and Means Committee because it raises revenue for the Government.

Mr. FISH. Why does not the gentleman present a petition here so he can get a chance to bring it up?

Mr. BOLAND. I was going to present a petition, but I was told that the bill would get proper consideration.

Mr. FISH. Why does not the gentleman do that now?

Mr. BOLAND. The Associated Press carried the story that I was going to petition Congress to consider my bill, and that is the reason I am appearing on the floor to-day.

[Here the gavel fell.]

Mr. WOODRUM. Mr. Chairman, I yield five minutes to the gentleman from Tennessee [Mr. DAVIS].

Mr. DAVIS of Tennessee. Mr. Chairman, Tennessee recently lost one of her most distinguished, most patriotic, most picturesque, and best beloved citizens. Hon. Benton McMillin passed away on January 7, 1933. He was born in Monroe County, Ky., September 11, 1845, but moved to Tennessee in early manhood.

Mr. McMillin was presidential elector on the Democratic ticket of Tilden and Hendricks in 1876. He was elected as a Democrat to the Forty-sixth and to the nine succeeding Congresses, serving from March 4, 1879, until his resignation on January 6, 1899, to become Governor of Tennessee. Wherefore it will be noted that he served as a Member of this House for nearly 20 years, during 14 years of which he was a very active and able member of the Ways and Means Committee; he made a national reputation as a Member of this body.

There is not now a Member of either branch of Congress who was a Member during any period of Mr. McMillin's service as a Member of this body.

Governor McMillin was reelected Governor of Tennessee, serving until 1903. He was one of the best governors Tennessee ever had.

President Woodrow Wilson appointed Governor McMillin envoy extraordinary and minister plenipotentiary to Peru on July 2, 1913, and he served until September 22, 1919, when he was likewise appointed by President Wilson as envoy extraordinary and minister plenipotentiary to Guatemala, where he served until January 9, 1922.

Governor McMillin attended every Democratic national convention from 1876 to 1932, with the exception of one convention, when he was absent at his post of duty as minister to Peru.

At the time of his death and for many years previous he was Democratic national committeeman for Tennessee.

For more than half a century Governor McMillin was a conspicuous figure in Tennessee politics. He was a fundamental Democrat as well as a party Democrat. He was a close student of government. He was a great campaigner. It is said that he had spoken many times in every courthouse in Tennessee. He was a typical statesman of the old type, always courageous, aggressive, and effective. During his long career his personal and political integrity was never questioned. He gave the best that was in him to his country and his party and died a poor man.

Governor McMillin's interest in public affairs never waivered. He retained his mental and physical vigor until his death.

During the past year he was the preconvention manager for Tennessee of Gov. Franklin D. Roosevelt and marshaled the forces so ably that Tennessee unanimously instructed its delegation to vote and work for the nomination of Gover-

nor Roosevelt. Then after the nomination of Governor Roosevelt and the remainder of the Democratic ticket, Governor McMillin, although in his eighty-eighth year, actively participated in the campaign. His services were in great demand, and he delivered vigorous and effective speeches over a large portion of Tennessee. His logical, eloquent speeches contributed materially to the largest majority ever given a candidate for President in the history of Tennessee. [Applause.]

[Here the gavel fell.]

Mr. DAVIS of Tennessee. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by inserting a few editorials on Governor McMillin.

The CHAIRMAN (Mrs. OWEN). Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. DAVIS of Tennessee. Under leave granted, I herewith insert the following editorials:

THE OLD ROMAN PASSES

Tennessee has lost her most beloved citizen: Benton McMillin is dead. In a Sabbath twilight the Old Roman sank to sleep, venerated for his virtues, honored for his achievements, secure in his fame. The thousands who, with uncovered heads, will gather at his bier on Capitol Hill in the imposing structure within whose walls, as youthful legislator and in the maturity of his powers, as chief executive, his fidelity and patriotism had been exhibited, will but symbolize the tribute of all Tennessee for a son whose service had been long and illustrious, devotion steadfast and stainless, whose qualities ennobled and endeared.

The passage of no citizen within the borders of the Commonwealth would have evoked a more genuine and general sense of loss and sorrow, for Benton McMillin was known and esteemed in every hamlet from the mountains to the great river. His life had been interwoven with that of his State for two-thirds of a century.

A native of Kentucky, he came to Tennessee in his early manhood, making his home in the mountain country, whose sons seem to inherit something of the rugged strength of the hills they love.

From the time that as a lawyer with his first brief he followed the standard of Brown, Bate, Dibrell, and Porter in their struggle to redeem Tennessee from the shame and peril of reconstruction days, throughout the passing decades he displayed an unwavering devotion to the highest interests of the Commonwealth of his adoption.

No Tennessean who had held public station in all the annals of the State had lived under the administration of so many Presidents as had he, and few had been called to so many positions of trust in Federal and State Governments and in party affairs.

Born a few months after Old Hickory had passed away, and in the year when Polk entered the White House, Mr. McMillin had seen the administrations of 18 of the 30 Presidents; and, had he been spared two months, would have attended the inauguration of the nineteenth of that great company of his knowledge, after a campaign in which the former governor, now national committeeman, had borne a conspicuous part.

It was the ability which he displayed as an elector for Samuel J. Tilden in 1876, following by two years membership in the House of Representatives, which won for Mr. McMillin his first nomination to Congress from the old fourth district, and ushered him upon a career that was to see him for a half century a prominent figure in the public life of his State and Nation.

He was an intense but not bitter partisan. He fought for principles and not against men. He was wise and temperate in council, militant and impressive on the hustings; no Tennessean of his times had worn armor in so many battles for his party.

As a young man he dedicated his powers to country and party; he held his energies of mind and body a trust for their service; and it was in obedience to that guiding principle of his life that his last battle was fought, which saw him, in the campaign so recently given to history, displaying the fire of his youth in defense of his party in Nation and in State.

He early won distinction at the National Capital. For the greater part of his long stay in the House he was a member of the important Ways and Means Committee, and frequently presided in the absence of Speaker Crisp.

His readiness to carry the fight to the enemy made him a valuable party asset. He stood with Cleveland, Carlisle, Watterson, and Mills in the great tariff battles of the '80s; and no Representative from all the South was more courageous and effective in attack upon the notorious and nefarious force bill than the Representative from the fourth district of Tennessee.

Mr. McMillin was always a student of government. His vision was comprehensive and clear, and he never made the mistake of overlooking the importance of details. He was, therefore, useful as legislator and constructive as governor.

His call to the governorship in 1898 represented the spontaneous demand of the Democracy of the State; and, resigning his seat in Congress, he gave to the Commonwealth four years of strong and useful leadership. He directed his attention especially to financial affairs of the State, creating a sinking fund for the retirement of the public indebtedness, which was reduced by $5,000,000 during his incumbency. Realizing that popular education was the bedrock foundation for the welfare and advance of the Commonwealth, he was a firm advocate of expansion of the public schools, and established the uniform textbook system.

His successful career in Congress and enhanced public service as governor, supplementing the reputation strengthened by his repeated appearance on the hustings in other parts of the country during presidential campaigns, had made him one of the Nation's foremost public men; and the honor of representing its Government in foreign lands awaited him. As minister to Peru and Guatemala, he was conspicuously successful in cementing the ties of friendship between the United States and those countries, and in promoting policies of commercial exchanges which have been attended by increasing and mutual benefits with the passing years.

The gamut of his public and party service was wide, indeed: Legislator, special circuit judge under appointment from Governor Porter, Member of Congress, governor, minister to Central and South American countries, presidential elector; champion of Democratic principles and nominees in State and national campaigns for over a half century, and in the closing period the national committeeman from Tennessee, and one of the leaders in the movement to secure the presidential nomination for Mr. Roosevelt, one of the closest advisers of the President elect, who, it is said, would have tendered him an important diplomatic post—his career was both notably long and illustrious.

He was called to no trust throughout the 60 years of public and party service which he did not merit and to which he did not measure.

Loyalty to country and Commonwealth, party and principle, was to this lamented and honored man the ever heeded mandate of conscience, judgment, and desire. His ideals of official duty were sensitive and high. He never forgot or ignored them. To him public faith and private honor were one and inseparable.

The commercial spirit of the age had for him no lure. He might easily have been a rich man, had his conception of the exactions and obligations of the public service and private conduct been less elevated or compelling. That he died a poor man is not the least of the tributes which the generation which saw him pass from the scene and those who are to come will pay him.

He has gone to join the vanished but undying group of Tennesseans whose labors and abilities, courage, and character are the noblest heritage, richest possession, most inspiring record of the Commonwealth which to-day stands in reverent consciousness of its loss.

TRIBUTES TO THE OLD ROMAN—TENNESSEE BIDS FAREWELL TO AN OLD FRIEND

[Memphis Commercial Appeal]

Tennesseans everywhere will bow their heads in silent reverence for the memory of Benton McMillin, whose death in Nashville last night removed from public life one of the most capable, patriotic, and faithful servants the people of the Volunteer State ever had. * * *

Benton McMillin made one of the best governors the State ever had. He was among the last of the old type of statesmen who regarded public office as a public trust in the strictest sense. As governor he applied himself to the State's financial problems, and his long experience in Congress as a member of the powerful Ways and Means Committee enabled him to deal intelligently and capably with these problems. * * *

Death is always a tragedy, even though the victim may long have passed his allotted time. It is a sorrowful adieu that Tennessee bids Benton McMillin. It is the breaking of a link that bound the new to the old. * * *

The ups and downs of political favor often worked cruelly against Benton McMillin. His ambition was to represent Tennessee in the United States Senate. Twice within his career he saw that exalted honor flee from him by the margin of a half dozen votes; and be it said that he never offered for a service that he would not have honored with credit to himself and to his constituency.

Benton McMillin loved Tennessee and he served her well. For nearly 60 years he fought the battles of his State and his people. He goes to a well-earned and glorious reward. Tennessee bids farewell to a distinguished son, a faithful servant, and an old friend.

TENNESSEE LOSES GRAND OLD MAN

[Chattanooga Times]

The death of Benton McMillin marks the passing of one of Tennessee's best-known and best-loved citizens. He was an estimable, cultured gentleman and a fine citizen, clean in both his public and his private life. He left his impress upon the State of his adoption, in which he spent most of his more than 87 years, and made his influence felt in national legislation and in the Diplomatic Service of the country. * * *

He was a Democrat first, last, and always. He delighted in ridiculing and denouncing the Republicans and was ever ready to turn upon them the guns of his fiery oratory and to rally the members of his own party. So enthusiastic and indefatigable a Democrat was he that he had for many years been called "the war horse of Tennessee Democracy." As a colorful character, a Democratic stalwart, a noted and useful citizen, and a beloved adopted son of Tennessee, the people of the State mourn the passing of Benton McMillin.

UNIVERSALLY HONORED

[Clarksville Leaf-Chronicle]

In the sudden death of former Gov. Ben McMillin, for 50 years a leading figure in the counsels of Tennessee politics, this State has lost a fine character, in whom the citizenry of Tennessee had the utmost confidence and respect.

Many who knew him termed him "the old war horse," which title he won by the vigorous campaigns he conducted over the North and East in the interest of his party. Perhaps the most memorable stumping tour he went on and which he liked best to recall was the time he left Tennessee, even though a candidate for Congress from the fourth district, and stumped a number of States for Grover Cleveland when he was running for President. * * *

Governor McMillin served his State and country well. He met death bravely as he met the problems of life. To the last he contended that he felt fine, even though death was rapidly approaching. He took death as courageously as he took defeats in his career, and Tennesseans to-day feel that they have lost a valuable friend, one who linked the past with the present, old enough to know the lessons of the past, young enough to vision the future.

In the words of the poet, as the body of the former governor lies in state, we can say, "There lies the greatest Roman of them all."

NOTABLE PUBLIC SERVICES

[Jackson Sun]

Elder west Tennesseans who have followed political trends over the past half century are to-day expressing their appreciation of the fine character and splendid public service of Benton McMillin, former governor and former Congressman, who is dead at 87 years of age at Nashville.

His death removes one of Tennessee's most picturesque figures—the last link, perhaps, between the old style of political campaigner and the new, for as a stump speaker McMillin was without a peer in Tennessee. Devoted as he was to the policies of Jefferson and Jackson, the veteran statesman became very partisan in his campaigning and was of such type of orator as to arouse his fellow Democrats to action in the crucial hours of a close election. For more than 50 years his voice had been heard in political campaigns in Tennessee. He had spoken in every courthouse in the State, not once but many times. * * *

McGee's History of Tennessee gives high place to McMillin's gubernatorial leadership, and he justly deserves it. The State is better and its history richer for his public service.

HONORED AND BELOVED

[Bristol Herald Courier]

In the death of former Gov. Benton McMillin, Tennessee has lost a distinguished son whom she loved and who loved her. Although born in Kentucky, he came to Tennessee in boyhood and spent the remainder of his long life in the Volunteer State, devoting himself to her interests and receiving honors at her hands.

Mr. McMillin's public career began in 1874, when he was not yet 30 years old, as a member of the Tennessee Legislature in a session which is historical in that it elected Andrew Johnson to the United States Senate after he had served nearly the whole of Abraham Lincoln's second term as President. From that time forward through a period of half a century he was active in politics, and for a generation had been a leader of the Democratic Party in his State. * * *

Mr. McMillin had spoken in all parts of the country in presidential campaigns and was known far and wide. From young manhood he had enjoyed the friendship of national leaders of his party and was a personal friend of Grover Cleveland, the only Democratic President to serve during his score of years in Congress. He was a man of strong character and fine ability, a writer as well as a platform speaker, and since youth had held a high place in public esteem. His death brings sadness to the people of Tennessee and will be regretted beyond the confines of the State.

A USEFUL LIFE

[Knoxville Journal]

The death of former Gov. Benton McMillin marked the passing of another of the few surviving old-line politicians of Tennessee. From the years of his early manhood to the end of a long life he was a militant and forceful champion of the political ideals which made him from first to last an unswerving party man.

Less brilliant, perhaps, than some of his compeers, he was unusually successful in his bids for public office on account of his acknowledged sincerity and high personal character. He served with credit his district in Congress for a long number of years, was a capable Governor of Tennessee, and ably represented the country as minister to South American Republics.

A devotee of the old school of political discussion, Governor McMillin delighted in the opportunity which the public platform gave for entertaining and enlightening the public on the issues which differentiated the Democratic Party from the Republican Party. He believed in joint debates between party candidates for office and was no mean antagonist in that forum. There is little doubt that they were prolific, of more public interest in issues, and more concern for the qualification of candidates than are present methods of campaigning.

The private character and public service of Benton McMillin will add something of permanent value to the history of his State and country.

DEMOCRACY LOSES A CHAMPION

[Knoxville News-Sentinel]

The passing of ex-Gov. Benton McMillin removes from the scene a man whose vigor and personality made his influence felt almost unto the very day of his death. And it leaves us one less of that kind of politician we most admire—one that speaks out and says what he thinks. The modern brand of politician is too often the pussy-footing, whispering kind, who prefers to trade and compromise. Not so Benton McMillin.

In his heyday he contended that candidates should always meet in joint discussions.

"Joint debates," he used to say, "tend to refine discussion, prevent rash, false, or misleading statements and bring about more certain establishment of truth."

A champion of Democracy with a capital "D," he campaigned far and wide for the cause of his party. He is remembered for the speaking tours he made for Grover Cleveland and for sallies into Virginia and other States in behalf of gubernatorial candidates. Although up in the eighties, he stumped Tennessee in behalf of Al Smith in 1928, and it is said the ovation given him when he mounted the platform with Al at Nashville was almost as great as that accorded the candidate.

"Governor" McMillin through his long life was a scrapper. The Democratic Party will miss him.

UNCOMPROMISING DEMOCRAT

[Chattanooga News]

The dean of Tennessee political life is dead. Benton McMillin, who succumbed to pneumonia at the age of 87 yesterday, was active almost to the time of his death, but his most energetic years were those before the turn of the century. * * *

Mr. McMillin was always an uncompromising Democrat. Party regularity was, with him, a religion. Born in 1845, he was strongly Confederate in his sentiments. He lived in the "dark and bloody battle ground," Kentucky, and during the war, as a youth of 16, he was held prisoner by the Union forces for months, refusing to swear allegiance to the Union cause.

In reconstruction days Mr. McMillin knew the sufferings of the South. He knew those causes which made the South solidly Democratic, and it is no wonder that party regularity was ingrained in his very character. While in Congress he helped defeat the notorious Force bill.

For 57 years Benton McMillin was prominent in Tennessee public affairs. He counted his friends by the thousands, and his long service to the State is cause for widespread tribute to his memory.

A STAINLESS CAREER

[Huntsville Times]

There are many outside Tennessee who read with regret this morning of the sudden passing of Benton McMillin at the age of 87 in Nashville yesterday.

There was never mark nor stain on his political life of more than half a century. No one ever questioned his honesty or integrity.

Age never dulled his interest in the affairs of the Democratic Party, or lessened his allegiance to the political tenets and beliefs of Thomas Jefferson.

Last year, at the age of 86, he directed the Tennessee campaign for Roosevelt and delivered a score of speeches for the Democratic nominees in the November campaign.

With his passing the last chapter in a rich, romantic life has been written.

He was truly, as his wife often proclaimed him, "the noblest Roman of them all."

Mr. WOODRUM. Mr. Chairman, this concludes general debate on the bill.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read as follows:

ALIEN PROPERTY CUSTODIAN

Funds available to the office of the Alien Property Custodian for administrative expenses in the District of Columbia shall not be used for the purchase, maintenance, operation, and/or repair of any passenger automobile.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. It is rather unusual to find a paragraph with the phraseology that we have here, that this fund "shall not be used for the purchase, maintenance, or operation, and/or repair of any passenger automobile," unless there has been some abuse by the Alien Property Custodian. What are the facts that makes this language necessary?

Mr. WOODRUM. That is the same provision that was incorporated on all of the department bills last year when we struck out the right to use passenger automobiles for private use.

Mr. STAFFORD. This does not say that no automobile shall be used for private use, but it absolutely forbids the use of an automobile for any purpose.

Mr. WOODRUM. The committee thought that the Alien Property Custodian had no official duties that required the use of an automobile.

Mr. STAFFORD. I wondered when the work of this establishment was coming to an end. Can the gentleman tell us what the situation is in regard to that?

Mr. WOODRUM. They never come before us for any appropriation, and we make no appropriation for them at all. I can not give the gentleman the information.

Mr. STAFFORD. Sometime that must come to an end. I was wondering why we could not put in a mandatory provision terminating their activities.

Mr. Chairman, I withdraw the pro forma amendment.

The Clerk read as follows:

AMERICAN BATTLE MONUMENTS COMMISSION

For every expenditure requisite for or incident to the work of the American Battle Monuments Commission authorized by the act entitled "An act for the creation of an American Battle Monuments Commission to erect suitable memorials commemorating the services of the American soldier in Europe, and for other purposes," approved March 4, 1923 (U. S. C., title 36, secs. 121–133), including the acquisition of land or interest in land in foreign countries for carrying out the purposes of said act without submission to the Attorney General of the United States under the provisions of section 355 of the Revised Statutes (U. S. C., title 34, sec. 520; title 40, sec. 255); the maintenance of memorials erected by the commission until the Secretary of War is advised of their completion and assumes their maintenance; employment of personal services in the District of Columbia and elsewhere; traveling expenses; the establishment of offices and the rent of office space in foreign countries; the maintenance, repair, and operation of motor-propelled passenger-carrying vehicles which may be furnished to the commission by other departments of the Government or acquired by purchase; printing, binding, engraving, lithographing, photographing, and typewriting, including the publication of information concerning the American activities, battlefields, memorials, and cemeteries in Europe; the purchase of maps, textbooks, newspapers, and periodicals; $143,322, to be immediately available and to remain available until expended: *Provided*, That the commission may incur obligations and enter into contracts for building materials and supplies and for construction work, which, inclusive of the amounts herein and heretofore made available, shall not exceed a total of $4,500,000: *Provided further*, That notwithstanding the requirements of existing laws or regulations and under such terms and conditions as the commission may in its discretion deem necessary and proper, the commission may contract for work in Europe, and engage, by contract or otherwise, the services of architects, firms of architects, and other technical and professional personnel: *Provided further*, That the commission may purchase materials and supplies without regard to section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5) when the aggregate amount involved does not exceed $500: *Provided further*, That when traveling on business of the commission, officers of the Army, serving as members or as secretary of the commission, may be reimbursed for expenses as provided for civilian members of the commission.

Mr. GOSS. Mr. Chairman, I reserve a point of order against the proviso beginning on line 4, page 5. I would like to ask the chairman of the subcommittee if it is necessary to give that power to engage architects and other technical personnel?

Mr. WOODRUM. The work is already completed, or will be completed in a few months. Then the work will be turned over.

Mr. GOSS. Why is it necessary to carry this language?

Mr. WOODRUM. Because there are some unexpired contracts that have been entered into.

Mr. GOSS. The second proviso exempts it from existing laws or regulations. Is that all it does?

Mr. WOODRUM. Yes; if it does not exceed $500.

Mr. STAFFORD. Would the gentleman from Connecticut have all these memorials constructed by American labor exported from this country for that purpose?

Mr. GOSS. I do not know that I would want to go that far, but I do not want to take men from America to Europe, and I think the reverse is true, that we should not bring men from Europe here.

Mr. STAFFORD. The gentleman would not favor incurring the ill will of France, where diplomatic relations are delicate just now, by requiring that American labor only shall be employed in these sacred memorial cemeteries?

Mr. GOSS. No. Mr. Chairman, I withdraw the reservation of a point of order.

The Clerk read as follows:

ARLINGTON MEMORIAL BRIDGE COMMISSION

For continuing the construction of the Arlington Memorial Bridge across the Potomac River at Washington, authorized in an act entitled "An act to provide for the construction of a memorial bridge across the Potomac River from a point near the Lincoln Memorial in the city of Washington to an appropriate point in the State of Virginia, and for other purposes," approved February 24, 1925 (43 Stat., p. 974), to be expended in accordance with the provisions and conditions to the said act, $294,675, together with not to exceed $25,000 of any unexpended balance of funds heretofore appropriated for this project to be available for widening and resurfacing the present road from the memorial entrance of the cemetery to the southeast cornor of the cemetery, conditioned upon the State of Virginia completing the construction of the Lee Boulevard link of the Virginia State highway system to the same point; of which not exceeding $20,000 shall be available for clerical and accounting service, including all necessary incidental and contingent expenses, printing and binding, and traveling expenses, to remain available until expended: *Provided*, That the commission may procure supplies and services without regard to section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5) when the aggregate amount involved does not exceed $50: *Provided further*, That no part of this appropriation shall be used to pay for the cost of reconstructing and paving Constitution Avenue east of Virginia Avenue, as provided in the approved project, except for such portions as may abut upon Government-owned property, and not in excess of 40 per cent of the cost of such reconstructing and paving of that portion of the said street which so abuts.

Mr. STAFFORD. Mr. Chairman, I reserve the point of order on the paragraph. What is the reason for the limitation in the last paragraph forbidding any work of construction on Constitution Avenue east of Virginia Avenue and providing that it shall not be in excess of 40 per cent?

Mr. WOODRUM. Mr. Chairman, the original act provided that the Congress should decide what portion of this paving should be done and paid for by the Government. That is the proportion that has been carried in the act heretofore for that paving work, that the Government should not pay more than 40 per cent of it. We have carried the provision in the appropriation. It is simply the pro rata assessment against private property.

Mr. STAFFORD. Can the gentleman give the House any idea as to what the plan is for having Constitution Avenue paved and ready for use from Fourth Street westerly?

Mr. WOODRUM. They are working on it, but some of that project has been put off. The Bureau of the Budget thought it could wait. Some of Constitution Avenue down near the Memorial is in bad shape. It ought to be paved, but we have not included it in the bill.

Mr. STAFFORD. And there is not time to provide for the rebuilding and resurfacing of Constitution Avenue?

Mr. WOODRUM. Not at the present time. The work ought to be done. It is one of the projects that ought to be carried out.

Mr. STAFFORD. I rose largely to inquire about the expenditure of money by the Arlington Memorial Bridge Commission. On Tuesday morning I had occasion to accompany the Commissioners of Arlington County to determine whether the Government should transfer to Arlington County some Government land for this proposed Lee Boulevard link. I had not been over on the Virginia side for six or eight months. I was amazed at the amount of money that had been expended for an architectural structure on the westerly end of the Memorial Bridge. My impression was, as I viewed it, that if there was any case where expenditure of money running into half a million or more could have been postponed, it was in the ornate structure on the westerly end of that bridge. Yet Congress last year appropriated the necessary money to provide for work which was largely done by machine, and which is of an ornamental character. No doubt it should have been constructed some time, but it is one of a number of instances called to my attention where ornamental work running into millions and millions of dollars could well have been postponed without

delaying in any way the utilization of the project. I am not going to level a point of order against this appropriation for utilizing the Government money to pay its part of that new link for the Lee Boulevard Highway.

The members of the Committee on Military Affairs that accompanied the commissioners the other day were all impressed with the need for transferring the old right of way of the electric railroad and having that utilized for this link, coming down to the northeasterly end of the reservation, but I really think Congress made a mistake last year in making available all that money for purely ornamental purposes. I am not referring to the pavement that was in a dreadful condition eight months ago between the westerly terminus of the Memorial Bridge and Arlington Cemetery, but I do protest against the wasteful expenditure in these pressing times of half a million dollars purely for granite ornaments.

Mr. WOODRUM. Mr. Chairman, $340,000 was carried in the bill last year for this work, and that was a cut from $1,000,000. The cut was made for the reason that the committee and Congress felt that some of that work could be put off, but let me say to the gentleman in justification for the expenditure of $340,000, that the beautiful stone and granite that he saw in that magnificent memorial right of way over there had already been cut and was on the ground and the pieces numbered. It was there, and it was shown to Congress and the committee that to allow that stone to stay there for an indefinite time, on the ground, would not have been the course of wisdom, and Congress appropriated enough money to put in the driveway up to the road, and to put the stone in place.

Mr. STAFFORD. It is only another instance, just like these monumental piles around here, such as the Annex to the Post Office Building, of $5,000,000, and the façade to the State, War and Navy Building, of $3,000,000, which was checked. Congress has been going wild in the expenditure of money, which means nothing more than the utilization of machinery.

I withdraw the reservation of the point of order.

Mr. WOODRUM. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. WOODRUM: Page 6, line 3, strike out "$294,675" and insert in lieu thereof "$282,675."

Mr. WOODRUM. Mr. Chairman, that is a reduction of $12,000 on account of the differential in the sewer work that is being done. It was developed that some of the work provided in this bill is properly chargeable to the funds of the District, and that is being carried in the District bill.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. GLOVER. I offer an amendment, Mr. Chairman, which is at the desk.

The Clerk read as follows:

Amendment offered by Mr. GLOVER: Page 5, line 18, after the period, strike out lines 19, 20, 21, 22, 23, 24, 25, and all of page 6.

Mr. GLOVER. Mr. Chairman, here is an item of $294,675 that can be taken out of this bill and if it is ever done it can wait until we get out of the depressed condition in which we are, and not hurt the Government or the work that has already been done. It can easily be delayed and that much money saved to the Treasury of the United States in this time of distress. It ought to be done. Already there has been spent on this bridge since the first appropriation in 1925, $12,041,987.16. You appropriate this time $294,675 and yet that does not complete it.

I read from the hearings a question asked by Mr. WOODRUM, to Colonel Grant.

You have spent up to November 1, 1932, a total of $12,041,987.16?
Colonel GRANT. Yes, sir.
Mr. WOODRUM. What is the total amount of the authorization?
Colonel GRANT. $14,750,000.

I submit that this kind of an expenditure of the people's money is not only ridiculous in this time of distress, but it is almost nonsensical. There are people in this country who can not pay their taxes. There are people whose homes are being sold under the hammer to satisfy mortgages. Here we are every day clamoring about balancing the Budget, and then you take nearly one-third of a million dollars out of the Treasury for this purpose, when it will not do one particle of good but will do that much harm. I believe that project never should have been undertaken in the first place. I was not here in 1925, but I say that is an expenditure of money that can not be justified by any man on the floor of this House. The people of the United States do not indorse that kind of action by this Congress.

I would like to know what the farmers of your country, who are so in distress, would think if they knew you were here voting for that sum of money for that bridge, which is already completed. I drive across that bridge once in a while. Everything is done to it that ever will be done to it, as far as crossing the stream is concerned. It will serve the purpose now just as well as it will if $294,675 more is spent on it this year. You can go on and spend the people's money in this way, but I say to you that the time is now here when we ought to call a halt on this thing. We can cut out this amount by my amendment and save taxing the people that much. We will save that much money for the Treasury of the United States. Who will be hurt? Not a soul on the face of this earth. There is a paved highway there now 60 feet wide, over which you can travel at 100 miles an hour if you are willing to risk it. There is nothing in the way of travel. This money is purely for some decorations over there.

Let me read some of the expenditures as shown by this report to date:

For construction work, $10,092,257.86.
For engineering work, $562,607.94.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. GLOVER. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. WOODRUM. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia [Mr. WOODRUM]?

There was no objection.

Mr. GLOVER. Mr. Chairman, I had started to read some of the items. I believe I will read them all.

Office construction work, $40,997.14.
For professional services, consulting engineers, $222,964.29.
Other services and expenses, $49,688.34.
For engineering work, $562,607.94.

I wonder how they got that 94 cents in? That was to be accurate, I suppose.

For architectural work, $188,678.58.
For landscape work, $22,156.20.
For contingent and miscellaneous expenses, $66,853.72.

If you will notice this, every time it comes out with an odd cent for expending these large sums of money. That sounds a little "fishy" to me.

Let me see what else there is here. It reads:

Of which not to exceed $20,000 shall be available for clerical and accounting service.

Accounting for what? They ought to be accounting for about $12,000,000 that has been spent down there. But that is not what it is for. It reads:

Including all necessary incidental and contingent expenses, printing and binding, and traveling expenses.

Bless your life, they want $20,000 here for traveling expenses for this thing that is already completed.

Now, I say to you if we mean to have economy, if we are for economy, here is the place to start. If you vote for this amendment of mine, you will save putting a burden of $294,675 on the backs of the taxpayers of this country, who are already burdened with a load they can not carry.

I ask you to support the amendment, and I assure you it will not damage anybody nor inconvenience anybody in traveling across the bridge. You have crossed it. You know how wide it is and how accessible it is. You can run six or seven cars along side by side going over it. There is a highway on the other side of about the same width.

What is the use of going on spending money in this way when even this is not the end of it? We are told in the hearings that there is more yet to follow before this thing is completed. I say it is time to call a halt in the matter. It is not needed at this time. So, for the sake of the now burdened taxpayer, let us save some money on this project.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. ARENTZ. Mr. Chairman, will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. ARENTZ. Why is it necessary to import this black German peat in square packages to enrich soil along the highway?

Mr. WOODRUM. That comes under the boulevard highway. This amendment is on the Arlington Memorial Bridge. I will answer the gentleman from Nevada when I get to the boulevard highway. I wish to answer the gentleman from Arkansas first.

If the position of the gentleman from Arkansas is logical, then if we take out of every Federal appropriation bill the money which is being spent for public works by the same argument it has been saved, by the same reasoning we could stop work on every building we have started, repudiate every contract with contractors doing the work, let them go into the Court of Claims and sue us and save money. As a matter of fact, it would result in no saving.

It is no time now to decide whether the Arlington Memorial Bridge should have been built. There are many projects now under way which if we were considering now we would hesitate to embark upon; but we have a different situation to face; the work has been undertaken, and this bill authorizes simply enough money to carry on this project and to carry out and discharge the obligations the Arlington Memorial Bridge Commission has entered into.

Mr. LAGUARDIA. The gentleman will recall that we had a similar outburst of economy either last year or the year before, when the gentleman from New York [Mr. TABER] offered a limitation on this appropriation and the next day admitted that the material was available, that the commitments had been made, and that it would cost us more next year if we carried out the provisions of his amendment.

Mr. TABER. If the gentleman will yield——

Mr. LAGUARDIA. Is not that right?

Mr. TABER. The net result of the operation was a cut, as I remember it, of about $500,000.

Mr. WOODRUM. That occurred last year.

Mr. TABER. The net result of my operation was a cut of $500,000.

Mr. LAGUARDIA. The gentleman withdrew his amendment the next day, and the RECORD will show it.

Mr. TABER. The RECORD will not show it.

Mr. WOODRUM. I can set the matter straight. After we got all the way through the bill I came back and prevailed upon the committee to allow a portion of that fund to be reinserted, upon the showing in a letter from Colonel Grant that the stone was cut and on the ground. The gentleman from New York very graciously and properly agreed to the amendment.

Mr. Chairman, this appropriation has been cut by the Bureau of the Budget and by the committee just as low as it possibly can be cut without causing the Arlington Memorial Bridge Commission to repudiate existing contracts and to suspend operations on work they are actually doing that is necessary for the project.

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. HOWARD. Will the chairman of the committee explain the meaning of the proviso beginning in line 14 on page 6?

Mr. GOSS. It does away with the lowest bidder.

Mr. WOODRUM. For the purchase of small amounts of material or for services rendered the aggregate amount of which is under $50, it provides that they will not be put to the expense and cost of advertising for bids.

The CHAIRMAN. The question is on the amendment of the gentleman from Arkansas.

The question was taken; and (on a division demanded by Mr. GLOVER) there were—ayes 9, noes 33.

So the amendment was rejected.

The Clerk read as follows:

CIVIL SERVICE COMMISSION

Salaries: For three commissioners and other personal services in the District of Columbia, $789,300.

Mr. TABER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TABER: On page 9, line 21, strike out "$789,300" and insert in lieu thereof "$650,000."

Mr. TABER. Mr. Chairman, this is a cut of $139,000 on the appropriation for the office force and the examining force in the District of Columbia. The burden upon the Civil Service Commission has been growing less and less with the situation of the Government. Instead of holding examinations now, they are making up lists of surplus employees from bureaus which are under the control of the commission and who are available; and appointments are made from these lists.

In some cases examinations have been held even though these pools existed, and lists created from which no appointments were made.

In 1927 the number of central office examinations was 343, and in 1932 it was 48. Frankly, from the information I have been able to secure, I do not believe the number for 1934 will exceed 25.

The number of district examinations in 1924 was 7,729, and it 1932 it was 2,441, or less than one-third. In 1934, with the number available in pools for transfer and with the number of surplus employees in all the different post offices in the country who are available for transfer, I do not believe the number will exceed 1,500.

It seems to me we can very well cut this appropriation by another $139,000. I do not believe the work will anywhere near provide employment for those who are over there. Last year an extra 30-day furlough was given, and last year the work of holding examinations was double what it will be next year.

It seems to me this appropriation and the one that follows, in line 22, can very well be cut. I think I have been very conservative in the amount I have suggested and I only propose a cut commensurate with the cut in the work they will have to do.

Mr. MILLARD. Will the gentleman yield?

Mr. TABER. Yes.

Mr. MILLARD. Is this an increase over last year?

Mr. TABER. No; it is a cut. The amount recommended in the bill by the committee is a cut of approximately $198,000.

Mr. MILLARD. According to my figures it is an increase of $75,000 in the item referred to over last year.

Mr. TABER. That is not the way I understand it. The Budget estimate is $71,000 below the amount appropriated for last year.

Mr. MILLARD. Last year it was $716,000, and this year it is $789,000.

Mr. TABER. No; last year it was $861,000 according to the report, and I have not any better information.

Mr. MILLARD. I compared it with last year's Budget.

Mr. RAMSPECK. Will the gentleman yield?

Mr. TABER. Yes; I yield.

Mr. RAMSPECK. I think the gentleman from New York has disregarded the fact that we are going to have a lot of postmaster examinations during the next fiscal year.

Mr. TABER. The postmaster examinations do not come out of this fund. They come out of a later fund, which is reached under a separate paragraph in the bill.

Mr. RAMSPECK. And, in addition, there will be a lot of changes in personnel.

Mr. STAFFORD. Is it a part of the Democratic faith that they are going to take the postmasters out of the spoils system and put them under the civil service?

Mr. RAMSPECK. Personally I am in favor of that.

Mr. TABER. I do not know about that. I do not know whether they are going to violate all the rules of the civil service law or not. I hardly expected it. I assumed they were going to leave most of these civil-service employees in Washington alone.

Mr. RAMSPECK. I want to say to the gentleman from Wisconsin [Mr. STAFFORD] that if I had my way I would put them all under civil service.

Mr. STAFFORD. The gentleman is a lone Democrat in the espousal of that faith.

[Here the gavel fell.]

Mr. WOODRUM. Mr. Chairman, I was aware of the attitude of my colleague on the committee, the gentleman from New York [Mr. TABER], and after he notified the committee of his intention to ask for a substantial cut in this appropriation, the committee reassembled and reconsidered the appropriation for the Civil Service Commission.

I may say that prior to the meeting of the committee this year, at the request of the subcommittee the Bureau of Efficiency made a very thorough study and canvass of the activities of the Civil Service Commission to see if it were possible at any place to make savings or if there were any surplus personnel. I have in my hand a very voluminous and very exhaustive report of the survey made by the Bureau of Efficiency.

I believe my friend, the gentleman from New York, bases his idea that this commission can take such a drastic cut upon the fact that fewer Civil Service examinations are being held. This is true, but as my colleague has pointed out, there are going to be a great many postmaster examinations, and my friend from New York is not entirely accurate when he says that none of this appropriation goes for postmaster examinations, because I am advised by the commission that it does.

Mr. COCHRAN of Missouri. Will the gentleman yield? I want to say to the gentleman and the House that since November 28 the Post Office Department has not made one request on the Civil Service Commission to hold examinations for postmasters, even though a vacancy occurred. In other words, they are waiting until March 4, and then it will take several months. So the Republicans can hold over that long.

Mr. SNELL. What is the use of having examinations when you are not going to confirm any appointments?

Mr. COCHRAN of Missouri. So that we can have them ready.

Mr. SNELL. I would like to give the gentleman some eligibles if you will confirm the appointments.

Mr. TABER. I want to call attention to the fact that in a subsequent paragraph there is $36,570 for presidential postmaster examinations, of which amount $33,520 can be expended in the District of Columbia.

Mr. WOODRUM. That is true, but a part of the general overhead of the Civil Service Commission for the operation of the committee extends into this appropriation, to which the amendment of the gentleman from New York applies.

Now, in 1931, 423 of the personnel employees of the civil service were engaged in the work of the commission in no way connected with holding competitive examinations. In 1933 there were 400 of their personnel engaged in that work, whereas in 1931, 306 members of their organization were engaged in competitive examination work. The estimate for 1934 is for only 120, showing, even in the reduced personnel, the holding of the examinations has been effective for 1931, when 42 per cent were engaged in competitive examinations, and 1924 only 23 per cent.

It is all right and very well for a Member of the House to offer an amendment making a cut. It sounds good and looks good, but I know the gentleman from New York is as much interested in these cuts of the departments as the rest of us are; and I want to submit to him that the subcommittee, after thoroughly going into the subject, was unable to find any place where appropriations could be reduced, if you expect the Civil Service Commission to carry out the functions placed on it by the organic law.

Mr. GOSS. Will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. GOSS. I see here there is an increased appropriation for travel by $19,000. We have not reached that provision yet, but we are discussing this whole thing, and I notice on page 22 it says that there is a reduction of $19,000. That should really be an increase, should it not?

Mr. WOODRUM. The gentleman will find that sort of a situation occurs in several appropriations, for this reason: The gentleman knows that after the bill passed the House last year the Senate arbitrarily cut many departments, and they had to apportion it. Last year they took it off of traveling expenses, and the Civil Service Commission had to give its own personnel a furlough in addition. It is estimated that they had a cut of 18 or 20 per cent.

Mr. GOSS. I was wondering, upon the basis of the gentleman's statement that there are not so many examinations to be held, why it is necessary to increase the appropriation $19,000 this year.

Mr. WOODRUM. It is increased over last year, but the 1932 figure was $85,000. It is increased over the last year because the economy act arbitrarily cut and they had to apportion it somewhere, and they took it off the traveling expenses.

Mr. GOSS. It is necessary to have that, is it?

Mr. WOODRUM. It is necessary to have that.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. WOODRUM. Yes.

Mr. STAFFORD. I notice that in this item the subcommittee has agreed with the Budget estimate. We do not have to have official information as to the status of the work in the Civil Service Commission. I am rather influenced by the statement made by the gentleman from New York [Mr. TABER] that if there is any item that can stand a cut without doing injury to the service, political or otherwise, it is this item.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that his time be extended five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. STAFFORD. Here we are appropriating $700,000.

Mr. WOODRUM. I call the gentleman's attention to this fact, that the appropriation for 1934 for the Civil Service Commission is over $500,000 under what it was for 1932. It was cut last year down to the bone, and beyond the bone.

Mr. STAFFORD. How much under the 1932 appropriation is it?

Mr. WOODRUM. $500,000.

Mr. STAFFORD. I challenge that statement of the gentleman. Before I took the floor I examined the amount of the appropriation for 1932, and I found for salaries that we appropriated $863,370.

Mr. WOODRUM. But I was talking about the whole appropriation.

Mr. STAFFORD. I am talking of that character of work, namely, the clerical force down here in the department, which we know is not being utilized, because they are not filling vacancies. We phone down to the Civil Service Commission and are told that the eligible lists for a year or two years are still serviceable, and that it is not planned to have any additional examinations. There is no attempt on the part of this side or any Member of the House to try to curtail the rightful activities of this establishment, particularly so far as the examination of postmasters is concerned, but that is a very, very small part in the expenditure of this appropriation.

Mr. WOODRUM. This particular item is $74,000 under what it was in 1932.

Mr. STAFFORD. Yes, and I say, in view of the fact that we know that in the next fiscal year there will not be any change in the method of appointments and the Civil Service, that this appropriation of all appropriations can be cut without doing any violence to the service.

Mr. PITTENGER. Mr. Chairman, will the gentleman yield?

Mr. WOODRUM. If I have the time.

Mr. PITTENGER. As a matter of fact if they are going to cut this to the extent of the amendment of the gentleman from New York, it will cripple the work of the Civil Service Commission.

Mr. WOODRUM. There is no question about that.

Mr. STAFFORD. Wherein?

Mr. PITTENGER. In the general work they do.

Mr. SUMMERS of Washington. Mr. Chairman, I move to strike out the last two words. I think we all recognize the importance of the work being done by the Civil Service Commission. The subcommittee is just as anxious as any member of the whole committee or any Member of the House of Representatives to cut appropriations wherever we can do so; but it is not good economy, in my opinion, to cut the appropriation for the Civil Service Commission below where it now is. Many of the lists in existence were prepared long before many efficient employees who are now walking the streets were thrown out of employment. They have not the opportunity of competing at all in an examination that might be held and probably should be held at this time. There are innumerable examinations that must be held. Instead of about a thousand yearly for presidential postmaster appointments, the commission estimates that during the next year there will be 4,000 of such examinations held.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. SUMMERS of Washington. Yes.

Mr. STAFFORD. The gentleman does not mean that they will require several hundred thousand dollars for that purpose? That is a small modicum of the work.

Mr. TABER. And there is a separate appropriation for that?

Mr. SUMMERS of Washington. I understand about the separate appropriation, but as the gentleman from Virginia [Mr. WOODRUM] has said, this appropriation covers a part of that. It is all interwoven, in the overhead that must be maintained. The appropriation as it was cut last year necessitated not only the application of the legislative furlough but an administrative furlough, so that the employees in the Civil Service Commission had to accept about seven weeks instead of four weeks' reduction during the last year.

Mr. WOODRUM. I call attention to the fact that you will find by a comparison in the bill that the appropriation for the combined personnel in the Washington office and in the field, as it is estimated for in this bill, is $219,010 less than it was in 1932, which shows a substantial and drastic cut.

Mr. SNELL. Mr. Chairman, will the gentleman yield?

Mr. SUMMERS of Washington. I yield.

Mr. SNELL. In the investigation, does the gentleman find that they intend to hold very many examinations in the immediate future? I have had occasion to call them up within the last month on half a dozen different items, and each time they told me they had such a long eligible list that they did not intend to hold any examinations of that character for several months to come.

If they do have this long eligible list, how are they going to use these men? As far as the postmasters are concerned, the country has gone Democratic, and I am willing they should have the postmasters, and I want them to have any examinations they desire, but I am talking about the clerical force in Washington. Every time I have called up they have told me, "We are not filling any positions, and we do not intend to hold any examinations." That is the information I get.

Mr. FULLER. Will the gentleman yield?

Mr. SUMMERS of Washington. I yield.

Mr. FULLER. As leader of the minority, the gentleman from New York would not want to place himself in the attitude of objecting to the incoming administration holding as many examinations as they wanted to?

Mr. SNELL. I made that statement, that I am willing you should hold all the examinations you want to. I am one of those who believe that the offices belong to you and you have a right to take them. I am not quibbling about that, but I am talking about the general examinations held in Washington to fill clerical positions.

Mr. FULLER. We do not expect to do more than you have done. The gentleman would not want to advise his friends on that side of the House to handicap us in the matter of examinations?

Mr. SNELL. I do not want to handicap you, but I am simply stating the information I have received myself from the Civil Service Commission. I had asked if the investigation showed they intended to hold more examinations than there was any reason for.

The CHAIRMAN. The time of the gentleman from Washington [Mr. SUMMERS] has expired.

Mr. SUMMERS of Washington. Mr. Chairman, I ask unanimous consent to proceed for one additional minute.

The CHAIRMAN. Without objection it is so ordered.

There was no objection.

Mr. SUMMERS of Washington. Aside from the committee hearings, I have given considerable thought and investigation to commission requirements, and it is my candid judgment that they do need all the money that is carried in this bill, in order that they may properly conduct the duties that are imposed upon them.

The CHAIRMAN. The time of the gentleman has expired.

The question is on the amendment offered by the gentleman from New York [Mr. TABER].

The question was taken; and on a division (demanded by Mr. TABER) there were ayes 14 and noes 20.

So the amendment was rejected.

The Clerk read as follows:

Field force: For salaries of the field force, $412,600.

Mr. TABER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment by Mr. TABER: Page 9, line 22, strike out "$412,600," and insert in lieu thereof "$350,000."

Mr. TABER. Mr. Chairman, the same thing which I stated with reference to the other amendment applies to this, except that it applies with all the more force, because practically every duty of the field force is in connection with examinations and looking up things in connection with them. There are absolutely no examinations which will be held that amount to very much out in the field, because of the great surplus pool out of which all appointments will be made.

I hope the House will adopt the amendment and save some money.

Mr. WOODRUM. Mr. Chairman, the same argument.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. TABER].

The amendment was rejected.

The Clerk read as follows:

No details from any executive department or independent establishment in the District of Columbia or elsewhere to the commission's central office in Washington or to any of its district offices shall be made during the fiscal year ending June 30, 1934; but this shall not affect the making of details for service as members of the boards of examiners outside the immediate offices of the district managers. The Civil Service Commission shall have power in case of emergency to transfer or detail any of its employees herein provided for to or from its office or field force.

Mr. GOSS. Mr. Chairman, I reserve a point of order on lines 6 to 8, inclusive, on page 10. Why should this one department of the Government be allowed to transfer its employees from one place to the other? It is the only department that I know of which does that.

Mr. WOODRUM. Because of the very peculiar and unusual duties which they have to perform in making the character of investigations they must make in the field. If we undertook to require them to have a permanent force in

the field to make these periodic examinations, it would increase the cost of Government very much, and we do not want to do that now.

Mr. GOSS. On page 9 there is an amount of $789,000 for salaries of commissioners in the District, and another item of $412,000 for the field force.

Mr. WOODRUM. The Civil Service Commission has always had the right to transfer its personnel from the main office to the field force wherever it appeared necessary in the conduct of their work.

Mr. GOSS. But it is the only one in the Government that does it, is it not?

Mr. WOODRUM. It is the only Civil Service Commission in the Government.

Mr. GOSS. Mr. Chairman, I withdraw the reservation of the point of order.

The Clerk read down to and including line 9 on page 12.

Mr. WOODRUM. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. RAYBURN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having had under consideration the bill H. R. 14458, the independent offices appropriation bill, had come to no resolution thereon.

ANNUAL REPORT OF DIRECTOR OF PUBLIC BUILDINGS AND PUBLIC PARKS OF THE NATIONAL CAPITAL

The SPEAKER laid before the House the following message from the President of the United States, which was read and, together with the accompanying papers, referred to the Committee on Public Buildings and Grounds:

To the Congress of the United States:

I transmit herewith, for the information of the Congress, the annual report of the Director of Public Buildings and Public Parks of the National Capital for the fiscal year ended June 30, 1932.

HERBERT HOOVER.

THE WHITE HOUSE, *February 1, 1933.*

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. WIGGLESWORTH (at the request of Mr. MARTIN of Massachusetts), indefinitely, on account of illness.

COMMENCEMENT OF THE TERMS OF PRESIDENT, VICE PRESIDENT, ETC.

The SPEAKER laid before the House a communication from Theodore Dammann, secretary of state of the State of Wisconsin, announcing that the Legislature of Wisconsin had ratified the proposed amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress.

FINANCIAL ROAD TO ECONOMIC RECOVERY

Mr. BACON. Mr. Speaker, I ask unanimous consent to insert in the RECORD as an extension of my remarks a speech made on Tuesday by the Secretary of the Treasury.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BACON. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following speech made on Tuesday by the Secretary of the Treasury before the Columbia Institute of Arts and Sciences.

After almost four years of a world-wide economic depression, characterized by an enormous contraction of business and commerce; a precipitous though uneven decline in price levels; dislocated foreign exchanges; currency depreciation and instability in many countries; the erection of arbitrary trade barriers, and the dislocation of world markets, it is not surprising that there is much confusion of thought and a general bewilderment as to the most effective point at which these manifold difficulties are to be attacked. Nor is it to be wondered that many people, dissatisfied at the slow progress made in reestablishing a foundation for recovery—though progress has been made—instead of recognizing the need of attacking the several basic problems one by one, seek through some general formula to remedy the universal malady even at the cost of sacrificing certain fundamental principles, the disregard of which has inevitably brought increased disaster in the past. Under the stress of the times they seek to minimize or fail to realize the vital importance of maintaining beyond question the credit of the Government, upon which in the final analysis our entire public and private credit structure depends, and of preserving at all costs the most valuable of national assets—a sound currency.

In doing so they advocate the very policies which we so severely criticized when followed by other countries heavily beset with difficulties, and the disastrous consequences of which as applied to others we saw with a clarity of vision which seems to be lacking in our own case. There is a great distinction between viewing these problems objectively and coming to grips with them ourselves. But wise and cool-headed men will retain their objective viewpoint and apply to the conduct of their own fiscal affairs that clear judgment they applied to the fiscal affairs of others.

Visit those countries of Europe which, through force of circumstances rather than choice, experienced the panacea of inflation and you will find that they fear inflation more than any other economic phenomena. They know what it means, for they have learned in the hard school of experience.

WOULD PARALYZE ECONOMIC LIFE

We have had a sound currency for so long that we take the soundness of the money which we handle for granted, and it is difficult for us to picture the ruinous effects of currency depreciation. Whereas our purchases and sales, in fact, all of our daily reckonings, have been expressed in terms of a definite standard, a fixed quantity of gold, these means of daily transactions would, if the inflation were violent enough to force us off the gold standard, have to be conducted on the basis of a dollar of doubtful, ever-changing, and ever-declining value. We can not adequately picture the disastrous and paralyzing effect on the economic life of the Nation which would result from the necessity of carrying out the simplest and the most complicated business and financial transactions in the terms of a monetary unit of doubtful and shifting value.

For the first time in almost half a century our Nation is called upon to face the fundamental problems involved in the maintenance of the national credit and of a sound currency, I except the war-time period when, under totally different circumstances, we faced financial problems of the first importance.

There are two main groups of proposals seeking a short cut out of the depression by means of governmental action in contract with what, for want of a better name, I may call an orthodox or semiorthodox program. These two groups are by no means distinct and separate. They tend to overlap and both would probably reach the same terminal, though by different routes.

INFLATION BY DEFICITS

The first group would bring about inflation by the piling up of large governmental deficits that can not be met through normal borrowing operations, of which proposals for a huge public-works program is an example; the second, by partial or complete debasement of the currency. Under the first program the Government must inevitably resort to the central banks of issue. They, not acting on their own volition but the Government compulsion, are driven to provide the basis for a credit increase. Such a procedure was resorted to during the war. In fact, many of our agricultural troubles to-day are directly traceable to this war-time inflation of prices of agricultural products and land. The best example, however, is furnished by the course of events in France after the war.

The French Government, faced with recurring deficits, turned to the Bank of France for funds. The Government gave its promissory notes to the bank. The bank in turn gave bank notes to the Government. The currency was paid out by the Government to meet current expenditures. The procedure reduced the value of the franc from 19 cents to 2 cents, and complete collapse of the monetary system was threatened before the inflation was brought under control.

Under the second and more powerful method of inflation the United States Government would issue a paper dollar which would have no value except for the say-so of the Government. It will be urged, of course, that the promise of the United States Government is worth a great deal. It is under ordinary circumstances and when the Government conducts its business with prudence and in accordance with the dictates of sound financial policy. But if the Government of the United States should undertake to print and pass out "say-so" money, it would at once destroy confidence in all United States currency.

The people know that greenbacks depreciated to 35 per cent of their face value. They know that the "say-so" marks printed by the German Government depreciated from a value of 24 cents to zero. They know that, once the United States embarks on this course, United States currency is going at once to depreciate in value.

WOULD HALT GOLD PAYMENT

What would happen? It should be recognized that the bad effects of such currency issues would be immediate and would occur even if the issues were moderate in amount, but in order to have an effect on prices the issues would have to be of very large dimensions. So long as our currency were redeemable in gold every holder of currency, everyone with a bank balance, every foreigner with balances in this country or American securities, would at once convert them into gold. In a very short while our gold stock would approach exhaustion. We would be obliged to sus-

pend gold payment. We would then find ourselves on an irredeemable paper-currency basis, with currency that, as the vicious spiral of inflation circled upward, would constantly decrease in value.

The first effect would be to enormously diminish the value of all savings. Every man or woman whose savings were deposited in savings banks, or which took the form of insurance policies, or are represented by investments in bonds or mortgages, other than those payable in gold, would find their savings and their income from those savings correspondingly reduced.

Prices and the cost of living would rise very rapidly.

While wages and salaries would also rise, they would lag behind, so that though business would in the early stages be stimulated, and to that extent unemployment relieved, the wage-earning and salaried classes would find themselves involved in a situation from which there would be no escape, with their real wages and standards of living falling steadily. Production, stimulated by rising prices, would increase rapidly. But with the decreased purchasing power of the fixed income and of the wage-earning classes there would soon develop a serious maladjustment which would eventually result in collapse.

FARMER WOULD LOSE IN END

The farmer would appear, in the first instance, to be the gainer. If his mortgage were not payable in gold, he could pay it off in cheap currency. Rising prices would be reflected in what he received for his products. But the rise in the prices of what he must buy would soon offset the gains. Furthermore, as the values of farm land rose through the process of inflation, new debts would be incurred at the higher levels, and when the final crash came he would find himself worse off than ever, with a much heavier burden of debt and his markets destroyed. While inflation at some stages in the process and at some points appears to correct some of the evils arising during a period of deflation, the one outstanding characteristic of the movement is that once started it soon becomes completely out of control and pursues an irresistible course until it collapses.

All experience teaches that, whatever the earlier appearance may be, all classes are ultimately adversely affected by the process of inflation, and eventually it results in ruin to the economic life of a nation and brings terrible disaster to all of its people.

While I believe that increases in commodity prices over prevailing depression levels would be clearly desirable, any attempt to lift prices through currency manipulation is based on an utterly false conception of the problem which is presented by declining commodity prices.

PROGRAM FOR SOUND RECOVERY

The kind of program which I would like to see initiated and which I think would lay a foundation for a sound recovery is as follows:

First, a balanced Budget; second, an easy-money policy consistently pursued by the principal central banks; third, a definite attack on the debt problem, not by wholesale treatment but by setting up adequate machinery to deal with different categories of debts; fourth, a settlement of the foreign-debt question; fifth, a stabilization of world exchanges by a return in the first instance to the gold standard by the more important commercial and industrial countries; sixth, the lifting of arbitrary trade barriers.

I believe that if these measures were carried through in a broad and constructive spirit the stimulus to world economy would be so great that there would be an immediate response in the way of an industrial and commercial expansion and a marked increase in prices, accompanied gradually by essential readjustments.

Before leaving this subject and presenting to you briefly the budgetary problem proper, I should like to quote what I consider a very pertinent statement made by William Graham Sumner in 1896, when the question of cheapening the dollar was an active issue:

"The plain fact, therefore, to be faced without any disguise is that we are invited to debase the coinage and lower the standard of value, now and for the future, as a free act of political choice, to be deliberately adopted in a time of profound peace, and that this is to be done with the intention and hope that it will perpetrate a bankruptcy at 50 cents on the dollar for all existing debtors. Can this project be executed? It can not. The scheme and plan of it for a nation of 70,000,000 people is silly and wicked at the same time, and is both beyond the power of words to express. The projectors of it deal with the economic phenomena of a great nation as if they were talking about a game at cards, and they plan to do this with prices and that with debts, this with exports and that with banks, as if they were planning a program for building a barn. If we try to realize the operation proposed, we shall see how childish and absurd it is."

THE BUDGET PROBLEM

Turning now to the Budget problem, balancing the Federal Budget is not an academic formula insisted on by an over-nice Treasury, nor a catchword designed to bring pressure on a recalcitrant Congress any more than deficits are mere matters of accounting practice. Both are realities from which, in spite of all the arguments and talk, certain definite consequences flow.

Under existing conditions it requires a very determined effort to balance a budget. This effort involves the task, difficult enough under the most favorable circumstances, of cutting Government expenditures at the very moment when there is pressure to expand them for all manner of purposes. To avoid the necessary effort, or to permit these desired expenditures, specious arguments are advanced which run all the way from denying the existence of a deficit "in a true economic sense" to the contention that deficits are of no real consequence and may for the present be disregarded.

As to the existence of deficits, from June 30, 1930, to December 31, 1932, the Treasury has found it necessary to increase the public debt by $3,875,000,000, exclusive of borrowing necessitated by loans to the Reconstruction Finance Corporation. This is a fact. During the three fiscal years ending with the current one, the Government will have failed to effect a reduction of $1,230,000,000 of public debt as required by the sinking-fund provisions applicable to our public debt, which are in effect a contract with the holders of our securities. This also is a fact. As a result of these two facts, instead of reducing our war debt during this period by $1,230,000,000 we have actually increased it by $3,875,000,000.

Now there are those who maintain that under some theoretical system of accounting the Government would have been justified in treating construction expenditures, for example, as capital items in order to spread the burden on the Budget over a number of years and so, as a matter of bookkeeping, either reduce the size of the deficits or even eliminate them entirely.

No matter how the Treasury set up its accounts, the fact of a huge increase in the public debt would remain. The failure to cover our sinking-fund requirements would not disappear. The increased amount of Government securities outstanding would not be retired. The uncertainty as to the Government's position in the money market as a borrower would not disappear, but rather would be increased. The difficulties incident to the management of the public debt under existing conditions would become more complex, rather than less. Fancy bookkeeping might give a false sense of security to the unwary and a specious argument to the spenders, but it would not alter the fact that the United States Government will have closed three fiscal years with large deficits and with a large increase in the public debt, and that all experience teaches that continuing deficits entail serious consequences.

CAPITALIZING IMPROVEMENTS

I know all of the arguments in favor of capitalizing governmental expenditures applied to so-called permanent improvements, of excluding them from the current Budget, and of issuing bonds to cover them. I have heard them for years. They have never appealed to me as sound, and to-day they appeal to me less than ever, since I know that these same arguments have enabled politicians and contractors all over the United States to saddle on States, municipalities, and local governmental subdivisions in the course of the last 12 years some $10,000,000,000 of public debt. I am not speaking from a theoretical standpoint. I am speaking from the standpoint of actual experience. I served in the State legislature. I was chairman of a committee that devoted over a year of its time to the special study of our State tax financial system. I was a member of the committee on finance of the State senate. When I was in Congress I was for five years a member of the Ways and Means Committee. I have served for six years in the Treasury Department of the United States Government. I can claim, therefore, to have had a fairly broad experience in the field of public finance.

Everything that I have learned in the course of these many years has led me to the definite conclusion that the cash accounting system of the United States Treasury, subject, of course, to improvement in the future as in the past, is in principle the best and wisest system from a practical standpoint for a government such as ours to follow.

It is said that business corporations capitalize improvements. But there is this great difference between business corporations and the Government. Capital improvements by business corporations are productive in character and are intended to produce enough revenue to pay for the indebtedness over a given period of years. Generally speaking, this is not true of capital improvements made by the Government. With very few exceptions these new Government buildings represent cash liabilities rather than assets. They require additional funds for repairs and upkeep. The claim that has been so frequently made that the savings in rental would be enough to cover fixed charges, running expenses, repairs, and depreciation will not bear examination. Under the present building program, of the buildings completed up to January 1 last, replacing leased quarters, we are spending on running expenses alone $1,130,000, as compared with the rental for accommodations previously leased of $475,000.

GIVES EXAMPLE OF FALLACY

Let me illustrate. In the town of X, let us say, we are paying $2,400 to rent the necessary accommodations for a post office. The Government erects a $100,000 building. Without figuring the cost of land, interest on the investment, the maintenance cost of that building amounts, together with depreciation, to $6,300 per annum. In other words, whatever the other charges may be in dollars and cents, the new post office in this particular town costs the United States Government $3,900 more a year than the rented quarters did. To say that we should capitalize this new liability and issue bonds against it because it is analagous to what a manufacturing corporation does when it erects a new building, or a railroad when it builds a new connecting link, which are expected to pay for themselves, is, to say the least, illogical.

Moreover, it should be pointed out that in budgeting for Federal-construction expenditures we are dealing primarily with relatively continuous operations and not with isolated and nonrecurring expenditures. This is more than a question of mere

accounting. Inevitably it has an important bearing upon the effective control of expenditures which clearly is one of the most pressing issues in the field of public finance to-day.

Those of us who have been responsible for the fiscal policies of the Government during this trying period can not be accused of having acted hastily and harshly in attempting to bring the Budget into balance. During the first two years of the depression the Treasury refrained from urging increased taxes, or from exerting pressure for the curtailment of expenditures that might possibly be useful in cushioning the effects of business contraction. We recognized that during the days of plenty the public debt had been retired at a rate faster than originally contemplated, and that as a result it may fairly be contended a reserve had been set up which we were justified in drawing on in order to avert the imposition of new tax burdens in a time of stress. We only became insistent in the matter of balancing expenditures and receipts when it became apparent that the size and recurring character of the deficits had reached a point where the situation might get out of hand, with all of the consequences which experience has taught us would follow.

CREDIT REQUIRES BALANCED BUDGET

We are insisting to-day on the necessity of bringing the Budget into balance not from a theoretical standpoint but because this represents one of the essential steps to be taken as part of a program of economic rehabilitation. There is no doubt as to the importance of the credit factor in the present depression. Nor is it open to dispute that a sound and unquestioned Government credit is the cornerstone upon which an expanded credit structure must rest. By that I do not mean to imply that there is to-day any question as to the soundness of the credit of the United States Government. There is not. As a result of the vigorous program followed insistently for the last year, that danger has been averted. But it will remain out of the picture only so long as the Government recognizes the absolute necessity of adhering unswervingly to the principle of a balanced Budget. Break down the principle, disregard this fundamental policy, and you embark on a downward slope upon which it becomes increasingly difficult to arrest your course.

Assurance and confidence on this basic point can not be maintained by mere lip service. What is essential is clear evidence that the finances of the Government are under control, and, in the last analysis, this can be given only by the readiness and determination of the Congress promptly to make provision for the Budget.

EASY-MONEY POLICY

If we keep on pumping out Government securities a point must be reached at which the question arises not necessarily as to the ultimate credit standing of the Government but as to its ability to maintain the value of its securities in the face of a constantly increasing volume. When this point is reached banks and investors hesitate to buy because of the fear of future depreciation. Interest rates will tend to rise with each new issue. Ultimately the point might be reached where central bank credit has to be invoked to support the credit of the Government, and when that point is reached we have entered the field of destructive inflation.

Moreover, a continuation of recurring deficits, even on a moderate scale, necessarily restricts the freedom of action with which the central banks can conduct their credit operations. I think it will be universally agreed that at this particular stage in the period of depression an easy-money policy on the part of the Federal reserve banks is highly desirable. Such an easy-money policy can best be pursued through means of open-market operations. These are necessarily hampered by unbalanced budgets, for their effect, even though indirect, partakes of the character of mopping up Government deficits. Paradoxical as it may sound, if we are to pursue sound policies, one of the surest means of bringing about a condition which will permit easy money and expanding credit is a balanced Budget rather than a Government deficit.

But aside from central bank policy the retirement of the Federal Government from the money market as a constant seeker for new funds would have a stimulating effect on the capital market, to which we must look for the initial impulse toward recovery.

From the standpoint of the Treasury a balanced Budget should permit large saving in interest charges, not only through the prevention of a further increase in the public debt but because it would enable the refunding on favorable terms of bonds bearing a high rate of interest, and which by October, 1933, will be callable in an amount not far from $7,000,000,000. A lower interest charge on such a large volume of Government securities would affect long-time interest rates. Lower rates and increased bond prices would stimulate the capital market and create one of the conditions essential to business recovery. The goal is so definitely possible of attainment and the results will be so beneficial in many directions that one can not help but be impatient at the difficulties and delays; and even more impatient at the uncertainty.

ACTUAL BUDGET SITUATION

Turning to the actual Budget situation, the picture is as follows:

Our total expenditures for this fiscal year which ends June 30 next will aggregate $3,771,000,000, exclusive of public-debt retirements. These expenditures will be devoted to the following purposes: $695,000,000 are required for interest on the public debt, $134,000,000 represent excess of postal expenditures over receipts, $87,000,000 customs drawbacks and internal-revenue refunds, $21,000,000 payments to the Civil Service retirement fund, and $157,000,000 on trust fund account, such as the Government life-insurance fund, trust funds for the benefit of Indian tribes, expenditures of the District of Columbia government, etc., or a total of $1,094,000,000 of unavoidable obligations. We shall expend about $630,000,000 for national defense—an amount which, until greater progress is made in international disarmament, can not be safely reduced; about $920,000,000 on our veterans (both exclusive of construction items), and about $600,000,000 on public works in completion of the program already embarked on, making a total for these purposes of $2,150,000,000.

This leaves about $500,000,000 for the ordinary running expenses of the Government, including the legislative and judicial branches, fiscal administration and control of banking and currency, foreign relations, conservation of national resources, education, promotion of the public health, Indian affairs, aids to agriculture, labor, aviation, and industry. In other words, if we exclude the unavoidable obligations such as public-debt expenditures and exclude the Army, Navy, and veterans, the ordinary expenses of the Federal Government are approximately $500,000,000. I stress this point because of the misleading picture that has been painted of an immense and costly bureaucracy and of the vast savings to be effected through a reorganization of the Federal Government. Such reorganization is desirable in the interest of greater efficiency and greater economy, but substantial relief to the taxpayer must be sought elsewhere.

WAY INDICATED BY PRESIDENT

The President in his Budget message has indicated how and where economies can be effected.

The 1934 Budget, as supplemented, contemplates expenditures, exclusive of public-debt retirements, of $3,233,000,000 for the fiscal year 1934 after all reductions proposed by the President, as compared with $3,771,000,000 for the present fiscal year, or a saving of $538,000,000. This would be accomplished in the main by curtailing expenditures for public works by about $260,000,000; by amending veterans' legislation to do away with certain unjustifiable payments resulting in a reduction of $127,000,000; by the application of the strictest economy in the various departments and bureaus of the Government, and a further reduction in salaries of $57,000,000.

Reducing the cost of government by over half a billion dollars, following the substantial savings already effected this year, would constitute a real and fruitful achievement. It is the first essential step toward bringing the Budget into balance and laying a foundation for ultimate relief to the taxpayer. I know of no reason why the country should not get the benefit of these reductions in expenditures. I am not talking of a vague and theoretical program. Every one of the economies that go to make up this saving of over half a billion dollars is set out in detail in the Budget message. It requires but the affirmative vote of the Congress to make these economies effective, and both parties are pledged to drastic economies and to a balanced Budget.

But this is only part of the story. Even if current expenditures are reduced to $3,233,000,000, the Budget will not be in balance. The total receipts, exclusive of foreign-debt payments which recent events have made a highly uncertain item, are estimated at $2,620,000,000, leaving a gap of $613,000,000 which will have to be bridged by increased taxation. Assuming that we shall collect something on foreign-debt account, we need, roughly speaking, a half billion dollars of additional receipts.

The situation thus may be summarized by saying that, exclusive of public-debt items, our Federal Budget may be brought into balance in the next fiscal year by reducing expenditures half a billion dollars and by providing half a billion dollars of new money. But this does not afford provision for sinking-fund obligations, and it presupposes that no new obligations of any kind will be incurred.

CITES REVENUE SOURCES LEFT

The savings, as I have said, are set out in detail in the Budget message. When I appeared before the Ways and Means Committee on December 14, when the so-called beer bill was under consideration, I pointed out that the beer bill alone, yielding, say, $125,000,000, or even coupled with the gasoline tax, yielding another $137,000,000, could not be expected to produce the necessary revenue—in fact, they would only produce about one-half—but that, combined with a general manufacturers' excise tax, they would furnish a base of taxation sufficiently broad to give adequate assurance of a balanced Budget. Without the manufacturers' excise tax it will be extremely difficult to balance the Budget, since the field of new taxes has been pretty well exhausted by the revenue act of 1932.

It should not be forgotten that we adopted income-tax rates that run as high as 63 per cent, which is an extraordinarily high peace-time rate, and an inheritance tax law with rates running as high as 45 per cent, that we have imposed sales taxes on a great variety of articles, including lubricating oils, brewers' wort, automobiles, trucks, parts and accessories, tires, gasoline, candy, chewing gum, soft drinks, jewelry, toilet preparations, furs, electricity, radios, mechanical refrigerators, sporting goods, and cameras, and that, in addition, new and increased stamp taxes were imposed; taxes on admissions were extended; a tax on telephone, telegraph, cable, and radio messages, checks, safety-deposit boxes, transportation of oil by pipe line, and the use of boats were

adopted. Many of these taxes are difficult of administration and not particularly productive. Some are inequitable and unjustifiable in their present form. The adoption of a general manufacturers' excise tax at a comparatively low rate would permit the elimination of a number of them.

URGES MANUFACTURERS' EXCISE TAX

There was a time when I did not favor a manufacturers' excise tax. But at a time when our normal sources of revenues from excises and customs, supplemented by income and inheritance taxes imposed at war-time rates on not more than two and a half million people out of a nation of 120,000,000 are inadequate to supply the necessary revenue, the objections ordinarily urged against the manufacturers' excise tax do not seem to me to remain valid. It appears preferable to a great variety of discriminatory sales taxes, which are just as much consumption taxes as a manufacturers' excise tax. It would be levied at a low rate and imposed on such a broad base as not to be truly burdensome to any class of taxpayers. It is not a novel form of taxation, but one which has given satisfaction in Canada, where conditions are not fundamentally different from ours, and in Australia.

The objections to it are theoretical rather than practical. It is the most promising source of new revenue that we can turn to at this time to assure the safeguarding of the public credit. But as far as I am concerned, I would be glad to consider with an open mind any other forms of taxation that might be suggested to bring our Budget into balance.

We have been through three and a half years of extreme depression and drastic liquidation. We have endured many of the sufferings and evils incident to drastic readjustments. We have overcome the immense dangers threatened by a financial panic of the first magnitude, superimposed on the extreme stress brought about by predirected depression. While still confronted by immense difficulties and intense suffering on the part of millions of people, the world has, I believe, moved forward in the last 12 months, and the ground is firming under our feet. The outlines of the program which should be developed and followed are beginning to become clearer. I believe that proper efforts at this time to avoid disturbances and to hasten the operation of constructive forces will be effective in bringing recovery through normal and controlled channels. After all they have endured, after the extraordinary patience, steadfastness, and courage of the peoples of the world, it would be nothing short of tragedy on a world-wide scale to throw up our hands now and to resort to untried measures—measures which all experience teaches are doomed to failure—when the way is clear and the goal within reach if we have but the hardihood to push forward along the obvious if undramatic path of common sense to reconstruction and recovery.

ADJOURNMENT

Mr. WOODRUM. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 19 minutes p. m.) the House adjourned until to-morrow, Thursday, February 2, 1933, at 12 o'clock noon.

COMMITTEE HEARINGS

Tentative list of committee hearings scheduled for Thursday, February 2, 1933, as reported to the floor leader:

WAYS AND MEANS

(10 a. m.)

Continue hearing on depreciated currency bill.

NAVAL AFFAIRS

(10.30 a. m.)

Hearings on private bills.

INTERSTATE AND FOREIGN COMMERCE

(10 a. m.)

Continue hearings on H. R. 11675, to amend Federal water power act.

COINAGE, WEIGHTS, AND MEASURES

(10 a. m.)

Continue hearings on silver bills.

JUDICIARY

(10 a. m.)

Hearings on bill to punish those who incite overthrow of Government.

AGRICULTURE

(10 a. m.)

Subcommittee hearing on oleo.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

905. A letter from the treasurer of the Washington Rapid Transit Co., transmitting copy of the balance sheet of the Washington Rapid Transit Co. as of December 31, 1932; to the Committee on the District of Columbia.

906. A message from the President of the United States, transmitting the annual report of the Director of Public Buildings and Grounds of the National Capital for the fiscal year ended June 30, 1932; to the Committee on Public Buildings and Grounds.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. McREYNOLDS: Committee on Foreign Affairs. Senate Joint Resolution 243. Joint resolution authorizing the President of the United States to extend a welcome to the Pan-American Medical Association which holds its convention in the United States in March, 1933; without amendment (Rept. No. 1952). Referred to the House Calendar.

REPORT OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. BLACK: Committee on Claims. H. R. 14508. A bill for the relief of William Sulem; without amendment (Rept. No. 1951). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. THOMASON: A bill (H. R. 14531) to make provision for suitable quarters for certain Government services at El Paso, Tex., and for other purposes; to the Committee on Public Buildings and Grounds.

By Mr. O'CONNOR: A bill (H. R. 14532) to amend section 604 of the revenue act of 1932, relating to the tax on furs; to the Committee on Ways and Means.

By Mr. EVANS of California: A bill (H. R. 14533) to amend an act approved August 13, 1894, entitled "An act for the protection of persons furnishing materials and labor for the construction of public works"; to the Committee on the Judiciary.

By Mr. SWING: A bill (H. R. 14534) to provide for the selection of certain lands in the State of California for the use of the California State park system; to the Committee on the Public Lands.

By Mr. ANDREW of Massachusetts: A bill (H. R. 14535) to amend section 3 of the act of May 28, 1928, relating to salary rates of certain civil-service positions; to the Committee on the Civil Service.

By Mr. HOWARD: A bill (H. R. 14536) to authorize the acquisition by the United States of the land upon which the Seneca Indian School, Wyandotte, Okla., is located; to the Committee on Indian Affairs.

By Mr. ANDREW of Massachusetts: A bill (H. R. 14537) authorizing Essex Shore Way (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Merrimac River at or near Plum Island Point, Mass.; to the Committee on Interstate and Foreign Commerce.

By Mr. HOWARD: A bill (H. R. 14538) to authorize the creation of an Indian village within the Shoalwater Indian Reservation, Wash., and for other purposes; to the Committee on Indian Affairs.

By Mr. SWANSON: Joint resolution (H. J. Res. 584) proposing an amendment to the Constitution of the United States; to the Committee on Ways and Means.

MEMORIAL

Under clause 3 of Rule XXII, a memorial was presented and referred as follows:

Memorial of the Legislature of the State of Washington, memorializing Congress in regard to the condition created by depreciated foreign currency; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BRAND of Georgia: A bill (H. R. 14539) for the relief of Henry Norrell Wylds; to the Committee on Claims.

By Mr. BLACK: A bill (H. R. 14540) for the relief of St. Anthony's Hospital at Michigan City, Ind.; Dr. Russell A. Gilmore; Emily Molzen, nurse; and the Hummer Mortuary; to the Committee on Claims.

Also, a bill (H. R. 14541) for the relief of Mrs. Carlysle Von Thomas, sr.; to the Committee on Claims.

By Mr. CAMPBELL of Pennsylvania: A bill (H. R. 14542) granting a pension to Sallie T. Dieterich; to the Committee on Invalid Pensions.

By Mr. HOGG of Indiana: A bill (H. R. 14543) granting an increase of pension to Aroline M. Rhoades; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14544) granting an increase of pension to Rebecca Brouse; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14545) granting an increase of pension to Susannah L. Allen; to the Committee on Invalid Pensions.

By Mr. PARKER of New York: A bill (H. R. 14546) granting an increase of pension to Addie L. Wright; to the Committee on Invalid Pensions.

By Mr. SCHAFER: A bill (H. R. 14547) for the relief of Edith Peeps; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

10096. By Mr. BACON: Petition of sundry citizens of Floral Park, L. I., in opposition to every legislative act which would legalize alcoholic liquors stronger than one-half of 1 per cent; to the Committee on the Judiciary.

10097. By Mr. BOYLAN: Resolution adopted by the Lackawanna Railroad Veterans' Association, opposing the ratification of the treaty which provides for a deep waterway between the Great Lakes and the Atlantic Ocean; to the Committee on Foreign Affairs.

10098. Also, resolution unanimously adopted at a convention of the National Guard Association of the State of New York, advocating the maintaining of appropriations for the Naval Reserve on a basis sufficient to afford 48 drills and 15 days' training per annum, etc.; to the Committee on Appropriations.

10099. By Mr. BULWINKLE: Petition of citizens of Mecklenburg County, Banners Elk, N. C., and Cleveland and Gaston Counties, protesting against the repeal of the eighteenth amendment; to the Committee on the Judiciary.

10100. By Mr. CULLEN: Petition of Lackawanna Railroad Veterans' Association, opposing the treaty between the United States and Canada relative to the construction of a deep waterway between the Great Lakes and the Atlantic Ocean; to the Committee on Interstate and Foreign Commerce.

10101. Also, petition of the National Guard Association of New York, represented by the Naval Militia, advocating the maintaining of appropriations for the Naval Reserve on a basis sufficient to afford 48 drills and 15 days' training per annum for the drilling units of the Naval Reserve; to the Committee on Naval Affairs.

10102. Also, petition of the National Canners Association, urging Congress to take immediate steps to bring about a solution of the problem relating to depreciated currency of many countries; to the Committee on Banking and Currency.

10103. Also, petition of the New York State Horticultural Society, opposing the farm allotment bill; to the Committee on Agriculture.

10104. By Mr. DARROW: Resolution of Benjamin Franklin Chapter, No. 105, National Sojourners, of Philadelphia, in behalf of a strong Army and Navy; to the Committee on Military Affairs.

10105. By Mr. DRANE: Petition of citizens of Hillsboro County, Fla., protesting against the repeal of the eighteenth amendment; to the Committee on the Judiciary.

10106. Also, petition of board of governors of Clearwater (Fla.) Chamber of Commerce, in behalf of House Resolutions 317 and 323; to the Committee on Expenditures.

10107. By Mr. ENGLEBRIGHT: Petition of J. H. Finley, of Altaville, Calif., relative to the money system of the United States; to the Committee on Banking and Currency.

10108. Also, petition of League of California Municipalities, regarding Federal taxes, revenue act of 1932; to the Committee on Ways and Means.

10109. Also, petition of the Thirty-seventh Legislative Assembly of the State of Oregon, Senate No. 1, urging payment soldiers' bonus; to the Committee on Ways and Means.

10110. By Mr. HAINES: Resolution of the Patriotic Order Sons of America, No. 162, of West York Borough, York County, Pa., urging tariff on coal admitted into this country, and pledging themselves to buy only American-made goods, in favor of reemployment of American citizens, and pledging themselves to public-school system; to the Committee on Ways and Means.

10111. By Mr. HALL of Mississippi: Petition of 38 members of the Biloxi (Miss.) Chapter of the Woman's Christian Temperance Union, opposing the resubmission of the eighteenth amendment to State conventions or State legislatures for the purpose of ratification, and asking for adequate appropriations for law enforcement and for education in law observance; to the Committee on the Judiciary.

10112. By Mr. LAMBERTSON: Petition of the Woman's Christian Temperance Union, of Winchester, Kans., signed by its president, Mrs. W. S. Price, and secretary, Mrs. Alice McDermond, favoring the improvement of the motion-picture industry; to the Committee on Interstate and Foreign Commerce.

10113. By Mr. LINDSAY: Petition of National Guard Association of the State of New York, favoring appropriations for the Naval Reserve in the Federal appropriation for Navy; to the Committee on Appropriations.

10114. Also, petition of Philip DeRonde, chairman Colonial Trust Co., New York City, opposing reduction of the enlisted personnel of the Marine Corps; to the Committee on Naval Affairs.

10115. By Mr. MEAD: Petition of the National Guard Association of the State of New York, protesting against proposed reduction in training program for the Naval Militia-Naval Reserve; to the Committee on Naval Affairs.

10116. By Mr. PARKER of Georgia: Memorial of J. L. Purcell, chairman of mass meeting of the citizens of Vidalia, Ga., held on Sunday, January 29, 1933, expressing opposition to any repeal or modification of the eighteenth amendment or the Volstead Act; to the Committee on Ways and Means.

10117. Also, letter of the Hon. A. S. Boyer, of Millen, Ga., outlining a proposal to effect a reduction in cotton acreage; to the Committee on Agriculture.

10118. By Mr. REID of Illinois: Petition of Elbert D. Sperring, of Bensenville, Ill., asking for action to revaluate the gold ounce and to correct financial abuses; to the Committee on Banking and Currency.

10119. By Mr. ROBINSON: Petition signed by the president of Union 1047, United Mine Workers of America, Mr. Bert Blaskerby, of Des Moines, Iowa, route 3, and Frank Smith and Lew Jones, urging the passage of the Costigan-La Follette bill, S. 5125; to the Committee on the Judiciary.

10120. By Mr. SANDERS of New York: Petition of Rev. Herbert W. H. Cary and other citizens of South Byron, N. Y., urging passage of the stop-alien-representation amendment to the United States Constitution; to the Committee on the Judiciary.

10121. Also, petition of Mary M. Meekin and other citizens of Avon, N. Y., urging passage of the stop-alien-representation amendment to the United States Constitution; to the Committee on the Judiciary.

10122. By Mr. SEGER: Petition of Rev. C. S. Hunt and members of Union Methodist Episcopal Church, Totowa Borough, N. J., favoring adoption of the stop-alien-representation amendment; to the Committee on the Judiciary.

10123. Also, petition of Woman's Home Missionary Society of the First Methodist Episcopal Church, of Passaic, N. J., favoring passage of Senate bill 1079 and Senate Resolution 170 for regulation of the motion-picture industry; to the Committee on Interstate and Foreign Commerce.

10124. By Mr. SINCLAIR: Petition of North Dakota Cooperative Wool Marketing Association, recommending the passage of the Frazier bill (H. R. 7524) to refinance agricultural indebtedness; to the Committee on Banking and Currency.

10125. Also, petition of North Dakota Cooperative Wool Marketing Association, opposing the repeal of the marketing act and urging that this act be strengthened; to the Committee on Agriculture.

10126. By Mr. TREADWAY: Petition of Henry G. Hammond and other citizens of Westfield, Mass., urging the adoption of a constitutional amendment to eliminate alien population in making future apportionments for congressional districts; to the Committee on the Judiciary.

10127. By the SPEAKER: Petition of the Sons of the American Revolution, urging enactment of House bill 6466; to the Committee on Naval Affairs.

10128. Also, petition of the Eighth Women's Patriotic Conference on National Defense, urging that immediate steps be taken to build the Navy up to the strength permitted under the London and Washington treaties; to the Committee on Naval Affairs.

10129. By Mr. SUTPHIN: Petition of the Lackawanna Railroad Veterans' Association, of Hoboken, N. J., opposing the proposed deep waterway between the Great Lakes and the Atlantic Ocean; to the Committee on Interstate and Foreign Commerce.

10130. By Mr. TEMPLE: Petition of a number of residents of Washington County, Pa., supporting the stop-alien-representation amendment to the United States Constitution; to the Committee on the Judiciary.

10131. By Mr. SPENCE: Petition of Fred F. DeJaco and others, of Newport; Gertrude Wilke, R. N., and others, of Covington; Ray Griffith, of Erlanger; and Norbert Stenger, of Bellevue, all in the State of Kentucky, concerning the revaluation of the gold ounce; to the Committee on Coinage, Weights, and Measures.

SENATE

THURSDAY, FEBRUARY 2, 1933

(Legislative day of Tuesday, January 10, 1933)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

Mr. FESS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Dale	Kendrick	Schall
Austin	Davis	Keyes	Schuyler
Bankhead	Dickinson	King	Sheppard
Barbour	Dill	La Follette	Shipstead
Barkley	Fess	Lewis	Shortridge
Bingham	Fletcher	Logan	Smith
Black	Frazier	McGill	Smoot
Blaine	George	McKellar	Steiwer
Borah	Glass	McNary	Swanson
Bratton	Glenn	Metcalf	Thomas, Idaho
Brookhart	Goldsborough	Moses	Thomas, Okla.
Bulkley	Gore	Neely	Townsend
Bulow	Grammer	Norbeck	Trammell
Byrnes	Hale	Norris	Tydings
Capper	Harrison	Nye	Vandenberg
Caraway	Hastings	Oddie	Wagner
Connally	Hatfield	Pittman	Walcott
Coolidge	Hawes	Reed	Walsh, Mass.
Copeland	Hayden	Reynolds	Walsh, Mont.
Costigan	Hebert	Robinson, Ark.	Watson
Couzens	Johnson	Robinson, Ind.	Wheeler
Cutting	Kean	Russell	White

Mr. FESS. I wish to announce that the Senator from Missouri [Mr. PATTERSON] is necessarily absent from the Senate because of a death in his family. I ask that this announcement may stand for the day.

I also wish to announce that the Senator from Wyoming [Mr. CAREY] is detained from the Senate, and will be detained for several days, on official business connected with the Senate. I will let this announcement stand for the day.

Mr. NORRIS. I desire to announce that my colleague the junior Senator from Nebraska [Mr. HOWELL] is absent on official business of the Senate.

The PRESIDENT pro tempore. Eighty-eight Senators having answered to their names, a quorum is present.

CHAIN STORES—GROSS PROFIT AND AVERAGE SALES PER STORE OF RETAIL CHAINS (S. DOC. NO. 178)

The PRESIDENT pro tempore laid before the Senate a letter from the chairman of the Federal Trade Commission, transmitting, in response to Senate Resolution No. 224, Seventieth Congress, a report relative to the gross profit and average sales per store of retail chains, which, with the accompanying report, was referred to the Committee on the Judiciary and ordered to be printed.

ECONOMIC ANALYSIS OF FOREIGN TRADE OF THE UNITED STATES IN RELATION TO THE TARIFF (S. DOC. NO. 180)

The PRESIDENT pro tempore laid before the Senate a letter from the chairman of the United States Tariff Commission, in partial response to Senate Resolution 325, agreed to on January 28, 1933, which, with the accompanying tables, was ordered to lie on the table and to be printed, and the letter was ordered to be printed in the RECORD, as follows:

UNITED STATES TARIFF COMMISSION,
Washington, February 1, 1933.

The PRESIDENT OF THE SENATE,
United States Senate, Washington, D. C.

SIR: I have the honor to transmit herewith certain information in partial response to Senate Resolution 325, present session, passed on January 28.

The material consists of certain tables containing statistical and textual information which is indicative of the form and substance of the response which will be made to paragraphs 1, 2, 3, and 4 of said resolution. There is also included a form of a table to include information bearing upon paragraph 9 of the resolution.

The tentative table prepared for information under paragraph 9, it will be observed, omits the year 1930, because during that year there was a change of the tariff. The commission would be assisted in its work if it knew that the Senate regarded it as important that the table should contain information bearing upon that year. We may remark that to include this information would mean a considerable addition to our work inasmuch as it will be necessary to present separately the dutiable articles imported during the months previous to and the months subsequent to the enactment of the existing tariff law.

If arrangements can be made to have these tables printed, the material with respect to other paragraphs and schedules of the tariff act will be forwarded directly to the Printing Office from time to time in order that the data completed by February 15 and March 1, the dates specified in the resolution, may be made available to Members of the Senate in printed form.

Work is also going forward upon material in response to the other paragraphs of the resolution, much of the basic material, in fact, now being in process of compilation. If agreeable, this material, in so far as it consists of tables, will also be forwarded directly to the Printing Office as it is prepared.

The textual material with respect to paragraphs 10 and 11 will be sent directly to the Senate for such disposition as it wishes to make of it.

The commission would appreciate suggestions from the Senate, or from Members of the Senate, that might aid in perfecting the form in which the material is to be presented, with a view to being most useful to the Senate under the aforesaid resolution.

Very respectfully,

ROBERT L. O'BRIEN, *Chairman.*

REPORTS OF CERTAIN PUBLIC UTILITIES IN THE DISTRICT

The PRESIDENT pro tempore laid before the Senate letters from W. F. Ham, president of certain public utilities in the District of Columbia, transmitting, pursuant to law, reports of the operations of the following companies for the year ended December 31, 1932, which were referred to the Committee on the District of Columbia:

Potomac Electric Power Co., Washington Railway & Electric Co., and the Washington Interurban Railroad Co.

PETITIONS AND MEMORIALS

The PRESIDENT pro tempore laid before the Senate a resolution adopted by the District of Columbia Society of the Sons of the American Revolution, favoring the passage of the bill (S. 1282) to authorize the appointment and retirement of Evelyn Briggs Baldwin in the grade of captain in the Navy in recognition of his patriotic and scientific serv-

ices, and for other purposes, which was referred to the Committee on Naval Affairs.

Mr. ROBINSON of Arkansas presented a letter from Harold Remington, Esq., of New York City, N. Y., relative to amendment of the bankruptcy law, which was referred to the Committee on the Judiciary.

Mr. TYDINGS presented a petition of members of the Janet Montgomery Chapter, Daughters of the Revolution, of Maryland, praying for the adoption of an adequate national-defense program and the making of necessary appropriations therefor, which was referred to the Committee on Appropriations.

Mr. CAPPER presented a memorial of sundry citizens of Woodbine, Kans., remonstrating against the repeal of the eighteenth amendment of the Constitution or the repeal or modification of the national prohibition law, which was ordered to lie on the table.

He also presented resolutions adopted by the Central Sunday School of Augusta, the Ladies' Aid Society of the Christian Church of Manhattan, the Methodist Episcopal Sunday School of Ransom, and local chapters of the Woman's Christian Temperance Union of Arkansas City, Beloit, Coffeyville, Lewis, Manhattan, Osborne, Tyro, and Winchester, all in the State of Kansas, favoring the passage of legislation to regulate and supervise the motion-picture industry, which was ordered to lie on the table.

Mr. GRAMMER presented a resolution adopted by the South End Civic and Progressive Club, of Seattle, Wash., favoring the adoption of the resolution (S. Res. 300) authorizing an investigation of labor conditions prevailing upon the Mississippi flood-control project (submitted by Mr. WAGNER), which was ordered to lie on the table.

He also presented resolutions adopted by the Federation of Women's Clubs of Seattle and the King County Pomona Grange, both in the State of Washington, favoring the prompt ratification of the World Court protocols, which were ordered to lie on the table.

Mr. COPELAND presented a resolution adopted by the Stanford Dairymen's League, of Stanfordville, N. Y., favoring the passage of legislation to inflate the currency so as to increase commodity prices to the 1928 level, which was referred to the Committee on Banking and Currency.

He also presented resolutions adopted by the National Guard Association of the State of New York, in convention assembled at Troy, N. Y., favoring the making of adequate appropriations for the Naval Reserves, which were referred to the Committee on Appropriations.

He also presented resolutions adopted by the Ossining Democratic Club and the Italian-American Civic Association, of Ossining (Inc.), both of Ossining, N. Y., protesting against the passage of legislation effecting a reduction in the number of drill nights of the Naval Reserves from 48 to 24 nights per year, and also the discontinuance of the two weeks' annual training cruise, which were referred to the Committee on Appropriations.

He also presented a resolution adopted by the Eighth Women's Patriotic Conference on National Defense, assembled at Washington, D. C., protesting against the passage of legislation reducing the pay and allowances of active and retired officers of the Regular Army, which was referred to the Committee on Appropriations.

He also presented resolutions adopted by the Aero Medical Association of the United States, favoring the placing of the flight surgeons of the Army and Navy on flying status and allowing them flight pay, which were referred to the Committee on Military Affairs.

He also presented resolutions adopted by the Queens Colony Civic Association (Inc.), New York, favoring the repeal of the so-called economy act as applied to Federal employees, which were ordered to lie on the table.

He also presented a memorial of sundry citizens of Onondago County, N. Y., remonstrating against the repeal or modification of the national prohibition law, which was ordered to lie on the table.

He also presented a memorial of sundry citizens, being members of the adult department, Methodist Sunday School, of Newark, N. Y., remonstrating against the repeal of the eighteenth amendment of the Constitution or the modification of the national prohibition law, which was ordered to lie on the table.

He also presented a resolution adopted by members of the Sunday School of the Presbyterian Church of Verona, Oneida County, N. Y., protesting against the repeal of the eighteenth amendment to the Constitution and also the repeal or modification of the national prohibition law, which was ordered to lie on the table.

REPORTS OF COMMITTEES

Mr. BINGHAM, from the Committee on Territories and Insular Affairs, to which was referred the bill (H. R. 311) to approve Act No. 268 of the session laws of 1931 of the Territory of Hawaii, entitled "An act to authorize and provide for the manufacture, maintenance, distribution, and supply of electric current for light and power within the island of Molokai," reported it without amendment and submitted a report (No. 1135) thereon.

Mr. JOHNSON, from the Committee on Commerce, to which was referred the bill (S. 5035) amending the shipping act, 1916, as amended, for the purpose of further regulating common carriers by water, reported it with amendments and submitted a report (No. 1136) thereon.

He also, from the same committee, to which was referred the bill (H. R. 6733) for estimates necessary for the proper maintenance of the flood-control works at Lowell Creek, Seward, Alaska, reported it without amendment and submitted a report (No. 1137) thereon.

Mr. WALSH of Montana (for Mr. SCHALL), from the Committee on Interoceanic Canals, to which were referred the following bills, reported them severally with amendments and submitted reports thereon:

H. R. 7519. An act to amend the Penal Code of the Canal Zone (Rept. No. 1138);

H. R. 7520. An act to amend the Code of Criminal Procedure for the Canal Zone (Rept. No. 1139);

H. R. 7521. An act to provide a new Code of Civil Procedure for the Canal Zone and to repeal the existing Code of Civil Procedure (Rept. No. 1140); and

H. R. 7522. An act to provide a new Civil Code for the Canal Zone and to repeal the existing Civil Code (Rept. No. 1141).

Mr. WALSH of Montana (also for Mr. SCHALL), from the Committee on Interoceanic Canals, to which were referred the following bills, reported them each with an amendment and submitted reports thereon:

H. R. 7518. An act to amend an act entitled "An act extending certain privileges of canal employees to other officials on the Canal Zone and authorizing the President to make rules and regulations affecting health, sanitation, quarantine, taxation, public roads, self-propelled vehicles, and police powers on the Canal Zone, and for other purposes, including provision as to certain fees, money orders, and interest deposits," approved August 21, 1916 (Rept. No. 1142); and

H. R. 7523. An act to amend sections 7, 8, and 9 of the Panama Canal act, as amended (Rept. No. 1143).

Mr. WALSH of Montana (also for Mr. SCHALL), from the Committee on Interoceanic Canals, to which were referred the following bills, reported them severally without amendment and submitted a combined report (Rept. No. 1144) thereon:

H. R. 7503. An act to repeal the Executive order of November 23, 1909, making the enticing of laborers from the Isthmian Canal Commission or the Panama Railroad a misdemeanor;

H. R. 7506. An act to repeal an ordinance enacted by the Isthmian Canal Commission August 5, 1911, and approved by the Secretary of War August 22, 1911, establishing market regulations for the Canal Zone;

H. R. 7508. An act to provide for the inspection of vessels navigating Canal Zone waters;

H. R. 7514. An act in relation to the Canal Zone postal service; and

H. R. 7515. An act to provide for the establishment of a customs service in the Canal Zone, and other matters.

ENROLLED BILLS PRESENTED

Mr. VANDENBERG, from the Committee on Enrolled Bills, reported that on February 1, 1933, that committee presented to the President of the United States the following enrolled bills:

S. 284. An act for the relief of William B. Thompson;

S. 3147. An act for the relief of Anna Pokorny; and

S. 5484. An act to extend the time during which certain provisions of the act of February 27, 1932, relating to improving the facilities of the Federal reserve system to meet the needs of member banks in exceptional circumstances, shall be effective.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. TRAMMELL:

A bill (S. 5573) to amend the Federal home loan bank act by adding a new section thereto providing authority for loans to home owners; to the Committee on Banking and Currency.

By Mr. BULKLEY:

A bill (S. 5574) for the relief of certain officers and employees of the Foreign Service of the United States who, while in the course of their respective duties, suffered losses of personal property by reason of catastrophes of nature; to the Committee on Foreign Relations.

By Mr. BINGHAM:

A bill (S. 5575) for the relief of Ferry Wilson (with accompanying papers); to the Committee on Claims.

By Mr. FRAZIER (by request):

A bill (S. 5576) to authorize the creation of an Indian village within the Shoalwater Indian Reservation, Wash., and for other purposes; to the Committee on Indian Affairs.

By Mr. HAWES:

A bill (S. 5577) granting a pension to Sarah C. League (with accompanying papers); and

A bill (S. 5578) granting a pension to Frank Vance (with accompanying papers); to the Committee on Pensions.

By Mr. COOLIDGE:

A bill (S. 5579) for the relief of John H. Hartnett; to the Committee on Finance.

By Mr. KING:

A bill (S. 5580) for the relief of the Uintah, White River, and Uncompahgre Bands of Ute Indians of Utah, and for other purposes; to the Committee on Indian Affairs.

AMENDMENT TO WAR DEPARTMENT APPROPRIATION BILL

Mr. FLETCHER submitted an amendment proposing to appropriate $30,000, or so much thereof as may be necessary, for dredging the channel of Fort Pierce Harbor, Fla., fiscal years 1933 and 1934, intended to be proposed by him to House bill 14199, the War Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

AMENDMENTS TO TREASURY AND POST OFFICE DEPARTMENTS APPROPRIATION BILL

Mr. BYRNES submitted an amendment providing for a reorganization of the executive departments, intended to be proposed by him to House bill 13520, the Treasury and Post Office Departments appropriation bill, which was ordered to lie on the table and to be printed.

Mr. BULKLEY submitted an amendment intended to be proposed by him to House bill 13520, the Treasury and Post Office Departments appropriation bill, which was ordered to lie on the table and to be printed, as follows:

On page 71, after line 6, to insert the following:

"(5) Section 105 is amended by adding at the end thereof the following new subsection:

"'(f) When no additional expense is entailed, annual leave of absence with pay, not to exceed 24 days, not including Sundays and holidays, may be granted to officers or employees of the Government, otherwise entitled to less than 24 days annual leave of absence with pay, whose compensation has been reduced by this section.'"

(Change succeeding paragraph numbers.)

Mr. BRATTON submitted an amendment intended to be proposed by him to House bill 13520, the Treasury and Post Office Departments appropriation bill, which was ordered to lie on the table and to be printed, as follows:

On page 82, after line 21, to insert the following:

"SEC. 20. The head of each executive department and independent establishment is authorized and directed to make such reductions in the expenditures from the appropriations made by the regular annual appropriation act for the several purposes of his department or establishment for the fiscal year ending June 30, 1934 (except, in the case of the Treasury Department, appropriations for acquisition of sites for and construction of public buildings and the appropriation for addition to the cumulative sinking fund pursuant to section 308 of the emergency relief and construction act of 1932), as will in the aggregate equal at least 5 per cent of the total amount so appropriated for his department or establishment for such year (excluding, in the case of the Treasury Department, the appropriations specified above). Such reductions shall be made in a manner calculated to bring about the greatest economy in expenditure consistent with the efficiency of the service."

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

The PRESIDENT pro tempore. Following the decision of the Chair, from which an appeal was taken by the Senator from New Mexico [Mr. BRATTON], the question is, Shall the decision of the Chair stand as the judgment of the Senate?

Mr. TYDINGS. Mr. President, I have in my hand a short newspaper clipping which I would like to have read at the desk in connection with the pending amendment.

The PRESIDENT pro tempore. Without objection, the clerk will read, as requested.

The Chief Clerk read as follows:

WASHINGTON, January 17 (U. P.).—The following table, said to be conservative by a Treasury expert, shows the taxes for an average person for a full year under existing rates:

Federal taxes

Cigarettes (1 pack daily)	$19.90
Gasoline (20 gallons per week)	10.40
Electricity ($5 per month)	1.84
Long-distance telephone and telegrams	3.50
Safety-deposit box	1.50
Lubricating oil	1.60
Tires and automobile accessories	4.50
Amusements ($3 per week)	9.36
Firearms and matches	1.75
Candy and chewing gum	1.25
Soft drinks	1.60
Jewelry	7.50
Wort, malt sirup, grape concentrates	2.25
Purchases radio, phonograph, or records with value $100	5.00
Cosmetics ($20 purchases)	2.00
Checks (20 per month)	4.50
Total	78.45

State taxes

Real estate	125.00
Gasoline and lubricating oil	31.20
Licenses, automobile, hunting, etc	7.50
Total	103.70

TRIBUTE TO THEODORE F. SHUEY

Mr. VANDENBERG. Mr. President, this is the eighty-eighth birthday of the Chief Reporter of the Senate, Mr. Theodore F. Shuey. I am sure the Senate would not want it to pass without a word to him on its behalf. This amazing man still proceeds upon his busy and efficient way. Never did I know the Gulf Stream of youth to run so warm in the Arctic Circle of the calendar. Mr. Shuey has served six and one-half generations of the Senate. He is a living encyclopedia of American history for nearly three-quarters of a century. I take the liberty of presenting to him the compliments of the Senate upon this auspicious day. [Applause.]

Mr. ROBINSON of Arkansas. Mr. President, let me concur in the sentiments expressed by the Senator from Michigan. In Mr. Shuey we have a splendid example of one who

is always at his post of duty, who is efficient, faithful, and unfailing in the performance of the tasks which he assumes.

Mr. COPELAND. Mr. President, I can not refrain from adding a word regarding Mr. Shuey. The mistake most men make is that they look at the calendar and count the years, imagining that in that way they record the passage of time. As a matter of fact, as I see it, it is because Mr. Shuey has stayed here on the job and has worked that he is so active to-day.

I congratulate him not alone upon his birthday but upon the fact that he has had such great common sense as to continue active past the time when most men think they must retire. Because he will continue to exercise common sense, we look forward in full confidence that a year from now Mr. Shuey will be here to receive our congratulations.

Mr. FESS. Mr. President, I ask unanimous consent that the rules of the Senate may be sufficiently suspended for a moment in order that the Senate and those in the galleries may extend a greeting to Mr. Shuey, and, if Mr. Shuey will stand, that those in the galleries may know who this man is who has been here for this great number of years.

The PRESIDENT pro tempore. Is there objection? The Chair hears none.

Mr. ODDIE. Mr. President, would it not be apropos to state that in his 65 years of service Mr. Shuey has never missed a day?

Mr. FESS. That is very good.

Mr. Shuey rose at the Official Reporters' table amid applause on the floor and in the galleries, the Senators rising.

PROPOSED LIMITATION OF DEBATE ON APPROPRIATION BILLS

Mr. BRATTON obtained the floor.

Mr. LA FOLLETTE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Mexico yield to the Senator from Wisconsin?

Mr. BRATTON. I yield.

Mr. LA FOLLETTE. Will the Senator yield to enable me to propose a unanimous-consent agreement relating to a limitation of debate on appropriation bills?

Mr. BRATTON. I yield for that purpose.

Mr. LA FOLLETTE. I propose the unanimous-consent agreement which I send to the desk.

The PRESIDENT pro tempore. The Senator from Wisconsin proposes a unanimous-consent agreement, which will be read for the information of the Senate.

The Chief Clerk read as follows:

It is ordered by unanimous consent that after any general appropriation bill shall have been considered by the Senate for more than two hours, no Senator shall speak more than once or longer than 20 minutes on said appropriation bill or any amendment thereto, or on points of order and appeals therefrom.

The PRESIDENT pro tempore. Is there objection?

Mr. ROBINSON of Arkansas. Mr. President, I heartily concur in the request of the Senator from Wisconsin.

Mr. HALE. Mr. President, I should like to say that I also heartily concur in the request of the Senator from Wisconsin.

The PRESIDENT pro tempore. Is there objection to the request?

Mr. ROBINSON of Indiana. Mr. President, reserving the right to object, I should like to suggest to the Senator from Wisconsin that some of us are intensely interested in seeing that no injustice shall be done to the veterans of America's wars and their dependents. Since matters affecting them will come up in the course of the discussion of the various appropriation bills, if the proposed agreement provides such a severe limitation as it seems to me it does, having heard the reading, I will be forced to object.

Mr. LA FOLLETTE. Mr. President, will the Senator from New Mexico yield to me?

Mr. BRATTON. I yield further to the Senator from Wisconsin.

Mr. LA FOLLETTE. Mr. President, may I say to the Senator from Indiana that the proposed unanimous-consent agreement would permit two hours of general debate upon each general appropriation bill, and then it would permit any Senator 20 minutes to discuss any amendment offered thereto, and he would also have 20 minutes on the bill. So, in connection with any amendment which the Senator has in mind in relation to particular appropriation bills, he would have 40 minutes in all, and would also have his share of the time provided for general debate, namely, 2 hours.

I will say to the Senator from Indiana that I have modified the original proposal which I suggested yesterday, because I have found, upon consultation with many Senators, that at this stage of the proceedings they are not convinced that it is necessary to provide, for instance, for night sessions or to provide for the consideration of general legislation as distinguished from appropriation bills; but being greatly concerned about the transaction of the business of the Senate, including the consideration not only of appropriation bills but of pressing general legislation of an emergency character, I hope the Senator from Indiana will not object, because I believe that he is likewise interested in much of the other legislation awaiting consideration. Unless we can provide for some limitation of debate upon the appropriation bills, it must be obvious to the Senator from Indiana and to all other Senators that we will not have an opportunity to consider legislation of great importance to the people of the country. I hope, in view of the fact that the Senator from Indiana will have 20 minutes on every amendment proposed, as well as 20 minutes upon the bill, that he will find it possible to agree to the request for unanimous consent.

Mr. ROBINSON of Indiana. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Mexico yield further?

Mr. BRATTON. I yield.

Mr. ROBINSON of Indiana. So far as I am personally concerned, I would far rather remain here every night, until late at night, than to see injustice done to a single disabled veteran of any of our wars and their dependents. I do not think that a proper statement could be made in 20 minutes with reference to some of the propaganda going around over the United States against them at this moment. Therefore, because all of us are concerned with their best interests, I fear I shall be forced to object at this moment. But, Mr. President, I will say to the Senator that I have great sympathy for the object he has in view, and in the measures he is seeking to have enacted into law here he will have considerable support from me.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield?

Mr. ROBINSON of Indiana. I yield.

The PRESIDENT pro tempore. The Senator from New Mexico has the floor.

Mr. ROBINSON of Arkansas. Will the Senator from New Mexico yield to me?

Mr. BRATTON. I yield.

Mr. ROBINSON of Arkansas. May I point out to the Senator from Indiana that legislation affecting the subject to which he has referred would be subject to a point of order on a general appropriation bill, and that if the Senator should choose to avail himself of the right to make the point of order he could do that. I hope the Senator will not object to this request. We have only a few more days of the present session remaining, and we ought to make sure that the appropriation bills shall be considered. As stated by the Senator from Wisconsin, I feel that the limitation provided in the request is adequate for all reasonable purposes. I thank the Senator from New Mexico for yielding.

Mr. ROBINSON of Indiana. Mr. President, I apologize to the Senator from New Mexico for taking so much of his time.

The PRESIDENT pro tempore. Does the Senator from New Mexico yield further to the Senator from Indiana?

Mr. BRATTON. I yield.

Mr. ROBINSON of Indiana. I have only this further suggestion, that we have in this very bill we are now discussing matters of gravest importance to totally disabled veterans who are receiving a thousand dollars or more. In my absence, a unanimous-consent agreement was entered into—I am not complaining about that, Mr. President; I should have been on the floor, doubtless—but, at any rate, a unani-

mous-consent agreement was entered into which limits debate on that question to 15 minutes, and I submit that possibly the true state of affairs might not be made known to the Senate in 15 minutes. Therefore I ask that this matter go over until to-morrow.

The PRESIDENT pro tempore. Objection is made.

Mr. NORRIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Mexico yield to the Senator from Nebraska?

Mr. BRATTON. I yield.

Mr. NORRIS. I should like to say to the Senator from Indiana that I am in entire sympathy with what he has said about the particular amendment to which he has referred, but I should like to call his attention to the fact that the limitation has already been applied to this bill; the limitation has already been applied to the particular amendment which he has in mind and to all other amendments to this bill.

I do not believe that limitation ought to have been applied to the particular amendment to which the Senator has referred, but it has been done. The request now made has application therefore only to subsequent appropriation bills; and as to all subsequent appropriation bills, as I understand the parliamentary situation confronting the Senate, the suggestion made by the Senator from Arkansas applies, namely, that on all subsequent appropriation bills an amendment such as the Senator suggests would be subject to a point of order. So that the Senator will lose nothing by agreeing to the request for unanimous consent, as I look at it, and his rights will be fully protected, because if attached to any other appropriation bill the amendment he has in mind would be subject to a point of order, and therefore he would not be prejudiced by agreeing to the unanimous-consent request.

Mr. ROBINSON of Indiana. I suggest that the Senator from Wisconsin permit me an opportunity to look further into it and let it go over until to-morrow.

The PRESIDENT pro tempore. The Chair understands the Senator from Indiana to insist upon his objection.

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

The PRESIDENT pro tempore. The question is, Shall the decision of the Chair stand as the judgment of the Senate?

Mr. ODDIE. Mr. President, will the Senator from New Mexico yield?

The PRESIDENT pro tempore. Does the Senator from New Mexico yield to the Senator from Nevada?

Mr. BRATTON. I yield.

Mr. ODDIE. I hope that this bill may be completed before evening. If it shall become evident that there is undue delay, I shall ask for a night session; but I hope that the consideration of the bill may be expedited so that we may finish it to-day.

Mr. BRATTON. Mr. President, I wish to say that I shall cooperate with the distinguished Senator from Nevada in having the consideration of the bill concluded.

On yesterday the distinguished occupant of the chair sustained a point of order made by the junior Senator from Wisconsin [Mr. BLAINE] to the two amendments proposed by me and considered together.

Mr. President, it is my desire to withdraw that appeal and to perfect the amendments separately, in an effort to meet the point of order lodged against them; and, with that statement in advance of my desire, I now withdraw the appeal.

The PRESIDENT pro tempore. The Senator from New Mexico withdraws his appeal from the ruling of the Chair, and, under his right, desires to modify the amendment.

Mr. BRATTON. Now, Mr. President, I modify each amendment by inserting therein, preceding the first word, this language:

Provided, however, That—

Then, in line 1 of each amendment, I propose to strike out the words "and directed," so that the first amendment will read:

Provided, however, That the Secretary of the Treasury is authorized to make such reductions in the expenditures from the appropriations made in this act—

And so on.

The other amendment would read:

Provided, however, That the Postmaster General is authorized to make such reductions in the expenditures from the appropriations made in this act—

And so forth.

Now, Mr. President, having perfected the amendments in that way, I think they are in order and meet the point of order lodged by the junior Senator from Wisconsin. I do not care to take the time of the Senate debating them further. I discussed them at length yesterday. They merely authorize the Postmaster General, in the one instance, and the Secretary of the Treasury, in the other, to curtail expenditures under the bill by a sum equal to 5 per cent of the appropriations made for the several purposes.

As stated yesterday, we in the Congress are not familiar with the detailed set-up of any department. Obviously, a conscientious head of a department, with the aid of his chiefs and his assistants, can do a better job of that kind than can we. This remits the matter to the head of the department to scale down the total appropriation by a sum equal to 5 per cent.

I said yesterday—and I use the illustration again—that it is closely akin to a situation where the board of directors say to the manager of an industry, "These expenditures must be reduced; you know better how to accomplish that than we do; we direct you to scale them down 5 per cent."

Mr. COUZENS. Mr. President——

Mr. REED. Mr. President, will the Senator yield for a question?

The PRESIDENT pro tempore. Does the Senator from New Mexico yield; and if so, to whom?

Mr. BRATTON. The Senator from Michigan rose first, and I yield to him; then I will yield to the Senator from Pennsylvania.

Mr. COUZENS. May I ask the Senator if, under that changed language, the Postmaster General or the Secretary of the Treasury could cut a salary which Congress had fixed?

Mr. BRATTON. That is doubtful. I said yesterday that perhaps some salary reductions would be effected; that is doubtful; but I say to the Senator, in all earnestness and all seriousness, that I think a 5 per cent reduction could be effected in any department without cutting salaries. There is enough duplication, there is enough overlapping, there is enough waste to scale down the appropriations 5 per cent without cutting salaries. That is my judgment. Of course, I am not in a position to give any guaranty along the line suggested by the Senator and would not do so.

Mr. COUZENS. I have great sympathy with the object the Senator from New Mexico has in mind, but I shall protest to the utmost of my ability against giving any of the department heads the right to change salaries fixed by law. If we are going to allow them to change and determine the salaries of employees, let us do it openly here and not by any question of doubt to leave it to administrative officers to change salaries that we fix.

I think, with the Senator from New Mexico, that it is possible to bring about reductions by eliminating waste, even by eliminating departments, if necessary, but not by cutting salaries of those who are retained on the pay roll; and unless the Senator can give us some assurance that this amendment will not do that, I am going to protest to the limit against the giving any administrative officer the right to do it.

Mr. BRATTON. Of course, Mr. President, I give him my candid judgment about it. The head of the department could dismiss employees; he probably could curtail services

in doing away with overlapping and waste. It is possible that he could impose additional administrative furloughs under the general provisions in the economy act. It doubtless will be administered in that way; but certainly I shall not assume to give the Senator from Michigan any guaranty. I would not assume to do that.

Mr. COUZENS. Mr. President, will the Senator yield further?

Mr. BRATTON. Yes.

Mr. COUZENS. Could not the Senator incorporate in this amendment of his, or this suggestion of his, a provision that the administrative officers charged with this responsibility shall not cut any salaries fixed by Congress?

Mr. BRATTON. I do not think that should be appended here. We are confronted again with what we discussed here yesterday—that every time we undertake to economize we can not agree on it. That is the very reason why we have not economized, and it is the very reason why we will not do so unless we remit the matter to the Chief Executive. I realize that we can not economize much. We have not done it; and the Senator from Michigan is just as earnestly anxious to do that as I am.

Mr. COUZENS. Mr. President, will the Senator yield further?

Mr. BRATTON. Yes.

Mr. COUZENS. The Senator does not want to stand here and urge that we economize by further cutting salaries and yet not want to put the Senate on record as to what they want to do on the salary question.

Mr. BRATTON. I insist, Mr. President, that we must cut these expenditures. We must carry out our promise to reduce these expenditures; and every time we undertake it, we fall back under a suggestion that somebody is going to lose something.

Mr. REED. Mr. President——

Mr. BRATTON. I yield to the Senator from Pennsylvania.

Mr. REED. As I heard the Senator read the modified language of his amendment, it seemed to give authority to these Cabinet officers to make this reduction but did not require that that be done. Is that correct?

Mr. BRATTON. That is correct. As offered yesterday, each amendment provided that the department was authorized and directed to make these reductions. A point of order was lodged against the amendments on the ground that the direction constituted legislation, and the point of order was sustained. Now, in an effort to meet the point of order, I have eliminated the words "and directed."

Mr. REED. Now will the Senator give us his understanding of the effect of this proposal?

What I have in mind is this: There are certain expenses in the Post Office Department, for example, that are incapable of change. I think of the leases of post-office buildings, for example, where the Government has a contract for a fixed term of years at a fixed rent. The Postmaster General can not abrogate that contract. I think of the contracts for the carriage of mail by the railroads. Those are fixed contracts at fixed rates which the Postmaster General has no power to abrogate. When we analyze the situation further, we find that a 5 per cent cut on the whole spending comes down to a 10 or 15 per cent cut on personnel, on the wages and salaries paid to the human beings who carry on the work.

Does the Senator think it is fair to include a percentage on these irreducible items, and make the few reducible items carry the whole burden?

Mr. BRATTON. Mr. President, we can not economize otherwise. We are not going to economize unless we begin to cut. Of course, we can not cut the items which the Senator calls irreducible items.

Mr. REED. That is right.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield?

Mr. BRATTON. I yield to the Senator from Arkansas.

Mr. ROBINSON of Arkansas. As I came into the Senate this morning there was handed to me a memorandum from parties who are opposed to the amendment. It shows that the percentage of reduction necessary to effect a 5 per cent saving on the entire appropriation, after eliminating fixed charges upon which no saving can be effected, is 7.41 per cent, instead of 10 or 15 per cent, as stated by the Senator.

Mr. HASTINGS, Mr. ODDIE, and Mr. ROBINSON of Indiana addressed the Chair.

The PRESIDENT pro tempore. To whom does the Senator yield?

Mr. BRATTON. I have just a few words more, and then I shall surrender the floor.

Mr. HASTINGS. I desire, if the Senator will permit me, to ask him a question before he concludes.

Mr. BRATTON. Yes; I yield for that purpose.

Mr. HASTINGS. These two amendments, as the Senator from New Mexico has perfected them, provide as follows:

> *Provided, however,* That the Secretary of the Treasury is authorized to make such reductions in the expenditures * * * as will in the aggregate equal at least 5 per cent.

I want to inquire whether there is in the present law, without adopting this amendment, anything to prevent the Postmaster General and the Secretary of the Treasury from reducing the expenditures 10 per cent if it is possible, under the situation as he finds it, to do so.

Mr. BRATTON. I think not.

Mr. HASTINGS. There is no legal objection to that course, is there?

Mr. BRATTON. I think not.

Mr. HASTINGS. Then, if that be true, may I inquire whether this amendment, if adopted, will have any possible effect upon either of those departments?

Mr. BRATTON. I have not the slightest doubt that the Secretary of the Treasury in the one case and the Postmaster General in the other would regard this as a solemn mandate from the Congress and would so administer it, and so it would be effective.

Mr. HASTINGS. Then, may I make this further suggestion: If that be true, would they not feel, in view of this amendment that we are asked to adopt, that they would be limited to 5 per cent, and might they not say, "Except for the amendment offered by the Senator from New Mexico, we think we might increase this to 10 per cent"? For that reason, if the amendment has any effect at all, is there any objection to putting in there, instead of 5 per cent, 10 per cent, with the hope that they may do as much as that?

Mr. BRATTON. Mr. President, does the Senator mean to suggest seriously that he thinks these appropriations should be cut 10 per cent in each instance?

Mr. HASTINGS. I am not saying that at all——

The PRESIDENT pro tempore. The time of the Senator from New Mexico has expired.

Mr. ROBINSON of Indiana obtained the floor.

Mr. HASTINGS. Mr. President, will the Senator from Indiana yield to me for just a moment?

Mr. ROBINSON of Indiana. Yes; I yield to the Senator if he will bear in mind that I have only 15 minutes.

Mr. HASTINGS. I shall be only a moment.

The Senator from New Mexico inquired whether I seriously thought that these appropriations might be reduced 10 per cent. I only know, of course, what the committee has done; and I usually take the committee's recommendations with respect to such matters. I only point out that there is a possibility here, if this amendment is adopted, of making the department believe that it is limited by this amendment to 5 per cent, when, as I understood the Senator from Arkansas to say a moment ago, it had been suggested to him that it might be 7 and a fraction per cent.

Mr. BRATTON. Mr. President, the Senator will observe that the language is "at least 5 per cent."

Mr. HASTINGS. "At least 5 per cent?"

Mr. BRATTON. Yes.

Mr. BARKLEY. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. The Senator from Indiana [Mr. ROBINSON] has the floor.

Mr. ROBINSON of Indiana. I must decline to yield, Mr. President, because I have only a few minutes. If I have any time remaining when I conclude making this brief statement, I shall be happy to yield to the Senator.

The PRESIDENT pro tempore. The Senator declines to yield.

ACTIVITIES OF WILLIAM C. BULLITT RELATIVE TO FOREIGN DEBTS

Mr. ROBINSON of Indiana. Mr. President, I am deeply concerned again to-day, as I suppose every Member of the Senate is concerned, over a Universal Service special cable with a Berlin date line under the heading:

Bullitt visits Berlin, Vienna.

Then I read, Mr. President:

BERLIN, February 1.—William C. Bullitt, America's self-described secret emissary, paid calls in German official quarters here Monday and then left for Vienna, it was learned to-day.

Covering his tracks under an assumed name, Bullitt came from London and Paris, where he talked with Prime Minister MacDonald and French Premier Paul-Boncour.

In Berlin he called on Foreign Minister Von Neurath and the chief of the American division in the German foreign office.

London and Paris dispatches state Bullitt described himself in those capitals as the representative of President-elect Roosevelt, despite Roosevelt's denial that Bullitt or anyone else was representing him.

Bullitt registered in Berlin under another name and asked that his presence be kept secret. He expressed himself bitterly over what he termed the London "indiscretions" which exposed his mission.

Mr. President, a story like that is naturally disconcerting to the American people. Who is this man Bullitt, and what is he doing in Europe, and whom does he represent?

Mr. Bullitt says he represents the President elect of the United States. The President elect, I think, has not categorically denied that statement, but he has categorically stated that Mr. Bullitt does not represent him on the debt question. Yet, Mr. President, that seems to be the principal subject of conversation so far as Mr. Bullitt's conferences in London are concerned and so far as his interview in Paris with Paul-Boncour is concerned. Accordingly, it seems to me it is high time for the American Government to ascertain who he is and what he is doing over there. He is unquestionably making the American Government a laughing stock. He goes around in disguise—or, if not in disguise, certainly under an assumed name—and apparently assumes to be some one he is not.

The President elect says Mr. Bullitt does not represent him. I take it, of course, he does not represent the present administration. Does he represent the house of Morgan? Does he represent the international bankers? Whom does he represent? That is the important thing. He has even gone so far over there as to suggest that the President elect favors an 80 per cent cut in the debt due from Great Britain to this country.

Here is another interesting statement, published with a Paris date line:

January 27.—Premier Paul-Boncour to-night reluctantly admitted he has discussed the Franco-American war-debt situation with William C. Bullitt, America's self-described secret emissary.

He declined to discuss the report that Bullitt had left him confidently expecting—

Mark this—

He declined to discuss the report that Bullitt had left him confidently expecting a Washington invitation within 15 days to join in debt negotiations.

Mr. President, Bullitt evidently made that statement. He may have had no authority whatever to make it. I assume he did not have. Under those circumstances he should be apprehended, it seems to me, immediately and brought to justice. I think the Logan Act is broad enough to cover indiscretions of this kind. I will read it to refresh the memory of Senators who probably have not had occasion to examine it for some time. It is section 5 of the Criminal Code:

Every citizen of the United States, whether actually resident or abiding within the same, or in any place subject to the jurisdiction thereof, or in any foreign country [who], without the permission or authority of the Government, directly or indirectly, commences or carries on any verbal or written correspondence or intercourse with any foreign government or any officer or agent thereof, with an intent to influence the measures or conduct of any foreign government or of any officer or agent thereof, in relation to any disputes or controversies with the United States, or to defeat the measures of the Government of the United States; and every person, being a citizen of or resident within the United States or in any place subject to the jurisdiction thereof, and not duly authorized [who], counsels, advises, or assists in any such correspondence with such intent, shall be fined not more than $5,000 and imprisoned not more than three years; but nothing in this section shall be construed to abridge the right of a citizen to apply, himself or his agent, to any foreign government or the agents thereof for redress of any injury which he may have sustained from such government or any of its agents or subjects.

Mr. President, this man is evidently interfering with this Government's official relations with governments in Europe, and he seems to have no credentials. He is not representing the American Government; he seems not to be representing the President elect. He certainly is not representing the Senate of the United States and the House of Representatives, both of which have gone on record in a joint resolution to the effect that there would be no reduction and no cancellation of any of the foreign debts. So, unless this man is representing private interests to the detriment of the American people, he can be representing nobody. Hence it seems to me that his activities come directly under the Logan Act, and I think the State Department should immediately apprehend him.

This man is flitting around over Europe, from one capital to another, deliberately working against this country's best interests, and in utter defiance of the American Congress. He is preaching the doctrine of reduction of the war debts, indeed, their cancellation, and he is holding conferences with the most important public officials in Europe. He claims to be representing the President elect of the United States, and he goes around under an assumed name, and, so far as I know, in disguise. He is an undercover man. Of course, he brings the United States Government into disrepute all over the earth, and I submit that it is high time he were apprehended and brought to justice, under the Logan Act, which is broad enough to cover the case.

If this man is acting officially, or semiofficially, or for any department of our Government, or for any incoming Government, then the whole situation is disgraceful in the extreme, and we have departed a long way from the principle of "open covenants openly arrived at."

Mr. President, I submit that this matter should be brought to the attention of the State Department, and if it is not done otherwise I shall not hesitate myself to write to that department urging that immediate steps be taken to investigate this man's activities and see that he is properly indicted for any offense with which he may be chargeable.

Mr. LOGAN. Mr. President, since the junior Senator from Indiana seems to be very much concerned about some fellow going about Europe talking too much, and refers to the Logan law, which was the result of one of my distinguished kinsman's getting himself into trouble by prowling around Europe talking too much, it seems to me some one should send this man, about whom the Senator complains, a cablegram and tell him to stop talking. Also, I suggest that some of my friends close enough to the President elect to advise with him send him a telegram and tell him to stop considering the war debts, because it is worrying the distinguished junior Senator from Indiana until he is not able to discharge his duties in the United States Senate. I think that ought to be done.

Mr. BARKLEY. Mr. President, will my colleague yield to me?

Mr. LOGAN. I yield.

Mr. BARKLEY. Might not an appropriate reply from both Mr. Bullitt and the President elect be that some of us should stop?

Mr. LOGAN. I think there could be such a reply, and that it would be absolutely pertinent to the things which go on here in the Senate. But I am only trying to protect the junior Senator from Indiana. I have observed him from day to day worrying himself so terribly about these war debts, which I know very little about, and will never know very much about, because no one else does; consequently, I simply

want to quiet the mind of the Senator from Indiana, so that he will allow us to rest on the question, and so that he will get a little rest himself. What I have suggested would be a good thing. I think some of my colleagues ought to send a telegram to the President elect and suggest that he quit considering those things.

Mr. ROBINSON of Arkansas. Mr. President, the statement has been made by the President elect, Mr. Roosevelt, that the gentleman referred to by the junior Senator from Indiana has no authority to represent him, and I think that statement should be accepted without question. Having made some inquiry into the subject, I am convinced that the declaration is accurate.

There are a great many men in this world who adopt the policy of popularizing themselves and giving notoriety to themselves by assuming authority which in fact they do not possess and by making representations which they are not authorized to make. I know, if I may be permitted to express myself with that degree of emphasis, that there is not and there never was the slightest foundation for the declaration that the President elect stated that he favored a reduction of 80 per cent in the war debts. I can not ask the Senator from Indiana to accept my statement about the matter, but I repeat, I know that there is not one word of truth in the statement as to the attitude of the President elect.

The Senator from Indiana asks a question in which I myself was somewhat interested. He wanted to know, Who is W. C. Bullitt? That this man Bullitt has no official status is apparent, is admitted. The press reports him to have represented himself as a secret emissary going about Europe talking with the heads of the governments. He has been repudiated in every way that he can be repudiated by those for whom he assumes to speak.

In view of that situation of the matter, Mr. President, I wonder whether I may inject into the discussion a story which was told by the late Senator from Texas, Mr. Joseph W. Bailey, as applicable to himself. Senator Bailey was engaged in a campaign in the State of Texas, and to a great audience he was introduced by an enthusiastic supporter, an eloquent orator, who began his address by saying, "Who is Joseph W. Bailey?" Then he consumed some five minutes in lauding the experiences of the Senator in his childhood. He repeated the question, "Who is Joseph W. Bailey?" and took five minutes more in discussing the experiences of the Senator during his early manhood. A third time he repeated the question, "Who is Joseph W. Bailey?" and was approaching his climax when an old gentleman in the rear of the audience rose and said, "I'll bite. Who in the hell is Joseph W. Bailey?" [Laughter.]

Mr. President, I make the same retort to the question of my friend the Senator from Indiana, Who is W. C. Bullitt?

Mr. GLENN. Mr. President, will the Senator yield?

Mr. ROBINSON of Arkansas. I yield.

Mr. GLENN. I do not suppose he could be Colonel House in disguise, could he? [Laughter.]

Mr. ROBINSON of Arkansas. If so, the Senator will please excuse me and President-elect Roosevelt for any responsibility for Colonel House. [Laughter.]

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the senior Senator from New Mexico [Mr. BRATTON], as modified.

Mr. ODDIE. Mr. President, I have in my hand the statement which has been referred to this morning, containing some very interesting figures, which show, to my mind, the injustice and harm that would be done if the amendment of the Senator from New Mexico were adopted. I am very bitterly opposed to the amendment in its present form. I feel that it would cause a further reduction in the salaries and wages paid to Federal employees, which is out of all reason and which would be very damaging in many ways.

The statement is as follows:

FIXED CHARGES EITHER BY LAW OR CONTRACT

Transportation and delivery of equipment by freight, express, or motor	$350,000
Payment of rewards	45,000
Compensation to postmasters and allowances for rent, light, and equipment to postmasters of the fourth class	46,000,000
Compensation to assistant postmasters, first and second class post offices	6,200,000
Fees to special-delivery messengers	7,450,000
Car-fare and bicycle allowance	1,250,000
Inland transportation by star routes	14,000,000
Inland transportation by steamboats	1,350,000
Inland transportation by railroad routes and for mail-messenger service	100,000,000
Transportation of foreign mails by steamship and aircraft	35,500,000
Balance due foreign countries	1,000,000
Manufacture of postage stamps, etc	4,900,000
Rent, fuel, light, and water for first, second, and third class post offices	16,000,000
Pneumatic-tube service, New York, Brooklyn, and Boston	548,000
Total fixed charges	233,343,000

PERSONNEL SERVICE (SALARIES) POST OFFICE DEPARTMENT

Office of Postmaster General	$214,463
Office of First Assistant Postmaster General	471,000
Office of Second Assistant Postmaster General	394,275
Office of Third Assistant Postmaster General	725,532
Office of Fourth Assistant Postmaster General	328,638
Office of Solicitor of Post Office Department	68,750
Office of chief inspector	188,045
Bureau of Accounts, Post Office Department	87,083
Total	2,477,786

PERSONNEL SERVICE (SALARIES) FIELD

Inspection service	1,878,750
Clerks at inspection division headquarters	300,700
Clerks and employees at first and second class post offices	161,000,000
Clerks in charge of contract stations	1,800,000
Allowances to third-class offices for clerical hire	8,000,000
Village Delivery Service	1,400,000
Detroit River service	15,995
Letter carriers, City Delivery Service	113,000,000
Rural Delivery Service	95,000,000
Railway Mail Service, clerks	51,000,000
Total	433,395,195

TOTAL SALARIES, POST OFFICE DEPARTMENT AND FIELD SERVICE

Post Office Department	$2,477,786
Field service	433,395,195
Total	435,872,981

RECAPITULATION

Total appropriation	717,033,378
Fixed charges by law or contract (from which no deduction can be made)	233,343,000
Amount on which reduction can be made	483,690,378
Amount of appropriation necessary for salaries	435,872,981
Amount of appropriation, less salaries, on which deductions can be made	47,817,397
5 per cent saving on the entire appropriation	35,851,666

Per cent of reduction necessary to effect a 5 per cent saving on the entire appropriation after eliminating fixed charges upon which no saving can be effected, 7.41 per cent.

Mr. President, I hope the amendment of the senior Senator from New Mexico in its present form will be defeated.

Mr. SMOOT. Mr. President, I want to invite the attention of the Senator from New Mexico [Mr. BRATTON] to the fact that if his amendment applies only to expenses of the department and does not apply to salaries, he will get mighty little in the way of a saving. Let me refer, for instance, to the Department of Labor. The total amount of the appropriations for the Department of Labor is $734,865. Of that amount, $660,225 is for labor or personal services. In other words, for all of the expenses aside from labor and personal services for the department there is appropriated only about $37,000, and all the saving that will be effected under the Senator's amendment will be 5 per cent of $37,000.

Mr. DILL. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Washington?

Mr. SMOOT. I yield.

Mr. DILL. Does not the Senator think that in that department, as in many other departments, there is a large number of unnecessary employees we can get along without during these times when the business of the Government is not so pressing as it ordinarily is?

Mr. SMOOT. Yes; but this is not supposed to be a 5 per cent reduction of salaries.

Mr. DILL. But it does not say so. It says reduction in the amount of money. If we restrict it to employees' salaries, it does not reduce the total amount spent.

Mr. SMOOT. I wish the Senator had been present at the hearings before the Appropriations Committee and heard the heads of departments ask for these appropriations. Nearly all of them are pleading either for an increase in the number of employees or for some particular employee, trying to prevent the lowering of the salary which they think ought to be drawn.

I am not complaining at all of the Senator's proposal for a decrease in expenditures. That is not what I have in mind. But if the amendment is limited to 5 per cent of the salaries of the Government employees, then, of course, there will be very little saving in the general expenses of the Government. I think that is where there ought to be a saving and that there ought to be an elimination of labor to as limited an extent as possible. That is the situation to which I wanted to invite the Senator's attention.

Mr. FESS. Mr. President, I am in entire sympathy with the effort that is being made to reduce expenses. It is going to be a very difficult thing to accomplish, no matter what form the reduction may take. I have held for a long while, ever since there was an effort made under President Harding to reorganize the executive departments, that we are not going to be able to effect any substantial reductions without giving the President authority in that behalf. During the last three years I have urged the giving of that authority to the present President. I am going to continue that policy and shall vote to give such authority to the President elect.

I see some difficulty in the effectiveness of the amendment offered by the Senator from New Mexico. It has some elements in it which I deplore. I believe that if the Senator is proceeding on the theory that we will get a 5 per cent reduction in expenditures and not touch the salaries of Government employees, he is bound to be sorely disappointed in that respect.

Mr. BRATTON. Mr. President, will the Senator yield?

Mr. FESS. Will the Senator permit me to conclude my statement? I am compelled to leave the Senate in a very short time to attend a funeral, and I wish to complete my statement before I go.

Mr. President, I think the Senator's amendment will involve a cut in salaries. I am not sure that we must not do that in any event. On the other hand, I am rather inclined to think we will have to do it, if we make any substantial saving. I would much prefer having it done here than to have the head of a department do it. I think that would not be a very wise course to pursue.

There is another element in the proposal that I think is subject to severe criticism, and that is that we might make no cut in certain units and might make a large cut in another unit, or the cut might all be put on one unit, which would subject the amendment to a substantial criticism.

However, I realize that our deficit is growing. We must balance the Budget. I think no one questions the necessity for doing that from every standpoint. It can only be done by cutting expenses, on the one hand, and then adding whatever additional taxes may be necessary. We must proceed along that line, if we balance the Budget in some way that will be legitimate. While I am opposed to this particular method because of certain elements which it includes, it seems to me it is probably the best thing that has been proposed.

While I can not speak for others on this side of the Chamber, I do think it is unwise for the Republicans in these closing weeks of the administration to do anything that would look as if we were handicapping the administration that is coming into office. If it might not have been misconstrued, I as a Republican—and I would have hoped that other Republicans would join me—would have been in favor of leaving all of the appropriation bills to the next administration, so that they would be wholly unhandicapped in what they propose to undertake to do, and that we should give them full authority to proceed as they see fit in doing the things they have promised the people they will do.

Speaking for myself, I am going to vote for the amendment. I am sorry I have to break with the Senator from Nevada [Mr. ODDIE] in charge of the bill. He thinks the amendment ought not to be adopted, but I am going to vote for it. More than that, I am going to vote for every legitimate cut that does not violate a contract. I shall not vote to repudiate a contract which the Government has solemnly made, but I am going to vote for any substantial cut and pass it over to the party that is coming into power and let it be unhandicapped by what we do here. In that way, if we do get the reduction, no one will be harmed, but everybody will be benefited except the people who are cut in their remuneration.

I want to announce again that when we talk about cutting Government expenses and then announce in the next breath that we are not going to cut salaries, it is a perfectly inconsistent thing to say. We are going to cut salaries, and I am in favor of making it as equitable as it is possible to do. When I vote for the 5 per cent reduction, giving authority to the Secretary of the Treasury and the heads of the other departments, I realize the difficulty of putting it into operation, but I do not want anybody to be fooled into believing that we are doing this and promising the people that we are not going to hurt them.

Mr. COSTIGAN. Mr. President, I send to the desk and ask to have stated an amendment which I propose to the amendment of the Senator from New Mexico.

The VICE PRESIDENT. Let it be reported for the information of the Senate.

The LEGISLATIVE CLERK. The Senator from Colorado proposes the following amendment to the amendment of the Senator from New Mexico:

Add at the end of each of the amendments of the Senator from New Mexico the following:

"*Provided further*, That in making such reductions in expenditures no wage cuts or furloughs other than those heretofore in effect shall be ordered."

Mr. COSTIGAN. Mr. President, the Senator from Michigan [Mr. COUZENS] in my judgment has stated the correct rule with respect to this type of legislation, namely, that if wage cuts are to be made, they should be determined by Congress and not left to the discretion of departmental heads. The amendment of the Senator from New Mexico [Mr. BRATTON] is not limited to a 5 per cent cut applicable to wages which may be achieved directly or through the ordering of furloughs. The Senator's amendment provides in substance that a 5 per cent cut "at least" shall be authorized. If I correctly interpret that language, wage cuts may be extended the full limit of 100 per cent and indefinite furloughs will be in order. Congress will have surrendered control over the wage situation if the Senator's amendment is adopted in the form in which it was offered.

Our Federal Government can ill afford, least of all in this tragic era of nation-wide unemployment and deplorable wage and living standards, to set an example of this sort with respect to its employees. Whatever precedent it establishes will be regarded as justifying similar reductions in industrial wages in all parts of the United States.

Reference is in order to unfortunate effects of the 10 per cent cut ordered last year by the Congress. It had the merit over the proposal of the Senator from New Mexico [Mr. BRATTON] of not being a cut of "at least" 10 per cent. It was a cut limited to that precise figure. I had occasion recently to ask certain heads of departments how that cut

had operated with respect both to the 10 per cent reduction in wages and to furloughs. I invite the attention of Senators to one or two replies which tend to show how far-reaching and unexpected legislation of this general character may prove, however well intentioned.

The Secretary of the Interior, answering my inquiry on December 15, 1932, with respect to administrative furloughs, made this, among other observations:

So far we have furloughed 126 employees, 27 for periods from two to six months and the remainder for an indefinite period. A few of those furloughed indefinitely have been returned to duty.

The Secretary of Commerce, speaking through his administrative assistant on December 16, replied in part:

When the reductions were made in our 1933 fund, under the 10 per cent in the aggregate program of the Senate last spring, the reductions in certain items were so severe that notwithstanding many economies introduced and the curtailment of services, extensive administrative furloughs will have to be taken. For instance, in the Secretary's office, the Bureau of Standards, the Bureau of Foreign and Domestic Commerce, and the Steamboat Inspection Service, about 40 days' leave without pay will have to be taken in addition to the 30 days' legislative furlough unless some relief is obtained.

These replies are cited merely as illustrations of consequences which may be expected if the thoroughly disorganizing provision in the amendment of the Senator from New Mexico with respect to a 5 per cent reduction "at least" shall be adopted by the Senate.

I strongly join the Senator from Nevada [Mr. ODDIE], the Senator from Michigan [Mr. COUZENS], the Senator from Utah, and other Senators here in their protests against that method of legislating with respect to the lives and the welfare of innumerable workers, many of whom, as all of us know, have given years of devoted, faithful, and efficient service to the Government of the United States.

Mr. COSTIGAN subsequently said: Mr. President, the remarks of the able junior Senator from New Mexico [Mr. CUTTING] and the article placed in the RECORD by the gifted Senator from West Virginia [Mr. NEELY] lead me to ask to have incorporated at the conclusion of my earlier remarks certain extracts from an article dated January 16, 1933, on balancing the Budget, prepared, it is reported, by leading professors and their associates of the University of Chicago.

The VICE PRESIDENT. Is there objection?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

BALANCING THE BUDGET—FEDERAL BUDGETARY POLICY DURING A DEPRESSION

Few problems confronting the American public transcend in importance that of Federal financial policy. There appears to be grave danger that in balancing its Budget the Federal Government may adopt policies the inevitable consequence of which will be the retardation of business recovery and the impairment of the social usefulness of Government. These evil consequences can be avoided.

* * * * * * *

In one important respect there is a vital difference between the fiscal operations of the national and those of other political units. For the Federal Government has control over the monetary system of the country, and its fiscal policies can and should be controlled with reference to the monetary and credit situation of the Nation. The activities of the National Government are of greater importance in reference to the swings of the business cycle than are those of State and local governments.

* * * * * * *

"Balancing the Budget" should be used to mean the attempt to secure sufficient revenue to defray the expenditures of Government. That portion of the Budget not covered by revenues may be considered as unbalanced. Funds to meet the fiscal requirements of the unbalanced portion can be secured (1) by short-term borrowings, (2) by long-term funding, or (3) by issuance of fiat money. Given an expenditure program, the question Congress faces is: How much of the needed revenues should be obtained by taxation and how much by borrowing?

This question can be answered only after the expenditure program of the Federal Government is carefully analyzed.

* * * * * * *

Those expenditures which should be financed from current revenues can best be seen by the listing of items which need not be so financed. Among the types of expenditure which in this emergency should not be financed from current taxation are the following:

1. Nonrecurrent emergency expenditures.
2. Loans and investments.
3. Expenditures for public works.
4. Permanent appropriations not to be spent during the current fiscal year.
5. Public-debt retirements.

With the foregoing items excluded, the aim of the Treasury for the fiscal year 1934 should be to finance only normal operating expenses from current revenues. Relief, investments, loans, and public works should be financed from borrowings; and the Federal debt during the next fiscal year should be increased by a sum not less than the amounts so expended.

* * * * * * *

NONRECURRENT EMERGENCY EXPENDITURES

The public should not be called upon at this time to furnish funds by taxation to finance nonrecurrent emergency expenditures. The burden of normal taxation has already been made severe by the shrunken incomes and losses of the depression, to which have been added the weight of emergency taxes enacted by the last Congress. It is not desirable that relief from unforeseen disasters or floods, for example, should under existing circumstances be provided by current taxation.

PUBLIC WORKS EXPENDITURES

Outlays for public works undertaken to stimulate employment are essentially capital investments which in this emergency should be financed by loans. These outlays are made to acquire permanent improvements, the life of which will extend over many budgetary periods. If sound practices of private businesses were followed, sums expended for such purposes might properly be distributed over the period of the useful life of the property, the original outlay being financed by the issuance of bonds.

* * * * * * *

SHOULD THE BUDGET BE BALANCED ANNUALLY?

It is by no means axiomatic that the Federal Government should annually collect revenues sufficient to cover even its ordinary operating expenses. This, of course, should be an aim of the Treasury; but if this policy involves too great hardship from the imposition of burdensome taxes, the Government is justified in borrowing for a few years in order to meet deficits from current operations. As the Secretary of the Treasury said in his annual report presented to Congress December 8, 1932:

"In a period of deep depression, with the income of the people greatly reduced, with their buying power drastically curtailed, and with millions deprived of their earning capacity, it is not only unwise but impossible to bridge the gap in the Budget entirely by increased taxation.

* * * * * * *

The reduction of expenditures should not be confused with the curtailment of activities. It may be doubted whether citizens desire the curtailment of Government functions; they have, rather, for the most part, insisted upon their extension. The demand for economy properly considered is a demand for the reduction of unit costs rather than a demand for the curtailment of necessary and beneficial public services.

SALARY REDUCTIONS

Salaries should not be further cut unless steps are taken at the same time to accomplish all the other possible economies in the public service. Personnel surveys should be made, and their findings should be used immediately as a basis for the separation from pay rolls of superfluous and inefficient employees and for any cuts are employed, the service is not purged of the incompetents nor in wages which may be decided upon. Where horizontal cuts alone of political "hangers-on." The "horizontal" method of retrenchment is an easy means for meeting the demand for economy and only slightly reduces the cost of political patronage. In retrenchment the principle to be followed is to reduce expenditures and curtail operations where they will do the least social damage. No discrimination as to consequences is possible when horizontal or uniform percentage reductions are followed.

For those employees who are discharged from the Federal service adequate unemployment relief or employment in emergency services should be provided. These adjustments in personnel should be a phase of the reorganization of Federal administrative departments now being considered by Congress.

POSTPONEMENT OF EXPENDITURES

Modest reductions in expenditures may be achieved by the postponement or complete elimination of certain projects included in the Budget. For example, the surplus of agricultural land now under cultivation justifies the curtailment and postponement of expenditures for land reclamation and irrigation, save perhaps to the extent of salvaging capital already sunk in such projects. Substantial economies can be realized from the postponement of naval construction. The 1934 Budget estimates for vessel construction are about $21,000,000 in excess of appropriations for 1933. The modernization of battleships also calls for the expenditure of $9,450,000. The total amount available for naval construction during 1934 is estimated by the President at $53,380,000. Further reduction in expenditures may be achieved by postponing the acquisition of land and improvements not immediately needed. In the 1933 Budget, for example, reductions in appropriations for the Department of Agriculture were accomplished, in part, by a reduction of $1,750,000 in the estimate for the purchase of additional forest lands. Such savings as these may be used either to reduce total expenditures or to make possible the increase in appropriations for more pressing needs.

CURTAILMENT OF SPECIAL SERVICES

Likewise, services undertaken primarily for the benefit of particular individuals and conferring little or no advantage upon the citizens as a whole should either be dropped completely from the Budget or placed upon a self-supporting basis by the collection of charges for services rendered. Many activities of the Department of Commerce are illustrations in point, notably the foreign services of the Bureau of Domestic and Foreign Commerce. Moreover, these duplicate in part the activities of the Consular Service.

SUBSIDIES

Subsidies to special interests should also be speedily withdrawn. Some of these subsidies are disguised by excess payments for services. The least that can be asked is that such subsidies as are retained should be clearly designated as such in the Budget. The postal deficit for 1934 is estimated at $97,000,000, substantial portions of which are due to losses on parcel post and second-class mail, to the continuance of rural free-delivery routes laid out for horse-and-buggy delivery, to excess rentals, and to excessive as well as uneconomic subsidies to steamships and air lines carrying mail. Economies can be effected here without impairment of the quality of service.

OBSTACLES TO EXPENDITURE REDUCTION

In the pursuit of any program of expenditure reduction, numerous obstacles will be encountered. A survey of the Budget discloses the fact that the reducible portion of appropriations is small indeed. The 1934 Budget called for appropriations totaling $4,248,160,731, which were reduced by additional recommendations in the President's Budget message to $4,218,808,344. Of this latter total (except for slight adjustments in amounts for specific items in the body of the Budget to bring them into harmony with the modifications in the Budget message), $1,628,517,319 is for military functions (38.60 per cent), fixed-debt charges take $1,259,070,321 (29.84 per cent), public improvements call for $122,108,690 (2.89 per cent), the postal deficit exacts $97,000,000 (2.29 per cent), refunds call for $85,238,800 (2.02 per cent), the construction of general Government buildings is to receive $69,060,000 (1.64 per cent), and $42,453,590 is estimated as the cost of governing the District of Columbia and other Territories (1.01 per cent). These so-called "nonreducible" items call for the expenditure of $3,303,453,720, or 78.30 per cent of the aggregate appropriations proposed for 1934. Included in the percentage just given are certain items referred to in the Budget statements as "fixed charges," representing interest, pensions, retirement salaries, annuities, and World War allowances, together with subsidies, grants, and contributions, which amount to $1,723,436,793, or 4.85 per cent of proposed total appropriations. Unless curtailments are made in these items, improperly designated "nonreducible," substantial reduction of ordinary expenditures can be accomplished only with serious loss to the community.

INCREASED DEMANDS

The depression, it must be recognized, has brought with it an increased demand for Federal services. Upward of 11,000,000 people are out of employment through no fault of their own. The resources of State and local governments, together with private philanthropy, have been unable to provide adequate relief. During the present winter the Federal Government probably will be forced to provide direct aid—not loans of its credit to States and cities—in order to mitigate human suffering. Yet in the 1934 Budget the President provided only $18,000 for relief expenditures, as compared with $40,018,000 appropriated for the fiscal year 1933 and $461,651,000 for 1932. Of this latter sum $450,000,000 was represented by a subscription of that amount to the capital stock of the Reconstruction Finance Corporation, while the remaining subscription of $50,000,000 to the capital stock of that body was charged to the promotion and regulation of agriculture. However, from the total resources of the Reconstruction Finance Corporation only $300,000,000 was "to be used in furnishing relief and work relief to needy and distressed people and in relieving the hardship resulting from unemployment." In addition a curtailment of building construction and public-works projects is recommended for 1934. Appropriations for general Government buildings were $212,638,000 in 1933, but only $69,060,000 is recommended for 1934. Public improvements—roads, rivers, and harbors; flood control and others—received appropriations of $402,482,000 in 1933, while only $122,108,690 is proposed for 1934. The President did not deem "further building at this time in the public interest." It is doubtful whether the volume of useful public works should now be curtailed. Business recovery has not sufficiently advanced to warrant this retrenchment. Likewise, generous Federal appropriations for the direct relief of the unemployed are recommended.

AID TO CITIES AND STATES

Another phase of the problem relates to financial aid to cities and States not by way of loans but through the direct sharing of public revenues. Local-government revenues have especially been drained during the past two winters to provide unemployment relief. The depression has demoralized many State and local revenue systems whose chief reliance has been the property tax. The collapse of real-estate values has been accompanied by unprecedented tax delinquency; and while revenues have dwindled, relief demands have prevented substantial reductions in expenditures and taxes. The constitutions of many States prevent any ready modernization of revenue systems or extension of borrowings. Hence the National Government will soon be confronted with the problem of keeping the State and local governments functioning as well as solvent. The Federal Government can not afford to allow its political subdivisions to cease to function. Curtailment of their functions will decrease the volume of social services needed during this emergency, will reduce the demand for labor and materials when they should be increased. If the subdivisions default on the payment of substantial amounts of bonds and other obligations, this may react unfavorably on the credit of the National Government. Such defaults will tend to restrict the flow of funds in trade and commerce and will undoubtedly restrict the volume of credit with which business is being transacted. Such consequences the Government is endeavoring to prevent through the banking and currency system. Increased lending of credit to State and local governments and an increase in grants for their use would materially aid the efforts toward recovery which have already been made.

REDUCTION OF AGGREGATE EXPENDITURES

There finally arises the question: "Should the aggregate of public expenditures be reduced?" This question should not be confused with the reduction of unit costs and the reallocation of appropriations among the items of expenditure. After all reasonable adjustments to effect economies and promote efficiency have been made, this question must still be faced.

What is needed to-day is an increase in the circulation of money and credit, an increase in the volume of purchases, more employment, larger aggregate pay rolls, and an improvement in the morale of the people. The reduction of aggregate public expenditures, except as and if accompanied by reduction of current excise-tax rates, will influence these factors in exactly the wrong direction. But if the Government decreases the unit cost of providing present services as lower prices and wages enable it so to do, and if it eliminates all elements of waste in its operations, it should be encouraged to undertake such additional activities involving expenditures as the prevailing emergency makes urgent.

Mr. WALSH of Massachusetts. Mr. President, I desire to ask the Senator from New Mexico a question. In the operation of this amendment would it be possible for the Postmaster General, in a department under him where there is a superintendent of postmasters and two assistants, to decide that he could get along with one assistant to the superintendent of postmasters and eliminate the other office?

Mr. BRATTON. Yes, Mr. President; undoubtedly he could do that.

Mr. WALSH of Massachusetts. I desire to ask the Senator another question. There are now a Postmaster General and four Assistant Postmasters General. If the Postmaster General should find that he could consolidate those offices and operate the department as efficiently and as effectively with two Assistant Postmasters General, could he do it?

Mr. BRATTON. Undoubtedly he could. Those are merely two of the hundreds of ways in which he could economize.

Mr. WALSH of Massachusetts. Mr. President, everybody who talks about economy, in and out of this Chamber, talks about eliminating waste, consolidating bureaus, abolishing surplus departments and unnecessary employees. Everybody agrees that these are the kind of expenditures we should eliminate. There is a difference of opinion about whether or not we should reduce expenses by cutting salaries. What is the evil at which we are striking when we talk about economy under present conditions? It is the evil that grows up in every organization in the world, private and public, in times of long-continued prosperity, namely, adding to the pay roll, hiring extra employees, building up bureaus, and increasing the functions of departments. I ask, Who does that? The Congress of the United States incidentally, but chiefly it is the work of executives. What we are confronted with and what private business generally is confronted with is the increase in overhead expenses, by natural expansion in times of prosperity of particular departments in the governmental organization and in the business organizations of the country.

Mr. President, I say it is a "natural" condition. This condition is the result of great sums of money being easily obtained from the taxpayers and resulting from a bulging Public Treasury. Expansion of jobs is the result of executive favor. How is this to be stopped? By executive rigidity, and in no other way. To be sure, the Congress appropriates the money, but the pressure and the urge for expansion comes from department heads.

Unless the new administration and its department heads, the Cabinet officers, have the courage to eliminate activities which are unnecessary and which have been created partly by way of political favor or of individual benefit, such activities as we could enjoy in time of luxury, in time of ease,

and in time of prosperity, and unless adequate power shall be conferred upon the new Executive and his Cabinet officials, we are talking in vain about economies. If the President elect has given one impression to Senators with whom he has talked—for I have heard it from many lips—it is that he proposes to do that very thing, to reduce, to remove the extravagant, the excess, and the surplus employees that have been multiplied in our recent period of prosperity and expansion.

Here is an amendment that seeks to give Cabinet members—in this instance the Postmaster General and the Secretary of the Treasury—that power and that authority and that sanction from the Congress. I propose to give it to them in order that if they find upon taking office that there are unnecessary employees and useless activities that they may eliminate them.

Even among the number of employees of the Senate we find this tendency to expand. We are from time to time increasing the pay roll and putting people to work. Senators on the majority side of the Chamber have been doing that. That is a natural condition. It is a consequence of long continuance in power, of getting money easily. In my judgment, the number of employees about the Senate could be reduced substantially without any injury to service and that money could be saved to the Public Treasury. I am not saying this in criticism. It is, I repeat, the natural result of easy money, of long continuance in power, and of prosperity unlimited and unchecked. How can we eliminate these abuses that overtax the Public Treasury in times of depression? By drastic action when political power changes.

So it seems to me the first thing that we must do is to rely upon the courage and the nerve and the strength of executives to undo what other executives under and during a period of expansion have done.

We did not have any vote when some Senator on the other side went out and whispered into the ear of the Secretary of the Senate or the Sergeant at Arms or some other official and said, "I want another man put on the roll here or two men put on the roll here." We did not have any vote when a man was put on the pay roll here and another man there throughout the Senate wing of this building. We did not have any vote in the Senate about it. It is executive action; it is executive administration; and, in my judgment, the departments and agencies that are useless can be cut out and eliminated only by a forceful Executive who will either himself do it, if we give him the power, or will call the attention of Congress to the facts and recommend action that is remedial. Let us give that power to eliminate the waste—some of it merely political patronage—we are talking about, if there is any, and to reduce the number of political employees. Who has not been in the Post Office Department and seen messengers around the corridors doing little or nothing? Let us talk plainly now. We hear it whispered around every time we go down town of the large number of employees of various governmental agencies that appear to be surplusage. Why not give the new Postmaster General the power to put them out unless they are really necessary and doing a day's work? It is agreed that we can not reduce wages without a special act of Congress; therefore, the amendment to the amendment merely beclouds the issue and may force discharges rather than furloughs of Government employees.

Mr. BLAINE. Mr. President——

Mr. WALSH of Massachusetts. I will yield in a moment. I agree with what has been said about not reducing the salaries of employees. Let us do that in the open; let us do it by reducing our own salaries first. Let us be on the level with the public. If we are going to reduce salaries, let us do it openly and frankly and have a roll call and a vote here, and let us begin by reducing our own salaries as an example to the people of this country. Here, however, is a proposition that does not go to the reduction of salaries. The amendment proposed by the Senator from Colorado to the amendment of the Senator from New Mexico, as I understand, purposely retains the power to remove that may be implied in the amendment of the Senator from New Mexico. Am I correct about that?

Mr. COSTIGAN. The word "dismissal" and the word "discharge" are omitted from the amendment.

Mr. WALSH of Massachusetts. That is what I thought.

Mr. President, I have said about all I want to say, but I should like to repeat that I am convinced that a majority of the 500 Members of the Congress can not see this problem alike; 500 Members of the Congress have different impressions and different notions about how to bring about economy; and if economy is going to be something besides talk, something besides good intentions, it must be brought about by executives of the departments of the Government who have courage and who have the will and disposition to say, "This activity is unnecessary; that bureau or agency can be consolidated with another; this number of employees can be reduced." I hope the new administration will meet its responsibilities and do that. As the Senator from Ohio said, let us give them the opportunity. If they fail, then it will not be the fault of the Senate.

Mr. BLAINE. Mr. President, will the Senator yield for a question?

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Wisconsin?

Mr. WALSH of Massachusetts. I am always glad to yield to my friend from Wisconsin, for whom I have the highest admiration.

Mr. BLAINE. The Senator made reference to messengers around the Post Office Building——

Mr. WALSH of Massachusetts. I said in the corridors.

Mr. BLAINE. In the corridors—many of whom were unnecessary.

Mr. WALSH of Massachusetts. Many of whom seem to be unnecessary.

Mr. BLAINE. Yes; and that the Congress had no voice in that respect. He also used the illustration that the Secretary of the Senate, upon the request of some Member of the Senate, appoints employees and puts them upon the pay roll.

Mr. WALSH of Massachusetts. I did not have in mind any specific act, but I said undoubtedly that has been done.

Mr. BLAINE. I understand.

Mr. WALSH of Massachusetts. I do not think the Senator will dispute that we have been increasing steadily the number of employees here, there, and everywhere during the era of prosperity.

Mr. BLAINE. I was endeavoring to give the two illustrations so that the Senator might answer the question I was about to propound. With these two illustrations in mind, does the proposed amendment confer any other or additional power than now rests with the heads of the departments?

Mr. WALSH of Massachusetts. I think the Senator has presented a viewpoint that has not been emphasized here. In all probability, any executive can refuse to fill a vacant office; he can dismiss an employee who is not needed; but I do think that this amendment expresses the sentiment of the Congress and gives the heads of the executive departments the implied assurance that the Congress will support them in taking such action.

Mr. BLAINE. Mr. President——

The VICE PRESIDENT. Does the Senator from Massachusetts yield further to the Senator from Wisconsin?

Mr. WALSH of Massachusetts. I yield.

Mr. BLAINE. Let me ask the Senator another question. Assuming that this is a sort of political resolution expressing the sentiment of Congress——

Mr. WALSH of Massachusetts. I do not think that is fair. I think the Senator who offered the amendment is actuated by highly commendable motives.

Mr. BLAINE. I do not mean to insinuate anything unfair or improper, but the statement of the Senator was that this express declaration would advise the administrative officers of the sentiment of the Senate. Well, that is nothing more

than a sort of political resolution. I do not mean that it is presented from the standpoint of partisanship at all, but it is a resolution.

Now, is it fair to the people, is it fair to the Government, for Members of Congress to have this method of running to cover when we should write those provisions into the economy provisions of the bill according to the theory of this measure as substantive law and not as a resolution?

Mr. WALSH of Massachusetts. I would accept and be inclined to agree with the Senator if he had not taken the position—if I am correctly informed about it—of opposing economy proposals here. I am not criticizing him.

Mr. BLAINE. The Senator should know that I voted for all the economy provisions last year, including the proposition to cut the salaries of Members of the Congress 25 per cent; and I am going to follow that policy in the present session.

Mr. WALSH of Massachusetts. I was under the impression that the Senator entertained the opinion that the conditions of this country had now reached such a state that it was not necessary to extend further economy this year.

Mr. BLAINE. If the Senator asks me that question, I will answer it very briefly by saying certainly there should be a very, very large degree of economy practiced.

Mr. WALSH of Massachusetts. And the only difference is the manner of doing it.

Mr. BLAINE. Oh, no.

Mr. WALSH of Massachusetts. The Senator wants it done more directly.

Mr. BLAINE. No; that is not the difference. The difference is as to the substance of the economy, not the method.

Mr. WALSH of Massachusetts. What would the Senator suggest in this bill to equal a cut of 5 per cent?

Mr. BLAINE. Exactly what the Senator did yesterday—cut $19,000,000 of graft out of the bill. The Senate adopted that proposal, and I was quite in agreement with it.

Mr. WALSH of Massachusetts. Does the Senator think that will remain out of the bill when the new administration takes control of the Postal Service?

Mr. BLAINE. I hope it will. I am opposed to subsidies. Let us cut out the ship subsidies, let us cut out some of the enormous useless and wasteful expenditures respecting the Army and the Navy. There is lots of room for economy by cutting off public expenditures in great chunks rather than to pinch the pennies from the ordinary clerk who may receive $1,100 a year.

Mr. WALSH of Massachusetts. Mr. President, I understand my time has about expired.

Mr. BLAINE. The Senator's economy and mine might be entirely different as to substance as well as to method.

Mr. BRATTON. Mr. President——

Mr. WALSH of Massachusetts. Mr. President, I yield to the Senator from New Mexico for one-half minute.

Mr. BRATTON. In reply to the observation of the Senator from Wisconsin, I desire to say that we frequently use the word "authorized." Many times we authorize a department to do a certain thing, and it is always regarded as a mandate. I have no doubt that this provision will be regarded in that way and will be administered in that fashion.

Mr. BLAINE. Mr. President, I desire to make a brief statement, and then I desire to make a point of order.

The Senator from New Mexico has just suggested—that is what gives rise to the point of order—that the word "authorized" no doubt means that it is mandatory rather than directory. I want to point out, Mr. President, that while the Senator has modified his amendment to read:

Provided, That the Secretary of the Treasury is authorized to make such reductions in the expenditures from the appropriations made in this act—

And so forth; and while he has stricken out the words "and directed," yet it is now contended that the word "authorized" is mandatory.

That is not all, however. I want to call attention to the fact that while the Senator has modified the amendment, no consideration has been given to the exception contained in the amendment. The Presiding Officer, the distinguished Senator from New Hampshire [Mr. MOSES], sustained the point of order I made on yesterday on the ground that this was new or general legislation; but consideration was given only to the language authorizing and directing the Secretary of the Treasury to do a certain thing. No consideration was given to the exception made in the amendment; and that exception is this:

Except—

That is, excepting the following from his power and his authority—

Except appropriations for acquisition of sites for and construction of public buildings * * *.

The Treasury Department having charge of post-office sites and the sites for other public buildings, the authority to purchase those sites, and the sole power to construct the public buildings, under the present law the Secretary of the Treasury may exercise a discretion and decline to purchase any site whatever, all sites, or any particular site. Under the present law he may decline to build any building or all buildings. He has that right of discretion. Here is a proposition whereby it is proposed to give the Secretary of the Treasury authority—I am not concerned about whether it is mandatory or directory—to reduce appropriations, except for the purchase of sites and the construction of public buildings. That exception was not taken into consideration yesterday, I am certain, by the Presiding Officer. I know that it was not taken into consideration by myself when I made the point of order. I think that section, beyond any doubt, will make this proposed amendment general legislation, and therefore the point of order should lie against it; and I make the point of order.

Mr. BRATTON. Mr. President, under the parliamentary situation am I permitted to speak on the point of order?

The VICE PRESIDENT. Yes; the Senator may speak on the point of order.

Mr. BRATTON. Mr. President, as thus revised, it seems clear to me that the amendment is not subject to the point of order. It is solely a limitation on the money appropriated in this bill, and it merely authorizes the Postmaster General to withhold the expenditure of 5 per cent of the money appropriated in this particular bill. That is what it does, and that is all it does. It is a proviso attached to the bill restraining the disbursement of 5 per cent of the total funds appropriated. There is nothing mandatory in the text of the provision. It is simply an authorization.

As to how the proviso will be administered is not a parliamentary matter addressing itself now to the Chair. The Chair will pass upon the point of order measured by the language within the four corners of the amendment.

I think as modified, attaching to it the proviso and striking out the words "and directed," the amendment is free from the point of order.

Mr. BLAINE. Mr. President, just a brief observation.

The legal effect of the exception to which I have called attention is to prohibit the Secretary of the Treasury from making a 5 per cent reduction respecting appropriations for sites for public buildings and for public buildings. That discretion now rests with him; but if he undertakes to make the 5 per cent reduction, under the discretion or authority, whether it is mandatory or not, he can not make the reduction under that discretion or authority with respect to appropriations for post-office sites and public buildings.

Mr. BRATTON. Oh, certainly. If he has authority under other law, and this does not apply to that appropriation, he can make those cuts under existing law entirely aside and free from this provision. This provision does not apply one way or the other to those appropriations, and his right is measured by existing law.

The VICE PRESIDENT. In view of the statement made on yesterday by the President pro tempore in sustaining the point of order raised against the amendments of the Senator from New Mexico [Mr. BRATTON] from which ruling an appeal was taken, and which statement resulted in the withdrawal of the appeal to-day and the submission of the

amendments in a modified form which the occupant of the chair said would make them in order, the present occupant of the chair feels that it is his duty to overrule the point of order.

Mr. VANDENBERG. Mr. President, may I have the attention of the Senator from Colorado [Mr. COSTIGAN]? I desire to interrogate him regarding the language of his proposed amendment.

When he prohibits all wage cuts, I understand that he is speaking about the scale and not the sum total of the pay roll of the department. In other words, it is a correct interpretation of this language that there would be no inhibition against general dismissals in respect to functions of government that might be eliminated? Is that correct?

Mr. COSTIGAN. Mr. President, in answer to the Senator from Michigan I wish to say that my unwavering personal preference would bar discharges or dismissals, except as specifically ordered by Congress, with furloughs and other proposed wage reductions. As a result of careful inquiries, it is my judgment, however, that a large majority of the Senate would not be willing to support such an amendment. The amendment, therefore, does what the Senator from Michigan has suggested. It does not bar dismissals. It merely prohibits reductions in wages and furloughs other than those already in effect.

Mr. VANDENBERG. Now, let me ask the Senator one further question of interpretation:

> No wage cuts or furloughs other than those—

Mark these words—

> heretofore in effect.

I ask the Senator whether that does not foreclose the effectiveness even of any changes, either in wages or furloughs, which might be carried in these particular appropriation bills? Is it not the Senator's purpose to say that there shall be no wage cuts or furloughs other than those in effect by law, or something of that sort?

Mr. COSTIGAN. Mr. President, the amendment or addition suggested by the Senator from Michigan would appear to be appropriate.

Mr. WHEELER. Mr. President, if the Senator will pardon me, I am not entirely sure that it would, because if we said "excepting those that are in the bill" we might complicate the matter by saying that they could still cut under this proposed amendment.

Mr. VANDENBERG. The Senator sees what I am trying to reach.

Mr. WHEELER. Certainly; I see what the Senator is trying to get at.

Mr. VANDENBERG. It seems to me that as the amendment is drawn the Senator has closed the door to any further consideration of that section of the problem.

Mr. WHEELER. I think it could be done very well by saying "except as heretofore provided or under other provisions of the bill."

Mr. VANDENBERG. "Heretofore or herein."

Mr. WHEELER. Yes; "heretofore or herein," or "under other provisions of law."

Mr. VANDENBERG. May I suggest to the Senator that he perfect his amendment in that respect, so that it will be perfectly clear?

Mr. COSTIGAN. Will the language "heretofore in effect," or "herein provided for," satisfy the Senator from Michigan and the Senator from Montana?

Mr. VANDENBERG. It will satisfy me.

The VICE PRESIDENT. The Senator from Colorado has a right to modify his amendment.

Mr. COSTIGAN. That addition may be made.

The VICE PRESIDENT. The Senator will state the modification.

Mr. COSTIGAN. Following the words "in effect," in the last line of the suggested amendment, add the words, "or in this act provided."

Mr. DILL. Mr. President, I do not know, and I do not think anybody here knows, what effect the language which the Senator from Colorado has offered to this amendment will have.

My own viewpoint is that as the amendment is written by the Senator from New Mexico there is not any possibility of cutting the wage scale of employees, but as to the furloughs there is an unlimited right of furlough.

The most ridiculous system of wage cutting that has ever been invented is this furlough system. In practical operation the result is that nobody, in any Government department, knows how much furlough he is going to have. The application of it has resulted in many employees having such long furloughs that instead of their remuneration being cut 8⅓ per cent it is cut as high as 20 and 30 per cent.

It was a foolish and a mistaken policy that caused the adoption of the furlough as a method of cutting salaries. It was done on the theory that it could be said that wages had not been cut; but in practical operation it results in the most unequal and unsatisfactory system of cutting wages.

I am glad that the Senator from New Mexico has presented this amendment. If carried through these bills it may result in the saving of $100,000,000 or, perhaps, $130,000,000. I say that this is one of the things that this Congress can do to help the present situation in this country.

I am not so foolish as to believe that balancing the Budget will bring back prosperity; but I do believe that the only sound way to balance the Budget in these times is to cut our expenditures until they are no greater than our revenue; otherwise we must resort to new taxes or resort to greater deficits in the Treasury.

I am going to vote for this amendment. I am going to vote for every proposed cut in these appropriation bills that will not interfere with the absolute necessities of the Government's action. I say to Senators here that if they had any real conception of the conditions at home, of the people whom they represent, they would quit thinking so much about the employees who din the talk of wages into their ears. They would think more of these millions at home who can not pay taxes, who can not buy food and clothing, who can not get work.

They are growing in number every day, and we sit here in the city of Washington, with the great pay rolls of our Government around us, and fail to realize the terrible condition that is developing all over the United States among the masses of the common people, upon whom we must in the end depend for the perpetuity of our institutions.

Mr. President, I have little fear, indeed, I have no fear, that this Government is going to be overturned by a bloody revolution, as some men predict; but I am frightened for the future of the Government when I think of the sentiments developing in the United States which will eventually send men to these halls who will rewrite the laws, aye, rewrite the Constitution, if necessary, until the old landmarks of liberty of our Republic will be wiped away by legal action on the part of men who come here as the representatives of our constituencies.

For my part, I have made up my mind to do what I can to stem the tide by first trying to cut the expenditures on every hand, and, second, by trying to get legislation at the first possible opportunity that will revive the trade of the world, by bringing more money into circulation, by bringing about trade between the nations of the world, and by bringing about confidence in the financial institutions of this country.

I say to Senators now that unless we recognize the situation, we will find ourselves confronted with a mass public opinion that will amaze us, and all the rest of the thinking people of the world will be amazed at what will happen as a result of the spirit of radicalism that will sweep the country and bring men into our places who will, by legal methods, change the laws and the Constitution to the point where most of the standards of which we boast, in which we believe, will be wiped away.

Mr. BARKLEY. Mr. President, I do not like to detain the Senate from a vote on the pending amendment or any other amendment or any other proposition, because at the rate

we have been going and are going now, we will have only time enough between now and the 4th of March to consider about eight more amendments to the Post Office appropriation bill. I am truly thankful that this is the last, as it has been the worst, lame-duck session in the history of the United States.

I heard a story the other day about a tobacco grower in my State who hauled a load of tobacco to the market, and, after he had paid all the expenses incident to its preparation for sale, and sale, he owed the proprietor of the warehouse 50 cents. When he went by the office to explain to him that he could not pay the 50 cents, the proprietor said to him, "Well, bring a chicken in to-morrow. I will just take a chicken for what you owe me for processing and selling your tobacco." The following day the farmer brought in two chickens, and when asked why he brought in two chickens, he replied that he intended to bring in another load of tobacco the next day, and he would pay the chicken in advance. [Laughter.]

Mr. President, that is probably an exaggerated illustration of the situation which confronts hundreds of thousands of the farmers of the United States, if not millions of them, and I wonder what such a man to-day thinks about the quibbling in the Senate of the United States over a reduction of 5 per cent in the expenses of operating any department under any Cabinet officer. We act here as if we were petifogging lawyers representing a criminal before a justice of the peace in an effort to get him out from under punishment which he might well deserve.

I recognize the fact that there are some men, and probably some women, who are against all reductions in governmental expenses, and against all discharges, regardless of how useless the employee may be. The Senator from Massachusetts referred to the fact that in some of the public buildings in this city there are numerous messengers sitting around the doors doing nothing.

I was told the other day that the proprietor of a soda-water stand near one of the public buildings in Washington made a count one day of the number of Government employees who, during working hours—not at lunch time, not before 9 o'clock, not after 4.30 o'clock, but during working hours—came in and sat down and drank soda water and ate ice cream, and the number in one day was 720. I do not know that that is an accurate statement. If I have any way to check up on it, and can find out the name of the proprietor of the stand, I am going to inquire about it and find out whether it is true or whether it is an exaggerated rumor.

Mr. President, if anybody doubts how the people of the United States are feeling on this subject of governmental expenses, let him go out among them. Let us read our own mail, if we have time to read it. I am receiving about 150 applications a day from friends and constituents of mine in Kentucky for positions under the Government of the United States. Some of them specify what they desire, but most of them are appealing to me to get them any kind of a job, at any kind of a salary. I am sorry that we can not accommodate all of our friends who are in the midst of hardship with reference to Government employment and Government positions; but where there is one applicant for a job under the incoming administration, there are a thousand men in this country who have no jobs of any kind.

Mr. President, testifying yesterday before the Committee on Interstate and Foreign Commerce, Mr. Daniel Willard, president of the Baltimore & Ohio Railroad, said that his company is still discharging men from employment on his line because of the condition of business and because they are compelled to economize in order to make their budget balance. If we have not the courage or the sense to do the same thing with reference to the United States Government, then we are not qualified to act as a board of directors of the United States Government, which we are in our capacity as United States Senators.

We have to refund several billion dollars' worth of public debts in this country bearing around 4, 4¼, and 4½ per cent. It is the desire of everybody, regardless of politics, that we may refund the seven or eight billion dollars during the current year at lower rates of interest. We can not refund that public debt at lower rates of interest unless we preserve the credit of the United States Government. The only way by which we can save to the taxpayers of this country two or three hundred million dollars a year by refunding our Liberty bonds at a lower rate of interest is by preserving the credit of the United States Government.

We created a Reconstruction Finance Corporation and gave it $500,000,000 in cash out of the Treasury, and authorized it to issue debentures for about $3,000,000,000 more, in order that it might lend money to public and quasi-public and private organizations, self-liquidating and otherwise, and although that Reconstruction Finance Corporation has been in operation for nearly a year, it has not sold a single dollar's worth of debentures or bonds. Although it has loaned about a billion and a quarter dollars to private and public organizations, it has done so by resorting to the credit of the Treasury of the United States to obtain the money with which to do it, rather than selling debentures on a market that has not been ready or willing to absorb such bonds.

We are holding hearings every day in the Committee on Banking and Currency, of which I am a member, to find some method by which to finance the farm mortgages of the United States, amounting to about $9,000,000,000, and it is generally conceded on all sides, I think, that if we shall be able to refinance those farm mortgages at a lower rate of interest, giving the farmer longer time to pay out, so that he may preserve his home, the credit of the United States Government in some degree must be brought to the rescue of the situation.

I ask my colleagues here, in all earnestness and in all sincerity, how are we to compare the condition of an American farmer, or millions of American farmers, who have suspended over their heads to-day the possibility, and the probability, and the certainty, unless something is done for them, of losing their homes and their lifetime savings, with a 5 per cent reduction of somebody who is on the pay roll of the Government of the United States?

If it were not a serious thing, it would be a joke to compare a 5 per cent reduction in the pay of anybody who has a lifetime job with the loss of millions of homes of the people of this country—not only on the farms but in the cities—people who are losing their homes day by day because they have no means by which to pay their debts or the interest on their debts or their taxes.

Mr. President, I am in favor of the amendment of the Senator from New Mexico, and I am against the amendment offered by my friend the Senator from Colorado.

Mr. COSTIGAN. Mr. President, will the Senator yield for a question?

Mr. BARKLEY. I yield.

Mr. COSTIGAN. May I say to the Senator from Kentucky that I know personally of instances of faithful employees of the Government who are certain to lose their investments and their homes if they are forced at this time to take an additional 5 per cent reduction in their pay.

Mr. BARKLEY. Mr. President, I would not dispute the statement of the Senator from Colorado. There are probably Government employees here in Washington who might lose their homes because of a drastic reduction in their pay, although I can not see how a 5 per cent reduction would result in anybody losing his home. They have at least lifetime positions, and salaries enough to support them during the rest of their lives, while thousands, aye, millions, scattered all over this country, in cities and in the country, as well, who are losing their homes, have not even the means of supporting themselves, and are objects of charity. I can not compare a man or a woman who has a lifetime civil-service position, receiving living wages, with somebody out in the country or somebody in a city who has nothing to do whatever. There are 12,000,000 of them walking the streets of the country to-day, objects of charity.

The VICE PRESIDENT. The time of the Senator has expired.

Mr. WHEELER. Mr. President, I have seen hysteria sweep this country before, and I see hysteria sweeping the country at the present time. The 5 per cent cut proposed does not mean simply a cut of 5 per cent in the wages of the employees; it will mean a cut of at least 10 or 15 per cent in the pay of the employees in the Treasury Department and the Post Office Department. I saw hysteria sweep this country during the war, and I have seen men completely lose their balance, until one time I went to the Federal judge of my own district and said to him, "Have I gone crazy or is everybody else crazy?" He replied that he had been asking himself the same question.

I see men standing up here in the Senate of the United States advocating a cut in appropriations of 5 per cent or a cut of 10 per cent or a cut of 15 per cent for the employees, apparently thinking that that will balance the Budget or will bring back prosperity in this country.

Mr. COSTIGAN. Mr. President, will the Senator yield?

Mr. WHEELER. I yield.

Mr. COSTIGAN. I merely rise to ask the Senator whether the 10 per cent cut of a year ago restored prosperity?

Mr. WHEELER. Of course, such a thing can not restore prosperity.

Mr. BARKLEY. Mr. President, if a cut of 5 per cent or of 10 per cent will not restore prosperity—and I agree it will not restore prosperity—and the reduction of these enormous governmental expenses now upon the backs of the people will restore prosperity, or prevent a further decline in prosperity, why not logically increase all Government salaries and all of the other expenses of the Government so as to assure more prosperity, if the reduction of the present scale will not tend in the direction of bringing prosperity?

Mr. WHEELER. Mr. President, I think that is entirely beside the issue, and I do not think it is pertinent at all.

There are two lines of thought in this country at the present time, and it seems to me that we ought to face the issue. There are those who believe that we should let the deflation go on, reduce wages all along the line in private industries as well as in the Government. Many of them honestly believe that by this means we can bring back prosperity. Those who believe this agree that it will result in general liquidation and a general reorganization of business. To those who believe that I propound the questions: First, will the people stand for it? Second, should they stand for it? The other group believes we should inflate our currency either by paper or expending huge sums of money on Government works or by remonetization of silver. I believe the first step we should take is to increase purchasing power of the people of the world by remonetizing silver thereby doubling the primary money of the world and make it possible for various countries to buy from us instead of depressing the gold price of commodities.

The great bankers of the city of New York are advocating cutting wages, which means deflation and liquidation. They are advocating it with every industry that they own. They are coming to the Congress of the United States and asking us to further the proposition with the idea that if we set the precedent and cut wages of the employees of the Government of the United States that precedent will be followed by industries throughout the United States.

We reduced wages 10 per cent. We passed the Reconstruction Finance Corporation bill. We passed the Glass-Steagall bill for the bankers and the banking crowd of the country. We were told by the leaders upon both sides of the Chamber that prosperity was just around the corner. The leader upon the other side of the aisle said to me "With the Glass-Steagall bill passed, we will have unemployment obliterated, and it will only be a few days until smoke will be coming out of the chimneys and the wheat on your farms will begin to move." Yet from that time in 1929 up to the present time we have seen commodity prices fall. I say now that we are not going to balance the Budget, whether we cut wages and salaries 5 per cent or 10 per cent or 25 per cent. It is all nonsense to talk about balancing the Budget when commodity prices are falling as they are at the present time, because if we balance it to-day it is out of balance to-morrow.

Mr. GLASS. Mr. President——

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Virginia?

Mr. WHEELER. I yield.

Mr. GLASS. The Senator from Montana did not hear the Senator from Virginia say that if the Glass-Steagall bill were passed smoke would be coming from the chimneys and that prosperity would be here. On the contrary, I demonstrated mathematically to the United States Senate that it would not do anything of the kind.

Mr. WHEELER. I agree with the Senator entirely that he did not say it, but the Senator from Connecticut [Mr. BINGHAM] did make that statement on the floor of the Senate.

We should understand some of the facts and not listen merely to the oratory. Statements have been made about how the farmers in the West and in the South would react. I do not care if every man in Montana wrote to me and said, "Cut wages, cut salaries." I do not care if every banker and every business man in the United States wrote to me saying, "Cut the wages of Federal employees." I know that they do not know what that means. They are talking about balancing the Budget, but they do not understand it and do not appreciate what it means. Many of them are merely echoing what is said to them by the Chamber of Commerce of the United States over the radio nearly every week-end. Many of them are echoing what is being sent out by the big banking interests of the city of New York in printed pamphlets, and so forth.

Mr. BARKLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Kentucky?

Mr. WHEELER. I yield.

Mr. BARKLEY. Of course, the question of government expenses does not apply only to the United States Government. I take for granted that it was not the United States Chamber of Commerce and any other chamber of commerce that induced the newly elected Governor of Indiana to recommend to the legislature the combination of all the departments of the State government of Indiana into eight divisions. It was not the Chamber of Commerce of the United States that marched on the city hall of Philadelphia and demanded a drastic reduction of expenses of the city of Philadelphia which resulted in reducing those expenses several hundred thousand dollars.

Mr. WHEELER. I am not entirely sure but what it was the result of propaganda being sent out by the secretary of the chamber of commerce over the radio every week-end, abusing the Congress of the United States, abusing the Senate of the United States, and saying, "You must cut down expenses. You must cut down the expenses of the Government."

Mr. BARKLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Montana yield further to the Senator from Kentucky?

Mr. WHEELER. I have only a few moments and I do not care to yield for a speech, but I am willing to yield for a question.

These facts have been given to me by a reliable authority. Eighty per cent of the employees of the Government are civil-service employees. This means they come to their jobs prepared by training, tests, and examinations. Of these, 20 per cent receive less than $1,000 a year, while 55 per cent received less than $1,500 even before the pay cut of last year. The average salary of all the Federal workers amounts to less than $1,400 a year. Federal employees are not exempt from income taxes, Federal or State, or from other expenses.

What of the military costs of the country? What proportion of our taxes are consumed by war items in the Budget? I find that there is 72 per cent of the total of the 1932–33 Budget expended on war debts, war veterans, and war machinery. Yet we are talking about cutting the wages of the employees of the United States Government! When we cut those employees we are not going to help one

farmer in the United States. We are going to do him a detrimental injury, because we are taking away from the people their buying power. The one thing that we ought to do and that Congress is not doing and has not done is to restore the buying power of the masses of the people of the country.

We have voted in the United States Senate to give $2,000,000,000 to the Reconstruction Finance Corporation—for whom? For the railroads, for the banks, for the insurance companies. Have we voted to raise commodity prices? After giving that money to the railroads and the insurance companies and the bankers of the country, Senators now come here, after the workers of the country have already been ground down, and say, "Take more from their salaries and wages and turn it over to the bankers. Grind down the workers of the country a little bit more." Do they say to save money for the Government by cutting interest on Government bonds which they hold and on which they pay no taxes? Oh, no! Do they say we should refuse loans to railroads to pay interest on railroad bonds? Not so! Reduce wages, reduce wages, is the only song they know.

I am amazed to find on this side of the Chamber men who claim to be the friends of the workers of the United States who are trying, under the guise of reducing Government expenses 5 per cent, to cut the workers in the Treasury Department and in the Post Office Department 10 to 15 per cent more, because that is what it really means. It does not mean merely a 5 per cent cut or 7 per cent cut for the workers. It means that the postal clerks, the rural mail carriers of the country, and all the rest of them will be cut from 10 to 15 per cent more.

Mr. DILL. Mr. President——

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Washington?

Mr. WHEELER. I will yield in just a moment. I am not afraid of the hysteria being broadcast by the secretary of the chamber of commerce. I am not going to be stampeded by the hysteria of the banking crowd of New York. I am not going to be stampeded by any of the other groups which are saying, "The thing you have to do is to cut wages and cut wages and cut wages until you grind the Government employees down like the peons of Europe and like the coolie labor of China and of Japan."

No, Mr. President, Senators were not willing, when given a chance to vote for measures that will raise commodity prices, to do anything of that kind. Senators have been sitting here since 1929, and not one single act have they done to try to bring up commodity prices to help the farmer. Now they are being asked to grind down labor further. Not one single act have they voted for to help that little merchant for whom they are pleading while trying to grind down labor.

If the farmers of the country understood what this proposal really means, they would be against it. I am not afraid to go out and face the farmers of my State, I am not afraid to go out and face the business men of my State or any group of citizens in the country including the chambers of commerce, and point out to them where the expense of the Government really is and then say to them, "Do you want me to cut these wages of these employees which comprise only a few cents of the taxes of the whole country?"

No, Mr. President, it is wrong in theory. The proposition is unscientific in principle. It is not the right way to go about cutting down the expenses of the Government. If we are going to cut the expenses of the Government, there are bureaus that ought to be eliminated. There are bureaus in the Department of the Interior that ought to be eliminated. There are expenses of the Indian Bureau that ought to be eliminated. There are bureaus in the Department of Agriculture that ought to be eliminated entirely where thousands upon thousands of dollars could be saved. I have not the slightest doubt but what in the Treasury Department and every other department of the Government we ought to eliminate and could eliminate a lot of bureaus and a lot of activities of different kinds. But let us go about it in a scientific way. Do not say, "Let us have a general reduction of 5 per cent and let the heads of the departments take it out of the pay envelopes of the workers."

Mr. DILL. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Washington?

Mr. WHEELER. If we are going to cut wages, let us be frank and open about it and say we are going to reduce the pay of the employees throughout the United States on the Federal pay roll 5 per cent, or rather 10 or 15 per cent, because that is what it would really mean. Let us not merely send out word to the departments to reduce expenses 5 per cent when we know and must know that it means a reduction of 10 per cent in the pay envelopes of the employees. It is not fair to the employees. It is not fair to the Secretary of the Treasury or the head of any other department. It is unscientific in principle and unsound.

Mr. DILL. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Washington?

Mr. WHEELER. I yield.

Mr. DILL. The question I have been trying to ask the Senator is this: Does he think, under the wording of the amendment, that anybody can cut the wage scale fixed by law? Is there anything in the proposal that makes it possible?

Mr. WHEELER. Of course it is possible—not only possible but entirely probable. How could the department reduce expenses 5 per cent or how will the head of the department reduce his expenses 5 per cent unless he cuts wages?

Mr. DILL. Probably by dropping employees and probably by dropping certain activities.

Mr. WHEELER. Possibly, but not probably.

Mr. DILL. There is no legal right by which he can reduce a salary.

Mr. WHEELER. When he gets a direction by the Congress of the United States to reduce expenses 5 per cent, and the only way he can reduce is by cutting wages, of course he will cut them.

Mr. DILL. Oh, no.

Mr. WHEELER. If the Senator's theory is correct, why will not he agree to the amendment offered by the Senator from Colorado [Mr. COSTIGAN]? The Senator from Kentucky [Mr. BARKLEY] rose a moment ago and said he was opposed to it, when all that it provides is that we shall not reduce the wages of employees.

Mr. DILL. I am not opposed to that part of it, but I am opposed to the part relating to furloughs in the way it is worded, because under the present furlough system there are many employees being cut 25 per cent, and I do not want that perpetuated.

Mr. WHEELER. We are not only going to perpetuate it, but when the Senator from West Virginia [Mr. NEELY] offered an amendment to prevent wage cuts it was voted down by the Senate of the United States last night. Why? If it is not the intention of the Senate to cut wages, why did not the Senate vote to adopt the amendment of the Senator from West Virginia?

Mr. NEELY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from West Virginia?

Mr. WHEELER. I yield.

Mr. NEELY. If it is not the intention by the Bratton amendment to affect those employees, and particularly those whose salaries are less than $2,000 a year, can the Senator assign any reason why the Senator from Washington [Mr. DILL], who favors the Bratton amendment, and the Senator from New Mexico, who offers the amendment, objected to the adoption of the amendment which I proposed, which would have made it impossible to deduct the 5 per cent from the salaries of the employees?

Mr. WHEELER. It is inconceivable to me why they should not, but that is their position.

In closing I want to say again that some one has made a suggestion that the people of the United States are asking for a reduction of expenses. I agree that they are asking

for a reduction. They want to cut out a lot of useless, silly bureaus that have no place in our Government.

The PRESIDENT pro tempore. The time of the Senator from Montana has expired.

Mr. THOMAS of Oklahoma. Mr. President, deflation still continues. The downward trend persists. We are not ready yet to try to change this trend. We still have too many people employed. The people yet employed are receiving too much wages. Their salaries are still too high.

Mr. President, we have too many weak banks yet in the United States for the depression to end. We have too many weak corporations for the depression to stop. Everything we do here only accentuates the downward trend of deflation.

The Senator from Kentucky [Mr. BARKLEY] a few moments ago criticized the Congress for what the Congress has done and what the Congress has not done. I hold in my hand an editorial from the Tulsa Tribune, one of the leading papers of my State, criticizing the people for what they are not doing and the thing they are criticized for is not seeing to it that their Representatives and their Senators do something to check the downward trend of deflation. The article is headed:

Why sit we idle here?

Mr. President, I want to read just one or two paragraphs from the editorial, as follows:

It is just about time for the American people to wake up. This depression is all unmitigated and unadulterated nonsense. We can stop it any time we put our boastful American ingenuity and enterprise to work. This is our country. It is infinitely endowed with all the needs of everybody. Nature is ready to pay such big dividends that now, in 1933, we can enjoy prosperity greater than we have ever had. Have we forgotten how to be Americans? Is the spirit of 1776 dead?

There are before us two immediate steps to collectively take, and if taken now will speedily bring back a substantial prosperity for a period of years sufficient to make a new economic order that will adjust us to scientific progress and bring us a sustained standard of living above anything the world has ever known.

First, we must have an immediate inflation of money. The report of the Secretary of the Treasury of the United States shows less than $1,336,000,000 in circulation. The Federal Government itself is running in debt almost that much every year. The commercial debts of the people, not counting mortgages held by trust companies nor our foreign debts, is 36 times the amount reported in circulation. This would be bad enough were it not worse. More than half of this money is not in circulation. More than half is being hoarded right now by our banks. The result is their deposits grow less, they demand that people pay who can not pay because there is no money with which to pay. The banks are scared. They ask the people to hold the fort while they hide.

This loss of faith in their own financial structure, of course, has cut down their earnings for hoarded money earns nothing. The banks cry for help when the people make a run on the bank. Now the banks have made a run on the people. And so in all parts of the country the people are making ready to live without the banks. They are issuing local money, scrip. Colorado plans State money.

The people are getting pretty sick of their own neglect of duty toward their own country. It is our own fault that we have allowed guileless politicians to tamper with our collective rights and property. It is our own fault that we have allowed so-called captains of industry to mismanage our industrial affairs.

The American colonies refused to accept financial tyranny imposed by a fat-headed English king. The American spirit was born in revolution. It was the spirit of 1776 that made this country our own. Only that spirit will regain it for us. Why heed the fatheads now?

The Government must now issue more money. The people themselves and not the banks must issue it. There never was a greater economic idiocy than that which the American people have guilelessly submitted to of paying our banks a fat fee to visa the money the people themselves issue. This has been nothing but polite piracy.

We must get enough money into circulation to start business and keep commerce fluid. Every merchant is now standing in his own way, every mill and factory operator is throwing water on his own furnace fires who doesn't do something besides sit in his office swivel chair, worry and wonder what is going to happen. Your store will not do very well if you attend to it only one hour every four years. And your store depends on your neglected country.

Congress is yours to command as you command your clerks. The spirit of '76 will free you of burdens in 1933 as it did on the first Fourth of July. You will have money when you command Congress to issue your own money.

The second essential step: We should command Congress to declare a moratorium on all debts for at least a year, better, 18 months. This does not mean the cancellation of any debts.

Mr. President, I ask unanimous consent to have the remainder of the editorial printed in connection with my remarks.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The remainder of the editorial is as follows:

All debts must be paid, all interest maintained, but it does mean deferring principal payments. If it was proper for the American people to give the German people a moratorium on their debts, it is tenfold right that the American people give themselves an equal opportunity to recover. This will revitalize and reestablish credit in American commerce. This will help our banks to find a new courage and rebuild on a sound basis.

We have everything out of which prosperity is made except money. As one economic writer recently said: "An American mother does not throw her children out on the street to look for scraps of food when there is an abundance of food in the ice box and in the pantry. She lives in a world of reality, and food is food. And if food be there, she feeds the food. Consider the whole Nation as one vast family. Here, because we have a silly and unsound money system made by blundering boys who think America is a green blackboard in the stock exchange and not the green fields blessed by sunshine and shower, we throw 30,000,000 men, women, and children out on the streets, with mountains of wheat and cotton and coal and boots in the storage."

We burn the wheat and corn because the gods of gold have wrecked the economic structure on which our markets and our railroads rest. We have an unlimited capacity to produce jackets and dresses, shirts and aprons, collars, cravats, bonnets and gloves, pianos and autos, and what not. We have slowed down making and selling these refinements. All because we have forgotten there is a spirit of '76 flowing in our veins.

We can have business back in 90 days if our representatives in Washington honestly represent us in that spirit. It is all piffle and nonsense for our Congress, or for our misguided State administration in Oklahoma City or any other State capital, to go on with this fool "tax the people" idea. That will put us deeper into depression. It will never lift us out, and it violates the spirit of '76 and repudiates the American plan.

We want business; work for workers. The American spirit is the fighting foe of enforced idleness. It gives battle to any taxation system that taxes industry to a standstill. It is time now for every citizen to do his duty. It is not enough to play citizen one hour once every four years. If you treated your private business that way you wouldn't have any private business. Private business is sick now because we have neglected our public or collective business.

Whenever the enemy gets so near that we can see the whites of their eyes, the true American, as the minute men of old, opens fire. It is time to fire. It is time to remake America. We can again be busy, prosperous, and happy, and in 60 days from now, if we act as Americans should act and quit behaving like a lot of servile subjects submitting to as blundering a system as ever thrived under a fat and stupid king. This country of ours, with its infinite abundance assures us of a good life if we are smart enough to make it and brave enough to demand it.

It is time to demand that our representatives represent us. It is time to tell them what to do. You can be sure the Wall Street crowd that has mismanaged us are busy telling them. Don't just read, write. Write at least one Representative and Senator. If you don't want to go to the trouble to make your own argument and are willing to accept this, clip this page and mail it and request the money inflation and the moratorium that will reestablish credits and speedily rebuild business. Tulsa, then, for one town, will have taken a first and positive American step in doing its duty to rebuild American business.

Why sit we idle here when so soon it can be done?

Mr. THOMAS of Oklahoma. Now, I call attention to another very brief editorial, as follows:

LOCAL MONEY APPEARS

Because we haven't enough money to meet the needs of trade local money is appearing all over the country. According to the latest statements in something like thirty-two hundred communities, trade or labor exchanges have issued scrip redeemable only through the local clearing agency created to authorize the issue. But already a considerable number of small State banks through the Central West and South have consented to clear this local currency, subject to its acceptance and exchange at the improvised agency which authorized the issue.

Colorado now contemplates making State money by coining silver. To put this into circulation it is proposed to give every man, woman, and child, who is a citizen of Colorado, $50. By such an act dead mines become alive. Thirty thousand jobless will find jobs. Colorado will be $60,000,000 richer, commercial currents will again flow. If Congress won't do this kind of thing, our States will; and when all the States have done this the Chase National Bank won't be worth enough to sweep up in a dustpan.

In October, 1929, there was not a banker in America who would have predicted that we would be where we are to-day. That was but little more than three years ago. The same bankers have no more vision now than they had then. The bankers have always opposed progress. They opposed the railroad because it made insecure canal boat securities. We have to go elsewhere for our

economic intelligence than the big financial boys down in Wall Street who try to hold a nation back to accommodate their avaricious stupidity.

Mr. President, in these latter days we hear much about hoarding. A couple of days ago the head of the Reconstruction Finance Corporation, in testifying before one of the Senate committees, made the statement, so the press relates, that the Reconstruction Finance Corporation has loaned money to banks and to railroads, and that as soon as the loans were made to banks such banks paid the loans to larger banks, and when loans were made to the railroads the railroads immediately passed that money on to the banks in liquidation of existing loans.

Mr. President, it is true that the banks have and are hoarding money, but the banks are not the leading hoarders in the country. Let me call the attention of the Senate to the fact that, according to the last statement of the Treasury Department, we had in circulation only $5,647,000,000, and yet on that date Uncle Sam had in his strong box the total sum of $9,451,000,000. That shows that Uncle Sam, typifying the Government, is the hoarder of practically $3,000,000,000 of the money of the Nation; and while the Government is hoarding this money the people of the country are printing scrip; issuing their own money, while millions walk the streets hunting shelter and begging for bread.

Mr. President, to reinforce what I have just said, I ask unanimous consent to have printed in connection with my remarks a copy of the radio address delivered on last Sunday by Rev. Charles E. Coughlin, of Detroit, Mich.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE MARCH OF THE WORKERS

Two weeks ago this afternoon I had occasion to address this audience on the nineteenth article of the proposed Glass bill.

This bill intended to legalize branch banking throughout the entirety of the United States. It aimed eventually to assimilate all the small independent banks throughout any given State into one or two mighty central banks resident in the State's financial capital. It proposed to make possible the centralization of all banking eventually within the confines of lower Manhattan, New York City.

In a word, this short-sighted bill aimed at cornering all the credit of the Nation in the hands of a few. More will be heard about that in the present Senate investigation.

I pointed out how the head of the Catholic Church lamented this concentration of wealth and of credit in the hands of a few and regarded it as one of the major economic evils of our day. I reminded this audience that the Glass proposal originated in the minds of those who for generations have grown fat upon the exploitation of the American public and was being advocated by a certain banking house whose ancestor multiplied his millions in the days of the Civil War by selling guns to the Federal Government; guns that did not shoot and could not shoot, thereby prolonging the sufferings of that lurid conflict; thereby proving his patriotism to posterity in being partly responsible for the needless sacrifice of thousands of men.

If I may digress at the outset of this afternoon's lecture, let me express a few words relative to war. They come to my mind as associated with this mention of the Civil War. Already you are apprised of the fact that there are existent in this Nation almost $12,000,000,000 of Government bonds whose origin is traceable to the commercial war which was fought between the years 1914 and 1918. They are bonds upon which you citizens of this Nation are paying approximately 3½ per cent interest both to the banks and to the individuals who hold them against you. Your yearly tribute is almost $400,000,000 in taxes to those who have invested in the debts which we have piled up to make the world safe not for democracy but for chaos, not for prosperity but for depression, not for liberty but for a species of economic slavery where money, the medium of exchange, has been transformed into a scourge of control.

Meanwhile, the civilized nations of the world are at present spending approximately $4,000,000,000 each year in preparation for the next war—for the next commercial war—that appears to be inevitable because we do not know how to trade in justice and equity with each other; because the nations persist in upholding a policy of exploitation, of narrow nationalism both abroad and at home.

You are a patient people. But there are times when patience, ceasing to remain a virtue, degenerates into a vice.

You are a childish people who grow enthusiastic over empty victories; who become emotional with tears over needless slaughter; and who will permit again, I presume, your husbands and your sons to be conscripted body and soul, but who lack sufficient courage and leadership and intelligence to demand legislation that if ever another such war shall break upon the tranquillity of our Nation not only men shall be conscripted but money and gold must likewise be conscripted to defend our shores. Wake up!

Does it not seem most incongruous that both ex-service men and widows and sons of the slain victims be burdened with war debts when already they have sacrificed the best years of their existence and their most precious possessions before the altars of international commercial greed? Does it not appear equitable that if precious lives shall be conscripted we shall not fail to conscript precious dollars? Let us cease inflicting with starvation and confiscation a docile people who have borne the burdens of war and now are prostrate upon life's Calvary hill—prostrate and exhausted from carrying the cross of depression!

That is why the prophet Nehemiah said when he beheld the misery of a stricken people—a misery that had been increased by burdensome debts:

"And I was exceedingly angry when I heard their cry according to these words. And my heart thought with myself; and I rebuked the nobles and magistrates, and said to them: 'Do you every one exact usury of your brethren?' And I gathered together a great assembly against them. * * * And I said to them: 'The thing you do is not good. * * * Both I and my brethren, and my servants, have lent money and corn to many. Let us all agree not to call for it again; let us forgive the debt that is owing to us. Restore ye to them this day their fields, and their vineyards, and their olive yards, and their houses. And the hundredth part of the money, and of the corn, the wine, and the oil which you were wont to exact of them give it rather for them.'"

So spoke the prophet of old according to the Scriptures of God, when the Jewish nation emerged from a war.

And so do we contrary in modern times according to the philosophy and devisals of godless man.

My friends, the time has come when like Nehemias we shall gather together a great assembly against the nobles of wealth and the magistrates who serve them.

II

But let us return to the Glass bill, which supports the theory of the concentration of credit in the hands of a few. After 21 precious days of what most news journals called filibustering, this bill passed the Senate in a modified form. It has not yet even got into the halls of the lower House. Its viciousness was well advertised throughout the Nation. Only nine States in the Union, which hitherto permitted branch banking, will be permitted to continue this practice. So passed the bill in the Senate.

Twenty-one days spent in hatching an empty egg!

Twenty-one days destroying the fundamental causes of our national misery, according to some!

Twenty-one days in refusing to admit that we are suffering from a famine of money!

Twenty-one priceless days which were crowned by the same Senator GLASS, who, defeated in the nineteenth article of his bill, then introduced a motion on the floor of the Senate to table all inflationary proposals, every one of which was designed to rid this country of the famine of money. He even refuses to discuss this thing further!

Oftentimes, my friends, I have drawn to your attention the universally known fact that if there is hunger in our midst, it is not due to a lack of foodstuffs; if there are idle factories, it is not due to an absence of desire on our part to use their products; if there are more than 1,000,000 farms confiscated during the past few months, this may not be attributed either to laziness or to inactivity. The American agricultural class is too industrious to suffer this charge.

It is all due to a stupid, vicious, and radical philosophy on the part of certain nobles of wealth that money must be used as a medium of control.

Any proposal to destroy this famine of money is called radical and unsound. Any attempt to restore the purchasing power of the dollar to what it was when these damnable war bonds were launched upon a defenseless people is considered inflationary. By force of logic it is therefore unsound for men to work, it is unsound for a farmer to earn enough from his produce to save his home. It is unsound to clothe the naked, to feed the hungry, to keep open our schools. It is unsound to earn enough money whereby the products of our factories can be purchased. It is doubly unsound and heretical to cease worshipping at the altar of the man-made god of gold.

By the way, did your local newspaper comment upon the fact that any attempt not at inflation, which is a hypocritical word as used in this instance, but at normalization of the American dollar—did your newspapers carry an account that the United States Senate by a vote of 56 to 18 has refused to consider any proposal to increase our currency?

If not, this is what was carried in the columns of the Detroit News on Thursday, January 26. Mr. Jay Hayden, its representative in Washington, writes as follows:

"The Democratic and Republican leaders on Capitol Hill, all opposed to any sort of direct tampering with the currency, now are agreed that there will be no further serious threat of legislation to debase the gold standard, at least until the beginning of the first regular session of the new Congress in January, 1934."

Well, my friends, there is optimism for you—an optimism that tells you to tighten up your belt; an optimism that bids you smile and smile and be a devil as you look forward to the prospect of another year of idleness, of another year of profitless crops; of another year of confiscation; another year of closed factories; another year of loss to our industrialists!

Three years ago, in the face of incontestable facts, you were a radical if you even whispered aloud the word "depression." To-day you are worse than a red bolshevist if you even permit yourself to think that there is such a thing as a famine of money which can be corrected.

III

Is there a famine of money in this country or are we all deceived by a heinous misunderstanding?

Before answering this question, let me once more remind you that money is divided into three parts. First, there is your basic coin which you do not use directly—this is called gold. Secondly, there is your pocket money represented by silver coins and by paper bills—this is called currency. And, lastly, there is your check money, or your bonds, or your mortgages which is called credit or debt money.

Now all political economists agree that for every unit of basic money or gold which we possess, we may have in circulation 2½ units of currency money and not more than 12 units of debt money.

This formula of 1 to 2½ to 12 is the formula of sound money just the same as H_2O in chemistry is the formula for pure water.

Now in our Nation we have approximately $4,500,000,000 of gold. Work out your formula. This permits us to have approximately $11,000,000,000 of currency and $54,000,000,000 of credit or debt money.

Well, what are the facts existing at the present moment in this country? Instead of having approximately $11,000,000,000 of currency, we have in circulation nominally $5,000,000,000 of currency. But if you subtract the money that has gone into hiding, the money that has been destroyed, we have no more than $3,000,000,000 in real currency.

On the other hand, we have the stupendous sum of approximately $235,000,000,000 of debt money instead of $54,000,000,000 actually supported by our $4,500,000,000 of gold.

The sound and scientific formula has been thrown aside by the modern manipulators of finance. Against all precedent and experience they attempt to tell us that sound money exists in the ratio of 1 to 1⅛ to 117—just as sensible to say that the formula for water is C_6H_5OH, which, by the way, is the chemist's terminology for carbolic acid. Try to drink that for water and see what happens. And try to use our present balance of money and watch the "march of the workers."

Now, there is actually more than $7,000,000,000 of a famine of currency money in this Nation. There is approximately an overweight of $180,000,000,000 of credit or debt money in circulation. More than we can conservatively carry.

The Senators in Washington know this far better than do you in this audience recognize it. And yet they have the effrontery to tell you through the columns of the press that those who desire inflation, as they term it incorrectly, are seeking to establish an unsound currency, as if it could be more unsound than that which exists to-day.

The truth of it is the system which they are endeavoring to uphold is so unsound that to it more than to anything else you can attribute the starvation and the idleness and the discontent which are so universal in this Nation. (And a Senator writing to a friend of mine who showed me the letter last evening—the Senator said they have no power in the Senate to regulate this famine of money! He had better read the Constitution.)

My friends, that is why for several Sundays I have been proposing the recall of the billions of dollars of war bonds. That is why I have been advocating the issuance of currency money in place of these bonds. This would not create an inflation but would only normalize the abnormal currency from which we are suffering. Call that radical if you will, but if you do, likewise call the word of God radical after what you have heard as written by the prophet Nehemiah.

And still, by a vote of 56 to 18, the omniscient Senate of the United States refuses, under the leadership of CARTER GLASS, to entertain any consideration aimed at removing this menace!

Of course he and his supporters are ably seconded by many financial institutions in our midst. For this they have their personal reasons—devastating and disconcerting reasons which you have not thought of: First, by accepting currency in payment of the bonds, the bankers and the bondholders would be compelled to invest in American property and industry. And, secondly (and this is the disconcerting reason), if I dare suggest it, these financiers who are opposing such a measure are playing hand in glove with the foreign debtor nations, hoping first to have our Government make a readjustment or partial cancellation of these foreign debts; and then in 1934 or late in 1933 to permit a revaluation or normalization of our money, thereby giving England, France, and the rest of them a double debt cut. This, so they think, is the only way possible to collect the private debts owed by foreign governments and individuals to these bankers. But in the meantime let American people suffer while the bankers play financial politics at the price of our misery.

Do you realize, my friends, that in the banks of this Nation the American people have on deposit approximately $45,000,000,000? Do you also realize that these banks altogether have no more than $800,000,000 of actual currency in their vaults? In other words, they have only one-sixtieth of the money on hand which you deposited with them. This is the information made known to us in the pages of the CONGRESSIONAL RECORD for January 24, 1933.

Of course they have Government bonds at par value and municipal bonds, railroad and insurance bonds not at par value. Of course their vaults are filled with first mortgages and with notes payable, all of which have depreciated. But from whom could these bankers expect to redeem in actual currency their bonds and their stocks and their notes to pay the American people who have deposited $45,000,000,000 with them?

If the patient people of this Nation have lost confidence in a Government whose Congress, according to the Constitution, has the right to coin and to regulate the value of money, and if the right, therefore, the duty—a duty that they have tabled and sidetracked and refused to perform. If they have lost confidence it is because this Congress has not only not exercised its duty but now has gone on record with a resolution to discuss the normalization of the American dollar nevermore.

That is a most serious situation. It means that hardly a single bank in this country dares to lend a sizable sum of money over a period of more than a few days. It means that business is stagnant. It means that profits are a thing of the past. It means that debts must increase. It means that foreclosures and confiscations must continue. It means that our great industrial plants with their huge investments are seriously crippled.

How long can the banks of this Nation survive if this famine of currency money continues?

There are approximately 19,000 banking institutions within the boundaries of our country. In the year ending June 30 deposits to the amount of $11,500,000,000 were withdrawn from them. One more such critical year and it would require 20 Reconstruction Finance Corporations to keep open the doors even of the 42 banks of this country which hold 32 per cent of all its deposits or of the 195 banks which hold 47 per cent of the Nation's deposits.

I quote these astounding figures as a basis of argument against the mighty financial institutions of this Nation who maintain so vigorously that we require no normalization of our currency, and yet who should be the first to recommend it if they desire salvation.

IV

The people are learning quickly.

The farmers of this Nation realize that once before in our history we have had a normalization of our currency. They realize that the Federal reserve deflation policy put into effect in 1920 deflated agriculture $32,000,000,000—$18,000,000,000 of it in land values and the balance of it on the crops of 1920 and 1921.

Nineteen hundred and twenty was the year when we had the largest volume of money in circulation. It was the year when the dollar reached its lowest buying power. In fact, at that date a dollar was worth only 64 cents.

Here is the story: Those were the days when the owners of Government bonds were dissatisfied with the purchasing power of the dollar.

Thus, beginning with 1921 the bondholders and the financial powers of this country took out of circulation more than $100,000,000 every month for 17 months, with the result that the buying power of the dollar increased. By the year 1926 the dollar became worth 100 cents.

Had their program of inflation been concluded in the year 1926 there would have been no complaint. It would have succeeded only in normalizing the dollar. But by 1929 the dollar became worth $1.05. In 1930 it increased to $1.15. And in 1932 it reached the price of $1.54. To-day your dollar is conservatively worth $1.60. To-day, therefore, we are suffering from an inflated, a dishonest dollar.

As far as the farmer is concerned, the United States Department of Labor informs us that the dollar is approximately worth $2.03 in farm commodities. In other words, due to the inflation of the dollar, the farmers of this Nation are paying $203 for every $100 worth of taxes they owe, for every $100 on the mortgage which they owe. It also means that their 5 per cent interest has doubled to 10 per cent.

There, my friends, is a real demonstration of what inflation means. To reduce the 203-cent dollar to a 100-cent dollar by the issuance of the currency money which has been taken out of circulation and sunk in bonds is what we mean by the normalization of the dollar.

But we are told that we must not tamper with the fictitious value of gold.

Now, when the dollar was equivalent to 60 cents or thereabouts, I remember how the bondholders and the influential public utilities who had contracts to sell light and power for so much per kilowatt; to carry passengers on street railways and on steam railways for so much either per ride or per mile—when these contracts were working to the disadvantage of the owners of street railways and public utilities, what happened?

Bondholders and bankers approached the Supreme Court to have these contracts nullified on the grounds, to put it in plain English, that if the said contracts were maintained no profit would accrue either to the bondholders or to the public utilities themselves.

What did the Supreme Court decide when this case was presented to them? It said that the contracts made between the general public and the public utilities were not binding. They decreed that the power to regulate can never be bartered away nor traded away.

Now when the shoe is on the other foot; when the dollar is worth anywhere from 156 cents to 203 cents these same gentlemen oppose its normalization through the regulation and revaluation of our currency. It was a blessed thing to regulate the value of money in 1920. But to tamper with it in 1933 becomes a financial mortal sin.

Let us not become stampeded by catch words or by obsolete phrases unscientifically spoken.

Let not the worshippers of the dishonest dollar deceive us by singing the battle hymn of sound money at one moment and then by practicing the policies of brigands at the next.

Sound money, as far as an American is concerned, means 100 cents in one dollar, not 160, not 203, but 100 cents. Unsound money is that which exists to-day and which can not be ousted from our midst until the formula of the ages is readopted—1 to 2½ to 12. Otherwise your money is as carbolic acid is to water. To-day it is 1 to 1⅓ to 117.

Just yesterday Sir Reginald McKenna, perhaps the greatest living economist and banker in Great Britain, has gone on record as stating:

"Controlled inflation, from being a remedy of fools or knaves, has become widely regarded as the best solution of our troubles, since it has become realized that a substantial rise in wholesale prices need have no more than a slight effect upon the cost of living."

It is the only sensible way and logical way to revaluate our gold ounce.

And without revaluation there is only one thing left—at least three months ago there was only one thing left—and that was repudiation.

V

Are you not appraised of what is happening in Iowa, in Illinois, in Ohio, in Minnesota, in Michigan, and in the Middle West generally? These men have rebelled against the dishonest dollar and those who attempt to use it.

Which one of you will condemn those hard-thinking, hard-working sons of toil from protecting their homes; from rising in revolution, if you like, against the iniquities of a law and man-made contracts that under present circumstances have proven themselves immoral, unsound, unchristian, and un-American?

More power to those farmers! They still retain that spirit of independence, that love of liberty, and that determination for fair play and justice which characterized the patriots of 1776, who, for a lesser reason, rose up in mighty indignation against a system of taxation that was not half so iniquitous as this system of exploitation which stamps the financial structure of our present life.

The precedent of the Supreme Court of the United States is on the side of the farmers. The fundamentals of the moral law of God support them.

We have had enough of evictions. We have been surfeited with confiscations. We have been scourged long enough at the pillar of obsolete contracts and mortgages.

And the law of self-preservation, the first law that God gave to man and which antedates any man-made law, comes rushing with its support to the farmers in their righteous struggle.

A month ago or more we were satisfied with announcing the slogan of "Revaluation or repudiation." But within a few months from to-day that slogan will be changed to "revaluation or revolution" simply because the American people refuse to pay their debts with dishonest dollars.

Let me read for you an editorial which appeared in the New York World-Telegram, dated Thursday, January 26. It, too, is entitled "Workers on the March." It reads as follows:

"When President Green, of the conservative American Federation of Labor, declares that his legion of 2,500,000 unionists 'soon will be on the march' for 'perhaps such a battle as no labor movement has fought before' the Government and business leaders of the country must listen.

"When President Edward O'Neal, of the even more conservative American Farm Bureau Federation, says: 'Unless something is done for the American farmer, we will have revolution in the countryside in less than 12 months, the Government and business leaders of the country can not ignore the warning.

"Yesterday both of these spokesmen of the toilers of the city and the farm unfurled their battle flags.

"When, last fall, Mr. Green on the federation's convention platform in Cincinnati threatened the use of 'forceful methods' in achieving the 30-hour week and higher wages, his words had an ominous sound. Criticism broke forth. Censure did not drive him to cover, for in an interview in Nation's Business, organ of the United States Chamber of Commerce, he repeats that he meant what he said and more.

"'We shall,' he said, 'fight with every legitimate weapon at our command to restore the kind of America in which a man can have a chance in his own right. There has been a fear that we are in earnest. Let me use this opportunity to double rivet the assurance that we are in earnest.'

"American labor, he explains, has not gone wild; it simply has come to what it is 'determined shall be the end of the road of suffering.'

"The significance of this defiant note is not that here is a new Mr. Green speaking. It is that a new union labor is speaking. Mr. Green never has marched ahead of his rank and file. That he now speaks militantly, desperately, shows that he has been forced by his members to do so.

"The same is true of Mr. O'Neal and his farmers.

"These warnings are not bluff. Behind them is the explosive desperation of a vast majority of American citizens."

If that is not enough to disturb the smug complacency of individuals who think that man-made laws and man-made contracts take precedence over God's laws and God's contracts, we have come into desperate days.

You dare not impose more taxes upon a people whose back already has been bowed to mother earth. You dare not permit to continue the starvation and the suffering, the unemployment, and the distress which is so universal in a country that is teeming with the real wealth of the soil, the real wealth of industry, and the real wealth of manhood.

Cease prating of what happened to Germany when that nation had recourse to the printing press to flood its country with worthless marks. Germany and the United States are poles apart. Germany had no gold upon which to predicate the printing of its worthless paper money. America has more gold than all Europe put together; possesses so much gold that her currency money to-day is at least one and one-half times short of what it should be according to the Federal reserve act passed in 1918.

Who is unconstitutional? Who is illegal? Those who seek redress through revaluation or normalization, or those who, to build up their arguments to perpetuate oppression, twist truth and deform facts to suit their purpose?

VI

My fellow Americans, you are being victimized by misinformation which flows like poison into your arteries from the hearts of those who blindly cling to the presumed inviolability of bonds and contracts and defied gold. Once more human life and human rights are being conscripted on the battle front of depression to become food and fodder for the protection of a financial formula that is unscientific, un-Christian, and inhuman.

All that the prophet Nehemias said of old can be assigned to the scrap heap or to the gutter. All that Christ said, too, can be given to the gods of war as useless and poetic because man's way has become more superior and more expeditious than God's.

Perhaps the United States Senate can table any resolution that aims at inflation, as they call it, but it can not eradicate it from the minds of the American public who to-day are aroused and determined to expect justice instead of impudence from their duly elected representatives.

In bestowing life upon the creature man, almighty God likewise bestowed upon him the right to sustain his life by the sweat of his brow. The omniscient Creator conferred upon no man or upon no group of men the license to exploit, to starve, or to curtail unjustly the efforts of an individual much less the activities of the agricultural and laboring class of a nation to pursue the even tenor of its ways.

The laborer is worthy of his hire; and the people of this country have a right to the products of this country, and that right can not be taken away from them by the obstruction of a man-made law of antiquated gold. It is the first duty of this or any other government to erect laws and statutes which will render possible and feasible the employment of every individual citizen who is honest enough to work. That is the business of every state.

That is Catholic doctrine—not socialism, not radicalism.

That is a doctrine that was born in the crib of Bethlehem and was sealed with the ruddy drops of Christ's blood upon the cross of Calvary long before Karl Marx and his atheism ever attempted to gain the leadership of an injured people, and long before any act of Congress decided once and for all that gold is wealth, that gold has a certain value, while men and the things that sustain their lives are valueless.

Mr. COPELAND. Mr. President, I want to inquire of the Senator from New Mexico the purpose of Title IV of the pending bill. First, before he answers the question, I wish to say that I understand by Title IV we are conferring extraordinary powers upon the President—practically dictatorial powers. If I rightly understand the purpose of the reorganization section of the bill, it is to give to the President the power to do anything that he may see fit to do in the reorganization of the departments. While I have had some question about the constitutionality of such action, I do believe that objection could be cured and that power could be conferred upon the President for a limited time; that we have now a great national emergency which is equal, in a sense, to the emergency of war, and for a limited time that tremendous power might be conferred upon the President.

Now, let me ask the Senator if I state the purpose of the originators of this title correctly in what I have said?

Mr. BRATTON. Mr. President, I think the Senator from New York has stated the purpose with substantial accuracy. The specific powers are specified in paragraphs (a), (b), (c), and (d) of section 401. That is the policy. Then in section 403 the President is authorized to carry out that policy in the manner specified in paragraphs (a), (b), (c), and (d), substantially as the Senator has stated the situation.

Mr. BYRNES. Mr. President, will the Senator yield?

Mr. COPELAND. I yield to the Senator from South Carolina.

Mr. BYRNES. I simply want to say to the Senator, for his information, that I have an amendment prepared to this title making several changes, a copy of which I shall be glad to furnish the Senator whenever it is proposed, and I will

then be glad to debate it and answer any question which he may desire to ask.

Mr. COPELAND. The Senator means to Title IV.

Mr. BYRNES. Yes.

Mr. COPELAND. Senators will find on their desks two amendments which I have offered, one to section 401, which is the first section of Title IV, reading as follows:

On page 83, strike out lines 4 to 6, inclusive, and insert in lieu thereof the following:

"SEC. 401. The Congress hereby declares that a serious emergency exists by reason of the general economic depression; that it is imperative to reduce drastically all governmental expenditures during such emergency; and that such reduction may be accomplished in great measure by proceeding immediately under the provisions of this title.

"Accordingly, in order to reduce expenditures and increase efficiency in government, it is declared to be the policy of Congress—"

Then follow the provisions relating to the various things which may be done to reduce expenses.

I am proposing also, on page 84, after line 15, to insert:

Provided, That the authority granted to the President under section 403 shall terminate upon the expiration of two years after the date of enactment of this act unless otherwise provided by Congress.

From the advice I have received, if these additions were made, this portion of the bill, in all probability, might be considered to be constitutional.

Mr. President, I would not vote to confer such dictatorial power upon any President unless I had the conviction in my own heart that he would not abuse it. I have that confidence in the President elect.

We are proposing to give him power such as no President ever had, in my opinion, even in war time. However, we have an emergency which demands it; I recognize that. But if Title IV does mean what the Senator from New Mexico says, and what apparently the Senator from South Carolina believes it to mean—that we are going to give the Executive the power to do these unusual things—why do we put in the bill additional language? Is it because we lack confidence in the Executive? Do we doubt whether or not he will carry out what we are proposing to provide in Title IV?

Further, why do we lack confidence in those men who are going to be members of the Cabinet and preside over the various executive departments? Are they not to be trusted to carry out the ideas of economy which the Democratic Party is standing for, and the whole country for that matter?

I do not wish to inject any partisanship in this debate, for if there was ever a time when every citizen, regardless of his politics, whether he be a Democrat or Republican or a prohibitionist or a Farmer-Laborite, or whatever he may be—if there was ever a time when every citizen ought to pray that a party may succeed, it is right now. Every citizen, regardless of his party, has a direct personal interest in the success of the incoming administration.

Mr. President, with changes which would give some hope of making effective what we propose, I would be willing to give this dictatorial power to the President. But it seems to me unwise now simply to upset all the employees of our Government, to bring distress to them, perhaps unnecessarily, and to hamper the President in any views he may have regarding reorganization. I think the wise thing for us to do is to perfect Title IV, so that we may vote on it and adopt it, and confer these powers upon the Executive. Then certainly, he, being at the head of the Government, and the Cabinet officers under him, will carry out, of necessity, every desire he has to effect radical economies.

I have the feeling that the amendment, which is offered by my friend whom I admire and love, is giving unnecessary distress to employees of the Government. I have sympathy with those who on this floor have asked "Why do we take all the economies out of the employees?" There must be found other ways to effect economies, not alone to take it out of human beings employed by our Government but also to take it out of activities which are mechanical in their nature.

So I am frank to say that I dislike exceedingly to vote for this amendment. I do not think we should do it. Certainly we should not if we have faith to believe that Title IV can be enacted, and if we have faith to believe that Title IV means exactly what it says, and what its authors contemplated for it through that title. Through the operation of the economy section of the bill, we will accomplish all those things which are necessary to bring our Government within the revenue which it may expect to receive.

Now I want to say to my friend from New Mexico that I know the sacrifices he has made and the study he has given to these great problems. I can say the same thing for the Senator from South Carolina. No two men have devoted themselves more to this great question of economy than have they.

It does seem to me, however, that if we would concentrate upon Title IV of the pending bill, put all of our energies back of that, make that effective, and confer upon the President these great powers of reorganization, we would have gone then just as far as we should go at this particular time.

Mr. BRATTON. Mr. President, will the Senator yield?

Mr. COPELAND. I yield to the Senator from New Mexico.

Mr. BRATTON. If those economies could be achieved by the Chief Executive only through wholesale dismissals from the service, in what way would Government employees benefit under that system as compared with the Senator's concept of this provision?

Mr. COPELAND. I do not know; I can not answer. I do know what must happen if the amendment offered by the Senator from New Mexico shall be enacted. There can be no other effect than either a radical reduction in salaries or a dismissal of a large group of employees. This would be done without giving the Executive the opportunity to study the problems of Government to see whether or not, through one of those two methods, these economies can be effected or whether some other method is preferable.

We are going to give the President this power—I hope we are—if it is properly guarded. Then the President can exercise his judgment, taking all departments of the Government into consideration, and can effect needed economies. If it brings with it dismissals or if it brings with it lowered salaries, I suppose we shall have to accept them or whatever else comes. But it is certain that the adoption of this particular amendment could bring nothing else than dismissals or radical cuts in salaries.

Therefore, Mr. President, I wish that this matter might be left, and all of our energies placed upon Title IV. Then, if we fail in perfecting Title IV, if we fail in planning for the economies which the country demands and which the country must have, we may come back and by individual amendments to these appropriation bills, or by a general resolution covering them all, effect what the Senator has in mind.

For my part, however, I should prefer to have the Executive make this study, determine the matter for himself, and present his plans for a general reorganization of the Government. We can trust him; and then, of course, whatever the result is, we will have to accept it.

I thank the Senate.

Mr. NEELY. Mr. President, the unyielding opposition of the supporters of the Bratton amendment to a modification that would protect those whose salaries do not exceed $2,000 a year convinces me that the purpose of the amendment is to effect a further reduction in the compensation of the Government employees whose pay is in the "lower brackets." The proposal of the amendment marks the beginning of another general salary-slashing campaign.

Every additional decrease in salaries, whether by the Government or private industries will mean a further decrease in the purchasing and consumptive power of the people. Every decrease in purchasing power will necessarily mean a further decrease in the employment of those who satisfy the wants of the Nation.

In the existing crisis the Government should increase rather than decrease its expenditures for employment and wages regardless of the fact that it would be necessary to draw upon the prosperity of the future in order to meet the crying necessities of the hour.

The folly of attempting to restore prosperity by reducing the salaries or wages of the workers is similar to that of attempting to restore the strength of an exhausted man by shedding his lifeblood.

I shall vote against the amendment for reasons that are ably stated by Prof. Coleman B. Cheney, of Skidmore College, in an article in the World Tomorrow entitled "Unbalance the Budget." It is as follows:

[From the World Tomorrow, January 25, 1933]

UNBALANCE THE BUDGET

By Coleman B. Cheney

Government expenditures should not be reduced. Taxes should not be reduced. Government Budgets should not be balanced.

In these days of hectic budget making, few principles are more important or more unpopular than these three. But let us examine each in turn.

Aside from the fact that we can usually get more for our money by collective spending than by individual spending, expenditures by governments ought, during this time of depression, to be at least as large as, and in most cases even larger than, they have been heretofore. Whatever one may think about the merits of enlarged functions, and therefore finances, of governments in so-called normal times, such a period as this, at any rate, is one for expanding rather than contracting such expenditures.

It is easy, doubtless, when your personal income has been curtailed, and you are obliged to reduce your outlay, to accept the dictum that city, State, and National budgets should be reduced also. If you are getting only one-half as much as you did three years ago, it is likely to seem to you reasonable and just that your neighbor, who is employed by the State, should likewise receive a smaller amount than before. That sounds like justice. But justice really has little to do with the matter. The question is merely one of good sense. If we are honestly desirous of ending the depression, the only question is: Will Budget cutting help or hinder the recovery? The emphatic answer is that it will hinder. Since depression is a phenomenon characterized by the production of more goods than the people who want them are able to buy, recovery is possible only as goods are bought and consumed. The rate of recovery will be in direct proportion to the rate of spending. Decreased spending means delayed prosperity. Every cut in Government expenditures means more unemployment. Governments must spend to restore prosperity. It can safely be said that every depression in the past came to an end largely because of the expenditures by governments, since such spending is ordinarily not reduced as much as private spending. The more regular the total expenditures, public and private together, the less serious the depression. And with governments handling an ever larger proportion of the total purchasing power, the opportunity, and therefore the responsibility, of governments for stabilizing industry is correspondingly greater.

It must be understood, however, that this advocacy of maintaining Government expenditures refers to the total amount, not to specific items. Indeed, it would be wise to make changes in the apportionment by increasing those items which would add to the purchasing power of those now unemployed and reducing, if necessary, others which tend to add to savings. It may not be easy to apply this rule, but the rule itself is clear: We do not need more saving; we do need more consumption. To those who raise the question of how this could be done, it may be answered that spending money in those industries where a large part of the total goes directly to labor is likely to increase consumption more than would an equal amount of spending in industries where interest and rent take the larger share.

The demand for reduced Government spending rests chiefly on the desire for lower taxes. But so far as lower taxes result in reduced spending, they mean increased unemployment. The reduction of some taxes would result in increased savings by individuals at the expense of consumption through Government services, and so would delay the turn toward prosperity. And where it did not do that, where it merely transferred the spending from Government to individual, it would at best do nothing more than provide employment at one point while it provided unemployment at another. At worst, it would increase unemployment, because such shifts in the demand for goods are almost invariably accompanied, in an anarchistic economic order such as ours, by delays in the effective demand for labor. The law of supply and demand may be powerful, but it is also slow, and meanwhile men may starve. Taxes should not be reduced if reduction means less governmental spending.

But here, as before, and even more emphatically, the rule refers to totals, not to details. While maintaining total revenues, it is not necessary to keep each kind of tax exactly as it has been or to require each group of taxpayers to pay the same amounts as they have been paying. Intelligent zeal in fighting the depression would, in fact, result in lower taxes for those classes of people whose incomes would be spent even if their taxes were less, and in correspondingly higher taxes for those who normally save a considerable part of their incomes. Such a change would increase total consumption and decrease total saving.

A further suggestion, which may be somewhat less important from the social point of view but which is of very great importance to many individuals, is that a moratorium be declared on tax debts in the cases of the unemployed and others whose incomes are temporarily gone. This could apply only to direct taxes, of course (direct in the legal rather than the economic sense), and hence only to property taxes. Wherever such taxes would otherwise cause a forced sale of the property, a postponement of the payment would be not only reasonable but wise. The burden on the property owner in the case of a tax sale would, in almost every instance, be enormous, chiefly in the form of loss of property value—a loss which would be balanced by a gain not for the community as a whole but only for the individual who happened to be lucky enough to buy property at the artificially low price. Furthermore, the community would lose in a very positive way in every instance where the dispossessed citizen was left permanently in a semipauperized condition. Tax sales during depressions all too often have precisely that effect.

The myth about the prime importance of "balancing the Budget" is partly a hangover from the mental habits of pioneer days, when both personal and public expenditures usually had to be not more than the revenue; and partly a result of the political ballyhoo of a radio and syndicated-news era. The fact of the matter is that budgets are never balanced, though the surplus or deficit may be very small. But what is more important here is that they never should be balanced.

In an economic system in which there are recurring cycles of prosperity and depression it would be good sense to have public expenditures in excess of revenues during "hard times," and the opposite during "good times." In periods of war we do exactly that. We spend publicly far more than is received by the Treasury in revenue. In other words, we borrow during the war and pay back later. There are three objections which may be advanced against such a policy in time of war. It is a measure which allows the cost of the war to be placed on the small-income classes rather than on those with large incomes; it may have a bad psychological effect in making the cost of the war seem, at the time, to be less than it really is; and the borrowing process may raise prices.

But a similar program during a war on depression is quite a different matter. Surely it will not be inferred that this article advocates keeping the tax burden chiefly on the poorer classes; neither does a policy of alternating surplus and deficit necessarily carry that implication. The hysteria of war time is not a phenomenon of depression, nor is the cost of depression likely to be underestimated as a result of the policy.

The third objection becomes a point in favor of the policy in the case of depression. An increase in prices would be the result of the increased spending and so would be a positive encouragement to business to buy and to employ. It is precisely in this fact, and in the corresponding decrease in Government spending during prosperity (which is a part of the same policy) that the chief merit of the plan lies; it sets up a cycle of Government spending counter to that of individual and corporation spending.

There may appear to be a conflict between the two proposals of maintaining taxes and unbalancing budgets, for if taxes are not reduced it may seem unlikely that a deficit will occur. A moratorium on tax debts, as suggested, would, however, reduce revenues for certain cities and counties, and in those places a deficit would be the only alternative to the reduction of expenditures, unless higher taxes of the same sort were levied. This is not always either feasible or desirable, since such increases would tend to reduce individual purchasing power wherever it touched small-income people. It is worth repeating that if we want to check the depression we should raise the taxes which fall chiefly on high-income classes and lower those on small-income classes, in order to increase spending and consumption and to decrease saving. Since local governmental units are usually limited by charter or constitution to property taxes as their chief sources of income, it may be impossible, at least without long delay, to make the desired changes in revenue. Hence a deficit would be the proper means of keeping up expenditures. More important, however, is the use of the deficit to permit actual increases in expenditures during depressions—increases beyond the amount which can reasonably be met by current revenues. These increases would usually occur in construction programs for roads, bridges, housing projects, public buildings, etc.

Budgets would be much more intelligible if a distinction were made between what are known to accountants as "capital expenditures" and "revenue expenditures." In a well-managed private business this distinction is invariably made. It recognizes that certain items, such as the cost of a building which will last for many years, should not be charged entirely to the fiscal period in which the expenditure happens to occur, while payments for salaries and supplies should be so charged. In budgets which make this distinction deficits and surpluses would almost always be limited to the capital outlays. Borrowing during depression would be mostly for capital expenditures; surpluses during prosperity would be used to amortize those debts.

Whatever may be the plan that is finally adopted to turn the tide, it has little chance of succeeding unless it stops trying to defeat an underconsumption depression by reducing consumption still further, and unless it abandons the blind and false idea that annual budgets must be balanced.

Mr. CUTTING obtained the floor.

Mr. ODDIE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Mexico yield to the Senator from Nevada?

Mr. CUTTING. I yield to the Senator.

Mr. ODDIE. I desire to make a very brief statement, if the Senator will kindly yield.

I have recently received a letter from a man whom I consider not only an economist but one of the ablest and best-posted men in the country on industrial and human problems. I refer to William Green, the president of the American Federation of Labor.

Mr. CUTTING. I thought the Senator from Nevada wanted to make a request. I have very little time.

Mr. ODDIE. It will take me just one minute to quote from this letter, and then I will give up the floor.

Mr. William Green states:

> The Government will not be helped but thousands of workers will be injured through the imposition of further wage reductions. It is a false economy which calls for a lowering of the living standards of Government workers at a period when widespread human distress and intense misery prevails throughout the Nation. The need of the hour is to enlarge buying power, to increase commodity prices, to create a demand as well as to enlarge the market for manufactured goods and agricultural products. Obviously normal conditions can not be restored unless this purpose is realized and this result is accomplished.
>
> Three years of wage cutting have brought the country to the present point of human degradation and economic distress. It is inconceivable that we would add to this miserable situation through a reduction in buying power imposed upon Government employees, followed, as it inevitably will be, by a further reduction in the wages paid those engaged in private employment.
>
> * * * * * * * *
>
> Instead of forcing lower wage levels, let us fight to restore buying power, to build up the consuming market, to bring about a return of normal conditions through an increase in mass buying power.

Mr. President, I have advocated the same thing numbers of times on the floor of the Senate recently and reiterate it again now in opposing the amendment of the Senator from New Mexico. Mr. Green has put this question in a way that is much clearer and more forceful than I could put it. I indorse strongly what he has said.

Mr. CONNALLY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New Mexico yield to the Senator from Texas?

Mr. CUTTING. How much time have I left, Mr. President?

The PRESIDENT pro tempore. The Senator has 12 minutes remaining.

Mr. ODDIE. May the time I have used be taken out of my own time?

The PRESIDENT pro tempore. It may not.

Mr. CUTTING. I am sorry, Mr. President, that I have not time to yield further.

The speech of the Senator from West Virginia [Mr. NEELY] leads me to state the considerations which are going to actuate me in voting on these various economy suggestions.

It is generally recognized that while there are a great many causes of this depression, the main one is the disparity between consuming and producing power. Instead of balancing the Budget, what we should be trying to do is to balance the consuming power on the one hand with the productive power which has so excessively outgrown its possible usefulness to the country.

How does that apply to the economy bill?

In the first place, of course, I feel that we should vote for any economy that is proposed in a useless or an unjustifiable governmental activity. If, for instance, in the expenditures made by the Veterans' Administration it can be shown that there are veterans who are not entitled through any rule of justice to the compensation which they are receiving, let us cut them out. That, to my mind, is not a question of economy at all. That is a question of justice.

When we get beyond that, when we get purely to the question of economy, I shall vote in favor of cutting expenditures which go to increase producing power, and I shall vote against any cut which goes primarily to the purchasing or consuming power of the country.

Take, as one example, the cut which is causing so much controversy in the House—the cut on the Federal Trade Commission. The expenditures made by that commission, in my opinion, are invaluable to the consumers of the country, because they tend to save those consumers, as we have had reason to know in the last few years, untold millions in their personal expenditures.

As an example of the other kind, I take the average expenditure made during the last decade by the Department of Commerce, which has been principally engaged in trying to create a demand in foreign nations for things which those nations did not really require, and which they have had to give up, with disastrous effects to American industry, as soon as the depression hit them.

Talk about a 5 per cent or a 10 per cent reduction! I think an enormously greater reduction ought to be made in the Department of Commerce appropriations. The time has gone by when we can afford to spend the money of the taxpayers in trying to sell baby carriages to the tribes in Africa.

Which class of expenditure is affected by the so-called economy bill? In so far as we are trying to cut salaries, we are, in the first place, to that extent intensifying the depression, and, in the second place, we are setting a bad example to private industry all over the country. If it is right for the Government to cut wages, then it must be far more justifiable for a private industry to do so, because the private industry, no matter how powerful it may be, has not back of it the infinite resources possessed by the United States Government.

Mr. President, it may be difficult to apply that standard consistently to the various proposals which will come before this body. I am sure that when the record is made, my own votes may prove to be as inconsistent as those of anyone else, but I do think that is the standard we have to hold before us. Under any such criterion there can be no doubt as to our vote on the pending amendment of the Senator from Colorado.

I think the Government pay roll has already been cut far too much. I am inclined to agree with the article read by the Senator from West Virginia, where the argument is made that the Government should expand its activities, place more people on the pay roll, because of the very depression, which has led so many citizens of this country into a panic about the necessity for retrenchment. Whether that be so or not, certainly this is no time to cut down the wage scale and put upon such a cut the sanction of the Congress of the United States.

I hope, Mr. President, that the amendment of the Senator from Colorado will be adopted.

Mr. DICKINSON. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. DICKINSON. If it takes two days for us Republicans to get a chance to vote for a 5 per cent reduction to justify the Democratic side of the Senate, I would like to know how long it will be before we actually bring about the 25 per cent reduction promised in the Democratic platform.

The PRESIDENT pro tempore. The Chair has always been so poor in mathematics that he can not answer the question.

Mr. NORRIS. Mr. President, I want to make an inquiry, particularly of the senior Senator from New Mexico [Mr. BRATTON], and other Senators who may be behind the amendment providing for the 5 per cent cut. I made a few remarks yesterday in which I stated that I was in favor of the amendment. I wondered at the time why the amendment was offered to the particular part of the bill to which it was sought to be applied. It was perfectly apparent to me that the amendment was subject to a point of order. I did not understand why the Senator should not offer the amendment to the economy part of the bill, in which event it would not be subject to a point of order.

When the point of order was finally made against the amendment, and properly sustained by the Chair, an appeal was taken from the decision of the Chair; and I wondered then, more than ever, why, even though the Senators who were in favor of taking an appeal believed that the Chair was wrong, they did not acquiesce in the decision and offer the

amendment at a place in the bill where, without changing a word or a syllable, it would not have been subject to a point of order. I made the inquiry of some of the Senators, and suggested that we do not waste time in debating an appeal from a decision which, it seemed to me, was perfectly proper as made by the Chair; but the debate went on until we adjourned.

The Chair, in making his decision, went out of his way and beyond the real duty he owed as Presiding Officer to make a suggestion by which, in his judgment, the technicality which caused him to support the point of order could be avoided, and this morning when we convened I discovered again that those behind the amendment had withdrawn the appeal and followed the suggestion of the Chair, which, in my judgment, does not make it any more safe from a point of order than it was before—but that has no bearing now—and offered the amendment again on the theory that the point of order would be overruled if the amendment were offered to the part of the bill making the appropriation, when all the time there was an opportunity to offer it to a part of the bill which would have made it certain that a point of order would not lie against it.

We must remember that the amendment must be offered to every appropriation bill—and twice to the pending bill—if it is to become effective as to all of them; and why those responsible for it did not offer it in a place in the bill which would make it apply to all appropriation bills and have the matter settled at once at first seemed queer. But now, when we analyze the situation, we find that if the amendment were offered to the economy part of the bill so there would be no danger or question of a point of order it would apply to all appropriations, including the Army and the Navy appropriations; but the course followed by those behind the 5 per cent reduction makes it possible—and I think most everybody believes probable—that when we get to the Army and the Navy appropriations, while the same amendment may be offered, there will be no hope of carrying it.

Mr. President, to my mind that has thrown upon the question a great deal of light. Much as I favor this amendment because I believe it is necessary that we do something of this kind, I am not in favor of applying the amendment to one appropriation bill and not to another. I am not in favor of applying the pruning knife to all appropriation bills except the Army appropriation bill and the Navy appropriation bill and in those cases let the appropriations go unpruned.

I do not want to be understood as finding fault with the Senator from New Mexico or other Senators who think, as the Senator from Maine said, that we can not cut the Army and the Navy appropriations without danger.

Mr. LA FOLLETTE. Mr. President, will the Senator yield?

Mr. NORRIS. I yield.

Mr. LA FOLLETTE. May I recall to the Senator's mind the fact that when the 10 per cent reduction resolutions were in order at the last session of Congress, just the eventuality which the Senator has predicted concerning the pending amendment took place, namely, we sent back every appropriation bill for a 10 per cent cut excepting the Army and Navy appropriation bills, and then the Senators who had voted to cut every other appropriation bill 10 per cent refused to support motions to cut those two appropriation bills.

Mr. NORRIS. That is true, Mr. President. I myself called attention to that fact yesterday.

I want to go on record as being in favor of the same treatment of all these appropriation bills, and for one I am not willing to say, when we come to some particular appropriation bill, that we shall not cut it, that it is sacred, that we must not interfere with it. I realize, as I was about to say, that, like the Senator from Maine, there are other Senators, who are just as conscientious as I am, who think there is a place where we must not put the pruning knife. But, I believe that we must apply the pruning knife in the Army and Navy appropriation bills, the same as in every other one.

The great argument against this amendment—and it has a good deal of force in it, I confess—is that it would result in cutting down some salaries. I am not in favor of cutting down the salary of a clerk in the Department of Agriculture, and having a clerk in the War Department doing the same kind of work escape, and have no salary cut. They both ought to be treated alike, and I confess that I can but feel, since I have found what has been going on, and the way this amendment has been handled and is being handled, that those of us who believe that the pruning knife ought to apply to one appropriation bill as it applies to another are being led into a predicament, and are going to be let out, just as we were at the last session.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. NORRIS. I yield, but I hope the Senator will be brief, because I have but a few minutes.

Mr. McKELLAR. I think all the bills ought to be put on the same basis, of course, and that the amendment should apply to all the departments; but I want to correct one statement made by the Senator. Not all the Senators who applied the cut last year to the five departments were willing to apply it to the Army and the Navy.

Mr. NORRIS. Oh, no.

Mr. McKELLAR. There were two or three Senators, perhaps half a dozen, who voted for the motion referred to by the Senator from Wisconsin.

Mr. LA FOLLETTE. Mr. President, there were enough to make the difference between adopting the motion and its not being adopted.

Mr. McKELLAR. The Senator is exactly correct.

Mr. NORRIS. Mr. President, if we can not apply the economy rule properly and evenly, then I am not willing to have it applied at all. Let us not proceed in a way which, unless somewhere there is an adjustment or stopping place, will lead to ruin. I believe that these economies are necessary, not because under any ordinary circumstances I would like to cut the wages of this man or of that man, but because under the present conditions there are millions of people who are starving, who have no wages of any kind; and while it may or would be, in normal times, an injustice to cut the wage of somebody else who was not getting too much, under the conditions which exist it seems to me we are driven to some method by which we can curtail expenses.

Mr. BARKLEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from Kentucky?

Mr. NORRIS. In a moment I will yield. I am not unmindful of the argument made to-day so eloquently by the Senator from Montana [Mr. WHEELER], with which I sympathize almost 100 per cent, that the Congress has so far neglected to do anything, to do what to my mind and I believe what a majority of the Senate and of the House and of the country believe must be done, and that is to make the dollar less valuable than it is—to make it possible for those in debt to pay what they owe.

In my judgment this can be brought about by decreasing the value of the dollar by the necessary expansion by which the debts can be paid—not that I want to do it, not that I would like to do it, but I believe it is necessary for the very salvation and safety of our country and our civilization. We have to vote for a good many things that we do not like.

I yield now to the Senator from Kentucky.

Mr. BARKLEY. The Senator's time has nearly expired and I do not want to consume it.

Mr. NORRIS. Mr. President, how much time have I left?

The VICE PRESIDENT. The Senator has three minutes left.

Mr. BARKLEY. I am in sympathy with the principle announced by the Senator from Nebraska. While I do not recall how I voted, yet I think I am one of those who voted in the last Congress to make the 10 per cent cut apply to all departments.

Mr. NORRIS. I do not want to be understood as criticizing those who voted the other way. Different Senators have

different ideas. I do not question the honesty or good intention of any of them, but I have mine and I am not willing to curtail expenses everywhere until we get within sight of a battleship or a man dressed in a uniform covered with badges. [Laughter.]

Mr. BARKLEY. What I want to inquire about is this: Conditions are different to-day from what they were a year ago—at least we know more about conditions to-day. I think conditions are worse to-day than they were a year ago. I doubt whether we ought to anticipate what may take place on another bill.

Mr. NORRIS. But we must anticipate. We did not anticipate in the last Congress, and see where we have found ourselves. From the very facts which I have narrated, I believe we are traveling right into that same hole again and I am unwilling to go there.

Mr. BRATTON. Mr. President——

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from New Mexico?

Mr. NORRIS. I yield.

Mr. BRATTON. After the Senator made the suggestion yesterday and I stated I intended to offer a similar amendment to each appropriation bill as we came to it, I was very much impressed with the suggestion that we should offer a general provision applicable to all of the appropriation bills. Last evening I prepared such an amendment, which would be section 20 and would appear on page 82, at line 21, and be a part of the economy section. Since we have debated the matter at length, if unanimous consent could be given to vote upon it now instead of upon the amendments which I have offered, I will offer it now and propose a unanimous-consent agreement that we vote upon it.

Mr. WALSH of Massachusetts. Mr. President, will the Senator read it?

Mr. NORRIS. I suppose my time has expired and I have no time left.

Mr. BRATTON. I have been requested to read the amendment.

Mr. NORRIS. It has not yet been printed?

Mr. BRATTON. No; it is a new amendment.

Mr. NORRIS. Very well; I yield the floor.

The VICE PRESIDENT. The question is on the amendment of the Senator from Colorado [Mr. COSTIGAN] to the amendment of the Senator from New Mexico.

Mr. BORAH. Mr. President, I would like the Senator from New Mexico in my time to read his amendment.

Mr. BRATTON. I am glad to do so. It would be section 20, appearing on page 82, line 21, a part of the economy section, reading as follows:

SEC. —. The head of each executive department and independent establishment is authorized and directed to make such reductions in the expenditures from the appropriations made by the regular annual appropriation act for the several purposes of his department or establishment for the fiscal year ending June 30, 1934 (except, in the case of the Treasury Department, appropriations for acquisition of sites for and construction of public buildings and the appropriation for addition to the cumulative sinking fund pursuant to section 308 of the emergency relief and construction act of 1932), as will in the aggregate equal at least 5 per cent of the total amount so appropriated for his department or establishment for such year (excluding, in the case of the Treasury Department, the appropriations specified above).

It is general in language and would operate on each department as my pending amendment would operate on the two departments involved.

Mr. BORAH. Will the Senator ask unanimous consent as he suggested a moment ago?

Mr. BRATTON. I ask unanimous consent to offer this amendment at this time and that we may vote upon it immediately.

The VICE PRESIDENT. Is there objection to the request of the Senator from New Mexico?

Mr. HALE. I object.

Mr. BINGHAM. Mr. President, I hope the Senator will not press the amendment immediately.

Mr. NORRIS. The Senator submitted his request. We ought to have the discussion and the debate continue if necessary.

Mr. BRATTON. Mr. President, may I submit this unanimous-consent request? I offer the amendment now and ask that it become the pending amendment.

Mr. WALSH of Massachusetts. Mr. President, will the Senator from Idaho yield for a question?

Mr. BORAH. I yield.

Mr. WALSH of Massachusetts. I hope the Senator from Maine will save time. It means we are going to have the same amendment offered to 10 different bills unless this plan is followed. We can dispose of it now in one vote.

Mr. HALE. I would like to have a vote on the other amendment first.

Mr. BRATTON. Mr. President, I ask that this become the pending amendment and then it can be debated.

Mr. BORAH. Mr. President, as I understand it the Senator from New Mexico now offers this amendment to the economy section of the bill and it becomes the pending question?

The VICE PRESIDENT. It would not be in order at this time except by unanimous consent.

Mr. BRATTON. It would not be in order without unanimous consent, because under the unanimous-consent agreement previously entered into the economy section does not come before the Senate until we have disposed of the other parts of the bill.

M. BORAH. Then I presume the Senator will withdraw his amendment now and offer it later?

Mr. BRATTON. I can, except that we would have to debate it again, and in the interest of saving time I offered it now and asked that it might become the pending question. I renew my request.

The VICE PRESIDENT. Is there objection?

Mr. COSTIGAN. Mr. President, reserving the right to object, I merely rise to ask, if this is to become the pending amendment, that the amendment which I have offered to the previous amendment of the Senator from New Mexico shall be considered as offered to this amendment.

The VICE PRESIDENT. The Senator's amendment would be in order then.

Mr. BORAH. Mr. President, I wish to ask the Senator from Colorado [Mr. COSTIGAN] a question. The effect of the Senator's amendment is to preclude the cutting of any wages?

Mr. COSTIGAN. Yes; and of any furloughs.

Mr. BORAH. Can the Senator advise me what would be the amount of the exemption? Are there any wages running over $2,000 a year?

Mr. COSTIGAN. I am without the precise information. It is my understanding that it has been calculated by certain employees of the Post Office Department that the reduction will aggregate about 7 per cent of wages, such as they are.

Mr. BORAH. When the Senator says "wages" I understand he does not include salaries.

Mr. COSTIGAN. I assume the Senator does, but not the salaries of heads of governmental departments.

Mr. BORAH. The Senator uses the term "wages," and I am somewhat at a loss to know what distinction he makes between wages and salaries.

Mr. COSTIGAN. My recollection is that the language was taken, though I may be in error about it, from the language of the amendment of the Senator from New Mexico [Mr. BRATTON]. It was meant to conform to the language employed by him in his amendment.

Mr. BORAH. Would not the Senator be willing to change his amendment so as to provide that there should not be a cut below a certain amount in wages and salaries?

Mr. COSTIGAN. May I say to the able Senator from Idaho that that attempt was made yesterday with respect to salaries of $2,000 or less, and the proposed amendment was voted down by the Senate. I voted for the amendment which was offered by the Senator from West Virginia [Mr. NEELY]. I shall, of course, be very glad to have such an amendment again offered.

Mr. BINGHAM. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. BINGHAM. Has the Senator from New Mexico secured his unanimous-consent agreement yet?

The VICE PRESIDENT. He has not. The request was submitted, and the Senator from Maine [Mr. HALE] objected.

Mr. BINGHAM. I do not desire to be recognized until that becomes the pending question.

Mr. GEORGE. Mr. President, I would like to ask the Senator from New Mexico a question.

The VICE PRESIDENT. The Senator from New Mexico will give his attention.

Mr. GEORGE. Am I to understand that the unanimous-consent agreement requested is to enable the Senator from New Mexico to offer the amendment to the economy section of the bill in order that, if a reduction shall be made anywhere, a like reduction shall be made in each and every department of the Government?

Mr. BRATTON. Yes.

Mr. GEORGE. I earnestly hope the Senator may get his unanimous consent, because I would find myself wholly unable to vote for a flat reduction of 5 per cent in the case of the Treasury and Post Office Departments when next week the Senate may have changed its mind and may refuse to vote a flat reduction of 5 per cent for the Department of the Interior, for instance, and we would have perhaps a reduction in the wages of employees doing precisely the same kind of work with an inequality in pay.

Mr. BRATTON. I am in full accord with the suggestion of the Senator from Georgia. If the thought had occurred to me at the outset, I would have adopted that policy. We have now debated the matter for a day and a half. If this can become the pending question, we will expedite a vote on it.

The VICE PRESIDENT. Is there objection to the request of the Senator from New Mexico?

Mr. HALE. I object.

Mr. WALSH of Massachusetts. Regular order!

Mr. KING. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator from Utah will state it.

Mr. KING. May not the Senator from Utah withdraw the pending amendment and all ancillary amendments thereto, and offer the amendment which has just been submitted?

The VICE PRESIDENT. That amendment is not in order at this time, because the economy section of the bill has not been reached. By unanimous consent, amendments to the first provision of the bill are to be disposed of first. Then amendments to the economy section are to be in order. The amendment submitted by the Senator from New Mexico is not in order for the time being. The Senator may, of course, withdraw his amendment, and when the other part of the bill is reached the new amendment would be in order.

The question is on agreeing to the amendment of the Senator from Colorado to the amendment of the Senator from New Mexico.

Mr. BINGHAM. Mr. President, I desire to ask the Senator from New Mexico [Mr. BRATTON] a question in regard to the amendment which is pending or, rather, his own amendment to which the amendment of the Senator from Colorado is pending. Would it require the Secretary of the Treasury to take from his appropriation a 5 per cent reduction in the amount appropriated under the permanent regular appropriation for interest on the public debt?

Mr. BRATTON. No.

Mr. BINGHAM. The way I understood the Senator when he read the amendment which was just proposed, it sounded to me as though all appropriations for the Treasury Department except those for buildings would come under the 5 per cent provision. Since there is nearly $800,000,000 appropriated, but not in the bill, for the Treasury Department for interest on the public debt, would not that make it extremely difficult, unless that was exempted as well, for the Secretary of the Treasury to get a 5 per cent reduction in the total amount spent by his department?

Mr. BRATTON. I think it would not operate, because that is not a regular appropriation. It is a permanent annual, and this provision would not attach to a fixed item of that kind.

Mr. BINGHAM. If the Senator is sure of that, that answers my question.

The VICE PRESIDENT. The question is on the amendment of the Senator from Colorado.

Mr. SHIPSTEAD. Mr. President, I should like to ask the Senator from Colorado a question.

Mr. COSTIGAN. Certainly.

Mr. SHIPSTEAD. His amendment provides that no further cut shall be made under the provisions of the amendment of the Senator from New Mexico, which is in addition to what has already been provided for in the way of a cut in the legislation enacted last year.

Mr. COSTIGAN. There is an addition to the language accepted by me and added to my amendment, which the Senator from Michigan [Mr. VANDENBERG] has suggested, namely, "or otherwise provided in this act." In other words, it is the theory of some of us that if we are to make salary and wage reductions Congress should assume that responsibility and should affirmatively and definitely specify the amount.

Mr. SHIPSTEAD. Then I have not the full text of the amendment before me.

Mr. COSTIGAN. Apparently not.

Mr. SHIPSTEAD. Can the Senator tell us where we can make any saving except in Government wages? We have been told that contracts must not be violated, that they involve the sacred right of capital and must not be touched. Where else can we make savings except by cutting wages?

Mr. COSTIGAN. Presumably there are departmental extravagances in the purchase and use of materials and in the duplication of departmental work and in other known directions. The sound method, of course, for Congress to pursue would be to make a thorough investigation of the departments, and, following a report, direct its legislation to economies clearly indicated by such an investigation.

I should also say to the Senator from Minnesota that there is no provision in my amendment with respect to dismissals or discharges from the service, because it is obvious that the prevailing sentiment of the Senate will not tolerate at this time the inclusion of a bar on dismissals or discharges. Words eliminating that sort of official action were deliberately omitted from the amendment. It will therefore be possible for the incoming administration to make certain consolidations, incidental to which—though I, for one, shall regret discriminatory possibilities flowing from them—discharges may be made.

Mr. SHIPSTEAD. Mr. President, we cut wages last year, and then we appropriated $500,000,000 for the Reconstruction Finance Corporation to loan to companies which are so heavily in debt that they can not pay their interest. So we loaned money that we took from Government employees last year to pay the wages of capital invested in railroad bonds in order that capital might have its full wage. Shall we now cut wages further so that capital may have its wage level maintained by taking the money out of the pockets of Government employees, as we have taken it out of the working man who now walks the streets and as we have taken it out of the farmer by deflating him? If the Senate shall now continue to take money out of the wage earners in order that we may have more money to give to the Reconstruction Finance Corporation with which to pay the interest on the bonds of the railroad companies so that capital shall have its wage; if we shall continue that program, I simply want to say that the Senate keeps orthodox as usual.

Mr. COSTIGAN. The Senator is undoubtedly right, and I agree with every word he has said.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Colorado [Mr. COSTIGAN] to the amendment proposed by the Senator from New Mexico [Mr. BRATTON].

Mr. VANDENBERG. Mr. President, I should like to ask the Senator from New Mexico a question. Do I understand it is the intention of the Senator from New Mexico to offer

this general amendment to the sections of the economy bill regardless of what happens to the pending amendment on the Treasury and Post Office appropriation bill?

Mr. BRATTON. That is my purpose.

Mr. VANDENBERG. Then I suggest to the Senator from Maine that we will be bound to save time if the unanimous-consent agreement requested by the Senator from New Mexico shall be entered into because all he is asking to do is to substitute the general question for the special question; and inevitably the debate will be less if that can be done now instead of having to be entirely resumed de novo three or four days hence.

Mr. BRATTON. Mr. President, that is exactly what I had in mind.

Mr. ASHURST. Mr. President, that is the first faux pas, the first lapsus linguæ, I ever heard the able Senator from Michigan make in the Senate. He said that in a certain contingency there would be "less debate." Mr. President, there are no conceivable circumstances under which, in the Senate, there would be less debate.

Mr. VANDENBERG. Mr. President, everything is relative in this world, and I still suspect that there would be less debate if we should proceed according to the formula now suggested by the Senator.

The VICE PRESIDENT. The Senator from Maine is not present, and he has objected.

Mr. JOHNSON. Mr. President, I call for the regular order.

The VICE PRESIDENT. The regular order is demanded. The question is on the amendment offered by the Senator from Colorado [Mr. COSTIGAN] to the amendment proposed by the Senator from New Mexico [Mr. BRATTON].

Mr. COSTIGAN. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Couzens	Kean	Schall
Austin	Cutting	Kendrick	Schuyler
Bankhead	Dale	Keyes	Sheppard
Barbour	Davis	King	Shipstead
Barkley	Dickinson	La Follette	Smith
Bingham	Dill	Lewis	Steiwer
Black	Fletcher	McGill	Swanson
Blaine	Frazier	McKellar	Townsend
Borah	George	McNary	Trammell
Bratton	Glenn	Metcalf	Tydings
Brookhart	Goldsborough	Moses	Vandenberg
Bulkley	Gore	Neely	Wagner
Bulow	Grammer	Norris	Walsh, Mass.
Byrnes	Hale	Nye	Walsh, Mont.
Capper	Harrison	Oddie	Watson
Caraway	Hastings	Reed	Wheeler
Connally	Hatfield	Reynolds	White
Coolidge	Hayden	Robinson, Ark.	
Copeland	Hebert	Robinson, Ind.	
Costigan	Johnson	Russell.	

The VICE PRESIDENT. Seventy-seven Senators have answered to their names. A quorum is present.

The question is on the amendment offered by the Senator from Colorado [Mr. COSTIGAN] to the amendment proposed by the Senator from New Mexico [Mr. BRATTON].

Mr. COSTIGAN. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. BINGHAM. Let the amendment be reported.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. At the end of the amendment proposed by the Senator from New Mexico the Senator from Colorado proposes to insert the following:

Provided further, That in making such reductions in expenditures no wage cuts or furloughs other than those heretofore in effect or in this act provided shall be ordered.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Colorado [Mr. COSTIGAN] to the amendment proposed by the Senator from New Mexico [Mr. BRATTON], on which the yeas and nays have been ordered. The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. MOSES (when his name was called). I have a general pair with the senior Senator from Louisiana [Mr. BROUSSARD]. I find that I can transfer that pair to the junior Senator from Idaho [Mr. THOMAS], which I do, and vote "nay."

Mr. SHIPSTEAD (when his name was called). I have a general pair with the senior Senator from Ohio [Mr. FESS]. Not knowing how he would vote, I withhold my vote. If permitted to vote, I should vote "yea."

Mr. SWANSON (when his name was called). I inquire if the senior Senator from Illinois [Mr. GLENN] has voted?

The VICE PRESIDENT. That Senator has not voted.

Mr. SWANSON. I have a general pair with that Senator. Not knowing how he would vote, I withhold my vote.

Mr. WAGNER (when his name was called). On this vote I am paired with the junior Senator from Missouri [Mr. PATTERSON]. I find that I may transfer that pair to the junior Senator from Illinois [Mr. LEWIS]. I make that transfer, and vote "yea."

The roll call was concluded.

Mr. HEBERT (after having voted in the affirmative). I have a general pair with the senior Senator from North Carolina [Mr. BAILEY], and therefore ask to withdraw my vote.

Mr. ROBINSON of Indiana. I have a general pair with the junior Senator from Mississippi [Mr. STEPHENS]. In his absence, not knowing how he would vote if present, I withhold my vote. If permitted to vote, I should vote "yea."

Mr. BINGHAM (after having voted in the negative). I have a general pair with the junior Senator from Virginia [Mr. GLASS]. In his absence, and being unable to obtain a transfer, I withdraw my vote.

I desire at this time to announce that my colleague the junior Senator from Connecticut [Mr. WALCOTT] is necessarily absent. If present, he would vote "nay."

Mr. GLENN. I inquire if the senior Senator from Virginia [Mr. SWANSON] has voted?

The VICE PRESIDENT. That Senator has not voted.

Mr. GLENN. I have a general pair with that Senator, and therefore withhold my vote.

Mr. BRATTON (after having voted in the negative). I transfer my pair with the Senator from Nebraska [Mr. HOWELL] to the Senator from Tennessee [Mr. HULL], and will allow my vote to stand.

Mr. NORRIS. I desire to announce that my colleague [Mr. HOWELL] is absent on official business of the Senate. I ask that this announcement may stand for the day.

Mr. McNARY. I desire to announce the following general pairs:

The Senator from South Dakota [Mr. NORBECK] with the Senator from Nevada [Mr. PITTMAN];

The Senator from Connecticut [Mr. WALCOTT] with the Senator from Missouri [Mr. HAWES];

The Senator from Wyoming [Mr. CAREY] with the Senator from Louisiana [Mr. LONG]; and

The Senator from California [Mr. SHORTRIDGE] with the Senator from Oklahoma [Mr. THOMAS].

Mr. SHEPPARD. I desire to announce that the Senator from Nevada [Mr. PITTMAN], the Senator from Missouri [Mr. HAWES], the Senator from Virginia [Mr. GLASS], the Senator from Louisiana [Mr. BROUSSARD], and the Senator from Oklahoma [Mr. THOMAS] are detained on official business.

I am not informed as to how these Senators would vote.

The result was announced—yeas 42, nays 29, as follows:

YEAS—42

Ashurst	Couzens	Kean	Russell
Barbour	Cutting	Keyes	Schall
Black	Dale	La Follette	Schuyler
Blaine	Davis	McGill	Smith
Borah	Dickinson	McNary	Steiwer
Brookhart	Dill	Metcalf	Wagner
Bulow	Frazier	Neely	Walsh, Mont.
Capper	George	Nye	Wheeler
Caraway	Hatfield	Oddie	White
Copeland	Hayden	Reed	
Costigan	Johnson	Reynolds	

NAYS—29

Austin	Byrnes	Gore	Kendrick
Bankhead	Connally	Grammer	King
Barkley	Coolidge	Hale	Logan
Bratton	Fletcher	Harrison	McKellar
Bulkley	Goldsborough	Hastings	Moses

Norris	Townsend	Tydings	Walsh, Mass.
Robinson, Ark.	Trammell	Vandenberg	Watson
Sheppard			

NOT VOTING—25

Bailey	Hawes	Patterson	Swanson
Bingham	Hebert	Pittman	Thomas, Idaho
Broussard	Howell	Robinson, Ind.	Thomas, Okla.
Carey	Hull	Shipstead	Walcott
Fess	Lewis	Shortridge	
Glass	Long	Smoot	
Glenn	Norbeck	Stephens	

So, Mr. COSTIGAN'S amendment to Mr. BRATTON'S amendment was agreed to.

The VICE PRESIDENT. The question now is upon the amendment of the Senator from New Mexico, as amended.

Mr. TRAMMELL. Mr. President, I wish to oppose the amendment in its present form.

I am favorable to and stand for a reduction of not only 5 per cent in expenditures but a greater percentage of reduction; but if the amendment as amended now should be placed upon the statute books, it would be a legislative expression favorable to having no salary reductions whatever. In my opinion, those who administer the different departments should have some latitude in the matter of salary reductions; and I do not want to bar them from necessary and just salary reductions.

Heretofore, throughout our entire system of government, the department heads have possessed the authority to increase salaries, and we have never seen fit to restrict or withdraw their prerogative to increase salaries. For all time Congress has seemed to think that that latitude and that liberty to them was proper as far as the matter of increasing salaries was concerned. Now it is the expressed will of this body, at least by a majority, that they shall possess no authority whatever to reduce salaries. Why give Government officers the authority to raise salaries, and expressly provide, as does the amendment just adopted, that no salary shall be reduced?

The two positions, I think, are inconsistent. Are we going to permit these officials still to have the privilege of increasing salaries and withhold from them and expressly provide that they shall have no authority to reduce salaries? That is what this amendment means in its present form. I want to vote for a reduction of 5 per cent or more in expenditures in the departments, but do not want to vote a protection against reasonable salary reductions.

Mr. President, if those who have the administration of the law or the control of salaries with regard to the Fleet Corporation, for instance, should desire to reduce some of these salaries, I wonder if they would be deprived of that privilege under the amendment which we now have pending before us in its present form.

As an illustration, let us take the salaries that are being paid to a number of the employees of the Fleet Corporation.

First, the executive assistant to the president receives $7,500 per annum. If it is deemed proper to reduce that salary, would this amendment in its present form be an inhibition against its reduction? Certainly it would.

Second, we find that the treasurer of that Government agency receives $10,000 per annum. If there should be an effort to reduce his salary, would the officials be barred by the amendment which is pending from reducing that salary? And do the Senators who have supported this inhibition think that there should be no reduction in either that $7,500 salary or that $10,000 salary?

The general comptroller of the Fleet Corporation receives $9,000 a year. The assistant general comptroller receives $4,800 a year. The general counsel receives $12,000; the assistant general counsel, $7,000; the director of insurance, $10,000; the fiscal director of insurance, $8,500; another assistant director of insurance, $6,000 per annum; and a general assistant, $6,500; technical assistant, $6,000; executive assistant, $6,000; and then we come down again into the list of attorneys. One attorney receives $10,000 a year, another one $8,000, another one $7,500, another one $5,400, and so on. There are a large number of positions under the Fleet Corporation with salaries all the way from $6,000 up to $12,000 per annum.

I am not willing to go on record and have it as the affirmative expressed will of Congress that there shall be no reduction in these salaries; and I think that is the unquestionable meaning of the amendment in its present form.

As to the smaller salaries, those who are making only what we might call a living wage, personally, I would not have a reduction in those; but I am not going to lend myself as an agent for protection against reduction of these large salaries and thousands of other high salaries at the present time. As a matter of fact, in most instances these salaries have been placed at their present figures as a matter of favoritism, and not as a matter of the efficient administration of government or as a proper compensation to those filling these positions. That favoritism has run throughout these departments; and the existing policy and the law allow certain officials to provide for promotions and the increase of salaries, and they have exercised that privilege without restriction or limitation heretofore. Now, forsooth, a majority at least of the Senate say that these officials shall not have any authority to reduce salaries—even these large and unreasonable salaries—at the present time, but shall be continued in their authority to raise Government pay.

I hope the amendment in its present form will be defeated, although I have voted for every measure to reduce Government expenditures and want to see legislation to make further reductions of 5 per cent or more in all departments.

Mr. TYDINGS. Mr. President, referring to the amendment that was just adopted, offered by the Senator from Colorado [Mr. COSTIGAN], as I interpret the amendment no employee of the Government now whose services are not required can be furloughed. Is that correct?

Mr. COSTIGAN. Under the amendment as adopted there would be no other furloughs and no other wage reductions than those heretofore made or provided in the act. In other words, Congress must assume the responsibility for any definite provision of that sort.

Mr. TYDINGS. Well, Mr. President, of all the hypocrisy I have ever seen in my life, this amendment, in my judgment, is the prize example.

Mr. DILL. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Maryland yield to the Senator from Washington?

Mr. TYDINGS. Yes.

Mr. DILL. I desire to call the attention of the Senator to the fact that there is nothing in this amendment that changes the law on furloughs. The law on furloughs is just the same as it was.

Mr. TYDINGS. Yes; but under the law a Government employee can be furloughed for 30 days only, as I understand.

Mr. DILL. Oh, the Senator knows that that is not what is being done. They are being furloughed for two or three months, and that can still be done under this amendment.

Mr. TYDINGS. Very well. Under this amendment, if I read it correctly, no further furloughs than those heretofore in effect shall be ordered.

Mr. DILL. By law.

Mr. COSTIGAN. The Senator has not the full amendment before him. Whatever language he is reading is qualified by the preceding language, which reads, in effect:

In making such reductions in expenditures—

That is, it is limited to the 5 per cent or more of reductions in expenditures.

Mr. TYDINGS. As I understand this amendment—and I still adhere to my original thought about it—even though there was an employee of the Government whose services were not required, that employee hereafter could not be let out of the service.

Mr. WHEELER. Oh, yes; he could.

Mr. TYDINGS. That is the way the amendment reads.

Mr. WHEELER. No; it says he can be dismissed. They can dismiss anybody whose services are not wanted.

Mr. TYDINGS. That is just what I am arguing. Here is a man who is in the service. Perhaps he has been in the service 10 years. The head of the department can dismiss him and destroy his civil-service status instead of furloughing him and letting him keep his civil-service status.

Mr. WHEELER. Mr. President——

The VICE PRESIDENT. Does the Senator from Maryland yield further?

Mr. TYDINGS. I yield.

Mr. WHEELER. The Senator misunderstands. The amendment does not change the furlough law at the present time one iota—not one iota. Just exactly what is done now can be done under this amendment, and it does not change the furlough law.

Mr. BRATTON. Mr. President——

The VICE PRESIDENT. Does the Senator from Maryland yield to the Senator from New Mexico?

Mr. TYDINGS. I yield.

Mr. BRATTON. I think the Senator from Montana and the Senator from Colorado have misconceived the force of the amendment. A Cabinet officer might say to an employee, "Under this amendment I am obliged to curtail 5 per cent, but I can not impose an additional administrative furlough in order to do it. Therefore I am obliged to dismiss you." That would be the effect of it.

Mr. TYDINGS. That is exactly what I said.

Mr. BRATTON. Instead of leaving the head of a department free to keep the employee and impose additional furloughs to effect the 5 per cent reduction, under the iron hand of the amendment just adopted, the employee must be dismissed and not furloughed. If it is better to dismiss and eliminate the employees from the pay roll than it is to furlough, well and good, we have accomplished that.

Mr. TYDINGS. The Senator has stated the contention which I am making. Now, I ask the Senator from South Carolina if he will confirm or deny what the Senator from New Mexico has just stated?

Mr. BYRNES. Mr. President, I agree entirely that as to the 5 per cent, under the amendment, it can not be arrived at except by absolutely dismissing an employee from the service.

Mr. TYDINGS. That is correct.

Mr. COSTIGAN. Mr. President——

Mr. TYDINGS. I have only a few minutes more.

Mr. COSTIGAN. May I add one word?

Mr. TYDINGS. I yield.

Mr. COSTIGAN. Under the "iron" language of the Senator from New Mexico, dismissals, furloughs, and wage reductions might one and all have been instituted to achieve reductions in expenditures. To my great regret it was necessary, in order to secure the adoption of the amendment, to omit dismissals in specifying exceptions.

Mr. TYDINGS. What we have really done has been to adopt language which would force the head of a department who wants to cut down expenses to dismiss permanently an employee from the roll.

Mr. NORRIS. Mr. President, will the Senator yield to me?

Mr. TYDINGS. I yield.

Mr. NORRIS. I want to ask the Senator, first, this question: Suppose in one of the departments some one's salary is $12,000 a year, such a salary as we have just heard described by the Senator from Florida. The amendment as it now stands, as I understand it, would make it impossible for such a salary to be reduced to, say, $10,000.

Mr. TYDINGS. That is correct.

Mr. NORRIS. And the salaries of none of those receiving $10,000 could be reduced as we have reduced our own salaries.

Mr. TYDINGS. That is correct.

Mr. NORRIS. So the effect of the amendment, if agreed to as it now stands, would be to prevent the reduction of any salary, no matter how large it might be.

Mr. TYDINGS. I think the Senator is substantially correct.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. TYDINGS. I can not yield any further because my time is almost up.

Senators have been standing on this floor pleading with tears in their eyes for Government employees, and have left the alternative open to the head of a department to dismiss a person, to destroy his or her civil-service status for all time, rather than furlough the employee.

The day may come, when there is a pick-up in the business of the country, when some of these employees who now, by the force of circumstances, must be severed from the pay roll, will be required again in the normal activities of the Government. If they have been dismissed from the service, they will certainly not have as good a status as if they had been furloughed from the service.

More than that, the amendment would practically nullify in many respects what savings we hope to secure under the Bratton amendment, because we would compel the head of a department to curtail expenditures 5 per cent, and then throw barriers in his way and stop him from carrying out the expressed will of Congress.

Mr. BARKLEY. Mr. President, will the Senator yield to me a moment?

Mr. TYDINGS. Mr. President, how much time have I left?

The VICE PRESIDENT. The Senator has six minutes.

Mr. TYDINGS. I yield to the Senator from Kentucky.

Mr. BARKLEY. I wanted to call the Senator's attention to the fact that this prohibition in the so-called Costigan amendment would apply not only to furloughs but to reductions.

Mr. TYDINGS. Of course.

Mr. BARKLEY. The head of a department might find himself confronted with a situation where he either had to reduce somebody's salary or dismiss him.

Mr. TYDINGS. That is correct.

Mr. BARKLEY. And rather than make it possible for him to reduce 5 per cent, we would compel him, under the amendment, to dismiss the employee.

Mr. TYDINGS. Of course.

Mr. BARKLEY. So that it would not only prevent furloughs but it would prevent reductions, it would prevent keeping men and women on the pay roll with a 5 per cent reduction rather than dismissal.

Mr. TYDINGS. I have no doubt in the world but that the Senator from Colorado meant this amendment as a humane thing; I concede to him that impulse and thought. But in my humble judgment the Senator will find that the big-salaried official would have little or no reduction, but because of the enforced economy carried in the preamble of the amendment the smaller-salaried employee would be forced out of his or her position.

Mr. COSTIGAN. Mr. President, will the Senator yield?

Mr. TYDINGS. I yield.

Mr. COSTIGAN. If the Senator from Maryland had been present during the discussion of the amendment, he would have discovered that it proceeded on the assumption that the Senate was not parting with its power or responsibility to legislate. The amendment presupposes the intention on the part of the Congress to make such wage cuts as it desires, and not to leave those cuts to the arbitrary action of the heads of departments.

Mr. TYDINGS. As I said a moment ago, I do not question the intention of the Senator from Colorado. I think I understand what he sought to arrive at, and, to a certain extent, I sympathize with his position. But may I say that he is not going to accomplish, in the working out of the amendment, the thought which he has in mind. He is actuated primarily by a desire to take care of the small-salaried employees. Under the amendment the head of a department could only cut the large-salaried employees 5 per cent, and therefore, forced to make a saving, the smaller salaried employee would have to be dismissed without even the benefit of clergy.

I do not think this amendment represents what the Senate wants to do. I voted in the negative, and, therefore, am in no position to move for a reconsideration of the vote. If I were, I should do so. But I hope that somebody will move for reconsideration of the vote by which the amendment was agreed to, so that it may be reconsidered, and, if it must be adopted, let us protect the people who I think were sought to be protected by the amendment.

Finally, I can not resist carrying on just a little bit of an echo from two or three days ago. My good friend, the Senator from Delaware [Mr. HASTINGS], said that the withdrawal of my amendment was wishy washy, and I am wondering whether he is going to show the antithesis of his own observation and demonstrate that he himself, in matters of economy, exhibits a little more rigidity than a jelly fish when he votes upon such measures as those now before us.

Mr. NORRIS. Mr. President, I was laboring under the belief, when I gave up the floor on the prior amendment, that the pending amendment was going to be withdrawn in order that we might take it up in connection with the economy provision of the bill. It seems that that is not going to be possible.

Mr. BRATTON. Mr. President, we have spent two days in debating the amendment already, and I prefer to go ahead and have a vote on it. I intend to offer to the economy section of the bill, when we reach that, the amendment I read a while ago.

Mr. NORRIS. I am not questioning the good intentions of the Senator, but if this amendment is once agreed to and put on the bill, then one of the principal incentives for voting for the amendment, when we come to the place where it would apply to everything, will have disappeared. Senators will say, " we have already adopted the amendment, and what is the use of putting it into the bill again? "

It seems to me, Mr. President, that it is perfectly plain, whether we intended it or not, that the Senate is now left in this predicament, that by this kind of an amendment we will reduce expenses in every department except in the War and Navy Departments, and those two departments are going to be exempt from the operation of this kind of a provision.

I give it as my prophecy that if we agree to the two amendments on the appropriation for the two departments which are combined in this one bill, there will be no possibility of inserting it where it ought to go in order to apply to the Army and the Navy appropriation bills, and that when we come to those bills, it will be said, " Hands off."

A year ago, when we had the Army appropriation bill before us, there was considerable debate over an appropriation which, as I remember it, amounted to from five to seven million dollars, it was in the millions, anyway, for the purpose of enabling the department to hold schools all over the country under the jurisdiction of the Army. Some of the Senators tried to keep that item out, but they were unsuccessful. As I understand it, the House committee this year struck that item out of the bill, but it has been put back into the bill on the floor of the House, and in all probability the bill will come before the Senate with that provision in it.

I said last year, and I say now, that against these schools under any ordinary conditions I have no objection. Young men from all over the country go into the schools, which are held at different places. The expenses of their board and lodging are met by the Federal Government. It may be a very fine thing for those young men, it may be of benefit to them, it is a little schooling, paid for by the taxpayers of the United States, and the schools administered by the Army, and, as I showed last year, according to the official pamphlet used in the instruction of these young men they are taught things which we would without question, I believe, unanimously condemn.

They are taught, for instance, that the municipal ownership of public utilities indicates a socialistic trend which under all circumstances must always be condemned. There is an attempt to inculcate into the minds of those young men ideas along the line of standpattism against every progressive idea in government. That is going to be in the bill when it comes before us, and if we do not insert this amendment in the right place, it will stay in, on the theory that we must keep our hands off the Army and the Navy.

Mr. President, we could save enough in the military appropriations to account for the reduction provided for in the pending amendment if we cut out of the bill such items as that which I have just mentioned. I am told by a member of this body that in the bill as it is now $7,500 is provided, as I remember the amount, for the purpose of buying badges. We want to decorate somebody. I have no objection to decorations under ordinary circumstances. When we had the war against the bonus army in the city of Washington, we had to have decorations. It was the most modern war ever fought, because when the army got half way to the place where the moving-picture photographers were ready to take pictures of its action in battle, it was discovered that the commanding officer did not have the right kind of a suit on, he did not have his badges on, and they halted the whole American Army while he sent to his quarters to get the proper suit and a number of badges that were necessary to decorate himself with when he went into that terrible battle to drive the bonus army out of the city of Washington.

We must pay for those badges, and I am informed there is a liberal contribution in the coming Army appropriation bill to do it. Now, we are putting ourselves in such a position that we will be practically helpless when we come to that bill, and that is why I am opposed now to the very amendment which I said yesterday I favored.

I did not see where we were going then. If we can not bring about reductions and economies in the Army and Navy appropriation bills, then in my judgment the best thing to be done is not to try to economize in the other appropriation bills. We will run up against a situation before long where everyone will recognize the necessity for economy not only in civil life but in Army and Navy life, where the social needs are the predominating features, at least in times of peace, where society often controls and governs even the legislation of the American Congress, where it is sometimes the dominating influence. We must at all times be careful, lest we do something in these appropriation bills that will make it impossible for appropriations for the Army and Navy to be made.

So, Mr. President, much as I regret it, I am not going to vote for the amendment at this time. I shall vote for it in the proper place. I fear that the friends of the amendment, those who are behind it and are leading the fight and whose leadership I was glad to follow, are leading us into a blind alley, and that when we get through we will realize we are shorn of all our laurels and that economy will come only in the appropriation bills that do not apply to the Army and the Navy.

Mr. REED subsequently said: Mr. President, this afternoon the Senator from Nebraska [Mr. NORRIS] called the attention of the Senate to a training pamphlet used in the citizens' military training camps and called attention to some rather unwise instructions in that pamphlet.

I am authorized by the Chief of Staff to say that he agrees with the Senator from Nebraska as to the unwisdom of any such instructions; that as soon as he first saw that pamphlet, and saw that part of it, he ordered the pamphlet withdrawn from circulation and suppressed, revoked; and it has not since then been used in any training camp in this country.

In justice to the Chief of Staff, I think that ought to be stated.

Mr. COSTIGAN. Mr. President, it was not my intention at the outset of his remarks to reply further to our delightful friend the Senator from Maryland [Mr. TYDINGS].

The VICE PRESIDENT. The Senator from Colorado has talked once on the amendment.

Mr. COSTIGAN. Am I to understand that the Vice President rules that my time has expired?

Mr. HATFIELD. Mr. President, I yield to the Senator my time.

The VICE PRESIDENT. The Senator from West Virginia may not do that. The Senator may yield for a question.

Mr. HATFIELD. Very well. May I be permitted to ask the Senator from Colorado to explain his amendment?

Mr. COSTIGAN. I thank the Senator from West Virginia for his courtesy. What I have to say further about the amendment may be stated in two or three sentences.

I regret to say that the figurative tears shed by the Senator from Maryland [Mr. TYDINGS] are suggestive of crocodile emotion. Under the unamended proposal of the Senator from New Mexico [Mr. BRATTON], discharges, furloughs, and reductions in pay were all in order, if I understand the language of that proposal. To none of these did the Senator from Maryland make objection. Under the amendment offered by me, and adopted by the Senate, there is no command whatever to the head of any department to make any discharges, to reduce any wages, or to resort to any furloughs. As a matter of fact, under the 10 per cent reduction of last year our action was interpreted by the heads of departments so that discharges were in fact unexpectedly consummated by what were known as indefinite furloughs. I gave illustrations of such executive action by reading from letters of the heads of two departments earlier in the course of my remarks.

The VICE PRESIDENT. The question is on the amendment of the Senator from New Mexico [Mr. BRATTON] as amended.

Mr. BRATTON. I demand the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. BRATTON (when his name was called). I have a pair with the junior Senator from Nebraska [Mr. HOWELL], which I transfer to the junior Senator from Tennessee [Mr. HULL], and vote "yea."

Mr. McNARY (when Mr. Fess's name was called). The senior Senator from Ohio [Mr. FESS] is unavoidably absent. If he were present, he would vote "yea."

Mr. HEBERT (when his name was called). I have a general pair with the senior Senator from North Carolina [Mr. BAILEY]. In his absence, not knowing how he would vote, I withhold my vote.

Mr. MOSES (when his name was called). I have a general pair with the senior Senator from Louisiana [Mr. BROUSSARD]. He being absent, and I being unable to obtain a transfer for the moment, I withhold my vote.

Mr. ROBINSON of Indiana (when his name was called). Again announcing my general pair with the junior Senator from Mississippi [Mr. STEPHENS], I withhold my vote. If permitted to vote, I would vote "nay."

Mr. SHIPSTEAD (when his name was called). On this question I am paired with the senior Senator from Ohio [Mr. FESS]. However, I am informed that if present he would vote "yea." Therefore I am at liberty to vote. I vote "yea."

Mr. WHEELER (when his name was called). On this vote I have a pair with the junior Senator from Idaho [Mr. THOMAS]. If that Senator were present, he would vote "yea." If I were permitted to vote, I would vote "nay."

The roll call was concluded.

Mr. BINGHAM. My colleague the junior Senator from Connecticut [Mr. WALCOTT] is necessarily absent. If present, he would vote "yea." He has a general pair with the Senator from Missouri [Mr. HAWES].

Mr. MOSES. Finding that I may transfer my pair with the Senator from Louisiana [Mr. BROUSSARD] to the senior Senator from Ohio [Mr. FESS], I make that transfer and vote "yea."

Mr. WAGNER (after having voted in the affirmative). Having a pair with the junior Senator from Missouri [Mr. PATTERSON] and not being able to ascertain how he would vote or to secure a transfer of the pair, I am compelled to withdraw my vote.

Mr. McNARY. I desire to announce the following general pairs:

The Senator from Wyoming [Mr. CAREY] with the Senator from Louisiana [Mr. LONG];

The Senator from South Dakota [Mr. NORBECK] with the Senator from Nevada [Mr. PITTMAN]; and

The Senator from California [Mr. SHORTRIDGE] with the Senator from Illinois [Mr. LEWIS].

The result was announced—yeas 51, nays 24, as follows:

YEAS—51

Austin	Coolidge	Hale	Russell
Bankhead	Copeland	Harrison	Schuyler
Barbour	Couzens	Hastings	Sheppard
Barkley	Cutting	Hatfield	Shipstead
Bingham	Dickinson	Kean	Swanson
Black	Dill	King	Townsend
Bratton	Fletcher	Logan	Tydings
Bulkley	George	McKellar	Vandenberg
Bulow	Glass	McNary	Walsh, Mass.
Byrnes	Glenn	Metcalf	Walsh, Mont.
Capper	Goldsborough	Moses	Watson
Caraway	Gore	Reed	White
Connally	Grammer	Robinson, Ark.	

NAYS—24

Ashurst	Davis	La Follette	Reynolds
Blaine	Frazier	McGill	Schall
Borah	Hayden	Neely	Smith
Brookhart	Johnson	Norris	Steiwer
Costigan	Kendrick	Nye	Thomas, Okla.
Dale	Keyes	Oddie	Trammell

NOT VOTING—21

Bailey	Howell	Pittman	Wagner
Broussard	Hull	Robinson, Ind.	Walcott
Carey	Lewis	Shortridge	Wheeler
Fess	Long	Smoot	
Hawes	Norbeck	Stephens	
Hebert	Patterson	Thomas, Idaho	

So Mr. BRATTON's amendment as amended was agreed to.

Mr. JOHNSON. Mr. President, in accordance with notice heretofore regularly given, I move now to suspend paragraph 4 of Rule XVI for the purpose of presenting the amendment which has been perfected and which has been lying on the desk for the last couple of days. I trust that that permission may be accorded and then discussion had upon the amendment.

The VICE PRESIDENT. The question is on the motion of the Senator from California to suspend the rule.

Mr. KING. Is that motion debatable, Mr. President?

The VICE PRESIDENT. It is.

Mr. KING. Mr. President, if I understand the significance of the amendment offered by the Senator from California, it seems, if it be agreed to, that no purchases may be made by the United States or by contractors of the United States beyond the limits of the United States; in other words, no commodities manufactured or produced in foreign countries may be purchased by the Government or by any of its agents or contractors if within the United States the commodities or articles desired may be purchased. In other words, the amendment if enacted into law would operate as a complete embargo upon all materials or commodities of every kind or character required for consumption in any of the activities of the Government or its agents or contractors, if such commodities could be obtained in the United States. It would embargo cement used in the construction of roads in which the United States pays but a part of the cost of their construction; it would prevent any lumber or other building materials, required by the United States or used in any of its projects, from being purchased in Canada, or any other country, if the same could be obtained within the United States. There is no provision against monopolistic control of domestic commodities, so that the United States, in its many activities, might be compelled to submit to the extortionate demands of monopolistic domestic producers. We know that monopolies in our industrial life have been very powerful and they are still potent. The antitrust laws were demanded by the American people for their protection against monopolistic control of commodities including many of the necessities of life.

The amendment which the Senator desires to offer presents a variety of questions of transcendent importance. It compels the consideration of the antitrust laws, of international trade and commerce, of our tariff policies, of our revenue laws, and other related questions. Concede that a

measure of the character in question should be considered by Congress; I submit that it should first go to the appropriate committees—the Committee on Ways and Means of the House and the Committee on Finance of the Senate—and full information should there be obtained showing its effects and consequences and the propriety and necessity of its enactment into law.

I respectfully submit the problems and questions involved in the tendered amendment forbid its consideration as a part of this appropriation bill. Certainly in the consideration of appropriation bills the Senate ought not to be compelled to legislate upon questions affecting tariffs and revenues and the multitude of matters which are necessarily involved in the amendment.

I suggested that the amendment relates to international trade and commerce. That must be obvious. Anything that is an impediment to our commercial relations with other nations is of vital importance at this moment. In every part of our country we discover a surplus of agricultural and industrial products. Our farmers are desirous of foreign markets for their surplus products; our manufacturers are anxious to extend their foreign markets; our shipowners must find cargoes for their ships, many of which are now locked in our harbors. It is possible that, after a full consideration of all questions involved, the passage of a measure such as the one under consideration may be deemed expedient and advantageous; but the point I am now attempting to make is that under the limits imposed upon a discussion of every feature of the pending bill and all amendments thereto full consideration could not be given to the same. Moreover, it is obvious that it is not germane to the bill before us. The rules of the Senate forbid general legislation such as the amendment proposes upon appropriation bills. The amendment presented is not proper under the rules, but we are asked to suspend the rules in order to introduce into an appropriation bill questions of an entirely different character and relating to an entirely different subject.

Mr. President, a special session of Congress will be convened soon after Mr. Roosevelt's inauguration, and it is certain that Congress will have to deal with the subject of revenues and probably tariffs. It is quite likely, for the purpose of obtaining additional revenues from customs duties, tariff measures will be introduced and passed.

At this moment it seems apparent that this Congress will not have the courage to reduce expenditures in order that the Budget may be balanced. Demands for reductions are resisted, and there seems to be a reluctance upon the part of those charged with responsibility to make the cuts in Federal expenditures that will bring governmental expenditures within the revenues.

It has been urged by many that the imperative duty rests upon this Congress to enact legislation that will yield sufficient revenue to meet all the appropriations that may be made. It has been urged that a sales tax be enacted, that larger revenues be obtained from excise taxes, and that efforts be made to increase the amount received from incomes and corporations. Personally, I do not approve of further burdening the people by increased taxes. Every effort should be made to reduce expenses, and I have no doubt that if Congress should address itself with courage and earnestness and with a resolution which denies defeat to the task of balancing the Budget, it could be done.

President Hoover upon a number of occasions has challenged attention to the necessity of reducing Federal expenses and balancing the Budget. Certainly the Republicans who are in control of the Senate should heed his recommendations and deal courageously with appropriation bills and reduce the Government's expenses by at least $800,000,000.

Mr. President, if the measure offered by the Senator from California should be ingrafted upon the pending appropriation bill, it is certain that there will be increased demands for further embargoes and the destruction of our trade and commerce with foreign nations. It is manifest that if we impose embargoes upon imports, other nations will pursue a similar course and decline to purchase American commodities. We have already, by our tariff legislation, restricted our foreign markets, and a measure such as the one now offered by the Senator from California will further narrow our foreign markets to the disadvantage not only of our farmers and manufacturers but to the millions of workers who find employment in the mills and factories and plants of our country. Trade is reciprocal; and if we refuse to buy, others will refuse to purchase from us.

But, aside from the merits of the question, it seems to me incongruous that we should be diverted from the consideration of an important appropriation bill, which must be passed before Congress adjourns, to the consideration of a measure which is not germane—which has not been before the Committee on Ways and Means of the House or the Committee on Finance of the Senate, or any other committee, so far as I am advised. I respectfully submit that the motion to suspend the rules should not prevail.

Mr. TRAMMELL. Mr. President, because of the great importance of the question involved in the amendment which the Senator from California desires to offer and for the reason that unless it shall be considered on some other measure there is a possibility that it will not have the deliberation of Congress at this session, I very much hope that the motion of the Senator from California will prevail. I know of no more important piece of legislation than that embraced in the provisions of the amendment which he desires to offer. I am going to read partially from section 2 of the amendment, which contains the substance and the purpose and the object of the amendment. Section 2 of the amendment which the Senator from California desires to propose provides that—

> Notwithstanding any other provision of law, and unless the head of the department or independent establishment concerned shall determine it to be inconsistent with the public interest, or the cost to be unreasonable, only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced, or manufactured, as the case may be, in the United States, shall be acquired for public use.

I know of no more beneficent measure that could be written into the laws of this country than is provided in that amendment.

In carrying on the public business, why should not American products, either those which are mined or those which are manufactured or otherwise produced, be purchased to the exclusion of those produced in foreign countries? Unfortunately, frequently those who administer the law of the land seem to be totally disregardful of American interests and of American producers, and, without rhyme or reason, purchase commodities that have been imported into this country instead of purchasing American products, just as some high officials have been known to travel on foreign vessels since America has been spending hundreds of millions of dollars for the purpose of building up an American merchant marine. So it is with some of the administrative officers in administering the functions intrusted to them. They do not seem to care much whether they buy American products or foreign products. It is an evil system; it is an abuse or a reckless disregard, at least, of the administration of the law and of public functions that makes legislation necessary.

We certainly have in this country a situation which makes necessary some legislation upon this subject so as to insure that American industry and American producers shall be patronized and American money spent with American enterprises instead of being spent in purchasing foreign products.

I do not think we should delay action on this matter. If every other Senator should vote as I intend to vote, we would suspend the rules and we would adopt the amendment in 30 minutes as one of the greatest measures that have been presented at this session of Congress in behalf of the American people, of American industry, American labor, and American producers.

Mr. REED. Mr. President, I think it is worthy of note that since last March the law regarding the purchases of

the War Department has been substantially identical with the amendment now proposed by the Senator from California. That law has operated smoothly and well, and it has been effective in keeping in America orders for materials used in the construction of various buildings erected by the War Department and for the purchase of supplies for the routine support of the Army. It has kept money in this country, and it has kept Americans producing for the needs of the American Government. I hope very much that the motion of the Senator from California will prevail and that we may apply the same system to all the other departments of the Government.

Mr. WALSH of Montana. Mr. President——

The VICE PRESIDENT. Does the Senator from Pennsylvania yield to the Senator from Montana?

Mr. REED. I yield.

Mr. WALSH of Montana. I observe that articles purchased for use outside the United States are excepted from the operation of this proposed amendment.

Mr. REED. Necessarily that is so. If, for instance, an American ship puts in at some port in the Indian Ocean, we would not want to require that its fresh vegetables be brought from the United States.

Mr. WALSH of Montana. Information has come to us to the effect that a very considerable portion of the meat supply for the Army for use in the Philippines and in Hawaii comes from Australia. Can the chairman of the Committee on Military Affairs give us any information about that?

Mr. REED. I made inquiry about that at one time, and I am inclined to think that a very large part of that which is bought in the Philippines is Australian. It is bought on a competitive basis, and, quality being equal, it is much cheaper to get Philippine supplies from Australia.

Mr. WALSH of Montana. And this exception, of course, would permit that policy to be continued?

Mr. REED. I presume that it would, although the provisions of the amendment are broader than the law relating to the Army, because that law only relates to continental United States, whereas the amendment would extend the law, even for the War Department, so as to apply to the Philippines and Hawaii and Panama.

Mr. GORE. Mr. President——

The VICE PRESIDENT. Does the Senator from Pennsylvania yield to the Senator from Oklahoma?

Mr. REED. I yield the floor.

Mr. GORE. Mr. President, I merely want to suggest that I am afraid the Senator from Pennsylvania is becoming a little un-American. If we could send vegetables to India to provision our ships by aircraft, for what purposes have we been subsidizing them? Perhaps we might provide a submarine tunnel that would enable us to supply fresh meat and vegetables for our vessels in India and in the Philippines, employing, of course, American labor to produce such vegetables.

I wish the Senators on this floor, particularly those from cotton States, would remember that Japan last year took about one-fifth of our cotton crop. She took about one-third of all the cotton we exported. She paid for that cotton crop, it is true, with little electric lamp light bulbs or something of the sort, costing about 2 cents apiece, and rubber-soled shoes costing about 10 cents apiece. She took one-fifth of our cotton crop, aggregating something like sixty or seventy million dollars, and she can only take our cotton if we take her products in return. I think it is a short-sighted policy toward our own trade and our own commerce for us to do so. When we close the door to keep Japanese goods out we close the door to keep American cotton in. We deprive our cotton farmers of the best part of our foreign cotton market.

Mr. TRAMMELL. Mr. President, will the Senator yield for a question?

The VICE PRESIDENT. Does the Senator from Oklahoma yield to the Senator from Florida?

Mr. GORE. Yes, sir; I do.

Mr. TRAMMELL. Has the Senator any statistics demonstrating what amount of American products were bought by the Government of Japan when they could purchase similar articles or commodities produced in their own country? That is the question that would be analogous.

Mr. GORE. I do not know, and I do not care, because when she purchases our cotton she must pay for it with her goods; and the mere fact that the goods are required for public use makes no difference in principle or in effect, because Japan, whether selling goods to us for public or private use, is enabled by such sales to buy our cotton, our commodities, our machinery, our merchandise. Our exports can only be paid for by our imports, and Japan can only buy our cotton if we receive her goods in exchange for it; there is no other way to do it. When Senators vote for this measure they vote to keep our cotton from going to Japan; they vote to keep our cotton in the United States. If that is a wise policy for this country, if that is a wise policy for the South, then I commend it to Senators from the South.

Mr. President, I desire to have printed in the RECORD in connection with my remarks an article from Bridgeport Life. I send it to the desk and ask that the first paragraph be read as I have marked it and that the rest be printed in the RECORD without reading. The article is perhaps a little more facetious in its vein than might have been necessary, but the irony and sarcasm are very well pointed and very apropos.

The VICE PRESIDENT. The clerk will read as requested.

The legislative clerk read the part indicated, and the entire article is as follows:

[From Bridgeport (Conn.) Life, January 28, 1933]

"BUY AMERICAN" COMES TOO LATE

The latest smoke screen to be thrown up by our political parasites is the proposed slogan, "Buy American." Our political horse traders in Washington have not forgotten their early days down on the farm when, in clipping a horse, they put a twister on the horse's nose to take his mind off the fact he was being clipped. All these political tax clippers think of is to put a twister on the taxpayers' noses and then clip them until they bleed. Now that Europe has us dead broke, they shout to the people, "Buy American," and a very feeble echo answers, "What with?"

Back in 1914, when the war lords of Europe decided it was about time for another flare-up, the Allies saw to it they immediately got into debt good and proper to the United States. Their clever statesmen had no difficulty in kidding our political pirates into loaning them everything they desired, from millions of dollars down to brass cartridges. It was not long before the Allies owed our bankers so much money the latter were getting bankers' chilblains. When the bankers get cold feet it is quite serious for the Nation.

The Allies' next howl was to the effect that if they lost the war they would be absolutely unable to repay us the half billion dollars they had borrowed in perfectly good faith. This meant we must raise an army of bill collectors. This was done and their theme song was, "Lafayette, here we come." The French looked up their past history and, upon learning who Lafayette was, accepted the song as our entrance music.

This much you will have to admit, that when you get the United States on any committee you have workers who will take entire charge of affairs. The United States immediately became the life of the party. We furnished the men, the munitions, and the sandwiches. The Allies in recognition of our joining in the activities called it a World War instead of a European battle. The United States floated enough Liberty bonds to make the affair a paying success.

After our bill collectors had come near enough to Germany for her to see them, the referee blew his whistle as a signal for time out for Germany. This was just at the time when our fullback, Pershing, was going to kick a field goal. The game was called a draw, rain checks were given the spectators, and it was understood the game would be replayed at a date to be named later.

The Germans had mussed up the playing field something awful, and as the game was mostly played in France the Frenchmen were hopping mad. Frogs always get hopping mad because they can not fly. England had lost the most boats, so she was the wettest of any of the contestants. The Russians had become so sore at Germany for holding and not being penalized for it they took their team off the field and went home. The game was over and the crowd was hungry.

The United States, Big Brother of the world, said, "Well, the sandwiches are on us." It took millions and millions of dollars to feed the starving Russians, Belgians, Serbians, and all the members of the different teams in the World War Olympics, but what was a little thing like that to the United States? Helping to win the war was the only thing for us to do if we expected to be repaid our loans.

Then France needed a lot of money to fill in the holes made by the Germans' Big Berthas. This was called the reconstruction period, but generous-hearted United States would attend to all this. The United States was no piker.

Then the Allies demanded reparation from Germany, so Germany had to borrow the money from the United States in order to make the payments. It was not long before Europe owed a heap of interest money, so the United States loaned them enough to meet the interest. The Big Brother was still big-hearted. Everything went beautifully until Big Brother went broke and had no more money to loan.

It seems the real winner of the war was the Kaiser, as he sold for spot cash his old castles and furniture, and his people threw in a marked-down princess in the bargain. He moved over into Holland and joined the Dutch Cleanser colony, having cleaned up properly. He had become famous through America's presenting a 5-reel motion picture entitled "To Hell With the Kaiser."

Switzerland, so close to the war she could smell the gunpowder, and Holland, so near she could hear the booming of the guns, kept out of the European scrap. Norway and Sweden sat on the side lines and rooted for whoever was ahead. But the United States, 3,000 miles away, was asked to the party in time to pay the waiters' checks.

Now, the war, while over, still remains unpaid for and France defaults in payment of interest as she loans millions to Austria, who was one of her actual opponents in the World War Olympics. France gives the United States the international raspberry and Lafayette again becomes a forgotten man. We all know now that it would have been better to have lost a half billion dollars in the beginning than to lose now some thirty or forty billion dollars. We played the show-off and received just what all show-offs get at the finish.

Just when the United States went broke all the other countries went off the gold standard, which gave them cheaper money as well as cheaper labor with which to keep us out of the world market. Then when the United States hinted that France might at least take a little interest in the principal they owed, they dubbed our Uncle Sam with the Shakespearean term of "Uncle Shylock." Why can not we borrow from the words of Bill Shakespeare and exclaim, "O France, if we had served our own with half the zeal we have Paris, we should not now be left naked in our hour of adversity"—or words to that effect.

Now Europe has another idea for the United States, and that is for us to tackle Japan. Right at a time when our taxeaters are taking $1 out of every $3 a taxpayer can corral, Europe says, "Sick 'em, America."

Any American knows when he is in Spain witnessing a bullfight he is always rooting for the bull. Well, if we are crazy enough to get into war with the Japanese, all Europe will be rooting for the Japs. If we think we should receive any European applause for our part in Europe, we shall have plenty of time in which to disillusion ourselves.

Now that Europe has so graciously decided that we can pay the entire cost of the World War, that we can pay their debts as well as ours, it is up to our taxeaters in Washington to pile it on thicker and thicker. The taxeaters live on taxes the same as silkworms live on mulberry leaves. * * *

England bribed our Benedict Arnold in order to hold the Colonies for Great Britain. We may yet see the day when Great Britain will reclaim us for unfulfilled promises. We disobeyed George Washington's warnings against foreign entanglements and now we have not only a long line of World War veterans to support but all of Europe. Our so-called American patriots in official position sold us to Europe for half a billion dollars and now we must suffer the consequences.

No one knows to this very day who started the war, but we all on this side of the ocean know who is to pay for it. If our political leaders do not lead us to desperation, then it is only God Almighty who wills it otherwise. It would have been far better for Europe to have settled her own family row without any outside interference. All this talk about helping humanity has turned out to be that all foreign humanity has given the United States the finest sapping since the early colonists bought an entire State for a jug of rum.

Right now Mellon and Great Britain are so personally interested in our continuing with prohibition that even if mere beer would help us out of the depression we shall not even be allowed to talk about it. Mellon has the whisky franchise and Canada is making millions out of our prohibition, and they both should come ahead of the American people. The sixteenth amendment took all our money and the following amendments took all our backbone, so we are now only woolens for the political moths to feed upon. It may come to pass that our Rockefellers, Mellons, and Morgans may yet become national toastmasters for the great American bread lines.

Mr. BLAINE. Mr. President, on account of the limit on debate, I desire to occupy some time in discussing the motion of the Senator from California to point out that if the amendment were adopted it would be the opening wedge for the destruction of about one-half the paper industry of the United States. In other words, in the paper-manufacturing industry there are two groups, one group manufacturing paper of the same kind and quality out of wood pulp or pulpwood largely imported from Canada, and the other group, of about an equal number of paper manufacturers, manufacturing paper of the same kind and quality out of domestic pulpwood.

The contest, therefore, is between those two groups of paper manufacturers. If this amendment were adopted, the Government of the United States would be saying to one group, "We place an embargo upon the raw product which you must use in manufacturing your paper, and we will not buy your paper because you manufacture your paper out of a product imported into this country." The only ingredient of that type of paper is pulp, or pulpwood. There are no other ingredients. Those paper manufacturers, therefore, will be discriminated against as to all Government contracts and Government supplies that are to be used by contractors.

Those paper manufacturers are paying taxes into the Federal Treasury. They are employing a very large number of men—a number equal to the number employed by the other type of paper manufacturers. If this amendment were to be broadened and made a general embargo act, we would simply put out of business about one-half of the paper manufacturers of this country, and throw out of employment thousands of men.

That is one objection to the proposed amendment; and, as I read the amendment, the exceptions do not permit the use of paper manufactured out of foreign pulp or pulpwood.

There is plenty of pulpwood in the United States, presently at least. There is no doubt about that; but there is not a sufficient quantity of pulpwood in the Middle West, where we have those splendid rivers, without which there can be no paper manufacturing on any appreciable scale. Those paper mills would be put out of business. They can not in this competitive age, and particularly in these times, compete against the paper manufacturers of the western coast, who have their pulpwood in large quantities immediately at the door of the paper mill. The cost of transportation is so excessive that it would be utterly impossible for the paper mills of the Middle West to continue their operation if this policy is carried to the nth degree. Though there is sufficient pulpwood in the United States—there may be quantities of pulpwood in the lower Mississippi Valley, in some of the States bordering upon the Mississippi River, and on the western coast—it is the transportation problem that affects the Middle West paper manufacturers; and yet there are sufficient commercial quantities of pulpwood in this country to supply all the paper mills of the country. As I have pointed out, however, the transportation charge is so excessive that it would be impossible for the north Middle West paper mills, which have not available the domestic pulpwood, to compete with the other paper manufacturers.

Then there is another group of manufacturers that would be put out of business, and that is the manufacturers of certain furniture, office fixtures, desks, chairs, bookcases, and furniture of other kinds that is used by the United States, which furniture is manufactured from imported hardwood. There is in this country a large quantity of raw material sufficient to supply those furniture manufacturers, but of an entirely different character of wood; yet, as hardwood, there is commercially a sufficient quantity of that wood in the United States. The furniture manufacturers, those who manufacture office fixtures and furniture, would be denied the opportunity to sell furniture and fixtures of the type placed in the public buildings that are now being erected if the furniture and fixtures are installed under a contract.

So here is a proposal to place an embargo against two great industries in this country and put men out of employment, not only as respects manufacturing as such but, as well, many additional men who receive employment indirectly because of these industries.

So I hope the motion will not prevail. I doubt very much if we can perfect the amendment to permit a fair competition respecting especially the two products to which I have called attention. If the amendment went along the same lines as the law passed by this Congress at the last session respecting contract supplies for the Army, an entirely different situation would prevail; but we have no assurance that an amendment to that effect would be adopted by the Senate.

I think we are treading on dangerous ground under any circumstances. This embargo that we propose to place will simply come back to make us trouble in the future; and I hope the motion will not prevail.

Mr. BINGHAM. Mr. President, it seems to me that the word "embargo," used by the Senator from Wisconsin [Mr. BLAINE], is a little bit strong.

The Senator from Wisconsin talks about an embargo on pulpwood paper. As a matter of fact, everyone knows that the United States Government buys very little pulpwood paper. Only a very small amount of the pulpwood paper manufactured ever comes under Government contracts. Most of it goes into the newspapers of the country, and the amount of damage that would be done by this amendment in forcing the United States Government to buy paper made from American-made pulpwood would be very slight. It would not really be as damaging as the Senator from Wisconsin seems to fear.

It seems to me, Mr. President, that the amendment as it has been drawn by the Senator from California [Mr. JOHNSON], which is in the same form as the so-called "buy American" bill passed by the House, with sundry amendments thereto proposed by the Commerce Committee in order to protect American industry, manufacturers, and products, ought to be adopted, and that the rule ought to be granted at once making it possible to put this amendment on the bill.

Mr. President, only two days ago, so I am informed, the powers that be in Great Britain put an embargo on goods coming from the colonies—namely and specifically, from Canada—which contain more than 50 per cent of goods not originating in the colony itself. This movement, known as the "buy British" movement, is spreading very rapidly, and is a direct threat at much of our own industry. There is only one way to meet a perfectly reasonable national movement of that kind, and that is by the so-called "buy American" movement. This says that the money of the taxpayers of the United States, when it is used to purchase goods for the United States Government, shall be used, in so far as practicable, to buy materials produced and manufactured in this country; and I trust that the motion of the Senator from California will prevail.

Mr. JOHNSON. Mr. President, it was my hope that this consent might be accorded and then that any debate upon the bill would ultimately proceed; but some things have been said that make it necessary, perhaps, for me to indicate why this particular measure is presented and exactly its genesis.

It happened that a month or more ago certain manufacturers in the State of California, and some in the State of Pennsylvania, called upon me in reference to bids that were to be opened on the 3d day of February at the Boulder Dam—bids for turbines, generating machinery, and the like. They explained to me their fear—a fear that subsequently, from my investigations, I thought was well founded—that they would be unable to compete with the machinery that was the product of their works, wherein their men were employed, with bids that would come from Germany and perhaps another nation of Europe, too. They presented, and presented forcefully, that at this time, when they were endeavoring to continue their employment, it would be unwise and it would be ungenerous of the Government of the United States to permit its taxpayers' money to be awarded by a contract with foreign bidders for machinery, and so forth, manufactured abroad for use in that great undertaking.

They did not object if there was great disproportion between the bids; but if their bid was 1 per cent or 2 per cent or 3 per cent or 5 per cent higher than the bids from abroad, they thought that it was an outrageous thing that their money that they put up in taxes with the Government of the United States should be paid out upon a governmental project—paid out in the amount of six millions, or thereabouts, to any foreign country.

That was the genesis of the amendment I originally presented. The amendment I presented to the deficiency bill was, on a point of order, ruled as not appropriate at that time. Thereupon I gave the notice that is required under the rules that would bring the amendment up here. In the interim there came from the House what is known as the Wilson bill, passed over there by an overwhelming vote, which dealt with the same subject matter, and perhaps in a little more detail than the amendment that I had presented originally to the deficiency bill.

That bill, the Wilson bill, passing the House overwhelmingly, came to the Commerce Committee, where it was considered and amended in order that no injustice would be done to anybody in the United States or any manufacturer here, and the Wilson bill, thus amended, is practically the amendment that is presented now to be acted upon by the Senate.

It is necessary that we act in this matter, because it will be impossible in the present legislative jam in the Senate to pass the Wilson bill. So we seek under our rules by a suspension to add that bill to the pending measure, with the amendments put upon it by the Committee on Commerce, and to have it enacted into law.

Mr. President, there can be no question as to the justice of such a measure. I have before me the orders which have been made in Britain from 1920 to 1933. Every order for every public construction, every order for every road construction, contains this clause:

> That all materials required for the assisted works will be of British origin and all manufactured articles of British manufacture.

Subject to certain provisions, which are then stated.

Every order made in Britain relative to public works contains this provision. What we ask is that in relation to our public works built with public money there shall be accorded to Americans the same privilege and the same right.

In this particular conjunction of affairs it seems to me that it should not require debate, it should not require a moment's time, to say that when the Government is undertaking a project, when it is undertaking to do certain work, then the people's money shall be expended in this country upon American manufactures and the produce that is grown in this country.

Now, answering my friend the Senator from Wisconsin, see how tender we have been of anyone in this country who might think that he would be injured or be hurt at all. The amendment reads:

> This section shall not apply with respect to articles, materials, or supplies for use outside the United States, or to be used for experimental or scientific purposes, or if articles, materials, or supplies of the class or kind to be used or the articles, materials, or supplies from which they are manufactured are not mined, produced, or manufactured, as the case may be, in the United States in commercial quantities and of a satisfactory quality.

Not only that, but, at the instance of one of the departments, we placed in the bill, too, the provision that if the head of a department or independent establishment making a contract shall find that in respect to some particular article, material, or supply it is impracticable to make such requirement, or that it would unreasonably increase the cost, an exception shall be noted in the specifications as to that particular article, material, and so forth, and then the Government may proceed.

Everyone is protected by this bill. The only fault in it is that it is not sufficiently drastic, and that fault is perhaps one for which I am responsible, because of the tenderness I felt for any man in business in the United States to-day, or who might, in business in the United States, deal with the Government of the United States and in some small degree in those things which come from abroad.

The bill, therefore, is just, the bill is fair, the bill seeks to take care of our own. Where every other government on earth is taking care of its own, why should we not at least partially take care of our own?

It is said, on the one hand, that we can not sell a bale of cotton hereafter if such a measure be put into effect. It is said, on the other hand, that injury may be done to some wood-pulp producers. No so, under the terms of this measure, and, remember, this measure deals only with governmental work and with governmental contracts and governmental supplies. We are not dealing with embargoes, or

with trafficking or bargaining or trading among our people, of any kind or any character. We are simply saying that when we take the taxpayers' money to expend upon a work of the Government itself, then and under those circumstances we shall expend it for what the taxpayers have manufactured, and in behalf of our own people.

I hope that the consent requested will be accorded me, and that then we may go on with the discussion of the amendment.

Mr. BLAINE. Mr. President, will the Senator yield to me?

Mr. JOHNSON. I yield.

Mr. BLAINE. The Senator stated that the exceptions in section 2 of the bill would take care of the wood pulp for those paper manufacturers who make paper out of foreign wood pulp. I would like to have the Senator point out just what exception would take care of that situation.

Mr. JOHNSON. Lines 13 to 21.

Mr. BLAINE. What expression?

Mr. JOHNSON. The expressions in lines 13 to 21.

Mr. BLAINE. Mr. President, the Senator does not answer the question.

The PRESIDENT pro tempore. The Senator from Wisconsin is still speaking in the time of the Senator from California.

Mr. JOHNSON. I have ceased.

The PRESIDENT pro tempore. The Chair can not recognize the Senator from Wisconsin in his own right, he having spoken once on the question.

Mr. BLAINE. The Senator from California, with his usual frankness, has denied me the great privilege of having him point out how the section would take care of paper mills which use foreign wood pulp.

Mr. JOHNSON. Mr. President, I have twice pointed it out; and, having twice pointed it out, I point it out again. It is in the lines I have indicated in section 2 of the bill. I do not propose to debate the proposition. I am going to save the remaining time I have for an answer, possibly, to the distinguished Senator from Wisconsin.

The PRESIDENT pro tempore. Just a moment. Under the unanimous-consent agreement under which the Senate is now operating, that can not be done. The Senator from California may maintain the floor for 15 minutes and may yield as much of that time as he chooses to the Senator from Wisconsin, but the Senator from Wisconsin can not claim the floor in his own right again on the question now pending before the Senate.

The question is upon the motion proposed by the senior Senator from California [Mr. JOHNSON].

Mr. COSTIGAN. Mr. President, the Senator from California knows the respect I have, and for many years have had, for him and for his extraordinary ability. There are, however, some questions with respect to his proposed amendment which I trust he may answer.

The first doubt I entertain is whether under his proposed amendment, in the construction of public buildings, let us say in the Philippine Islands, permissible purchases will include materials produced in the Philippine Islands?

Mr. JOHNSON. Mr. President, will not the Senator permit the consent to be granted, and then let us debate the bill?

Mr. COSTIGAN. I regretfully feel that I must ask the questions I have in mind before I vote upon the question. I again ask the Senator from California whether, under his amendment, if public buildings were being constructed in the Philippine Islands, the materials might be purchased in the Philippine Islands?

Mr. JOHNSON. Mr. President, that is not my understanding of it. I may be in error.

Mr. COSTIGAN. I do not undertake to answer. In other words, the cry raised in the Philippine Islands would not be "Buy American." It might be "Buy Philippine Islands."

May I ask the Senator, also, who would be the judges as to whether manufactured articles are substantially produced from supplies mined or produced, as the case may be, in the United States?

Mr. JOHNSON. The Senator spoke to me of the Philippine Islands. Just so long as the Philippines are under our jurisdiction I suppose they would be considered a part of the United States. What was the Senator's second question?

Mr. COSTIGAN. The second question was: Who would be the judges as to when articles are substantially produced from materials or supplies mined or produced, as the case may be, in the United States?

Mr. JOHNSON. I think the department would be the judge.

Mr. COSTIGAN. Would the department also be the judge as to whether the articles are produced in commercial quantities and are of a satisfactory quality?

Mr. JOHNSON. Of necessity, I think. I am speaking of the first instance, of course.

Mr. COSTIGAN. On the following page a reference is made to an exception when it is found that the price paid in purchasing the domestic article would unreasonably increase the cost.

Mr. JOHNSON. Yes.

Mr. COSTIGAN. Are there any safeguards thrown around a determination of that question except the action of the department, while under the pressure of the self-interest of producers or manufacturers who desire to sell their articles?

Mr. JOHNSON. The Senator asks if there are any other safeguards than the determination of the head of the department? Is that the query?

Mr. COSTIGAN. It is.

Mr. JOHNSON. I think those are the only safeguards; and may I call to the attention of the Senator the fact that there are two great departments at least now which are doing just exactly that thing under laws passed by the Congress of the United States?

Mr. COSTIGAN. Without challenging anything the Senator says—indeed, believing that it indicates that his amendment is unnecessary—I should like to ask the Senator whether he knows what those two departments are doing with respect, let us say, to the purchase of alloyed steel articles. Are such articles, if used, held to be produced or manufactured in the United States in instances where the rare metals, fused with domestic steel, are imported from abroad? Are such articles and others which might be specified foreign or domestic?

Mr. JOHNSON. I am unable to say. Those who are familiar with the War Department doubtless would be able to tell the Senator, but I can not.

Mr. COSTIGAN. I thank the Senator from California for his courteous responses. I wish merely to point out at this time that my personal judgment is that the amendment looks in the direction of, and is calculated to stimulate, higher tariffs at the very hour when our manifest national interests draw us in the direction of more liberal trade relations with other nations. The tendered amendment is therefore highly regrettable.

I have no doubt of the fine and patriotic purposes of the Senator from California, but am convinced that in these critical times when the well-being, especially of the agricultural regions of our country, and of all our manufacturers, employers of American labor, who produce surplus products which require the outlet of foreign markets, lies in the direction of increased export trade, it would be gravely unfortunate for this country—without some crowning, immediate necessity—to adopt provisions indicative of hostility to foreign trade in an amendment to an appropriation bill.

However alluring, the cry "Buy American" has most disturbing limitations. The forceful Senator from Oklahoma [Mr. GORE] pointed out the other day the reductio ad absurdum to which it inevitably leads. Logically pursued, it becomes the self-destructive slogan, "Buy Washington, D. C.," or "Buy Connecticut Avenue," or even "Buy corner grocery." In an hour when the complex commercial prosperity of nations, the well-being of farms and factories, and of those who live by them are being throttled by blind and mad tariff policies here and abroad, we are again abandoning the certainty that there are mutual advantages in trade

and commerce, by which all who participate may gain and none should lose, a view to which I know the able Senator from California, at least in times past, has adhered. By such legislative gestures we are turning our faces away from the vital development of our commerce and trade, without which there can be no full and enduring prosperity in this country. Let us rather, through wise understanding and friendship, buy American peace, American prosperity, and American progress. Let not the Senate put its stamp of approval on this unnecessary motion, which reverses our true path and announces the continuing blindness of our leadership to the importance of our trade relations with the world.

The VICE PRESIDENT. The question is on the motion of the Senator from California to suspend the rule.

Mr. KING. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Couzens	Kean	Russell
Austin	Cutting	Kendrick	Schall
Bankhead	Dale	Keyes	Schuyler
Barbour	Davis	King	Sheppard
Barkley	Dickinson	La Follette	Shipstead
Bingham	Dill	Logan	Smith
Black	Fess	McGill	Smoot
Blaine	Fletcher	McKellar	Steiwer
Borah	George	McNary	Thomas, Okla.
Bratton	Glenn	Metcalf	Townsend
Brookhart	Goldsborough	Moses	Trammell
Bulkley	Gore	Neely	Tydings
Bulow	Grammer	Norbeck	Vandenberg
Byrnes	Hale	Norris	Wagner
Capper	Harrison	Nye	Walsh, Mass.
Caraway	Hastings	Oddie	Walsh, Mont.
Connally	Hatfield	Reed	Watson
Coolidge	Hayden	Reynolds	Wheeler
Copeland	Hebert	Robinson, Ark.	White
Costigan	Johnson	Robinson, Ind.	

The VICE PRESIDENT. Seventy-nine Senators have answered to their names. A quorum is present. The question is on the motion of the Senator from California to suspend the rule.

Mr. BINGHAM. Let us have the yeas and nays.

The yeas and nays were ordered, and the legislative clerk proceeded to call the roll.

Mr. BRATTON (when his name was called). I have a pair with the junior Senator from Nebraska [Mr. HOWELL], who is absent on official business of the Senate. Not knowing how he would vote and being unable to obtain a transfer, I withhold my vote.

Mr. COPELAND (when his name was called). On this matter I have a pair with the Senator from North Dakota [Mr. FRAZIER]. I have been attempting to obtain a transfer, but I have not yet been able to do so. Therefore I withhold my vote.

Mr. GLENN (when his name was called). I have a pair with the senior Senator from Virginia [Mr. SWANSON], who is necessarily absent from the Chamber. Not being at liberty to vote, I withhold my vote.

Mr. HEBERT (when his name was called). Again announcing my pair with the senior Senator from North Carolina [Mr. BAILEY], I withhold my vote.

Mr. ROBINSON of Indiana (when his name was called). I have a general pair with the junior Senator from Mississippi [Mr. STEPHENS]. In his absence, not knowing how he would vote and being unable to obtain a transfer, I withhold my vote. If permitted to vote, I would vote "yea."

Mr. WAGNER (when his name was called). On this vote I am paired with the junior Senator from Missouri [Mr. PATTERSON]. Not knowing how he would vote if he were present, I am compelled to withhold my vote.

The roll call was concluded.

Mr. HEBERT. I find I can transfer my pair with the senior Senator from North Carolina [Mr. BAILEY] to the junior Senator from California [Mr. SHORTRIDGE], which I do, and vote "yea."

Mr. BINGHAM. My colleague the junior Senator from Connecticut [Mr. WALCOTT] is necessarily absent. If he were present, he would vote "yea." He has a general pair with the senior Senator from Missouri [Mr. HAWES].

Mr. WAGNER. I am informed that the junior Senator from Missouri [Mr. PATTERSON], if he were present, would vote as I propose to vote. I am therefore at liberty to vote. I vote "yea."

Mr. WHEELER. On this vote I have a pair with the junior Senator from Idaho [Mr. THOMAS]. I am not informed how he would vote, and therefore withhold my vote.

Mr. ROBINSON of Indiana. I find I can transfer my general pair with the junior Senator from Mississippi [Mr. STEPHENS] to the junior Senator from Missouri [Mr. PATTERSON], which I do, and vote "yea."

Mr. FESS. I desire to announce that the Senator from Wyoming [Mr. CAREY] has a general pair with the Senator from Louisiana [Mr. LONG].

Mr. SHEPPARD. Mr. President, I desire to announce that the Senator from Tennessee [Mr. HULL], the Senator from North Carolina [Mr. BAILEY], and the Senator from Mississippi [Mr. STEPHENS] are necessarily out of the city.

Mr. KING. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. KING. Before the announcement of the result—I do not know what the result will be—I inquire whether or not the same rule with respect to pairs does not prevail in reference to a motion to suspend the rule as would prevail in voting upon a treaty?

The VICE PRESIDENT. There is no rule on the question of pairs at all. It is for Senators to determine for themselves whether they will observe a pair or whether they will not observe a pair or whether they will transfer it. There is no rule on the question.

Mr. KING. A further parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. KING. Would not the same rule apply in this instance as would apply with respect to treaties or any other matter which came before the Senate as to which a two-thirds vote was required?

The VICE PRESIDENT. A two-thirds vote is required in this case.

Mr. KING. And the rule with respect to pairs would be the same as on a treaty?

The VICE PRESIDENT. There is no rule with regard to pairs.

Mr. MOSES. As a matter of fact, Mr. President, pairs are not recognized in the Senate in any official sense whatever. The practice is one which has grown up here, and Senators have observed it.

Mr. ROBINSON of Arkansas. But, Mr. President, when pairs are made on occasions when a two-thirds vote is required, it is customary to arrange them two to one, and I respectfully suggest that Senators who are transferring their pairs should observe that custom. Of course, as the Chair has stated, there is no way to compel a Senator to pair, and there is no express rule on the subject, but from time immemorial the practice has been followed where a two-thirds vote is required that two to one applies in case of pairs.

Mr. MOSES. The Senator from Arkansas is quite right about that, Mr. President. In my own case, for example, my general pair being absent, but knowing his firm protectionist belief, I felt justified in voting as I did on this occasion.

Mr. ROBINSON of Arkansas. That does not apply to a case where the two Senators would vote the same way; but it does apply where a Senator transfers his pair to a single Senator.

Mr. MOSES. Oh, yes.

Mr. BINGHAM (after having voted in the affirmative). I inquire if the junior Senator from Virginia [Mr. GLASS] has voted?

The VICE PRESIDENT. That Senator has not voted.

Mr. BINGHAM. I have a general pair with that Senator, and, not being able to obtain a transfer, I am under the necessity of withdrawing my vote.

May I say, while I am on my feet, in connection with the remark made by the Senator from Arkansas [Mr. ROBINSON], that in the case of my own general pair with the junior

Senator from Virginia [Mr. GLASS] the understanding was a 2-to-1 pair should not be required either for him or myself, that being his particular request.

The roll call resulted—yeas 54, nays 20, as follows:

YEAS—54

Ashurst	Dill	Logan	Schuyler
Austin	Fess	McKellar	Sheppard
Barbour	Fletcher	McNary	Smoot
Black	Goldsborough	Metcalf	Steiwer
Brookhart	Grammer	Moses	Townsend
Bulkley	Hale	Norbeck	Trammell
Byrnes	Hastings	Norris	Vandenberg
Capper	Hatfield	Nye	Wagner
Caraway	Hayden	Oddie	Walsh, Mass.
Coolidge	Hebert	Reed	Walsh, Mont.
Couzens	Johnson	Reynolds	Watson
Dale	Kean	Robinson, Ind.	White
Davis	Kendrick	Russell	
Dickinson	Keyes	Schall	

NAYS—20

Bankhead	Connally	Harrison	Robinson, Ark.
Barkley	Costigan	King	Shipstead
Blaine	Cutting	La Follette	Smith
Borah	George	McGill	Thomas, Okla.
Bulow	Gore	Neely	Tydings

NOT VOTING—22

Bailey	Frazier	Lewis	Swanson
Bingham	Glass	Long	Thomas, Idaho
Bratton	Glenn	Patterson	Walcott
Broussard	Hawes	Pittman	Wheeler
Carey	Howell	Shortridge	
Copeland	Hull	Stephens	

The VICE PRESIDENT. On the vote the yeas are 54, the nays 20. More than two-thirds having voted to suspend the rule, the motion is carried and the rule is suspended.

Mr. JOHNSON. Mr. President, I now offer the amendment that has been upon the desk and which has recently been perfected.

Mr. MOSES. Mr. President, I desire to ask the Senator from California, inasmuch as the text of the amendment is wholly in his control, if he would be willing to accept an amendment, on page 2, in line 24, after the name "United States," to add the words "growing out of an appropriation heretofore made or hereafter to be made"?

I may say to the Senator and to the Senate that the Senator himself, in expressing the fundamental reason which led to the introduction of this amendment by him, pointed out a condition which exists with reference to the huge project now being carried forward at Boulder Dam, wherein bids are to be accepted from foreign competitors. Those bids, in the absence of legislation such as we now contemplate, and which I am happy to believe, in view of the vote just taken, will be adopted, would necessitate the payment of money out of appropriations already made. In order to cover that circumstance absolutely I ask the Senator from California if he will not accept the language which I have suggested?

Mr. JOHNSON. Mr. President, I accept the suggestion that has just been made by the Senator from New Hampshire.

The VICE PRESIDENT. The Senator from California modifies his amendment.

Mr. WALSH of Montana. I offer an amendment to the amendment of the Senator from California, and ask that it may be read.

Mr. GORE. Mr. President——

The VICE PRESIDENT. The original amendment has not yet been read. If the Senator from Oklahoma desires to be recognized, the reading of the amendment will be suspended while the Senator from Oklahoma addresses the Senate.

Mr. GORE. Am I recognized now, Mr. President?

The VICE PRESIDENT. The Senator from Oklahoma is recognized unless he will wait until the amendment proposed by the Senator from California, as modified, shall have been read.

Mr. GORE. I will wait until that shall be done.

The VICE PRESIDENT. Let the original amendment, proposed by the Senator from California, as modified, be read, and then the amendment proposed by the Senator from Montana will be read.

The LEGISLATIVE CLERK. It is proposed on page 87, after line 15, to insert the following:

TITLE V

That when used in this title—

(a) The term "United States," when used in a geographical sense, includes the United States and any place subject to the jurisdiction thereof;

(b) The terms "public use," "public building," and "public work" shall mean use by, public building of, and public work of, the United States, the District of Columbia, Hawaii, Alaska, Puerto Rico, the Philippine Islands, American Samoa, the Canal Zone, and the Virgin Islands.

SEC. 2. Notwithstanding any other provision of law, and unless the head of the department or independent establishment concerned shall determine it to be inconsistent with the public interest, or the cost to be unreasonable, only such manufactured articles, materials, and supplies as have been mined or produced in the United States, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced, or manufactured, as the case may be, in the United States, shall be acquired for public use. This section shall not apply with respect to articles, materials, or supplies for use outside the United States, or to be used for experimental or scientific purposes, or if articles, materials, or supplies of the class or kind to be used or the articles, materials, or supplies from which they are manufactured are not mined, produced, or manufactured, as the case may be, in the United States in commercial quantities and of a satisfactory quality.

SEC. 3. (a) Every contract for the construction, alteration, or repair of any public building or public work in the United States, growing out of an appropriation heretofore made or hereafter to be made, shall contain a provision that in the performance of the work the contractor, subcontractors, material men, or suppliers, shall use only such unmanufactured articles, materials and supplies as have been mined or produced in the United States, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced, or manufactured, as the case may be, in the United States except as provided in section 2: *Provided, however,* That if the head of the department or independent establishment making the contract shall find that in respect to some particular articles, materials, or supplies it is impracticable to make such requirement or that it would unreasonably increase the cost, an exception shall be noted in the specifications as to that particular article, material, or supply, and a public record made of the findings which justified the exception.

(b) If the head of a department, bureau, agency, or independent establishment which has made any contract containing the provision required by subsection (a) finds that in the performance of such contract there has been a failure to comply with such provisions, he shall make public his findings, including therein the name of the contractor obligated under such contract, and no other contract for the construction, alteration, or repair of any public building or public work in the United States or elsewhere shall be awarded to such contractor, subcontractors, material men, or suppliers with which such contractor is associated or affiliated, within a period of three years after such finding is made public.

SEC. 4. This act shall take effect on the date of its enactment, but shall not apply to any contract entered into prior to such effective date.

The VICE PRESIDENT. The Senator from Montana has proposed an amendment to the amendment.

Mr. WALSH of Montana. Mr. President, I perceive that the amendment offered by me is taken care of by the definition of the term "United States," and accordingly I withdraw my amendment to the amendment.

Mr. GORE. Mr. President——

The VICE PRESIDENT. The Senator from Oklahoma is entitled to the floor.

Mr. GORE. Mr. President, I do not know whether the vanquished should ever extend congratulations to the victor. If so, congratulations are now in order. The tariff has triumphed. Protectionism has not only held the field, it has not only held its ancient fortifications, but protectionism has crossed the aisle and captured one-half the Democratic side and the other half has surrendered horse, foot, and dragoon. The enemies of trade have triumphed; the friends of trade have been routed. One of the lingering distinctions between the Democratic and the Republican Parties has been this fundamental difference; the Democrats have believed that trade is a blessing, not a curse; the Republicans have believed that trade is a curse and not a blessing. Their doctrine has triumphed on this occasion. Such triumph will but protract this depression, will multiply and aggravate its evils.

Mr. President, trade is the process by which two men get what both men want, each parting with what neither needs and each profiting by what neither loses. Trade in its very nature is reciprocal. Trade can not be ex parte. Trade can not be a one-way highway.

In this Chamber we are lost in the wilderness. It must be distressing to those who behold our bewilderment—granting doles, increasing credits, spending money, aggravating the cause of our mischief, closing the only way out, and bolting and barring the way to progress.

Mr. President, do what we will and say what we will, we must trade our way out of this economic morass if we are ever to escape. There is no other escape, there is no other way out, and yet the Senate is going backward instead of forward. Senators had better take a glimpse at the brazen serpent. Until we turn our faces in that direction and set our feet in that path we are doomed to wander in this wilderness, lost in confusion, and soon to be lost in "confusion worse confounded." The peoples of the earth are to-day suffocating beneath the weight of unexchanged surpluses.

Mr. ROBINSON of Arkansas. Mr. President, it is rather an unpleasant thing for me to oppose the amendment of the Senator from California [Mr. JOHNSON]; but I feel it my duty to point out the fact that this is a complete embargo in so far as materials to be used by the Government are concerned.

There is, of course, so far as I can see, no distinction whatever between an embargo on goods for private consumption and an embargo on materials for public use. As suggested by the Senator from Oklahoma, the adoption of this amendment, no matter what may be the slogan which has carried it forward, will constitute a repudiation of the principles which underlie even a protective tariff.

Now, at a time when one of the highest tariffs ever known is in force, we are asked to say that when the Government of the United States in all of its business finds it necessary to purchase anything it may not procure the required commodities from any other source than our own country.

I repeat, it is the entering wedge to a complete embargo against the importation of foreign goods. It will not stand the test of logic or reason. "Buy American" is a doctrine that applies with just as much moral and legal force to the commodities which the citizens of the country consume as it does to the materials which the Government finds it necessary to buy.

Mr. COSTIGAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Arkansas yield to the Senator from Colorada?

Mr. ROBINSON of Arkansas. I yield to the Senator from Colorado.

Mr. COSTIGAN. I suggest to the able Senator from Arkansas that the amendment also fails to provide any reasonable safeguard against domestic monopoly prices.

Mr. ROBINSON of Arkansas. The statement of the Senator from Colorado is entirely true. There is a provision in the bill which imposes upon the head of the department using the materials and supplies the obligation to determine whether the costs are unreasonably high. That is such an indefinite standard that it means, in my judgment, very little, if anything, in practical application when the Congress announces the policy of buying only from American producers.

The object of the tariff is well understood. It is now very high. I understand the arguments that are being made to increase it; but it will be a physical and a moral impossibility to work out of the condition that exists if our Government and our citizens confine themselves to the use of American products no matter what prices may be fixed by their producers, no matter what monopolies may supply the materials.

Mr. WALSH of Massachusetts. Mr. President, in view of the character of the debate which has taken place in this Chamber, it might be well to inquire what is the movement in this country that has led to a demand for legislation of this kind.

I hold in my hand two letters from an American merchant who, within the last six months, has been trying to carry on his former business with his Canadian customers.

In October of the past year the Quabaug Rubber Co. shipped to Canada goods that invoiced for $566.88, expecting to pay a duty of $292.55. The demand made by the Canadian Government for duty upon American goods valued at $566.88 was $1,468.25, as against a former duty that would have amounted to $292.55.

Another letter shows that an invoice of samples amounting to $30 met with a demand for the enormous duty of $35.99. The goods were returned to America. No Canadian merchant could afford to buy American goods and pay that tax.

I ask unanimous consent to have these letters printed in the RECORD as a part of my remarks. The information will be shocking to those who have not been informed of recent tariff barriers in other countries.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

NORTH BROOKFIELD, MASS., *January 31, 1933.*

Senator DAVID I. WALSH,
Washington, D. C.

HONORABLE SIR: Equalization of tariff rates to adjust various currency depreciation of foreign governments is something we think is vital to our prosperity, and we urge your careful study and consideration of this subject.

In connection with this tariff question it might be interesting to you to learn of a couple of transactions we had with our Canadian neighbors during the past summer, cited as an indication of what the other fellow does to us.

The first transaction was a small one, covering samples we sent on request, for which our invoices amounted to $30. The duties assessed against this $30 consisted of—

Per pound, value of 22 cents	$40.48
Exchange, 0.1669 per cent	6.75
Value fixed by Ottawa	47.24
Duty, 27½ per cent on $47.24	12.93
1 per cent excise tax on $60.17	.60
Dumping duty	16.96
Entry	1.00
	31.49
Our invoice amount	30.00
	61.49
Payable in United States funds, 15 per cent	4.50
Total cost Canadian customer	65.99

The other transaction was a very expensive one for us, due to the fact that duties imposed were so excessive that we eventually had to recall the merchandise with accrued freight and storage charges of nearly $500. Note details of this transaction, having in mind that prices were our regular published prices for this merchandise in the United States of America, and the Canadian customs authorities were given copies of our price lists and even sent emissary to our factory and checked up our prices, etc. Our invoice of August 17, 1932, was for $568.88. The duties, etc., by the Canadian officials on this bill, which was sold at our regular prices in the United States of America, were $1,468.25, so that, all together, including payment in United States funds, this shipment of $568.88 would have cost our Canadian customer about $2,122.45. We haven't the detail of just how this was assessed, but are attaching a letter from our customer as evidence to show the total duty as indicated above.

In conclusion, we sold this merchandise at the style show in Boston in July, 1932, and at that time we were doubtful about getting this shipment in at reasonable figures, in view of former experiences, but agreed to ship on the assurance of the purchaser that it would go through with normal duty charges.

Probably you are fully posted on this situation, but thought it essential to put this information before you in the hope that it might be of value in considering tariff matters pending.

Respectfully yours,

CHAS. N. MASON,
Quabaug Rubber Co.

MONTREAL, *October 12, 1932.*

QUABAUG RUBBER CO.,
North Brookfield, Mass.
(Attention Mr. F. C. Rooney.)

GENTLEMEN: Your letter of October 5th has been duly received and noted.

We have taken this matter up further with our customs brokers, and it would be impossible to clear this shipment unless we pay an exorbitant sum of money in the way of dumping duties which were put in effect without any advice to us from Ottawa or anywhere else.

For your own information, Ottawa wants to collect $1,468.25 duty charges on your invoice of August 17, amounting to $566.88.

While we understand you shipped the goods in good faith, we, too, have ordered them in good faith, expecting to pay regular duty, or about $292.55.

We hope that under the circumstances you will see your way clear to send us affidavits in triplicate for the return of this shipment to you. Awaiting your reply, we are,

Yours truly,

CANADIAN LEATHER CO. (LTD.),
J. A. HESS, *President*.

Mr. WALSH of Massachusetts. Mr. President, the course proposed may not be the wise one to follow, but there is some justification and some reason for the merchants of this country, meeting with these barriers at the gateways of every country, asking that at least goods purchased by the American Government shall be, if possible, American-made goods.

Mr. KING and Mr. BARKLEY addressed the Chair.

Mr. WALSH of Massachusetts. Mr. President, I can not see that that opens up any question of tariff or no tariff, or opens up any question of preventing the shipment of goods and the indulging in trade where our country can trade with other countries on a reasonable basis.

I want to repeat that what I have cited here could be multiplied hundreds of times, and I, for one, do not propose to here and now vote against a request that American officials buy American-made goods if possible—if possible—under the circumstances that have been called to my attention by manufacturers and business interests of my part of the country.

Mr. KING. Mr. President——

Mr. WALSH of Massachusetts. I yield to the Senator from Utah.

Mr. KING. The Senator is aware, I am sure—because he is a student of our tariff policies—that our exports during the last 11 months have been more than $300,000,000 in excess of our imports; and complaints have been made in foreign countries, as the Senator must know, that we have been dumping our goods upon those shores. We have profited by having the balance of trade in excess of $300,000,000. Certainly the Senator does not want other nations to erect a complete embargo against our commodities because we are inaugurating the policy of a complete embargo against theirs.

Mr. WALSH of Massachusetts. The Senator has opened up another question. Balance of trade can not be measured to-day in terms of dollars. What we want to consider is tonnage, number of articles, or units. Applying this yardstick is the only proper test. I did not want to discuss this now; but I do want to say that when the Smoot-Hawley tariff bill was passed I voted against it. It was indefensible. Its rates were excessive, based on the gold standard used then by most of our customers. But conditions have changed in this and other countries; depreciation of currency has taken place to such an extent that some rates in that bill will have to be changed, or else American industries are going to be driven out of the domestic market. The workers of America will insist that they be protected against cheap labor aggravated by the cheap dollars of other countries.

That does not mean that I am not for the tariff the Democratic Party stands for, for the Democratic Party is not solely and always for low tariff duties. Some Democrats feel that one is not supporting Democratic tariff doctrines unless he advocates low and downward duties. As I understand the Democratic tariff principle, it is for just duties as against favored and extortionate duties. It is for duties that do not favor either consumer or manufacturer, but do justice by all. That means that when a case is made out, not for excessive duties, not for favored duties, not for privileged duties, but for reasonable duties that will give the domestic producer at least equal opportunity to do business in the domestic market, it will be recognized and we will act accordingly. The Democratic Party is for a competitive tariff, not for tariff duties that surrenders the home market to imports that can be produced here at reasonable prices.

Mr. ASHURST. Mr. President, will the Senator yield to me?

Mr. WALSH of Massachusetts. I yield to the Senator from Arizona.

Mr. ASHURST. The Senator from Massachusetts, in my judgment, is correct. Thomas Jefferson, in 14 letters and 2 speeches, urged a protective tariff to protect the labor of America; and James Madison, a great Democratic President, put through the House of Representatives the first bill ever passed through Congress. It was a tariff bill, and its preamble reads, "To protect the industries of the United States."

Mr. TRAMMELL. Mr. President——

Mr. WALSH of Massachusetts. Mr. President, I did not want to continue this line of argument or discussion, but I am going to close with one more statement:

Unless the Democratic Party, taking possession and control of this Government on March 4, recognizes that new economic conditions exist in the world and exist in America, and therefore that we may have to take a somewhat different attitude toward tariff rates that we so severely condemned a few years ago, we are likely to be involved in some serious political difficulties and our position misunderstood by American producers and workers.

Mr. TRAMMELL. Mr. President——

Mr. WALSH of Massachusetts. I yield to the Senator from Florida.

Mr. TRAMMELL. The Senator is on the subcommittee of the Committee on Finance that is considering the depreciated currencies with which we are having to contend in the application of tariff duties. As a matter of fact, in the main is it true or not true that most of the tariff duties to-day, with the present condition of depreciated foreign currencies, are as low as, or lower than, those of the Democratic tariff bill that we last had?

Mr. WALSH of Massachusetts. That is true in some particulars. I personally do not think that the depreciated foreign currencies have affected as yet many commodities in America. I think that has been somewhat exaggerated. It is sufficient, however, to put us on guard. The point I am trying to make is that a Democrat, in order to be sound on the Democratic tariff policy, does not have always to advocate, "Lower duties! lower duties!" but, in my judgment, a Democrat has the right to recognize, under the standards and definitions we ourselves have applied in our platforms, that there are cases where, in justice to our workers and own industries, it may be necessary to levy increased duties. The Democratic Party must not hesitate to fight militantly against the American worker being subjected to lower conditions of living by competition with depreciated foreign currencies. We must continue to prevent the return of a tariff system that operated to enrich the few and provide enormous dividends for capital at the expense of the toilers and the consuming public. The Republican tariff policy has stood for the latter and the Smoot-Hawley bill was drafted on this theory. Present economic conditions throughout the world may necessitate our readjusting former unreasonable duties for the purpose of assuring opportunities of employment and living wages to that class, the employees, that we are pledged to protect against cheap foreign labor and whom it is claimed are or may be injured by importations from countries off the gold standard.

PUBLIC SCHOOL BUILDING, FAIRBANKS, ALASKA

Mr. BINGHAM, Mr. ODDIE, and Mr. ROBINSON of Arkansas addressed the Chair.

The VICE PRESIDENT. The Senator from Connecticut.

Mr. BINGHAM. Mr. President, it is obvious that we can not get a vote on this motion to-night; and there is a very dire necessity in the town of Fairbanks, Alaska, where their only school building burned down in December, that they be permitted to issue bonds to build a new schoolhouse. The winter is advancing and they have to sell their bonds and get the material up during the fair weather soon to arrive.

I therefore ask unanimous consent that we may take from the calendar Order of Business No. 1194, House bill 13959, to authorize the town of Fairbanks to issue bonds, and pass it at this time, as it is an emergency measure.

Mr. KING. Mr. President, will the Senator yield?

Mr. BINGHAM. I yield.

Mr. KING. I sincerely hope that the request of the Senator from Connecticut will be granted. I have examined into the matter as a member of the committee, and I think the exigency calls for speedy consideration of the bill.

Mr. ROBINSON of Arkansas. Mr. President, I find no objection to the passage of the bill, and I think the request is well justified.

The VICE PRESIDENT. The bill will be read for the information of the Senate.

The bill (H. R. 13959) to authorize the incorporated town of Fairbanks, Alaska, to issue bonds in any sum not exceeding $100,000 for the purpose of constructing and equipping a public-school building in the town of Fairbanks, Alaska, and for other purposes, was read, as follows:

Be it enacted, etc., That the incorporated town of Fairbanks, Alaska, is hereby authorized and empowered to issue its bonds in any sum not exceeding $100,000 for the purpose of constructing and equipping a public-school building in the town of Fairbanks, Alaska: *Provided, however*, That no issue of bonds or other instruments of any such indebtedness shall be made, other than such bonds or other instruments of indebtedness in serial form maturing in substantially equal annual installments, the first installment to mature not later than five years from the date of the issue of such series, and the last installment not later than 15 years from the date of such issue.

SEC. 2. That before said bonds shall be issued a special election shall be ordered by the common council of the said town of Fairbanks, at which election the question of whether such bonds shall be issued shall be submitted to the qualified electors of said town of Fairbanks whose names appear on the last assessment roll of said town for municipal taxation. Thirty days' notice of such election shall be given by publication thereof in a newspaper printed and published and of general circulation in said town before the day fixed for such election.

SEC. 3. That the registration for such election, the manner of conducting the same, and the canvass of the returns of said election shall be, as nearly as practicable, in accordance with the requirements of law in general or special elections in said municipality, and said bonds shall be issued only upon condition that not less than 65 per cent of the votes cast at such election in said town shall be in favor of issuing said bonds.

SEC. 4. That the bonds above specified, when authorized to be issued as hereinbefore provided, shall bear interest at a rate to be fixed by the common council of the town of Fairbanks, not to exceed 7 per cent per annum, payable semiannually, and shall not be sold for less than their par value, with accrued interest, and shall be in denominations not exceeding $1,000 each: *Provided, however*, That the common council of the said town of Fairbanks may reserve the right to pay off such bonds in their numerical order at the rate of $20,000 thereof per annum from and after the expiration of five years from the date of issue. Principal and interest shall be payable in lawful money of the United States of America at the office of the town treasurer of the town of Fairbanks, or at such bank in the city of New York, in the State of New York, or such place as may be designated by the common council of the town of Fairbanks, the place of payment to be mentioned in the bonds: *Provided further*, That each and every bond shall have the written signature of the mayor and clerk of said town of Fairbanks, and also bear the seal of said town.

SEC. 5. That no part of the funds arising from the sale of said bonds shall be used for any purpose other than specified in this act. Said bonds shall be sold only in such amounts as the common council shall direct, and the proceeds thereof shall be disbursed for the purposes hereinbefore mentioned and under the order and direction of said common council from time to time as the same may be required for said purposes.

SEC. 6. That the act of Congress entitled "An act to authorize the incorporated town of Fairbanks, Alaska, to issue bonds for the purchasing, construction, and maintenance of an electric light and power plant, telephone system, pumping station, and repairs to the water front, and for other purposes," approved February 7, 1927 (44 Stat. L. 1062), be, and the same is hereby, repealed.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which was ordered to a third reading, read the third time, and passed.

MUSCLE SHOALS

Mr. BYRNES. Mr. President, I ask unanimous consent to have printed in the RECORD a speech of the senior Senator from Tennessee [Mr. MCKELLAR] delivered over the radio on Monday night, January 30, on the subject of Muscle Shoals.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

Ladies and gentlemen, I have been asked by the Star to tell you something about Muscle Shoals. The falls known as Muscle Shoals are on the Tennessee River. They are situated in the northwest corner of the State of Alabama. The streams which form the Tennessee River take their rise in Virginia and in North Carolina. The two principal streams are the Holston and the French Broad, the Holston rising in Virginia and the French Broad in North Carolina. When these and other rivers meet, just north of Knoxville, Tenn., they form what is called the Tennessee River. The Tennessee River flows in a southerly direction to Chattanooga, and then the river bends to the westward, dips down into the State of Alabama and runs through the northern portion of that State, and just beyond Muscle Shoals takes a northwesterly course, running all the way through west Tennessee and through Kentucky, and empties into the Ohio River.

The river is nearly a thousand miles long and runs through a rich valley. It was never navigable for any great distance because of the many shoals or rapids therein. Between Knoxville and Chattanooga there are some nine distinct rapids, making nine power sites. In Alabama there are three distinct rapids, the principal one being at Muscle Shoals.

The river is navigable after it leaves Muscle Shoals for a distance of some 150 miles through the State of Tennessee, but just as it reaches the Kentucky line there is another fall and rapids, and consequently a power site.

In 1916 war was raging in Europe and the United States was threatened. At that time I was a Member of the House of Representatives from the Memphis district. After talking with Representative Oscar Underwood, of Alabama, I introduced an amendment in the Committee on Military Affairs appropriating sufficient money to be spent at Muscle Shoals in building a dam, with the purpose of establishing a great power plant there for the manufacture of nitrates from the air, to be used in time of war and for fertilizers in time of peace.

The reason why we desired to attain nitrates from the air was because our country at the time was practically entirely dependent upon Chile for nitrates, and in case of war, of course, that source of nitrates might be closed to us, and it was essential for us to be able to make all of the explosives necessary.

This was the purpose of the bill. The bill went to the House, where the provision was stricken out, and in lieu thereof the Senate provided that the President was authorized to select a site. As I remember, this followed a bill offered by Senator SMITH, of South Carolina. As I recall, Senator Chamberlain, of Oregon, was at the time chairman of the Senate Committee on Military Affairs, and he had a wonderful site in Oregon that he thought ought to be used. President Wilson was given the authority to make the selection, as I have stated, and afterwards selected Muscle Shoals, and the dam was built there by the Federal Government.

This dam cost about the sum of $50,000,000, and the nitrate plant that was established there and all of the improvements in connection therewith cost the Government during the war about $93,000,000 more—in all about $150,000,000. The plant was not complete when the war closed, and many Members of Congress wanted to abandon it at that time, some Senators arguing that it was throwing good money after bad to complete the plant.

About that time Henry Ford made an offer for the plant, which many of us desired to accept, thinking that he would establish a great manufacturing industry in and around the plant. The acceptance of this offer was delayed by the Congress, and later on Mr. Ford withdrew it. However, one effect of Mr. Ford's offer was that the Congress completed the plant.

About that time there was a change of administration, and when the new administration came in, notwithstanding the fact that the original law under which the plant was established prohibited the Government from using it in connection with any power company, the then administration rented the plant to the Alabama Power Co. for comparatively nothing, and it has been used by the Alabama Power Co. ever since for its own purposes, the Government getting little out of it.

While the Government gets little out of it, the Alabama Power Co. and other power companies interested with it have sought by every means within their power to prevent the Government from operating the plant itself. One of the results of this policy is seen in the prices charged for current.

For instance, the Alabama Power Co. pays to the Government about one-fifth of a cent per kilowatt for what power it actually uses. If it does not need the power, the water goes over the dam and is lost for all time. While the Alabama Power Co. pays only one-fifth of a cent for the current, it sells it, some of it within a hundred yards of the place itself, for 12 cents a kilowatt.

Many bills were offered for the disposition of the plant. The late Senator Underwood actively fought for what was known as the private-ownership principle, and the bill that he fathered came very near passing. On the other hand, Senator NORRIS and myself and a number of others introduced bills and fought very vigorously for what is known as the Government-operation principle. Senator NORRIS and those of us who introduced bills along this line thought that the Government already owned the power, that it was easy enough to dispose of it, and that the power ought to be used for the benefit of all the people, who owned it. That fight has gone along through the years.

Senator NORRIS's bill, as I remember, has passed the Senate some three times. Twice it got through the House; once Mr. Coolidge vetoed it and once Mr. Hoover vetoed it. During all

these years, some 10 in number, since the completion of the plant, no disposition has been made of it, and the only beneficiary of the great investment there has been the Alabama Power Co., which has fought like a dog in the manger, trying to keep everybody else out.

But on November 8 last the question was virtually settled by the election of Gov. Franklin D. Roosevelt as President. He was in hearty accord with the desire of Senator NORRIS and those who believed with Senator NORRIS that the Government should operate its own plant, and unquestionably the Norris plan of operating the plant will be passed by the next Congress, and the result will be a tremendous victory for the users of current all over that part of our country.

In connection with the Muscle Shoals plant, it is the purpose of Senator NORRIS to have Congress authorize the building of what is known as the Cove Creek Dam at the junction of the Powell and Clinch Rivers, which are tributaries of the Tennessee and which will not only generate power there, but will perhaps double the amount of primary power generated at the shoals.

To explain what I mean, there can be generated at Muscle Shoals now about 100,000 horsepower of primary power, and probably 200,000 horsepower of secondary power—and I mean by "secondary power" the power that is generated, say, for nine months in the year, when the river is high, but there is always to be found there some 100,000 horsepower. Now, when the Cove Creek Dam is built, that will so regulate the flow of the water as to bring about 200,000 horsepower of primary power at the shoals. In other words, the Cove Creek Dam will about double the capacity for primary power at Muscle Shoals, and, of course, the two should be operated together.

There are various other dams in between, where large units of power can be generated and at the same time increase the power at Muscle Shoals, but the Cove Creek Dam is the principal one. The so-called Norris bill provides for the construction of a dam costing some $37,000,000 at Cove Creek and also calls for the establishment of transmission lines so that the power can be sold either at the dams or be carried where needed. The bill further provides that States, cities, and counties shall have preference in the purchase of power. We believe that the result of this measure will be that the price of current to consumers wherever it is used will be reduced to perhaps less than half of what consumers now pay for it. It will be one of the greatest godsends to the people of the Tennessee Valley and to the vicinity of that valley that could be imagined. It ought to make the Tennessee Valley one of the greatest manufacturing centers in the country. It will benefit all the people.

The other day, when President-elect Roosevelt and his party went down and examined Muscle Shoals, he talked over the matter with the Congressmen and Senators and others on the train. He has a great view about the matter. I shall not speak of his plans here. That is a matter for him to tell about. All I can say about it is that I was perfectly delighted with his plan, and I believe when put into action it will be approved by the American people and will constitute the greatest step toward prosperity that the people of the valley of the Tennessee, whether in Tennessee or in other States, have ever experienced.

One of the greatest benefits to be bestowed upon the people in the territory of the Tennessee River will be the manufacture of fertilizer at the shoals. Recent discoveries have shown that nitrates from the air can be obtained by the use of comparatively small amounts of power. In the old days it required much power, but under the synthetic methods it is believed that these nitrates can be obtained much more cheaply and with very much less power than formerly. In the southern part of middle Tennessee, bordering on Muscle Shoals, there are vast quantities of phosphates, and as phosphates and nitrates constitute the largest ingredients of fertilizer, the shoals will constitute an ideal place for the manufacture of fertilizer for the benefit of the farmers. The fact that Muscle Shoals is already reached by two large railroad systems and splendid hard roads, running in every direction, makes it a peculiarly central and splendid place in our part of the country for the manufacture of fertilizers. The farmers of the country will be tremendously benefited.

The entire Tennessee Valley, and indeed the entire South, owes to GEORGE W. NORRIS a deep debt of gratitude for the wonderful fight that he has made for the last 10 years to keep Muscle Shoals in the hands of the Government to use it for the benefit of the people. No man in the Senate could have led the fight more determinedly and ably or more effectively than GEORGE W. NORRIS. It has been a fight of the people against the combined power interests of the country, and the election of Mr. Roosevelt, holding very similar views to those of Senator NORRIS and those of us who stand with him, makes Senator NORRIS's victory complete. As a southerner and as a representative of the Tennessee Valley, I want to express my great debt of gratitude for the splendid fight that Senator NORRIS has made.

The views on the power question of President-elect Roosevelt are well known. They are, in respect to this legislation, sympathetic with those held by Senator NORRIS, as I have heretofore stated. On our trip to Muscle Shoals President-elect Roosevelt stated his plans for the valley. While I can not discuss them, I do feel like saying that I became very enthusiastic about them as I listened to him. They mean a "new deal" for the Tennessee River territory. They mean a new deal for the users of electric current in that territory. They spell development and progress. They insure the working out of a splendid plan of public-utilities development, which, in my judgment, will eventually bring about a great prosperity to the people who now inhabit the territority of the wonderful Tennessee Valley, from its rise to its mouth.

Mr. McKELLAR. Mr. President, I ask to have printed in the RECORD an article printed in the Evening Star of to-day, reporting the plan of President-elect Roosevelt for the development of the Tennessee Valley. These plans are comprehensive, including reforestation, flood-control basins, the building of the Cove Creek Dam, water-power development available for cities, States, and farm homes, reclamation, and irrigation. It is a wonderful plan, and I want to congratulate the President elect, and on behalf of the people of Tennessee I thank him for his great proposal.

The VICE PRESIDENT. Is there objection to the request of the Senator from Tennessee?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Evening Star (Washington, D. C.), February 2, 1933]

ROOSEVELT PLANS PROJECT CREATING JOBS FOR 200,000—TENNESSEE WATERSHED IS CHOSEN TO LAUNCH GIGANTIC EXPERIMENT—EXTENSION TO OTHER SECTIONS CONTEMPLATED—REFORESTATION, RECLAMATION, WATER POWER, AND FARM REHABILITATION ARE INCLUDED

WARM SPRINGS, GA., February 2.—A gigantic experiment designed to provide 200,000 jobs and herald the birth of a new America from which the curse of unemployment would be lifted was proposed to-day by President-elect Roosevelt.

The rugged highlands and fertile industrial valley of the Tennessee watershed were chosen by the next President for this "most interesting experiment a government has ever undertaken."

Seated before the blazing fireplace of the "little white house," he told newspapermen of his dream for a vast internal development encompassing reforestation, reclamation, water power, and agricultural rehabilitation. The aim is to balance the national population anew between cities and the country.

HOPES TO WIDEN PROJECT

Mr. Roosevelt expects this huge laboratory experiment to provide employment for 200,000 men in the Tennessee Valley alone. More than this, he hopes to carry the scheme into other sections of the Nation from Alleghenies to the Pacific coast and through it to reestablish American life on a basis that will mean the end of unemployment, the decentralization of industry, and a people protected by the watchful eye of a government.

The great Tennessee Valley project, involving half a dozen States, is to include:

1. Reforestation.
2. Creation of flood-control basins in the upper valleys, first at Cove Creek in the Clinch River.
3. Water-power development to be available for cities, States, and farm homes.
4. Reclamation of the fertile bottom lands for agricultural use.
5. Elimination of the unprofitable marginal lands from farm pursuits.
6. Eventual flood control of the great Mississippi River.
7. Eventual improvement of navigation.

Mr. Roosevelt announced that as soon as he takes office March 4 he will ask the various Government departments involved to make surveys with a view to putting the proposition up to Congress at an early date.

CONFIDENT OF SUCCESS

Confident that the whole project will be self-sustaining, he has no doubt of the bankability of it and the availability of bonds for the undertaking.

"If it is successful, and I am confident it will be," he said, "I think this development will be the forerunner of similar projects in other sections, particularly in the Ohio and Arkansas Valleys and in the Columbia River Basin of the Northwest.

"We have about 12,000,000 wage earners unemployed. If we return immediately to the high level of 1929, I think we would still have 5,000,000 men out of work and on a dole. Our population is out of balance. If by Government activity we can restore the balance, we will have taken a great step forward.

"The normal trend now is a back-to-the-farm movement. For those who have had experience in agricultural work I think we will do well to provide a living."

Without references to notes or books, but with an occasional glance at a huge map, Mr. Roosevelt unfolded his idea for a great Tennessee Valley experiment. There is no doubt he has been studying the proposition for days.

640,000 SQUARE MILES

He said he selected the Tennessee watershed, running over the States of Virginia, West Virginia, Tennessee, North Carolina, South Carolina, and parts of Kentucky, Alabama, and Mississippi, for many reasons, principally because of its wide range of physical conditions, life, and climate. The area involves 640,000 square miles.

He believes the proposition of reforestation can be started immediately, and with it work provided for 50,000 to 70,000 men in planting new trees, cutting, and rehabilitating the vast forest lands.

Through the development of huge flood-control basins, beginning at Cove Creek Dam, he estimates the power to be produced at Muscle Shoals can be increased to between 2,000,000 and 3,000,000 horsepower.

With this power is to be improved every farm home and barn and the great city industrial units and homes within the valley, all under protection of the Government.

As a result of the flood-control development, Mr. Roosevelt expects great stretches of rich bottom lands to be restored to the use of farmers—land to replace the eliminated and nonprofitable marginal acres.

"Attacked from angles," he said, "this whole proposal would give work to eventually about 200,000 men. We have been going at these various factors in a piecemeal way ever since the days of T. R. (Theodore Roosevelt) and Gifford Pinchot. Now is the time, I feel, to tie up all the various developments into one great comprehensive plan within a given area."

He preferred not to involve the power issue in the first exposition of the project. Nor did he go into details about the future use of the nitrate plant at Muscle Shoals. He is looking now at a vast, broad, visionary scheme and he wants to carry it into effect as soon as possible.

HELD SAFE INVESTMENT

Government purchase of some of the forest lands and of those marginal areas which would be retired from agricultural pursuits is contemplated in the Roosevelt program.

"I regard it as a safe investment," he said, "to borrow money to buy and take care of land of this character. The money would come back through the sale of crops. It is necessary that we act, for we are now consuming between three and four times as much timber as we are producing."

Preparing to depart to-morrow night on a fishing cruise of 10 days in southern waters, Mr. Roosevelt has about completed the complex discussions necessary to get his policies and Government leaders in action on March 4.

It is believed he has his Cabinet very definitely in mind, although no formal announcements are expected before he returns from the fishing cruise about the middle of the month.

Arrival to-day of Robert Dunham, Chicago banker and industrialist, revived speculation that he would be ambassador to Germany.

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

Mr. ODDIE obtained the floor.

Mr. BRATTON. Mr. President, I send forward to the desk an amendment to be inserted in the economy section of the pending bill and ask that it be printed and lie on the table.

The VICE PRESIDENT. The amendment will be printed and lie on the table.

Mr. WAGNER. Mr. President, if I may have the attention of the senior Senator from California, I desire to offer an amendment to which I am sure the Senator will have no objection.

Mr. JOHNSON. I accept the amendment, Mr. President.

The VICE PRESIDENT. Let the amendment be stated.

The CHIEF CLERK. On page 2, lines 15 and 16, of the amendment of the Senator from California, the Senator from New York moves to strike out the words "or to be used for experimental or scientific purposes."

Mr. JOHNSON. I modify my amendment by accepting the language thus suggested by the Senator from New York.

The VICE PRESIDENT. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. ODDIE. Mr. President, before I move that the Senate take a recess, I give notice that to-morrow night I shall ask the Senate to stay in session, unless a vote is had during the day on the pending bill or unless a satisfactory arrangement is made for a vote at a definite time.

Mr. ROBINSON of Arkansas. Amen! [Laughter.]

RECESS

Mr. ODDIE. I move that the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to, and the Senate (at 5 o'clock and 50 minutes p. m.) took a recess until to-morrow, Friday, February 3, 1933, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

THURSDAY, FEBRUARY 2, 1933

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our duty is before Thee, O Master, Mary's Holy Child; idealize it, transform it, encircle it with a halo of divinity until we are enriched by it. May we inculcate much that is beautiful and worthy in His noble virtues. Let them have full sway in our lives, and the shadows shall not deepen at our sides and we can not be defeated by the loss that sobs out the cry of its pain. Holy Spirit, Thou Christ of God, make us believe in man, make us believe in the kingdom of righteousness on earth, make us believe in a bountiful Heavenly Father who loves us and will go with us all the way. Let there burn in all hearts the fairest hopes and faiths until Thou dost become the center of our exultant song. Amen.

The Journal of the proceedings of yesterday was read and approved.

THE LATE EDWARD M. IRWIN

Mr. HOLADAY. Mr. Speaker, I ask unanimous consent to proceed for one minute.

The SPEAKER. Is there objection?

There was no objection.

Mr. HOLADAY. Mr. Speaker, it is with regret that I announce to the House the death of our former colleague, Edward M. Irwin, of the twenty-second district of Illinois, who passed away in his home city of Belleville, Ill., last Monday evening.

During the Sixty-ninth, Seventieth, and Seventy-first sessions of Congress Doctor Irwin represented the twenty-second district of Illinois in this House, and during the Seventy-first Congress was chairman of the Committee on Claims. In the discharge of the duties of that position he rendered a distinct service to the Nation and to his colleagues. I know that it is with a deep sense of sorrow that his host of friends on this floor hear of his passing.

EXHIBITION RIDE AT FORT MYER, VA.

The SPEAKER. The Chair lays before the House the following communication for the information of the Members of the House:

HEADQUARTERS, FORT MYER, VA.,
OFFICE OF THE COMMANDING OFFICER,
February 1, 1933.

The SPEAKER,
House of Representatives, Washington, D. C.

MY DEAR MR. SPEAKER: Upon the request of certain Members of Congress, it is the desire of the commanding officer, and of the officers and men of Fort Myer, Va., to present a special exhibition ride for the Members of Congress, their families, and guests.

It is realized that the regularly scheduled rides on Friday afternoon take place at an inconvenient time, and, due to the large public demand for admission, they are crowded and troublesome to attend.

We have, accordingly, scheduled an exhibition ride at 4 o'clock on Saturday, the 11th of February, to be given in honor of the Members of Congress. The entire seating capacity of the riding hall at Fort Myer will be reserved for them. In an endeavor to make attendance as convenient and informal as possible, no individual seats will be reserved, but guests will be required to present an individual identification card from a Member of Congress of the United States.

It is hoped that, in extending this formal invitation through you, you will notify the Members of its provisions.

Very sincerely yours,

H. N. COOTES, *Colonel, Third Cavalry.*

MINING OF COAL, PHOSPHATES, OIL, ETC., ON PUBLIC DOMAIN

Mr. EVANS of Montana presented the conference report on the bill (S. 4509) to further amend the act approved February 25, 1920, entitled "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain."

INDEPENDENT OFFICES APPROPRIATION BILL, FISCAL YEAR 1934

Mr. WOODRUM. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the

state of the Union for the further consideration of the bill (H. R. 14458) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices, for the fiscal year ending June 30, 1934, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. RAYBURN in the chair.

The Clerk read the title of the bill.

The Clerk read as follows:

EMPLOYEES' COMPENSATION COMMISSION

For three commissioners and other personal services in the District of Columbia, including not to exceed $1,000 for temporary experts and assistants in the District of Columbia and elsewhere, to be paid at a rate not exceeding $8 per day, and for personal services in the field; for furniture and other equipment and repairs thereto; law books, books of reference, periodicals; stationery and supplies; traveling expenses; fees and mileage of witnesses; contract stenographic reporting services; rent at the seat of government and elsewhere; and miscellaneous items; $407,800.

Mr. WOODRUM. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WOODRUM: Page 12, line 20, strike out "$407,800" and insert in lieu thereof "$399,800."

Mr. WOODRUM. Mr. Chairman, the explanation of this item is that there ought to be a reduction in this appropriation of $8,000 for the reason it was included in the Budget estimate for the purpose of paying the cost of administration of the employees' compensation act for the District of Columbia. The amount to be carried in the District of Columbia appropriation bill for transfer to the employees' compensation to cover the cost of the local activity should, therefore, be increased by $8,000.

Mr. STAFFORD. Mr. Chairman, while the gentleman is occupying the floor, will he be kind enough to give information as to how static this appropriation is for the total employees' compensation fund? This year it totals the amount of $4,862,000, and I am desirous of learning whether there is a periodic increase in the amount borne by the Government by reason of injury that occurs from time to time or whether the appropriation is more or less static.

Mr. WOODRUM. There is a gradual increase in the appropriation and we may expect the appropriation to increase until it reaches $10,000,000 at the peak unless the organic act is changed.

Mr. STAFFORD. Has the gentleman any information as to when the peak will be reached?

Mr. WOODRUM. The date would be a matter somewhat difficult to state with accuracy. It will not be reached until the number of beneficiaries separated from the rolls by death or otherwise exceeds the number being added to the rolls. As a guess, I would say that might occur about 1950.

Mr. STAFFORD. The organic law is not likely to be changed, other than it may be increased in the allowances rather than decreased.

The amendment was agreed to.

The Clerk read as follows:

Cooperative vocational rehabilitation of disabled residents of the District of Columbia: For personal services, printing and binding, travel and subsistence, and payment of expenses of training, placement, and other phases of rehabilitating disabled residents of the District of Columbia under the provisions of the act entitled "An act to provide for the vocational rehabilitation of disabled residents of the District of Columbia," approved February 23, 1929 (U. S. C., Supp. VI, title 29, secs. 47–47e), $13,683.

Mr. CHINDBLOM. Mr. Chairman, I move to strike out the last word. Mr. Chairman, I have made this motion for the purpose of asking the chairman of the subcommittee whether this appropriation ought not to be carried in the District of Columbia appropriation bill?

Mr. WOODRUM. This is for the Federal Government's part of the work. In the District of Columbia we pay out of the Federal Treasury for a portion of the work, and their portion of the work is carried in the District bill.

Mr. CHINDBLOM. This is in lieu of the appropriation which the States are expected to make in order to avail themselves of the Federal appropriation, is it not?

Mr. WOODRUM. Yes; the District of Columbia pays that portion in lieu of what the States would do.

Mr. CHINDBLOM. This is one of the activities of the Federal Government which has increased the amount of the Budget, and is outside of the real purposes of the establishment of the Federal Government.

Mr. WOODRUM. Of course, it is an activity that has increased the Federal Budget. My distinguished colleague, the gentleman from Washington [Mr. SUMMERS], I have no doubt is ready to justify this appropriation, because I think he takes the credit to himself of being the author of this work. The hearings, if the gentleman will examine them, will show that this is a meritorious work.

Mr. CHINDBLOM. Of course, it is very meritorious, it is very appealing as being humanitarian and eleemosynary in purpose; but it is an activity which the Congress has launched that is not strictly Federal and was not within the original contemplation of the national establishment. If we are to achieve any real economy, it should have the attention of Congress to determine whether in the future it will be wise for the Federal Government to continue operations of this character. The same observations apply to the succeeding paragraph relating to appropriations for the Federal Board for Vocational Education, which administers both the appropriations for cooperative vocational rehabilitation as well as the appropriations for cooperative vocational education.

The Clerk read as follows:

FEDERAL FARM BOARD

For salaries and expenses in accordance with the provisions of the agricultural marketing act, approved June 15, 1929 (U. S. C., Supp. V, title 7, secs. 521–535f), and the act creating a division of cooperative marketing in the Department of Agriculture, approved July 2, 1926 (U. S. C., Supp. VI, title 7, secs. 451–457), including stenographic reporting services to be obtained by the board through the civil service or by contract; not to exceed $750 for newspapers; membership fees or dues in organizations which issue publications to members only or to members at a lower price than to others, payment for which may be made in advance; manuscripts, data, and special reports by purchase or by personal services without regard to the provisions of any other act; to procure supplies and services without regard to section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5) when the aggregate amount involved does not exceed $50; purchase and exchange, maintenance, repair, and operation of motor-propelled passenger-carrying vehicles and motor trucks to be used only for official purposes; typewriters, adding machines, and other labor-saving devices, including their repair and exchange; garage rental in the District of Columbia and elsewhere; traveling expenses, including attendance at meetings concerned with the work of the Federal Farm Board; payment of actual transportation expenses and not to exceed $10 per diem to cover subsistence and other expenses while in conference and en route from and to his home to any person other than an employee or a member of an advisory commodity committee whom the board may from time to time invite to the city of Washington and elsewhere for conference and advisory purposes in furthering the work of the board; the employment of persons, firms, and others for the performance of special services, including legal services and other miscellaneous expenses, all unexpended balances of appropriations for the Federal Farm Board, not exceeding $500,000, are hereby made available for the purposes enumerated in this paragraph to and including December 31, 1933: *Provided*, That during the fiscal year 1934, when the Federal Farm Board requires cooperative work by any department or independent establishment of the Government within the scope of the functions of such department or establishment and which such department or establishment is unable to perform within the limits of its appropriations, the Federal Farm Board may transfer from this appropriation to such department or establishment, with the approval of the head thereof, such sum or sums for direct expenditure during the portion of the fiscal year 1934 ending December 31, 1933, as may be necessary for the performance of such additional work: *Provided further*, That no part of this appropriation shall be used to pay any salary in excess of $10,000 per annum, or any salary in excess of $8,500 per annum except to members of the board and the general counsel.

Mr. FULLER. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Strike out all pertaining to the Federal Farm Board, beginning at line 14, page 17, down to and including line 24; all of page 18; and on page 19, beginning at line 1 to 18, inclusive.

Mr. FULLER. Mr. Chairman, this appropriation calls for $500,000 for the operation of the Farm Board for July to December, inclusive, and nothing for the last six months of

fiscal year 1934. The subcommittee's report says the board may be abolished, and that there is a possibility that the President will consolidate it with some other board. That being true, why not stop its operation June 30 and thus save $500,000 for its operation for the last six months of this year?

I see no reason why the Congress should pass the buck to the President at this particular time.

Why should we make an appropriation for six months instead of for a year? If it is a meritorious cause, worthy of an appropriation, it ought to be for the entire fiscal year of 1933–34. This board has had an appropriation of $500,000,000, most of which has been lost. It is conceded by the board $300,000,000 has been lost, and time will demonstrate the other $200,000,000 consists mostly of worthless notes.

I heard a colleague say this money had been lost on the farmers. I seriously doubt that statement; but if true, it is the first real substantial benefit the farmers have realized in many years. Such a statement can not be true; but if correct, it should be remedied. One of the darkest pages in our history is the conduct of the Farm Board and its loss of public funds. Created to comply with a political promise, its achievements have been a farce. Especially is this true when we realize its manipulations and failure have been under the guise of granting aid to farmers.

No board can operate successfully within the spirit of the law under the title of being a farm board, and performing the functions expected by the farmers and by this Congress, which acquiesces in and consents to loans of money to cooperative associations, which pay salaries from $50,000 to $75,000 a year to men known as experts, so that they may indulge in gambling and stock speculation. This ought to be eliminated.

I know it is the policy of the House to back up the subcommittee and the Committee on Appropriations, and I subscribe to that myself. I know that the subcommittee has done a wonderful work and should receive much credit, but it should no longer—not even for six months—recommend or consent for this board's misuse of public funds. This board is not doing anything for the farmer. The farmer is not receiving any benefits under this appropriation. The most the board is doing is gambling and speculating in cotton, wheat, and a few other farm products, and the farmers are "cussed" for it and accused of getting the benefits. I represent an agricultural district, and I know that it has never received a dollar's benefit under this board.

Mr. FIESINGER. Mr. Chairman, will the gentleman yield?

Mr. FULLER. Yes.

Mr. FIESINGER. Does the gentleman's amendment go down to line 18, on page 19?

Mr. FULLER. Yes. It is all under the Federal Farm Board paragraph. The purpose of my amendment is to appropriate no more money to this worthless and inefficient Farm Board.

Mr. WOODRUM. Mr. Chairman, let me say to the gentleman from Arkansas [Mr. FULLER] that the position of the Subcommittee on Appropriations, and of the whole committee, because now it is the action of the whole committee, is to-day exactly what it was a year ago, and that is that the Federal Farm Board ought to have sufficient funds to enable it to look after this revolving fund that Congress has turned over to it, and whether it was turned over to it wisely or unwisely is not now a question to be considered. We further believe that the Farm Board ought to have sufficient funds to enable it to carry on its work with cooperative marketing associations, and that feature of the work undoubtedly has resulted in great benefit to the farmer.

The reason for giving a half year's appropriation is that those of us who have kept abreast with what is going on in the way of thought on the farm problem know that with the advent of the new administration very serious and careful thought is going to be given to the whole problem of farm relief and the contacts and set-ups of organization that have to do with the agricultural proposition. If the new administration and the new Congress want to continue the Federal Farm Board as an agency to administer that relief, then there will be ample opportunity to make further arrangements for its life, or, if some other agency is devised to carry on its activities, then the half year's appropriation will be ample to carry the board on to the 1st of January. And may I say further, Mr. Chairman, that the action of the subcommittee was taken after very careful thought and consideration and after consultation with our distinguished colleague from Texas [Mr. JONES], the chairman of the Committee on Agriculture, and after conference with accredited representatives of the President elect.

Mr. COX. Mr. Chairman, I move to strike out the last word and ask unanimous consent to proceed for 10 minutes.

Mr. WOODRUM. Mr. Chairman, will the gentleman permit me to submit a unanimous-consent request?

Mr. COX. Certainly.

Mr. WOODRUM. Mr. Chairman, I ask unanimous consent that debate upon this paragraph and all amendments thereto close in 30 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia that he may proceed for 10 minutes?

There was no objection.

Mr. COX. Mr. Chairman, I recognize that there is widespread prejudice against the Federal Farm Board and all of its activities, but does not the board deserve better of the country than it is receiving? The board may not have succeeded in all of its operation, but, seriously, is there doubt but that it has earnestly endeavored to promote the welfare of the group which it was set up to serve?

Any fair consideration of the Federal Farm Board's activities must include both the operation of the cooperatives and of stabilization corporations. Each of these activities likewise must be regarded in its proper relation to the financial and commercial life of the country, to the place of agriculture in the economic system, and to our dependence as a Nation on a high order of rural citizenship.

Congress has heretofore adopted the policy of encouraging farmer-owned and farmer-controlled commodity cooperative organizations. Through the Capper-Volstead Act and the agricultural marketing act Congress has legalized and provided moral and financial encouragement to them. Both political parties have reiterated their support of these policies. Two million American farmers have combined themselves in more than 12,000 such organizations and are doing approximately $2,000,000,000 of business annually. Their membership is made up of intelligent, progressive, and substantial farmers.

The aims and purposes of these organizations are to improve their bargaining opportunities and to overcome abuses which have grown up in the processing and marketing of their products. They are devoting themselves to the fundamental problems confronting their various industries—adjusting production to demand, both as to quantity and quality, extending or developing markets through finding new uses and extending old ones, devising improved merchandising methods, reducing distribution costs, and eliminating losses and wastes. These are distinctly the problems and responsibilities of the producers themselves. No one is so interested in doing these things as the man who pays. That man is the farmer so far as marketing costs and wastes are concerned.

Many of these organizations have been operating for a long period of time. Since their earliest experience, however, they have learned that in carrying on a national or world merchandise business in their commodities successfully a large amount of capital is needed, as well as the service of able merchandisers and financiers. The development of the movement has been slow, due to a lack of finances to meet these needs. Having demonstrated the practicability of conducting their own marketing operations on a relatively small scale and recognizing the limiting factors in the expansion of their business, the Congress of

the United States set up a Government agency, the Federal Farm Board, to assist in supplying these needs. Their objectives are to set up business organizations that are equal or superior in efficiency and sound business conduct to the oldest and best-established private merchants. The entire program is based upon the wholesome principle of collective self-help; that is, the farmers doing for themselves collectively the things which they are unable to do individually. Congress has not erred in its policy of giving moral and financial encouragement to these enterprises. It is a recognized proper function of government to assist any essential group among our citizenship in the doing of things which they are unable to do individually or collectively, the doing of which is in the interest of the public welfare.

One of the reasons why the growth of cooperative associations has been slow and accompanied with reverses has been the opposition of the agricultural trades. They observed that the cooperative idea from a small beginning was growing into huge proportions and was seriously threatening their profits. Those were unable to meet the competition of the cooperatives, and the more efficient merchants found it necessary to discontinue their once lucrative business. There is no wonder, therefore, that with the coming of the Farm Board that they should organize themselves to destroy the farmers' one hope of dealing with their marketing and other business problems in an organized and concerted way.

With the assistance of the Federal Farm Board, the services of technical experts have been employed in making studies in organization plans, membership and public relations, business set-up, office systems, merchandising methods and policies. Local, regional, and national organizations are setting up substantial reserves looking to the time when their own operating funds will be sufficient for their every need without the financial support of the Farm Board. Through these studies the opportunities and limitations of collective effort are becoming more widely realized.

Stabilization activities of the Federal Farm Board in wheat and cotton have so overshadowed the less spectacular operations of the cooperatives that the average man thinks of the Farm Board only as a price-stabilizing agency. There is much confusion of mind as to whether the attempts at price stabilization have been beneficial or injurious, but those who are representing the organized producers and who are best familiar with these operations have no doubt on this point. The Farm Board's announcement in the fall of 1929 that it would loan through the cooperatives 16 cents a pound on cotton was undoubtedly responsible for the maintenance of that price level until practically all of that crop had left the hands of the farmers. The 1929 crop was a high-price crop, and had the price of cotton taken its natural course it would have worked a great hardship not only on the producers themselves but also on those who had provided the credit to make the crop. It is estimated by the Standard Statistics Co., an impartial nationally recognized statistical agency, that the crop would have brought an average of $20 per bale less had it not been for stabilization operations.

Again, the following year, the advancing of 90 per cent of the value of the crop at the time of delivery resulted in a price stabilization which again permitted the farmers to market the bulk of their crop without suffering the extreme decline in price which would have undoubtedly followed had the 2,000,000 additional bales been forced on the already oversupplied and unwilling market. With one of the largest crops in history in sight and with a panic-reduced demand in prospect, the industry was facing a carry-over of an ordinary size crop—13,000,000 bales, a carry-over 25 per cent greater than ever before known. A condition, not a theory, presented itself. What a condition! The entire agricultural, financial, and commercial life of the South was in the balance.

Those who contend that the existence of stabilization stocks is a menace to the market should ask themselves seriously, if the existence of a stock pledged for a period of time to be withheld from the market is a depressing influence, how much more depressing that quantity would have been had it actually been forced onto the market, regardless of price consequences. Furthermore, it should be borne in mind that the motives behind various legislative proposals presented to Congress for stabilizing the prices of farm products had for their chief purpose the controlling of surplus. Congress provided the machinery for such control in the agricultural marketing act. The Farm Board had no choice under its mandate from Congress but to put the provisions of the act into operation. Under the conditions which prevailed in all commodities and securities following the collapse of the stock market and during the business depression no one would question but what the board would have been crucified had it failed to make an honest attempt to use its power to prevent a collapse in the price of cotton and wheat.

Furthermore, there was a well-defined opinion existing throughout the country that with the aid of the Government's financial resources the price of any nonperishable farm commodity could be stabilized at prices which would protect farmers and business interests generally from ruin. We have probably all heard numbers of prominent business men assert with all the assurance of definite knowledge that if the United States Government would announce that wheat was worth $1 a bushel or cotton 20 cents a pound, and was prepared to back such a statement with buying orders at these levels, that such price could be maintained. In fact, little would be bought by the Government at that price. The Federal Farm Board did hold up the prices of cotton and wheat through stabilization operations for a time, permitting farmers to sell two crops at much higher prices than they would have otherwise obtained, with all of its consequent benefits to bankers, other creditors, merchants, and business generally, but it could not permanently maintain such prices unless there was a corresponding adjustment in the on-coming supplies.

The Farm Board did no doubt suffer severe losses to its revolving fund, but it should be remembered that every dollar of this money went into the hands of farmers, permitting them to pay their obligations or supplementing their buying power. But if the money which these farmers distributed throughout the community is regarded as a loss to the Government, this loss is negligible in comparison to the increased price which the entire cotton and wheat crops brought all of the producers and the country as a whole during the years of stabilization operations.

It requires no stretch of imagination to picture the multiplied farm foreclosures, business bankruptcies, and bank failures had the prices of these two staple agricultural commodities dropped as rapidly and to the same extent as most of our best regarded listed securities and nonagricultural commodities. Farm prices usually lead the decline in periods of business depression, but in this instance, thanks to the operations of the Federal Farm Board, the decline in staple agricultural commodities in which stabilization operations were undertaken was so gradual that the effect of the immediate price collapse was fortunately avoided.

It should be recalled that many men now living have seen cotton prices lower than during this business depression, although never before have we experienced such a huge price-depressing surplus nor as generally demoralized business conditions as exist at the present time. In contrast with this fact a number of commodities outside the scope or jurisdiction of the Federal Farm Board have reached all-time low prices. Among these are silver, copper, rubber, sugar, coffee, and many others.

While the cooperatives handling cotton and wheat have been so closely associated with stabilization operations, it should be kept in mind that stabilization was carried on, not primarily for the benefit of the members of the cooperatives but for the benefit of all growers in such commodities and indirectly for the benefits of business in general. It is seriously doubtful whether stabilization operations have been an advantage to the cooperatives, but there can scarcely be any doubt but what they have been of great advantage to the producers as a whole and to business in general.

The cooperatives as a whole are making no defense for the continuation of stabilization activities of the Farm Board. In fact, they believe that if such operations are continued a separate and distinct fund should be created for that purpose, as they are unwilling for the revolving fund set aside for the benefit of cooperatives to be consumed for the benefit of business in general. Unless such a separate and distinct fund is provided by Congress and independently administered they favor the repeal of the stabilization clause of the agricultural marketing act.

In view of the apparent hostility to stabilization operations by the public this provision of the act should be repealed.

The cooperatives of the country look upon the Federal Farm Board as a nonpartisan, nonpolitical instrumentality of society to encourage farmers to avail themselves of group action in dealing with their group problems in a constructive and businesslike way. Such organization of farmers has been recommended by presidential commissions and business men's organizations during the past 20 years. Therefore, in line with the wishes of the farmers themselves, and believing in the soundness of the advice of business men that agriculture must adopt more businesslike methods in the marketing and distribution of their crops through farmer-owned and farmer-controlled organizations, and in line with the platforms of both political parties and the established policies of the Government, I would favor the continuation of a Federal agency that will continue to give moral, technical, and financial support to the organization and operation of such associations. [Applause.]

Mr. KETCHAM. Mr. Chairman, when the average individual talks about the Farm Board and its operations, and particularly when he speaks in criticism of it, in nine cases out of ten he has in mind its stabilization operations rather than its more important activities in support of farm cooperatives. Due to the fact that my distinguished colleague from Georgia [Mr. Cox] has just covered very ably the cooperative activities of the board, I shall not trespass at length upon that territory, but I do commend to the careful reading of every member of the committee the remarks which he has just concluded. I bespeak that special consideration not only because of the excellence of the discussion itself but also because of the fact Mr. Cox has been serving as a member of the special committee giving careful study to this whole question of the Farm Board and its activities which is now commanding so much interest in all parts of the country.

I am very strongly opposed to the amendment offered by my good friend from Arkansas [Mr. FULLER], and I not only regret that he has seen fit to propose such an amendment but also am much disappointed in the argument he presented in urging the adoption of his amendment. I have great respect for his judgment upon most matters but can not believe that he speaks the real sentiment of his heart when he proposes by this amendment to abolish the Farm Board completely.

In reply to his statement that he can find no farmers in his section who have received benefits from the Farm Board I took just a moment to look up the figures of Farm Board operations in Arkansas both under the cooperative and stabilization sections of the agricultural marketing act. I find that the farmers of Arkansas have negotiated loans from the Farm Board for the stimulation and encouragement of cooperatives in that State to the extent of $17,000,000. To show that the operations made possible by this loan have been fairly successful it is noted that practically one-half of such loans have already been repaid.

Furthermore I find that the State of Arkansas has also been the beneficiary of the Farm Board's stabilization operations to the extent of $8,000,000. I am sure that some of that money must have found its way into the district represented by my good friend Mr. FULLER. For that reason I regret very much his introduction of this drastic amendment and particularly his remarks in support of it.

Mr. Chairman, I have not arisen so much to reply to the remarks of the gentleman from Arkansas, however, but more particularly to submit for the consideration of the committee a few observations concerning the work of the Farm Board that are ordinarily completely overlooked. In spite of the most discouraging conditions in agriculture it is a pleasure to record that nearly 2,100,000 farmers, which is more than a third of all the farmers of the United States, are now members of cooperative societies. While the decline in prices of farm products lowers the total amount of transactions measured in dollars, yet the quantity of commodities handled has increased 15 per cent above that of the previous year. It is particularly interesting to note that in some specialized products that as high as three-fourths of the total output is handled cooperatively. Nearly 50 per cent of the dairy products, 33 per cent of the wool, 16 per cent of the cotton, 16 per cent of the commercial movement of grain, and 16 per cent of the livestock slaughtered under Federal inspection is likewise handled through cooperatives.

In addition to these noteworthy figures as to the quantity of farm products handled cooperatively it is well to note an illustration or two as to the price advantages that have accrued to producers in such handling of two or three representative products. In the marketing of eggs in the Pacific coast region where poultry producers are very effectively organized in cooperatives, the producers have averaged 4 cents per dozen above those sections of the country where cooperatives are not widely organized, in spite of the handicap of greater distance from market and consequent higher freight rates. In the marketing of wool the record shows that producers marketing their product through the national cooperative had a price advantage from 1 to 4½ cents per pound above that paid by local buyers. In dairy products it is noted that butterfat prices in Minnesota, which has 644 cooperative associations and 116,000 producers, were on an average 24 cents per pound, while in Kansas, where there are but 8 such associations with 10,000 producers, the average price of butterfat was but 19 cents.

In the aggregate this means an addition of $11,000,000 to the dairy income of the State of Minnesota, which in turn has been very substantially aided by the loans made to dairy cooperatives of that State. These are typical illustrations of the price advantage that has come to farmers in every State in the Union as a result of the encouragement given the cooperative movement. What these increases have meant in supplementing the scanty farm income during this period of depression can not be overestimated. The chairman of the subcommittee has just stated that in the new Congress very careful consideration will be given to a reorganization of all the agencies that have as their purpose the encouragement and assistance of agriculture. As one who has been vitally interested in that field for many years may I venture the hope that fair consideration shall be given to the work of the Farm Board in encouraging and supporting cooperative marketing.

In conclusion, Mr. Chairman, I submit one observation concerning the widespread criticism concerning the stabilization operations of the Farm Board. It ought not to be forgotten that stabilization was incidental to the main purpose of the agricultural marketing act, and that the encouragement of cooperative marketing was the main objective. Furthermore it ought to be stated for the Farm Board that it did not favor the use of the stabilization feature excepting in cases of great emergency such as developed in 1929 and 1930. It should also be remembered that a perfect deluge of appeals came to the board in 1930 urging the extensive purchase of wheat to stabilize prices. More than one-half of the money advanced in stabilization operations went to the States of Kansas, North Dakota, Nebraska, Washington, and Oklahoma, the very sections where criticisms of the Farm Board for this particular activity have been the sharpest. It would be exceedingly interesting if all the letters from Members of Congress from these sections could be placed in parallel columns with the criticisms now sumbitted.

The actual figures show that the Farm Board purchased approximately 190,000,000 bushels of wheat during the period from November 1, 1930, to July 1, 1931, at a price averaging at least 30 cents a bushel above Liverpool prices. It is the

opinion of well-informed persons that this action in pegging the price during that critical period not only added above $60,000,000 to the income of wheat farmers for that particular period, but that it actually saved hundreds of business and industrial institutions from failure. The same situation has been called to the attention of the committee by those thoroughly familiar with the cotton stabilization operations within that same period.

It is undoubtedly true that the stabilization operations of the Farm Board ought to be terminated, but I submit for the serious consideration of every friend of agriculture that criticism of this feature of the agricultural marketing act or of the Farm Board itself, in connection therewith, should not blind them to the valuable work that has been done in the cooperative field. It is well understood both on this floor and elsewhere that private agencies who are opposed to the extension of cooperative marketing have been using the stabilization operations as a smoke screen to accomplish their main objective, namely, the discouragement, if not elimination, of the whole cooperative movement.

Mr. Chairman, I agree that stabilization ought to be terminated, but that cooperative marketing should be retained and encouraged by adequate appropriations.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. HASTINGS. Mr. Chairman, I want to remind the House that this bill comes from the Committee on Appropriations and not from a legislative committee. You will remember that we created a revolving fund of $500,000,000 for use by the Farm Board. The activities of the Farm Board have been largely through stabilization activities and through loans to cooperatives. As the report shows, there have been loans made to cooperatives of $368,370,002.49, of which $210,234,402.17 has been repaid. There is left unpaid $158,138,600.27. If the amendment presented by the gentleman from Arkansas [Mr. FULLER] prevails, what are we going to do about the collection of the unpaid balance of $158,138,600.27? I pause for my good friend from Arkansas to answer that question.

Mr. FULLER. Could not any other function of the Government collect money due the United States, and could they not make arrangements to do so between now and the 1st day of July?

Mr. HASTINGS. There is no other method of collecting this money at the present time. The Committee on Appropriations, I want to remind you, is not a legislative committee, and can not provide new machinery. It is the duty of our committee to protect this fund and to make the necessary appropriation in order that the collection may be made. Until the legislative committee brings in some amendatory legislation and is enacted by the Congress of the United States, the Committee on Appropriations would be remiss in its duty if it did not bring in an adequate appropriation for the collection of this money and the protection of this fund.

Mr. FULLER. Will the gentleman yield?

Mr. HASTINGS. In just a minute. As has already been stated by the chairman of the subcommittee, the gentleman from Virginia [Mr. WOODRUM], we have made an estimate and recommended an appropriation only to cover the first half of the next fiscal year, anticipating that in the meantime the Congress of the United States may decide to enact legislation either continuing the Farm Board, after a careful study, or provide some other agency. However, until that is done I am sure the gentleman from Arkansas [Mr. FULLER] and every Member of the House will agree there must be some agency set up for collecting the money that is due the Government. Until that agency is set up, this is the only agency that has been created to make the collections for the Government. Surely if the gentleman from Arkansas [Mr. FULLER] will reflect, he will find that his amendment is improvidently made, to strike out the entire Farm Board, until there is some agency created as a substitute for it.

Mr. FULLER. Will the gentleman yield?

Mr. HASTINGS. I yield.

Mr. FULLER. The gentleman says they have the money now to operate until the 1st day of July, and if we cut out this appropriation they can not operate from that time on, but the committee is cutting them out after the 1st day of January, and they have nothing to operate with then. So you just give them six months more than I do.

Mr. HASTINGS. In reply to the gentleman from Arkansas [Mr. FULLER], we gave them only sufficient money to operate until the 1st of January, 1934, and in the event that Congress, prior to that time, does not enact some other legislation, it will be incumbent upon the Committee on Appropriations, through the deficiency bill, to make another appropriation in order to protect the outstanding loans of the Government.

Mr. McCLINTIC of Oklahoma. Mr. Chairman, I am in sympathy with what the distinguished gentleman from Arkansas has in mind. I am sure he desires to bring about reductions in expenditures in every case where it is necessary without destroying efficiency; but I am inclined to believe, after listening to what my colleague has said, that it would be better if he would withdraw his amendment and offer one to reduce the amount of the appropriation rather than trying to wipe out the entire jurisdiction.

Mr. HASTINGS. Mr. Chairman, will the gentleman yield?

Mr. McCLINTIC of Oklahoma. I yield.

Mr. HASTINGS. We have already cut this appropriation in two. We have only made an appropriation for six months.

Mr. HART. Mr. Chairman, will the gentleman yield?

Mr. McCLINTIC of Oklahoma. I yield.

Mr. HART. We have increased the appropriation by $200,000 annually. Will the gentleman from Oklahoma explain that?

Mr. HASTINGS. The gentleman from Michigan is mistaken about that. It was $900,000 year before last.

Mr. HART. It was $800,000 last year.

Mr. HASTINGS. The House appropriated $800,000 last year, but the Senate raised it and the conferees agreed.

Mr. HART. But the subcommittee is raising it this year. The appropriation last year was $800,000. We are now asked to appropriate $500,000 for six months, which is at the rate of $1,000,000 a year, an increase of $200,000.

Mr. McCLINTIC of Oklahoma. Mr. Chairman, one of the saddest chapters that has ever been written relating to farm relief is the report of what has been accomplished by this agency. Everyone knows I have just as much sympathy for the cooperatives as any person anywhere, yet when you look into the record of those who have been charged with this responsibility you are bound to come to the conclusion that their chief aim was to grab off as high a salary or as high a commission as they could and at the same time make it possible for their friends to receive gratuities of different kinds from expenditure of these large sums of money. So God speed the day when we can wipe out of existence any such activity that has no respect for the tillers of the soil but on the other hand seeks to do something to enrich a special group.

Some of us have information, more or less confidential, that this board can perform some functions within the next month or two and that a complete reorganization is to be made; that there is a possibility that the activities may be transferred to some other department of the Government. In view of this fact I shall refrain from offering an amendment but will go along with the committee unless it can be shown that the statement made by the distinguished gentleman from Michigan is correct and that they have increased the amount, based upon what we really gave them last year. If such should be the case, then in my opinion an amendment should be offered which would restore the appropriation to the figure of last year.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. McCLINTIC of Oklahoma. I shall be pleased to yield.

Mr. LAGUARDIA. We have heard much about exorbitant salaries. Who fixes the salaries of these cooperative officials?

Mr. McCLINTIC of Oklahoma. The cotton cooperatives get their money through an agency set up by the Farm Board known as the American Cotton Cooperative Association. This agency is under the complete control of the Farm Board.

Mr. FULLER. Absolutely.

Mr. LAGUARDIA. Who fixes their salaries?

Mr. McCLINTIC of Oklahoma. This agency that was set up by the Farm Board called the American Cotton Cooperative Association, in my opinion, fixes the salaries of its own members. For instance, Mr. Creekmore did receive a salary and commission amounting to $75,000 per year, and many others were paid salaries up to $50,000 per year.

Mr. HASTINGS. Mr. Chairman, will the gentleman yield for a correction?

Mr. McCLINTIC of Oklahoma. I yield.

Mr. HASTINGS. The Federal Farm Board had nothing whatever to do with the fixing of the salary of Mr. Creekmore or any other official.

Mr. McCLINTIC of Oklahoma. I think they did, because they controlled the money, and unless these funds had been provided by the Farm Board the scandalous conduct complained about would not have occurred.

Mr. SUMMERS of Washington. Mr. Chairman, during these five minutes I wish to call attention to what is before the House, and that is a motion to strike out all of the appropriation for the Federal Farm Board. I am not here to defend or condemn the board for anything it has done. I am here only to call attention to the situation as it now exists.

Nothing is carried for stabilization. The attempted stabilization of the prices of wheat and cotton, of course, brought down a great storm of protest on the heads of the Farm Board, but that is a thing of the past. The committee is not in favor of it. The Farm Board is not in favor of it. There is no money carried for that purpose.

There is in the bill a reappropriation of enough funds up to December 31 for them to carry on their cooperative work and the collection of moneys that have been loaned to the extent of hundreds of millions of dollars. There is no new appropriation. There are not even funds to carry on the activities of the board during the next fiscal year.

The statement has been made that practically all of the original amount appropriated has been lost. As a matter of fact, I asked the chairman of the board that specific question, and he states that about $200,000,000 of it is not lost. This is a very considerable sum of money.

The Farm Board has been helping the raisin people, the dairy people, the poultry people, the nut growers, the grain growers, the citrus people, potatoes, beet sugar, rice, tobacco, livestock, seeds, wool and mohair, and innumerable other industries throughout the United States and has large sums of money loaned to them. It must look after these collections. It must look after the functioning of certain of its activities at least until the end of the year or until such time as some legislative action is taken. They may be transferred to the Department of Agriculture. Some of them may be transferred to some other place. I do not know. That is for the future. However, it would be a mistake to strike out the appropriation at this time and allow all these activities to be suspended. The collection of hundreds of millions of dollars which have been loaned would fail with no one authorized to look after them.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. SUMMERS of Washington. Yes; for a very brief question.

Mr. COX. Will the gentleman permit me to read into his remarks a statement made by Lord Astor on the occasion of his recent visit, as to what is being done in other countries?

Mr. SUMMERS of Washington. I have not time to permit the gentleman to do that.

Mr. FULLER. What does he know about American farmers?

Mr. EATON of Colorado. Mr. Chairman, will the gentleman yield?

Mr. SUMMERS of Washington. Briefly.

Mr. EATON of Colorado. Is not the effect of this amendment simply to advance the date of closing out from the 31st day of December, 1933, to the 30th day of June, 1933?

Mr. WOODRUM. Is it not a fact that our subcommittee has barely given the Farm Board enough money to carry on its cooperative activities and look after the remainder of its revolving fund until it can be definitely determined by the new administration what it wants to do with the whole proposition?

Mr. SUMNERS of Washington. That is exactly the fact.

Just one reference to the revolving fund. As a matter of fact, it has up to this time completely revolved.

Mr. FULLER. You do concede, do you not, that they have lost three-fifths of this $500,000,000 and the other two-fifths is lost paper?

Mr. SUMMERS of Washington. Well, then we had better look for it. It is not $500,000,000; it is $500,000 to support the activities till the future of the board is determined, nothing else.

Mr. FULLER. Well, $500,000.

[Here the gavel fell.]

The CHAIRMAN. All time has expired. The question is on the amendment offered by the gentleman from Arkansas [Mr. FULLER].

The amendment was rejected.

Mr. HART. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HART: On page 18, line 15, after the words "Farm Board," strike out all down to the semicolon after the word "board" in line 22.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. HART. Mr. Chairman——

The CHAIRMAN. All time has expired on the paragraph and all amendments thereto.

Mr. HART. Mr. Chairman, I move to strike out the enacting clause.

The CHAIRMAN. The gentleman from Michigan is recognized for five minutes.

Mr. HART. Mr. Chairman, I want to call the attention of the House to this amendment, on page 18, line 15—

Payment of actual transportation expenses and not to exceed $10 per diem to cover subsistence and other expenses while in conference and en route from and to his home to any person other than an employee—

And so forth.

This provision permits the Farm Board to telegraph every propagandist they have in the United States and bring them here at Government expense. Last year we appropriated $800,000. This bill calls for $500,000 for six months.

They are expecting to receive further appropriations for the next six months. Therefore, they are trying to get $500,000, and at the expense of the Federal Treasury persons from all over the United States can come here and lobby upon Congress in the city of Washington. I think it is carrying lobbying a bit too far to permit the bringing of lobbyists here at the expense of the Government. I say this is the most pernicious bureau in the Government.

I heard the statement read by the gentleman from Georgia [Mr. Cox], and while I have the greatest respect for the gentleman from Georgia and I believe he is a good attorney, if I were to get up and discuss a legal question and got talking about a mandamus when I meant a writ of execution, he would know that I do not know very much about law. When I listen to his exposition of the farmers' plight, after I had spent 30 years living amongst farmers, as well as being one myself, I come to the conclusion that the gentleman knows nothing about the farm problem.

Mr. COX. Will the gentleman yield?

Mr. HART. Yes; certainly.

Mr. COX. I will say to the gentleman that I dare say as a farmer I have had a great deal more experience than

the gentleman himself and know a great deal more about the agricultural problems in the South than the gentleman is willing to give me credit for knowing.

Mr. HART. I know something about agriculture in the South. I have traveled there and have done business with the Southern gentlemen who carry on agriculture in the South. I also know something about the marketing problem of the South, and if you know the marketing problem of any agricultural product there is very little difference whether it is carried on North or South. However, it is a far cry from agriculture to the legal profession.

All this amendment does is to prevent taking money out of the funds of the Federal Farm Board to pay for bringing people here from various parts of the United States.

[Here the gavel fell.]

Mr. WOODRUM. Mr. Chairman, my friend from Michigan is mistaken when he states that all his amendment does is to strike out certain language. His amendment strikes out the enacting clause of the bill, but, of course, we understand what the gentleman is driving at.

The particular language in the bill to which the gentleman objects is the language which permits the Federal Farm Board to have agricultural experts come to Washington when occasion may arise to confer with representatives of the board and of cooperative associations in matters pertaining to their organization.

During the last fiscal year a little less than $2,000 was used by the Federal Farm Board for this purpose; and it is considered by the board to be very much cheaper and very much more efficient to have these people come from different parts of the country at relatively small expense to headquarters here to consider these problems than to send representatives all over the country to contact with them and get the information in that way.

Mr. Chairman, those of us who were here last year will remember that the gentleman from Michigan and myself were somewhat together on the question of the Farm Board. I know, and I believe the gentleman knows, that some disposition of this whole problem is going to be made and is going to be made very shortly. I have stated, and I reiterate, at the risk of boring my colleagues, that the appropriation here made is simply to carry on this activity for the required length of time until the new administration can go into the matter.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. LAGUARDIA. Mr. Chairman, I simply want to point out that although some of us may not live on a farm we have sense enough to know that if you want information concerning the Farm Board and the plight of the farmer you do not go to a stock exchange to get it, and it is the cotton exchange that has been fighting these appropriations ever since the first day the Federal Farm Board was created.

I submit there may be defects, but we should not destroy, at the behest of the stock-ticker boys, what little has been accomplished in trying to save the market for the real cotton producers and the other commodity prices. Every year we meet the same argument, and where does it come from? It comes from the stock-ticker boys.

We may not be farmers, as the gentleman from Michigan properly points out, but certainly we do not get our information from the stock ticker or the gamblers on the market who have brought ruin to the American farmer; neither do we get such information from the elevator men, as my friend from the wheat district said.

Mr. HART. Will the gentleman yield?

Mr. WOODRUM. Yes.

Mr. HART. I want to say for the benefit of the gentleman from New York [Mr. LAGUARDIA] that, although I have distributed farm products for 30 years, I have never bought or sold one dollar's worth of goods, either upon the Chicago Board of Trade or upon the New York Cotton Exchange or the New Orleans Cotton Exchange. In other words, I have never dealt in one dollar's worth of futures, and I am not interested in the cotton exchange or in the grain exchanges. I am interested in the farmers; and if we are going to close out this institution, and the gentleman from Virginia says this will probably be done, I should like to know why we should raise the appropriation at this time $100,000 for six months.

Mr. LAGUARDIA. May I ask the gentleman a question?

Mr. HART. Yes.

Mr. LAGUARDIA. Is the gentleman in favor of cooperative marketing?

Mr. HART. Yes; I am in favor of cooperative marketing.

Mr. LAGUARDIA. The gentleman has a very poor way of showing it.

Mr. HART. But I am not in favor of your supercooperatives that milk the farmers. That is what I am not in favor of, and I may say to the gentleman that every cooperative marketing organization that the Federal Farm Board has touched is broke to-day. They broke a number of cooperatives in my State, some of which were very prosperous, and that is why I am opposed to them.

[Here the gavel fell.]

The CHAIRMAN. The question is on the motion of the gentleman from Michigan to strike out the enacting clause.

Mr. HART. Mr. Chairman, I ask unanimous consent to withdraw the motion.

The CHAIRMAN. Is there objection?

There was no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan.

The question was taken; and on a division (demanded by Mr. HART) there were—ayes 34, noes 69.

So the amendment was rejected.

Mr. HART. Mr. Chairman, I offer another amendment.

The Clerk read as follows:

Page 19, line 1, after the word "exceeding," strike out "$500,000" and insert "$300,000."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan.

The question was taken, and the amendment was rejected.

Mr. HART. Mr. Chairman, I offer another amendment.

The Clerk read as follows:

Page 19, line 18, strike out the period after the word "counsel," insert a colon and the following: "*Provided further*, That not more than $15,000 of the appropriation herein contained shall be used to pay the salaries of members of the board."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

FEDERAL TRADE COMMISSION

For five commissioners, and for all other authorized expenditures of the Federal Trade Commission in performing the duties imposed by law or in pursuance of law, including secretary to the commission and other personal services, contract stenographic reporting services, supplies and equipment, law books, books of reference, periodicals, garage rental, traveling expenses, including not to exceed $900 for expenses of attendance, when specifically authorized by the commission, at meetings concerned with the work of the Federal Trade Commission, not to exceed $300 for newspapers, foreign postage, and witness fees, and mileage in accordance with section 9 of the Federal Trade Commission act; $500,000.

Mr. BANKHEAD. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 22, line 8, strike out the figures "$500,000" and insert "$801,416."

Mr. COCHRAN of Missouri. Mr. Chairman, I desire to offer a substitute for the amendment of the gentleman from Alabama. Is this the time?

The CHAIRMAN. The gentleman can offer it at the conclusion of the remarks of the gentleman from Alabama.

Mr. BANKHEAD. Mr. Chairman and gentlemen of the committee, a few days ago, when the distinguished chairman of the subcommittee, the gentleman from Virginia [Mr. WOODRUM], was making his general statement with reference to his bill, he very candidly stated that he had a good many representations made to him by those interested in this appropriation that possibly the subcommittee had cut the esti-

mates too deeply, and he would be glad to have the judgment of the committee reviewed in Committee of the Whole when the matter came up for consideration as to whether or not it was our judgment of the committee that this item should be raised. Therefore I have offered the pending amendment, which in effect restores the appropriation to the amount recommended by the Budget.

The amount of the Budget estimate for the Federal Trade Commission was $1,089,550. The amount estimated for the new economic investigation was $288,124. The amount proposed by my amendment raises the amount appropriated in the pending bill $301,416.

The substance of the amendment is that instead of appropriating $288,000-plus for entirely new investigations that the commission has in mind, my amendment will raise it to the amount estimated by the Budget for the purpose of carrying on in a practical, efficient, and effective fashion the investigations now under way by the commission, which are up to date but not concluded, but it is hoped to conclude them by the expiration of the next fiscal year.

Mr. McDUFFIE. The gentleman, then, is of opinion that it would not be wise for Congress to so cripple this commission as to prevent its orderly functioning in the investigations already undertaken?

Mr. BANKHEAD. That is the attitude that I am assuming in the matter, because I think the evidence justifies the contention of those who are responsible for the administration of this work that if this appropriation is slashed to such a large extent as recommended by the committee, it will then in effect absolutely cripple, if not almost destroy, the effectiveness of the operations they are now conducting. In that connection, Mr. Chairman, I have been furnished a statement showing the past activities and the present plans of the Federal Trade Commission, which I ask unanimous consent to incorporate in the RECORD as a part of my remarks.

The CHAIRMAN. Is there objection?

There was no objection.

The memorandum referred to is as follows:

It is inconceivable that this Democratic House should attempt by cutting the appropriation to wreck the Federal Trade Commission which was largely created by Democrats. The Federal Trade Commission was established at the recommendation of President Wilson by an act approved September 26, 1914. It was also given authority to enforce sections 2, 3, 7, and 8 of the Clayton Act approved October 13, 1914. It was directed to administer and enforce the Webb-Pomerene Export Trade Act approved April 10, 1918. The commission was one of the major projects in the plans of President Wilson. This agency is to be wrecked by cutting off its appropriation just at the time that a majority of its membership seems likely to become Democratic. The commission consists of five members, no more than three of whom shall be members of the same political party. There are at present only three commissioners, two Republicans and one Democrat. The term of one of the commissioners expired last September and another died in January of this year.

This commission is practically the only governmental agency to protect the public from exploitation by dishonest business. It is practically the only governmental agency protecting the honest business men from their dishonest rivals and the small business men from their more powerful and unscrupulous competitors. It is the agency that through its investigation of public utilities has done most to expose the evils of high finance and those in powerful financial positions.

It has been testified that the commission action in the so-called Pittsburgh Plus case against the United States Steel Corporation saved the farmers of the Middle West alone $30,000,000 a year. By preventing false and misleading advertising and misbranding, following the decision of the Supreme Court in Federal Trade Commission *v.* Winsted Hosiery Co. (258 U. S. 483), in which the commission ordered the Winsted Hosiery Co. to cease and desist selling cotton goods as and for wool, the commission has saved the public generally millions of dollars annually, and in doing this it has not duplicated or trespassed upon the work of any other department or agency. It handles and reaches matters that can not be reached by other agencies or departments of the Government, as is evidenced by the fact that many other departments and agencies send to it matters coming to their attention which they can not handle. The office of the Solicitor of the Post Office Department has sent cases of alleged false and misleading advertising and misbranding which that office could not handle to the commission for action and the commission has stopped the practices. The same is true of the food and drugs division of the Department of Agriculture and the Bureau of Foreign and Domestic Commerce of the Department of Commerce.

One of the earliest cases the commission had in court was against a chain mail-order house directing it to cease and desist misrepresenting its products and falsely disparaging and defaming competitors. This action of the commission was upheld by the court (Sears, Roebuck & Co. *v.* Federal Trade Commission, 258 Fed. 307). The commission also prevents such unlawful practices as price-fixing agreements, unlawful price discrimination, inducing breach of competitors' contracts, false defamation of competitors and false disparagement of competitors' products, commercial bribery, unlawful secret rebates, the use of fictitious mark-up prices, espionage, threats of suits for infringement not made in good faith, selling goods below cost to injure competitors and to destroy competition, substitution of products, conspiracies in restraint of trade, etc.

Some of the most important cases of the Department of Justice under the Sherman Act to protect the public from monopolies and restraints of trade have been as a result of investigations conducted by the Federal Trade Commission which were referred to the Department of Justice. Among these were the cases against the Cement Manufacturers Protective Association, General Outdoor Advertising Co., Maine Cooperative Sardine Co., Southern Hardware Jobbers Association, Maple Flooring Manufacturers Association, Radio Corporation, and Bolt & Nut Association. In practically all of these cases decrees were obtained by the department. The case now being conducted by the Department of Justice against the Sugar Institute in the United States District Court for the Southern District of New York resulted from an investigation by the Federal Trade Commission the results of which were transferred to the department.

The commission has conducted about 73 special broad investigations under section 6 of its act. Five of these have been at the direction of the President, 44 at the direction of the Senate, 8 at the direction of the House of Representatives, 2 at the direction of the Attorney General, and 14 upon the commission's own initiative. Many of these have resulted in court action to prevent unlawful practices or in remedial legislation. Some of these investigations so resulting are: Cooperation in American export trade, farm implements, the food inquiry, lumber trade association, and newsprint paper.

The broad investigations the commission intends to undertake next year are most important and of widespread public interest. They are:

"1. *Resolved*, That the commission undertake as soon as present work and appropriations available permit an inquiry into (1) the facts regarding the form, adequacy, and accuracy of published financial reports made to stockholders and others by corporations engaged in interstate commerce, excluding banks, common carriers, and public utilities; (2) the effects of the financial practices of corporations prior to and since the stock-market collapse of 1929, including the volume and extent of corporation call loans; issuance of bonds and preferred stocks accompanied by stock-purchase warrants or rights to subscribe; profits and losses of corporations from operations in the stock and bond markets; stock and script dividend issues of corporations; overexpansion through reinvestment of earnings, officers' salaries, and bonuses; participation of officers and directors in underwriting and syndicate operations in securities of their corporations; and purchases from and sales to their corporations of securities or other property; (3) the facts regarding concentration of the voting control of corporations through nonvoting and management stock and the effects thereof on the financial practices and methods of corporations; (4) all other financial practices or methods affecting the public, all with a view to determining whether the commission shall recommend to the Congress any changes in or additions to existing laws.

"2. *Resolved*, That the commission undertake as soon as present work and appropriations available permit an inquiry into the effects of the anti-trust acts with relation to the industries engaged in the exploitation of petroleum, natural gas, coal, and lumber and the advantages or disadvantages to business and to the general public of agreements of competing concerns in such industries with regard to prices, margins, production, profits, markets, territory, and any other similar agreement or arrangement affecting competition, and the like advantages or disadvantages in such industries of concentration of financial control and of combinations of plants, including the costs and profits of single and multiple plant operation, with a view to determining whether the commission shall recommend to the Congress any changes in or additions to existing law.

"3. *Resolved*, That the commission undertake as soon as the present work and appropriations available permit an inquiry into the facts regarding quantity discounts, selling below cost, reciprocity in dealing, brand advertising, guaranty against decline, wholesale and retail price stabilization, and the effects of each on business and the general public with a view to determining whether the commission shall recommend to the Congress any changes in existing law."

They concern matters often discussed in the last presidential campaign, referred to in the platforms of both political parties, and are the subjects of discussion among business men, lawyers, and economists throughout the country, as is shown by the memoranda inserted in the record of the hearing before the subcommittee at pages 257 and 263.

The commission voluntarily cut its estimates for the next fiscal year from $1,466,500, which it had available this fiscal year, to $1,300,000, a reduction of over 11 per cent. The Bureau of the Budget reduced the amount to $1,109,500, a reduction of over 24 per cent from the amount available for the present fiscal year.

The committee recommends $510,000, a reduction of over 65 per cent from the amount available for this fiscal year. Of course, this means and is in effect a scrapping of the commission. The commission could in no way effectively discharge the duties imposed upon it by the statutes. Out of this sum of $500,000 must come the salaries of the commissioners and the expenses of their offices, the expenses of the secretary's office, the expenses for the sections of accounts and personnel, docket, mail and files, etc., which must be maintained. There would remain only between $300,000 and $350,000 for all other purposes of the commission, including supplies, travel, witness fees, salaries, reporting service, etc. This would mean almost a complete cessation of law enforcement work. With only $10,000 for printing it will be impossible for the commission to enforce its orders to cease and desist. The commission's orders to cease and desist can only be enforced through the circuit courts of appeals. In these courts the commission must file a printed copy of the record in addition to briefs and petitions. The printed records and briefs and petitions through the Government Printing Office cost on an average of from $3,500 to $5,000 a case. The commission in addition to such expense has the printing expense involved in the release of its decisions, reports, etc.

Congress by statute has imposed upon this commission the duty of preventing unfair methods of competition, unlawful tying and exclusive dealing contracts, unlawful price discrimination, acquisition of stock of competitors, interlocking directorates, and the administration of the export trade act. In these matters the commission has no discretion. The Supreme Court in Federal Trade Commission *v.* Gratz (253 U. S. 421) held that unfair methods of competition include practices which are opposed to good morals because characterized by deception, bad faith, fraud or oppression, and practices against public policy because of their dangerous tendency unduly to hinder competition or create monopoly. In compliance with these duties the commission had pending on December 31, 1932, 411 preliminary inquiries, 425 applications for complaint, 183 complaints charging violations of law, 9 court cases, and 8 export trade investigations. Fifty-one Webb Law associations, representing about 1,000 producers and manufacturers located in all parts of the United States, have taken advantage of the provisions of the export trade act under the supervision of the commission. The purpose of that law is to promote exports from the United States to foreign countries and to enable American exporters to operate on equal terms with their competitors abroad. Associations are required to file with the commission documents and reports covering their organization and operation. If the commission has reason to believe that an association is in violation of the law it conducts an investigation and makes recommendations for the adjustment of the association's business. This involves continuing supervision of these associations and this work by the Federal Trade Commission. Section 6 of the Federal Trade Commission act contemplates special investigations upon the initiative of the commission such as were planned for next year and the maintenance of a staff to make such investigations. Many of these have saved the consumer millions of dollars. The investigation now being conducted at the initiative of the commission into price bases has resulted in substantially lower prices on cement because of the elimination of the so-called plus-freight rate from fixed basing points rather than from point of shipment and manufacture. To perform its duties under section 6 of the Federal Trade Commission act and in connection with the prevention of the practices condemned by the acts which the commission enforces, the commission must keep a limited number of trained investigating economists, accountants, and statisticians. Many of these have been continuously engaged in investigations of the organization, conduct, and business practices of corporations and business concerns for a period of nearly 30 years. They constitute an important economic, accounting, and research organization. The personnel of the old Bureau of Corporations of the Department of Commerce, created about 1903 upon the recommendation of President Theodore Roosevelt, was transferred to the Federal Trade Commission upon its organization. There came from that bureau 93 such specially trained investigators. The commission's estimates for 1934 provide for a staff of only 102 such investigators.

The proposal of the committee means the cessation at the end of the present fiscal year of practically all of this work and the scattering and loss of the especially trained personnel. And if the commission were to be given adequate funds for the following fiscal year, it would be impossible to reassemble the present highly trained personnel, consisting of lawyers trained in this particular phase of work, investigating statisticians, accountants, and economists, all of whom are necessary to the proper discharge of the duties imposed upon the commission by law. This would mean a much less efficient administration of the law during the years it would require to again train adequate efficient personnel. The commission in its estimates for 1934 requested only enough to maintain its permanent personnel, asking nothing for contingent or temporary personnel. Without this highly trained, permanent personnel upon which expansion can be made for the particular needs of the particular moment, it would be impossible for the commission to properly perform its functions under section 6 of the act.

Since its organization and to June 30, 1932, the commission has instituted 20,206 preliminary inquiries, of which 6,124 have resulted in the docketing of applications for complaint and 13,659 have been dismissed after investigation. During the same period the commission has docketed 6,933 applications for complaints. Of these, 1,270 were disposed of by the proposed respondent stipulating to abandon the practice complained of, 3,564 were dismissed after full investigation, and in 1,717 of them complaints were issued. During the same period the commission has issued 2,054 complaints, of which 37 were disposed of by the respondent stipulating to abandon the practice complained of, 671 were dismissed after hearing, and in 1,143 of which orders to cease and desist were issued. During the same period the commission has instituted and disposed of 375 investigations under the export trade act. To June 30, 1932, the commission had been involved in 209 cases in the Federal courts. It had been successful in 112 of these, and 97 of them had been unfavorable to the commission. It must be remembered that the vast majority of the cases in which the commission issues orders to cease and desist are never taken to court, the respondents complying with the orders. It is only the closest and most doubtful action of the commission that is taken to court. This commission is breaking new ground and preventing practices that could not before be reached under the law.

If it is intended to abolish the commission, do it directly. Do not leave it the definite duties imposed upon it by statute and then not give it funds with which to discharge those duties. Do not tie the hands of the commission by failing to give funds with which to discharge its duties.

The President elect advocated a cut of 25 per cent in Government expenses. The amount allowed by the Bureau of the Budget amounts to approximately a 25 per cent cut for this commission. It seems that this commission is one of the few agencies really attempting to cooperate in the efforts at economy.

The cut recommended by the committee for this commission is larger on its appropriation for the entire year than is the per cent allowed the Farm Board to December 31, 1933, only on its requests for the entire year. The Farm Board requested only $1,000,000 for the entire year and was allowed until December 31, 1933, $500,000, and the committee indicates that it expects the Farm Board to be abolished.

Out of a total decrease in this bill below the Budget estimate of $1,657,522, $1,000,000 is from the sum for the Supreme Court Building upon the assurance that that $1,000,000 is not needed now, and $599,550 is from this one agency, the Federal Trade Commission, leaving a reduction of only $57,972 for all other agencies included in the bill.

Mr. BANKHEAD. Mr. Chairman, although it will be after the vote is taken, I think, if gentlemen will read the syllabus which I have incorporated of the activities, past and present, and the necessities for the future work on the part of the commission, they will all feel that they are justified in casting a vote for the amendment which proposes to increase the amount actually to the amount recommended by the Budget except for new investigations. That presents, as far as I know, the object that I have in mind in offering the amendment.

Mr. McDUFFIE. Mr. Chairman, will the gentleman yield?

Mr. BANKHEAD. Yes.

Mr. McDUFFIE. I have not seen the figures, and I ask the gentleman if he would give us the figures representing the cut, so far as the Budget is concerned.

Mr. BANKHEAD. Yes; I can do that. It is shown in the report of the committee on page 24. The amount of the estimate was $1,109,550. The amount recommended by the report of the subcommittee is $510,000, which is a decrease from the Budget estimate of $599,550.

Mr. O'CONNOR. Will the gentleman tell us who is responsible for this reduction—from what source it comes?

Mr. BANKHEAD. Mr. Chairman, I presume that question could be better answered by the chairman of the subcommittee or some members of the committee, though, in the orderly investigation of the necessity for this appropriation and with the object of effecting substantial economies, I presume it was the then judgment of the subcommittee and apparently of the full committee that this reduction was justified.

The CHAIRMAN. The time of the gentleman has expired.

ABOLISH FEDERAL TRADE COMMISSION

Mr. PATMAN. Mr. Chairman, I rise in opposition to the amendment. Not only am I opposed to increasing the appropriation for the Federal Trade Commission but I am in favor of abolishing the commission entirely. I have in my hand a statement that goes back to the Democratic platform of 1912 and to the Republican platform of 1912, showing exactly what the two major parties at that time had in mind when they asked for the creation of a commission, which resulted in the creation of the Federal Trade Com-

mission. I have before me also President Wilson's message delivered in this House on January 20, 1914. He used this language when he was explaining about this Federal Trade Commission:

The country would not wish to see it empowered to make terms with monopoly or in any sort assume control of business.

The bill was introduced in the House by Mr. Covington, who was chairman of the Committee on Interstate and Foreign Commerce at that time. Mr. Covington, on April 14, 1914, in explaining the object of the creation of this commission, used this language:

Consequently the establishment of a commission having powers of regulation or control of prices or the power directly to issue orders controlling the lawful operations of industrial business in this country has no place in the bill reported.

Remember what the author of the bill said—that he did not want this commission to have anything to do with prices, and he did not want them to issue any kind of orders controlling lawful operations of any business; but that is exactly what the Federal Trade Commission is doing to-day, attempting to control lawful operations of business in this country and working against the public interest. I quote further from Mr. Covington:

The commission has in no sense been empowered to make terms with monopolies or in any way to assume control of business. Further, it has not been clothed with authority to make a declaration as to the innocuousness of any particular corporation or agreement even coupled with the right to revoke such order in the future.

No one can say that they are not doing that to-day. They are doing it. The man who wrote the bill, the Member of this House who presented it to this Congress, said that this commission should not do what they are doing to-day in organizing Federal trade practices conferences, or, in other words, that they have no power or right to do it.

PRESENT PERSONNEL OBJECTIONABLE

Mr. BANKHEAD. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield.

Mr. BANKHEAD. Does not that indictment go rather to the personnel of the commission than to the inherent purposes for which it was established?

Mr. PATMAN. I thoroughly agree with the gentleman, but I am not willing to make any appropriation to give to these present members of the commission, because they are doing something that not only they do not have the right to do, but they are doing things in violation of the laws of this country. I have been working for three or four years on this matter, and I believe I know what the Federal Trade Commission has been doing. The Republican members of the committee filed a minority report upon the original bill in 1914, and they state this:

The reported measure does not transfer to the commission any function now exercised by the court but will be of assistance to the court in the enforcement of laws regulating commerce.

Nothing to suggest that the commission may get law violators together for the purpose of getting them to agree not to violate the law any more if they are exonerated of their previous violations. They are supposed to help the courts in enforcing the law, and they are not doing it. They are an obstacle in the way of law enforcement in this country.

When the bill went to the Senate it was reported out by Mr. Newlands, chairman of the Committee on Interstate and Foreign Commerce, on June 13, 1914. I will not quote what he said, but I will ask unanimous consent to extend my remarks and put these excerpts in the RECORD.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

PARTY PLATFORM IN 1912

Mr. PATMAN. The Democratic platform in 1912 contained the following:

ANTITRUST LAW

A private monopoly is indefensible and intolerable. We therefore favor the vigorous enforcement of the criminal as well as a civil law against trusts and trust officials, and demand the enactment of such additional legislation as may be necessary to make it impossible for a private monopoly to exist in the United States.

We favor the declaration by law of the conditions upon which corporations shall be permitted to engage in interstate trade, including, among others, the prevention of holding companies, of interlocking directors, of stock watering, of discrimination in price, and the control by any one corporation of so large a proportion of any industry as to make it a menace to competitive conditions.

We condemn the action of the Republican administration in compromising with the Standard Oil Co. and the tobacco trust, and its failure to invoke the criminal provisions of the antitrust law against the officers of those corporations after the court had declared that from the undisputed facts in the record they had violated the criminal provisions of the law.

We regret that the Sherman antitrust law has received a judicial construction depriving it of much of its efficacy, and we favor the enactment of legislation which will restore to the statute the strength of which it has been deprived by such interpretation.

The Republican platform in 1912 contained the following language:

FEDERAL TRADE COMMISSION

In the enforcement and administration of Federal laws governing interstate commerce and enterprises impressed with a public use engaged therein there is much that may be committed to a Federal trade commission, thus placing in the hands of an administrative board many of the functions now necessarily exercised by the courts. This will promote promptness in the administration of the laws and avoid delays and technicalities incident to court procedure.

President Wilson addressed the Congress of the United States, January 20, 1914, in which he stated that the country would necessarily approve of an interstate trade commission. He used the following language:

The country would not wish to see it empowered to make terms with monopoly or in any sort assume control of business.

H. R. 15613, a bill to create an interstate trade commission, was reported favorably by the Committee on Interstate and Foreign Commerce to the House April 14, 1914 (63d Cong., 2d sess., Rept. No. 533). In this report it was stated:

Consequently the establishment of a commission having powers of regulation or control of prices, or the power directly to issue orders controlling the lawful operations of industrial business in this country, has no place in the bill now reported.

The commission has in no sense been empowered to make terms with monopoly or in any way to assume control of business.

It has not been clothed with authority to make a declaration as to the innocuousness of any particular corporation or agreement, even if coupled with the right to revoke such order in the future.

The Republican members of the committee filed minority views concurring in the majority report in which it was stated:

The reported measure does not transfer to the commission any function now exercised by the courts, but will be of assistance to the courts in the enforcement of the laws regulating commerce.

The measure contains no changes of substantive law as to antitrust matters, because under the rules of the House such legislation is referred to another committee of the House.

H. R. 15613 was reported favorably to the Senate by Mr. Newlands, chairman of the Committee on Interstate and Foreign Commerce, June 13, 1914. This report discloses that the Senate changed the House bill by adding provisions regarding unfair competition and the investigation of foreign-trade practices.

On page 13 of the report it is stated:

One of the most important provisions of the bill is that which declares unfair competition in commerce to be unlawful, and empowers the commission to prevent corporations from using unfair methods of competition in commerce by orders issued after hearing, restraining and prohibiting unfair methods of competition, which orders are enforceable in the courts.

The committee gave careful consideration to the question as to whether it would attempt to define the many and variable unfair practices which prevail in commerce and to forbid their continuance or whether it would, by a general declaration condemning unfair practices, leave it to the commission to determine what practices were unfair. It concluded that the latter course would be the better, for the reason, as stated by one of the representatives of the Illinois Manufacturers' Association, that there were too many unfair practices to define, and after writing 20 of them into the law it would be quite possible to invent others.

It may be stated that representatives of the National Implement and Vehicle Manufacturers' Association, the Ohio Manufacturers' Association, and the Illinois Manufacturers' Association approved the passage of a trade commission bill and a provision regarding the inquiry into and condemnation of unfair practices in trade.

It is believed that the term "unfair competition" has a legal significance which can be enforced by the commission and the courts, and that it is no more difficult to determine what is unfair competition than it is to determine what is a reasonable rate or what is an unjust discrimination. The committee was of the opinion that it would be better to put in a general provision condemning unfair competition than to attempt to define the numerous unfair practices, such as local price cutting, interlocking directorates, and holding companies intended to restrain substantial competition.

It will be noted that the committee reporting the bill said that the commission would be empowered to prevent corporations from engaging in unfair competition by orders issued after hearing, and so forth. There is no inference in this language that the commission may get violators of the law together and get them to agree that they will not violate the law any more if exonerated for past violations.

The conference report on the bill was submitted September 4, 1914, Sixty-third Congress, second session, Report No. 1142.

The report discloses that the name "Federal Trade Commission" was agreed upon instead of the "Interstate Trade Commission," as suggested by the Senate bill.

Section 5 declares unfair methods of competition to be unlawful and empowers the commission, after hearing, to order the discontinuance of the use of such methods.

It is now generally recognized that the only effective means of establishing and maintaining monopoly, where there is no control of a natural resource as of transportation, is the use of unfair competition. The most certain way to stop monopoly at the threshold is to prevent unfair competition. This can be best accomplished through the action of an administrative body of practical men thoroughly informed in regard to business, who will be able to apply the rule enacted by Congress to particular business situations, so as to eradicate evils with the least risk of interfering with legitimate business operations.

It is impossible to frame definitions which embrace all unfair practices. There is no limit to human inventiveness in this field. Even if all known unfair practices were specifically defined and prohibited, it would be at once necessary to begin over again. If Congress were to adopt the method of definition, it would undertake an endless task. It is also practically impossible to define unfair practices so that the definition will fit business of every sort in every part of this country. Whether competition is unfair or not generally depends upon the surrounding circumstances of the particular case. What is harmful under certain circumstances may be beneficial under different circumstances.

The orders of the commission will be enforceable only through the courts. In order to obtain the speediest settlement of disputed questions, it is provided that the commission shall apply for the enforcement of its orders directly to the circuit court of appeals. The findings of the commission as to the facts are to be conclusive. The court's function is restricted to passing on questions of law. The court will determine such questions on the record in the proceeding before the commission. No new evidence may be adduced on the hearing in court except upon good cause shown, and if the court permits the introduction of additional evidence, such evidence will be taken by the commission and then filed in court with its new or modified findings based thereon. The judgment of the court of appeals will be final, subject only to review by the Supreme Court upon writ of certiorari.

This section is entirely new to the House bill, but it appeared in a somewhat similar form in the Senate bill, and the managers on the part of the House believed it wise to accept the provision in the form in which it now appears.

It will be noted that order to the commission will be enforceable only through the courts. Therefore it was never contemplated that Federal trade-practice rules could be enforced by the Federal Trade Commission.

Mr. Covington, the author of the bill, on May 19, 1914 (pp. 8840–8841, CONGRESSIONAL RECORD), made the following statement in the House of Representatives in opening the debate on the consideration of H. R. 15613. He stated:

Mr. Chairman, the bill to create an interstate trade commission now presented to the House is the first legislative measure resulting from the message of the President read to Congress in January last on the subject of trusts and monopolies. In that message he recommended the creation of an interstate trade commission as an instrument of information and publicity and as a clearing house for the facts by which both the public mind and the managers of great business undertakings should be guided. Moreover, he suggested in that message that the commission ought to be made capable of assisting the courts in the shaping of corrective processes.

It is true that the President in urging the creation of a trade commission referred to the wishes of the business men as follows:

"They desire the advice, the definite guidance, and information which can be supplied by an administrative body, an interstate trade commission."

And straightway certain big business men and their lawyers, who had in the field of industrial business constantly been hovering in the dim shadows of the twilight zone which separates honesty from unlawfulness, began to tail the message as the forerunner of a statute that would enable them to propose to a Government commission their plans for exploitation, conceived with subtlety and phrased in fair words, and obtain, perchance, that initial approval which would mean individual immunity at a later date if the subtlety of the plan had been followed by fraud or criminality in its consummation.

But these persons had not critically analyzed the President's message, for in speaking of the opinion of the country regarding the trade commission he had also said:

"I would not wish to see it empowered to make terms with monopoly or in any sort to assume control of business, as if the Government made itself responsible."

The truth is that the administration idea and the idea of business men generally is for the preservation of proper competitive conditions in our great interstate commerce. That equal and complete freedom in business which is the way of peace and of success as well is best promoted by the unrestrained and uncontrolled genius and industry of the American business man. Consequently it would be completely out of harmony with our present idea to establish a commission clothed with the effective power to approve and disapprove proposed contracts, to enforce fair competition, to prohibit unfair competition, to have powers of regulation or control of prices, and the power directly to issue orders outlining the scope of the lawful operations of industrial business of this country.

Senator Newlands, June 25, 1914, page 11084, CONGRESSIONAL RECORD, stated the following with reference to the objects of the commission in regard to unfair competition:

UNFAIR COMPETITION

One of the most important provisions in this bill, Mr. President, is that which relates to unfair competition. Unfair competition is made unlawful, and the commission is authorized, when any case of unfair practice or unfair method is brought to its attention, to summon the party charged and to have a hearing, and if it decides that the practice or method is unfair, to issue an order compelling its discontinuance, and if that order is not obeyed, it can carry the matter into court and secure a judgment of the court compelling obedience to the commission's order.

It will be noted that Senator Newlands left no inference that those engaged in unfair practices should be brought together, but made it very positive that the party charged must be summoned and a hearing held, and so forth.

Mr. Covington, in the House September 10, 1914, page 14927 of the CONGRESSIONAL RECORD, stated with reference to section 5, the unfair-competition section:

There then followed in the section a method of procedure for the enforcement in the courts of the orders of the commission, similar to the procedure now in force with respect to the orders of the Interstate Commerce Commission.

The House managers gave a good deal of consideration to this section. It was recognized that it did not appear in any form in the House bill. It embraced within its broad and elastic scope all the specific practices against which there had been prohibitions in the Clayton bill. After careful consideration, however, it seemed the wise thing to accept the section.

It is now generally recognized that the only effective means of establishing and maintaining monopoly, where there is no control of a natural resource or of transportation, is by the use of unfair competition. The most certain way to stop monopoly at the threshold is to prevent unfair competition. This can be best accomplished through the action of an administrative body of practical men thoroughly informed in regard to business who will be able to apply the rule enacted by Congress to particular business situations so as to eradicate evils with the least risk of interfering with legitimate business operations.

Mr. Covington further stated that the unfair-competition section does not alter or interfere with the declaration he made in the House when the original bill was pending in which he stated:

It has not been clothed with authority to make a declaration as to the innocuousness of any particular corporation or agreement even if coupled with the right to revoke such order in the future.

It will be noted that the committee reporting this bill said that the commission would be empowered to prevent corporations from engaging in unfair competition by orders issued after hearing, and so forth.

There is no inference in this language that the commission may get violators of the law together and get them to agree that they will not violate the law any more if exonerated for past violations.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. PATMAN. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes.

Mr. WOODRUM. Will the gentleman permit me to propound a request?

Mr. PATMAN. Could I have 10 additional minutes on this? It is very important.

Mr. WOODRUM. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and all amendments thereto close in 30 minutes.

Mr. PATMAN. Reserving the right to object, I have two amendments to offer.

Mr. SCHAFER. Mr. Chairman, I object.

Mr. WOODRUM. Mr. Chairman, I move that all debate on this paragraph and all amendments thereto close in 30 minutes.

Mr. LAGUARDIA. Mr. Chairman, I offer an amendment to the motion, that all debate close in 45 minutes.

The CHAIRMAN. The gentleman from New York [Mr. LAGUARDIA] offers an amendment to the motion, that all debate on this paragraph and all amendments thereto close in 45 minutes.

The question is on the amendment offered by the gentleman from New York.

The amendment was agreed to.

The motion as amended was agreed to.

NO TWILIGHT ZONE VIOLATIONS TO BE CONDONED

Mr. PATMAN. Now, with reference to this bill, Mr. Covington, when he brought in the conference report May 19, 1914, said this:

> It is true that the President, in urging the creation of a trade commission, referred to the wishes of the business men, and straightaway certain big business men and their lawyers, who had in the field of industrial business been hovering in the dim shadows of the twilight zone which separates honesty from unlawfulness, began to compile a message as a forerunner of a statute that would enable them to propose to the Government commission their plans for exploitation, conceived with subtlety and phrased in fair words, and obtain, perchance, that initial approval which would mean individual immunity at a later date; but those persons had not critically analyzed the President's message, because the President said, "I would not wish to see it empowered to make terms with monopoly or in any way to assume control of business."

VIOLATING LAWS

So you have before you what the two major political parties, the President of the United States, and the Members of Congress had in mind when this commission was created, and you have before you conclusive evidence, if you have made the least investigation, that they have taken an about-face, and they are doing exactly the opposite of what they were created to do. Are you going to continue to give money to people who violate the laws of this country?

POWER HEARINGS

I have before me about 50 volumes of the power hearings. I presume that is the most meritorious investigation that has been conducted by the Federal Trade Commission. But what has it done and what will be accomplished by reason of it? Will any one of you ever read one of these books? Not one. They have maps and plats and everything else, that cost the Government hundreds and thousands of dollars to compile. No one will ever look at them. Why? They are old. The statute of limitations has run against every offense that has been committed which they disclose. New injurious methods will be adopted because no laws have been enacted or suggested by the Federal Trade Commission to prevent it.

CHANGED NAME

The National Electric Light Association was held up in a very unfavorable light. It was given some very unfavorable publicity, and I am sure it was deserving of that unfavorable publicity; but what did they do in order to get out of it, and in order to clear their name of the charges in these books? The directors changed the name from the National Electric Light Association to something else, and now when you hear its name mentioned it has no reference to that investigation. Before these investigations have been concluded these books will cost the people over $1,500,000, if they go ahead as they have in the past. They are over four years old. The power investigation should have been made by a congressional committee, and better results would have been obtained and possibly laws would have been passed that would have saved the people hundreds of millions of dollars caused by the Insull companies' collapse.

COTTONSEED INVESTIGATION

I have here the books of another investigation. These are not all of the books, either. This is the cottonseed investigation that has been going on nearly four years. They have disclosed, it is true, all kinds of violations of the law; but what has been done about it? They will have to wait until their report is made before they will say anything about it, and then the statute of limitations will have run against every person who violated the criminal laws.

MEMBERS OF CONGRESS SHOULD MAKE INVESTIGATIONS

I am intensely interested in what those reports contain, but they are not worth the paper they are written on, because the companies that were shown up in an unfavorable light have changed their way of doing business, and in some instances have changed to methods more detrimental to the public interest. It will take another investigation to disclose it.

Any investigation that is made in this country should be made by Members of Congress, or a Member of Congress should be a member of that investigating body, in order that when something is discovered where a bill should be introduced to correct it that Member of Congress can introduce that bill and he can call it to the attention of his colleagues and to the country in that way. Why wait 4 or 5 or 6 or 7 years in order to disclose violations of the law? All abuses should be promptly corrected by suitable legislation. This is never done in connection with Federal Trade Commission investigations.

Any good that this commission has done within the last 10 years could have and doubtless would have been done at much less expense and in a more effective manner.

If we deny the appropriation at this time, we can later grant such a portion of it as may be necessary.

Two committees of Congress are now investigating the same things investigated by the Federal Trade Commission in connection with the power hearings.

[Here the gavel fell.]

Mr. COCHRAN of Missouri. Mr. Chairman, I offer an amendment as a substitute for the Bankhead amendment.

The Clerk read as follows:

> Amendment offered by Mr. COCHRAN of Missouri as a substitute for the amendment offered by Mr. BANKHEAD: On page 22, in line 8, strike out "$500,000" and insert in lieu thereof "$1,000,000."

Mr. COCHRAN of Missouri. Mr. Chairman, the gentleman from Texas [Mr. PATMAN] doubtless has constituents in the same position as some of mine, their toes have been stepped on by the Federal Trade Commission. So have mine, and I, too, have protested. I am still protesting, and I hope for better administration.

While not approving of some of the practices of the present Federal Trade Commission, we are speaking of the economic division. When the gentleman says that the Federal Trade Commission investigations have been of no value, for once in his life he is all wet. If the cottonseed corporations have changed their methods since the investigation he speaks of, some good has come of that investigation. There are many other benefits, but time does not permit me to refer to them.

The purpose of my amendment is to give the Federal Trade Commission money with which it may properly operate the economic division. The amendment has nothing to do with the other work of the commission. If the $1,000,000 is appropriated, it will still be $89,550 below the amount the Budget desired the Federal Trade Commission to have. That seems a fair reduction on so small an appropriation. The committee has cut the appropriation for the regular work $311,416, and it has stricken from the bill entirely $288,134 for future investigations, or a total of $599,550, more than half the Budget estimate. I would rather stop the regular work than stifle the investigations planned.

Mr. LAGUARDIA. Sixty-five per cent reduction.

Mr. COCHRAN of Missouri. Yes. That is correct. What is the Bankhead amendment going to do? If the Bank-

head amendment is adopted, the investigations are going to close when the division of economics makes its final report. The division of economics is ready to go ahead with new investigations, the most important investigations the Federal Trade Commission has ever instituted, the investigations in reference to the financial practices of corporations and violations of the antitrust laws. They want to get after the crooked methods that have been adopted by the corporations of this country which have resulted in the loss of billions of dollars to the people of this country. We do not want a recurrence of the stock-market crash of 1929. This investigation proposed might prevent it.

The gentleman from Texas [Mr. PATMAN] spoke of the value of the investigations. Refer, if you please, to the preliminary report on chain stores made to the Senate yesterday. Let me say to Members from the farm districts that the report made to the Senate yesterday showed that the chain stores in selling $37,000,000,000 worth of goods made a profit in excess of 26 per cent, or over $9,000,000,000. Think of such a profit on the sale of $37,000,000,000 worth of goods. Where do the commodities come from that they distribute to the consumers? A great part of them come from the farms, where the men who produced those staples can not even secure the cost of production. Are you satisfied that the distributor gets all the profits and the producer none?

If the Members of this Congress desire some good to come from these investigations, then legislation should follow to prevent such enormous profit being made by those who pass the goods in the final state to the consumer. If you can work out a proper law, you should be able to help the producers.

The investigation of the commission in reference to the utility companies, if it accomplished nothing more than to remove from the schools and the universities of our country the paid lecturers of the utility companies who were teaching the youth of the land the propaganda handed out by the power corporations, it was well worth more than the sum that has been spent; that alone, I say, has been well worth every dollar used. [Applause.] But if you have followed the reports already made, you will find that public-utility commissions throughout the country have used the information to advantage. It was information that the corporations had denied the States, claiming the States had no right to request it. Holding companies held themselves immune from State commissions.

[Here the gavel fell.]

Mr. COCHRAN of Missouri. Mr. Chairman, I ask unanimous consent to proceed for two additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. COCHRAN of Missouri. Our State commissions were helpless, and every line in the reports referred to has been read by the members of the State commissions and most of it given to the press through newspapers not controlled by the trust. More valuable information is on the way and in the end the final report will contain the recommendations for legislation to cure the abuses that have been uncovered. This investigation was wished on the commission in the hope it would be buried, but it is to be congratulated on the way it has been handled. It has so far performed a very valuable public service.

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. COCHRAN of Missouri. I yield to my friend from Wisconsin.

Mr. SCHAFER. The gentleman stated that much of the commodities sold by the chain stores was farm products. The gentleman will also find that they have sold millions of dollars' worth of imports from depreciated-currency countries.

Mr. COCHRAN of Missouri. I can not go into that right now. That subject will be disposed of in about 10 days under the gentleman's petition.

In conclusion, Mr. Chairman, let me say that the fault is not with the Federal Trade Commission act; the fault is with those who are administering that act. That is what the gentleman from Texas [Mr. PATMAN] should give some thought to. As I said before, I am not in favor of the way the act has been administered, but I am not going to try to destroy the law when I know a new President is going to take hold on March 4; and if my reading of his life and character tell me anything, it tells me he is going to make use of the Federal Trade Commission and is going to find some way to stop the practices the corporations of this country have been using that have resulted in the loss of so many billions of dollars to the American people. You are going to find a different situation in the Trade Commission during the Roosevelt administration.

Mr. MAY. Mr. Chairman, will the gentleman yield?

Mr. COCHRAN of Missouri. I yield with pleasure.

Mr. MAY. Is it not a fact this is the only instrumentality he will have through which to gain information as to such activities?

Mr. COCHRAN of Missouri. It is absolutely the only instrumentality through which such information can be gained. If my amendment is not adopted, I am sure it will be passed in the next Congress, because I feel positive the incoming President will ask for it.

Mr. KVALE. Mr. Chairman, will the gentleman yield?

Mr. COCHRAN of Missouri. I yield to the gentleman from Minnesota, who has followed the work of this commission so closely.

Mr. KVALE. Is it not true that even were it adopted in the next Congress, between now and then this entire corps of experts will have to be dispersed; and that failure to give them sufficient funds to operate on will result in loss of efficiency?

Mr. COCHRAN of Missouri. One hundred men would probably be dismissed, and it would take years and years to assemble them again; in fact, I doubt if such a fine body of men, so well adapted to this class of work, could ever be assembled again. They are beyond question as fine a group as could be found. It would be nothing short of a calamity to destroy such a useful organization. You can not measure their value to the people of the country in dollars and cents. [Applause.]

[Here the gavel fell.]

Mr. WOOD of Indiana. Mr. Chairman, the question was asked the gentleman from Missouri whether or not there was any other agency that might make these investigations and take proper procedure to correct the wrongs disclosed. The gentleman from Missouri is mistaken when he says there is not. The Department of Justice is the only one which can give enforcement to any facts that are found by the Federal Trade Commission. They have no power to enforce anything except the power they have arrogated to themselves.

This is another case of the camel getting its nose under the tent. This is another case where Congress created a commission and gave it power to adopt regulations and they immediately commenced legislating and going far beyond the intention of Congress that created it.

I came to Congress in 1915, the very next session after the adoption of the law creating this commission.

It has been growing and growing and growing until it has gotten far beyond what it was ever expected to be; and has assumed and taken upon itself responsibilities that were never intended.

They commenced it very soon after the commission was created. I happened to call upon Mr. Edward Hurley immediately after I came here. Mr. Hurley was then a member of that commission. He told me that he hoped I liked my job better than he liked his. I said, "What is the matter with your job?" He said, "When I came here as a member of this commission I supposed it was the purpose of the commission to help legitimate business against illegitimate business. I find I was entirely mistaken. On the contrary, the illegitimate business, through the instrumentality of this commission, is constantly interfering with legitimate business."

They kept on doing that thing until they had made a nuisance of themselves in the business world. We were

promised last year that if the appropriation then asked was granted they could complete all of the investigations then authorized. Knowing that they are going to be out of business, they have gotten up three different sets of resolutions; and I wish every Member of the House could read them. They are in the hearings. They propose, if the amount which they are requesting is allotted, to stick their nose into every conceivable business.

Mr. WARREN. Will the gentleman yield?

Mr. WOOD of Indiana. I yield.

Mr. WARREN. Is not the gentleman mistaken in that last remark he made? If the Bankhead amendment should be adopted restoring this to the Budget recommendation, has it not been stated that that is only on the theory of completing what they have already started and not beginning these three new investigations?

Mr. WOOD of Indiana. That is the point I want to make. If the Bankhead amendment is adopted, it will furnish them ample means to complete all their investigations now authorized and prevent doing the things they are proposing to do under these three resolutions.

I want to say to you gentlemen that if there was any time when business interests in this country should be given a rest from being pried into it is now. What we want is something to encourage business and not something to discourage and destroy business. It is so discouraged now that no one is going to invest money until he knows what this Congress and the next administration is going to do. If there is anything in the world that would further deter the progress of business in this country, it would be the adoption of the amendment offered by the gentleman from Missouri; and I also trust that the good judgment of the committee will not go further than adopt the amendment offered by the gentleman from Alabama.

[Here the gavel fell.]

Mr. HASTINGS. Mr. Chairman, I am opposed to the substitute motion of the gentleman from Missouri and I think it is due to the Members of the House that some explanation should be made from the viewpoint of the members of the committee that held the hearings and reported the bill.

As has been stated, this commission has grown enormously in the last few years. Every Member of the House when he writes back to his constituents reports that he is for economy. This bill covers some twenty-eight activities and you will promise your constituents that you are in favor of cutting down these appropriations. You should begin here. On this particular item, I think I occupy middle ground.

Let us see how much the Federal Trade Commission has been expending. In 1915 it had an appropriation of $184,016.20. In 1916 this amount grew to $430,964. Now this same Federal Trade Commission is asking for more than $1,089,550. Reference has been made to the work of the commission. I agree that the Federal Trade Commission has done some good work, but do you know what the utility investigation referred to cost the Government of the United States? It took four years' time and it cost $1,625,000.

It will be a little difficult for you to explain to your constituents why this investigation should have taken so long a time and should have cost so much money.

The investigation of the chain stores was a valuable investigation, but it cost the taxpayers of the country $750,000.

The members of the commission before our committee stated that all of these major investigations would be completed under this present appropriation and prior to June 30, 1933, and for that reason we felt justified in reducing the appropriation.

Let me state another thing to the Members of the House. The hearings disclose that the commission has 418 employees. I challenge any one of you in your own district to read the hearings of the Federal Trade Commission and justify the number of employees they have and the salaries they pay.

I know the time allotted me will not permit and I hesitate to trespass upon your time, but if you will follow the breakdown of this appropriation showing the salaries paid by the Federal Trade Commission you will find that you can not justify them. In the first place, you have $10,000 for each member, which makes a total of $50,000. If you subtract $50,000 from $510,000, the amount carried in this bill, you have $460,000 left, which is a considerable sum of money. I would like for you to turn to the hearings and see the large salaries that are paid to the 418 employees. I am sorry I do not have the time to refer to each in detail, but if you would do this, in my judgment, you will agree that the amendment of the gentleman from Missouri ought not to prevail.

I think this appropriation can and should be materially reduced. We have tried to do this, and it is up to the Members of the House to say whether or not they want to economize and will sustain the committee. I have voted for no increase. I have voted for no new items. We should begin to reduce with each item. Most of the investigations are directed by Senate resolutions. If the amount carried in the bill does not cover the expenses of specially directed investigations, then the Senate should provide for their payment.

Mr. AMLIE. Mr. Chairman, I should like to refresh your minds at this time by referring to the time four years ago when the Senate adopted a resolution authorizing the investigation of the utilities. You may remember that at that time there came to Washington the biggest army of lobbyists that has ever appeared here before any committee to head off an investigation. One hundred and eighty lawyers appeared before the Senate Interstate Commerce Committee. The investigations show that several utility companies at that time spent $400,000 in order to prevent an investigation that was to be headed by Senator WALSH of Montana, and it was regarded as a great victory for the Power Trust when they finally succeeded in having the investigation conducted by the Federal Trade Commission. But events have shown that they only jumped from the frying pan into the fire.

I call this to your attention because while their methods may not be quite as obvious to-day, the Power Trust never dies. It is as effective to-day as then, and it is the most effective organization in political campaigns that we have in the United States to-day.

A year ago it was proposed by the Bureau of the Budget to reduce the appropriation for the Federal Trade Commission 34 per cent against an average reduction of only 1½ per cent for all other governmental activities. This time the committee has come out with a reduction from the amount of the Bureau of the Budget, which was 24 per cent, with a further reduction of 41 per cent, when the average reduction, I venture to say, this year would amount to less than 1 per cent for all governmental activities.

Why this great enthusiasm on the part of these gentlemen to secure economy at the expense of the Federal Trade Commission, which was allowed $1,109,550 by the Budget, and so little at the expense of other governmental activities that would amount to $4,000,000,000, or a sum 4,000 times as great? There is something significant in this.

Let me call your attention to this fact. The statement has been made that the reports on the utility hearings are so much waste paper. These hearings show that there is over $900,000,000 of water in the public-utility capitalization of the country to-day. I venture to say that the incoming administration is going to make better use of these reports and these facts that have been uncovered than has been made of facts uncovered by any investigation that has ever been held in the history of the United States.

The assumption is made here that the $288,000 is for new investigations. This is misleading, and I venture to say that these statements are calculated to mislead.

There are in the Federal Trade Commission three departments, the administrative, the legal, and the economic. The economic department was taken over bodily in 1914, when the commission was created, by taking over the old Bureau

of Corporations, which was founded in 1904 by Theodore Roosevelt's administration. It had 92 employees at the time, and it has only 103 employees at the present time. So this new work, so called by the chairman of the subcommittee, Mr. WOODRUM, Mr. BANKHEAD, and Mr. MCDUFFIE, is nothing whatever but the old fact-finding body, the Bureau of Corporations, started in 1904, and has not been substantially increased. This is the economic department of the Federal Trade Commission.

Suppose we wipe out this amount. This is going to leave the Federal Trade Commission in the position wherein they are charged, as a matter of law, with the administration of the unfair practices act, first of all, and this would leave to be expended for the administrative and the legal end of the commission all the funds appropriated even under the Bankhead amendment. It would leave nothing for the economic department at all. The gentlemen seek to accomplish by indirection what they would not dare to attempt directly.

This would be true if the Federal Trade Commission were going to be managed by the same personnel that have managed it for the last few years. I certainly think you gentlemen on the Democratic side have an opportunity to look for something better with five commissioners and out of this number two vacancies to be filled by the incoming administration. I do not see why this commission can not be made a whistling good commission in the next administration and I do not see why there should be any fear on your part to give the commission the funds necessary in order to perform the functions it was intended to perform. [Applause.]

Mr. JONES. Mr. Chairman, I am opposed to both the Bankhead and the Cochran amendments. I am in favor of abolishing this independent commission altogether. In fact, I offered such an amendment to the economy bill. Such an amendment will be offered to this measure. Nearly all the investigations by the Federal Trade Commission so far as I have been able to learn, have been so long drawn out and so voluminous that by the time the reports were issued they were practically useless.

I believe that the essential functions of this commission can be more expeditiously handled by House and Senate committees and by the Department of Justice. The gentleman from Wisconsin, who has just preceded me, talked about the lawyers who came down here when the question of investigating the Power Trust was an issue. If you remember, that issue was tightly drawn in another body, and these power attorneys were here gathered to have it sent to the Federal Trade Commission instead of investigated by a special committee of the Senate, as was provided by the resolution.

The desperate fight that was carried on in the Senate was rather bitter. Those who were interested in having a real investigation voted to have the Senate committee investigate it instead of sending it to the Federal Trade Commission.

A famous stateman once said that the way to resume specie payment was to resume. The way to economize is to economize, and a pretty good way to do it is to abolish this commission.

Mr. MAY. Will the gentleman yield?

Mr. JONES. Yes.

Mr. MAY. May I ask the gentleman if he really thinks that the next President will appoint to the two vacancies men of that caliber?

Mr. JONES. That is wholly irrelevant; of course, he would not, but I think he can accomplish the same purpose at an infinitely less cost to the Government by having the work done through special committees of the House and the Senate. If we had these investigations made by special committees of the House and the Senate, we probably would have had the results in time to have been of real value.

Mr. CHRISTGAU. Will the gentleman yield?

Mr. JONES. Yes.

Mr. CHRISTGAU. The gentleman will realize that the duties of Members of Congress have become so great that they would not have the time to give to these special investigations.

Mr. JONES. Oh, they have plenty of opportunity to do useful work. There are a number of committees in the House which seldom meet. From these Members appropriate special committees could be selected.

The majority report on the bill in 1914 stated that the object of this commission was to get facts that might be useful for legislation. I understand that this Federal Trade Commission has practically recommended no legislation. They have made long investigations resulting in printed volumes that practically nobody ever reads. Volumes that practically no Member of Congress ever reads or asks about. I believe if this commission is abolished and the work is done by special committees of the House and Senate and by the Department of Justice the investigations will have a real value and we will get reports in time so as to be useful to Members of the House in legislation.

The CHAIRMAN. Let the Chair state to the committee that the Chair is somewhat embarrassed. When the time was limited to 45 minutes, nine Members stood up. All but three have been heard. Now the gentleman from Texas [Mr. BLANTON], a member of the committee, asks a part of the time. He ought to have it. There are only 15 minutes left. The Chair wonders if it will be possible for the gentleman from Texas to have three minutes, and that would leave four minutes each for the other three.

Mr. WOODRUM. Mr. Chairman, as chairman of the subcommittee, I desire about seven minutes in which to close the debate.

The CHAIRMAN. The Chair has agreed to recognize the gentleman from South Carolina [Mr. FULMER], who was on his feet a while ago, and the gentleman from Minnesota [Mr. KVALE], who was already yielded two minutes of his time, and the gentleman from New York [Mr. LAGUARDIA] for five minutes. We have 13 minutes remaining.

Mr. BLANTON. Mr. Chairman, I want three minutes to defend the action of the committee.

Mr. PARKER of New York. Mr. Chairman, I ask unanimous consent that the time of the gentleman from Texas [Mr. JONES] may be extended for one minute in order that I may ask him a question.

Mr. COCHRAN of Missouri. Mr. Chairman, reserving the right to object, but one Member has spoken on this matter in favor of the pending amendment since the agreement was made as to time. If those who are opposed to the amendments are going to get all of the time, how are the others going to express their views?

The CHAIRMAN. The gentleman from New York asks unanimous consent that the time of the gentleman from Texas [Mr. JONES] be extended for one minute, so that he may interrogate him. Is there objection?

Mr. JONES. Mr. Chairman, I do not want to take the time.

Mr. STAFFORD. Mr. Chairman, reserving the right to object, would it be agreeable to the chairman of the committee to extend the time for 10 minutes, so as to permit him and the gentleman from Washington [Mr. SUMMERS] to close the debate?

Mr. WOODRUM. Yes. I ask unanimous consent, Mr. Chairman, that the time be extended for 10 minutes, and in making that request I ask the members of the committee to continue to cooperate during the rest of the day, as they have in the past, because we have to finish the bill to-day. I ask unanimous consent that the time be extended, and that as chairman of the committee I be permitted to close in seven minutes of that time.

The CHAIRMAN. That would add only three minutes to the time. Will the gentleman agree to extend the time for 13 minutes?

Mr. WOODRUM. Certainly.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. PARKER of New York. Mr. Chairman, I ask unanimous consent that the gentleman from Texas [Mr. JONES] may proceed for one minute, not to be taken out of the time already allotted.

The CHAIRMAN. Is there objection?

Mr. SCHAFER. Mr. Chairman, I object.

The CHAIRMAN. The Chair recognizes the gentleman from Minnesota [Mr. KVALE] for three minutes.

Mr. KVALE. Mr. Chairman, I ask unanimous consent to extend my remarks by including therein a memorandum which I have had prepared upon this item.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. KVALE. Mr. Chairman, I rise to support the Cochran amendment, and in the event of its failure to support the Bankhead amendment which is before us for consideration; and I address myself now to that exhibit, the group of volumes which has been brought before us by the gentleman from Texas, my good friend Mr. PATMAN. It troubles me when I have to differ with him or with the chairman of the subcommittee or with the chairman of the Committee on Agriculture; but in this instance I am convinced that I am right and that they are wrong, for we can not both be right.

It strikes me that in the name of economy we are dealing a death blow to one of the vital agencies of this Government, performing an all-important task in regulating industries, in regulating competitive groups in business that sorely need regulation; and that if we permit this commission, this essential arm of our Government, to be crippled we are doing something to the American people and not something for them, and we will be doing it in the much-abused name of economy. I think we should oppose it with every resource at our command.

Mr. PITTENGER. Mr. Chairman, will the gentleman yield?

Mr. KVALE. Yes.

Mr. PITTENGER. Does the gentleman know of any other agency of the Government that is looking after the interests of all of the American people like the Federal Trade Commission?

Mr. KVALE. I do not, and if I had known the gentleman from Missouri [Mr. COCHRAN] was going to say all he did say, I would have given him the five minutes that I was entitled to instead of two minutes, because I believe he stated an essential truth when he said the new administration is planning deliberately and openly to use this agency in carrying out some of the great purposes enunciated and stressed during the whole campaign this last summer and autumn. I hope these amendments, at least that of the gentleman from Missouri [Mr. COCHRAN] will be adopted. I yield back the remainder of my time. [Applause.]

Mr. Chairman, I rarely ask the privilege of extending my remarks in the RECORD, but the subject matter here is of such importance, the time is so limited, and the attached memorandum contains such well-presented data that I do take advantage of the consent granted me, and hope Members of Congress will carefully read the article, so that we may amend our action to-day when the bill is considered in another body of Congress, then subsequently in conference.

It is inconceivable that this Democratic House should attempt by cutting the appropriation to wreck the Federal Trade Commission which was largely created by Democrats. The Federal Trade Commission was established at the recommendation of President Wilson by an act approved September 26, 1914. It was also given authority to enforce sections 2, 3, 7, and 8 of the Clayton Act approved October 15, 1914. It was directed to administer and enforce the Webb-Pomerene Export Trade Act approved April 10, 1918. The commission was one of the major projects in the plans of President Wilson. This agency is to be wrecked by cutting off its appropriation just at the time that a majority of its membership seems likely to become Democratic. The commission consists of five members, no more than three of whom shall be members of the same political party. There are at present only 3 commissioners, 2 Republicans and 1 Democrat. The term of one of the commissioners expired last September and another died in January of this year.

This commission is practically the only governmental agency to protect the public from exploitation by dishonest business. It is practically the only governmental agency protecting the honest business men from their dishonest rivals and the small business men from their more powerful and unscrupulous competitors. It is the agency that through its investigation of public utilities has done most to expose the evils of high finance and those in powerful financial positions.

It has been testified that the commission action in the so-called Pittsburgh Plus case against the United States Steel Corporation saved the farmers of the Middle West alone $30,000,000 a year. By preventing false and misleading advertising and misbranding, following the decision of the Supreme Court in Federal Trade Commission *v.* Winsted Hosiery Company (258 U. S. 483), in which the commission ordered the Winsted Hosiery Co. to cease and desist selling cotton goods as and for wool, the commission has saved the public generally millions of dollars annually, and in doing this it has not duplicated or trespassed upon the work of any other department or agency. It handles and reaches matters that can not be reached by other agencies or departments of the Government, as is evidenced by the fact that many other departments and agencies send to it matters coming to their attention which they can not handle. The office of the Solicitor of the Post Office Department has sent cases of alleged false and misleading advertising and misbranding, which that office could not handle, to the commission for action, and the commission has stopped the practices. The same is true of the Food and Drugs Division of the Department of Agriculture and the Bureau of Foreign and Domestic Commerce of the Department of Commerce.

One of the earliest cases the commission had in court was against a chain mail-order house, directing it to cease and desist misrepresenting its products and falsely disparaging and defaming competitors. This action of the commission was upheld by the courts (Sears, Roebuck & Company *v.* Federal Trade Commission, 258 Fed. 307). The commission also prevents such unlawful practices as price-fixing agreements, unlawful price discrimination, inducing breach of competitors' contracts, false defamation of competitors and false disparagement of competitors' products, commercial bribery, unlawful secret rebates, the use of fictitious mark-up prices, espionage, threats of suits for infringement not made in good faith, selling goods below cost to injure competitors and to destroy competition, substitution of products, conspiracies in restraint of trade, etc.

Some of the most important cases of the Department of Justice under the Sherman Act to protect the public from monopolies and restraints of trade have been as a result of investigations conducted by the Federal Trade Commission, which were referred to the Department of Justice. Among these were the cases against the Cement Manufacturers' Protective Association, General Outdoor Advertising Co., Maine Cooperative Sardine Co., Southern Hardware Jobbers Association, Maple Flooring Manufacturers Association, Radio Corporation, and Bolt and Nut Association. In practically all of these cases decrees were obtained by the department. The case now being conducted by the Department of Justice against the Sugar Institute in the United States District Court for the Southern District of New York resulted from an investigation by the Federal Trade Commission, the results of which were transferred to the department.

The commission has conducted about 73 special broad investigations under section 6 of its act. Five of these have been at the direction of the President, 44 at the direction of the Senate, 8 at the direction of the House of Representatives, 2 at the direction of the Attorney General, and 14 upon the commission's own initiative. Many of these have resulted in court action to prevent unlawful practices or in remedial legislation. Some of these investigations so resulting are: Cooperation in American export trade, farm implements, the food inquiry, lumber trade association, and newsprint paper.

The broad investigations the commission intends to undertake next year are most important and of widespread public interest. They are:

"1. *Resolved,* That the commission undertake as soon as present work and appropriations available permit an inquiry into (1) the facts regarding the form, adequacy, and accuracy of published financial reports made to stockholders and others by corporations engaged in interstate commerce, excluding banks, common carriers, and public utilities; (2) the effects of the financial practices of corporations prior to and since the stock-market collapse of 1929, including the volume and extent of corporation call loans; issuance of bonds and preferred stocks accompanied by stock-purchase warrants or rights to subscribe; profits and losses of corporations from operations in the stock and bond markets; stock and script dividend issues of corporations; overexpansion through reinvestment of earnings, officers' salaries, and bonuses; participation of officers and directors in underwriting and syndicate operations in securities of their corporations; and purchases from and sales to their corporations of securities or other property; (3) the facts regarding concentration of the voting control of corporations through nonvoting and management stock and the effects thereof on the financial practices and methods of corporations; (4) all other financial practices or methods affecting the public, all with a view to determining whether the commission shall recommend to the Congress any changes in or additions to existing laws.

"2. *Resolved,* That the commission undertake as soon as present work and appropriations available permit an inquiry into the effects of the antitrust acts with relation to the industries engaged in the exploitation of petroleum, natural gas, coal, and lumber and the advantages or disadvantages to business and to the general public of agreements of competing concerns in such industries with regard to prices, margins, production, profits, markets, terri-

tory, and any other similar agreement or arrangement affecting competition, and the like advantages or disadvantages in such industries of concentration of financial control and of combinations of plants, including the costs and profits of single and multiple plant operation, with a view to determining whether the commission shall recommend to the Congress any changes in or additions to existing law.

"3. *Resolved*, That the commission undertake as soon as the present work and appropriations available permit an inquiry into the facts regarding quantity discounts, selling below cost, reciprocity in dealing, brand advertising, guaranty against decline, wholesale and retail price stabilization, and the effects of each on business and the general public with a view to determining whether the commission shall recommend to the Congress any changes in existing law."

They concern matters often discussed in the last presidential campaign, referred to in the platforms of both political parties, and are the subjects of discussion among business men, lawyers, and economists throughout the country, as is shown by the memoranda inserted in the record of the hearing before the subcommittee at pages 257 and 263.

The commission voluntarily cut its estimates for the next fiscal year from $1,466,500, which it had available this fiscal year, to $1,300,000, a reduction of over 11 per cent. The Bureau of the Budget reduced the amount to $1,109,500, a reduction of over 24 per cent from the amount available for the present fiscal year. The committee recommends $510,000, a reduction of over 65 per cent from the amount available for this fiscal year. Of course this means and is in effect a scrapping of the commission. The commission could in no way effectively discharge the duties imposed upon it by the statutes. Out of this sum of $500,000 must come the salaries of the commissioners and the expenses of their offices, the expenses of the secretary's office, the expenses for the sections of accounts and personnel, docket, mail and files, etc., which must be maintained. There would remain only between $300,000 and $350,000 for all other purposes of the commission, including supplies, travel, witness fees, salaries, reporting services, etc. This would mean almost a complete cessation of law enforcement work. With only $10,000 for printing it will be impossible for the commission to enforce its orders to cease and desist. The commission's orders to cease and desist can only be enforced through the circuit courts of appeals. In these courts the commission must file a printed copy of the record in addition to briefs and petitions. The printed records and briefs and petitions through the Government Printing Office cost on an average of from $3,500 to $5,000 a case. The commission in addition to such expense has the printing expense involved in the release of its decisions, reports, etc.

Congress, by statute, has imposed upon this commission the duty of preventing unfair methods of competition, unlawful tying and exclusive dealing contracts, unlawful price discrimination, acquisition of stock of competitors, interlocking directorates, and the administration of the export trade act. In these matters the commission has no discretion. The Supreme Court in Federal Trade Commission *v.* Gratz, 253 U. S. 421, held that unfair methods of competition include practices which are opposed to good morals because characterized by deception, bad faith, fraud, or oppression, and practices against public policy because of their dangerous tendency unduly to hinder competition or create monopoly. In compliance with these duties the commission had pending on December 31, 1932, 411 preliminary inquiries, 425 applications for complaint, 183 complaints charging violations of law, 9 court cases, and 8 export trade investigations. Fifty-one Webb law associations, representing about 1,000 producers and manufacturers located in all parts of the United States, have taken advantage of the provisions of the export trade act under the supervision of the commission. The purpose of that law is to promote exports from the United States to foreign countries and to enable American exporters to operate on equal terms with their competitors abroad. Associations are required to file with the commission documents and reports covering their organization and operation. If the commission has reason to believe that an association is in violation of the law, it conducts an investigation and makes recommendations for the adjustment of the association's business. This involves continuing supervision of these associations and this work by the Federal Trade Commission.

Section 6 of the Federal Trade Commission act contemplates special investigations upon the initiative of the commission such as were planned for next year and the maintenance of a staff to make such investigations. Many of these have saved the consumer millions of dollars. The investigation now being conducted at the initiative of the commission into price bases has resulted in substantially lower prices on cement because of the elimination of the so-called plus-freight-rate from fixed basing points rather than from point of shipment and manufacture. To perform its duties under section 6 of the Federal Trade Commission act and in connection with the prevention of the practices condemned by the acts which the commission enforces, the commission must keep a limited number of trained investigating economists, accountants, and statisticians. Many of these have been continuously engaged in investigations of the organization, conduct, and business practices of corporations and business concerns for a period of nearly 30 years. They constitute an important economic, accounting, and research organization. The personnel of the old Bureau of Corporations of the Department of Commerce, created about 1903 upon the recommendation of President Theodore Roosevelt, was transferred to the Federal Trade Commission upon its organization. There came from that bureau 93 such specially trained investigators. The commission's estimates for 1934 provide for a staff of only 102 such investigators.

The proposal of the committee means the cessation at the end of the present fiscal year of practically all of this work and the scattering and loss of the especially trained personnel. And if the commission were to be given adequate funds for the following fiscal year, it would be impossible to reassemble the present highly trained personnel, consisting of lawyers trained in this particular phase of work, investigating statisticians, accountants, and economists, all of whom are necessary to the proper discharge of the duties imposed upon the commission by law. This would mean a much less efficient administration of the law during the years it would require to again train adequate efficient personnel. The commission in its estimates for 1934 requested only enough to maintain its permanent personnel, asking nothing for contingent or temporary personnel. Without this highly trained, permanent personnel upon which expansion can be made for the particular needs of the particular moment, it would be impossible for the commission to properly perform its functions under section 6 of the act.

Since its organization and to June 30, 1932, the commission has instituted 20,206 preliminary inquiries, of which 6,124 have resulted in the docketing of applications for complaint and 13,659 have been dismissed after investigation. During the same period the commission has docketed 6,933 applications for complaints. Of these, 1,270 were disposed of by the proposed respondent stipulating to abandon the practice complained of, 3,564 were dismissed after full investigation, and in 1,717 of them complaints were issued. During the same period the commission has issued 2,054 complaints, of which 37 were disposed of by the respondent stipulating to abandon the practice complained of, 671 were dismissed after hearing, and in 1,143 of which orders to cease and desist were issued. During the same period the commission has instituted and disposed of 375 investigations under the export trade act. To June 30, 1932, the commission has been involved in 209 cases in the Federal courts. It had been successful in 112 of these, and 97 of them had been unfavorable to the commission. It must be remembered that the vast majority of the cases in which the commission issues orders to cease and desist are never taken to court, the respondents complying with the orders. It is only the closest and most doubtful action of the commission that is taken to court. This commission is breaking new ground and preventing practices that could not before be reached under the law.

If it is intended to abolish the commission, do it directly. Do not leave it the definite duties imposed upon it by statute and then not give it funds with which to discharge those duties. Do not tie the hands of the commission by failing to give funds with which to discharge its duties.

The President elect advocated a cut of 25 per cent in Government expenses. The amount allowed by the Bureau of the Budget amounts to approximately a 25 per cent cut for this commission. It seems that this commission is one of the few agencies really attempting to cooperate in the efforts at economy.

The cut recommended by the committee for this commission is larger on its appropriation for the entire year than is the per cent allowed the Farm Board to December 31, 1933, only, on its requests for the entire year. The Farm Board requested only $1,000,000 for the entire year and was allowed until December 31, 1933, $500,000, and the committee indicates that it expects the Farm Board to be abolished.

Out of a total decrease in this bill below the Budget estimate of $1,657,522, $1,000,000 is from the sum for the Supreme Court Building upon the assurance that that $1,000,000 is not needed now, and $599,550 is from this one agency, the Federal Trade Commission, leaving a reduction of only $57,972 for all other agencies included in the bill.

Reduction by committee from Bureau of the Budget estimates for special investigations to be undertaken in place of such investigations being completed	$283,134
Committee reduction from Bureau of the Budget estimate for law enforcement activities of the commission	311,416

Mr. FULMER. Mr. Chairman, many Members of Congress are loud in speaking about economy, but when we have an opportunity to save something like a half million dollars of the hard-earned money of the people of this country, various Members stand here and speak about what we are going to do to some department of this Government if we fail to increase various appropriations. We even find members of the economy bloc here to-day offering amendments adding from $300,000 to $500,000 to the appropriation carried in this bill, which has been carefully worked out by the subcommittee of the Committee on Appropriations. It is generally understood by every member that this committee always brings in the proper appropriations to take care of various departments.

I would like for you to read the debate at the time the Federal Trade Commission act was passed by Congress. You will find in every speech made that the necessity for creating the Federal Trade Commission was for the purpose of looking after the interest of the public and keep-

ing alive fair competition among the various industries of this country. I charge now, and if I had the time I could prove it to you, that this commission, in practically every instance, under its rules and regulations in connection with the administering the Federal Trade Commission act, has operated in the interest of industry and against the best interest of the public. Let me give you a concrete case. In 1928 Procter & Gamble, which owns the Buckeye cottonseed-oil mills; the Southern Cotton Oil Co.; and Swift & Co., meat packers, owning the Swift cottonseed-oil mills, requested a trade-practice conference. A member of the commission acted as chairman of the conference and helped work out trade-practice rules, and these rules were indorsed by the Federal Trade Commission. The chairman actually stated, in considering these rules, "While you are not permitted to put certain things in the rules, it can be understood by you, and you can operate just as effectively as if you had put them in."

What happened? This great industry went back to the Southland and put into effect the trade-practice rules and were enabled to form a combination that absolutely fixed and controlled prices in buying cottonseed and in selling these products. This monopoly, indorsed by the Federal Trade Commission, has robbed the producers out of millions of dollars during the past four years, and they are still doing it to-day.

Mr. WARREN. Will the gentleman yield?

Mr. FULMER. In one minute I will yield. Now, what happened? Two years after the Federal Trade Commission had given its indorsement to these trade-practice rules, because of being able to fix and control prices, farmers and cottonseed buyers commenced to complain to their Representatives and Senators in Congress until there was introduced and passed in the Senate a resolution calling for an investigation by this same commission that had indorsed this price-fixing scheme. Volume after volume containing these investigations has been printed, which never will be read by Members of Congress. This investigation and the printing of these volumes cost the Government over $200,000. The other day, in speaking to one of the men connected with the commission, he said: "We are struggling to bring in that report, and I know it should be a very damaging report, but," he said, "here is our trouble. It is hard to bring in a report that would place the cottonseed-oil industry into court when they have our indorsement which placed these industries in a position to do the things complained of."

What happened in the aluminum investigation? They spent thousands of the taxpayers' hard-earned money and made a report that justified a meritorious case for the courts, but you have not heard of any lawsuit. Out of all of the other expensive investigations made you do not find them taking anybody into the courts or putting anybody in jail. The commission made this statement when asked why no prosecutions: "We usually tell them to go home and to not do that any more."

Mr. WARREN. Will the gentleman yield for a question?

Mr. FULMER. In just a minute.

What did the Attorney General say about these trade-practice conferences? He said, "Perhaps most of these trade-practice rules are all right, but after these industries secure the indorsement of the Federal Trade Commission representing the Government, they go back home and nudge a little here and a little there, and when we call their hands, they plainly state, 'We have the indorsement of the Federal Trade Commission.'"

Mr. WARREN. Will the gentleman yield?

Mr. FULMER. I yield.

Mr. WARREN. Is not the entire speech of the gentleman made against the administration of the law, rather than the real purpose of the act itself? Is not the gentleman's entire complaint against the administration, under the recent administration?

Mr. FULMER. If the gentleman is correct, why do you at this time want to increase this appropriation from three hundred to five hundred thousand dollars when they do not need it? If it is the gentleman's belief that President-elect Roosevelt will appoint a better membership on this commission, it will be time enough then to make additional appropriations. Mr. Chairman, I hope the committee will vote down these amendments, and that later we will be able to abolish the commission, which will be in the interest of the public and the taxpayers of this country.

The CHAIRMAN. The time of the gentleman from South Carolina [Mr. FULMER] has expired.

Mr. LAGUARDIA. Mr. Chairman, the defense against necessary appropriations seems to be based entirely upon the amount of evidence necessary to ascertain the facts. Mr. Chairman, there is not a mail-fraud case, there is not a stock-fraud case of a criminal nature that does not require weeks and weeks to try. Now, because the Federal Trade Commission, in investigating conditions and practices of the power monopoly in this country, has taken several volumes of testimony, that is an argument why, though the practice is dishonest, and of such magnitude, we should discontinue the investigation, discard and ignore all the evidence already obtained, and permit exploitation of the consumers and defrauding of investors to continue. I submit, Mr. Chairman, that the Federal Trade Commission at this time is the only fact-finding body we have, and if the new administration can remove the present evil influence on that commission—and one of these evil influences is Commissioner Humphreys—I believe the commission could do some very useful public service in the immediate future.

Mr. PATMAN. Will the gentleman yield?

Mr. LAGUARDIA. Mr. Chairman, we are in the midst of a financial panic and industrial depression. It is an epidemic. It has been all caused by dishonest practices and outright dishonesty. Witness Insull companies, bank stocks, foreign securities, fake bonds, false information of stocks. Here is this commission prepared to go into those conditions, because unless we have the facts Congress can not legislate intelligently. Mr. Chairman, let me remind my colleagues that during the last session this House was all worked up over the practices of stock and commodity exchanges and felt the necessity of placing stock exchanges under proper Federal supervision and regulation. The Committee on the Judiciary struggled with that problem. It was impossible to obtain all the necessary facts.

The Committee on Banking and Currency of the Senate has been engaged in an investigation for several months, and to date has accomplished nothing. Now, that the Federal Trade Commission is prepared to go into just such an investigation, first looking into the facts regarding the accuracy of published financial reports to stockholders; second, an investigation of call loans, the issuance of bonds and preferred stock; and, third, the concentration of the voting control of corporations through nonvoting management stock, the underlying evils that brought about the crash in which American investors lost billions of dollars, we find Members of the House ill-advised, uninformed, and I know unwittingly and innocently lending themselves to an attempt to cripple this commission. I am sure that after the 4th of March there will be new life in that commission. The Congress can not undertake immediately all of the necessary fact findings to initiate legislation necessary to prevent a repetition of the wholesale larceny, of which the American investing public has been the victims. We should at least prevent a recurrence of present conditions. We should at least take inventory of the rascality of the present period, legislate accordingly in order to protect the people in the future.

The broad investigations the commission intends to undertake next year are most important and of widespread public interest. They are along these very lines. Here is the commission's program. I read the resolutions of the commission:

1. *Resolved*, That the commission undertake as soon as present work and appropriations available permit an inquiry into (1) the facts regarding the form, adequacy, and accuracy of published financial reports made to stockholders and others by corporations engaged in interstate commerce, excluding banks, common carriers,

and public utilities; (2) the effects of the financial practices of corporations prior to and since the stock-market collapse of 1929, including the volume and extent of corporation call loans; issuance of bonds and preferred stocks accompanied by stock-purchase warrants or rights to subscribe; profits and losses of corporations from operations in the stock and bond markets; stock and script dividend issues of corporations; overexpansion through reinvestment of earnings, officers' salaries, and bonuses; participation of officers and directors in underwriting and syndicate operations in securities of their corporations; and purchases from and sales to their corporations of securities or other property; (3) the facts regarding concentration of the voting control of corporations through nonvoting and management stock and the effects thereof on the financial practices and methods of corporations; (4) all other financial practices or methods affecting the public, all with a view to determining whether the commission shall recommend to the Congress any changes in or additions to existing laws.

* * * * * * *

3. *Resolved*, That the commission undertake as soon as the present work and appropriations available permit an inquiry into the facts regarding quantity discounts, selling below cost, reciprocity in dealing, brand advertising, guaranty against decline, wholesale and retail price stabilization and the effects of each on business and the general public with a view to determining whether the commission shall recommend to the Congress any changes in existing law.

It will readily be seen that such investigations require a force of accountants, statisticians, technicians, and trained investigators. The commission has the personnel. Are we, now that we have the trained personnel, now that we have the expert personnel with the training and the experience of years, to discontinue this just long enough to cripple this commission and then start all over again, and lose these years of experience?

The statement was made by the gentleman from Texas [Mr. PATMAN] before the committee that the Federal Trade Commission is encroaching upon the work of the Solicitor for the Post Office Department. A casual investigation of the work of the commission will show that the Post Office Department is constantly referring cases to the Federal Trade Commission for an investigation.

The commission does not duplicate the work of the office of the Solicitor of the Post Office Department; it supplements that work and reaches and prevents practices that can not be stopped by the Post Office Department. This is evidenced by the fact that the Solicitor's office of the Post Office Department refers many cases to the commission, and the commission in turn refers cases that it thinks can be better handled by the Solicitor's office to the Post Office Department. A list of some of these matters follows:

SOME CASES REFERRED TO COMMISSION BY POST OFFICE DEPARTMENT

W. D. Alexander & Co., Howard Hat Co., Independent Coal Co. of Chicago, Omaha Tanning Co., Sanitary Feather Co., Vacuum Cleaner Specialty Co. (Inc.), American Feather Bed & Pillow Co., and Lewis Feather Bed & Pillow Co.

SOME CASES REFERRED BY THE COMMISSION TO THE POST OFFICE DEPARTMENT

B. & O. Petroleum Co., Martin & Allardyce, Coyne Trade & Engineering School, Dr. S. J. Egan Manufactory, Frye Remedy Co. of Lynn, Hagen Import Co., Hoffman Oil & Refining Corporation, Gilbert Johnson & Co., L. & S. Candy Co., Lafayette Institute (Inc.), Lucky Shekel, McClure Glass Co., National Finance & Securities Corporation.

In order to obtain a fraud order the Solicitor of the Post Office Department must prove fraud. The Federal Trade Commission, on the other hand, as the above-cited cases show, can prevent practices that have the tendency and capacity to deceive the ordinary purchaser and thus divert business from competitors. Of course, the work of the commission and the Solicitor of the Post Office Department are similar, but one supplements the other instead of duplicating.

The same thing is true of other departments or branches of the Government. Many matters have been referred to the commission by the Food and Drug Division of the Department of Agriculture, by the Bureau of Foreign and Domestic Commerce of the Department of Commerce, and by the Department of Justice. These departments send these matters to the commission because they feel that the commission can handle the matter better than they can. The commission does not duplicate their work but supplements it.

It is no secret that stock and commodity exchanges will soon be placed under Federal supervision and regulation. We must first get all the facts. The Federal Trade Commission is in a position to get those facts and could do it better and quicker and at less expense than a standing committee of the House. In all likelihood the stock and commodity exchanges will be placed under the supervision of the Federal Trade Commission or its successors. Mr. Chairman, it is the program of this commission, it is the very important and necessary work they expect to undertake that has caused this drive against it. I appeal for support of the pending amendments restoring the funds necessary to continue the work. [Applause.]

[Here the gavel fell.]

Mr. BLANTON. Mr. Chairman, with all the millions of dollars from the Public Treasury the Federal Trade Commission has spent, and all its many voluminous volumes of printed hearings, 35 of which are now on the table, one of them containing over 10,000 pages, it can not point to a single prosecution it has commenced or to a fine it has caused to be imposed, or to a man it has ever put in jail or in the penitentiary for violating the law. The huge sums it has expended have been wasted.

I am in favor of abolishing the Federal Trade Commission, but the subcommittee which gave careful consideration to this bill was in favor of continuing it and has allowed it $500,000. A majority of the full committee of 35 members backed up the subcommittee and allowed the Federal Trade Commission $500,000.

The Bankhead amendment would increase the appropriation recommended by the committee by $301,450. The Cochran amendment would add on enough to make it $1,000,000. I am against all of these amendments. I understand the chairman of the subcommittee will favor the Bankhead amendment and favor appropriating the sum of $801,450 for the commission. I do not think the membership should follow that position, because if it does, it will be going against the position of the whole committee which has allowed only $500,000. If we do not begin to stop the waste of public money where are we headed? The Nation will be headed for bankruptcy; we are headed for making this Government's obligations worthless if we do not look out and stop the waste and reckless spending of public money.

I have implicit confidence in our President elect. I believe that he will not permit public money to be wasted. I am confidently relying upon his promises to reduce expenses. He will countenance no waste or extravagance. The newspapers all over the country carried headlines in the last few days saying that Congress is spending $50,000 for a swimming pool for the incoming President. That is not true. Congress has provided $50,000 for repairing and remodeling and furnishing the White House, to be spent under the President's direction. He can spend it or not spend it as he chooses. Every appropriation bill for the White House on every inaugural year has embraced such a sum; there was a like sum of $50,000 for Mr. Harding, for Mr. Coolidge, and Mr. Hoover; for the year following the inauguration of each of them Congress gave the President of the United States $50,000 to expend as it was necessary in repairing, refurnishing, and remodeling the White House. He does not have to spend a cent of it unless he wants to. If he does not spend it, it will remain in the Treasury unspent and to the credit of the people.

I have confidence in the President elect, and I think this Congress has confidence in him. I do not believe that he will spend any part of this $50,000 unless it is absolutely necessary. He is not going to waste any of it on luxuries. I do not believe he will build any swimming pools with it. The present sufferings of the afflicted people weigh too heavily upon his heart. He is going to make good on his promises to retrench; and I am one who is going to back him 100 per cent in such efforts.

I have never been in favor of the large allowances which are given annually to the President. It tends to create an abnormal atmosphere of waste and extravagance. I hope the President elect will put an end to it. It would add to his popularity and would increase the public confi-

dence. No people can respect a President who lives in wasteful extravagance, paid for out of their Treasury, while they are hungry and starving without jobs. I predict that we will see many changes for the better when the President elect has time to make a sane survey of existing conditions.

Mr. SUMMERS of Washington. Mr. Chairman, the debate this afternoon convinces me that several Members are not informed as to the activities and the accomplishments of the Federal Trade Commission. This is an activity of the Federal Government that reaches out and protects the pocketbooks of every home in America. To ascertain this, all you have to do is to follow a few cases. Having done that, you will agree with my statement.

The activities of the commission are very broad. Two or three extensive investigations have been called to the attention of the House. The printed hearings look voluminous; they are voluminous; they were expensive, but they gave the country the first knowledge it had of what was going on in regard to public-utility manipulations over this country, of their propaganda, and the raids of those utilities into the treasuries of the people and into the bank accounts of the individual citizens of this land. We have been urging them to complete these investigations, and because they have completed them is why we are cutting the appropriation. We believe the chain-store investigations have consumed too much time and too much money.

I call attention to some of the work that has already been accomplished by the Federal Trade Commission. In my speech of January 31 you will see a number of these cases set out in brief; and I am sure you will find the information instructive. Let me cite a few instances now: The Winstead Hosiery Co. is one—$250,000 or more is saved annually. The United States Steel Corporation is another. Have we forgotten that, according to the testimony of the president of the American Farm Bureau Federation, that investigation is saving the farmers of this country $30,000,000 a year? This is the Pittsburgh Plus case; then there is the Royal Baking Powder case where the investigations are saving the housewives at least $200,000 a year. The Arkansas Wholesale Grocers' Association which interfered with a bad practice down there is another instance; then there is the misbranding of furs, which concerns every woman in the United States. By an agreement that the misbranding of furs would be discontinued, millions of dollars are saved every year to the purchasers of furs in this country. The Federal Trade Commission renders invaluable service. Its work should not be crippled.

[Here the gavel fell.]

Mr. WOODRUM. Mr. Chairman, I wish in the beginning to brush away a few of the cobwebs that very often enter into a situation where we have much debate by people who, with perfectly good intentions, have not accurately informed themselves upon the subject they are trying to discuss; and I do not mean this in any offensive way to any of my colleagues.

My good friend the gentleman from Wisconsin [Mr. AMLIE] beats himself upon the breast and pictures to the Congress a great, powerful, well-financed power lobby marching down upon Washington to try to destroy the Federal Trade Commission. If this be true, my feelings are hurt, because here I am, chairman of the subcommittee that has charge of the appropriation, and here are all my colleagues on the subcommittee, and we have not seen a single member of the lobby nor gotten a single letter from him, nor enjoyed one of his cigars, nor a single meal, nor a theater ticket.

Mr. SUMMERS of Washington. Mr. Chairman, will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. SUMMERS of Washington. We can agree in that statement.

Mr. WOODRUM. I thank the gentleman.

Mr. BOYLAN. I got none either, Mr. Chairman.

Mr. STAFFORD. That is absolutely true.

Mr. AMLIE. My statements went to the financing four years ago when the question came up of having the Federal Trade Commission investigate the situation.

Mr. WOODRUM. I thank the gentleman for the correction.

Now, Mr. Chairman, I can say to you that not a living human being has come to me personally or as chairman of the committee with any word to say against the Federal Power Commission, except our good friend and colleague from Texas [Mr. PATMAN], who asked to be heard, and was heard by the committee.

Mr. HASTINGS. May I interrupt to say the same thing with reference to myself?

Mr. WOODRUM. Yes. Now, Mr. Chairman, the debate to-day illustrates something I have always claimed to be the case; and that is that the old adage, "There are two sides to every question," is not true. There are three sides; your side, my side, and the right side. That is the situation with reference to these amendments here to-day.

I call your direct attention to the fact that when I presented my statement bringing this appropriation bill to the House, I said frankly before any of this hue and cry had been raised by some of my emotional friends that very likely the committee had cut too deeply into the Federal Trade Commission; but we brought it here and it was for the House to consider and take such action as in its wisdom ought to be taken.

You will find on pages 273 and 274 of the hearings that the representatives of the Federal Trade Commission said in their Budget estimates for 1934 that they proposed to use $285,000 in the first year's work on three new investigations that they themselves intended to initiate beginning July 1, 1933; that they had in their budget for 1933 sufficient funds to conclude the utility investigation and the chain-store investigation as ordered by Congress.

The subcommittee did not undertake to say whether those investigations were meritorious and whether they ought ultimately be carried on or initiated; but they did say that inasmuch as a new administration would come into effect on March 4 next and inasmuch as this appropriation was not intended to be effective until July 1, if the new Congress and the new administration felt that those investigations were needed or proper, the President and the Congress would be ready to provide sufficient funds therefor.

The whole trouble with the Federal Trade Commission has been that another body has been frequently ordering investigations and sending them down without providing the wherewithal to pay for them; and the committee has thought for a long time that if a policy were adopted to make the investigations for which money had been given them, then we would be a little more cautious and a little more careful and a little more discriminating in the investigations we ordered.

The gentleman from Missouri [Mr. COCHRAN] offers an amendment to increase this amount to $1,000,000. That would let them plan and begin these new investigations that they ought not to start until the new administration comes in.

Mr. COCHRAN of Missouri. Will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. COCHRAN of Missouri. Is it not true that if my amendment should be adopted, the amount would be still $89,000 below the Budget estimate?

Mr. WOODRUM. Yes; but it would still be $200,000 more than they need for the next fiscal year, unless they are going to start these investigations that year.

The committee does not think they ought to start them unless the new administration orders them to be started.

The gentleman from Alabama has offered an amendment which, so far as I am concerned—and I am authorized to speak on behalf of the subcommittee—is a proper amendment. It gives the Federal Trade Commission an appropriation estimated by the Bureau of the Budget less than the amount required for these investigations.

Mr. LAGUARDIA. Would it permit furnishing a report on the pending investigation?

Mr. WOODRUM. It is so stated in the hearing.

Now, gentlemen, this committee has no quarrel with the Federal Trade Commission. Undoubtedly, much of its work has been beneficial. I do not know about prosecutions; but much of the work is of historical interest, collecting and collating data and information that will be of use to the Government in years to come. We have no fight against the commission; but in conducting its activities we put the same yardstick on this commission that we put on every other bureau of the Government, that they ought to have no more funds than are absolutely necessary to carry on their needed functions for the next fiscal year; and, so far as I am concerned, and so far as the subcommittee is concerned, we will be perfectly satisfied if the Bankhead amendment is adopted.

The CHAIRMAN. The time of the gentleman from Virginia has expired. All time has expired. The question is on the substitute amendment offered by the gentleman from Missouri [Mr. COCHRAN].

The question was taken; and on a division (demanded by Mr. Goss) there were—ayes 37, noes 108.

So the substitute amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama [Mr. BANKHEAD].

The question was taken; and on a division (demanded by Mr. BANKHEAD) there were—ayes 98, noes 78.

Mr. PATMAN. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed as tellers Mr. BANKHEAD and Mr. PATMAN.

The Committee again divided; and the tellers reported that there were—ayes 111, noes 85.

So the amendment was agreed to.

The Clerk read as follows:

For all printing and binding for the Federal Trade Commission, $10,000.

Mr. TREADWAY. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I am pleased to see that the Members of the House are waking up to some of the useless appendages in the form of some of these commissions. If there is one commission that we ought to wipe off the map, it is the Federal Trade Commission. It has never been worth the least thing in the world except to try to detract from the business of the people of this country. I have spoken in opposition to the commission several times in past years. I got tired of it because it seemed to be the pet of certain people and no headway could be made against it. If anyone will show me any good that ever came to the American people as a result of the activities of the Federal Trade Commission, I will acknowledge that I am in error.

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. TREADWAY. I am sorry, but I can not yield, because my time is very limited.

I do, however, want to take exception to one remark that was made a few moments ago by the gentleman from New York [Mr. LAGUARDIA] in referring to the chairman of the commission, Mr. Humphrey. I happen to know personally Mr. Humphrey, and some of the older Members of the House will remember serving with him. He is not to blame if the Federal Trade Commission does not function properly. Mr. Humphrey himself is a first-class type of official, and I wish the rest of the board were as good as he. Therefore, I am not in accord with the attack the gentleman from New York has made upon Mr. Humphrey. Those of us who served with the gentleman know his ability, his fairness, and fearlessness.

I want to illustrate my criticism of the commission with one little matter in respect of the work of this commission that came to my attention last autumn.

A very reputable business man in my district received a notice from the Federal Trade Commission that unless he gave up a certain kind of advertising that he had been doing for years he would be prosecuted. There was a mimeograph notice sent to this man without any information as to what he was to be prosecuted for and no reference to it of any kind except the form letter that they send out. In the same mail with the notice came a circular letter and a personal request from a cheap, shyster lawyer in this city, stating that he would defend this constituent of mine against the Federal Trade Commission. I say there was collusion there.

In some way or other this cheap-skate lawyer found out that this notice had been sent to this reputable business man scaring him. Of course, whenever a notice comes from a Federal bureau that he is going to be prosecuted, the ordinary citizen is frightened. And how, I would like to know, did this so-called lawyer find out that this man was threatened with prosecution by the Federal Trade Commission? In some way or other some one was getting paid in the Federal Trade Commission for passing out this information.

This is the type of work that I think can rightly stop in the Government, and, furthermore, if we are sincere and honest in wanting to economize, here is a mighty good place to start. I am sorry that the Bankhead amendment has just been adopted increasing the funds available for the commission for next year. The way to economize is to economize, to cut appropriations which are unnecessary and detrimental to the interests of the country.

Mr. BLANTON. Will the gentleman yield?

Mr. TREADWAY. Yes.

Mr. BLANTON. What that lawyer did was itself a crime against the law of the United States, and he should have been put in jail and disbarred from practice.

Mr. TREADWAY. I do not think he had any right to practice, anyway, but let me tell you this: I personally wrote to the board and asked for the bill of particulars that they were about to bring in against this constituent of mine, and the reply was that it was assumed that the advertisement was a fake, although this man had used it for years and lots of people had benefited by answering the advertisement and this man had numerous letters of commendation. This is not the kind of prosecution for which we should use the money of the taxpayers.

[Here the gavel fell.]

Mr. SCHAFER. Mr. Chairman, I rise in opposition to the pro forma amendment.

Mr. WOODRUM. Mr. Chairman, I ask unanimous consent that all debate on this paragraph close in five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. SCHAFER. Mr. Chairman, I rise at this time to keep the record straight. On last Tuesday, my distinguished colleague from Wisconsin [Mr. AMLIE] delivered in the well of the House an effective speech which convinced me and many others that we should not curtail the appropriation for the Federal Trade Commission.

To-day he spoiled his record when, in debate, he said that the action of the Federal Trade Commission under the Republican administration had accomplished wonderful results in behalf of increasing the appropriation, and at the same time prophesied that the incoming Democratic administration would hit the ball better than the Republicans with reference to good work of the commission. He, apparently, ignored the fact that the Democratic Party has control of the committee reporting out the bill containing the appropriation for the Federal Trade Commission, and the fact that the Democratic-controlled Appropriations Committee and the Democratic chairman of the subcommittee absolutely ignores the recommendations of the Republican President to provide sufficient funds for the commission.

I believe my good friend from Wisconsin, if he will consider the Democratic record on this Federal Trade Commission appropriation as against the Republican record, he will find that he should not run with this horde of Democrats who are trying to give the commission a death blow. [Laughter.] As the months go on, I predict that if my able

friend follows the record of the Democrats in control of the National Government, he will not desire to run with them but against them. [Applause.]

The pro forma amendment was withdrawn.

The Clerk read as follows:

Total, Federal Trade Commission, $510,000.

Mr. PATMAN. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 22, line 11, strike out the paragraph.

DUPLICATION OF WORK BY COMMISSIONS

Mr. PATMAN. Mr. Chairman, I want to tell you something that this Federal Trade Commission has been doing. We have a mail-fraud division in the Post Office Department. That division claims to have a 100 per cent record in mail-fraud cases. The Federal Trade Commission has taken it on itself to go into the mail-fraud cases.

Mr. WOODRUM. Mr. Chairman, I understood that all debate on this section was closed.

The CHAIRMAN. The Clerk has read a new paragraph.

Mr. WOODRUM. Then, Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close when the gentleman from Texas has finished.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. PATMAN. The Federal Trade Commission subscribes for newspapers and magazines; and when the newspapers come into the office, it has employees going through them. If they see some advertisement in the paper or magazine of a remedy that they do not believe is a good remedy, they immediately summon the party to Washington and make him sign an order that he will desist or there will be some action taken. The employees in the Solicitor's office in the Post Office Department are also examining newspapers and magazines for the same purpose—two commissions doing exactly the same thing.

The Federal Trade Commission has no power or right to summon people to Washington as they are now doing. They have no right to punish anybody. That commission has no power to levy a punishment upon anyone by imposing even an hour in jail or a dollar fine. They are restricted to going into the court and showing what has happened and getting a cease and desist order from the circuit court of appeals.

They have recently set themselves up as a board of experts on such remedies as antifat remedies, wrinkle and wart remedies, tobacco habit, eardrums, chewing gum, and candy, and things like that. They have no right to say anything to anyone unless he is engaged in interstate commerce. We have two bureaus in Washington doing exactly the same thing. If you want the people's money spent for those two bureaus to investigate one another, gum up the cards for one another, and do nothing, vote for this appropriation; but if you believe that the Government's money should be economically spent and no duplicating in the work of departments, then vote to strike out the paragraph.

Mail fraud cases originate with the Post Office Department, and if there is any Member in this body now who believes the Federal Trade Commission should also engage in that work, I want him to stand up and let us know who he is.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. Yes.

Mr. LAGUARDIA. There are several cases that the Post Office Department has referred to the Federal Trade Commission and vice versa.

Mr. PATMAN. Yes; they are gumming up the cards for one another.

Mr. LAGUARDIA. They are cooperating.

Mr. PATMAN. I suggest that the gentleman look into the matter as I have, and he will find out whether or not they are cooperating. They are working against one another in some cases, and they are bound to.

Mr. GARBER. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. Yes.

Mr. GARBER. Has the Federal Trade Commission ever investigated the monopolistic and exorbitantly high prices of farm implements during the past 10 years?

Mr. PATMAN. I have not heard of it. Before I get through I desire to refer to this power investigation. What does it amount to? The Interstate Commerce Commission is going over the same thing now. The distinguished chairman of this committee is going to reinvestigate it. A committee in the Senate is going over it again by reason of the Insull collapse, so why have an investigating body that is going around the country getting facts and figures together that are too old to be worth anything by the time a report is made, also investigate it. Further, I hope gentlemen will consider when they vote against this amendment they are voting for two departments of the Government to do exactly the same thing. It should be stopped.

The CHAIRMAN. The time of the gentleman from Texas has expired. The question is on the amendment offered by the gentleman from Texas.

The amendment was rejected.

Mr. WOODRUM. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Page 22, line 11, strike out "$510,000" and insert in lieu thereof "$820,416."

Mr. WOODRUM. That is just to correct the totals.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

INTERSTATE COMMERCE COMMISSION

SALARIES AND EXPENSES

General administrative expenses: For 11 commissioners; secretary, $9,000; and for all other authorized expenditures necessary in the execution of laws to regulate commerce, including 1 chief counsel, 1 director of finance, and 1 director of traffic at $10,000 each per annum, traveling expenses, and stenographic reporting services to be obtained on and after the approval of this act by the commission, in its discretion, through the civil service or by contract, $2,692,313, of which amount not to exceed $2,360,000 may be expended for personal services in the District of Columbia, exclusive of special counsel, for which the expenditure shall not exceed $50,000; not exceeding $3,000 for purchase and exchange of necessary books, reports, and periodicals; not exceeding $100 in the open market for the purchase of office furniture similar in class or kind to that listed in the general supply schedule: *Provided*, That this appropriation shall not be available for rent of buildings in the District of Columbia if suitable space is provided by the Public Buildings Commission.

Mr. McGUGIN. Mr. Chairman, I move to strike out the enacting clause. As these appropriation bills have been coming along I have been moving to strike out the enacting clauses of the respective bills, because I firmly believe that we are following an unwise and dangerous policy in making appropriations when we know that this Congress will not pass the necessary revenue bill with which to meet the appropriations. I have been placing my argument upon that basis. I have been protesting upon the theory that the Congress would pay some attention to the fact that we have run behind for three years, and that now we are starting in on the fourth year, and that passing these appropriation bills means that for the fourth consecutive year this Government will be spending more money than it takes in. I have assumed that the Congress would recognize that fact. I have been wrong in my assumption. So far as practical results are concerned, the people of this country and this Government would be as well off if they would turn the financial affairs of the Government over to the Osage Council as to leave it in the hands of a Congress that will go on passing appropriations which it knows it will not provide sufficient revenue to meet.

I want now to pass from that argument and base my argument upon politics. Maybe Congress will better understand politics. Let me say first to the Democrats that they are pledged in their platform to a 25 per cent reduction in Government expenditures, and when they sit here and pass these appropriations they know that they are not going to keep

faith with that platform pledge. In the first fiscal year of their administration they will fail to keep that pledge. You Democrats think that you can say to the people: "We could not keep the pledge because the appropriations had already been made," but that is going to be poor politics, for the people will be smart enough to see through that.

Now I say to my Republican friends, you sit here and pass these appropriations, and Mr. Hoover will not be out of office a week before the Democrats will say: "We can not keep our platform pledge because a Republican administration passed the appropriations before we got into power." Let me say that if we Republicans sit here and continue to pass these appropriations the responsibility rests upon our shoulders just as much as it does upon the shoulders of anybody for the unbalanced Budget that will exist during the next year. Why? Because we have lent our support to the situation. If we sit here and vote against these appropriations, then our position would be clear; but we are not doing that. We are going to stand indicted before the country as being a full party to the program whereby the Budget for the fiscal year beginning July 1, 1933, and ending June 30, 1934, is an unbalanced Budget. The policy of voting appropriations without regard to where the money is coming from to meet the appropriations is nothing less than a constitutional betrayal of the country, because it is our constitutional obligation to provide sufficient revenue to run the Government, and when we sit here and pass appropriations, knowing that we are not going to supply sufficient revenue to meet them, we are not keeping faith with the country. We are breaking our own constitutional obligations.

Mr. SCHAFER. Mr. Chairman, I rise in opposition to the motion of the gentleman from Kansas [Mr. McGUGIN].

Mr. Chairman, I hope the motion of the gentleman from Kansas will be defeated. I tried to have the Republican gentleman from Kansas [Mr. McGUGIN] yield in order to ask him a question, in order to keep the record straight.

Mr. McGUGIN. The gentleman can ask me a question in his own time if he desires.

Mr. SCHAFER. Very well. Does the gentleman believe that his condemnation of the Republican minority of this House is justified, when the Democratic majority controls the Committee on Appropriations and the House? Does the gentleman believe that his criticism of the Republican minority is justified because the Democratic majority continually fails to heed its platform pledges with reference to economy?

Mr. McGUGIN. So long as we join in that program I am justified in condemning the Republican Party. [Applause.]

Mr. SCHAFER. The record speaks for itself, and I notice the last applause on the Democratic side; but you will find when votes were taken that fewer Republicans joined with the Democrats in these raids on the Treasury than the remarks of the gentleman from Kansas would indicate. I want to say that my colleague from Kansas [Mr. McGUGIN] is a very able legislator and one of the most valuable and industrious Members of the House. I feel, however, that he has taken a mistaken position in the argument which he has just made. He apparently does not realize that he has been unjust to his colleagues on the minority side.

Mr. BLANTON. How about the Barbour amendment?

Mr. SCHAFER. Oh, yes. The Democrats had to cut the heart out of the Federal Trade Commission to save a few hundred thousand dollars for the taxpayers' Treasury, but where were you economy Democratic gentlemen yesterday, where were you economy Democrats and my colleague, the Republican gentleman from Kansas [Mr. McGUGIN], when the gentleman from Arkansas [Mr. GLOVER] offered a motion to strike over $300,000 from this bill, an appropriation to be expended for ornamental and artistic works on a bridge in the District of Columbia? Where, then, was the economy expert from the State of Kansas? [Laughter and applause.] Where were the economy experts on the Democratic majority side, to whom the gentleman from Kansas is now giving aid and comfort?

Mr. PARKS. Will the gentleman yield?

Mr. SCHAFER. Yes. I yield.

Mr. PARKS. Where were the Republicans and the gentleman from Wisconsin when you really ran over the committee and the Republicans put about $4,000,000 on the War appropriation bill above the Budget? Where was the gentleman from Wisconsin then?

Mr. SCHAFER. The Republicans are proud of that effort to preserve national defense in these times of unrest among the nations of the world, and with a war now going on in the Far East, and the repudiation of honest debts by foreign nations, who are increasing their war machines. [Applause.] We Republicans, with the solid Tammany Democrat vote and the solid Democrat vote from Massachusetts and a few other patriotic Democratic States are proud that we took the position America, and America first, in order to protect our Nation and the lives of our countrymen.

There have been many amendments submitted to reduce expenditures. Where was the economy expert from Kansas [Mr. McGUGIN]?

Mr. McGUGIN. I was here voting for them, and the gentleman knows it. [Applause and laughter.]

Mr. SCHAFER. Where was the economy expert from Kansas [Mr. McGUGIN] when we voted to save the overburdened taxpayers many millions of dollars on the prohibition enforcement appropriation? [Applause and laughter.]

Where was the economy expert from Kansas [Mr. McGUGIN] when my amendment to reduce the prohibition enforcement appropriation of the Coast Guard over $9,000,000 was before the House? [Applause and laughter.]

Where was the gentleman from Kansas when we saved the taxpayers hundreds of thousands of dollars with the amendment prohibiting wire tapping? Where was the gentleman from Kansas when we saved the taxpayers many hundreds of thousands of dollars of the people's money from being spent by rats and stool-pigeon criminals and prohibition agents to purchase and drink liquor? I do not believe that when the record is made complete the gentleman can boast of his entire record on economy by all of his actions, although he poses as the greatest economy expert in the House with his many sudden outbursts of oratory delivered on his many motions to strike out the enacting clause.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

The question is on the motion of the gentleman from Kansas to strike out the enacting clause.

The motion was rejected.

Mr. FULLER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FULLER: On page 24, line 8, after the word "and" insert the word "contract"; and in lines 9, 10, and 11, on page 24, strike out the following language: "be obtained on and after the approval of this act by the commission in its discretion through the Civil Service or by contract."

Mr. WOODRUM. Mr. Chairman, the language is satisfactory to the committee.

The CHAIRMAN. The question is on the amendment of the gentleman from Arkansas.

The amendment was agreed to.

The Clerk read as follows:

Regulating accounts: To enable the Interstate Commerce Commission to enforce compliance with section 20 and other sections of the act to regulate commerce as amended by the act approved June 29, 1906 (U. S. C., title 49, sec. 20), and as amended by the transportation act, 1920 (U. S. C., title 49, sec. 20), including the employment of necessary special accounting agents or examiners, and traveling expenses, $992,267, of which amount not to exceed $184,000 may be expended for personal services in the District of Columbia: *Provided*, That for the portion of the fiscal year 1933 remaining after the date of enactment of this act the amount which may be expended for personal services in the District of Columbia from the 1933 appropriation for the purposes included in this paragraph shall be at the annual rate of $175,000.

Mr. GOSS. Mr. Chairman, I reserve a point of order to ask the chairman of the subcommittee if this language would make it permanent law.

Mr. WOODRUM. It is for the current fiscal year only, I may say to the gentleman.

Mr. GOSS. Mr. Chairman, I withdraw the reservation of the point of order.

The Clerk read as follows:

Total Interstate Commerce Commission, $7,137,639.

Mr. JONES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JONES: Page 28, line 19, strike out the words and figures "Total, Interstate Commerce Commission, $7,137,639."

Mr. JONES. Mr. Chairman, I offer this amendment for the purpose of discussing for five minutes what I think should be given serious consideration, the question of doing away entirely with the Interstate Commerce Commission.

I realize some additional legislation would be necessary to properly effectuate this purpose, but I call attention to the fact that practically the entire philosophy underlying all public-utility regulation is to keep the rates from becoming too high. In other words, when there is a virtual monopoly in any field it is the proper philosophy to regulate its rates for the purpose primarily of protecting the public.

At the time the Interstate Commerce Commission was established it was very important, because the railroads had a practical monopoly in the field of transportation. Since that time, however, adequate competition has developed through trucks and busses, and to a lesser degree through airplanes, which will develop. The original basis and need for the commission, therefore no longer exists. I think but one of two courses can be adopted, either bring all the different modes of transportation under the one commission, or turn them all loose so the railroads, unhampered and unchained may meet the competition of the other means of transportation. I regard the latter course the more desirable as it is more economical, involves less Government activity, and avoids the possibility of a commission favorable to the companies keeping the rates too high.

Mr. GARBER. Mr. Chairman, will the gentleman yield?

Mr. JONES. I yield.

Mr. GARBER. Does the gentleman recall the recent decision of the Supreme Court of the United States upholding the regulation and control of interstate traffic by trucks in the State of Texas?

Mr. JONES. I do not have time to go into that phase of the discussion.

Mr. GARBER. I think it ought to be left to the States.

Mr. JONES. I think there should be a provision to prevent favoritism in rates, to prevent rebates, and probably to prevent the same companies from monopolizing the different forms of transportation. With all the restrictions now thrown around them, the railroads do not have a chance. They are absolutely helpless as it is. They are hamstrung. At the same time the people are helpless with freight rates ruinously high. In many instances the rate amounts to as much as the value of the commodity. The people who are paying these exorbitant freight rates can not afford to fight a case through the commission.

Why not abolish the commission and let this situation be corrected in a natural way? The present freight rates are in many instances prohibitive.

I offer this amendment for the purpose of calling attention to the fact that since the commission was originally established the whole set-up and situation has radically changed and there is not now a monopoly in the field of transportation. There is open competition, which will always take care of itself, and there is no necessity, in order to protect the public, that there should be a commission fixing the rates the railways may charge and forcing them to charge that rate whether they find it necessary or not.

The CHAIRMAN. The question is on the amendment of the gentleman from Texas.

The amendment was rejected.

Mr. RAYBURN. Mr. Chairman, I offer an amendment

The Clerk read as follows:

Amendment offered by Mr. RAYBURN: Page 28, after line 19, insert the following:

"INVESTIGATION OF PUBLIC UTILITY CONTROL

"For the purpose of obtaining information necessary as a basis for legislation, those members of the Committee on Interstate and Foreign Commerce of the House of the Seventy-second Congress who are Members elect to the Seventy-third Congress, or a majority of them, after March 4, 1933, and until the organization of the Committee on Interstate and Foreign Commerce of the House of the Seventy-third Congress, are authorized, as a committee, by subcommittee or otherwise, to continue the investigation begun under authority of House Resolution 59 of the Seventy-second Congress. For such purposes the committee is authorized to select a chairman, and the committee, or any subcommittee thereof, is authorized to sit and act at such times and places in the District of Columbia or elsewhere, to hold such hearings, to employ such experts and such clerical, stenographic, and other assistants, to require the attendance of such witnesses and the production of such books, papers, and documents, to take such testimony, to have such printing and binding done, and to make such expenditures as it deems necessary, and oaths or affirmations may be administered by any member of the committee. Subpœnas shall be issued under the signature of the chairman and shall be served by any person designated by him. The provisions of sections 102, 103, and 104 of the Revised Statutes (U. S. C., title 2, secs. 192, 193, and 194) shall be applicable with respect to any person summoned as a witness under the authority of this paragraph in the same manner as such provisions are applicable with respect to any person summoned as a witness in the case of an inquiry before a committee of the House of Representatives. The expenses of the committee, not to exceed $50,000, shall be paid out of the contingent fund of the House upon vouchers signed by the chairman and approved by the Committee on Accounts of the House."

Mr. MICHENER and Mr. WOODRUM reserved a point of order.

Mr. RAYBURN. I realize, of course, Mr. Chairman, that if the point of order is to be insisted upon——

Mr. MICHENER. I shall insist upon the point of order. I do not care anything about the merits. This should come from the Rules Committee in the form of a resolution. There is no reason in the world why it should be placed on an appropriation bill in violation of the rules of the House at this time.

Mr. Chairman, I will reserve the point of order if the gentleman wishes to make a speech.

Mr. RAYBURN. I do not care to make a speech, of course, but I think after I have made a brief statement the membership will have no objection to this amendment.

This is the situation we are in: The resolution under which we are investigating all utilities doing business in interstate commerce will die the 4th of March, and we will have to quit right in the middle of some of the most important investigations ever conducted by the Government.

We have completed in the last 12 months investigations with reference to pipe lines, oil, gas, and gasoline. The report is in the hands of the printer at this time. We have also completed all power, except a study of the Insull set-up, which is in the last analysis a top set-up that shows what can be done under present State and Federal law with a set-up that is at its worst.

Mr. PATMAN. Will the gentleman yield for a question?

Mr. RAYBURN. I yield.

Mr. PATMAN. Is it not a fact that the committee is making practically the same investigation that the Federal Trade Commission has made?

Mr. RAYBURN. Not at all. The Federal Trade Commission made an investigation principally as to political activities.

Mr. PATMAN. This is a separate investigation entirely?

Mr. RAYBURN. Yes. When Mr. Parker was chairman of the committee, the committee made an investigation of the holding companies in the railroad field. This investigation was completed, and under my administration we reported a bill in response to this investigation.

When I came to the chairmanship of the committee we got a resolution through authorizing the committee to investigate all utilities doing business in interstate commerce, especially as to their interrelationship, their ownership, their interlocking directorates and their acquisitions through holding companies.

We have now completed the power investigation, except, as I say, this terrible situation in Chicago. We have some of our men there now making the investigation, and we have the full and complete cooperation of the judge and of

the receiver of that company. We would not like to have that broken up. We have three more things to do that we will not be able to reach during this session of Congress. One is to investigate the ownership, the financial set-up, of the holding company situation with reference to telegraph and telephones, radio and airways. I am anxious not only to complete this and go to the bottom of this Insull mess, but I am also very anxious that our two new forms of commerce, one of communication and the other of airways set up at this time should be clean. I am anxious to investigate them so that we may by example of some sort, by law of some sort, save the radio and the airways of this country from getting into the shape that the railroads were 40 years ago and in which the power companies are now.

We want to carry on this investigation. I realize that the gentleman from Michigan [Mr. MICHENER] is entirely correct. We could go to the Committee on Rules and say something about the position of the next administration on this matter that would cause them to report this bill. If we should come to the House and take up time and then go to the Senate, it might get lost.

Frankly, I will say to the gentleman from Michigan that that is my reason for offering it here. I do not want to disband my organization. I do not want to wait until the 20th or 25th of April or the 1st of May to find out whether or not I am going to be allowed to make this investigation.

Mr. MICHENER. Mr. Chairman, the gentleman from Texas is giving just the reasons that are apparent to me why this matter should be considered on its merits. I think we should not hitch something on to an appropriation bill which would not pass both Houses on its merits. I therefore make the point of order.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

For all printing and binding for the National Advisory Committee for Aeronautics, including all of its offices, laboratories, and services located in Washington, D. C., and elsewhere, $21,000.

Mr. McCLINTIC of Oklahoma. Mr. Chairman, I move to strike out the last word.

I do this, Mr. Chairman, for the purpose of gaining some information relative to the amount that we would authorize, namely, $821,000.

It seems to me it would be advisable for the House to have some idea about the number of employees that have been engaged, the functions of this advisory committee, and to find out whether or not there is any duplication in the service that is supposed to be rendered. I would like to ask the chairman of the subcommittee if he will not be kind enough to give the committee a little information, having in mind that we have an airplane factory at Philadelphia, which I do not think ever manufactured a single plane, and we also have laboratories in the Navy Department and the Bureau of Standards, as well as other activities that, in my opinion, are duplications and should not be maintained.

Mr. WOODRUM. Mr. Chairman, there is no duplication in the work that the National Advisory Committee for Aeronautics does. The National Advisory Committee is a committee of scientists and experts in aviation, set up right after the war for the purpose of making research in the field of aviation, especially for the benefit of the Army, Navy, and Marine Corps Air Services and, incidentally, of course, for commercial aviation.

Doctor Ames, president of Johns Hopkins University, is chairman of the committee; and Colonel Lindbergh and other equally famous aviators are members of a voluntary committee that serve without pay, consisting also of two members each from the Army and Navy and also the Director of the Bureau of Standards and other Government officials and members of this committee who meet periodically to study problems of aviation.

This committee has 44 employees, which constitute their administrative force, stationed in Washington. They have 268 employees at Langley Field, Va., where they have experimental laboratories.

May I say in connection with this matter, Mr. Chairman, that they have at Langley Field laboratories for experimental work in the field of aviation said to be second to none in the world.

If time permitted, I could give the committee a great deal of very interesting information as to the work that this committee is doing and cite instances where they have actually made discoveries that are of financial interest and benefit to the United States. In the RECORD of January 31, on page 3020, I placed a statement showing the activities of the National Advisory Committee, showing they have made various discoveries and that, as a result of their research work, there is an annual possible saving of $10,000,000, $5,000,000 of which could be saved by the aeronautical branches of the Government, if they were put into force, and many of them are being put into force.

Mr. McCLINTIC of Oklahoma. Do the savings that the gentleman brings to our attention refer to cost of different equipment or new inventions or safety devices?

Mr. WOODRUM. They include all three, but they have particular reference to fuel consumption, safety, and speed. These are the three big problems with which aviation is confronted, and I may say to the gentleman he will find that the work of this commission is not duplicated in any way by the Bureau of Standards. The National Advisory Committee calls upon the Bureau of Standards to conduct certain tests and experiments that they do not have the equipment to make. There is no duplication between the National Advisory Committee and the Army and Navy, because this committee is concerned solely and entirely with research and experimental work.

Mr. McCLINTIC of Oklahoma. Will the gentleman inform the committee what was the original appropriation for this purpose, in order that we may have some idea of whether or not the amounts appropriated have been increased very materially during this period?

Mr. WOODRUM. The amounts have not increased and the current appropriation is $230,000 less than the appropriation for 1932.

[Here the gavel fell.]

The pro forma amendment was withdrawn.

The Clerk read as follows:

American ethnology: For continuing ethnological researches among the American Indians and the natives of Hawaii, the excavation and preservation of archæologic remains under the direction of the Smithsonian Institution, including necessary employees, the preparation of manuscripts, drawings, and illustrations, the purchase of books and periodicals, and traveling expenses, $61,842.

Mr. McCLINTIC of Oklahoma. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 34, line 7, strike out the figures "$61,842" and insert "$25,000."

Mr. McCLINTIC of Oklahoma. Mr. Chairman, according to the information I have, the Smithsonian Institute and the National Museum at the present time is so full of different kinds of ancient articles that some have to be stored on the outside and others in the garret and others in the cellar.

I happened to make an investigation not so long ago, and I found that the works of a most distinguished painter of Indian scenes, probably the one that has contacted more tribes than any other in the country, by the name of George Catlin, were stored in the garret.

Some of you have read articles during the past summer calling attention to those scientists or archæologists who go out into the Rocky Mountains and the western plains to find out whether there are some signs of ancient habitation or the bones of some prehistoric animals that have not yet been discovered. They go out there with spoons and work in such a way as to be sure that they will be able to carry on year after year, and then when cold weather arrives they come back to Washington and live in luxury while writing their reports.

I notice in this item it refers to Hawaii and investigations to be made for the purpose of finding prehistoric vessels or objects. I remember that there was a legend of the Hawai-

ian kings that when one died his body servant hid the body in such a way that no one could find it. Then the tribes would immediately kill the body servant so that the secret would be forever kept.

I am getting sick and tired of the appropriation of money that does not do us a particle of good, money that could be used and utilized in other ways for the people. It does seem to me that we should approach this subject with reason, and when we have got the museum full of these objects and ancient things we know nothing about, it seems to me that it is time to call a halt and reduce appropriations and keep those employees at home for a year or two, because we now have nearly everything one could expect or hope to find. I hope the amendment will be adopted.

Mr. WOODRUM. Mr. Chairman, the work of the ethnological and archæological divisions of the Smithsonian Institute is of a character that, of course, nobody can say is absolutely necessary to the physical life of the American people; but for many years the American Government, very wisely, has financed this wonderful institution down there, and they have collected and have in their archives priceless relics of the prehistory of the American people that the gold and silver of future generations could never replace.

Let me say that no such condition exists, as the gentleman states, that these people come back here and live in luxury. They are seriously minded people, not overpaid, and do very fine work. They are particularly interested now in trying to rescue and preserve, as far as possible, some of the early history of the American Indians. In the lower Mississippi Valley a great deal of work is being done. In a number of instances they find only one or two people living now who throw light on the character and customs and give information relative to the early civilization of the American Indians. I think it would be a great mistake to take a small amount out of this appropriation, which in the sum total of the appropriation for the Smithsonian would be negligible, and yet it would seriously cripple any work they are doing. I hope the committee will allow the amount to stand as it is reported by the committee.

Mr. BOYLAN. Mr. Chairman, the gentleman from Oklahoma, in proposing the amendment, states that many of these employees are engaged in digging up bones in the Rocky Mountains and elsewhere. Perhaps these men might dig up some of the bones of the gentleman's ancestors and, of course, that would be of historic value to the country; but another phase of the situation is the cultural advantage that accrues to the people of the Nation through the agencies of the Smithsonian Institution. Who can place a value on culture? To-day the splendid specimens and exhibits in the Smithsonian Institution are an attraction to the people of the entire country; and in these days of depression, when perhaps many people on Sunday have not the money to pay for other forms of amusement, they are glad to gain the knowledge and have the pleasure that will accrue to them by visiting these splendid galleries of the Smithsonian Institution. There is another feature, Mr. Chairman, that also ought to be taken into consideration, and that is the Government does not provide all of the funds for the upkeep of this institution. A large percentage of the funds is supplied through an endowment and through private subscription. I beg of the gentleman not to withhold from the American people the exhibits to be secured by the unearthing of the bones of our prehistoric ancestors, so that posterity may not be deprived of this valuable knowledge.

Mr. McCLINTIC of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. BOYLAN. Yes.

Mr. McCLINTIC of Oklahoma. I appreciate the remarks of the gentleman, but we do not need to look at any kind of bones now except soup bones, bones that could be utilized in a satisfactory manner; and it seems to me that we ought to stop hunting for such bones at a time when the country is in such a bad condition financially.

Mr. BOYLAN. Knowing the gentleman as I do, I can not believe that the only thing in his mind is the question of a plate of soup, and I know that his cultural attainments far exceed the mere material wants of the body. I know that he develops the intellectual phase of his make-up, and I know that this amendment proposed by him is more in the nature of a facetious amendment than it is of a real amendment.

Mr. McCLINTIC of Oklahoma. I assure the gentleman that there is nothing facetious about the amendment. I have had first-hand information. I have observed these different individuals while sojourning out in the western plains, and I have likewise visited these institutions, and I agree with the gentleman that we have collected a wonderful assortment of exhibits, and in view of the fact that we have no other place to put them unless we appropriate for an additional building, it does seem to me that we might have a recess or a holiday for a little while, thus making it possible to reduce the appropriation.

Mr. BOYLAN. In answer to the gentleman's question, may I ask him a question? He said that he observed these men in the West making these excavations. May I ask him if he saw any of them making soup out of the bones that they excavated?

Mr. McCLINTIC of Oklahoma. No; but I further answer the gentleman by stating that unless conditions change, then within the next two years or so I would not be surprised if the gentleman's ancestors or my ancestors, if any are still alive, may have to hunt for something else besides bones.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. BOYLAN. Mr. Chairman, I ask unanimous consent to extend my time for three minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BOYLAN. I yield to the gentleman from Oklahoma [Mr. HASTINGS].

Mr. HASTINGS. Mr. Chairman, I think this is one of the most important items in the bill. There are more demands from the people of the United States for the books issued by the Bureau of Ethnology in the Smithsonian Institution than perhaps any other bureau in the Government. I have had more requests for books from the Bureau of Ethnology than any other bureau. I think this is a very important item, and I trust that my good friend and colleague from Oklahoma [Mr. McCLINTIC] will not underestimate the importance of the work of the Smithsonian Institution in attempting to reduce this item.

Mr. McCLINTIC of Oklahoma. I have no desire to offer anything that will do away with the possibility of obtaining books, but I do want to reduce the appropriation down to $25,000, so that we can cut out these useless excursions that are not necessary.

Mr. HASTINGS. My colleague from Oklahoma, I fear, has not studied the matter, and makes the motion providing for a lump-sum reduction amounting to $25,000 without any breakdown to show how it would be used. It would greatly cripple the service of the Bureau of Ethnology. This is a very small appropriation, and it ought to be retained in the bill.

The CHAIRMAN. The time of the gentleman from New York has expired. The question is on the amendment offered by the gentleman from Oklahoma.

The question was taken; and on a division (demanded by Mr. McCLINTIC of Oklahoma) there were—ayes 19, noes 33.

So the amendment was rejected.

The Clerk read as follows:

TARIFF COMMISSION

For salaries and expenses of the United States Tariff Commission, including purchase and exchange of labor-saving devices, the purchase of professional and scientific books, law books, books of reference, gloves and other protective equipment for photostat and other machine operators, rent in the District of Columbia and elsewhere, subscriptions to newspapers and periodicals, and contract stenographic reporting services, as authorized by sections 330 to 341 of the tariff act of 1930, approved June 17, 1930 (U. S. C., Supp. IV, title 19, secs. 1330–1341); $925,098, of which amount not to exceed $746,740 may be expended for personal services in the District of Columbia; not to exceed $2,500 for expenses, except membership fees, of attendance at meetings concerned with

subjects under investigation by the commission; and not to exceed $7,500 for allowances for living quarters, including heat, fuel, and light, as authorized by the act approved June 26, 1930 (U. S. C., Supp VI, title 5, sec. 118a), but not to exceed $720 may be so used for any one person: *Provided*, That the commission may procure supplies and services without regard to section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5) when the aggregate amount involved does not exceed $50: *Provided further*, That no part of this appropriation shall be used to pay the salary of any member of the United States Tariff Commission who shall hereafter participate in any proceedings under sections 336, 337, and 338 of the tariff act of 1930, wherein he or any member of his family has any special, direct, and pecuniary interest, or in which he has acted as attorney or special representative.

Mr. WOODRUM. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Committee amendment offered by Mr. WOODRUM: On page 36, line 25, strike out "$746,740," and insert in lieu thereof "$787,801."

Mr. WOODRUM. Mr. Chairman, in explanation of this amendment, it does not affect in any way the appropriation. It merely affects the amount which may be expended in the District of Columbia. In the last appropriation bill the Senate restricted the amount the Tariff Commission could spend in the District of Columbia, and the Tariff Commission actually had to send some of its employees out of the District of Columbia to do the work which they had to do, because they could not do it in the District of Columbia.

Mr. MILLARD. Will the gentleman yield?

Mr. WOODRUM. I yield.

Mr. MILLARD. That is the same amount as last year?

Mr. WOODRUM. This the same amount as last year, yes.

Mr. McCLINTIC of Oklahoma. Will the gentleman yield for a question?

Mr. WOODRUM. I yield.

Mr. McCLINTIC of Oklahoma. I notice in line 6, page 37, an allowance of $720 may be used for any one person in connection with the appropriation for the Tariff Commission. I would like the gentleman to explain if that means that each commissioner is allowed $720?

Mr. WOODRUM. No. The gentleman will find upon inspection that that language applies to the representatives of the Tariff Commission who are abroad. They have a small corps of experts abroad who gather and collate information for them, and this limits their expense account.

The CHAIRMAN (Mr. BANKHEAD). The question is on the amendment offered by the gentleman from Virginia [Mr. WOODRUM].

The amendment was agreed to.

The Clerk read as follows:

UNITED STATES SHIPPING BOARD

For three commissioners and for all other expenditures authorized by law, including the compensation of a secretary to the board, attorneys, officers, naval architects, special experts, examiners, and clerks, including one admiralty counsel at not to exceed $10,000 per annum, one technical expert in connection with construction loan fund, at not to exceed $10,000 per annum, and other employees in the District of Columbia and elsewhere; and for all other expenses of the board, including the rental of quarters outside the District of Columbia, law books, books of reference, periodicals, and not exceeding $600 for newspapers, and traveling expenses of members of the board, its special experts, and other employees, while upon official business away from their designated posts of duty, including attendance at meetings or conventions of members of any society or association, the purpose of which the board may consider of interest to the development and maintenance of an American merchant marine, when incurred on the written authority of the chairman of the board, and for the employment by contract of expert stenographic reporters for its official reporting work including the investigation of foreign discrimination against vessels and shippers of the United States and for the investigation of transportation of immigrants in vessels of the United States Shipping Board, $317,744, of which amount not to exceed $284,000 may be expended for personal services in the District of Columbia: *Provided*, That the annual estimates of the Shipping Board for the fiscal year 1935 shall be accompanied by a statement showing the number and compensation of employees of the Fleet Corporation assigned to the Shipping Board: *Provided further*, That employees of the Merchant Fleet Corporation assigned to and serving with the Shipping Board whose compensation is within the range of salary prescribed for the appropriate grade to which the position has been allocated under the classification act of 1923, as amended, shall not be subject to reduction in salary by reason of their transfer during the fiscal year 1934 to the pay roll of the Shipping Board.

Mr. DOWELL. Mr. Chairman, I reserve a point of order against the paragraph. I desire to inquire of the chairman of the subcommittee with reference to a statement that was made some time ago on the floor of the House that the work of this department would be entirely completed within a year. What information has the gentleman on that subject?

Mr. WOODRUM. I do not know who made the statement to which the gentleman refers. The Shipping Board is gradually liquidating, and undoubtedly, had it not been for the economic conditions that have stricken every branch of human activity, they would have sold a great many of their vessels and a great many of their lines, but if the gentleman will look at the RECORD, I placed in the RECORD on January 31, at page 3134, a breakdown showing how the Shipping Board appropriation each year is materially less. They have on hand a few lines now, and I think some of them will be sold during the fiscal year. Without going into a great deal of detail, the hearings show that they are liquidating as fast as they can, without sacrificing the very valuable property which they have.

Mr. DOWELL. How much reduction has been made in the appropriation over the appropriation for last year?

Mr. WOODRUM. The total appropriation, of course, is something like $2,000,000 more, for the reason that last year we made no appropriation for operating deficit for the Merchant Fleet Corporation, direct from the Treasury. They have a right to use, as the gentleman knows, the fees which they collect, and certain other indefinite appropriations, but their operating deficit for 1934 is estimated to be something like $1,000,000 less than it was for 1933. The net result of it is a reduction of more than $1,000,000 between 1933 and 1934.

Mr. DOWELL. How soon will this department be liquidated, as the gentleman terms it?

Mr. WOODRUM. That is very problematical. If they can sell their vessels, of course, they can wind up. If not, they must carry on. They are very hopeful that during the fiscal year they will be able to dispose of some of their lines and materially reduce their activities.

Mr. DOWELL. And is that the gentleman's opinion about it?

Mr. WOODRUM. That is my opinion about it.

Mr. SNELL. Will the gentleman yield for a question?

Mr. WOODRUM. I yield.

Mr. SNELL. About what is the operating deficit at the present time?

Mr. WOODRUM. The estimated operating deficit in 1934 is $5,211,600. In 1930 it was $10,000,000.

Mr. SNELL. We are decreasing our operations all the time?

Mr. WOODRUM. Yes, sir.

Mr. DOWELL. May I ask one other question? Is it not possible for this to be placed under some other branch of the Government and relieve a great deal of the overhead expense while this is being done?

Mr. WOODRUM. The gentleman knows that in the last Congress, in the economy bill, we reduced the number of commissioners from seven to three, and we also reduced a great many of the salaries. In the appropriation bill last year we cut down the cost of the legal department over $100,000 a year. It may be that under some plan of reorganization the activity of the Shipping Board may be put into some other department.

Mr. DOWELL. I note that you have a number of attorneys at $10,000 a year. How many attorneys are employed in this branch?

Mr. WOODRUM. I think the gentleman is mistaken about that. There are not a number of them. There is one at $10,000.

Mr. DOWELL. How much are they receiving now?

Mr. WOODRUM. There is quite a good deal of litigation connected with the Shipping Board, and the Shipping Board itself has recommended that their litigation be sent over to the Department of Justice. They have quite an imposing legal staff. It runs something like $100,000 a year for their legal talent, but they have a great many compli-

cated legal questions, and they have some lawyers who draw about $6,000 or $7,000 a year.

Mr. DOWELL. My reservation of a point of order was made with reference to the proviso, in order that I might make an inquiry. I notice a number are being transferred here from the Merchant Fleet Corporation to the Shipping Board. Has it been customary to carry such language in the bill in the past?

Mr. WOODRUM. Yes. The law requires that they be transferred as fast as possible from the Shipping Board to the Merchant Fleet Corporation, and such language has been carried in this bill for a number of years.

Mr. DOWELL. Are they in need of these extra employees?

Mr. WOODRUM. It is not a question of extra employees; it is simply a question of bookkeeping, a change of status.

Mr. DOWELL. It is not an actual change so far as the number of employees are concerned?

Mr. WOODRUM. Not at all.

Mr. DOWELL. Mr. Chairman, I withdraw the reservation of the point of order.

Mr. McCLINTIC of Oklahoma. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McCLINTIC of Oklahoma: Page 39, line 15, after the word "Board," insert *"And provided further,* That no part of this appropriation shall be paid to more than one caretaker on any ship not in active service."

Mr. McCLINTIC of Oklahoma. Mr. Chairman, every Members of Congress knows there are a great many leaks in different departments of the Government about which we know little.

I wish to call the attention of the House to the fact that the Shipping Board has under its jurisdiction many old ships that were constructed during the war period and some that we captured were impounded. I have in mind three ships, two of them said to have formerly belonged to the Kaiser, stationed at or near Solomons Island. With these two ships is an old oil tanker. Some time ago I brought it to the attention of the Speaker of this House, making the statement that, according to information I had, a large number of individuals had been given employment for a period of 12 or 14 years. Making an investigation of that subject, I found that between $250,000 and $300,000 have been expended by the Shipping Board to pay salaries of men on a type of ship that, in my opinion, is not worth anything except for junk.

These ships, if I am correctly informed, are anchored to piles driven in such a way that the tides can not move the ships. I do not believe the type of the ships is such that they can ever be used for private or commercial purposes.

It seems to me one caretaker on each ship, which would be three in number, would provide a sufficient number of men to take care of this group of three ships and be sufficient for all such purposes. I feel that by adopting an amendment of this kind we will be able to save money in these ports where groups of such vessels are now anchored waiting the possibility of being purchased or scrapped. I do not believe financial conditions are such that these ships can be sold with any degree of success for any period of years, and since they are in an inoperative condition and anchored in such a way as to be able to resist storms, surely no one can say we should provide a complement of men sufficient to operate them, especially when there is no thought in anyone's mind that they will ever be utilized for commercial purposes.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. McCLINTIC of Oklahoma. I shall be pleased to yield.

Mr. STAFFORD. If I understand the purport of the gentleman's amendment, it would have the effect of making one man remain on duty 24 hours a day.

Mr. McCLINTIC of Oklahoma. There would be three men stationed at this one place on three ships. Surely the time could be divided between the three men. In most of these places, if I am correctly informed, there are more than 3 ships, possibly in some places there are 50 ships.

Mr. WOODRUM. If the gentleman will permit, the average is less than two to a ship.

Mr. STAFFORD. If the gentleman will further permit, the gentleman has in mind three certain ships, but his amendment is all pervasive. There may be situations where there is but one ship to be taken care of, and the gentleman's amendment would compel the Shipping Board to have one caretaker working 24 hours a day.

Mr. McCLINTIC of Oklahoma. My amendment refers only to caretakers.

Mr. STAFFORD. Yes.

Mr. McCLINTIC of Oklahoma. If the ship is in an operative condition, then the men on it would not be caretakers, but would be mechanics and other craftsmen.

Mr. GOSS. Mr. Chairman, will the gentleman yield?

Mr. McCLINTIC of Oklahoma. I shall be pleased to.

Mr. GOSS. There are ships anchored in the harbor of Seattle, in the Great Lakes, and on the Hudson River. In some instances there is but one lone ship. If the gentleman's amendment is adopted it would violate the navigation laws of the United States when it comes to the question of fog signals.

Mr. McCLINTIC of Oklahoma. Is the gentleman in a position to state that there are individual ships?

Mr. GOSS. Yes; I have seen them in the Hudson River.

Mr. McCLINTIC of Oklahoma. Then, Mr. Chairman, I ask unanimous consent to modify my amendment to make it provide for two caretakers instead of one.

Mr. WOODRUM. That is more than there is being employed now.

Mr. McCLINTIC of Oklahoma. No.

Mr. GOSS. I may say to the gentleman that the practice on board ship is for men to work 4 hours on and 8 hours off, so there would have to be 3 provided for.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

Mr. GOSS. I object.

Mr. McCLINTIC of Oklahoma. Mr. Chairman, I ask unanimous consent to modify my amendment to make it provide for not more than three caretakers. There should be some limitation for the reason there are 15 men assigned to these three ships at Solomons Island.

Mr. WOODRUM. Mr. Chairman, may we have the amendment as modified reported?

The CHAIRMAN. Without objection, the Clerk will report the modified amendment.

There was no objection.

The Clerk read as follows:

Amendment offered by Mr. McCLINTIC of Oklahoma: Page 39, line 15, after the word "board," insert *"And provided further,* That no part of this appropriation shall be paid to more than three caretakers on any ship not in active service."

The CHAIRMAN (Mr. BANKHEAD). The question is on the amendment as modified.

The question was taken; and on a division (demanded by Mr. McCLINTIC of Oklahoma) there were—ayes 7, noes 41.

So the amendment was rejected.

The Clerk read as follows:

UNITED STATES SHIPPING BOARD SHIPPING FUND

For expenses of the United States Shipping Board Merchant Fleet Corporation during the fiscal year ending June 30, 1934, for administrative purposes, miscellaneous adjustments, losses due to the maintenance and operation of ships, including operation through an agreement to pay a lump-sum compensation, for the protection of the interests of the United States in any vessel on which the United States holds a mortgage, for the repair of ships, for the purchase, exchange, maintenance, repair, and operation of motor vehicles for official purposes only; for the payment of premiums for liability, fire, theft, property damage, and collision insurance and for other forms of insurance, including schedule and fidelity bonds, commonly carried by commercial corporations engaged in the same or a similar business, and for carrying out the provisions of the merchant marine act, 1920, and amendments thereto, (a) the amount of operating funds on hand July 1, 1933, not to exceed $50,000,000; (b) $2,875,000, including the salaries of employees of the Fleet Corporation assigned to the Shipping Board; (c) all amounts received during the fiscal year

ending June 30, 1934, other than the proceeds of sales of ships and surplus property; (d) so much of the total proceeds of sales of ships and surplus property received during the fiscal year 1934, but not exceeding $1,000,000, as is necessary to meet the expenses of liquidation, including the costs incident to the delivery of vessels to purchasers, the cost of maintaining the laid-up fleet and the salaries and expenses of the personnel engaged in liquidation: *Provided*, That the unexpended balance of $500,000 made available for experimental and research work in the independent offices appropriation act for the fiscal year 1930 reappropriated and made available until June 30, 1933, is hereby continued available until June 30, 1934, for the same purposes and under the same terms, including supervision and inspection of construction of vessels on which loans have been made from the construction loan fund: *Provided further*, That no part of these sums, (a), (b), (c), and (d) shall be used for the payment of claims arising out of the construction and requisitioning of vessels; (e) all interest earned on the funds, excepting the construction loan fund, of the United States Shipping Board Merchant Fleet Corporation is to accrue to these funds and is made available for the purposes hereinbefore set forth subject to the limitations herein established: *Provided further*, That the unexpended balances of the sums made available by the independent offices appropriation act, 1930, for reconditioning and operating ships for carrying coal to foreign ports continued available for the same purposes for the fiscal year 1933 are hereby made available for the general purposes hereinbefore set forth for the Merchant Fleet Corporation for the fiscal year 1934: *Provided*, That not to exceed $4,000,000 of the funds hereinbefore made available may be transferred to the Post Office Department and, when so transferred, shall be available only for meeting the cost in the fiscal year 1934 of foreign mail contracts entered into by that department under the provisions of the merchant marine act, 1928, approved May 22, 1928, for service upon steamship lines which may be sold by the United States Shipping Board subsequent to December 1, 1932.

Mr. GOSS. Mr. Chairman, I reserve a point of order on the proviso beginning in line 15 of page 41.

Mr. BOLAND. Mr. Chairman, I have an amendment.

Mr. GOSS. Mr. Chairman, I have reserved a point of order in order to ask the gentleman from Virginia why the gentleman has diverted the fund mentioned in the proviso, in lines 15 to 22 of page 41?

Mr. WOODRUM. This just puts the money back where it was in the first place. This fund was appropriated by Congress originally as a sort of protection for the export coal trade. The Shipping Board feels that if they have a fund available for reconditioning ships it protects the American rate; and if they do not have it, it leaves the matter open.

Mr. GOSS. As I understand, the proviso takes that fund away from them.

Mr. WOODRUM. It takes it away from them for this year for operating expenses, because of the apparent lack of need for it now, because there is no coal being exported.

Mr. GOSS. I see the gentleman from Pennsylvania [Mr. BOLAND] is on his feet and perhaps he wants to discuss the matter, and I therefore withdraw the point of order for the benefit of the gentleman from Pennsylvania.

Mr. BOLAND. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BOLAND: Page 41, line 20, after the word "available," strike out the word "for," and down to and including the word "corporation" in line 21.

Mr. BOLAND. Mr. Chairman, the purpose of the amendment is to leave this fund the way it was and not divert it from its original purpose.

The only reason the fund is being taken away from them now, as I view it, is because of the decline in the exporting of coal on account of the depreciation in foreign currency. As soon as the currency is stabilized, this fund is very, very essential for the shipment of coal. This is just another act against the coal industry that is being hurt so much and is one of the things that is causing men to be idle, particularly in the coal fields. It is just another piece of legislation against the men who mine coal.

I can not for the life of me see what good will be accomplished by diverting this money from the purpose for which it was originally appropriated. For this reason I have offered the amendment.

Mr. GOSS. I read in the hearings that the Coal Exporters' Association is opposed to diverting this fund.

Mr. BOLAND. That is very true, and I was just looking at that statement in the hearings. The Coal Exporters' Association said in the hearings that—

Under the circumstances the Coal Exporters' Association hopes the reappropriation of this fund may be continued for another year and not diverted to purposes for which it was not intended.

Mr. WOODRUM. That is quite true, I will say to the gentleman from Pennsylvania, but the diverting of this fund enables the Shipping Board to have the benefit of the fund rather than a new appropriation, when the evidence shows that during the last year or two they have not had to use a penny of the fund for the purpose carried in the bill.

Mr. GOSS. And there is about $1,000,000 in that fund?

Mr. WOODRUM. Somewhat less than $1,000,000.

Mr. GOSS. Nine hundred thousand dollars, as I recall the hearings.

Mr. WOODRUM. Yes.

Mr. GOSS. And that amount would be reappropriated for the general purposes of the merchant fleet, rather than for the earmarked purpose for which it was originally intended in helping our people export coal.

Mr. WOODRUM. The purpose of the language is to take this $900,000 that has been idle for the past year or two and not used or needed, with no present evidence of its being needed, and use it now rather than to take another million dollars out of the Public Treasury.

Mr. GOSS. Why does the gentleman say it is not needed, when the Coal Exporters' Association says it is needed?

Mr. WOODRUM. They do not say it is needed now. They say it may be needed.

Mr. BOLAND. What evidence have we that this money will be used for other purposes?

Mr. WOODRUM. Because we are putting it in the appropriation bill rather than provide another $1,000,000.

Mr. BOLAND. Why divert the money to some other purpose, when we do not know whether it will be used or not?

Mr. GOSS. I will call the gentleman's attention to the fact that the coal industry is in a rather precarious condition.

Mr. WOODRUM. Yes, I realize that; and if in the next 12 months such a fund is needed for reconditioning ships, there is every reason to believe that Congress is going to be in session during the middle of the summer and again in the winter, and there will be ample opportunity to take care of the matter. However, here is $1,000,000 that is idle with no evidence of its being needed in the immediate future. If evidence develops that it will be needed, then we can put it back in the bill.

Mr. BOLAND. But, Mr. Chairman, that is looking to the future and I can not agree with my friend from Virginia on that particular point. I do not like to see this money diverted.

Mr. VINSON of Kentucky. May I ask the gentleman from Virginia when this money was originally appropriated?

Mr. WOODRUM. In 1929 or 1930.

Mr. VINSON of Kentucky. I mean the original appropriation out of which there is now $900,000 available?

Mr. WOODRUM. In 1929 or 1930.

Mr. VINSON of Kentucky. Does the gentleman know why the Shipping Board did not recondition boats for coal export?

Mr. GOSS. I may say that it was made available again in 1933.

Mr. VINSON of Kentucky. Could the gentleman from Virginia give us information as to why the Shipping Board did not recondition the boats to carry coal into South America and the Mediterranean, for which the appropriation was made?

Mr. WOODRUM. I have never heard any complaint from the Exporters' Association. The gentleman who appears before our committee, Mr. Hale, of the Exporters' Association, has never made any complaint about the treatment that the Exporters' Association has had. He has claimed that the fact this fund is available, in a measure, has been insurance which protected their rates. Due to the fact there is now no export coal trade and has not been for the past 12 months, and so far as we know there will not be for the next 12 months, although we hope there will be, it is felt that this money could be used for other purposes.

Mr. VINSON of Kentucky. I want to say to the gentleman that from my observation with respect to the attitude of the Shipping Board, they never made any effort to get any export coal trade.

[Here the gavel fell.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. BOLAND].

The amendment was rejected.

The Clerk read as follows:

No officer or employee of the United States Shipping Board or the United States Shipping Board Merchant Fleet Corporation shall be paid a salary or compensation at a rate per annum in excess of $10,000 except the following: One at not to exceed $18,000, and two at not to exceed $12,000 each.

Mr. GOSS. Mr. Chairman, I move to strike out the last word. I notice on page 44 there is an appropriation of $150,000 for compensation of regular attorneys employed on a yearly or salary basis, including their clerical and legal assistants. I notice in the hearings that some of these attorneys get more than $12,000. What is the effect of the limitation on page 43? Does it apply to this legal division?

Mr. WOODRUM. It applies to all of them.

Mr. GOSS. I notice in the hearings that some attorneys are receiving more than $12,000.

Mr. WOODRUM. The economy act cuts them all. No attorneys down there are receiving more than that except the general counsel. Foreign attorneys are paid on a fee basis.

Mr. GOSS. I withdraw the pro forma amendment.

The Clerk read as follows:

Of the sums herein made available under the United States Shipping Board, not to exceed an aggregate of $150,000 shall be expended for compensation of regular attorneys employed on a yearly salary basis, including their clerical and legal assistants.

Mr. GOSS. Mr. Chairman, I move to strike out the last word for the purpose of asking a question. This is a rather complicated matter, as I gather from reading the hearings. I would like to ask the gentlemen if this includes foreign service?

Mr. WOODRUM. No; this is for the legal staff. This does not include the foreign service.

Mr. GOSS. You do not appropriate any money for the foreign service?

Mr. WOODRUM. No; we have not given them anything for the foreign service. The gentleman will find in the hearings that they asked for an appropriation, but we did not provide any money for the foreign attorneys.

Mr. GOSS. What will they do if they had to have the service over there?

Mr. WOODRUM. They will present their bill, and we will have to take care of it.

Mr. STAFFORD. Mr. Chairman, I note in comparing these same items with the current law, that the current law is $125,000. Why have you increased it?

Mr. WOODRUM. One hundred and fifty thousand dollars is what we gave them. That is what the House gave them last year. The Senate cut it to $75,000, and in conference we put it back to $100,000 and they could not get along on it. They said for the clerical and legal services and stenographers they would have to have $150,000.

Mr. GOSS. That is putting them in there to keep them out of the furlough plan.

Mr. WOODRUM. It does not keep them out of the furlough plan.

Mr. GOSS. The men that work for the Government spend all their time there, and the gentleman says there is no money available for foreign attorneys this year.

Mr. WOODRUM. No.

The Clerk read as follows:

VETERANS' ADMINISTRATION

MILITARY SERVICES

Administration, medical, hospital, and domiciliary services: For all salaries and expenses of the Veterans' Administration, including the expenses of maintenance and operation of medical, hospital, and domiciliary services of the Veterans' Administration, in carrying out the duties, powers, and functions devolving upon it pursuant to the authority contained in the act entitled "An act to authorize the President to consolidate and coordinate governmental activities affecting war veterans," approved July 3, 1930 (U. S. C., Supp. VI, title 38, secs. 11–11f), and any and all laws for which the Veterans' Administration is now or may hereafter be charged with administering, $110,538,514: *Provided*, That not to exceed $3,500 of this amount shall be available for expenses, except membership fees, of employees detailed by the Administrator of Veterans' Affairs to attend meetings of associations for the promotion of medical science and annual national conventions of organized war veterans: *Provided further*, That this appropriation shall be available also for personal services and rentals in the District of Columbia and elsewhere, including traveling expenses; examination of estimates of appropriations in the field, including actual expenses of subsistence or per diem allowance in lieu thereof; for expenses incurred in packing, crating, drayage, and transportation of household effects and other property, not exceeding in any one case 5,000 pounds, of employees when transferred from one official station to another for permanent duty and when specifically authorized by the administrator; furnishing and laundering of such wearing apparel as may be prescribed for employees in the performance of their official duties; purchase and exchange of law books, books of reference, periodicals, and newspapers; for passenger-carrying and other motor vehicles, including purchase, maintenance, repair, and operation of same, including not more than two passenger automobiles for general administrative use of the bureau in the District of Columbia and three for the Washington, D. C., regional office; and notwithstanding any provisions of law to the contrary, the administrator is authorized to utilize Government-owned automotive equipment in transporting children of Veterans' Administration employees located at isolated stations to and from school under such limitations as he may by regulation prescribe; for operating expenses of the Arlington Building and annex, and the Wilkins Building, including repairs and mechanical equipment, fuel, electric current, ice, ash removal, and miscellaneous items; for allotment and transfer to the Public Health Service, the War, Navy, and Interior Departments, for disbursement by them under the various headings of their applicable appropriations, of such amounts as are necessary for the care and treatment of beneficiaries of the Veterans' Administration, including minor repairs and improvements of existing facilities under their jurisdiction necessary to such care and treatment; for expenses incidental to the maintenance and operation of farms; for recreational articles and facilities at institutions maintained by the Veterans' Administration; for administrative expenses incidental to securing employment for war veterans; for funeral, burial, and other expenses incidental thereto for beneficiaries of the Veterans' Administration accruing during the fiscal year 1934 or prior fiscal years: *Provided further*, That the appropriations herein made for the care and maintenance of veterans in hospitals or homes under the jurisdiction of the Veterans' Administration shall be available for the purchase of tobacco to be furnished, subject to such regulations as the Administrator of Veterans' Affairs shall prescribe, to veterans receiving hospital treatment or domiciliary care in Veterans' Administration hospitals or homes: *Provided further*, That the appropriations herein made for medical and hospital services under the jurisdiction of the Veterans' Administration shall be available, not to exceed $15,000, for experimental purposes to determine the value of certain types of treatment: *Provided further*, That the Administrator of Veterans' Affairs may, with the concurrence of the Attorney General, transfer to the Department of Justice such personnel and/or funds as may be deemed necessary in connection with the defense of suits against the United States under section 19 of the World War veterans' act, 1924, as amended.

Mr. LANHAM. Mr. Chairman, I move to strike out the last word. One of my colleagues had expected to ask a question with reference to the Veterans' Administration. He has been called from the floor by other business. I should like also to have the information that I have in mind. The Veterans' Administration in its operation now has three or four places in the country where there are boards of review, to which appeals in veterans' cases are sent before they are finally disposed of here in Washington. These appeals are from the various regional offices. I can not recall in my experience that a board of review has ever rendered an opinion which was not in absolute conformity with the opinion rendered originally in the regional office. So far as I have been able to learn, that is the common experience of Members of Congress. If that be true, it seems to me that the Government of the United States in these times of stress and strain might well obviate the expense of carrying on these intermediate boards of review. If they serve no other function than to substantiate the original finding in the regional office, the appeals might as well come on to Washington in the first instance. That would avoid delay in the handling of veterans' cases and at the same time eliminate much useless expense. I should like to have information from the chairman of the subcommittee, or from anyone else who can give it, with reference to what useful purpose these boards of review really serve and why they could not be eliminated and

the Government of the United States saved the expense of their operation.

Mr. WOODRUM. Mr. Chairman, I think the gentleman's observation is very timely. The colleague he speaks of spoke to me about it a day or two ago after our hearings had been closed. Of course, the establishment of these central boards of review, 1 at Chicago, 1 at San Francisco, 1 at New Orleans, and 1, I think, at Boston, was a part of the decentralizing process when they established the regional offices and then the central boards of appeal, and then the final appeal to the central office. My experience has been what the gentleman's has been, that the Central Board of Appeals confirms the decision of the lower board, and all it amounts to is delay, and possibly some veteran who appeals there did not appeal here. Members of Congress usually ask that their cases be sent on here. I think the suggestion is timely, and I shall pass it on to the Veterans' Administration, and I believe they will give it careful consideration.

Mr. LANHAM. Mr. Chairman, may I make this further suggestion. One of the contentions made by veterans is that, though there is a disposition on the part of the Congress of the United States to appropriate adequate funds for their care and maintenance in worthy cases, much of this money is dissipated in useless boards of this character which serve no real function, and that the veterans themselves do not receive a proper proportion of the money that is appropriated, that much of it is wasted in red tape and in useless officers, and that they are entitled to a greater proportion of the money which Congress appropriates for them.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. LANHAM. Mr. Chairman, I ask unanimous consent to proceed for one minute more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. LANKFORD of Virginia. Mr. Chairman, will the gentleman yield?

Mr. LANHAM. Yes.

Mr. LANKFORD of Virginia. Does the gentleman recall in his experience any change being made by any of these boards in any of their findings? Do they not simply continue the finding of the regional offices?

Mr. LANHAM. That has been my experience, and I think without any variation, and I take it that that has been the experience of each Member of the House. If any Member has any experience to the contrary, I should like to hear of it. If the instances are few and rare in which they disagree with the findings of the regional office, it seems to me we might well obviate both the delay and expense of carrying on these boards.

Mr. LANKFORD of Virginia. I thoroughly agree with the gentleman. In my four years' experience I have had many cases, but I never have had a case that changed the finding of the regional office.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. CONNERY. Mr. Chairman, I rise in opposition to the pro forma amendment. I have not had the experience of the gentleman from Texas at all. Here is the practical experience that I have had: When we started originally during the Veterans' Bureau investigation, I went before the Senate investigating committee, and I remember at that time offering quite a long statement with reference to these boards, particularly that they were rubber stamps, one for the other in the central office, and partly as a result of my statement they decentralized these boards and sent these cases into the regional office. Here is the experience that I have had: Men in the regional offices at Boston, Chicago, and New Orleans are trying to get the benefits of this veterans act over to the veterans, but they have a feeling that if they try to do real justice to the veteran and give him what he is entitled to Washington will come down on them with a hammer and the result is they go very slowly, and that is why your cases are reaffirmed again when they reach Washington; but any time that the boards in Boston, New Orleans, or Chicago desire to give the veteran what he is entitled to, often you get prompt reversal of that board, and these men are really afraid of their lives in making real liberal decisions in favor of the veteran.

Mr. LANHAM. If they are afraid of their lives and can not make proper decisions, then they serve no useful function. My experience has been this: That after they have concurred in the findings of the regional office and the cases have been appealed to the Washington office here the Washington office has often taken a contrary view and has made decisions more favorable to the veterans.

Mr. CONNERY. I did not find that at all. I found that when we decentralized we got some results for the veterans; but before that, when we had all the cases go to the central bureau, the veteran got poor results. Then there was board after board, rubber stamp after rubber stamp. At least, the men out in the field try to contact the veteran. They know him; they know his family; they know his situation; they know all about his war service. Down here in Washington there were cases piled high that they never could reach.

Mr. LANHAM. I am not speaking about the regional offices. I am speaking about the intermediate boards of appeal. They have no opportunity to get in touch with the veteran. For instance, if an appeal is sent from my district out to San Francisco, the San Francisco board of review has no opportunity to contact the veteran.

Mr. CONNERY. But, when we decentralized that, the gentleman knows that in the central office there were cases piled all over desks that could not be reached in 15 years with the boards they had. Now at least there is the regional office. They go over the case. The board of appeals has a chance to look at that case and know something about it. They may affirm the lower board. However, anything on decentralization, I say, is much better for the veteran than bringing it to the central office in Washington.

Mr. LANHAM. Could we not have one general board of appeals here, which would eliminate those in the field, and serve the same purpose?

Mr. CONNERY. We practically had that, and we were in terrible shape during that time.

Mr. BROWNING. Will the gentleman yield?

Mr. CONNERY. I yield.

Mr. BROWNING. My observation is that the regional office can act more intelligently than the boards of appeal.

Mr. CONNERY. I agree with the gentleman.

Mr. BROWNING. Many of the cases the regional boards have rated heretofore, and before they can change the rating they are required to send a tentative rating to the central board; and the central board, in my experience, holds adversely to the man. I think the gentleman from Texas [Mr. LANHAM] is correct that these central boards do not really serve a useful purpose, and the boards that contact the men and have the men before them really ought to have the last word.

Mr. VINSON of Kentucky. Will the gentleman yield?

Mr. CONNERY. I yield.

Mr. VINSON of Kentucky. In my experience in the Chicago board of appeals they have never reversed the regional office. The decision has always been the same.

Now, in regard to those men being scared of their lives, it seems to me it is a good time to save them from their fear.

Mr. CONNERY. I suggest to the chairman, not that he suggest that the boards be removed but that he tell the Director of the Veterans' Bureau to give those men a free hand and not say, "If you spend any money for the veteran, we will not affirm the decision." That is the whole story.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired. All time has expired.

The pro forma amendment was withdrawn.

The Clerk read as follows:

No part of this appropriation shall be expended for the purchase of any site for or toward the construction of any new hospital or home, or for the purchase of any hospital or home; and not more

than $4,200,000 of this appropriation may be used to repair, alter, improve, or provide facilities in the several hospitals and homes under the jurisdiction of the Veterans' Administration either by contract or by the hire of temporary employees and the purchase of materials.

Mr. LANKFORD of Virginia. Mr. Chairman, I offer a pro forma amendment to strike out the word "hospitals" in line 3, page 48.

I would like to know whether the committee considered the advisability of using some of the vacant private-hospital space over the country rather than to continue the expense for veterans' hospitals. The gentleman probably knows that half the beds in private hospitals over the country to-day are vacant. The medical profession is generally in distress. Is it possible to use their service and use the beds in those hospitals, and effect a saving, rather than to be building hospitals all over the country?

Mr. WOODRUM. It is the policy of the hospitalization board and the Veterans' Administration not to build any more hospitals, but so far they have been unable to get rates from private hospitals that compare at all with the cost of hospitals operated by the Veterans' Administration.

Mrs. ROGERS. Will the gentleman yield?

Mr. LANKFORD of Virginia. I yield.

Mrs. ROGERS. I understand that if the men are put in private hospitals everything is extra. The Veterans' Administration must pay extra for X rays, physiotherapy, medicine, laboratory tests, special care in very sick cases, and everything like that. In 1922 in some of the contract hospitals they were keeping some of the men much longer than necessary. When there are vacant beds the temptation to keep the men hospitalized is probably great. In 1922 I did not feel that in some cases the men were given proper care in contract hospitals.

Mr. LANKFORD of Virginia. That is probably true. Of course, the expense in the private hospitals is heavy, but I am wondering is it as heavy as the present system, when we build and operate hospitals and furnish the doctors and nurses.

Mrs. ROGERS. At the present time there are practically no hospitals where mental and nervous cases can be taken care of. I mean there are no vacant beds available in State hospitals for the mentally sick. The overcrowding is very great in many State hospitals. They can not care for all of the mentally sick civilians.

Mr. LANKFORD of Virginia. Probably not in that kind of case.

Mrs. ROGERS. That is also true in most of the tuberculosis hospitals. The State hospitals do not have enough facilities for taking care of those cases. At the present time the medical section of the Veterans' Administration under Doctor Giffiths is giving the veterans fine nursing and medical care in the main.

Mr. LANKFORD of Virginia. I withdraw the pro forma amendment.

Mr. KLEBERG. Mr. Chairman, I move to strike out the last word for the purpose of asking the gentleman from Massachusetts [Mr. CONNERY] a question. A moment ago I was out of the Chamber when my colleague [Mr. LANHAM] made the remark that one of his colleagues had called his attention to the matter of the appeal boards over the country. I understand he asked the gentleman from Massachusetts a question, together with other members of the committee, if he or any of the others had had any real returns on their investment in sending the veterans' cases through the appeal boards. My purpose in asking this question is to bring out one particular thing in connection with the Veterans' Administration. The actual expenditure for the benefit of the veterans is, in reality, not the bulk of the expense involved in this appropriation. I feel sure the veterans of this country, together with the Members of this Congress, are interested in doing what they can to economize at this time. My interest in suggesting to my colleague had to do purely with the proposition of suggesting that we use our best efforts to work out a means whereby the machinery of delivering the service to the veterans might be cut down, in order that the waste of expenditure in this item might be brought down to a more proper figure. That was my reason.

Now, I ask the gentleman from Massachusetts [Mr. CONNERY] if he has had any results in such cases. I have had some 700 of them on appeal, and have found in every case the local board has been upheld. When the veteran has taken an appeal I have gotten some results after the appeal board has turned down the appeal by coming to the central office and the board in Washington. It occurs to me that the expense of maintaining these different appeal boards over the country, at San Francisco, New Orleans, and various places, without naming them, might be taken into consideration when it comes to the future working out of difficulties in the machinery which administers the problems confronting the Veterans' Administration with a view to seeing that better service is given to those veterans who are entitled to it.

Mr. CONNERY. Of course, I am in hearty sympathy with what I think the gentleman has in mind, except I may say I do not think it is a problem of shifting the decision at all. I think it is a question of the attitude of the central office in Washington. Not only the boards of review but the regional offices have been given to understand they must cut expenditures, and the men in those offices are afraid in many cases to do justice to the Veterans' Bureau.

Mr. KLEBERG. I agree with the gentleman's statement, but has the gentleman obtained any results?

Mr. CONNERY. Yes; I have obtained results from the board.

Mr. PARSONS. Mr. Chairman, will the gentleman yield?

Mr. KLEBERG. I yield.

Mr. PARSONS. The rating boards are not so much to blame in this matter as are the doctors, the officials, and the designated examiners who fail to state the symptoms and findings of the examination and place them in the file of the veterans upon which a rating can be made under the rules and regulations as to disability ratings. They are the ones who do not do their work properly. Consequently the rating boards have been unable to take any other course. The rating boards should not receive the criticism of Members of Congress. The doctors are to blame, not the rating boards.

[Here the gavel fell.]

Mr. RAMSPECK. Mr. Chairman, I rise in opposition to the pro forma amendment to question the chairman of the subcommittee in reference to the last paragraph that was read. Does hte language there carried mean that the present hospital facilities can not be expanded?

Mr. WOODRUM. It does not provide for that.

The pro forma amendment was withdrawn.

The Clerk read as follows:

Hospital and domiciliary facilities: For carrying out the provisions of the act entitled "An act to authorize an appropriation to provide additional hospital, domiliciary, and out-patient dispensary facilities for persons entitled to hospitalization under the World War veterans' act, 1924, as amended, and for other purposes," approved March 4, 1931 (46 Stat., p. 1550), $5,000,000, to be made immediately available and to remain available until expended.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. There is a paragraph at the bottom of page 47 which forbids any part of the appropriation being expended toward the construction of a hospital.

The paragraph under consideration authorizes the expenditure of $5,000,000 for construction purposes.

Is there any conflict between the two provisions?

I understood from the gentleman's statement that it was not the policy of the committee to recommend the expenditure of further money for hospitals, yet here we have a definitive appropriation of $5,000,000 for this purpose.

Mr. WOODRUM. This $5,000,000 is not for the construction of new hospitals. It is for reconditioning and repair and alterations needed to existing facilities, and not for new construction.

Mr. STAFFORD. The wording of the paragraph is:

To authorize an appropriation to provide additional hospital, domiciliary, and out-patient dispensary facilities.

As I recall that act, it provided for construction for hospital purposes and authorized $5,000,000 for this purpose.

Mr. WOODRUM. No. It has previously been authorized.

Mr. STAFFORD. What is the purpose of the appropriation?

Mr. WOODRUM. To make available funds that have previously been authorized and that have previously been committed and allocated by the Veterans' Administration.

Mr. STAFFORD. Then we are appropriating $5,000,000 for additional hospital facilities for World War veterans?

Mr. WOODRUM. That is right.

Mr. STAFFORD. The statement the gentleman made a minute ago that there was nothing in this bill for this purpose is rather in conflict with the gentleman's present statement.

Mr. WOODRUM. I do not think I made that statement. I stated, I may say to the gentleman, that it was the policy of the Veterans' Administration not to authorize new construction, and they are not doing it.

Mr. STAFFORD. Here is $5,000,000 provided for that purpose.

Mr. WOODRUM. This it not an authorization.

Mr. STAFFORD. I know it is not an authorization.

Mr. WOODRUM. It is money previously authorized and previously committed and allocated.

Mr. STAFFORD. It is $5,000,000 for additional hospitalization.

Mr. SWICK. Will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. SWICK. Is not this just to complete work that is now in progress?

Mr. WOODRUM. That is correct.

Mr. SWICK. It is not for any new buildings or anything of that sort?

Mr. WOODRUM. No new projects are being undertaken.

Mr. STAFFORD. But it will provide additional domiciliary and hospital accommodations.

Mr. SWICK. It will do that; yes.

Mrs. ROGERS. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, I understand this will use up the remaining portion of the approximately $20,000,000 of authorization. This authorization was in our last hospital construction bill which passed in 1931.

Mr. WOODRUM. This is the remaining portion of all the authorizations Congress has made for hospital purposes.

Mrs. ROGERS. And will complete projects that are obligated. In other words, it is simply paying our debts.

Mr. WOODRUM. Yes.

Mrs. ESLICK. Mr. Chairman, I rise in opposition to the pro forma amendment in order to obtain the floor so that I may present to my colleagues a distinguished woman now seated in the Speaker's gallery—Mrs. Charles Henri Fischer, president general of the National Society of Colonial Descendants of America. [Applause.]

The Clerk read as follows:

SEC. 3. No part of any money appropriated by this act shall be used for purchasing any motor-propelled passenger-carrying vehicle (except busses, station wagons, and ambulances) at a cost, completely equipped for operation, in excess of $750, except where, in the judgment of the heads of the sundry executive boards, commissions, and offices, provided for herein, special requirements can not thus be efficiently met, such exceptions, however, to be limited to not to exceed 10 per cent of the total expenditures for such motor vehicles purchased during the fiscal year, including the value of a vehicle exchanged where exchange is involved; nor shall any money appropriated herein be used for maintaining, driving, or operating any Government-owned motor-propelled passenger-carrying vehicle not used exclusively for official purposes; and "official purposes" shall not include the transportation of officers and employees between their domiciles and places of employment except in cases of officers and employees engaged in field work the character of whose duties makes such transportation necessary, and then only when the same is approved by the head of the department. This section shall not apply to any motor vehicles for official use of the Executive office nor of the Administrator of Veterans' Affairs.

Mr. WOODRUM. Mr. Chairman, I offer a substitute section for section 3.

The Clerk read as follows:

Amendment offered by Mr. WOODRUM: On page 52, beginning in line 20, strike out section 3 and insert in lieu thereof the following:

"SEC. 3. In expending appropriations or portions of appropriations contained in this act, for the payment for personal services in the District of Columbia in accordance with the classification act of 1923, as amended, the average of the salaries of the total number of persons under any grade in any bureau, office, or other appropriation unit shall not at any time exceed the average of the compensation rates specified for the grade by such act, as amended: *Provided further*, That this restriction shall not apply (1) to grades 1, 2, 3, and 4 of the clerical-mechanical service, or (2) to require the reduction in salary of any person whose compensation was fixed, as of July 1, 1924, in accordance with the rules of section 6 of such act, (3) to require the reduction in salary of any person who is transferred from one position to another position in the same or different grade, in the same or different bureau, office, or other appropriation unit, (4) to prevent the payment of a salary under any grade at a rate higher than the maximum rate of the grade when such higher rate is permitted by the classification act of 1923 as amended, and is specifically authorized by other law, or (5) to reduce the compensation of any person in a grade in which only one position is allocated."

Mr. CONNERY. Mr. Chairman, I rise in opposition to the amendment in order to obtain some information.

Mr. WOODRUM. Mr. Chairman, in explanation of the amendment, I may say that section 3, as contained in the committee print, has already become permanent law. This is one of the rare instances where the Clerk is in error. In compiling the bill the Clerk put section 3 in the bill instead of the print which I have sent to the desk. The substitute which I have offered is the average-salary clause, which is contained in all the appropriation bills.

Mr. STAFFORD. It is the usual clause incorporated in all the appropriation bills in reference to clerical services?

Mr. WOODRUM. Yes.

The amendment was agreed to.

The Clerk concluded the reading of the bill.

Mr. WOODRUM. Mr. Chairman, I move that the committee do now rise and report the bill back to the House, with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. RAYBURN, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 14458, the independent offices appropriation bill, had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

Mr. WOODRUM. Mr. Speaker, I move the previous question on the bill and all amendments to final passage.

The motion was agreed to.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. PATMAN. Mr. Speaker, I demand a separate vote on the Bankhead amendment.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them in gross.

The other amendments were agreed to.

The SPEAKER. The Clerk will report the Bankhead amendment.

The Clerk read as follows:

Page 22, line 8, strike out the figures "$500,000" and insert the figures "$801,416."

The SPEAKER. The question is on the amendment.

The question was taken; and on a division (demanded by Mr. PATMAN) there were 67 ayes and 46 noes.

Mr. PATMAN. Mr. Speaker, I object to the vote on the ground of the absence of a quorum.

Mr. BANKHEAD. Mr. Speaker, if the House adjourns now, will the vote be in order the first thing to-morrow morning after the reading of the Journal?

The SPEAKER. Will the gentleman from Texas withhold his point of order?

Mr. PATMAN. Yes, Mr. Speaker; I withhold it for the present.

DISTRIBUTION OF COTTON TO THE AMERICAN RED CROSS

Mr. JONES. Mr. Speaker, I present a conference report on the bill (H. R. 13607) to authorize the distribution of Government-owned cotton to the American National Red Cross and other organizations for relief of the distressed.

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13607) to authorize the distribution of Government-owned cotton to the American National Red Cross and other organizations for relief of distress, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 2.

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following substitute:

"Sec. 3. In so far as cotton is delivered to relief agencies by the Cotton Stabilization Corporation under this act the Federal Farm Board is authorized to cancel such part of its loans to such corporation as equals the proportionate part of said loans represented by the cotton delivered hereunder, less the current market value of the cotton delivered, and to deduct the amount of such loans canceled from the amount of the revolving fund established by the agricultural marketing act. To carry out the provisions of this act the unexpended balance of appropriations made for carrying out the provisions of the joint resolution entitled 'Joint resolution authorizing the distribution of Government-owned wheat and cotton to the American National Red Cross and other organizations for relief of distress', approved July 5, 1932, is authorized to be made immediately available, and, in addition, the sum of $4,100,000 is authorized to be appropriated and made immediately available, to the Federal Farm Board to be used solely for the following purposes: For advancing to such corporations amounts to repay loans held by commercial or intermediate credit banks against cotton which would be released for donations under this act and to retire all storage and carrying charges against cotton, including compression charges, at the time of the approval of this act; and for meeting carrying and handling charges, and interest payments on commercial or intermediate credit bank loans, on or against cotton which would be released for donations under this act between the date of its approval and the delivery of the cotton to the American National Red Cross or other organization. Any additional amounts necessary for such purposes shall be paid from the revolving fund established by the agricultural marketing act."

And the Senate agree to the same.

MARVIN JONES,
H. P. FULMER,
G. N. HAUGEN,
Managers on the part of the House.

CHAS. L. MCNARY,
G. W. NORRIS,
E. D. SMITH,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the bill (H. R. 13607) to authorize the distribution of Government-owned cotton to the American National Red Cross and other organizations for relief of distress submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

On amendment No. 1: The bill as it passed the House authorized the use of the cotton which is to be distributed under its authority in providing cloth, wearing apparel, and bedding for the needy and distressed people of the United States and Territories. This amendment will, in addition, permit such cotton to be used for providing comforters and blankets; and the House recedes.

On amendment No. 2: By this amendment contracts for the making of garments would have to provide that not more than five days of eight hours each should constitute a work week; and the Senate recedes.

On amendment No. 3: The Senate amendment strikes out section 3 of the bill and inserts in lieu thereof a substitute which authorizes the appropriation, for credit to the revolving fund, of an amount equal to the current market value of the cotton to be delivered, and provides that amounts necessary to pay the principal and interest of loans and retire storage, carrying, and handling charges against such cotton shall be advanced from the revolving fund. The substitute agreed to in conference is the same as the House provision, with modification that instead of authorizing the appropriation of such amounts as may be necessary for discharging loans and paying interest, storage, handling, and carrying charges, it authorizes for such purposes the making available of the unexpended balance (amounting to approximately $4,500,000) of appropriations made for carrying out the provisions of the joint resolution of July 5, 1932, and the appropriation of an additional sum of $4,100,000. It is further provided that any additional amounts necessary for such purposes shall be paid from the revolving fund.

MARVIN JONES,
H. P. FULMER,
G. N. HAUGEN,
Managers on the part of the House.

INDEPENDENT OFFICES APPROPRIATION BILL—FISCAL YEAR 1934

Mr. BANKHEAD. Mr. Speaker, I ask unanimous consent that the record vote on the Bankhead amendment, on the objection raised by the gentleman from Texas [Mr. PATMAN] may be in order to-morrow immediately after the reading of the Journal, and not to interfere with the previous order for the meeting of the House to-night.

Mr. PATMAN. I want it understood that there shall be a record vote to-morrow without anything further being done.

The SPEAKER. The gentleman from Alabama asks unanimous consent that the bill under consideration may go over until to-morrow, and that a record vote on the Bankhead amendment shall be in order to-morrow immediately after the reading of the Journal. Is there objection?

Mr. CHINDBLOM. Reserving the right to object, it is understood, of course, that this order for a record vote to-morrow is not based on any point of no quorum.

The SPEAKER. It has not been developed that there is no quorum. The Chair has not counted. We are proceeding as if there is a quorum present. Is there objection to the request of the gentleman from Alabama?

Mr. MONTAGUE. Reserving the right to object, I understand that the roll call will be had to-morrow morning.

The SPEAKER. If the unanimous request of the gentleman from Alabama is agreed to, it will be the first thing in order to-morrow. Is there objection?

There was no objection.

HOUSE JOINT RESOLUTION 552—EXTENSION OF REMARKS

Mr. FISH. Mr. Speaker, I desire to take this opportunity to present certain information in support of House Joint Resolution 552, introduced by me, which reads as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Attorney General of the United States be, and he is hereby, authorized and directed to investigate the failure of any company or corporation which receives or has received a loan or loans from the Reconstruction Finance Corporation, or any of its agents, in excess of $50,000, and which has been or is placed in receivership within a period of 90 days after receipt of such loan or loans, and report to

the Congress on or before March 1, 1933, any irregularities, false or fraudulent statements, or any violations of the law governing loans under the Reconstruction Finance Corporation act.

SEC. 2. That the Reconstruction Finance Corporation shall furnish to the Department of Justice any information necessary to carry out the purposes of this resolution.

The following facts were furnished to me by the Reconstruction Finance Corporation, relative to the failure of the Union Indemnity Co., a large insurance company with headquarters at New Orleans, La. I have no financial interest in this company, or any political or personal ax to grind. My only purpose in presenting the facts before the Committee on Banking and Currency of the House of Representatives this morning was because I am firmly convinced that the Congress has a definite duty to protect the interests of the public and to see that the taxpayers' money is not loaned by the Reconstruction Finance Corporation upon misrepresentation or fraudulent statements to companies or corporations which proceed to fail within a few days or weeks of receipt of such loans.

I believe my resolution should be amended to exclude banks, as it is obviously proper and necessary for the Reconstruction Finance Corporation to loan money on good collateral to banks, in case of runs.

I am convinced, from a partial investigation, that the loans made to the Union Indemnity Co. and its affiliates should be immediately investigated, not only by the Reconstruction Finance Corporation but also by the Department of Justice. The loans of the Reconstruction Finance Corporation must be, like Cæsar's wife, above suspicion, and no opportunity afforded the "insiders" of corporations about to fail to recoup their personal losses at the expense of the Federal Government.

An attempt was made at the hearing this morning, by one member of the Committee on Banking and Currency to give the impression that there was a political motive behind my resolution, aimed at Senator HUEY LONG. I wish to disclaim any such thought and am not interested in any political angle that may develop.

The facts I herewith submit disclose a rotten mess that should and must have the searchlight of full publicity cast into every official transaction, without fear or favor, no matter who may be scorched. As for myself, I believe the facts so far ascertained require an immediate and searching investigation to ascertain all the facts upon which to institute criminal proceedings. When depression, undernourishment, and unemployment stalk the land, the American people refuse to tolerate the dissipation of public funds by big corporations for fraudulent purposes.

The Reconstruction Finance Corporation made loans to the Union Indemnity Co. and the Union Title Guarantee Co., its affiliate, amounting to approximately $4,000,000. The last loan, amounting to $970,000, was made on December 28, 1932, and the Union Indemnity Co. failed on January 6, 1933, and the Union Guarantee Title Co. on January 7, 1933.

The records disclose the fact that Mr. Rudolph S. Hecht was chairman of the advisory committee for the Reconstruction Finance Corporation at New Orleans to pass on the loans and collateral for the loans. It appears that the same Mr. Hecht is a director of the Union Indemnity Co., which failed shortly after receiving a loan from the Reconstruction Finance Corporation. It now develops that one or more of the loans made to the Union Indemnity Co. or its holding company was turned over to the Hibernia Bank & Trust Co., of New Orleans, of which Mr. Rudolph S. Hecht is president.

In addition, it is alleged that the security given for loans included bonds of the Union Indemnity Co., now defunct.

I do not wish to do any injustice to Mr. Hecht, whom I do not know, but I demand that, pending full investigation of what appears on the face of it to be fraudulent practice, that he should be compelled to resign as chairman of the advisory committee of the Reconstruction Finance Corporation. It is utterly inconceivable that he should care to, or be permitted to, continue to act in an advisory capacity as chairman of the committee passing on loans to be made by the Reconstruction Finance Corporation in view of his official connection with the Union Indemnity Co. and the Hibernia Bank & Trust Co., which eventually was the beneficiary of loans made by the Reconstruction Finance Corportation to protect the policyholders of the Union Indemnity Co.

As director of the Union Indemnity Co., Mr. Hecht was in a position to know that it was insolvent and on the verge of bankruptcy at the time the loans were made by the Reconstruction Finance Corporation, yet he approved the loans. The mere fact that the Reconstruction Finance Corporation loans were not used for the purpose intended by the Reconstruction Finance Corporation is obtaining Federal funds under misrepresentation of fact, which amounts to fraud. It is quite evident that these loans were made by concealing facts and deceiving the members of the board of directors of the Reconstruction Finance Corporation.

I have the greatest faith in the integrity and high character of all the members of the Reconstruction Finance Corporation board. I voted for the Reconstruction Finance Corporation act, as I believed it was necessary to bolster the credit of the railroads, banks, and insurance companies and restore business confidence and stability, and would do so again under identical circumstances.

The Illinois Life Insurance Co. is another case where, after loans were made by the Reconstruction Finance Corporation, amounting to $1,125,000, for the benefit of the policyholders, a sum of $1,000,000 was diverted by a director, Ernest J. Stevens, of the Illinois Insurance Co., and used, it is alleged, for the benefit of the Stevens Hotel, of which he is president.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. FINLEY, for 10 days, on account of important business.

To Mr. WEAVER, at the request of Mr. KERR, until Monday, on account of important business.

COMMENCEMENT OF TERMS OF PRESIDENT AND VICE PRESIDENT AND MEMBERS OF CONGRESS, ETC.

The SPEAKER laid before the House a communication from Ed. C. Johnson, Governor of the State of Colorado, announcing the approval by the legislature of that State of the proposed amendment to the Constitution of the United States fixing the commencement of the terms of President and Vice President and Members of Congress, and fixing the time of the assembling of Congress.

SPEAKER PRO TEMPORE FOR EVENING SESSION

The SPEAKER appointed Mr. RAINEY to preside as Speaker pro tempore at the session to-night.

RECESS

Mr. RAINEY. Mr. Speaker, I move that the House stand in recess until 8 o'clock this evening.

The motion was agreed to; accordingly (at 5 o'clock and 15 minutes p. m.) the House stood in recess until 8 o'clock to-night.

EVENING SESSION

The recess having expired, the House was called to order at 8 o'clock p. m. by the Speaker pro tempore, Mr. RAINEY.

The SPEAKER pro tempore (Mr. RAINEY). The Clerk will call the first bill on the Private Calendar.

PETE JELOVAC

Mr. PITTENGER. Mr. Speaker, I ask unanimous consent to return to Calendar No. 548 (H. R. 1767) for the relief of Pete Jelovac. I wish to say in connection with that request that this bill, H. R. 1767, was considered last week, and at the request of the gentleman from Texas [Mr. BLANTON] it was passed over until I could look up and see if a former bill which granted partial relief to this man had provided that it was in full settlement and in full payment.

Mr. BLANTON. Mr. Speaker, I withdraw my objection.

Mr. PATTERSON. Mr. Speaker, reserving the right to object.

Mr. STAFFORD. Reserving the right to object, under the order of the House we are not privileged to consider bills prior to the bill that was last considered, and I am constrained to object. We may be able to take up for consideration bills that have been passed over later on.

Mr. BLANTON. Oh, it could be done by unanimous consent.

Mr. PITTENGER. If the gentleman will withhold his objection.

Mr. STAFFORD. We must make headway. We only passed 50 bills the other night. Mr. Speaker, I object.

WILLIAM CHINSKY

The Clerk called the first bill on the Private Calendar, H. R. 7200, for the relief of William Chinsky.

Mr. STAFFORD. Mr. Speaker, I am inclined to object to this bill, but I will allow the gentleman from Illinois [Mr. SABATH], an opportunity to explain it briefly, to see if he can remove my objection to the measure.

Mr. SABATH. This bill has been reported favorably several times, and unfortunately has always met with some misfortune.

This boy Chinsky was injured by an explosive that was left by the War Department while they were having some exercises in Grant Park in 1919. That boy has been very severely injured and is crippled for life. The charitable institutions in Chicago and the ladies' organizations have been very much interested in his family and in the boy, and have appealed to Congress.

Mr. BLANTON. Will the gentleman yield for an observation?

Mr. SABATH. Yes. I yield.

Mr. BLANTON. The committee has reduced this bill from $5,000 to $2,500, and I understand the gentleman from Illinois [Mr. SABATH] will protect the House in that action when the bill comes back from another body.

Mr. SABATH. I will.

Mr. STAFFORD. Mr. Speaker, what is the situation here? The municipality or some civic organization of the city of Chicago had a public exhibition at which they invited the Chemical Warfare Service to make a demonstration. That Chemical Warfare Service unfortunately left a grenade. There is no obligation upon the National Government. The Chemical Warfare Service was doing a service to the municipality or association for which this demonstration was held. Instead of the claimant going to the municipality or the association under which these exercises were held, he came to Uncle Sam to pay the bill.

Mr. PITTENGER. Will the gentleman yield?

Mr. STAFFORD. I yield.

Mr. PITTENGER. I submit the gentleman is in error in that statement. This demonstration was conducted by the War Department for very definite purposes. The municipality had nothing to do with it, except that that happened to be the particular place where it was held.

Mr. STAFFORD. The gentleman does not mean to say that this was a part of the service of the Chemical Warfare Division?

Mr. PITTENGER. The War Department was putting on these demonstrations all over the country for patriotic purposes, and one of them was staged in Washington, and the facts are as set forth in the report.

Mr. BACHMANN. Will the gentleman yield?

Mr. STAFFORD. I yield.

Mr. BACHMANN. The city of Chicago was putting on this demonstration.

Mr. PITTENGER. No, no.

Mr. BACHMANN. Just a minute. The report shows that the demonstration by the Chemical Warfare Service was given at Grant Park in conjunction with and as a part of the program of whom? Who was putting on the program? The Chicago Association of Commerce, fire and accident prevention day. The Government was invited to bring their exhibit over there and to participate in making that fair a success for the city of Chicago, and they were there at the invitation of the city of Chicago. Has the city of Chicago done anything with respect to this claim?

Mr. SABATH. No, no. They had nothing to do with that.

Mr. BLANTON. Will the gentleman yield?

Mr. STAFFORD. I yield.

Mr. BLANTON. Does the gentleman from Wisconsin, who is fair about everything, assert that, when the War Department puts on an exhibition, I do not care who causes it, if they negligently leave a hand grenade there that explodes when a boy picks it up, they ought not pay for it?

Mr. STAFFORD. That is not the fact, however. Somebody brought it there deliberately.

Mr. BLANTON. A boy will do the biggest fool things on earth sometimes.

Mr. STAFFORD. Oh, I remember my boyhood days, and I never did such things. Well, Mr. Speaker, we must make headway. I object.

Mr. BACHMANN. I suggest the gentleman withhold his objection and allow the gentleman from Minnesota [Mr. PITTENGER] who wrote the report, to make a statement.

Mr. STAFFORD. I will withhold the objection.

Mr. PITTENGER. The file is full of correspondence on the part of the War Department, indicating clearly that the War Department had complete control of this demonstration.

This boy was very severely injured. The Employees' Compensation Commission says that $2,500 is inadequate, and I am rather inclined to think the committee was a little economical in this case. We gave this very careful consideration and reached the conclusion the claim was just.

Mr. STAFFORD. The report says that during the investigation he appeared to be considerably excited and made statements he had been coached in by his parents prior to the interview. Mr. Speaker, I object.

LOUIS ZAGATA

The Clerk called the next bill, H. R. 7593, for the relief of Louis Zagata.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Louis Zagata the sum of $1,000, covering bond guaranteeing the departure from the United States of Stanislaw Babon, alien, who disappeared, causing forfeiture of the bond, and who was later apprehended and deported.

With the following committee amendment:

Provided, That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 per cent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

W. B. FORD

The Clerk called the next bill, H. R. 7687, for the relief of W. B. Ford.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated and in full settlement against the Government, the sum of $2,000 to W. B. Ford, injured in the performance of his duties while postmaster at Oskaloosa, Kans.

Mr. PITTENGER. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

At the end of the bill insert the following: "*Provided*, That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or

receive any sum of the amount appropriated in this act in excess of 10 per cent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

C. K. BOWEN, DECEASED

The Clerk called the next bill, H. R. 7142, a bill for the relief of the heirs of C. K. Bowen, deceased.

Mr. MOUSER. Mr. Speaker, I object.

S. F. STACHER

The Clerk called the next bill, S. 243, an act for the relief of S. F. Stacher.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the General Accounting Office is hereby authorized and directed to credit the accounts of S. F. Stacher, superintendent and special disbursing agent, Eastern Navajo Indian Agency, Crown Point, N. Mex., in the sum of $3,004.17, representing an expenditure of that sum in the appropriation for Indian school buildings over and above the $37,000 authorized for construction and equipment of a heating and power plant at Eastern Navajo School, fiscal year 1929.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ADDIE I. TRYON AND LORIN H. TRYON

The Clerk called the next bill, H. R. 3928, for the relief of Addie I. Tryon and Lorin H. Tryon.

Mr. BLANTON. Mr. Speaker, this bill, if passed, will cost the Government $23,149.63. That is too big an amount to pass by unanimous consent. I object.

Mr. FREE. Mr. Speaker, will the gentleman withhold his objection?

Mr. BLANTON. I will withhold it to permit the gentleman to make a statement, but I shall object.

Mr. FREE. The gentleman is incorrect in that this is not an appropriation, but simply an act authorizing the litigant to go into court and try out the claim.

Mr. BLANTON. A claim amounting to $23,149.63, which will cost the Government that sum of money if this bill is passed.

Mr. FREE. The War Industries Board by threat withheld from the gentleman, whose widow is now representing his estate, this money; and the upper courts of the United States have now held that under the ruling of the War Industries Board they withheld this money unlawfully, against the law, contrary to the Constitution of the United States.

These people are simply asking the right to go into court and try the case. They are not asking for an appropriation. They are simply asking for the right to go into court and try to get back the money that is now being held intact in the Treasury of the United States and being held there unlawfully.

Mr. BLANTON. Which they claim were wool profits paid to the Government in 1918.

Mr. FREE. Yes.

Mr. BLANTON. That is a good long time ago. It could have been settled many years ago. The gentleman from California has been an active Member of this House since 1918. He does not overlook the interests of his constituents, and if there had been so very much merit in this claim he surely would have gotten it through here years ago.

Now, there are lots of just such cases all over the country, some in the State I come from; and if we were to pass this bill, Congress would be deluged with them.

The statute of limitations has run against this claim. If we pass this bill, it opens up the statute and gives these people the right to go into court and eventually collect $23,149.63 from the Government. If we are going to do it for the relief of a claimant in California, we ought to do it for all of the other claimants in the rest of the United States.

Mr. MILLER. Mr. Speaker, I demand the regular order.

The SPEAKER pro tempore. The regular order is, Is there objection?

Mr. BLANTON. Mr. Speaker, I object.

EMMA R. H. TAGGART

The Clerk called the next bill, H. R. 10259, for the relief of Emma R. H. Taggart.

Mr. STAFFORD. Mr. Speaker, I object.

Mr. KLEBERG. Will the gentleman withhold his objection?

Mr. STAFFORD. I will reserve it for a few minutes. I may say to the gentleman that regardless of the merits of the proposition, it has been the uniform policy, so far as I am concerned, in respect to bills of this kind, in this Congress and in the last Congress, to decline to grant a year's honorarium to these widows.

Mr. KLEBERG. If the gentleman will yield a moment, I call his attention to the fact that this bill is merely following the well-established precedent of the Congress of the United States, going back to the act of July 28, 1892, when authorization was made by the Congress for the heirs of Alexander Clark, and coming down through more than 30 cases identical with the one we have before us.

Mr. STAFFORD. I will grant that prior to the passage of the so-called Rogers Retirement Act of 1924, applicable to all persons in the Foreign Service, we were rather generous, but when we passed that act and placed all of our civilian force in the Foreign Service on a well-established basis, with retirement pay, there have been only two such acts passed—one as a rider on an appropriation bill and another as a special act.

Mr. KLEBERG. But they were passed.

Mr. STAFFORD. It has not been the policy of Congress since the Rogers Retirement Act was passed, and therefore I object.

Mr. KLEBERG. I hope the gentleman will withhold his objection just a moment for an additional statement.

Mr. STAFFORD. I withhold it.

Mr. KLEBERG. The gentleman has just admitted that since the passage of the Rogers Act there have been two exceptions. I submit that whenever a man goes into the Foreign Service of his country and goes abroad, as this gentleman did, to Belize, British Honduras, he loses the benefit of the earnings of the average gentlemen in the employ of our Government and in reality is expatriated while in the Foreign Service.

Mr. STAFFORD. If the gentleman will permit, we were quite liberal in the Rogers Retirement Act with respect to salaries and no effort was made at that time to amend the act to provide for payment of a year's gratuity. We have on the statute books provisions for a six months' gratuity to those in the naval service when they die with dependents. Legislation of this sort should be brought in by the committee in a general bill. During the last Congress I was berated by my colleague in objecting to a bill of this character applicable to one of my own constituents, when that widow was the possessor of an estate of over $30,000.

Mr. KLEBERG. I hope the gentleman will not object. In this case no such affluence exists.

Mr. STAFFORD. Mr. Speaker, I object.

FLORENCE M. HUMPHRIES

The Clerk called the next bill, H. R. 10573, for the relief of Florence M. Humphries.

Mr. PATTERSON. Mr. Speaker, I reserve the right to object to give the gentleman from South Carolina [Mr. HARE] an opportunity to explain the bill. I want to know something about how long this is to run. Are these payments to be for life? I would judge from the bill they would probably have no end.

Mr. BACHMANN. If the bill were passed, the woman's heirs, as long as they lived, might recover this $30.

Mr. HARE. Mr. Speaker, I think I can answer the question briefly by saying that the object of this bill is to place

this widow on the same footing and the same basis as widows of chaplains of the Regular Army.

There is no question but what this man, Rev. R. W. Humphries, was an acting chaplain in the United States Army service. He served in France for several months.

Mr. BACHMANN. If the gentleman will yield right there, the gentleman said there is no question but what this man was an acting chaplain. The fact of the matter is that he was a Young Men's Christian Association secretary.

Mr. HARE. That was his official designation.

Mr. BACHMANN. Then we approach this matter as being the case of a secretary of the Y. M. C. A. over there during the war and not as a chaplain or acting chaplain.

Mr. HARE. Just wait a minute. I invite the gentleman's attention to the report and to the evidence. He was in fact under the Y. M. C. A. as a secretary, but he was assigned to the Three hundred and twentieth Machine Gun Battalion, and I take the testimony of Maj. Olin Shivers, who says, "While Reverend Humphries was with our organization he performed all the duties of a chaplain, for we had no other chaplain to our outfit."

I go just a little farther and take the statement of Lieut. Charles M. Hammond, who was also of this organization, and, speaking of Reverend Humphries, he says: "He was our only chaplain. He was conscientious in the performance of his duties. He conducted services, buried the dead, and exerted a distinctly moral influence over the boys."

There can be no question but what this man performed every duty of a chaplain and served throughout the war from July, 1918, until after the close of November, 1918, and continued to serve in this way until he became disabled as a result of a disability incurred while bringing off the field a captain of a New York regiment, from which injury he died; and, as I have said, there can be no question but what he was an acting chaplain.

It is true he was in the service as secretary of the Y. M. C. A., but this bill only provides that his widow shall be placed on the same basis as if he had received a commission.

Mr. PATTERSON. Mr. Speaker, I withdraw my reservation.

Mr. HARE. This chaplain had been examined and his application had been approved as a chaplain in the Army, but he had not received his commission. The officers of this battalion all felt that he was chaplain.

Mr. ALLGOOD. The report shows that Capt. Gilbert W. Rosenthal states—

As battalion surgeon, I was closely associated with Rev. Reuben W. Humphries from August, 1918, when he joined the battalion, to April, 1919, when he went on sick leave. During all this time he was acting chaplain for the Three hundred and twentieth had no regular chaplain. He has conducted services, buried the dead, and exerted a distinctly moral influence upon the boys. To my personal knowledge he was caught in a German barrage while administering to the wants of the men in the front line.

Mr. BACHMANN. Admitting that all that is true, there were many citizens of the United States who served as secretary in the Y. M. C. A. and rendered similar services at the time of the war, and many lost their lives there. If you want to establish a precedent, which you will do by passing this bill, you will bring all these citizens whose health was impaired, and this will be the basis for inducting into the service a principle that ought not to be established.

Those inducted into the service stand on a different basis. These persons who were not inducted into the service stand on a different basis; they were not under strict orders, they had more latitude and freedom than those who were inducted into the service.

Now, I direct attention to another report from the War Department, which says:

Despite the statement in the proposed bill that the Rev. Reuben W. Humphries served as chaplain for the Three hundred and twentieth Machine Gun Battalion, the fact remains that his official status was that of a Y. M. C. A. secretary attached to this unit, and that he was no way different from many other secretaries of the several welfare associations with the American Expeditionary Forces.

Mr. HARE. There is no question about these facts. He was acting chaplain, and the committee does not deny that. The War Department takes the position that there may have been other secretaries that lost their lives. There was no evidence to this effect brought before the committee. I have been on the committee eight years, and there has never been a time when a single case has been brought to our committee similar to this. There may have been some, but I do not know of them. If there are we will cross that bridge when we get to it.

This chaplain was unquestionably serving as a chaplain, although not commissioned. He performed his duty, and came to his death as the result of the service rendered, and I think his widow should be entitled to consideration.

Mr. BACHMANN. And as soon as this bill passes, every man connected with a service organization who suffered some disability will be coming to Congress asking to be remunerated on the same basis.

Mr. HARE. If they come, our committee will consider each case on its merit.

Mr. BACHMANN. As much as I hate to, I must object to this.

Mr. HARE. Let me say that we passed a bill some time ago, where a nurse was in a hospital but never commissioned as a nurse. She was assigned to the hospital service, took the influenza, and died. The House passed the bill putting her on the same footing as other nurses in the Army.

Mr. ALLGOOD. The report shows that this man reported at Columbia, S. C., on June 20, 1918, volunteered his service as chaplain in the United States Army. He was given a physical examination and favorably reported, but before being called or inducted into the service as a chaplain he went overseas as a Young Men's Christian Association secretary, expecting to receive his appointment as chaplain at any time.

He was there with his company, and before he could get his commission he went on.

Mr. BACHMANN. I understand all that.

Mr. ALLGOOD. The Government failed to issue its commission. That is the only failure in this instance.

The SPEAKER pro tempore. Is there objection?

Mr. BACHMANN. Mr. Speaker, I object.

MACK COPPER CO.

The next business on the Private Calendar was the bill (H. R. 7780) to confer jurisdiction upon the Court of Claims of the United States to hear, adjudicate, and render judgment upon the claim of Mack Copper Co. against the United States for damage to and cost of restoration of certain real property owned by Mack Copper Co. which was used and occupied by the United States for an Army cantonment or other military purposes.

The SPEAKER pro tempore. Is there objection?

Mr. BLANTON. Mr. Speaker, I shall be forced to object to this bill, but I want to make a statement in respect to it. In 1924 this company was permitted to go into the Court of Claims, and in 1927 a judgment was rendered whereby it received $150,000 from the Government at one time and then also collected from the Government the additional amount of $79,500, for alleged rentals, incidental to the same suit. It now comes in and claims, after having had its day in court and after collecting these amounts, that it could have sold these lands for $1,500,000, and that it was damaged in the amount of $1,200,000 because the land, it alleges, cost it only $300,000 in the beginning. That $1,200,000 would be a tremendous profit on a $300,000 investment. If this bill is passed, it will cost the Government of the United States a million dollars more on a case that has already been tried and determined and in which the Government has already paid $229,500. I object.

Mr. HARE. Mr. Chairman, will the gentleman withhold his objection? The gentleman does not want to misquote the facts?

Mr. BLANTON. I am quoting the facts directly from the record itself.

Mr. HARE. I would like to explain the facts.

Mr. BLANTON. Did they not collect $150,000 from the Government in 1927?

Mr. HARE. Yes.

Mr. BLANTON. And did they not collect an additional $79,500 from the Government in 1927?

Mr. HARE. Yes.

Mr. BLANTON. And are they not now claiming that the land cost them only $300,000, and that while the Government had it there was some topsoil or manure taken from it, and that they had a chance to sell it for $1,500,000, and that they were damaged $1,200,000 because they could not make the sale?

Mr. HARE. Now, I do not think so.

Mr. BLANTON. That is what the record shows, because I have gone beyond what the committee puts in this report, and I have looked into the entire record. If my friend will get that case and the report, he will find that is so. If you pass this bill, they can go to the Court of Claims and retry that case on the same evidence that was introduced from 1924 to 1927.

Mr. HARE. Will the gentleman allow me to have a word?

Mr. BLANTON. Is not that the fact?

Mr. HARE. Not wholly.

Mr. BLANTON. That is what the bill says, and I will read it from the bill myself:

To use and consider as evidence * * * the testimony and other evidence filed by Mack Copper Co. * * * wherein the court rendered judgment on June 6, 1927.

Mr. HARE. Let me make a statement, will you?

Mr. BLANTON. All right, but after that I am going to object.

Mr. PARKS. Mr. Speaker, I demand the regular order.

The SPEAKER pro tempore. Is there objection?

Mr. BLANTON. Mr. Speaker, I object.

LUCIUS K. OSTERHOUT

The next business on the Private Calendar was the bill (H. R. 9955) for the relief of Lucius K. Osterhout.

There being no objection, the Clerk read the bill as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Lucius K. Osterhout, who was a member of Company A, First Regiment Michigan Volunteer Cavalry, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a member of that organization on June 24, 1865: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

J. G. SEUPELT

The next business on the Private Calendar was the bill, S. 2982, for the relief of J. G. Seupelt.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. I object.

Mr. HILL of Washington. Mr. Speaker, will the gentleman reserve his objection?

Mr. STAFFORD. I reserve the right to object. Perhaps the gentleman may be able to remove my objection to this bill. As I read the report, this settler went on this land with his eyes wide open and paid the appraised price, and now wishes to be relieved of the price exacted at the time of entry.

Mr. HILL of Washington. He has not paid the price. This land is homesteaded on condition of paying the appraised value. It is surplus land in the Colville Indian Reservation. It is classified as grazing land, and the price is not paid in advance. It is paid so much each year, and each entry was made on land situated on an island. The land was unsurveyed at the time the homesteads generally were taken up on the Colville Reservation. A special act was passed authorizing the homesteading of this, after it was surveyed. It took some considerable time to survey it after the act was passed, and this man is simply asking that it be reexamined and reappraised in order that the value of the land may be redetermined.

Mr. BACHMANN. Mr. Speaker, I think the gentleman from Washington states the situation correctly. I think this bill ought to pass.

Mr. STAFFORD. Mr. Speaker, the gentleman from Washington has given me a different viewpoint as to the facts in the case. In reading the report I was under the impression that he had paid the appraised value.

Mr. HILL of Washington. No; it had not been paid.

Mr. STAFFORD. And had gone on the land and wanted a different condition to apply to him, knowing full well what the law was at the time he entered. I withdraw the reservation of objection.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the completion of the homestead entry of J. G. Seupelt on the Colville Indian Reservation authorized by the act approved April 14, 1923 (43 Stat. L. 1362), the Secretary of the Interior be, and he is hereby, authorized and directed to make a new appraisal of the value of the property therein referred to and accept settlement therefor on the basis of such new appraisal as the appraised price of the said property.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

WILEY POST AND HAROLD GATTY

The Clerk called the next bill (S. J. Res. 33), to authorize the President to award gold medals to Wiley Post and Harold Gatty in recognition of their achievement in making an airplane flight around the world in less than nine days.

Mr. STAFFORD. Mr. Speaker, I am under the impression that this bill was incorporated in a general law that was passed at the last session, and therefore I object. If I am in error, I will be glad to have some one correct me.

Mr. BACHMANN. Will the gentleman yield for a moment?

Mr. STAFFORD. I yield.

Mr. BACHMANN. I would like to ascertain from the chairman of the committee which had this bill whether that is the fact.

Mr. STAFFORD. I may say to the gentleman that this bill should have been referred to the Committee on Military Affairs. The Committee on Military Affairs reported out a bill awarding decorations of the flying cross to Wiley Post and Harold Gatty. As I recall, there were four persons named in that bill, which became law. It would be ridiculous for us now to pass another bill. If I am in error, then we can return to it at some other time.

Mr. BACHMANN. The reason I was making inquiry was that both the War Department and the Navy Department have given their approval to this bill. The bill has already passed the Senate. I think, in principle, it encourages aviation, something that this Government is very much interested in; and if there has been no general legislation to cover this, I would like to ask the gentleman to make his objection in the RECORD, so that we may be able to return to it by unanimous consent, if there has been no general legislation on the subject, and let it pass.

Mr. STAFFORD. My memory is sometimes faulty, but in this instance the matter was brought to the attention of the Committee on Military Affairs and we reported out a bill and it is now part of the law. Therefore I object, Mr. Speaker. There is no use reenacting the same provision twice.

JOHN I. LOWE

The Clerk called the next bill, H. R. 3626, for the relief of John I. Lowe.

Mr. MOUSER. Mr. Speaker, I object.

Mr. TARVER. Will the gentleman reserve his objection?

Mr. MOUSER. I will reserve it.

Mr. TARVER. Of course, I do not know what the basis of the gentleman's objection may be.

Mr. MOUSER. I can give the gentleman my reason for the objection, and I will be glad to hear his explanation.

This bill has received an unfavorable report from the War Department after investigation. I have gone over the reports very carefully. There is no evidence that the body of soldiers that went by this particular farm had anything to do with the fire. The circumstances at least are very remote.

Mr. TARVER. The gentleman does not read the record as I read it nor understand it as I understand it, if that is his conclusion. The evidence in this case shows without controversy that this organization of soldiers marched by this farmer's farm and they had a tractor stalled in front of the barn for several hours; that several of the soldiers from time to time were seen entering the barn; that two of them were seen entering the barn immediately prior to the fire; and that as soon as they had left the barn a fire broke out and consumed the barn with its contents.

Mr. MOUSER. How soon after?

Mr. TARVER. Within just a few minutes.

Mr. MOUSER. Several hours.

Mr. TARVER. Oh, no, no. The gentleman is mistaken. Let me read from one of the affidavits in the case.

Mr. MOUSER. Will the gentleman show me where anyone said it was within a few minutes?

Mr. TARVER. The affidavit of E. L. Green is in part as follows:

That affiant worked on said farm during said day, ceasing his work about sundown, and on the way to his home he met two United States soldiers on the premises of J. I. Lowe, at a well between where said barn was destroyed by fire and the home of affiant; that the soldiers were at said well about sundown; that affiant went immediately home, a distance of about one-fourth mile from said well; that in about 30 minutes after the affiant arrived at his home he heard some cries, and on going out in his yard saw the fire.

That is one of the affidavits.

Mr. MOUSER. Mr. Speaker, that does not place the soldier in the barn.

Mr. TARVER. Emily Griffin says:

That late in the afternoon of October 9, 1920, between sunset and dark, she saw two United States soldiers around the barn of the said J. I. Lowe, on said premises; that said soldiers were in and around the said barn for quite awhile; that said barn was on fire immediately; that affiant at the time was in plain view of said barn and can state definitely that the two men were dressed in United States uniform.

I can not understand how any case based on circumstantial evidence as this kind of case must necessarily be could be any stronger than this one as disclosed by the facts in this case.

Permit me to say also that the committee has reduced the amount of damages from $3,190.96, and the House is asked to appropriate only $1,595.48, one-half of the uncontroverted amount of the loss sustained by the farmer.

Mr. MOUSER. I may say to the gentleman that there is considerable doubt in the mind of a person reading this report.

If the gentleman will consent to $1,000, I will withdraw my objection. The War Department is unfavorable to this claim.

Mr. TARVER. I believe the full amount should be recovered, but in the circumstances I will accept the gentleman's suggestion.

Mr. MOUSER. I am doing the gentleman a favor.

Mr. TARVER. I will agree to the amendment under the circumstances.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and is hereby, authorized to pay, out of any money in the Treasury not already otherwise appropriated, $3,190.96 to John I. Lowe, in full settlement of all claims against the Government on account of the destruction by fire set by United States soldiers of Battery C, Eighty-third Field Artillery, of a barn and contents belonging to the said John I. Lowe, on October 9, 1920.

With the following committee amendment:

Line 5, strike out "$3,190.96" and insert in lieu thereof "$1,595.48."

Mr. MOUSER. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MOUSER to the committee amendment: In line 5, strike out "$1,595.48" and insert in lieu thereof "$1,000."

The amendment to the committee amendment was agreed to.

The committee amendment as amended was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time and passed; and a motion to reconsider was laid on the table.

ARNOLD R. KLINE

The Clerk called the next bill, H. R. 698, authorizing the President to transfer and appoint Lieut. (Junior Grade) Arnold R. Kline, United States Navy, to the grade of assistant paymaster with the rank of lieutenant (junior grade), in the Supply Corps, United States Navy.

There being no objection the Clerk read the bill, as follows:

Be it enacted, etc., That the President of the United States is hereby authorized to transfer and appoint Lieut. (Junior Grade) Arnold R. Kline, United States Navy, to the rank of lieutenant (junior grade) in the Supply Corps of the United States Navy without regard to his age.

The bill was ordered to be engrossed and read a third time, was read the third time and passed; and a motion to reconsider was laid on the table.

BURTON BOWEN

The Clerk called the next bill, H. R. 1709, for the relief of Burton Bowen.

Mr. EATON of Colorado. Mr. Speaker, I object.

Mr. MEAD. Mr. Speaker, will the gentleman withhold his objection to permit an explanation?

Mr. EATON of Colorado. I will withhold the objection.

Mr. MEAD. Mr. Speaker, this bill attempts to correct the discharge, which was not a dishonorable discharge to begin with but an ineptitude discharge. When this man enlisted in the service he was 15 years of age. Shortly after his enlistment he contracted a disease resulting from an infection, the infection resulting from vaccination.

Throughout his service he suffered from liver trouble, pleurisy, and kindred ailments.

Since his discharge from the service his health has been very bad. He was injured in a railroad accident some time ago and has but one arm. He is a good citizen. He is now 47 years of age and in very poor health, traceable to the infection he received in the service at a time when he was but 15 years of age.

He committed no serious offense, just a few mischievous pranks any child might commit. There was no serious objection made against this bill before the Naval Affairs Committee, as the members of the committee who are here will testify; and I hope the gentleman will withdraw his objection in view of the youth of this boy when he was in the service.

Mr. EATON of Colorado. Do I understand the gentleman to say that all these illnesses and the cause of his present trouble are traceable to the time he was in the service, notwithstanding the fact he received a discharge showing he was in good health?

Mr. MEAD. Absolutely; as a result of a very serious infection following his vaccination. This boy was in poor health throughout his service, and this man to-day is in poor health.

Mr. EATON of Colorado. I have examined this report very carefully. There seems to be no statement made of any special circumstance that would entitle this man to this special consideration the gentleman is trying to give him by giving him an honorable discharge. This is not a desertion discharge, however, but what is termed an "undesirable" discharge.

Mr. MEAD. Not at all; not at all.

Mr. EATON of Colorado. Inasmuch as no one else is objecting, I will withdraw my objection.

Mr. MEAD. He was guilty of a few minor offenses only.

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I assume the gentleman will have no objection to

striking out, in line 3, the words "compensation laws." That is not the customary language in bills of this character.

Mr. MEAD. Yes. This does not pertain to the World War, anyway.

Mr. STAFFORD. The gentleman has no objection to such an amendment?

Mr. MEAD. No; none whatever.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the compensation laws and laws conferring rights and privileges upon honorably discharged soldiers, sailors, marines, etc., their widows and dependent relatives, Burton Bowen shall hereafter be held and considered to have been honorably discharged from the United States Navy on March 26, 1903: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

With the following committee amendment:

In line 7, strike out the word "honorably" and insert after the word "discharged" the words "under honorable conditions."

The committee amendment was agreed to.

Mr. STAFFORD. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD: Line 3, after the word "the," strike out the balance of the line.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RAYMOND C. BOGART

The Clerk called the next bill, H. R. 1710, for the relief of Raymond C. Bogart.

Mr. BLANTON. Mr. Speaker, reserving the right to object, I want to call the attention of the gentleman from New York [Mr. MEAD] to the report of the Navy Department, which says that the records of the Navy Department show that Raymond C. Bogart was born on January 31, 1897, and that on February 21, 1916, he enlisted in the Navy for a period of four years. During this period of service he was twice tried and convicted by summary court-martial, in both instances of absence from station and duty after leave had expired. On April 17, 1917, Bogart was tried by general court-martial and convicted of desertion. It was just 11 days after we had entered the World War that he was again convicted for desertion. Then they say that he was sentenced to be confined for a period of 18 months and to be dishonorably discharged from the naval service. On April 21, 1917, however, the confinement and dishonorable discharge were remitted by the Navy Department on the condition that for the period of one year Bogart's conduct in the opinion of his commanding officer warranted his further retention in the service. On April 10, 1920, Bogar was again tried by general court-martial and convicted of "drunkenness on duty."

Mr. Speaker, the first two courts-martial were for trivial offenses, but the third was for desertion during war time, and after he had been put on probation, for a man to be drunk on duty, where his drunkenness on duty might cost the lives of several hundred of his fellow countrymen serving with him in the naval service, I do not think we ought to now reward him, and, therefore, I shall have to object.

Mr. LANKFORD of Virginia. If the gentleman will permit, I think if he will examine the report closely he will find that the conviction referred to was not during the probationary period but was after the year was up.

Mr. BLANTON. It was after the year, but it was after he had been put on probation and on good behavior.

Mr. LANKFORD of Virginia. That is true.

Mr. BLANTON. And after having been tried and convicted three times. He was then tried and convicted of being drunk on duty. This is a serious offense against a man either in the Naval Service or the Army Service, for it could mean the life or death of many people, and I shall object.

Mr. MEAD. Will the gentleman withhold his objection so that I may offer an explanation?

Mr. BLANTON. To be drunk on duty is quite serious.

Mr. LANKFORD of Virginia. There was some extenuating circumstances which I have no doubt the gentleman from New York [Mr. MEAD] will bring out.

Mr. BLANTON. I withhold my objection, if the gentleman from New York desires to be heard.

Mr. MEAD. Mr. Speaker, this young man enlisted in the Navy before the war, and it is true, as the gentleman from Texas, has stated, on two occasions he violated the rules. As to the extent of the violations, investigations will disclose the fact that the young man went out and took part in a little drinking party. He was put on his honor——

Mr. BLANTON. Before the gentleman gets to that, within 11 days after we entered the World War he was tried and convicted of desertion, not for being over leave or absent without leave but for desertion from the naval service.

Mr. MEAD. Which, under the circumstances, resulted in the same thing, and for that offense the sentence was remitted and he was ordered to duty, and from that time until the termination of the war—or from that time until two months after his term expired—he conducted himself in an honorable way; and when he was arrested the second and last time after an honorable service throughout the war it was 30 minutes after he concluded his parole duty at night that he and a man named Savage were arrested under the same circumstances in the same place. Both of them were ready to go north. They were tried by the same court-martial, defended by the same counsel, and Savage was acquitted and this man was adjudged guilty.

Mr. BLANTON. And the judges who acquitted Savage found evidence that warranted them in convicting this other man.

Mr. MEAD. There was no difference.

Mr. BLANTON. And it was the fourth conviction.

Mr. MEAD. No; this was the third conviction. The last one was two months after his four years were up and when the man was ready to come north and 30 minutes after his parole duty was finished at night he was arrested and the man caught with him was discharged while he was convicted. To-day this man is totally blind and is supported by charity. He is entirely without means of support.

Mr. BLANTON. Mr. Speaker, his being totally blind and supported by charity appeals to me and I withdraw my objection.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the compensation laws and laws conferring rights and pivileges upon honorably discharged soldiers, sailors, marines, their widows and dependent relatives, Raymond Charles Bogart shall hereafter be held and considered to have been honorably discharged from the United States Navy as seaman, second class, October 23, 1920.

With the following committee amendment:

Page 1, line 7, strike out the word "honorably" and after the word "discharged" insert the words "under honorable conditions," and in line 9, at the end of the bill, insert "*Provided*, That no bounty, back pay, pension, or allowance of any kind, shall be held to have accrued prior to the passage of this act."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

RUSSELL H. LINDSAY

The next bill on the Private Calendar was the bill (H. R. 2978) for the relief of Russell H. Lindsay.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. BLANTON. Mr. Speaker, I shall object to this bill, because the Naval Retiring Board after carefully considering the facts held that the man's disability was not the result of his service. They have strongly recommended against the passage of this bill. This bill if passed would cost the Government $1,125 a year for the remainder of his life.

Mr. WOODRUFF. Mr. Speaker, the retiring board that retired this man, and the officers, disagreed with the medical board. The facts of the case are these. This young officer

was sworn in as an officer in the regular Navy in April, 1918. The medical report of the examination given this young officer at the time indicates that each member of the medical board examining the young man found him free from disabilities of any kind.

Two months later he became ill and was sent to a hospital and his disease was of so light a character—tuberculosis—that each of these officers of the Navy did not discover it. He was transferred to the Naval Hospital ship and transferred from this ship to the Naval Hospital at Norfolk, Va.

Mr. BLANTON. Will the gentleman allow me?

Mr. WOODRUFF. Yes.

Mr. BLANTON. What has the gentleman to say about this language in the report?

The Naval Retiring Board above referred to found that the disability of Russell H. Lindsay was not incurred in the line of duty. In view of the foregoing the Navy Department recommends against the enactment of the bill H. R. 2978.

The Navy Department is sympathetic with every single officer of the Navy. If there is any way on God's earth that they can get around a technicality of the law they will do it.

Mr. WOODRUFF. The gentleman is mistaken about that. The report says:

The department has been consistently opposed to the enactment of legislation for the benefit of an individual and not of general application to all similar cases, except where the attendant circumstances show the case to be an exceptionally meritorious one. There is nothing of record in this department to place this case in the category of the exceptionally meritorious. It is therefore recommended that the bill be not enacted.

But, Mr. Speaker, this particular case was referred to the Attorney General on two different occasions, and here is what he says:

The Attorney General, in his opinion of August 21, 1919, which was in force and binding upon the naval service at the time this case was under consideration by the retiring board in the Navy Department, held that a soldier is to be deemed as having been in sound condition when accepted in the service; and, further, that when it is shown that he had a disease during this term of service that such disease must be deemed to have been contracted while he was in the service and in the line of duty, unless it is shown to be due to his own willful misconduct or to some act or course of conduct of his disconnected with his military duty.

Mr. BLANTON. I want to ask the gentleman one question.

Mr. WOODRUFF. Very well.

Mr. BLANTON. What on earth has the Attorney General to do with the case?

Mr. WOODRUFF. He has something to do with the interpretation of the law.

Mr. BLANTON. The Navy has its own Judge Advocate General.

Mr. WOODRUFF. The Attorney General is the highest legal authority outside the Supreme Court.

Mr. BLANTON. Mr. Speaker, will the gentleman yield?

Mr. WOODRUFF. Yes.

Mr. BLANTON. If we establish that opinion as a policy of the Government, it would cause the Veterans' Bureau to-morrow to pay 100,000 veterans compensation for service-connected disability that are now refused, because the administration does not follow any such opinion as that.

Mr. WOODRUFF. We have adopted legislation in Congress in the past that any man accepted for service in the Army during the World War or Navy, where no notation of disability has been placed on the record at the time of enlistment, is presumed to be free of disability on entering the service.

Mr. BLANTON. I have a constituent to-day who was noted to have been in the hospital on 7 different days in October, and 4 or 5 days in November, 1917. He was in sound health when he went in, and has had a serious affliction ever since he came out; and yet the Veterans' Bureau holds it is not of service connection. That opinion of the Attorney General is not in force in the Veterans' Administration.

Mr. WOODRUFF. Will the gentleman accept the decision of the court?

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. WOODRUFF. Yes.

Mr. STAFFORD. The report of the Acting Secretary of the Navy is that this man, within 12 days of his being inducted into the service, was sent to the sick bay and there was found to have tuberculosis.

Mr. WOODRUFF. He was found to have tuberculosis two and a half months thereafter.

Mr. STAFFORD. Oh, I beg the gentleman's pardon. Twelve days after he first reported for duty he was admitted to the sick bay on board the vessel complaining of sickness, and two days after that the diagnosis was made, on the 19th, when he was determined to have tuberculosis. Does the gentleman mean to say that a man who was sick at the time he entered the service, and in 12 days is found to have tuberculosis, should be sustained by the Government for all time afterward?

Mr. BLANTON. Mr. Speaker, I object.

Mr. WOODRUFF. Will the gentleman withhold that objection?

Mr. BLANTON. I will withhold it, but eventually I shall object.

Mr. WOODRUFF. This man was appointed an ensign on May 31, 1918.

Mr. STAFFORD. The letter of the Acting Secretary specifically says that he reported for active duty on board the U. S. S. *Maine* on July 26.

Mr. PARKS. Mr. Speaker, I demand the regular order.

The SPEAKER pro tempore. The regular order is, Is there objection?

Mr. BLANTON. I object.

WILLIAM BARTLEY

The next business on the Private Calendar was the bill (H. R. 3539) for the relief of William Bartley.

The SPEAKER pro tempore. Is there objection?

Mr. EATON of Colorado. Mr. Speaker, I object.

Mr. GRISWOLD. Mr. Speaker, I object.

JOHN O'NEIL

The next business on the Private Calendar was the bill (H. R. 5989) for the relief of John O'Neil.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers John O'Neil, late of United States Naval Reserve Force, shall hereafter be held and considered to have been honorably discharged from the naval service of the United States on the 10th day of October, 1918: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

With the following committee amendments:

Line 6, strike out the word "honorably," and in line 7, after the word "discharged," insert the words "under honorable conditions."

The committee amendments were agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

JOHN M'KENNA

The next business on the Private Calendar was the bill (H. R. 7553) for the relief of John McKenna.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. Mr. Speaker, I object.

LIEUT. MORRIS SMELLOW

The next business on the Private Calendar was the bill (H. R. 8180) authorizing the President to transfer and appoint Lieut. Morris Smellow, United States Navy, to the grade of passed assistant paymaster, with the rank of lieutenant, in the Supply Corps of the United States Navy.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. Mr. Speaker, I reserve the right to object. I have no objection to the bill if they will leave it to the department to determine what position he will take. I

do not believe it is good practice for the Congress to fix the rank at which an officer shall be placed.

Mr. HESS. This man receives the same rank in the Supply Corps that he had in the line of the Navy.

Mr. STAFFORD. I think it should be left to the department to say where he will be placed.

Mr. HESS. That discretion is in the department anyway. I have no objection to an amendment to remedy that.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The SPEAKER pro tempore. A similar Senate bill is on the Speaker's table.

Mr. HESS. Mr. Speaker, I ask unanimous consent that the Senate bill be substituted for the House bill.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the Senate bill.

The Clerk read the Senate bill, as follows:

Be it enacted, etc., That the President of the United States is hereby authorized to transfer and appoint Lieut. Morris Smellow, United States Navy, to the grade of passed assistant paymaster, with the rank of lieutenant, in the Supply Corps of the United States Navy, to rank next after Lieut. Edmund T. Stewart, jr., Supply Corps, and with Lieut. Charles H. Momm, of the line, as a running mate.

Mr. STAFFORD. Mr. Speaker, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD: Line 7, after the word "Navy," strike out the remainder of the bill.

The amendment was agreed to, and the bill as amended was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

A similar House bill was laid on the table.

WILLIAM E. B. GRANT

The Clerk called the next bill, H. R. 9166, for the relief of William E. B. Grant.

Mr. BACHMANN. Reserving the right to object, is the gentleman from Maryland interested in this bill?

Mr. COLE of Maryland. I am; yes, sir.

Mr. BACHMANN. I am not clear as to the purpose of this bill or the reason for submitting the matter to the Comptroller General; and then, in addition to that, the bill provides for an appropriation for an amount that is undetermined.

Mr. COLE of Maryland. The amount suggested is in keeping with what we think the Comptroller General will finally award, and a similar claim has been approved by the Court of Claims, almost identical with this, establishing a precedent, but solely because of the statute of limitations, this claim is barred. It is only an authorization, as the gentleman will find. There is a committee amendment authorizing the amount.

Mr. BACHMANN. I direct the gentleman's attention to the way the bill is prepared. This bill authorizes the Comptroller General to examine and settle this claim.

Mr. COLE of Maryland. Yes.

Mr. BACHMANN. In line 6 it refers to the Secretary of War, and I think it means the Secretary of the Navy, because the War Department has nothing to do with it. The claim had its foundation in the Navy Department.

Mr. COLE of Maryland. That is true. The Secretary of the Navy recommends the passage of the bill.

Mr. BACHMANN. Section 2 asks for an appropriation of $16,000, and the gentleman himself does not know, and no Member of the House knows, what is actually involved or what the amount of the claim is.

Mr. COLE of Maryland. We can not tell until it is determined.

Mr. BLANTON. The gentleman can make a point of order against the last provision and let it be stricken by agreement. Then probably it will not be objectionable.

Mr. BACHMANN. I was going to suggest this. The bill authorizes the Comptroller General to examine and settle. I have no objection to the bill if it can be amended——

Mr. BLANTON. I think my friend can safely trust Comptroller General J. R. McCarl.

Mr. BACHMANN. But there is no amount determined, and the bill would require a settlement.

Mr. BLANTON. I would rather leave it to General McCarl than for us to fix an exact amount.

Mr. BACHMANN. If the gentleman will agree to an amendment striking out section 2 and let this claim go to the Comptroller General for him to examine but not to settle, and another amendment changing "the Secretary of War" to read "the Secretary of the Navy" I will have no objection.

Mr. COLE of Maryland. That is agreeable. The reason behind the bill is that the Court of Claims has already passed upon the merits of an identical case.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read as follows:

Be it enacted, etc., That the Comptroller General of the United States is authorized and directed to examine and settle, on the basis of facts and figures to be found and reported to him by the Secretary of War, the claim of William E. B. Grant, warrant machinist, United States Navy, retired, for the amount withheld from him under section 4 of the act entitled "An act to provide for the opening, maintenance, protection, and operation of the Panama Canal, and the sanitation and government of the Canal Zone," approved August 24, 1912, as amended, from April 7, 1909, to May 3, 1917, and from November 29, 1919, to February 28, 1922, the periods during which he was employed by the Isthmian Canal Commission or the Panama Canal.

SEC. 2. There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, a sufficient amount, not to exceed $16,000, to enable the Secretary of the Treasury to pay the claim of the said William E. B. Grant as and when settled by the Comptroller General.

With the following committee amendment:

On page 2, line 6, after the word "hereby," insert the words "authorized to be."

The committee amendment was agreed to.

Mr. BACHMANN. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BACHMANN: On page 1, line 4, after the word "examine," strike out the words "and settle."

The amendment was agreed to.

Mr. BACHMANN. I offer a further amendment, Mr. Speaker.

The Clerk read as follows:

Amendment by Mr. BACHMANN: Page 1, line 6, strike out the word "War," and insert in lieu thereof the words "the Navy."

The amendment was agreed to.

Mr. BACHMANN. I offer a further amendment, Mr. Speaker.

The Clerk read as follows:

Amendment offered by Mr. BACHMANN: Page 2, lines 6 to 10, strike out section 2.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

LIEUT. MORRIS SMELLOW

Mr. STAFFORD. Mr. Speaker, I ask unanimous consent to vacate the proceedings by which the bill S. 4381, just considered in the House, was considered, back to the amending stage. I believe I made a mistake in offering the amendment. I ask unanimous consent to return to that bill and to vacate the proceedings down to the amending stage.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. STAFFORD. Mr. Speaker, I ask unanimous consent to withdraw the amendment which I offered, striking out the last three lines after the word "Navy." I have been advised by members of the Naval Affairs Committee that

that would destroy the purpose of the bill or interfere with its administration, and I believe the Senate bill should be passed as is.

The SPEAKER pro tempore. Without objection, the amendment will be withdrawn.

There was no objection.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

A similar House bill was laid on the table.

JOHN HUNTZ ROLOFF

The Clerk called the next bill, H. R. 9272, to correct the rating of John Huntz Roloff, Fleet Naval Reserve.

There being no objection, the Clerk read as follows:

Be it enacted, etc., That John Huntz Roloff, chief machinist's mate, acting appointment, Fleet Naval Reserve, shall be deemed to hold the rating of chief machinist's mate, permanent appointment, Fleet Naval Reserve, from date of the approval of this act, because John Huntz Roloff was found qualified for the rating of chief machinist's mate, permanent appointment, on July 22, 1922, and recommendation for the promotion was forwarded to the Navy Department, where the papers concerning the advancement were filed and no action taken, and said Roloff was transferred to the Fleet Naval Reserve from the active list on September 20, 1922, without having received the promotion for which he had been found qualified and had been recommended: *Provided*, That no bounty, back pay, or allowance shall be held to have accrued prior to the passage of this act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

OLEN H. PARKER

The Clerk called the next bill, H. R. 9473, for the relief of Olen H. Parker.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. EATON of Colorado. Reserving the right to object, and I shall not object to the bill, but there are two errors in it which should be corrected. In line 3 "compensation laws and" should be stricken from the bill, and in line 9 the date when the bill becomes effective should be inserted. I will offer those amendments when the bill is read.

Mr. STAFFORD. Well, reserving the right to object, Mr. Speaker, with reference to the first suggestion of the gentleman from Colorado [Mr. EATON], I wish to call to his attention that this bill relates to a World War veteran. When I raised the question a while ago to eliminate the word "compensation," that referred to Spanish-American War veterans' where it had no application. However, in this case, the compensation laws do apply to World War veterans. This man suffered an injury in the service. True, he deserted on May 10, 1919, but that was after actual hostilities had ended. We have never passed a bill where we have recognized desertion during hostilities, but this is a case where a man had a valuable service during the World War and deserted a long time after hostilities ended and then reenlisted.

Now, if there are mitigating circumstances that will wipe away this desertion I suppose he should be entitled to the compensation laws.

Mr. EATON of Colorado. No bounty, back pay, pension, or allowance of any kind being permissible prior to the passage of this act, he could have no benefit of compensation, but only the pension act. My amendment was to strike out the words "full compensation," and insert the word "pension" in place of it.

Mr. MEAD. There are no pension laws now that apply to World War veterans——

Mr. STAFFORD. Yes; there are.

Mr. MEAD. For nonservice disability.

Mr. STAFFORD. There are pension laws applicable to World War veterans.

Mr. EATON of Colorado. I will not press the point except as to the date the bill becomes effective.

Mr. MEAD. That is agreeable.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in the administration of the compensation laws and laws conferring rights and privileges upon honorably discharged soldiers, sailors, marines, etc., their widows and dependent relatives, Olen H. Parker, shall hereafter be held and considered to have been honorably discharged from the United States Marine Corps.

With the following committee amendments:

Page 1, line 7, strike out the word "honorably," and after the word "discharged" insert "under honorable conditions."

And at the end of the bill insert "*Provided*, That no bounty, back pay, pension, or allowance of any kind shall be held to have accrued prior to the passage of this act."

Mr. STAFFORD. Mr. Speaker, we do not recognize the policy of ever granting a privilege prior to the enactment of a relief measure. I do not want this bill to act as a precedent. I do not want to do any injustice to this soldier. The thought occurs to me whether we should not incorporate in the waiver clause the question of compensation, that no bounty, back pay, compensation, or pension shall be held to have accrued prior to the passage of this act. Really, "allowance" is broad enough to cover the word "compensation." I wish the gentleman would consent to have the word "compensation" inserted there after the word "pension."

Mr. MEAD. I will accept the amendment.

Mr. STAFFORD. Mr. Speaker, I offer the following amendment to the committee amendment.

The Clerk read as follows:

Amendment offered by Mr. STAFFORD to the committee amendment: On page 1, line 9, after the word "pension," insert the word "compensation."

The amendment to the committee amendment was agreed to.

The committee amendment as amended was agreed to.

Mr. EATON of Colorado. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. EATON of Colorado: After the word "Corps," in line 9, insert "on May 10, 1919."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider laid on the table.

EUGENE B. ELY

The Clerk called the next bill, S. 433, to authorize the posthumous award of a distinguished-flying cross to Eugene B. Ely.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the President is authorized to award, but not in the name of Congress, a distinguished-flying cross, posthumously, to Eugene B. Ely for extraordinary achievement as a pioneer civilian aviator and for his significant contribution to the development of aviation in the United States Navy. The President may present such flying cross to Nathan Dana Ely, colonel, United States Army, retired, father of the said Eugene B. Ely.

The bill was ordered to be read a third time, was read the third time and passed, and a motion to reconsider laid on the table.

DENTAL CORPS, UNITED STATES NAVY

The Clerk called the next bill, S. 462, for the relief of certain officers of the Dental Corps of the United States Navy.

Mr. BLANTON. Mr. Speaker, I object.

Mr. DARROW. Mr. Speaker, will the gentleman withhold his objection?

Mr. BLANTON. I will withhold the objection to allow the gentleman to make a statement, but I wish to call the gentleman's attention to what the Navy Department says:

The enactment of the bill would result in the two officers affected becoming eligible for further promotion as of a date approximately two years earlier than would be the case if they retain their present order of precedence. If so promoted, the increased cost to the Government some years hence would equal the total sum of approximately $3,600.

In view of the economical situation that exists at this time, the Navy Department recommends against the enactment of the bill.

That is signed by C. F. Adams, Secretary of the Navy.

Mr. DARROW. I realize they say that in that report, Mr. Speaker, but that is only problematical. That would not occur unless we arrive at the period where there will be a further advancement.

Mr. BLANTON. But it could occur.

Mr. DARROW. It will be seven years before it could occur.

Mr. BLANTON. But ultimately it will occur.

Mr. DARROW. When this bill was up before, in the Seventy-first Congress, the Secretary of the Navy at that time approved the bill. At that time it would have cost more because it would have meant their advancement.

Mr. BLANTON. This Secretary of the Navy did not approve it.

Mr. DARROW. Yes; this Secretary of the Navy approved it.

Mr. BLANTON. Why did he change his mind?

Mr. DARROW. Because of the economical situation.

Mr. BLANTON. Now, I want to ask the gentleman from Pennsylvania if he does not think that the economical situation right now existing throughout the world is the most important question of all to the people of this country?

Mr. DARROW. I do.

Mr. BLANTON. And if we do not reduce Government expenses, what is going to happen?

Mr. RAMSPECK. If the gentleman will permit, the total cost is only $3,600, not $3,600 per annum.

Mr. BLANTON. But it is $3,600.

Mr. DARROW. If the gentleman will permit, it will only amount to that provided these officers could at some future date be advanced as the result of this.

Mr. BLANTON. I am rejoiced over the fact that the Secretary of the Navy, although a Cabinet officer, seemingly is concerned about saving for the Government of the United States the sum of $3,600. They have not been doing it heretofore, but it is time they were doing it.

Mr. DARROW. Will the gentleman allow me to explain the justice of this situation a moment?

Mr. BLANTON. Certainly.

Mr. DARROW. After the World War these two officers served in the Navy. There was an examination held and there were eleven who passed it. One of these officers passed the examination No. 2 on the list, and the other one No. 6. Immediately following this they were detailed to service outside of the United States, in Santo Domingo.

Mr. BLANTON. Did they serve in the World War?

Mr. DARROW. Yes; they served during the World War.

Mr. BLANTON. The Secretary of the Navy says "they did not enter the regular Navy by virtue of said examination, but later they did enter the regular Navy under the provisions of the act of June 4, 1920," which was long after the World War.

Mr. DARROW. The men served in the regular Navy during the World War. One of these officers was an emergency officer and the other was a temporary officer with the rank of junior lieutenant during the World War and served in France.

Mr. GRISWOLD. Will the gentleman yield?

Mr. DARROW. I yield.

Mr. GRISWOLD. Is it not true that these two officers at the time they took this examination—one was holding temporary rank as a full lieutenant in the reserves and the other was holding temporary rank in the regular Navy as a full lieutenant?

Mr. DARROW. No; one was a reserve officer with a reserve officer's rank and the other had the temporary rank of lieutenant, and both of them served through the war.

Mr. BLANTON. Mr. Speaker, it is a difficult task to outtalk all of these gentlemen.

Mr. GRISWOLD. Mr. Speaker, I reserve the right to object.

Mr. DARROW. Mr. Speaker, may I say further that after they took this examination, in which one of them passed No. 2 and the other No. 6, they were ordered to Santo Domingo, and before they went they had a letter from the Surgeon General of the Navy advising them not to accept, as the others did later on, due to a ruling of the legal department, but to wait the passage of the bill that was pending in Congress known as the omnibus bill. Following this instruction or advice, while out of the country in the service, they did not have the information that the other officers who passed the same examination had, and therefore when they found out what the situation was they were lower in rank than before.

This bill does not interfere with any of the others and does not cost the Government any more money, unless at some future time they should be advanced.

Mr. BOLAND. Will the gentleman yield?

Mr. DARROW. Yes.

Mr. BOLAND. I happen to know one of these officers, and is it not the fact that they are only trying to get the same status as their other classmates?

Mr. DARROW. Exactly; and what they were entitled to and what they would have received if they had been in this country and had had the same information as the others.

Mr. GRISWOLD. Briefly, are not these the facts? These two officers were holding rank, one in the reserves and one in the Navy, of full lieutenant?

Mr. DARROW. Yes.

Mr. GRISWOLD. They took this examination and passed?

Mr. DARROW. Yes.

Mr. GRISWOLD. And the Navy Department tendered them commissions as lieutenants, junior grade—are not these the facts?

Mr. DARROW. The examination was for lieutenants, junior grade, but they were told——

Mr. GRISWOLD. And they were tendered such commissions, which they declined.

Mr. DARROW. No.

Mr. GRISWOLD. That is the statement in the report.

Mr. DARROW. No.

Mr. BOLAND. They were not here at the time.

Mr. DARROW. I do not think the gentleman will find that statement in the report.

Mr. BOLAND. They were in San Domingo at the time.

Mr. DARROW. Yes; they were out of the country.

Mr. GRISWOLD. The Secretary of the Navy states, "They declined to accept such appointment."

Mr. STAFFORD. I was also impressed with that statement.

Mr. GRISWOLD. The situation with respect to these officers is that they would have reduced themselves in rank by accepting the commissions as a result of this examination. They wanted to keep the higher rank with the emoluments of such rank. They wanted to eat their pie and have it, too.

Mr. DARROW. No; that is not correct. They were in San Domingo at the time and none of these officers received this information until the 31st of the following December.

Mr. GRISWOLD. The Secretary of the Navy, in his report, says they were tendered the commission and declined it.

Mr. DARROW. They were out of the country. It is true they did not accept the commission, but if they had been here and had had the information that the others received, they would have accepted the commission and gone along in their regular order with the others; but being out of the country, they had no opportunity to know the circumstances that developed or to know about this ruling of the department. When they came back to this country, then they went along, but they had lost these numbers in comparison with their running mates in the line.

Mr. GRISWOLD. I can not see any authority for us to take except the statement in the report as to whether or not they were tendered this commission and, therefore, I feel that I must object.

Mr. DARROW. This bill has passed the Senate. It has been heard in committee several times, and I hope the gentleman will not object.

Mr. GRISWOLD. Mr. Speaker, I object.

WILLIAM C. RIVES

The Clerk called the next bill, S. 2058, for the relief of William C. Rives.

There being no objection, the Clerk read the bill as follows:

Be it enacted, etc., That in the administration of the pension laws or any laws conferring rights, privileges, or benefits upon persons honorably discharged from the United States Navy William C. Rives, late of the United States Navy, shall be held and considered to have served honorably 90 days during the war with Spain: *Provided*, That no pension, pay, or bounty shall be held to have accrued by reason of this act prior to its passage.

The bill was ordered to be read a third time, was read the third time, and passed; and a motion to reconsider was laid on the table.

HENRY CLAY DREXLER AND GEORGE ROBERT CHOLISTER

The next bill on the Private Calendar was the bill, S. 2200, to authorize the presentation of a medal of honor posthumously to the late Henry Clay Drexler and the late George Robert Cholister.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. Reserving the right to object, if the gentleman who has the bill in charge will accept the following amendment—strike out "in the name of Congress," I will not object. I do not think the act is of a character to entitle the person to a congressional medal of honor.

The Clerk read the bill as follows:

Be it enacted, etc., That the President is authorized to present, in the name of Congress, a medal of honor, posthumously, to the late Henry Clay Drexler, former ensign, United States Navy, and the late George Robert Cholister, boatswain's mate, first class, United States Navy, for their heroic action in endeavoring to submerge a charge of powder in an immersion tank on the occasion of a fire in the forward turret of the United States steamship *Trenton*, wherein they met their death in a supreme effort to save their shipmates.

Mr. STAFFORD. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

In line 3, after the word "present," strike out the words "in the name of Congress."

The amendment was agreed to.

Mr. STAFFORD. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

At the end of the bill strike out the period, insert a comma, and add the following: "said medals of honor may be presented to the next of kin of said deceased, respectively, living at the date of the enactment of this act."

The amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

CHARLES W. SUMNER

The next bill on the Private Calendar was the bill, H. R. 913, for the relief of Charles W. Sumner.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection?

Mr. BACHMANN. Reserving the right to object, I do not see any report from the department with respect to this bill.

Mr. BLACK. There has been a supplemental report. The committee has reformed considerably since the last night.

Mr. BACHMANN. That is the reason I am bringing this up. I have a copy of all the supplemental reports, but I have not had time to go over them. I congratulate the chairman of the Committee on Claims for taking so much interest in it.

Mr. STAFFORD. I congratulate the gentleman on his progressive legislative ability.

Mr. BACHMANN. I would like to ask the gentleman who introduced the bill a question. There is no statement here as to the injury suffered by this man. The bill provides for the payment of $750 for injuries sustained. I understand that the driver of the Army truck was responsible, but there is nothing to show the extent of the injury. How does the gentleman arrive at the sum of $750?

Mr. PURNELL. I do not know whether the gentleman has a statement of facts in this case or not. But at the last session of Congress I introduced a special bill for George McPherson's wife, who was killed in the same accident. The House appropriated $5,000 and the Senate bill provided for $3,000, and we compromised on $4,000. Mr. Sumner was in the same accident, suffered severe injury. He has been entirely incapacitated, and I do not know but that he is dead.

Mr. BACHMANN. If he is dead, we do not want to appropriate money for a dead man.

Mr. PURNELL. I say to the gentleman I am not sure; I have no knowledge of it myself.

Mr. BACHMANN. Is the gentleman from Indiana satisfied that the injuries that this man sustained were serious enough to warrant Congress in appropriating $750?

Mr. PURNELL. I would say on my oath as a Member of this body, having seen the gentleman, that from the day of his injury and up to the present time, if he is still living, he has been entirely incapacitated.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. BACHMANN. Yes.

Mr. STAFFORD. In view of the statement made by the distinguished gentleman from Indiana [Mr. PURNELL], it causes me to look with great suspicion on any reports that the War Department makes. The Secretary of War, in the supplementary report, says that the officer who was delegated to make an investigation of this case within 10 days of the time it occurred, found both the above-named men, George W. McPherson and C. W. Sumner, were attending to their business and showed no signs of injury or disability they might have received from the accident.

Mr. PURNELL. All I have to say is that that is not a correct statement. I was in this man's home.

Mr. STAFFORD. I accept the gentleman's statement and withdraw my objection.

Mr. PURNELL. I would not have the man's injury for five times the amount involved in this bill. The accident was serious enough to cause the death of the driver of the car, who died within an hour and a half after the injury.

Mr. BACHMANN. Will the gentleman say that he will ascertain, if the House acts on the bill, whether or not the claimant is still living, and take what action is necessary to prevent the bill passing through another body?

Mr. PURNELL. What is the status of the bill in the event that the man has since died?

Mr. BACHMANN. The bill will have to pass the House and then pass the Senate. The gentleman will have plenty of time in the meantime to find out before it is acted on in the Senate.

Mr. BLANTON. This is what would happen: It will be paid to the man's estate.

Mr. BACHMANN. Not unless it passes the Senate.

Mr. BLANTON. If it passes both Houses, and is signed by the President, and the man has heretofore died, it will be paid to his estate.

Mr. STAFFORD. Mr. Speaker, I must take exception to that statement. If we pass legislation authorizing payment of money to a person not in existence, that does not authorize the Secretary of the Treasury to pay it to the next of kin or the heirs or some one else.

Mr. BLANTON. Under Veterans' Administration bills passed here we are paying millions of dollars every day to the estates of men who died during the war.

Mr. BACHMANN. Yes; but the bill is drawn payable to the estate. Here we are appropriating money to somebody not in existence at all.

Mr. BLANTON. I mean under the general administration bill we are paying to the estates of men who died during the war.

Mr. PURNELL. Mr. Speaker, if the House sees fit to pass this bill, and in the meantime I learn that this man has since died, I shall notify the Senators from my State and have it remedied in the Senate.

Mr. BACHMANN. That being the situation, I have no objection.

The SPEAKER pro tempore. Is there objection?

There was no objection, and the Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, and in full settlement against the Government, the sum of $750 to Charles W. Sumner, of Noblesville, Hamilton County, Ind., on account of personal injuries sustained by him in a collision with an Army truck at Fortville, Ind., on July 10, 1927.

With the following committee amendment:

Page 1, line 9, after the figures "1927," insert a colon and the following: "*Provided*, That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 per cent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The amendment was agreed to and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

MAJ. L. D. WORSHAM

The next business on the Private Calendar was the bill H. R. 3905, for the relief of Maj. L. D. Worsham.

The SPEAKER pro tempore. Is there objection?

Mr. MOUSER. Mr. Speaker, my inclination is to object to this bill.

Mr. BLANTON. I am going to object, because the committee report does not embrace any report from the War Department, and there ought to be a report.

Mr. MOUSER. Oh, there is a supplementary report.

Mr. DRIVER. I have the report.

Mr. BLANTON. From what department?

Mr. DRIVER. From the War Department.

Mr. BLANTON. It is not in the committee report.

Mr. MOUSER. There is a report here that has just been handed to me, signed by Mr. McCarl, Comptroller, which is adverse to the claim.

Mr. DRIVER. Yes; and the War Department reports favorably.

Mr. BLANTON. Mr. Speaker, an Army officer who has a pay roll in his charge, and who sends to the bank and gets the money to pay off the men ought to see to it that the money is carefully guarded. This man drew a check on a bank for $47,500 and he ought to have known whom he was sending to the bank for the money.

Mr. DRIVER. He did.

Mr. BLANTON. When they got back there was $1,500 missing.

Mr. DRIVER. That is it exactly, and this man performed his duty just as every man connected with the disbursing organization of the three agencies of the department at that particular place.

Mr. BLANTON. All he did was ask that they be put under bond, but they were not put under bond.

Mr. DRIVER. Let me make an explanation. I do not want the gentleman to do an injustice to this man. Major Worsham was an administrative officer in the engineering organization located at Memphis. There were three divisions operating in line of disbursing funds. First, the Memphis dredging district; second, the rivers and harbors district; and, third, the first and second Mississippi River commission district. Each of those districts had its separate disbursing officer, all drawing the money for the pay rolls, just as it was done in this instance, but those three divisions were merged, and this administrative officer was drawn from his work to take charge of the combined activities on the 1st day of September.

Mr. BLANTON. If the gentleman can answer this question, I shall not object. I want to ask the gentleman if an officer like Major Worsham, realizing the importance of putting under bond messengers who handle sums of $47,500 of the people's money at one time, and knowing they were not under bond, they had not been put under bond but he knew they ought to be put under bond, yet he did not see to it that that money was safely guarded, does my friend think we ought to pay for a $1,500 shortage?

Mr. DRIVER. But will the gentleman wait until I make my explanation?

Mr. BLANTON. Does the gentleman think that?

Mr. DRIVER. I will say there was no negligence and no carelessness on the part of Major Worsham who operated under the system that was in existence when he was called to take care of the combined activities. Let me say to the gentleman from Texas and to the gentleman from Ohio [Mr. MOUSER], the moment Major Worsham took charge of the organization he immediately outlined a system by which he put every member under bond, down to himself.

Mr. MOUSER. That was after the $1,500 disappeared.

Mr. DRIVER. I know it was, but when he took charge he outlined a system, but before he could effect a complete system of bonding, this check was drawn in the course of the usual operations of this organization, the first operation of that kind on the part of Major Worsham, and he effectuated a perfect system by which to-day and ever since then every man has been under bond, even to himself.

Mr. BLANTON. Will the gentleman yield for this suggestion? There occurred here in Washington the other day an instance where a bank sent a rather large sum of money by an irresponsible messenger, who drew a mere pittance for wages, and the messenger stole the bank roll from himself. Would the gentleman expect anything different than that, where the higher-ups are careless?

Mr. DRIVER. We are all frequently careless about those things, but in this case it was not carelessness, because it was in line and in keeping with the method employed at that time.

Mr. BLANTON. Mr. Speaker, I have such confidence in my friend I am constrained to withdraw the objection.

Mr. DRIVER. I will say this is a case where I know the man personally. I am obliged to the gentleman from Texas.

Mr. MOUSER. Reserving the right to object, there is a supplementary report which has just been filed by the committee. The last paragraph of the statement by the Comptroller General is as follows:

Moreover, the granting of legislative relief for shortages does not encourage respect for law or law enforcement, and without law enforcement in fiscal matters the whole existing Federal system of checks on illegal expenditures of public moneys becomes endangered. On the other hand, a refusal by the Congress to sanction relief from responsibility for lost public funds not only strengthens law enforcement, but avoids, as in this case, the nullifying of administrative and accounting action that has already been taken for law enforcement.

Here was an administrative officer who, as disbursing officer, received a check from the United States Government for $47,000. He got the check cashed in order to get the money to meet the pay roll. He intrusted it to two of the enlisted personnel to count the money and to disburse it. I have the greatest respect for the legal ability of the gentleman from Arkansas as well as his opinion, and I do not believe the gentleman is prejudiced in behalf of his constituent; but in view of what the Comptroller General of the United States has said, and there being thousands of instances——

Mr. BLANTON. No, No. This is not the constituent of the gentleman from Arkansas.

Mr. DRIVER. He is not a constituent of mine. He is more than that. He is a man who is connected with an engineering organization that I have known for years. There is not a cleaner or higher type of man in the country. There is not a word on this record that indicates he is not a man of the highest integrity, as I know him to be. Permit me to say to the gentleman from Ohio [Mr. MOUSER],

the declaration of the Comptroller General is true and should be true, but the Congress can not afford to sit here and let the Comptroller General rule on a matter like this.

Now, Major Worsham used the messengers that had been employed for that purpose. He did not choose the messengers. They were men who were in the habit of going to the bank. Major Worsham sent the mesesngers and two police officers accompanied the messengers, as they always do, and brought the money back with them. The money disappeared evidently after it was brought back by the messengers while they were in the office separating the money to meet the pay rolls for these various activities. It was then that the $1,500 disappeared. He was in no manner negligent nor did he do anything except follow the usual method of operating, and at the time he was engaged in building up protection and a guarantee against a recurrence of such an instance in the future.

Mr. MOUSER. Mr. Speaker, in view of the gentleman's explanation and his personal knowledge of the integrity of this man, I feel inclined to withdraw the objection. I withdraw the reservation of objection.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $1,500 in full settlement of all claims against the Government of the United States to Maj. L. D. Worsham for moneys deducted from his salary on account of loss of funds in the disbursing account, Corps of Engineers, War Department, September 14, 1928.

With the following committee amendment:

In line 10, after the figures "1928," insert the following: "*Provided*, That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 per cent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

EDWARD B. WHEELER AND STATE INVESTMENT CO.

The Clerk called the next bill, H. R. 6773, authorizing the reimbursement of Edward B. Wheeler and the State Investment Co. for the loss of certain lands in the Mora Grant, New Mexico.

Mr. STAFFORD. Mr. Speaker, I object.

Mr. CHAVEZ. Mr. Speaker, will the gentleman withhold his objection to permit me to make a statement?

Mr. STAFFORD. I will withhold it.

Mr. CHAVEZ. Mr. Speaker, there is merit to this bill. If you read the report carefully you will find these men are trying to collect from the Government for something the Government gave away that did not belong to the Government.

The land grant involved in this bill belonged to private parties. Uncle Sam claimed part of the land grant belonged to Uncle Sam.

Mr. BACHMANN. It was a 3-mile strip, was it not?

Mr. CHAVEZ. It is a 3-mile strip, 30 miles long.

The United States Government by its duly authorized agents went into court to try to get that land away from the private owners.

Mr. BACHMANN. Prior to that they had granted certain rights to certain settlers on the strip, had they not?

Mr. CHAVEZ. Prior to that, under the impression that the land belonged to the United States, the Department of the Interior had issued some patents to probably 10,000 or 12,000 acres of these lands. Then they went to the United States court, which decided that the land in question belonged to the claimants under this bill.

Mr. BACHMANN. I do not deny the justice of the claim so far as the facts are concerned, but the Federal court based its decision on a stipulation and agreement that was entered into between the private parties and the attorneys representing the Government that no one was to be affected who had settled on the strip of land.

Mr. CHAVEZ. But if the gentleman from West Virginia will read the stipulation he will readily see that it does not——

Mr. BACHMANN. I will say to the gentleman from New Mexico that I have read it several times.

Mr. CHAVEZ. I am extremely sorry we do not agree as to what the stipulation contains, but I do not believe the stipulation goes to the extent that the claimant should not compel the United States Government to pay for something that belongs to the claimants.

Mr. BACHMANN. I read a portion of the statement of C. C. Moore, the commissioner, on page 3 of the report, the last paragraph.

Any losses, therefore, that may have been sustained by the grant claimants were due to their laches in failing to take proper action against Government patentees and to their express agreement, entered into first with the First Assistant Secretary and later with the United States attorney for the district of New Mexico. The court merely confirmed their solemn agreement and made it a part of its decree. The grant claimants are under existing law without any right to demand or receive reimbursement, and I see no reason whatever why the bill should be enacted extending such right to them.

C. C. MOORE, *Commissioner.*

Mr. CHAVEZ. But if the gentleman will notice what the stipulation itself says:

We agree not to molest any bona fide settler on the disputed tract who holds under patent from the United States or under any entry allowed by the Department of the Interior prior to this date, or who may hereafter make entry of land within said strip listed by the Secretary of Agriculture with the Secretary of the Interior, upon applications heretofore made, to be declared open to settlement and entry under the homestead laws of the United States; it being understood and agreed that no further applications for listing of land within the said strip will be examined by the Secretary of Agriculture with a view to further listings. * * *

But even though they stipulated that they would not molest those who had obtained patents from the Government or made entry, this does not absolve the Government from paying for these lands.

Mr. BACHMANN. How much will it cost the Government if the bill is passed?

Mr. CHAVEZ. It will cause the Government to pay out $28,000 or $30,000, and it is cheap at that.

Mr. STAFFORD. How does the gentleman reconcile his position with that taken by the commissioner?—

The records do not disclose that the grant claimants were ever in possession of any part of the strip in dispute prior to the time of the decision of the Supreme Court above cited.

Mr. CHAVEZ. That court recognized as far back as 1860 that it was ceded to the United States Government under the Guadeloupe Hidalgo treaty after the Mexican War, and was confirmed by the United States Government to the private owners.

Now, I know that $30,000 seems like quite a sum, but the land in question is valuable land. These claimants are entitled to the protection of the laws of the country, and are entitled to be protected in their rights just like any other citizen.

Mr. STAFFORD. Why should the commissioner show on every occasion this matter has been presented that the commissioner declared adversely to the claimants?

Mr. CHAVEZ. For the reason the claimants stipulated that they would not molest the patentees.

This does not alter the fact that land originally was confirmed in the claimants under this particular bill. It is a fair claim, it has passed the Senate, it was before the Committee on Claims of this House, it was given fair consideration, long hearings were held, and there is no question from the standpoint of merit and justice, but what it should be passed.

Mr. BACHMANN. Why was not the matter settled when it was in the courts and there were stipulations entered there?

Mr. STAFFORD. Mr. Speaker, we ought to be making more headway with these bills, and I demand the regular order.

Mr. BACHMANN. Mr. Speaker, if the regular order is demanded, I object.

FIRST NATIONAL BANK OF JUNCTION CITY, ARK.

The clerk called the next bill (H. R. 8216) for the relief of the First National Bank of Junction City, Ark.

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I have considerable difficulty in reconciling myself favorably to this bill. The Committee on Claims, through its distinguished chairman, has submitted a supplemental report that gives us some little information about the bill. The gentleman from Arkansas [Mr. PARKS] was kind enough to give me further information.

From the supplemental report it appears that these postal money orders were drawn on the bank where the money was deposited.

Mr. PARKS. No; if the gentleman from Wisconsin will permit, the order was issued by the postmaster in the regular way. He first began by issuing real, bona fide money orders and depositing them in the bank. This was during an oil boom down there, and the bank would not take the checks of strangers, and this man had a little store and was also postmaster and was issuing money orders. He began first to send these money orders to the bank and they cashed them and gave him credit for them. Eventually he was getting along with this so nicely that he began to issue fraudulent orders. They were not forged but were fraudulent. He ran this account along with the bank, and the Government permitted it to be done, although this man was under a very small bond. This went along nearly a year before the Government discovered that this man had no money to back up these money orders. They made demand on the bank, and the bank had to return the money to the Government.

Now, where the Government's negligence comes in is that the man had a small bond and he was permitted to draw these money orders, one right after the other, and deposit them. The average individual and most of the lawyers believe that when you get a money order it is just like a Government bond or a $10 bill or a $20 bill.

Mr. STAFFORD. But is it?

Mr. PARKS. No; it is not. I have looked the question up, and it is not.

The courts have decided that where a man issues a money order and it is a fraudulent order, notwithstanding he is the regular postmaster, where he issues the money order on a regular money-order blank, if it turns out that he has no money for that money order, the man who receives it and gets the money has to pay it back.

Mr. STAFFORD. The same law is applicable to checks.

Mr. PARKS. Yes; that is true.

Mr. STAFFORD. Assuming that this postmaster was depositing checks in this bank drawn on another bank, as I understand was the fact, and there are no funds in the other bank, the bank that cashes the check in the first instance will be out.

Mr. PARKS. But here is the difference, and here is where an injustice was done to this bank. Here was a man who was a postmaster and an officer of the Government, supposed to be under bond, and was under nominal bond.

Mr. BACHMANN. How much was the bond?

Mr. PARKS. I think it was $1,000, and he issued thousands and thousands of dollars of these money orders.

Mr. STAFFORD. But he was not authorized, and this bank was put on notice that these money orders must be issued in due course.

Mr. PARKS. No; that is where the gentleman is mistaken. There is where we differ, and there is where I know the gentleman is not going to do me an injustice. Here was a man who was held out as being, and was, a postmaster, assumed to be under adequate bond by the Government of the United States. The Government authorized him to issue these money orders, and he was dealing with the public as a bona fide officer of the Government. Every man who dealt with him had the right to assume that he was under adequate bond in issuing these money orders.

Mr. STAFFORD. But they were not issued in due course.

Mr. PARKS. Yes; they were. How in the world could you tell, if you took one of the money orders, that he had not deposited the money in the bank to pay for the money order?

Mr. STAFFORD. It was not in regular course that these money orders were issued.

Mr. PARKS. Oh, yes.

Mr. STAFFORD. No.

Mr. PARKS. Let me go a little farther with my statement. If this had been one order or one instance, that would be one thing; but the Government stood by and for eight months let this man continue this practice without discovering he was issuing fraudulent orders. There was no way on earth whereby the banks could discover this.

Mr. STAFFORD. Oh, it was a practice out of course entirely. It was a case of money orders payable to third persons and money orders issued out of course being paid to this bank, and the bank knew that it was not within the province of any postmaster to draw money orders under these circumstances.

Mr. PARKS. Let me go a little farther, because the gentleman does not understand the conditions that prevailed at that time. The postmaster represented to the bank that he could mail his money to Little Rock, where the depository was and thereby save the expense of going to these banks which were 50 or 30 miles away, and he said, "I could issue these money orders and deposit the money in the Little Rock bank," which was perfectly regular and which he had the right and the authority to do and which he did do in the beginning, but eventually he discontinued that practice and issued these orders that were fraudulent, and the bank had no way on earth to know that they were not accepting Government paper.

Ninety lawyers out of a hundred in the United States believe that when you have a money order signed regularly by the postmaster that that order will be paid by the Government.

Mr. STAFFORD. If issued in due course.

Mr. PARKS. It was issued in due course. It was not irregularly issued.

Mr. BACHMANN. There was no way for the bank to know that it was fraudulent.

Mr. PARKS. No way on earth. If a bank issues a fraudulent check for $50 or $100 there is no way for you to know it is not a good check until it is taken up.

Mr. BACHMANN. How much is involved in this? How many of these claims are we going to have?

Mr. PARKS. I think there are only three—less than $5,000.

Mr. BACHMANN. There is another bill after this.

Mr. PARKS. The whole thing will not aggregate more than $5,000. I do not want the gentleman to overlook the point that the Government was negligent in permitting this man to go six or eight months in this way.

Mr. STAFFORD. I can not agree with the gentleman that the Government is negligent. In the fourth-class offices it takes sometimes a year before the inspector gets around.

Mr. BACHMANN. As I understand, the Government was paid the money.

Mr. PARKS. The Government was paid back the money.

Mr. STAFFORD. The only question is who is to be the loser—the Government or the bank.

Mr. PARKS. I am talking about the equity of the case, and not the law. The Government put a man down there with an inadequate bond, and it ought to have exercised ordinary diligence and found out that the man was issuing fraudulent orders.

Mr. BACHMANN. I concur with the gentleman that the bond should have been sufficient.

Mr. PARKS. The Government permitted the man to go there with an insufficient bond and issue money orders in the regular course of business.

Mr. STAFFORD. I can not agree that the money orders were issued in the regular course. The bank knew that the proceeding was out of the regular course.

Mr. BACHMANN. How is an individual to know when he sees a money order issued on the Government—how is he to know whether it was not issued in due course of business?

Mr. STAFFORD. The bank was receiving these money orders but not in the regular course of business, but out of the regular course.

Mr. PARKS. These money orders were not all drawn payable to the bank. Different individuals came in with money orders and they were transmitted to Little Rock and deposited in the usual way with the bank.

Mr. STAFFORD. Mr. Speaker, the gentleman from Arkansas has now for the first time in the presentation of this case stated that these money orders were not money orders entirely drawn on the bank, but were drawn in the regular course. Under those circumstances, I will withdraw my objection.

Mr. PARKS. I thank the gentleman.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $654.17 to the First National Bank of Junction City, Ark., in full settlement against the Government for money that was paid to Joe F. Tullis, who was postmaster at Upland, Union County, Ark., on post-office money orders deposited at said First National Bank of Junction City at different times and for different amounts, aggregating $654.17, which money orders were cashed by said bank, and which had been fraudulently issued by the postmaster without the knowledge of said bank that they were fraudulent. All of said money orders were paid by the Government and the money was subsequently refunded by said bank.

With the following committee amendment:

Provided, That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 per cent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

WILLIAM CHINSKY

Mr. STAFFORD. Mr. Speaker, I ask unanimous consent to return to the first bill that was in order to-night, to which I objected (H. R. 7200), for the relief of William Chinsky, for its further consideration.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to William Chinsky the sum of $5,000 in compensation for injuries sustained as the result of an explosion of a hand grenade which he had picked up in Grant Park, Chicago, Ill., October 12, 1919.

With the following committee amendments:

Page 1, line 6, strike out "$5,000" and insert "$2,500," and page 1, line 9, after the figures "1919," insert "*Provided*, That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 per cent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

Mr. STAFFORD. Mr. Speaker, the gentleman from Illinois [Mr. SABATH], since this bill was first considered to-night, has shown to me certain evidence that convinces me that these maneuvers were virtually under the full jurisdiction of the United States. Therefore, I withdraw my objection.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. BACHMANN. Mr. Speaker, the amount as amended is entirely satisfactory.

Mr. SABATH. It is not satisfactory, but I accept it.

Mr. BACHMANN. There will be no attempt to increase the amount in another body?

Mr. SABATH. No.

The SPEAKER pro tempore. Is there objection?

There was no objection.

The committee amendments were agreed to and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

LAURA J. CLARK

The next business on the Private Calendar was the bill (H. R. 8800) for the relief of Laura J. Clark.

The SPEAKER pro tempore. Is there objection?

Mr. STAFFORD. Mr. Speaker, I reserve the right to object. I could not agree to the bill in this form and I would like to know whether or not the gentleman from Arkansas [Mr. RAGON] will accept as a substitute the following amendment:

That the Comptroller General is hereby authorized to ascertain the amount of damages to which Laura J. Clark, mother of the children of Capt. C. H. Clark, United States Marine Corps, would be entitled to under the act of March 2, 1927, for the ascertainment of damages to persons suffering injuries by reason of explosion at the naval ammunition depot at Lake Dover, N. J., as if she had presented her claim within the stated time provided in said act; and there is hereby appropriated out of any funds in the Treasury not otherwise appropriated the amount so ascertained, to be paid to said Laura J. Clark, provided that no interest shall be allowed on the amount so ascertained.

Mr. MOUSER. Mr. Speaker, will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. MOUSER. I had a talk with the gentleman from Arkansas [Mr. RAGON], and he advises me that this lady is a hopeless cripple. She is a paralytic. She was 64 years of age when the accident happened in 1926. She never employed an attorney, and the only objection to her getting a reasonable amount would be the running of the statute of limitations. She was not acquainted with the proceedings and she did not file within the six months. In view of her physical condition the gentleman from Arkansas has agreed to accept a reduction from the amount of $5,000. She may die in the meantime.

Mr. RAGON. Mr. Speaker, I hope the gentleman from Wisconsin will not ask me to do what he has asked, which I think is wrong, with all due respect to him. I am not going to surrender to that amendment, for this reason: This woman is old. Through the fault of the United States Government she has been upon a bed of pain for the last five years. I saw her a half dozen times this year in a wheel chair, being rolled by somebody else. She lost her son, and you might say, figuratively speaking, that they had to pick him up with a blotting paper right under her face. This woman was knocked down, she was knocked from the second story to the first story, but she maneuvered even so to take two little helpless boys and drag them to an automobile in which they were carried to a place of safety. I had correspondence with General Lejeune, who made a personal investigation and who has agreed that the original amount of the bill is necessary to compensate her for what she suffered in the first place. This old lady was brought from her home in Arkansas to Lake Denmark for the purpose of taking care of Captain Clark's two little boys, while his wife was confined at Saranac in a tuberculosis hospital, from which disease she has since died.

Mr. MOUSER. Mr. Speaker, will the gentleman yield?

Mr. RAGON. Yes.

Mr. MOUSER. Is it not a fact that if this is referred back it may not pass during this session, and she is in such an impoverished condition that she really should have this money now?

Mr. STAFFORD. This is a House bill and I am giving full authority to pay the amount which the Comptroller General ascertains. I am not trying to do any injustice. I am trying to lift the statute of limitations and have the Comptroller General pass upon it as we have in all these other cases.

Mr. MOUSER. The Comptroller General will refer it back for us to fix the amount.

Mr. STAFFORD. No, no. In this amendment I give him full authority. The amendment I have offered is not doing any injustice.

Mr. MOUSER. This case aroused my sympathy. I had some doubt about it——

Mr. STAFFORD. I am not insensitive to sympathy either, and by my amendment I am appropriating money and making provision for the ascertainment of the amount.

Mr. RAGON. Let me suggest to the gentleman that at the time this bill was reported out the gentleman from Ohio [Mr. MOUSER] came and asked me if I would agree to a reduction. I thought that anything he might think was reasonable I would accept, in view of the fact that times have changed, and that $3,500 or $3,000 would go as far as $5,000 at the time the bill was reported out. I am perfectly willing to accept that under the circumstances, but here is an old lady that I know of my own knowledge was injured in that explosion. She is a painfully helpless cripple.

Mr. STAFFORD. The gentleman is making a bald statement. The gentleman says he knows of his own knowledge that this woman was injured in this explosion.

Mr. RAGON. The gentleman does not think that General Lejeune would tell me an untruth about it, and I have known the old lady ever since she has been back from her injury. I do not know what else the gentleman could ask for. If this was taken out of the Government of the United States and given some one else to sue for this, I would not give a 10-cent cigar to guarantee me a verdict of less than $20,000 in any court in this country. It is a most pathetic thing.

Mr. STAFFORD. Then why did she not exercise her rights, being an intelligent woman, within the time authorized by law?

Mr. RAGON. She is not an intelligent woman in the light that the gentleman is. She lived back there in Arkansas, and she was not familiar with the law. I did not know that this six months' limitation was there.

Mr. STAFFORD. But her son made application.

Mr. RAGON. Her son was blown to smithereens. The widow was a helpless invalid in New York City.

Mr. MOUSER. And she got the paltry sum of $1,400.

Mr. RAGON. She got the paltry sum of $1,400 for the loss of her husband. I am perfectly willing, if the gentleman insists, to accept the amendment. I am not going to stand here and insist against the gentleman from Ohio. The gentleman asked me if I would agree that there would be no increase made in the Senate. The gentleman from Texas asked me that, and I said I would agree to that. The only thing is that I want you to allow this poor old lady a reasonable amount.

Mr. STAFFORD. Then the gentleman says that which does not appear from the report, and the gentleman sees that I have taken considerable pains to write out a substitute.

Mr. RAGON. Yes. I appreciate that.

Mr. STAFFORD. The gentleman sees that I have not just hurriedly glossed over this bill. I have given it very careful consideration. There was nothing in the report by the Secretary of the Navy to show the extent of her injuries. Now, if, as the gentleman states, she was without any question injured in this way, and the gentleman knows it of his own knowledge, I will withdraw my objection.

Mr. SCHAFER. Will the gentleman yield?

Mr. RAGON. Yes. I yield.

Mr. SCHAFER. Under what plan of equity for this widow is the gentleman willing to accept $3,500? The committee unanimously recommended $5,000. This is actual, total disability. She is helpless and bedridden. Why, in the name of goodness, should we single out this case and put it on the auction block?

Mr. BLACK. The regular order, Mr. Speaker. The gentleman has withdrawn his objection.

The SPEAKER pro tempore. Is there objection?

Mr. SCHAFER. Reserving the right to object——

Mr. BLANTON. They have not reduced it. They are allowing the $5,000.

Mr. MOUSER. No, no. The gentleman said he would accept an amendment making it $3,500.

Mr. SCHAFER. I shall oppose any amendment reducing this amount to $3,000. It is not fair.

Mr. BLACK. Mr. Speaker, the regular order.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Laura J. Clark, out of any money in the Treasury not otherwise appropriated, the sum of $10,000, in full settlement of all claims for injuries sustained by reason of the explosion of munitions at the Picatinny Arsenal near Dover, N. J., in 1926.

With the following committee amendment:

Page 1, line 6, strike out "$10,000" and insert in lieu thereof "$5,000."

Mr. STAFFORD. Mr. Speaker, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment to the committee amendment offered by Mr. STAFFORD: Strike out "$5,000" and insert in lieu thereof "$3,500."

The SPEAKER pro tempore. The question is on the amendment to the committee amendment.

Mr. BLACK. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. BLACK. Is the vote on the amendment to the committee amendment or on the committee amendment?

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from Wisconsin to the committee amendment.

Mr. BLANTON. Mr. Speaker, I rise in opposition to the amendment, just for the purpose of having an understanding. I wish to say to the gentleman from Arkansas [Mr. RAGON] that he knows I am in sympathy with the action of the committee in reducing the amount from $10,000 to $5,000.

Unless we respect the customary procedure on unanimous-consent night, and agreements entered into before the objection stage has passed, this is what will happen: The amendment of the gentleman from Wisconsin will be voted down and the gentleman from Wisconsin, in the exercise of his rights, will make the point of no quorum and the bill will be defeated. So let us respect the agreement made and accept the $3,500, and uphold the dignity of procedure under this rule.

Mr. SCHAFER. I am willing to support the amendment, but I think it is a damnable outrage to auction off this woman's welfare here and cut the amount from $5,000, which the Committee on Claims recommended, to $3,500.

Mr. BLANTON. Since the gentleman from Wisconsin has gotten that out of his system, I know he wants to go along and save time.

Mr. RAGON. Let me say this, in justification of my previous statement. The reason I accepted this was because it had been accepted by the gentlemen who wanted to see the bill passed. I accepted it for this reason.

I may say to the gentleman from Wisconsin that the $5,000 recommended at the time the bill was reported would really be less than the $3,500 now proposed.

Mr. SCHAFER. The gentleman is compelled to accept the reduction in order to get something for this poor, unfortunate woman.

Mr. BLACK. Mr. Speaker, I did not understand that an agreement had been reached. Had I understood it, I would have stood by the agreement, because in no other way can we function on the Private Calendar under the old rules. I trust the gentleman from Wisconsin, who is a member of the Claims Committee, will likewise stand by the agreement.

Mr. SCHAFER. I will in order that this poor widow may get even the small amount under this auction system here.

The regular order was demanded.

The SPEAKER pro tempore. The question is on the amendment to the committee amendment.

The amendment to the committee amendment was agreed to.

The committee amendment, as amended, was agreed to.

Mr. RAGON. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RAGON: Page 1, line 4, strike out "Clark" and insert in lieu thereof "Clarke."

The amendment was agreed to.

Mr. RAGON. Mr. Speaker, I offer another amendment.

The Clerk read as follows:

Amendment offered by Mr. RAGON: Line 8, strike out the clause "Picatinny Arsenal near Dover" and insert in lieu thereof "naval ammunition depot at Lake Denmark."

The amendment was agreed to.

Mr. RAGON. Mr. Speaker, I offer a further amendment.

The Clerk read as follows:

At the end of the bill insert the following:

"*Provided*, That no part of the amount appropriated in this act in excess of 10 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 per cent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

The title of the bill was amended.

ADJOURNMENT

Mr. BLACK. Mr. Speaker, I move the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 35 minutes p. m.) the House adjourned until to-morrow, Friday, February 3, 1933, at 12 o'clock noon.

COMMITTEE HEARINGS

Tentative list of committee hearings scheduled for Friday, February 3, 1933, as reported to the floor leader:

BANKING AND CURRENCY

(10.30 a. m.)

Hearing on H. R. 14265 and 13851, to amend Reconstruction Finance Corporation act to extend relief to public-school districts, etc.

COINAGE, WEIGHTS, AND MEASURES

(10 a. m.)

Continue hearings on silver bills.

WAYS AND MEANS

(2 p. m.)

Continue hearings on depreciated currency bill.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

907. A letter from the president of the Washington Railway & Electric Co., transmitting report by William F. Ham, president of the Washington Interurban Railroad Co., for the year ended December 31, 1932; to the Committee on the District of Columbia.

908. A letter from the president of the Washington Railway & Electric Co., transmitting report by William F. Ham, president of the Washington Railway & Electric Co., for the year ended December 31, 1932; to the Committee on the District of Columbia.

909. A letter from the president of the Potomac Electric Power Co., transmitting report of the Potomac Electric Power Co. for the year ended December 31, 1932; to the Committee on the District of Columbia.

910. A letter from the Secretary of the Navy, transmitting copy of a proposed bill entitled "To provide for the reimbursement of personnel of the Navy and Marine Corps for personal property lost, damaged, or destroyed as a result of the earthquake which occurred at Managua, Nicaragua, on March 31, 1931"; to the Committee on Claims.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. MEAD: Committee on the Post Office and Post Roads. H. Res. 359. A resolution opposing the letting of new air mail contracts or renewals or extensions of existing contracts until the committee authorized by the House of Representatives submits its report; with amendment (Rept. No. 1956). Referred to the Committee of the Whole House on the state of the Union.

Mr. LUCE: Committee on the Library. H. Con. Res. 47. A concurrent resolution relating to Statuary Hall; without amendment (Rept. No. 1957). Referred to the Committee of the Whole House on the state of the Union.

Mr. DARROW: Committee on Naval Affairs. H. R. 14438. A bill to effect needed changes in the Navy ration; without amendment (Rept. No. 1958). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mrs. KAHN: Committee on Military Affairs. H. R. 636. A bill to convey certain land in the county of Los Angeles, State of California; without amendment (Rept. No. 1954). Referred to the Committee of the Whole House.

Mr. HARE: Committee on War Claims. H. R. 9913. A bill for the relief of Ernest Elmore Hall; with amendment (Rept. No. 1955). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. WILSON: A bill (H. R. 14548) to amend the act entitled "An act for the control of floods on the Mississippi River and its tributaries, and for other purposes," approved May 15, 1928; to the Committee on Flood Control.

By Mr. WHITTINGTON: A bill (H. R. 14549) to reduce salaries, pay, and wages received from the United States during the fiscal years 1934 and 1935; to the Committee on Expenditures in the Executive Departments.

By Mr. SABATH: A bill (H. R. 14550) to amend paragraph (1), section 201, title 2, of the emergency relief and construction act of 1932; to the Committee on Banking and Currency.

By Mr. LANHAM: Joint resolution (H. J. Res. 585) authorizing the erection in the Department of State Building of a memorial to the American diplomatic and consular officers who while on active duty lost their lives under heroic or tragic circumstances; to the Committee on Public Buildings and Grounds.

By Mr. McREYNOLDS: Joint resolution (H. J. Res. 586) authorizing an annual appropriation for the expenses of participation by the United States in the International Institute of Agriculture at Rome, Italy; to the Committee on Foreign Affairs.

By Mr. JONES: Joint resolution (H. J. Res. 587) to provide protection and relief to farmers by aiding them to conserve and liquefy their mineral rights through recognized and established cooperative agencies engaged in the pooling of mineral rights underlying farm lands; to the Committee on Banking and Currency.

By Mr. BRITTEN: Joint resolution (H. J. Res. 588) concerning the issuance of passport information; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 3 of Rule XXII, memorials were presented and referred as follows:

Memorial of the Senate of the State of Texas, memorializing Congress, indorsing H. D. Driscoll, of Tulsa, Okla., for membership on the Interstate Commerce Commission, and requests the President to appoint him to this position; to the Committee on Interstate and Foreign Commerce.

Memorial of the Legislature of California, memorializing the President, Senate, and House of Representatives to enact into law H. R. 13999, to the end that adequate protection be afforded the industries and agriculture of the Nation; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DOWELL: A bill (H. R. 14551) granting an increase of pension to Anise Musselman; to the Committee on Invalid Pensions.

By Mr. GREGORY: A bill (H. R. 14552) granting a pension to Ethel Drew; to the Committee on Pensions.

By Mr. HOGG of West Virginia: A bill (H. R. 14553) for the relief of Garfield Maynard; to the Committee on Claims.

By Mr. HOGG of Indiana: A bill (H. R. 14554) granting a pension to Grace A. Harper; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14555) granting an increase of pension to Mary O. Lockwood; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14556) granting an increase of pension to Mary E. Jones; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14557) granting an increase of pension to Mary Scott; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14558) granting an increase of pension to Sarah A. Sembower; to the Committee on Invalid Pensions.

Also, a bill (H. R. 14559) granting an increase of pension to Elizabeth Wynn; to the Committee on Invalid Pensions.

By Mr. THURSTON: A bill (H. R. 14560) for the relief of C. V. Mason; to the Committee on Claims.

By Mr. THATCHER: A bill (H. R. 14561) for the relief of Mary Seeley Watson; to the Committee on Foreign Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

10132. By Mr. ADKINS: Petition of citizens of Villa Grove, Ill., protesting against proposed changes in veterans' legislation and urging support of all legislation to see that justice is done the veterans; to the Committee on Veterans' Affairs.

10133. By Mr. CLARKE of New York: Petition of a group of citizens of Oneonta, N. Y., opposed to the return of beer and to every legislative act that would legalize alcoholic liquors stronger than one-half of 1 per cent; to the Committee on the Judiciary.

10134. By Mr. CURRY: Petition of members of the Fleet Reserve Association, Branch 8, of Vallejo, Calif., in regard to economies affecting enlisted men of the Navy; to the Navy Subcommittee of Appropriations Committee.

10135. By Mr. DELANEY: Petition of Kirkman & Son (Inc.), of Brooklyn, N. Y., soap manufacturers, protesting against the amendment of House bill 13991, taxing all industrial oils entering the United States with the exception of those from the Philippine Islands; to the Committee on Ways and Means.

10136. By Mr. FINLEY: Petition of 108 citizens of the ninth congressional district of Kentucky, protesting against repeal, modification, or nullification of the eighteenth amendment; to the Committee on the Judiciary.

10137. By Mr. GARBER: Petition of McManus-Heryer Brokerage Co., Oklahoma City, Okla., protesting against any change in the currency system of the United States; to the Committee on Banking and Currency.

10138. Also, petition of certain voters and citizens of Tulsa, Okla., urging support of immediate inflation of money through standardization of silver with gold on a basis of 16 to 1, and a moratorium on all debts for at least a year or 18 months; to the Committee on Banking and Currency.

10139. Also, petition urging enactment of railway pension bills (S. 4646 and H. R. 9891); to the Committee on the Judiciary.

10140. By Mr. GRISWOLD: Petition of J. A. Williams and 55 other residents of Portland, Ind., protesting against any change or modification of the eighteenth amendment; to the Committee on the Judiciary.

10141. Also, petition of H. E. Jones and 36 other residents of Redkey, Ind., protesting against any change or modification of the eighteenth amendment; to the Committee on the Judiciary.

10142. Also, petition of C. J. Redding and 23 other citizens of Huntington, Ind., protesting against any change or modification of the prohibition law and urging strict enforcement of this law; to the Committee on the Judiciary.

10143. Also, petition of Mrs. John Bookwalter and 39 other citizens of Macy, Ind., protesting against any change or modification of the eighteenth amendment; to the Committee on the Judiciary.

10144. By Mr. KELLY of Pennsylvania: Petition of citizens of Swissvale, Pa., favoring the stop-alien-representation amendment; to the Committee on Immigration.

10145. By Mr. LAMBERTSON: Petition of the Francis Willard Woman's Christian Temperance Union, of Leavenworth, Kans., signed by its president, Mrs. Harriet Shelby, and also the secretary, Miss Jennie Shields, favoring the improvement of the motion-picture industry; to the Committee on Interstate and Foreign Commerce.

10146. By Mr. LINDSAY: Petition of Educational Conservation Society, Woodside, Long Island, N. Y., favoring Senate Concurrent Resolution 6; to the Committee on the Judiciary.

10147. Also, petition of Kirkman & Son (Inc.), soap manufacturers, Brooklyn, N. Y., opposing amendment to part of domestic allotment bill (H. R. 13991); to the Committee on Agriculture.

10148. By Mr. MARTIN of Massachusetts: Petition of Mark R. Shaw and other residents of Holliston, Mass., urging adoption of the so-called stop-alien-representation amendment; to the Committee on the Judiciary.

10149. By Mr. REID of Illinois: Petition of several hundred residents of Elgin, Ill., and vicinity, being members of the Elgin Chapter of the Daughters of the American Revolution, urging the passage of House bills 1967, 8549, 12044, and 10602; to the Committee on Immigration and Naturalization.

10150. By Mr. RUDD: Petition of Arthur C. Mayer Post, No. 570, Veterans of Foreign Wars, Brooklyn, N. Y., opposing so-called economy at the expense of war veterans; to the Committee on World War Veterans' Legislation.

10151. Also, petition of Kirkman & Son (Inc.), soap manufacturers, Brooklyn, N. Y., opposing certain amendment to the domestic allotment bill (H. R. 13991); to the Committee on Agriculture.

SENATE

FRIDAY, FEBRUARY 3, 1933

(Legislative day of Tuesday, January 10, 1933)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The PRESIDENT pro tempore. The Senate will receive a message from the House of Representatives.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Haltigan, one of its clerks, announced that the House had passed without amendment the following bills of the Senate:

S. 243. An act for the relief of S. F. Stacher;

S. 433. An act to authorize the posthumous award of a distinguished-flying cross to Eugene B. Ely;

S. 2058. An act for the relief of William C. Rives;

S. 2982. An act for the relief of J. G. Seupelt; and

S. 4381. An act authorizing the President to transfer and appoint Lieut. Morris Smellow, United States Navy, to the grade of passed assistant paymaster, with the rank of lieutenant, in the Supply Corps of the United States Navy.

The message also announced that the House had passed the bill (S. 2200) to authorize the presentation of a medal of honor posthumously to the late Henry Clay Drexler and the late George Robert Cholister, with amendments, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 698. An act authorizing the President to transfer and appoint Lieut. (Junior Grade) Arnold R. Kline, United States Navy, to the grade of assistant paymaster, with the rank of lieutenant (junior grade) in the Supply Corps, United States Navy;

H. R. 913. An act for the relief of Charles W. Sumner;

H. R. 1709. An act for the relief of Burton Bowen;

H. R. 1710. An act for the relief of Raymond C. Bogart;

H. R. 3626. An act for the relief of John I. Lowe;

H. R. 3905. An act for the relief of Maj. L. D. Worsham;

H. R. 5989. An act for the relief of John O'Neil;

H. R. 7200. An act for the relief of William Chinsky;

H. R. 7593. An act for the relief of Louis Zagata;

H. R. 7687. An act for the relief of W. B. Ford;

H. R. 8216. An act for the relief of the First National Bank of Junction City, Ark.;

H. R. 8800. An act for the relief of Laura J. Clarke;

H. R. 9166. An act for the relief of William E. B. Grant;

H. R. 9272. An act to correct the rating of John Huntz Roloff, Fleet Naval Reserve;

H. R. 9473. An act for the relief of Olen H. Parker; and

H. R. 9955. An act for the relief of Lucius K. Osterhout.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

S. 243. An act for the relief of S. F. Stacher;

S. 433. An act to authorize the posthumous award of a distinguished-flying cross to Eugene B. Ely;

S. 2058. An act for the relief of William C. Rives;

S. 2982. An act for the relief of J. G. Seupelt; and

S. 4381. An act authorizing the President to transfer and appoint Lieut. Morris Smellow, United States Navy, to the grade of passed assistant paymaster, with the rank of lieutenant, in the Supply Corps of the United States Navy.

HERBERT G. BLACK AND CLARK COAL CO.

The PRESIDENT pro tempore laid before the Senate the amendments of the House to the bill (S. 487) for the relief of Herbert G. Black, owner of the schooner *Oakwoods*, and Clark Coal Co., owner of the cargo of coal on board said schooner, which were, on page 2, line 11, after "admiralty," to insert "under the terms and conditions of the public vessels act of March 3, 1925 (U. S. C., title 46, ch. 22)," and on page 2, line 16, after "States," to insert "district attorney."

Mr. WHITE. I move that the Senate concur in the amendments of the House.

The motion was agreed to.

THE JOURNAL

Mr. FESS. Mr. President, I ask unanimous consent for the approval of the Journal for the calendar days of February 1 and 2, 1933.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and that order will be entered.

CALL OF THE ROLL

Mr. FESS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Dale	Kean	Russell
Austin	Davis	Kendrick	Schall
Bankhead	Dickinson	Keyes	Schuyler
Barbour	Dill	King	Sheppard
Barkley	Fess	La Follette	Shipstead
Bingham	Fletcher	Lewis	Smith
Black	Frazier	Logan	Smoot
Blaine	George	McGill	Steiwer
Borah	Glass	McKellar	Swanson
Bratton	Glenn	McNary	Thomas, Idaho
Brookhart	Goldsborough	Metcalf	Thomas, Okla.
Bulkley	Gore	Moses	Townsend
Bulow	Grammer	Neely	Trammell
Byrnes	Hale	Norbeck	Tydings
Capper	Harrison	Norris	Vandenberg
Caraway	Hastings	Nye	Wagner
Connally	Hatfield	Oddie	Walcott
Coolidge	Hawes	Pittman	Walsh, Mass.
Copeland	Hayden	Reed	Walsh, Mont.
Costigan	Hebert	Reynolds	Watson
Couzens	Hull	Robinson, Ark.	Wheeler
Cutting	Johnson	Robinson, Ind.	White

Mr. NORRIS. I desire to announce that my colleague [Mr. HOWELL] is absent on official business of the Senate. I ask that this announcement may stand for the day.

Mr. FESS. I desire to announce that the Senator from Missouri [Mr. PATTERSON] is detained from the Senate because of a death in his family. I ask that this announcement may stand for the day.

The PRESIDENT pro tempore. Eighty-eight Senators having answered to their names, a quorum is present. The Senate will receive a message from the President of the United States.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS

Sundry messages in writing from the President of the United States were communicated to the Senate by Mr. Latta, one of his secretaries, who also announced that the President had approved and signed the following acts:

On February 1, 1933:

S. 213. An act authorizing adjustment of the claim of Kenneth Carpenter;

S. 219. An act authorizing adjustment of the claims of Orem Wheatley, Kenneth Blaine, and Joseph R. Ball; and

S. 563. An act for the relief of George T. Johnson & Sons.

On February 2, 1933:

S. 252. An act authorizing adjustment of the claim of Johnson & Higgins.

SENATOR FROM MISSOURI—BENNETT C. CLARK

The PRESIDENT pro tempore. The Chair lays before the Senate the following communication from the Governor of the State of Missouri, which will be read:

The Chief Clerk read as follows:

[Telegram]

JEFFERSON CITY, MO., *February 3, 1933.*

Vice President CHARLES CURTIS:

I have this day appointed Hon. BENNETT C. CLARK United States Senator from Missouri to fill the vacancy caused by the resignation of Senator Harry B. Hawes, and certificate of appointment has been mailed to Mr. CLARK.

GUY B. PARK, *Governor.*

Mr. ROBINSON of Arkansas. Mr. President, Mr. CLARK is present and ready to take the oath of office. I ask unanimous consent that he be permitted to take the oath.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the Senator designate will present himself at the desk to receive the oath of office.

Mr. CLARK, escorted by Mr. ROBINSON of Arkansas, advanced to the Vice President's desk; and the oath prescribed by law having been administered to him, he took his seat in the Senate.

HON. HARRY B. HAWES

Mr. ROBINSON of Arkansas. Mr. President, former Senator Harry B. Hawes, of Missouri, resigned his seat in this body effective this day. He has served with distinction and notable ability. Former Senator Hawes enjoys the respect, the confidence, and the affection of those who have labored with him in the Congress. His retirement is regretted by every Senator.

The Senate has just received into its Membership a brilliant successor to Mr. Hawes. Mr. CLARK was elected by a very large majority for the full term beginning on the 4th of March, Senator Hawes having announced his intention not to be a candidate and having refrained from becoming a candidate.

Mr. CLARK's name is associated with the legislative history of the country in a very intimate way. His distinguished father was for many years the leader of his party in the House of Representatives and for several years also Speaker, presiding over that great body. His renown, his courage, his ability are within the memory of all who had the honor of being familiar with his labors.

The new Senator from Missouri, Senator CLARK, is familiar with political problems, is a skilled parliamentarian and an able speaker, and is to be welcomed into the Membership of this body as one who will prove his devotion to the welfare of the Nation.

Mr. McNARY. Mr. President, I can not let this occasion pass without expressing my very high regard and sincere affection for Senator Hawes, who has just relinquished his seat in the Senate. I have served with him on committees of the Senate and on the floor, and all his public service has been characterized by consideration for his colleagues and studious reflection upon the problems before the country and the Senate. It is with deep regret that I witness his voluntary retirement from the Senate; and when I say that his departure is a loss to this body, I am sure that feeling is shared by every Republican Member of the Senate.

Mr. PITTMAN. Mr. President, I have had the honor and pleasure of serving on several committees with ex-Senator Harry B. Hawes, and I have found that he has given not only great service on those committees but extraordinarily able service. He is a man of deep feeling, of broad sympathies. During his whole life, from his earliest manhood, both in his activities in State and in the Congress, he has been really working for the interests of others rather than his own interest. It is this particular characteristic of Senator Hawes that has won for him the affection of those who have known him, and when he leaves us he will be seriously missed in this body, not only because of the services he has rendered but because of the warm friendships that he has made with all its Members.

I watched his work particularly with regard to the bill providing for the freedom of the Philippines. I know that he was actuated by the very highest motives of humanity not only toward those people but toward our own people in bringing about the enactment of that great compromise legislation. I saw him summer before last in the Philippine Islands, to which he went at his own expense for the purpose of studying the conditions which it was essential to know in order to frame proper legislation, and never once in all the time that legislation was being framed did he vary from the principle of justice which has marked his whole career.

I know, as I think all know, that he could have remained in the Senate of the United States probably indefinitely if he had seen fit to do so. His services to his own State have been recognized and are now recognized. I am satisfied, for instance, that the brilliant Senator who has taken his place would have never been a candidate against Senator Hawes. Nor do I believe that he would have had opposition in his own party had he seen fit to aspire to continue to represent his State in the Senate. He has served his public life, and yet he is now giving the remainder of his life to a quasi-public service. He loves human beings; he loves animal life; he loves all forms of life; and now he is devoting the remainder of his years to the conservation, preservation, and protection of the wild life of our country. He loves the stars, he loves the birds, he loves dogs and other animals. He believes that in their lives they are entitled to have protection the same as are human beings, and he will continue his great work in their behalf. It is fortunate that in doing so he and his charming family will not be so far away from us and that they will probably spend most of their time here in Washington.

I know that he would welcome an opportunity to express his appreciation of the courtesy and kindness he has received at the hands of Members of the Senate here, but parliamentary rules forbid; he has voluntarily ended a long and singularly successful public career. We wish him a long and happy life.

Mr. BINGHAM. Mr. President, as chairman of the committee that had in charge the bill for Philippine independence, whose author and whose pilot through the stormy seas of opposition was Senator Hawes, I should like to take this opportunity to place in the RECORD a brief tribute, from the heart, to his faithful service on that committee. He devoted a very large part of the last few years to a study of the question of Philippine independence. He pressed it with unfailing zeal, sincere courtesy, and a willingness to meet widely varying views. Had it not been for the spirit he showed in the handling of the entire matter, I think I can say without fear of contradiction that the step recently taken by the Congress would have not been taken. When the day comes that the people of the Philippine Islands achieve their fond hope and expectation of independence, it should be recognized by them that to no other person do they owe their independence in greater—or even equal—measure than to Senator Hawes, of Missouri. A gentleman, a scholar, a statesman, a faithful Member of this body, he leaves it with the regret of all his colleagues.

Mr. COPELAND. Mr. President, in view of the fact that we recently had a more or less bitter contest in this body over the Philippine independence bill, I wish to say a word regarding Senator Hawes. It so happens that I was the only Democrat to vote to sustain the President in his veto of the measure, not because of the reason he presented but because of my belief that the act was unconstitutional. Yet because I did that there may be some propriety in my speaking a word regarding Senator Hawes, the chief advocate of the measure.

I wish to say that I have never come in contact with a more kindly, sweet-natured man than Mr. Hawes, or one with a more lovable disposition. In spite of the bitterness of our debate on the Philippine question, I found him fair and just and considerate. There were many times when he was out of patience with me, I dare say, but he never indicated, in his personal contacts or in his public utterances, anything but the deepest consideration for me.

I wish to say to the people of the Philippine Islands that regardless of my attitude toward the Philippine bill, I want every friend I have in those islands as well as here to know that I regard Mr. Hawes as a man of the highest character and integrity. There was no selfishness in his attitude. He did what he did through a profound conviction that this was the time for action on the part of Congress and that the bill sponsored by him was the best that could be had. I regard Mr. Hawes as a true friend of the Filipinos, and if I can say a single word to give assurance to those people of the loftiness of his character, I desire to do it.

On the personal side, Mr. President, I desire to testify to the brotherliness, the kindliness, and the sweetness of character of our friend. The fact that he would resign his high office in order that his successor might have a month

of experience is typical of the man; it is exactly what I should expect from Harry Hawes. He will go out from this Chamber with the respect, the admiration, and the affection of every Member of this body.

Mr. NORBECK. Mr. President, I think Senator Harry B. Hawes is one of the Senators who puts his country above his party. He is on equally intimate terms with the Republicans and the Democrats. He enjoys their good will and, therefore, has been in position to accomplish things that otherwise would have been impossible.

His love and loyalty for his State of Missouri is forcibly brought to our attention by the unusual proceeding of resigning for the purpose of giving his successor certain important advantages.

It is admitted by all that the success of the Philippine independence bill was largely due to the tact, perseverance, discretion, and patience of Senator Hawes. The Filipinos are happy now, but it is quite possible that the responsibility that comes with independence will bring them to regret the change for which they have so loudly clamored. But from the standpoint of an American citizen, I think it was a good measure, and the Senator from Missouri is entitled to great credit. This country is large, and we have all the trouble we can handle at home. We do not need to go across the sea to find it.

Mr. President, my contacts with Senator Hawes have been more particularly in connection with conservation measures. I found in him an intense and quiet interest in the preservation of all the good things the Creator gave us. He loves nature, enjoys the beautiful scenery, and is always the defender of wild life, which is threatened with extermination, and he has methods of obtaining results.

My associations with the Senator have been both pleasant and profitable. The Committee on Wild Life, of which we are both members, have from him obtained a broader understanding of the problem and a greater interest in its objectives. He was always tolerant, and yet he had unusual ability in promoting conservation measures.

Mr. FESS. Mr. President, there are few Senators with whom I have had a more intimate acquaintance than with the retiring Senator from Missouri, and there are few whose friendship I more appreciate.

I first met him when we both were Members of the House of Representatives. I was there when he came, but his coming was heralded even before he reached the House. I was in intimate association with him and learned very soon to observe that while he was quite intense in his partisanship, it never extended beyond the point where he could not appreciate the viewpoint and sentiments of his opponents. When he came to the Senate, and especially in his service on the Committee on Interstate Commerce, I noticed his broadmindedness as we sat on opposite sides of the table and considered the various complicated and controverted subjects that came before that committee.

I did not rise to say that, however. What impresses me is the sharp contrast between the man who finds public life a disappointment and the man who goes out of public office of his own choice, happy in his associations with all of his colleagues and appreciated by all who know him, so that instead of being the subject of attack, as is the fate of most public servants, and becoming disappointed in that he did not appreciate public life as he had expected to, or was not appreciated by the public, he goes out with love and affection not only in the hearts of his colleagues but commendation on their lips as well.

I have scanned the lives of the men in this body and the other body in our past history, and I have noticed how many of them have a complaint at the end of their service. For example, I read the recollections of public life of 40 years of a great statesman from my own State, and almost the entire content of the volume is expression of disappointment all along the line, until it would seem that to some people public life is a series of disappointing occurrences.

Here, however, is a case where a great representative in this body voluntarily retires with a summation of work that meets the admiration of all of his friends; and I wish to congratulate him as he is going away from this body with that feeling and with that testimony, because it is universal.

The PRESIDENT pro tempore. To all of which the Chair, speaking in his capacity as a Senator and employing the language used yesterday by the Senator from Arkansas [Mr. ROBINSON], says, "Amen."

CHANGE OF DATE OF INAUGURATION

The PRESIDENT pro tempore laid before the Senate a letter from the Governor of Georgia, transmitting certified copy of a joint resolution adopted by the General Assembly of the State of Georgia ratifying and approving a proposed amendment to the Constitution of the United States, which, with the accompanying resolution, was ordered to lie on the table and to be printed in the RECORD, as follows:

EXECUTIVE DEPARTMENT,
Atlanta, February 1, 1933.

Hon. GEO. H. MOSES,
President pro tempore United States Senate,
Washington, D. C.

DEAR SIR: In accordance with the Joint Resolution No. 10, adopted by the General Assembly of Georgia on January 23, 1933, I am inclosing herewith copy of said resolution for presentation to your body.

I am also forwarding copy of this resolution to the Secretary of State, and also Speaker of the House of Representatives.

Respectfully,

EUGENE TALMADGE, *Governor.*

A joint resolution of the General Assembly of the State of Georgia ratifying and approving the proposed amendment to the Constitution of the United States relative to fixing the commencement of the terms of the President, Vice President, and Members of Congress, and fixing the time of the assembling of Congress

Whereas the Congress of the United States has, under the sixth article of the Constitution of the United States, proposed an amendment to the Constitution in the following words, to wit:

"JOINT RESOLUTION

"Proposing an amendment to the Constitution of the United States

"*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein)*, That the following amendment to the Constitution be, and hereby is, proposed to the States, to become valid as a part of said Constitution when ratified by the legislatures of the several States as provided in the Constitution:

"'ARTICLE —

"'SECTION 1. The terms of the President and Vice President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3d day of January of the years in which such terms would have ended if this article had not been ratified, and the terms of their successors shall then begin.

"'SEC. 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3d day of January, unless they shall, by law, appoint a different way.

"'SEC. 3. If, at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice President elect shall act as President until a President shall have qualified; and the Congress may, by law, provide for the case wherein neither a President elect nor a Vice President elect shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice President shall have qualified.

"'SEC. 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice shall have devolved upon them.

"'SEC. 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

"'SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission'":

Therefore be it

Resolved by the Senate and the House of Representatives of the State of Georgia in general assembly met, That the said amendment of the Constitution of the United States be, and the same is hereby, ratified and adopted; be it further

Resolved, That a certified copy of the foregoing preamble and resolution be forwarded by his excellency the governor, to the

Secretary of the State of the United States, to the President Officer of the United States Senate, and to the Speaker of the House of Representatives of the United States.

HAMILTON MCWHORTER,
President of the Senate.
JOHN T. BOIFBUILLET,
Secretary of the Senate.
E. D. RIVERS,
Speaker of the House.
ANDREW J. KINGERY,
Clerk of the House.

Approved January 23, 1933.

EUGENE TALMADGE, *Governor.*

STATE OF GEORGIA,
County of Fulton:

I, T. M. Linder, secretary of the executive department of Georgia, hereby certify that the foregoing is a true and correct copy of Senate Resolution No. 10 as approved January 23, 1933.

Witness my hand and seal this 1st day of February, 1933.

T. M. LINDER,
Secretary Executive Department.

EXHIBITION RIDE AT FORT MYER

Mr. REED. Mr. President, I send to the desk a letter, which I ask may be read.

The PRESIDENT pro tempore. The clerk will read, as requested.

The Chief Clerk read as follows:

HEADQUARTERS FORT MYER, VA.,
OFFICE OF THE COMMANDING OFFICER,
February 1, 1933.

Senator DAVID A. REED,
Chairman Senate Military Affairs Committee,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR: Upon the request of certain Members of Congress, it is the desire of the commanding officer and of the officers and men of Fort Myer, Va., to present a special exhibition ride for the Members of Congress, their families, and guests.

It is realized that the regularly scheduled rides on Friday afternoon take place at an inconvenient time, and, due to the large public demand for admission, they are crowded and troublesome to attend.

We have accordingly scheduled an exhibition ride at 4 o'clock on Saturday, the 11th of February, to be given in honor of the Members of Congress. The entire seating capacity of the riding hall at Fort Myer will be reserved for them. In an endeavor to make attendance as convenient and informal as possible, no individual seats will be reserved, but guests will be required to present an identification card from a Member of Congress of the United States.

It is hoped that, in extending this formal invitation through you, you will notify the Members of its provisions.

Very sincerely yours,

H. N. COOTES, *Colonel Third Cavalry.*

The PRESIDENT pro tempore. The communication will lie on the table.

PETITIONS AND MEMORIALS

The PRESIDENT pro tempore laid before the Senate the following joint resolution of the Legislature of the State of Wisconsin, which was referred to the Committee on Foreign Relations:

Joint resolution relating to the Great Lakes-St. Lawrence waterway

Whereas the people of the State of Wisconsin favor the development of the Great Lakes-St. Lawrence waterway; and

Whereas the undertaking of such a project at this time would afford employment to many thousands of workmen now unemployed; and

Whereas such a waterway would greatly benefit both industry and agriculture through lower transportation costs and would aid materially in the early restoration of economic prosperity; and

Whereas a treaty between the United States and Canada, making the development of the project possible, has been successfully concluded and but needs the ratification of the United States Senate: Therefore be it

Resolved by the Assembly (the Senate concurring), That the Legislature of Wisconsin hereby again indorses the Great Lakes-St. Lawrence waterway project and respectfully memorializes the Senate of the United States to at once ratify the treaty with Canada, and also memorializes the Congress of the United States immediately after ratification of the treaty to enact the necessary legislation for the beginning of work on this waterway; be it further

Resolved, That properly attested copies of this resolution be sent to both Houses of the Congress of the United States and to each Wisconsin Member thereof.

THOS. J. O'MALLEY,
President of the Senate.
R. A. COBBAU,
Chief Clerk of the Senate.
CORNELIUS YOUNG,
Speaker of the Assembly.
JOHN J. SLOCUM,
Chief Clerk of the Assembly.

The PRESIDENT pro tempore also laid before the Senate the following joint resolution of the Legislature of the State of Wisconsin, which was ordered to lie on the table:

Joint resolution relating to the 5-cent glass of pure beer, expected and desired by the citizens of Wisconsin

Whereas the legalization of beer manufacture and sale in the near future is virtually assured and there is danger of nullifying the benefits accruing to the farmers of Wisconsin from such legalization by the imposing of a Federal beer tax so high as to prevent the possibility of retailing beer at the popular price of 5 cents per glass, which would be contrary to the wishes and interest of the vast number of laborers in Wisconsin and the Nation: Therefore be it

Resolved by the assembly (the senate concurring), That the Legislature of Wisconsin respectfully and earnestly memorializes the Congress of the United States to refrain from imposing a tax in excess of $3 per barrel, thus allowing brewers and consumers, as well as the growers of barley and hops, the full benefit and freedom enjoyed before the advent of prohibition; be it further

Resolved, That properly attested copies of this resolution be sent to both Houses of the Congress of the United States and to the Congressmen and United States Senators from Wisconsin.

THOS. J. O'MALLEY,
President of the Senate.
R. A. COBBAN,
Chief Clerk of the Senate.
CORNELIUS YOUNG,
Speaker of the Assembly.
JOHN J. SLOCUM,
Chief Clerk of the Assembly.

Mr. COPELAND presented the petition of Frank Crumit, Shepherd of the Lambs, and sundry citizens, being members of the Lambs and associates, of New York City, N. Y., praying for the prompt passage without amendment of the so-called alien actors bill, being the bill (H. R. 8877) to clarify the application of the contract-labor provisions of the immigration laws to actors, which was referred to the Committee on Immigration.

He also presented resolutions adopted by local chapters of the Woman's Christian Temperance Unions of Marlborough, Port Byron, and Wellsville, in the State of New York, protesting against the repeal of the eighteenth amendment to the Constitution or the repeal or modification of the national prohibition law, which were ordered to lie on the table.

Mr. DILL presented a memorial of sundry citizens of Tonasket, Wash., remonstrating against the repeal or modification of the national prohibition law, which was ordered to lie on the table.

Mr. CAPPER presented resolutions adopted by the Woman's Christian Temperance Union of Chase and Frances Willard Chapter of the Woman's Christian Temperance Union of Leavenworth City, in the State of Kansas, favoring the passage of legislation to regulate and supervise the motion-picture industry, which were ordered to lie on the table.

Mr. McNARY presented petitions signed by 26,360 citizens of the State of Oregon (transmitted by Miss Maude M. Aldrich, field secretary, Federal Motion Picture Council in America (Inc.), etc.), praying for the passage of legislation to regulate and supervise the motion-picture industry, which were ordered to lie on the table.

Mr. BLAINE presented memorials of sundry citizens of Bear Creek, Clintonville, Excelsior, and New London, all in the State of Wisconsin, remonstrating against the repeal of the eighteenth amendment to the Constitution or the repeal or modification of the national prohibition law, which were ordered to lie on the table.

He also presented a joint resolution of the Legislature of the State of Wisconsin, indorsing the Great Lakes-St. Lawrence waterway project and favoring the prompt ratification of the treaty with Canada, which was referred to the Committee on Foreign Relations.

(See joint resolution printed in full when laid before the Senate to-day by the President pro tempore.)

Mr. BLAINE also presented a joint resolution of the Legislature of the State of Wisconsin, memorializing Congress in connection with proposed legalization of the manufacture and sale of beer "to refrain from imposing a tax in excess of $3 per barrel, thus allowing brewers and consumers, as well as the growers of barley and hops, the full benefit and

freedom enjoyed before the advent of prohibition," which was ordered to lie on the table.

(See joint resolution printed in full when laid before the Senate to-day by the President pro tempore.)

Mr. WALCOTT presented a resolution adopted by the Hartford (Conn.) Chamber of Commerce, opposing adoption of the so-called domestic allotment plan of farm relief, which was referred to the Committee on Agriculture and Forestry.

He also presented memorials of members of the Church of the Redeemer, and sundry citizens, all of New Haven, Conn., remonstrating against appropriating $2,500,000 for citizens' military training camps and $572,000 for the Organized Reserves under the War Department, which were referred to the Committee on Appropriations.

He also presented memorials and papers in the nature of memorials of Hannah Benedict Carter Chapter, Daughters of the American Revolution, of New Canaan; regents and treasurers of chapters of the Connecticut Daughters of the American Revolution assembled in annual meeting at New Haven; Brown-Landers Post, No. 77 (Inc.), the American Legion, of East Hartford; Tomalonis-Hall Post, No. 84, the American Legion, of Simsbury; "Somers" American Legion Auxiliary, of Somersville; the Lamson-O'Donnel Post, No. 46, of Goshen-Cornwall, the American Legion Auxiliary, of Torrington; and Gray-Dickinson Post, No. 59, the American Legion Auxiliary, of Windsor; all in the State of Connecticut, remonstrating against any reductions in appropriations for the Army, Navy, and marines, which were referred to the Committee on Appropriations.

He also presented a petition of sundry citizens of Hartford, Conn., praying for the passage of legislation limiting the hours of labor to 30 hours a week, which was referred to the Committee on Education and Labor.

He also presented petitions and papers in the nature of petitions of the American Legion Auxiliary of Westbrook; Treadway-Cavanaugh Unit, No. 64, of East Hampton; Gensi-Viola Unit, No. 36, of Windsor Locks; and Post No. 29, of Greenwich, all of the American Legion Auxiliary, in the State of Connecticut, praying for the passage of legislation known as the widows and orphans' pension bill, and also for the creation of a veterans' committee of the Senate, which were referred to the Committee on Finance.

He also presented petitions of sundry citizens of Hartford, East Hartford, Elmwood, Glastonbury, Manchester, South Manchester, Newington, and New London, all in the State of Connecticut, praying for the passage of the so-called Hatfield-Keller bill, providing retirement pensions to railway employees, which were referred to the Committee on Interstate Commerce.

He also presented memorials of sundry citizens of Danbury and Somers, in the State of Connecticut, remonstrating against the repeal of the eighteenth amendment to the Constitution or the modification of the national prohibition law, which were ordered to lie on the table.

He also presented the petition of the National Woman's Relief Corps, auxiliary to the Grand Army of the Republic, praying for the passage of the so-called Dies bill, being the bill (H. R. 12044) to provide for the exclusion and expulsion of alien communists, which was ordered to lie on the table.

He also presented a resolution adopted by the Socialist Party of New Haven, Conn., protesting against the passage of the so-called Dies bill, being the bill (H. R. 12044) to provide for the exclusion and expulsion of alien communists, which was ordered to lie on the table.

THE MERCHANT MARINE

Mr. FLETCHER presented an editorial from the Evening Star, of Washington, D. C., appearing in its issue of January 28, 1933, entitled "A Sound Policy," which was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

[From the Evening Star, Washington, D. C., January 28, 1933]

A SOUND POLICY

The Congress of the United States laid down a sound policy in the merchant marine act of 1920. It declared that—

"It is necessary for the national defense and for the proper growth of its foreign and domestic commerce that the United States shall have a merchant marine of the best equipped and most suitable types of vessels sufficient to carry the greater portion of its commerce and serve as a naval or military auxiliary in time of war or national emergency, ultimately to be owned and operated privately by citizens of the United States; and it is hereby declared to be the policy of the United States to do whatever may be necessary to develop and encourage the maintenance of such a merchant marine."

In pursuance of this policy, which was reaffirmed in the merchant marine act of 1928, the Congress has appropriated annually for the carrying of the foreign mails by steamships sums not designed to pay the mere cost of such transportation but sums calculated to aid in the establishment and maintenance of steamship lines flying the American flag on the seven seas. It has made loans at advantageous rates of interest to American shipping companies.

What has happened in consequence? America has a merchant marine that is constantly developing, with new vessels of a type capable of being used as auxiliaries of the Navy in time of war, vessels which can render in time of peace such service as to gain for them the carrying trade not only of this country but of others.

Annually, however, attacks are made upon the Government's announced policy of building an adequate merchant marine. They materialize when the appropriation bills come up for consideration in the Congress. And such a fight has recently been waged in the House and for several days has been in progress in the Senate. Those who believe in the development of the merchant marine prevailed in the House. They should prevail in the Senate.

The opponents of these mail contracts—which they dub "subsidies"—are no friends of American national defense or of American foreign commerce, although they would be horrified at the suggestion that they did not believe in either. They are playing into the hands of the foreign maritime nations which are competitors of the American merchant marine for the carrying trade. How did these foreign nations sweep the merchant vessels of the United States off the seas before the World War? By the granting of subsidies to their own vessels; by the payment of low wages to the seamen. The laws of the United States compel better treatment of the crews of the American flag vessels; they compel the employment of a certain percentage of Americans on the vessels, and thereby force higher wages. And now, in the name of economy, it is proposed to break down the policy and the methods adopted by the Congress to build up the American merchant marine. Can there be the slightest doubt that this is good news to the foreign shipping companies?

When Congress announced its policy toward merchant shipping in 1920 it had recently had a severe lesson. During the World War, when the country found itself without an overseas merchant marine, the stupendous sum of nearly $3,000,000,000 was expended to put a fleet of merchant vessels on the water. Millions were wasted in experimenting with wooden ships and concrete vessels in the effort to build quickly a fleet that could carry American soldiers and supplies abroad. American commerce suffered grievously at the outset of the World War because of lack of shipping. The carriers needed for the business of this country were withdrawn to the use of the belligerent nations. It seems utterly impossible that anyone would have this Nation return again to the state in which it was found when the war broke out in 1914, with no overseas merchant marine at all. Yet a withdrawal of the Government support as now proposed would not only prevent any further expansion of the merchant marine but would wreck many of the water carriers under the American flag.

VETERANS' NATIONAL LIAISON COMMITTEE

Mr. WALSH of Massachusetts. Mr. President, I desire to present a matter for the RECORD. As is well known, there is a Joint Committee on Veterans' Affairs considering possible economies in the veterans' laws. Yesterday a report of the committee meeting appeared in the press under the following headlines:

New bonus march on District of Columbia predicted. Communist tells Congress committee preparations are under way.

This morning I received a letter from one of the members of the committee known as the Veterans' National Liaison Committee that are arranging and planning for a veterans' march on the Capital, stating that the news article in question was not quite fair to that committee, the intimation being that the news article sought to give a communistic slant to this movement, when, as a matter of fact, it appeared in the testimony yesterday that of the five or more members of the committee only two are communists and the others claim and testified that they belonged to other political parties.

I ask, therefore, in fairness to one of the members of the committee who has written the letter and to the committee, that it be printed in the RECORD, together with the news article to which objection is made.

There being no objection, the letter and article were ordered to be printed in the RECORD, as follows:

NEW BONUS MARCH ON DISTRICT OF COLUMBIA PREDICTED—COMMUNIST TELLS CONGRESS COMMITTEE PREPARATIONS ARE UNDER WAY

A new march of veterans to the Capital to present former soldiers' demands to the expected special session of Congress was predicted to-day by Emmanuel Levin, member of the Communist Party, in testifying before the Joint Congressional Committee on Veterans' Affairs.

Levin appeared on behalf of the veterans' rank and file committee, an outgrowth of the left wing of the bonus army evicted from the Capital last summer by troops after two veterans had been killed by police.

"We can not say now whether there will be 10,000 or 50,000," Levin said, "but they will be here."

Pressed by Senator WALSH, Democrat, of Massachusetts, for details of the proposed march, Levin submitted to the committee the names of those laying plans for the demonstration.

He named James W. Ford, colored, communist vice presidential candidate in the recent elections; E. P. Wagner, of Pennsylvania, a member of the bonus army; Edward Williams, of Newark, N. J.; Albert G. Sellers, of Pennsylvania, a member of the left wing of the bonus army; Harold Hickerson, of New York City, one of the leaders of the "rank and file veterans," who came to Washington at the outset of the present session of Congress; and George Brady, formerly registration officer of the bonus army.

VETERANS NATIONAL LIAISON COMMITTEE,
Washington, D. C., February 2, 1933.

Hon. DAVID I. WALSH,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR WALSH: Attached hereto is a clipping from to-day's Washington Evening Star (Associated Press). The writer, George D. Brady, is the only one authorized to talk for this committee. It was I and not Mr. Levin who gave you the names of the members of this committee, and I took particular pains to say that I am an enrolled Democrat. You will notice that the Associated Press has given a decidedly communistic slant to the entire committee. This has happened too often to be excused as accidental. Errors of omission beautifully distort the committee and its work.

I hold no brief for the Communist Party. They have men, citizens, who run for public office on a public platform and are recognized as a political organization by our Government. They have a place on a ballot, the same as other parties. Why should two of the seven members of this committee be identified in the newspapers as political representatives while the political party identification of the others is ignored?

There is no line of demarcation, political, fraternal, or social, denominational or racial, as far as the work of this committee is concerned. That is and has always been a thoroughly American principle. All we ask of any veteran is, Has he an honorable discharge from the Army, Navy, or Marine Corps of the United States? I regret the necessity for reiterating these facts to you, but as a Democrat and a native-born American, I resent every attempt to classify me or the other members of this committee as anything but what we are. No newspaperman asked me for a statement about the plans of this committee, although they did interrogate Levin. I wonder why. The reason is quite obvious after reading this article.

May I urge you in fairness to this committee and the thousands of veterans they represent to make a statement to the press at once correcting the impressions that will be gained from such newspaper articles as this? Albert G. Sellers was a bona fide member of the Bonus Expeditionary Force and is national treasurer of the Bonus Expeditional Force Rank and File of America (Inc.). He does not belong to the "left wing" of any organization.

Thanking you for an early and an immediate reply,

Sincerely yours,

GEORGE D. BRADY, *Chairman.*

P. S.—The Veterans National Liaison Committee did not request that they be allowed to testify before the joint committee. Introduced in the fashion it was by the subtle questions as to political affiliations of its members addressed to a man speaking for an entirely different committee, it would seem only fair to this committee that it be allowed to make a statement for inclusion in the RECORD.—GEORGE D. BRADY.

REPORTS OF COMMITTEES

Mr. REED, from the Committee on Military Affairs, to which was referred the bill (S. 5363) to provide for the housing, feeding, and clothing of certain unemployed persons at military posts of the United States, reported it adversely.

Mr. FRAZIER, from the Committee on Indian Affairs, to which was referred the bill (S. 4589) to authorize the Secretary of the Interior to make payment of part of the expenses incurred in securing improvements in drainage project of drainage district No. 1, Richardson County, Nebr., and for other purposes, reported it with amendments and submitted a report (No. 1145) thereon.

Mr. WHEELER, from the Committee on Indian Affairs, to which was referred the bill (S. 5433) for the relief of certain settlers on the Fort Peck Indian Reservation in the State of Montana, reported it without amendment and submitted a report (No. 1146) thereon.

Mr. SCHUYLER, from the Committee on Military Affairs, to which was referred the bill (S. 4590) for the relief of Juan Apodaca, reported it with amendments and submitted a report (No. 1147) thereon.

Mr. COOLIDGE, from the Committee on Military Affairs, to which was referred the bill (H. R. 4368) for the relief of George W. McDonald, reported it with amendments and submitted a report (No. 1148) thereon.

Mr. REED, from the Committee on Military Affairs, to which was referred the bill (S. 5537) to convey certain land in the county of Los Angeles, State of California, reported it with amendments and submitted a report (No. 1149) thereon.

BILL INTRODUCED

Mr. JOHNSON introduced a bill (S. 5581) authorizing the Secretary of Commerce to dispose of certain lighthouse reservations, and for other purposes, which was read twice by its title and referred to the Committee on Commerce.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred as indicated below:

H. R. 913. An act for the relief of Charles W. Sumner;
H. R. 3626. An act for the relief of John I. Lowe;
H. R. 3905. An act for the relief of Maj. L. D. Worsham;
H. R. 7200. An act for the relief of William Chinsky;
H. R. 7593. An act for the relief of Louis Zagata;
H. R. 7687. An act for the relief of W. B. Ford;
H. R. 8216. An act for the relief of the First National Bank of Junction City, Ark.; and
H. R. 8800. An act for the relief of Laura J. Clarke; to the Committee on Claims.

H. R. 9955. An act for the relief of Lucius K. Osterhout; to the Committee on Military Affairs.

H. R. 698. An act authorizing the President to transfer and appoint Lieut. (Junior Grade) Arnold R. Kline, United States Navy, to the grade of assistant paymaster, with the rank of lieutenant (junior grade) in the Supply Corps, United States Navy; to the calendar.

H. R. 1709. An act for the relief of Burton Bowen;
H. R. 1710. An act for the relief of Raymond C. Bogart;
H. R. 5989. An act for the relief of John O'Neil;
H. R. 9166. An act for the relief of William E. B. Grant;
H. R. 9272. An act to correct the rating of John Huntz Roloff, Fleet Naval Reserve; and
H. R. 9473. An act for the relief of Olen H. Parker; to the Committee on Naval Affairs.

AMENDMENT OF EMERGENCY RELIEF AND CONSTRUCTION ACT

Mr. FLETCHER submitted amendments intended to be proposed by him to the bill (S. 5336) to amend the emergency relief and construction act of 1932, which were referred to the Committee on Banking and Currency and ordered to be printed.

AMENDMENT OF THE BANKRUPTCY LAW

Mr. FLETCHER submitted amendments intended to be proposed by him to the bill (H. R. 14359) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States," approved July 1, 1898, and acts amendatory thereof and supplementary thereto, which were referred to the Committee on the Judiciary and ordered to be printed.

AMENDMENT TO INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. FRAZIER submitted an amendment intended to be proposed by him to House bill 13710, the Interior Department appropriation bill, which was ordered to lie on the table and to be printed, as follows:

On page 6, to strike out lines 1 to 4, inclusive, as follows:

"EXPENSES OF INDIAN COMMISSIONERS

"For expenses of the Board of Indian Commissioners, $11,430, of which amount not to exceed $6,330 may be expended for personal services in the District of Columbia."

ANNUAL REPORTS OF THE PUBLIC UTILITY COMPANIES OF THE DISTRICT

Mr. CAPPER. I have here the annual reports of the public utility companies of the District of Columbia, which they are required under the law to make to the Senate. I present them to the Senate, and ask that they be printed in the usual form.

The PRESIDING OFFICER (Mr. FESS in the chair). Without objection, it is so ordered.

The order was reduced to writing, as follows:

Ordered, That the annual reports of the following-named public utility companies in the District of Columbia for the year ended December 31, 1932, heretofore transmitted to the Senate, be printed as a Senate document: Capital Traction Co.; Chesapeake & Potomac Telephone Co.; Georgetown Barge, Dock, Elevator & Railway Co.; Georgetown Gas Light Co.; Potomac Electric Power Co.; Washington Gas Light Co.; Washington Interurban Railroad Co.; and Washington Railway & Electric Co.

THESE TROUBLOUS TIMES

Mr. DAVIS. Mr. President, I ask leave to have printed in the RECORD an article by the Hon. Robe Carl White, the Assistant Secretary of Labor, entitled "These Troublous Times."

There being no objection, the article was ordered to be printed in the RECORD, and it is as follows:

THESE TROUBLOUS TIMES

By Robe Carl White, Assistant Secretary of Labor

In these days of national tribulation, following closely on a period of great prosperity, the facts concerning previous periods of major depressions in the United States since 1837 become vital when considering present economic conditions.

Many and varied reasons for the recurrence of periods of depression have been advanced by those treating of the subject. The student of finance ascribes financial reasons, such as currency and banking laws or the lack of them, and a faulty credit system; the student of commerce and manufacture—curtailment of credit, tariff, demands of the wage earner, overproduction; the student of agriculture—low prices, overproduction, drought, pestilence, tariff, high prices of farm machinery; the student of labor—low wages, long hours, working conditions, irregular employment; the student of government—the enactment or nonenactment of particular laws and the methods of enforcement; the student of social forces—social and moral influences.

While each of the above may play a part, the most powerful factor among the causes of all past depressions, as well as the one through which the country is now passing, is the cupidity of mankind, which when unleashed and started on the economic road termed "speculation" proves an irresistible force that sweeps aside established and accepted standards of business and life and carries man on to grave errors of judgment.

Then comes the penalty in loss of means and peace of mind.

A general business depression has usually followed a period of prosperity. Therefore, to get a true picture of an era of depression it must include the period preceding, for it is during this period the cause or causes of the depression are developed. There will be found a decided similarity between eras of prosperity, as well as between eras of depression.

THE BUSINESS DEPRESSION, 1837–1844

The depression beginning in the year 1837 followed a period of prosperity of several years' duration. Bear in mind that during this period the country was still in a pioneer stage—no railroads, no telegraph, no means of transportation other than by water and wagon roads. Agriculture was the main occupation of the people, with cotton and tobacco the principal products in the South, and wheat, corn, and cereals in the North. Crops were harvested by means of the scythe and cradle, and the grain was still threshed by the flail as late as 1833. New York was the main gateway for exports in the North and New Orleans in the South.

The census of 1830 gives the total population of the United States as 12,866,020. The Atlantic Coast and Gulf States were densely settled, with a scattered population only throughout the country west of the Alleghenies. The rapid progress of the westward movement into the Middle West States—Ohio, Indiana, Illinois, Kentucky, and Tennessee—reached the proportions of a land rush in the early thirties. Towns sprang into existence almost overnight. This great influx of people caused the rapid development of land, means of transportation, and extraordinary activity along all industrial lines. Many banks established in the new towns issued their own paper money without specie backing.

During this period London, England, was the financial center of the world and the main source of capital for investment in the United States. Philadelphia was the stronghold of American finance, with New York or Wall Street a secondary money center. The moneyed interests at Philadelphia, centering around one Nicholas Biddle, dominated the financial affairs of the United States. Biddle was a visionary type. He was careless regarding details, prodigal in making loans, and very lax in investigating conditions surrounding the loans made. He himself was a heavy speculator in cotton. Because of his prominent financial position, his example encouraged opportunists of every sort to enter the speculative field. It was easy to secure liberal advancements on enterprises of all kinds; to secure credit for supplies beyond the wants of the people and for investment in unproductive public land. The gambling spirit of adventure and a desire for sudden wealth prevailed throughout the Union. Thus this became an era of speculative ventures, with all classes eager to invest their money in almost every sort of proposition presented.

The Josephs Banking Co., of New York, originally organized with $20,000 capital and later increased to $400,000, was the representative of the Rothschilds of England. Following the example of Biddle, this firm plunged boldly into hazardous cotton and land speculations. President Jackson bitterly opposed what he called the dangerous tendencies of Biddle's bank and the objectionable character of the loans made by it. His opposition to the prevailing practices eventually culminated in the Government's refusal to renew the charter of the Biddle bank and a removal of the Government deposits. The bank, however, continued to operate under a charter secured from the State of Pennsylvania, and to make up for the lost prestige Biddle launched an even more liberal policy in credits and trade.

This was the condition in the United States in the years immediately prior to 1837.

For a number of years there had been a general overtrading with America on the part of English merchants and the creation of many joint-stock banks and companies for this purpose. This, together with the credits extended to East Indian trades, China, and South America, caused a great expansion of the Bank of England issues and precipitated the financial panic in England in the latter part of 1836. The tightening of the money market in England during and following this panic brought with it many failures and a general stagnation of business throughout England and other European countries, and in the United States.

The retardation of normal business and the bank failures in England closed the market for many of the products of the United States. This was particularly true of the market for cotton, which constituted from one-third to one-half of our total exports and was the foundation of the prosperity of the South. Cotton declined 50 per cent in price in 1837. The production of tobacco, sugar, and rice was also affected, but to a lesser extent.

The first evidence of the economic collapse during this era of speculation appeared in New Orleans and the South. Due to the decline in the price of cotton and the loss of much of the export trade, the cotton companies and the banks in New Orleans were compelled to close their doors, followed within a few days by the closing of nine-tenths of the business houses in the city of Mobile. When the news of the failure of the cotton companies and the banks in New Orleans reached New York, it forced the Josephs Banking Co. to close, which precipitated the panic of 1837. This panic was followed by the usual bank and business failures throughout the country and brought on a general dullness of business, continuing for about five years.

The three years subsequent to 1837 were a period of financial readjustment. Money did not become easier until the latter part of 1840. From that time on it continued growing easier until the depression was over, the first part of 1844.

Wages were fairly well maintained, probably due to the fact that it was not a manufacturing or industrial age and most of the labor was engaged in agricultural and allied pursuits. Furthermore, the wage earner, because of the vast undeveloped resources of the country at that time, was not confined to any particular spot, but could move to a new locality and engage in other and equally fruitful occupations.

Immigration

The volume of immigration to the United States prior to and during this era was moderate, and at no time reached 100,000 per annum. Though the volume was small and may not have had any particular effect upon the economic situation, it is interesting to note that immigration shows a drop of more than one-half in 1838, the first year after the start of the depression. The volume was much greater in 1839 and, with a few exceptions, increased each year thereafter until 1849, when it reached the high level of 297,024.

THE BUSINESS DEPRESSION, 1854–1859

Evidence of this depression appeared first in the year 1854. There was a slight recovery in 1856 and 1857, followed by a severe subsidence in 1858, with a return to prosperity in the latter part of 1859.

Money was fairly easy at the beginning of the period, tightened in 1857, and began growing easier again in the latter part of 1858.

The generally accepted cause of this business slump was the discovery of gold in California in 1848 and 1849. Thousands of men from all parts of the country joined in the rush to the gold fields. The influx of gold following the rush and the meteoric rise to great financial power of such men as Mills, Huntington, Flood, O'Brien, Blair, and others, inflamed the public mind and rekindled the latent spirit of adventure and speculation.

The development of the Greater West beyond the Alleghenies was especially rapid. Profligate land grants were made to prospective railroads. Railroad stocks and bonds and mining stocks of all kinds were eagerly absorbed by the public. Railroad construction was pushed forward with feverish activity and there was undue stimulation in practically all lines of industry. Credit was easily obtained. Bankers and financiers generously forwarded speculation. In fact, abuse of the credit system and the promotions of optimistic men were the most potent causes of the general business prostration following this speculative era. This era of activity caused the price of all kinds of property to reach a

point too unnatural to be permanently maintained, and the price of commodities to increase beyond their normal value. This extraordinary condition was continued and sustained somewhat by the Crimean War (1853–1856).

As President Buchanan said in his message to Congress in December, 1857: "Our financial history for the last 40 years has been one of extravagant expansions in the business of the country, followed by ruinous contractions. At successive intervals the best and most enterprising men have been tempted to their ruin by excessive bank loans of mere paper credit, exciting them to extravagant importations of foreign goods, wild speculations, and ruinous and demoralizing stock gambling. * * * Deplorable, however, as may be our present financial condition, we may yet indulge in bright hopes for the future. No other nation has ever existed which could have endured such violent expansions and contractions of paper credit without lasting injury; yet the buoyance of youth, the energies of our population, and the spirit which never quails before difficulties will enable us soon to recover from our present financial embarrassments, and may even occasion us speedily to forget the lesson which they have taught."

The panic of 1857, which was the beginning of the period of depression, was precipitated by the failure of the Ohio Life & Trust Co., of Cincinnati. This company had loaned $5,000,000 to the railroads alone. Subsequent to this failure many New York banks called their loans, which brought a financial crash involving most of the banks of the country. The collapse of the banks and the financial system during this depression brought about the enactment of national banking laws.

The revival of business came slowly until the Civil War (1861–1865) gave activity to all branches of trade.

Although the previous transfer within a short time of a great amount of labor from the States to the gold mines and to the country west of the Mississippi caused a rise in the price of labor, this depression was not accompanied by any great reduction in wages.

This period of depression was paralleled by a similar condition in England, Germany, France, Russia, and other European countries. The withdrawal by England and France of vast amounts of capital and of productive labor in the ordinary channels of commerce to carry on the Crimean War created an unfavorable influence on financial conditions in European countries and in the United States. Further, as affecting England, the great mutiny in India occurred in May, 1857, and the East India Co. was dissolved and the Government of India transferred to the British Crown in August, 1858.

Immigration

There was a distinct wave of immigration from Ireland and Germany during the years 1850–1854, due to some extent at least to famine conditions in Ireland and the political situation in Germany. In Germany these years constituted a period of petty despotism, to escape which great numbers of its people migrated to the United States.

Beginning with 1855 immigration decreased almost every year until 1862, after which it gradually increased to a new high level of 459,803 in the year 1873. The decline in immigration was probably due to a number of causes, among which are: The depression in the United States and the conditions prevailing prior to the outbreak of the Civil War, the political and economic conditions existing in Great Britain, Germany, and other European countries, and the Crimean War, which directly involved Great Britain and France and indirectly Germany and the other countries of Europe.

THE BUSINESS DEPRESSION, 1873–1878

This depression was very severe and extended in duration, and, as usual, followed the collapse of a speculative era. In an effort to stabilize industry and business following the Civil War the country plunged into an era of feverish activity in the development of its resources, particularly of the great West. The leaders of finance were again the promoters of railroad building, land speculations, and public improvements, which acted as a stimulus to iron, steel, and other allied industries.

The population, consisting of about 38,000,000, swallowed the deceptive bait and entered vigorously into great industrial, financial, and public undertakings. Even the most conservative men of finance and old establishments were deceived by visions of large profits and untold wealth and became promoters of almost every sort of enterprise, nonproductive as well as productive.

The life of Jay Cooke, one of the greatest and most influential bankers of the Civil War period, is typical of the trend of the times. Born in Sandusky, Ohio, the son of a lawyer, he started life as a clerk in a store, and at 18 entered the employ of a private banking firm in Philadelphia, where he displayed such ability in business and financial affairs that before the age of 30 he was taken in as a partner. Later he organized the private banking establishment of Jay Cooke & Co. in Philadelphia, which became one of the most powerful banking institutions in the United States. During the war he became known as the war financier through his successful efforts in floating the Government bond issues. After the war this conservative banker undertook the promotion of the Northern Pacific Railroad. He poured money into this enterprise with a lavish hand, taking its bonds as collateral. Inability to float the bonds abroad forced this great banking house to close its doors.

The closing of the doors of Jay Cooke & Co. precipitated the panic of 1873. It revealed to the public the hazardous methods used by promoters, bankers, and financiers in the many great development enterprises throughout the country, and caused a loss of confidence in the stability of all financial institutions. The disclosures of the Crédit Mobilizer scandal also had a far-reaching effect.

This panic was followed by a general industrial depression extending over several years, the alleged causes of which are as numerous as the economic writers treating of the subject. Among those given are land grants to corporations, expansion of credits, contraction and inflation of currency, suspension of specie payments, wages falling before the price of goods, extravagance induced by credit, immigration of Chinese, great inventions, inefficiency of labor, too small wages, land and railroad monopolies. All of these may have played some part, but the panic, followed by the depression, was the result of the collapse of an era of false prosperity—the desire of men to become rich through speculative methods rather than as the result of their own creative efforts.

Money was very tight in the United States in 1873 following the failure of Jay Cooke and the collapse of railroad speculations. The New York Stock Exchange was closed for 10 days. Money became somewhat easier in 1874 and 1875 and was exceedingly easy in 1876, although in the last-mentioned year there was a tremendous decline in railroad-stock prices after April, together with industrial slumps in the spring and autumn. Money continued easy in 1877, but it was not until 1878 that general business conditions showed more than temporary improvement.

While strikes and lockouts, through which labor sought to attain its objects, had previously occurred in various industries with more or less frequency, the first important railroad strike came in 1877 on the Baltimore & Ohio Railroad, followed by a similar strike on the Pennsylvania Railroad, caused primarily by a 10 per cent reduction in wages and general dissatisfaction with working hours and methods of reckoning pay. State militia called to the scenes of action failed to restore order and Federal troops had to be employed.

Wages were not generally affected during this depression. While there were some temporary reductions, wages not only remained constant but were actually higher at the end of the depression than at the beginning.

It is interesting to note that the 20-year period prior to this depression saw the formation of the first labor organizations on a nation-wide scale. The demands made by these various organizations were an 8-hour day, land grants to actual settlers, a national labor bureau, immigration restrictions, tariff reduction on the necessaries of life, abolition of prison labor, establishment of mechanics' institutes, reading rooms for workers, and cooperative stores. They pledged aid to women workers and attacked bad housing situations and the banking system.

The panic of '73 and the following depression were paralleled by panics and depressions in England, France, Germany, and Austria.

Immigration

During the period under discussion the bulk of immigration to the United States came from the United Kingdom and Germany; and again, as in previous periods of depression in the United States, immigration shows a sharp decline, caused not only by the unfavorable economic conditions existing in the United States but also by similar conditions in the countries named. Beginning with the year 1879, it gradually increased each year until a new high level of 788,992 was reached in the year 1882.

THE BUSINESS DEPRESSION, 1884–1886

The country enjoyed five years of prosperity following the depression ending in 1878, during which time the foundation was laid for the panic of 1884.

This prosperous period produced a new crop of promoters and speculative bankers, who, through the prestige of initial success and strong financial backing, were able to secure control of many of the railroad companies and other enterprises. As soon as control was secured the method usually followed was to greatly increase the capital stock and bonded indebtedness and to market these overvalued stock issues through widespread advertising and other promotion methods. When the day of reckoning came many of these promoters resorted to swindling schemes to cover their losses, such as issues of bogus stocks and bonds, misappropriation of funds, and defalcations. The overcapitalization of railroad companies caused the overstimulation of railroad construction and allied enterprises—iron, steel, mining, and public improvements.

The following illustrates the activities of the promoters and financiers of this era:

George Ingraham Seney, president of the Metropolitan Bank, organized what was known as the Seney Syndicate. He first made a fortune in the promotion of the Nickel Plate Railroad, selling out to the Vanderbilt interests. Later he gained control of the Ohio Central, East Tennessee, Virginia & Georgia, and the Rochester & Pittsburgh Railroads, all of which were used for speculative purposes. Huge stock issues in these railroads were floated by Seney through glowing promises and widespread advertising. Seney also used the exchange house of Nelson Robinson & Co., of which his sons were managers, in the promotion of his various projects.

Another banker who played a prominent part in the affairs of this era was John C. Eno, who, at the age of 26, through his father's influence, became president of the Second National Bank of New York. This inexperienced young man immediately saw visions of becoming the leading financial figure of the day, and plunged into all kinds of gambling and wild speculative ventures, using the great funds at his command for this purpose.

Two young men, Ulysses Grant, jr., son of ex-President Grant, and Ferdinand Ward, both inexperienced in financial affairs, or-

ganized the brokerage firm of Grant & Ward, with the banker, James Fish, president of the Marine Bank, as their silent partner. Ward was intrusted with the entire management. This young man proved to be a common gambler, unscrupulous, even dishonest in his dealings. He used the prestige of the ex-President's name to further his speculations. At first Ward's ventures were apparently profitable, but disaster followed his speculations at the beginning of the depression, and in order to cover his losses he resorted to huge swindles. When his speculations came to light it forced the closing of the doors of the Marine Bank, which had advanced large sums of money on the unprotected notes of Grant & Ward. The closing of the Marine Bank and the suspension of Grant & Ward precipitated the panic.

The failure of Grant & Ward also uncovered a series of thefts and bad speculations involving the Seney Syndicate, the Eno Bank, and many other financial institutions. It was found that Eno alone had misappropriated some $4,000,000. During these years even the most conservative financiers were drawn into moneyed conquests. Henry Morgan was caught in the slump of the Denver & Rio Grande; Russell Sage in the crisis of '84. Failures and defalcations occurred at intervals all during that summer.

While the panic of 1884 was more local and less severe than that of 1873, the collapse of the prosperous era again can be traced to the same frailties of human nature, namely, the people being swept away by optimism and led into speculations in all kinds of enterprises through the promotions sponsored by professional promoters and financiers.

There was a tremendous decline in stock prices following the money panic. Commodity prices continued very low through 1885, with a gradual return to prosperity in the year 1886.

The depression brought some reduction in wages, causing labor disturbances; coal strike in the autumn of 1884; anti-Chinese riots in 1885; Knights of Labor railroad strike and coal strike in March, 1886; and the Haymarket anarchists massacre in Chicago in May.

Contemporaneous depressions existed in England and other countries of Europe. There was a slow recession of business in England in 1883, followed by depression in 1884, 1885, and the first part of 1886, with a slow revival in the latter part of the year.

Immigration

The year 1883 witnessed the beginning of a marked change in the origin of immigration to the United States. Prior to that time over 95 per cent of all European immigrants came from the northern and western countries of Europe, with only a comparatively few from the southern and eastern countries. From the above date the ratio gradually changed, until in the year 1890 about 36 per cent of all immigration came from the southern and eastern countries of Europe.

At the beginning of this depression immigration showed a sharp decline and continued to decline until the low mark was reached in 1886, after which it gradually increased.

THE BUSINESS DEPRESSION 1893–1898

During the prosperous years following the depression of the eighties there was a decided upward trend in the promotion of monopolies, for the purpose of controlling the products of industry. Combinations and mergers were made or attempted in almost all lines of industry and trade. These monopolies or combinations were as usual accompanied by the creation of holding companies, price fixing and pool agreements, overcapitalization, overvaluation, excessive promotion costs. In order to finance the same, huge blocks of bonds and stocks, both preferred and common, were offered to the public at fictitious values, which brought about an era of wild speculation. The outstanding example of the period, illustrating generally the methods used, was the Cordage Trust, organized by James M. Waterbury, the failure of which is credited with having precipitated the panic of 1893.

The National Cordage Co. was originally organized in 1887 as a private combination of a few leading manufacturers of rope and twine to purchase and control the raw material used. Promoters, bankers, and stock-market interests were at first excluded. Later, in order to control the entire industry, the company was changed into a public corporation, with capital stock of $15,000,000, divided into one-third preferred and two-thirds common. The common stock was issued to the promoters and placed in the hands of Waterbury & Co. under a trust agreement. The preferred stock was offered to the public through the firm of August Belmont & Co. and other professional promoters. The administration of the stock pool which was formed was placed in the hands of James R. Keane and several New York bankers who were interested in the success of the pool.

Through the activities of Keane and the use of extravagant financial statements issued by the company, the stock was forced up from $73 a share at the time the pool was formed to $142 a share in December, 1892. The pool was liquidated and the profits divided early in 1893. During this same time the company had incurred great losses in its efforts to control and market the raw material, hemp and sisal. Notwithstanding such losses and the lack of revenue, the company continued to pay 8 per cent on the preferred stock and 9 per cent on the common stock. Moreover, the company had, in January, 1893, declared a 100 per cent stock dividend and increased the common stock from $10,000,000 to $20,000,000.

The book value of the subsidiary plants was marked up to correspond with the inflation of the capital assets, and glowing statements were issued to the effect that the preferred stock would be placed on a 10 per cent dividend basis and the new common stock on a 7 per cent basis. Furthermore, the company had already borrowed on demand loans and short-term initial notes upwards of $5,000,000 from New York and New England banks. Rumors of the company's actual condition began to reach the public. In the face of these conditions, the company undertook to market a new issue of stock, which failed. Within a few days, with its stock values disappearing and its credit destroyed, the company collapsed and a receiver was appointed. The stock of this company had been one of the leaders on the stock exchange, and its failure carried with it three stock exchange firms.

The failure of the Cordage Co. uncovered the manipulation of stock pools, the juggling of figures in financial statements, and disclosed the many questionable methods used in many other concerns as the failures multiplied in the panic of 1893, resulting in a complete loss of public confidence in the affairs of big business.

The panic of 1893 was one of the most severe financial disturbances the country had experienced, with suffering perhaps the greatest in the West. Commercial failures continued above the average for several years. The darkest point in the depression came with the failure of the Erie Railroad and the suspension of the Milwaukee Bank. Industries fell off 60 per cent within five months. This was brought about to some extent at least by the unfavorable working of the silver coinage law, which necessitated a special session of Congress, at which the law was repealed. However, it soon became apparent the silver coinage law was not alone responsible for the previous panic, and its repeal by Congress came too late to restore confidence. In fact, money trouble was the manifest peculiarity of this long-drawn-out depression. Commodity prices fell to a low level. Wages were reduced. Unemployment became general and many large cities were compelled to provide public relief. Labor strikes and riots occurred, the most conspicuous being the A. R. U. railroad strike in 1894. Distress was increased for the agricultural classes in that year by the failure of the corn crop and the decline in European demand for wheat.

The first part of 1893 found business and financial conditions abroad far from satisfactory. England and the European countries were in the throes of a depression of their own. The depression in England started with the failure of Baring Brothers in 1890, and continued until 1896. The failure of the National Bank of Australasia and a doubt concerning the outcome of currency legislation in this country caused an uneasy feeling in the London markets. Rates of foreign exchange were very high and gold was steadily exported. The United States Treasury, to stem the outward flow of gold, proposed that the United States banks loan the Treasury $50,000,000 in gold. This action caused a severe contraction in mercantile credits and a tightening of the money market.

There was a temporary revival of business in the United States in 1895, but a further recession immediately followed the President's Venezuelan proclamation in December of that year. A recession also occurred during the campaign of 1896, when abolition of the gold standard became a political issue. Retention of the gold standard following the presidential election in 1896 brought a return of prosperity, which grew to boom proportions in 1899.

Immigration

The percentage of immigrants coming from the southern and eastern countries of Europe continued to show a large increase from 1892 to 1899. In the latter year 66 per cent of all immigration came from these countries, as compared with 36 per cent in 1890.

During this depression immigration shows a gradual decline to the low level of 229,299 in the year 1898, after which it gradually increased.

THE BUSINESS DEPRESSION, 1907–1908

During the prosperous years from 1899 to 1907 the United States witnessed great strides in the accumulation of national wealth and in the growth and size of business units. It was an era of promotions and rapid expansion of manufactures and the development of the great and varied resources of the country, such as iron, copper, lead, zinc, coal, oil, water power, and agriculture. It was also a period of rapid development in new lines of endeavor—electric power, interurbans, telephone, radio, bicycles, automobiles. At the same time the country witnessed titanic struggles between various banking and financial groups to control these vast enterprises.

The formation of the United States Steel Trust, conceived by Gary and financed by the banking house of Morgan & Co., was successfully accomplished in 1901. The great struggle between the Harriman railroad interests of the Southwest and the Hill interests of the Northwest for mastery of the railroads west of Chicago resulted in the famous corner in Northern Pacific stock in 1901. This last conflict brought a depreciation in other stocks, resulting in a Wall Street panic of short duration. The outcome of this struggle was the organization of the National Securities Co., a holding corporation to control the securities of the properties in controversy. The right of a holding corporation to control the stocks of competing railroads was successfully challenged by the Government and an order of dissolution secured.

Then there was the great growth of the Westinghouse Co., the combinations in the bicycle industry, the reorganization of the New England cotton-yarn companies, the cotton-duck consolidations, the asphalt consolidations, the United States shipbuilding combination, the American Glue Co., the National Salt Co., the steel and wire combinations, and many others. The last mentioned led to the famous Tennessee Coal and Iron combination,

which was eventually absorbed by the United States Steel Corporation.

As a consequence, this was a period of excessive speculation. The rapid growth in the size of business units led naturally into some form of combination, but the great combination movement really began during the revival of business after the depression of the seventies. The first combinations formed were called pools, which were used in the distillery industry, the iron and steel industry, and cordage. This was followed by the formation of trusts, started by the Standard Oil Trust of 1879, reorganized in 1882. The trust form of organization remained in favor until about the year 1897. The most outstanding examples were the Standard Oil Trust, the Distillery Trust, and the Sugar Trust. During the nineties this form of organization was declared illegal and was followed by the creation of holding corporations, consolidations, and mergers.

There has always been an inherent opposition to monopolies on the part of the people of the United States. Even prior to 1860 the States were afraid of corporations, believing they possessed monopolistic powers. The same opposition was displayed toward trusts and holding companies. At first State control and regulation were attempted, but were found to be ineffective. The passage of the interstate commerce act of 1887 was the first effort of the Federal Government to control railroads. This was followed in 1890 by the enactment of the Sherman antitrust law, for the control and regulation of all kinds of big business. Many suits were brought under this last-named statute. In fact, the period under discussion became known as the "trust busting" period. The Government failed to secure an order of dissolution against the United States Steel Corporation, but succeeded against the Northern Securities Co., and later secured orders of dissolution against the Standard Oil Trust and the American Tobacco Trust. However, the Government's effort to regulate competition by orders of dissolution eventually failed, because it was found that through the use of interlocking directorates the control still remained in the hands of the few.

One of the prevalent theories at this time was that publicity would do much to curtail the abuses and unfair practices of big business, and to this end the Government established a Bureau of Corporations in the Department of Commerce and Labor in 1903. However, in spite of publicity by this bureau, by Government litigation, and by various investigating committees, of which the famous Armstrong insurance committee of the New York Legislature was the outstanding example, pools, mergers, and combinations of all kinds continued to thrive.

The formation of business combinations and mergers by various promoters brought many conflicts of interests, and since financial backing is a necessary adjunct to such promotions the formation of rival financial groups naturally followed. The rivalry thus created in the last analysis resulted in a bankers' war, culminating in the panic of 1907.

The most successful promoters of the period were the great banker, J. Pierpont Morgan, and his associates, Robert Bacon and George W. Perkins, of the J. P. Morgan Co.; William Rockefeller and Henry H. Rogers, of Standard Oil; Frick and Gary, of steel; J. J. Hill, of the Great Northern Railroad; James Stillman, president of the National City Bank, and others. Some of the successful promotions of this group were railroad mergers, the United States Steel Corporation, and Amalgamated Copper.

A secondary group of outstanding promoters of the period were John W. Gates, with his Steel-Wire Trust and Tennessee Coal & Iron Co.; Heinze, with his United Copper Co.; and Morse, with his shipbuilding corporations.

J. P. Morgan, with his associates, controlled the most powerful group of banks in America, and in addition had powerful foreign banking connections. Not being able to use the Morgan financial institutions for their purposes, Gates, Heinze, and Morse were instrumental in building up a formidable chain of banks, of which the Knickerbocker Trust and the Trust Co. of America were important links.

Gates had incurred the bitter enmity of Morgan by a deal involving the Louisville & Nashville Railroad. Knowing that the Morgan group needed this railroad to protect their other railroad interests, he quietly purchased control, thereby forcing Morgan to buy at his price. Gates followed this by organizing the Tennessee Coal & Iron Co., which among other things controlled great beds of iron ore coveted by the United States Steel Co. Heinze had incurred the bitter enmity of Rogers and the Standard Oil group by his manipulations in the copper industry and his organization of the United Copper Co. in opposition to the Amalgamated Copper interests. Morse, who had a genius for organization, with his shipping combinations and his chain of banks, was also in disrepute.

The financial warfare carried on between these groups of promoters and bankers was not open warfare. In fact, such warfare is never conducted in the open. The usual strategy employed is to carefully withhold from the public (which is but a pawn in all such conflicts) authentic information and disseminate misinformation through rumors arising from mysterious sources. The general directing the attack is seldom known until the enemy is routed. This warfare was no exception to the rule. Bear raids started on the stocks of the Gates-Heinze-Morse enterprises (preceded by rumors tending to destroy their credit. After the bear raids had succeeded in deflating the prices of the stocks involved, the attack was shifted to the financial institutions carrying their collateral.

In 1907, at the psychological moment, the more conservative bankers agreed to call all loans on securities of enterprises associated with the Heinze-Morse banks, which eventuated in the closing of the doors of the Knickerbocker Trust and precipitated the panic. Later the Trust Co. of America, which held the collateral of the Tennessee Coal & Iron Co., was forced to suspend. Gates, Morse, and Heinze were all driven from Wall Street, and the Tennessee Coal & Iron Co. was taken over by the United States Steel Corporation, this last on the theory that it was the only way to stop the panic of 1907. After this transfer the warfare ceased, but it took a year to recover from the harmful effects of man's manipulation of the financial and credit fabric of the country.

The alleged causes of the panic of 1907 and the following depression are many and varied, and while the foregoing is only a sketchy picture of the methods used by bankers and promoters during the period leading up to the depression, yet it is apparent that these men and their manipulations materially affected the situation. Excessive speculation, stock manipulation, gambling, overcapitalization, and abuse of credit, as disclosed by the many failures among both the financial institutions and commercial enterprises, destroyed public confidence, paralyzed industry, and stretched the credit system of the country to the breaking point.

The depression brought a sharp decline in commodity prices and a reduction in wages, also a sharp decline in railroad and industrial stocks and bonds, the bottom being reached in the summer of 1908. Money was very tight the latter part of 1907 and did not ease up until the latter part of 1908. Good crops throughout the United States aided in a revival of business and a return to prosperity in the latter part of 1908 and 1909. This depression was accompanied by a similar condition throughout the nations of the world.

Immigration

This was also a period of heavy increase in immigration, the peak being reached in 1907, when 1,285,349 arrived. The great bulk of the immigration of the period came from the southern and eastern countries of Europe, caused to some extent at least by the great expansion of our manufactures, the old type of common labor being replaced by labor from these countries. The great influx of this new type brought immigration questions to the fore, and in 1907 the first basic immigration law was enacted. It provided for the exclusion of the mentally, morally, and physically unfit, also the exclusion of contract laborers. There was a sharp decline in immigration in the year 1908, and it continued on a lower level during 1909, with a sharp increase to more than a million in 1910. There was another sharp decline in 1911 and 1912, probably due to the Italian-Turkish and Balkan Wars. Immigration increased again to above the million mark in the years 1913 and 1914.

The World War interrupted European immigration, and it was not resumed on a large scale until the year 1920. Following the World War there was every indication that unprecedented numbers would come to the United States as soon as means of travel could be reestablished, and an unmistakable demand for immigration restriction came from all parts of the country. European immigration jumped from 24,600 in 1919 to 246,000 in 1920 and 652,000 in 1921, thus rapidly nearing pre-war proportions. In the latter year, and at a time when Congress was considering the immigration problem, approximately 5,000,000 persons were unemployed in the United States, and when it is borne in mind that every passenger ship coming from Europe was bringing large numbers who would be compelled to seek a livelihood in an already overcrowded labor market, it is not to be wondered at that Congress passed the first restrictive immigration law, known as the 1921 quota law, which fixed a definite number who might come from any country annually. This law was superseded in 1924 by the present immigration quota act, under which law by presidential proclamation the revision of the quota of each respective nationality fixed the limit on European immigration at 153,714. Since the enactment of the quota act referred to European immigration has been nominal and not an important economic factor. During the present business depression through additional laws and Executive orders it has been reduced to the disappearing point.

THE BUSINESS DEPRESSION, 1921–22, AND THE BUSINESS DEPRESSION, 1929

For several years following the depression of 1907–08, or until the year 1914, the country enjoyed moderate prosperity. The conduct of business was on more conservative basis. Credit was more carefully guarded and promotions and speculation were at a low ebb.

This trend to conservatism was due partly to the lessons learned from the disclosure of the methods of big business during the preceding panic and to the Government's final success in securing orders of dissolution in 1911 against the Standard Oil Co. and the American Tobacco Co.; the establishment of the Federal reserve system on December 23, 1913; the creation of the Federal Trade Commission in 1914; and the enactment in the same year of the Clayton Act, which was presumed to broaden the scope of the Sherman antitrust law. At the same time, other factors unquestionably entered into the situation. The lack of accord among the nations of Europe, with many rumblings and rumors of wars, made it apparent that world trouble impended. The uncertainty of future events in world affairs had a decided deterrent effect on speculation and new ventures.

This was about the condition in the United States when the assassination of Archduke Francis of Austria and his wife on June 28, 1914, was flashed to the world. This proved to be the spark which started a world conflagration. Austria declared war against Serbia on July 28, 1914. Events moved rapidly thereafter, until within an incredibly short time all the nations of the Eastern Hemisphere were involved. Foreign business was tempo-

rarily paralyzed. The London Stock Exchange closed. Following these European events the New York Stock Exchange, on July 31, 1914, for the second time in the history of our country, closed its doors for a period of four months. This caused a mild panic and a slight depression of a few months' duration, or until the European demand for munitions and war supplies started the wheels of industry. This demand grew rapidly during the years 1915 and 1916, resulting in extraordinary activity in the manufacture of war supplies. Many new industries allied or related to war munitions and war materials were established, such as munitions factories and workshops, and the dye industry. Huge profits flowed into the hands of all engaged in these industries. The number of those employed increased rapidly, with a gradual elevation of the wage scales. At the same time there was a decided rise in the prices of foodstuffs and commodities both in Europe and the United States.

Following our entry into the war, April 6, 1917, the country went immediately upon a war basis. The existing order of things was changed overnight. The President was given war emergency power. All our resources, all our activities, became subject to control by the Executive through the various departments of the Government and the many newly created boards and commissions, such as the Council of National Defense, War Industries Board, War Trade Board, War Finance Corporation, United States Food Administration, United States Fuel Administration, aircraft boards, Emergency Fleet Corporation, Bureau of War Risk Insurance, Alien Property Custodian, and the Committee on Public Information.

After the power of government was centralized in Washington, in order to train, equip, and feed the great army of several millions which was mobilized, it became imperative that all our resources of every kind and description be immediately available. Civilian labor, both male and female, was also mobilized to provide the maximum output of farm and factory. The country plunged into great activity along all lines. Values skyrocketed. War prices, with large profits, prevailed in all lines. Wage rates increased far beyond those paid in peace time. Time instead of cost was the essence of Government contracts, which were let on easy terms assuring generous, even exorbitant profits. As in all such emergencies, many men took advantage of the situation and war profiteering became quite prevalent.

For a period of years previous to the World War the efforts of the Government had been directed toward the elimination of abuses and the control of big business without the Government entering the field of private business. During the war, as a war emergency, the Government reversed this policy and financed or took over many private enterprises. The outstanding example was the railroads, taken over December 26, 1917.

The Committee on Public Information, under the direction of its chairman, became a powerful factor in shaping public opinion and guiding it into new channels. It set up a rigid censorship and made effective use of propaganda and high-powered salesmanship to unify public thought in furtherance of national proposals, such as Liberty-loan drives, speeding up production, mass production, mass consumption, standardization, conservation, the sacrifice of individualism for the collective good. Under such a stimulus the wheels of industry hummed to maximum capacity. The farm produced more than ever before in the history of the country. Feverish but well-directed activity prevailed in all lines. The entire life of the Nation was changed from one of individual methods of seeking prosperity and happiness into a collective whole, imbued with the belief that the cause was righteous and just and that the sacrifice of old standards of life and government was necessary for the good of humanity.

The signing of the armistice, November 11, 1918, caused a slowing up in all activity. The next few years constituted an era of readjustment, during which the gigantic task of demobilizing and returning to their homes and peace-time vocations the great army of soldiers and the vast number of industrial workers, the winding up of war activities, and the severance of the Government from control and management of private business was carried out. Obviously this work of readjustment could not be accomplished without disturbing the economic conditions. The labor market became overcrowded and many thousands were without employment, which, together with overproduction, the unsettled condition of industry, and the price decline in 1920 and 1921, led to the depression of those years.

The quick change from a war-time to a peace-time basis left the public mind in a state of flux. The World War had tended to upset old standards and implanted in their stead new ideas and new theories. Millions of men and women had been uprooted from their homes and communities, with their well-ordered course of life, and thrown into a strange new world and strange surroundings. Even the Army had been mobilized along new lines. While conscriptions and enlistments were local in character, the boys were distributed throughout the Army as a whole, with no home associates. There was a decided breaking down of home ties, marital relations, and the old stories of morality. The war period had also brought to the fore new methods in business. Industry had been drifting toward quantity or mass production, but the war caused it to assume major proportions.

In the readjustment period following the close of the World War the effect of the use of war propaganda remained with the people. They had witnessed the suspension of the Sherman antitrust law, the Clayton Act, and many other laws enacted for the control of big business in which they had long believed, and the change in the functions of a number of bureaus and independent establishments created for similar purposes. They had watched with keen interest the success attending the Government's efforts to unify and bring under one control all the great industries and financial institutions of the country. At the same time they had been deeply affected by the liberal views emanating from the so-called intelligentsia regarding old standards in business and social life. Under this new régime in the business and social affairs of the Nation, carried on during the war, they had witnessed the great rise in values of real property, the enormous increase in profits and wages. All these things had had a deep and lasting effect, and it is not to be wondered at when the war ceased the people were inclined to discard the old and cling to the new.

This condition of the public mind, following the close of the World War, was seized upon and used by promoters and financiers, who for a number of years had not been permitted to operate without a certain amount of Government restraint. During the war, due to the high cost of construction, the building program of the country had been neglected and there was a great shortage in housing and buildings of all kinds. It was estimated there was a shortage in dwellings alone of over a million. In face of the sharp decline in price of farm land to a low level in the years 1920 and 1921 and the resulting serious condition of the agricultural interests during the depression of 1921 and 1922, the country started on a huge building program, encouraged and spurred on by the war method of propaganda. This program checked temporarily the depression and brought a return to moderate prosperity. At the same time, promoters, bankers, financiers, speculators, and gamblers, realizing that there was no longer a restraining hand, backed by the sentiment of the country, started the people on an era of mergers and combinations which continued until the panic in the fall of 1929. They were permitted a free hand. No effective attempt was made to limit or control the securities offered to the investing public, the issue of capital stock and bonds, or to the manipulation of values. As a result we had mergers and combinations of every kind and description—automobile, radio, airplane, moving pictures, financial institutions, chain stores, chain banks, water power, shipping, oil, combinations for buying and selling commodities, and many others. The capital stock of these mergers was immediately placed upon the stock exchange and became the subject of speculation and stock gambling. Through the use of propaganda and high-powered salesmanship the public was ballyhooed into the purchase of stocks until speculation and gambling became almost universal.

At the same time this orgy of speculation and gambling was spurred on by so-called college economists, who pictured a coming business millennium. Tons of literature along this line were broadcast throughout the country. Another class of so-called intelligentsia immediately seized the opportunity to foist upon the world every sort of an ism, with the result that the most impractical and dangerous theories of government and of life were dressed up in fine verbiage and disseminated to the people through various channels—publications, lectures, moving pictures, radio. A spirit of optimism carried everything before it and caused the people to go on a prolonged and delirious spree of speculation and spending, during which they lost sight of the old standards upon which this country has been built—hard work, the sanctity of the home, reverence for church and state, honesty, integrity, and morality. During this delirium the wage earner saw no limit to his earning capacity, the business man no limit to his profits, the speculator and gambler no limit to his ill-gotten gains. Selfishness, licentiousness, greed, and avarice were the order of the day.

The optimism prevailing was contagious and spread to all classes. The spirit of speculation infected even the bankers of the country. The lure of high interest and big commissions swayed their judgment. The result was great abuses in the extension of credits. The accumulation of great quantities of overvalued collateral in the vaults of banks and financial institutions was the inevitable outcome of this era of overvaluation, overcapitalization, stock dividends, and the pyramiding of paper values. Further, these financial institutions, either directly or through their control or connection with bond and brokerage houses, were responsible to no small degree for turning upon the country a flood of propaganda and an army of salesmen for the purpose of disposing of the myriad of securities with which the country was being inundated. In fact, the financial institutions were the hub around which these securities were floated and into the coffers of which the high rates of interest and commissions fell.

A new element of major importance entered into the financial situation. It savored of romance and appealed to national pride. Prior to the World War there had been comparatively few international bankers, although the financial world had been growing more and more internationally minded. However, during the war this growth was rapid, caused by the Government itself handing out to foreign governments with a lavish hand what were known as "war loans." These war loans focused the eyes of the nations of the world upon the apparently inexhaustible supply of money in the United States. Beginning with the armistice and continuing for a number of years thereafter almost every country of the world applied to the banks of this country for loans, offering high rates of interest and large commissions. This caused the bankers of the United States to have visions of world financial power and overshadowed to a great extent the importance of domestic finance. Huge foreign loans were made and the bond issues floated in the United States. It became necessary to form combinations of financial institutions, with huge capital stock, and then resort to the usual propaganda and high-powered salesmanship to dispose of the bond issues. In this way almost every banker and investor was inveigled into the speculative net. The

flooding of this country with foreign bonds and securities was probably the final straw that broke the camel's back, and the huge financial structure, built on false values and insecure loans, toppled and crashed in October, 1929.

This collapse was the forerunner of the greatest stagnation of business the country has ever experienced. It brought widespread unemployment, a sharp decline in prices to a low level, and a general reduction in wage scales. The business paralysis thus brought about calls for a readjustment of all enterprises on the basis of revenue and actual values, and the elimination of all speculative values that have entered the business and financial structures of the country. It means also a complete readjustment of national thought and national life. It means the relinquishment of the beautiful dream of a world financial domain and the coming of a business and social millennium, held out to the people over a period of years by impractical visionaries. It means that big business, as well as the individual, must charge off to loss all fictitious values. It means a return to old standards of honesty, integrity, and hard work. It means that many of the so-called luxuries of life and the pleasures and dissipations that usually accompany them must be given up. And, above all, it means discarding false prophets and false teachers. This can not be done in whole or in part without great suffering, hardship, and self-sacrifice. There is no panacea in a great national financial crisis like the present. As always, the masses, who are the least responsible for such conditions, are the first to suffer, but they are also the first to readjust themselves and accept the new conditions. The last to accept the inevitable and begin on a new basis are the few who through greed and desire for power were responsible for leading the people into such a crisis and were the principal beneficiaries during the continuance of false prosperity.

What we need is a nation-wide revival—a renaissance—not in the church alone but in business, in government, in the home, in school and college. The country is fundamentally sound; its great resources are essentially unimpaired; the inventive genius and adaptability of the people remain; and when this depression passes away, as it soon will, the men and women of this Nation will go forward with renewed faith and courage to help build a better and happier civilization.

A 5-YEAR MORATORIUM FOR THE MACHINES

Mr. DAVIS. Mr. President, I ask leave to have published in the RECORD an editorial appearing in the Altoona (Pa.) Tribune of February 1, 1933, entitled "A 5-Year Moratorium for the Machines."

There being no objection, the article was ordered to be printed in the RECORD, and it is as follows:

A 5-YEAR MORATORIUM FOR THE MACHINES

In this column it was contended long ago that the machines were responsible for most of the world's misery. Some claimed that the struggle between man and machines had been going on for a hundred years, and the general adoption of the machines would result in "more leisure for labor for culture."

Leisure for culture is all right if you can sit in the warm library of a club and pore over your favorite author, but on an empty stomach before an empty stove culture becomes an empty dream.

In the old days the increase of machinery did not do much harm when only a few nations had it and there were new world markets to conquer. Now, with every country overproduced and markets glutted, overstocked, and saturated, the machine presents only a hideous menace for the future.

Instead of everybody sitting idly by waiting for "prosperity's return," a demand must be made for the recomposition of the world's economic fabric. A 5-year plan that might work wonders and not be a ghastly failure, like the Godless machine-based one in Russia, would be to forbid the installation of new types of machinery for five years. Another better form of the 5-year plan would be to prohibit the use of all machinery in factories for five years. This would get all of the unemployed back to work, and perhaps in five years the world would have grown into itself and machines to a limited extent be permitted again. Merely to ban the introduction of new machines may not be sweeping enough to catch up and save all the present idle, indigent wrecks left by the machine age to date.

Handmade goods are better goods and entail a dignity to labor. The machine has cut out the pride of one's work and dulled the self-consciousness of the workers.

An English economist says that in the Pennsylvania brick industry, for example, one workman could make by hand 450 bricks per day. Now, by machinery, he can make 450,000 bricks, or enough to erect a building of considerable size, and all the other hands who contributed formerly are idle.

The world owes a living to every man who is willing to work; that adage is as old as labor itself. A 5-year plan to bring peace and plenty by giving every man a job is not radical, it is not revolutionary, it is not socialism; it is merely decency and human good will.

Vast concentrated wealth has come in the wake of the machines, but it is in the hands of the few who are now giving it back in relief funds. How much better to get rich less quickly and give your fellow being a square deal and a job.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Haltigan, one of its clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13607) to authorize the distribution of Government-owned cotton to the American National Red Cross and other organizations for relief of distress.

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

The PRESIDENT pro tempore. The question is on the motion of the Senator from California [Mr. JOHNSON].

Mr. BLAINE. Mr. President, I offer an amendment to the pending amendment, which I ask to have stated.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The CHIEF CLERK. On page 2, section 2, the Senator from Wisconsin moves to amend by striking out lines 7 to 12, both inclusive, and inserting in lieu thereof "articles of the growth, production, or manufacture of the United States."

Mr. BINGHAM. Mr. President, I desire to give notice of an intention to move to reconsider the vote whereby the Senate adopted the amendment offered by the Senator from Colorado [Mr. COSTIGAN] yesterday to the amendment of the Senator from New Mexico [Mr. BRATTON]. I am permitted to do this because I did not vote at that time.

May I say, in explanation, that after giving the matter careful study and consulting with a number of people it appears that the amendment of the Senator from Colorado would cause very severe hardship, in that it would make it necessary for any department head or bureau chief facing the necessity of a 5 per cent reduction in view of the so-called Bratton amendment to discharge employees, whereas at the present time he would be permitted to give them administrative furloughs.

According to a table which was prepared for the Economy Committee by the Civil Service Commission, about half of the departments and offices have taken advantage of the administrative furlough in order to save the necessity of discharging employees.

Under the so-called Costigan amendment it would be necessary for them to discharge employees if they were unable to save their 5 per cent by purchasing less materials. Without the Costigan amendment the 5 per cent reduction might be achieved in such an office, for instance, as that of the Comptroller General—where practically all of the expenses are for services—by granting a certain number of administrative furloughs, and thereby keeping people somewhat at work, even at a less rate. Under the Costigan amendment, however, it would be necessary to increase the number of unemployed.

Therefore at the appropriate time I shall move to reconsider the vote whereby the amendment of the Senator from Colorado to the amendment of the Senator from New Mexico was adopted.

The PRESIDENT pro tempore. The motion to reconsider will be entered, and may be taken up at the convenience of the Senator.

Mr. BINGHAM subsequently said: Mr. President, earlier in the day I entered a motion to reconsider the vote by which the amendment of the Senator from Colorado [Mr. COSTIGAN] to the amendment of the Senator from New Mexico [Mr. BRATTON] was adopted. I understand that that must be accompanied by a motion to reconsider the Bratton amendment to which it was an amendment. Therefore I also enter a motion to reconsider the vote whereby the Bratton amendment was agreed to.

Mr. WALSH of Montana. Mr. President, some strictures were indulged in yesterday directed against those Members on this side of the Chamber who voted in favor of the motion

to bring before the Senate for consideration the amendment offered by the Senator from California [Mr. JOHNSON].

With the basic principles upon which the criticism was founded I am in entire and complete harmony. There is, however, a practical aspect of the question presented which addressed itself to some of us.

When our country was transformed, as it were, almost overnight from a debtor nation to the greatest creditor nation in the world, and perhaps the greatest creditor nation of all time, when we became a great exporting nation—perhaps the greatest exporting nation in the world—common sense dictated, as it seems to me, a radical change in the policy of this country. It was not, however, effective, and we twice raised higher our tariff walls.

I welcome the accession of the Secretary of the Treasury to the ranks of those of us who believe that the first condition for the restoration of prosperity in the country is the removal of the artificial obstacles to international trade.

When our goods went freely into the markets of the countries of the world generally, many of them upon a free-trade basis or nearly a free-trade basis, we could quite comfortably pursue the policy of high protection; but when other nations adopted that policy, the virtues of it were not so very plainly apparent to many of our people.

So with reference to the matter that is now under consideration. The people of England for a number of years past have been preaching the doctrine, "Buy British." The Prince of Wales has traveled all over the world proclaiming the wisdom of the doctrine of "Buy British." We are confronted with that situation now; and, accordingly, the policy is widely believed to be wise to endeavor to secure the removal of these obstacles to international trade by reciprocal agreements between the nations.

That policy was expressed in the Democratic tariff bill which was passed at the last session of Congress and vetoed by the President. It has found expression in the platform of the Democratic Party, from which I read as follows:

> We advocate * * * reciprocal tariff agreements with other nations, and an international economic conference designed to restore international trade and facilitate exchange.

I am convinced that we shall be able to secure those reciprocal agreements very much more readily if we adopt exactly the same policy that has been pursued of confining our purchases, so far as possible, to our own products.

It may be argued that the country would prosper very much more fully if trade were free, and I have no doubt that is the correct method of bringing about a recovery, but how shall we attain that end?

We are in the same situation, or practically the same situation, with respect to the reduction of armaments. The very general opinion of this country is that armaments ought to be reduced; and I am sure a perfect willingness exists upon the part of the people of the United States to reduce our armaments even to the limit of what is necessary for police purposes, and none for warlike purposes. We were unable, however, to induce other nations to conclude that that was the wise course to pursue until we were in a situation to surpass the world in naval armament, and then we found them quite readily acquiescent; and my conviction is that we shall never again be able to get them in an attitude to favor a substantial reduction until we get at least on a parity with the greatest naval power in the world.

So, Mr. President, it is simply a question as to how we shall reach the end which all of us desire to attain. I believe that the action taken yesterday will promote, rather than discourage, the removal of these obstacles to international trade that forms so large an element in the distress which oppresses the entire world at this time.

Mr. TYDINGS. Mr. President, I have such a high personal regard and admiration for the talents and independence of the Senator from California [Mr. JOHNSON] that it is with real reluctance that I rise to oppose the pending proposition.

I desire to offer an amendment proposing to amend the amendment of the Senator from California by adding a new section——

The PRESIDENT pro tempore. An amendment to the amendment is now pending.

Mr. TYDINGS. To be called up as soon as the pending amendment is disposed of. It will read as follows:

> Insert at the end of the pending amendment the following:
> "SEC. —. And that hereafter any appropriation of money for crop production of any crop whereof there is already an exportable surplus in the United States is hereby rescinded, and any such appropriation shall revert to the Treasury."

It is perfectly apparent that it is silly to try to keep the trade of other nations out of the United States and at one and the same time appropriate money to produce crops which we must sell to other nations. If we are going upon the policy of complete and absolute isolation, then let us stop producing more than our people can consume. If we are going upon the policy that we must sell these agricultural surpluses in the markets of the world, then, of course, we ought not to put any other trade barriers in the way of that pursuit.

Now, let us see whether or not it is profitable for this country to engage in a policy of isolation.

First of all, in 1929 we sold to foreign countries $5,240,000,000 worth of American agricultural and industrial products.

How much did they sell us? They sold us $4,399,000,000 worth. There was a balance of trade in favor of the people of the United States of $1,000,000,000 a year. Yet evidently men in this body think it wise to destroy our markets, even though we are selling more to our customers than our customers are selling to us.

In 1930 we exported $3,843,000,000 worth of American goods to other countries. They sold us $3,061,000,000 worth. There was a balance of trade in our favor of $800,000,000. Even to-day, with world commerce stagnated, we find that the balance of trade is still in our favor.

Mr. President, I am absolutely at a loss to understand, with a year's world supply of cotton carried over from 1932 to 1933, why, in the first place, we should appropriate any money to stimulate cotton production, because added production would only add to our problem.

I do not mean to say that there are not humanitarian reasons which impel us to override the sheer force of the economics involved, and I attribute to those who offer the crop-production loan measures the very best of intentions to help those people who are so distressed that they can not produce crops without, perhaps, a loan from the Government. But whether that be true or not true, we are but compounding the difficulties in the way to economic recovery in this country. If we are going to do everything we can to destroy our world markets, then let us stop appropriating money to produce crops which must be sold at no other place than in the markets of the world.

Mr. GORE. Mr. President, will the Senator yield?

Mr. TYDINGS. I yield.

Mr. GORE. The Senator from Maryland says that to stimulate the production of cotton and, at the same time, to restrict the foreign market for cotton, is silly. Does the Senator make any point of that? [Laughter.]

Mr. TYDINGS. No. I think that the general observation could be carried, as we say in reference to income taxes, to broaden the base.

Mr. President, I represent an industrial State. My observation is that the industries of this country, impelled by the blind greed to hog all of the business, have brought the agriculturalist to his present sorry plight. We have run this country, not in the interest of all the people who produce wealth and sell it but in the interest of those who produce it in the factories in the cities of the United States.

Who buys the products which are made in the cities of the United States? The farmers of the United States are among the very best customers there are. Unless the farmers can sell something with which to get money, how are we ever to revitalize and revive the industries of our cities? We can not sell in the world market; that is admitted. Our world trade is gone, and through our tariff acts, and those of other countries, the farmers of our country have been

impoverished so that they can not buy the products of our own industry.

If that is helping to get us out of the depression, I simply can not follow the reasoning. Perhaps it is sound. I concede to those on the other side the best of motives, but I am absolutely unable to understand how there can ever be a revival of American industries until there is a revival of the purchasing power of the 30,000,000 or 35,000,000 people who live on the farms.

Mr. President, I went briefly into the agricultural situation of my own State the other day. We are a small State, it is true, but we are large producers of apples; and I find that 88 per cent of all the apples produced in the State of Maryland are sold to foreign countries, due to our proximity to the Atlantic coast. Great Britain buys about half of them from us, but we are not selling them many to-day. I find that of the apple crop 21 per cent is sold abroad and 79 per cent is consumed in the United States.

More than that, I find that 55 per cent of all the cotton produced in the United States was sold abroad in 1929, 41 per cent of the tobacco, 40 per cent of the typewriters, 40 per cent of the kerosene, 30 per cent of the copper, 33 per cent of the lard, 31 per cent of the lubricating oil, 29 per cent of the machinery, 28 per cent of the sewing machines, 23 per cent of the agricultural machinery, 20 per cent of the rye, 20 per cent of the locomotives, 18 per cent of the wheat, 14 per cent of the gasoline and naphtha, and 10 per cent of the automobiles.

Mr. KING. Mr. President, will the Senator yield?

Mr. TYDINGS. I yield.

Mr. KING. I wish the Senator would mention, if he has the figures there, the very large percentage of manufactured textiles that we ship abroad.

Mr. TYDINGS. I selected only a few of the articles, just to show that it is not only the agricultural products which are now glutting the home market but it is the industrial products, because our foreign market is gone; and on top of that we are passing bills further to impoverish the American farmer.

Mr. KING. That is to say, we can undersell even Great Britain and Germany and Belgium and France, large producers of textiles, and we annually ship abroad tens of millions of dollars worth of textiles produced or manufactured in the United States as well as semimanufactured commodities.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield to me?

Mr. TYDINGS. I yield.

Mr. ROBINSON of Arkansas. While all the changes to which the Senator has referred have been taking place during the first seven months of the present fiscal year, according to an Associated Press statement published in this morning's Washington Post the customs duties dropped from $224,569,945 during the first seven months of the last fiscal year, to $156,003,025 during the first seven months of the present fiscal year.

Mr. TYDINGS. Mr. President, I want to say that I do not blame the "wicked" foreign countries which have passed tariff acts against the United States. If I read the facts aright, every one of those tariff acts has been due to the fact that we beat them to it, and they simply retaliated. We passed the Dingley bill, and the countries of the world retaliated. We passed the Fordney-McCumber tariff bill, and again they sought to protect their own commerce. We passed the Smoot-Hawley tariff bill, and again new tariffs were levied.

Mr. ROBINSON of Arkansas. Mr. President, we complain that tariff barriers are too high, and propose to break them down by making them impregnable.

Mr. TYDINGS. The Senator is absolutely correct.

Mr. President, in my humble judgment, the process should be the reverse of the one upon which we are about to embark. I realize that it can not be accomplished now, with all the world locked up in water-tight tariff compartments, without a measure of cooperation, to stimulate and revive world trade. But I would like to leave this thought with the Senate. Let us assume that we are going to live unto ourselves. Where, may I ask, is the American industrialist to sell the products of his factory? Does he not want the 40,000,000 men who live on our farms, does he not want the men who live in the 12 or 13 cotton States, to be in a position to buy? If he destroys their market where are they to get the money with which to buy the products we make in our large cities? As soon as we can restore some measure of purchasing power to the man who lives on the farm, just so soon will the wheels of industry begin to turn to produce the products which he will then be in a position to buy.

If the tariff is a good thing, to what a sorry pass it has brought us. All of the countries have the highest tariffs in all the history of the world; and what is the result? There are 12,000,000 unemployed in our very midst. There are only about half a billion dollars worth of foreign goods now coming into this country, where formerly the imports amounted to $5,000,000,000. But when those foreign goods were coming into our country in superabundance we were shipping more out of this country to them than they were shipping to us, and when there was that reciprocity in trade we did not have 12,000,000 unemployed.

Now we have our tariffs, and practically no one can sell us anything, and we have all this poverty, all this distress, all this unemployment, 12,000,000 people pounding the streets asking for a place to earn a living.

Mr. President, I want to say in conclusion that if we are to embark upon a policy of embargo, then let us stop appropriating money to produce crops for which there is no sale in the United States. We must take one horn or the other of the dilemma. It is a shear waste of public money to take $150,000,000 and lend it to the farmers to assist them in producing crops when there is already a year's supply and when there is not a chance on earth of their selling the crops in the markets of the world as they are now constituted.

The PRESIDING OFFICER (Mr. FESS in the chair). The Senator's time has expired.

Mr. TYDINGS. I will speak on the other amendment.

Mr. THOMAS of Oklahoma. Mr. President, will the Senator yield to me?

Mr. TYDINGS. I yield.

Mr. THOMAS of Oklahoma. Does the Senator from Maryland entertain the conviction that in making tariff rates for the United States we should consider our relations with our trading neighbors, the other nations of the world?

Mr. TYDINGS. Yes; as a basic proposition.

Mr. THOMAS of Oklahoma. Let me remind the Senator that when the present tariff law was being considered in the Senate I was a member of the Committee on Finance and was present when a large part of the hearings were held. As a member of the Finance Committee I furnished a number of copies of the House bill to some of my friends in foreign countries. I even sent copies of the bill to persons I did not know, in order that I might get their reaction as to the rates proposed to be placed on commodities coming from those countries with which we had to deal.

At that time I was taken severely to task by the great chairman of the Finance Committee for even undertaking to confer with representatives of foreign countries in the making of a tariff bill for the people of the United States. Does the Senator think that I was going too far in conferring with such representatives?

Mr. TYDINGS. No; I think——

The PRESIDING OFFICER. The Chair will state to the Senator from Maryland that there is but one amendment pending, and he has consumed all his time on that amendment.

Mr. TYDINGS. I have not spoken on the bill.

The PRESIDING OFFICER. The Senator asks unanimous consent to speak 15 minutes on the Johnson amendment.

Mr. TYDINGS. I will not ask unanimous consent, because I do not want to ask for myself a privilege which

would not be given to others. If my time has expired, I will relinquish the floor.

Mr. JOHNSON. Mr. President, I suggest that we clarify the atmosphere as to what the unanimous-consent agreement means. I do not want to take the Senator from Maryland off the floor unless the unanimous-consent agreement absolutely requires it.

Mr. TYDINGS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. TYDINGS. I have offered an amendment, and I addressed myself to that amendment. It is true I lopped over on the amendment offered by the Senator from California, but I would like to know whether I have not 15 minutes on each amendment?

The PRESIDING OFFICER. The Senator must remember that the amendment he offered is not pending, and, of course, would not be in order at this time.

Mr. TYDINGS. I will speak on it when it is in order.

Mr. SMOOT obtained the floor.

Mr. WALSH of Massachusetts. Mr. President, will the Senator yield to me to ask a question?

Mr. SMOOT. I yield.

Mr. WALSH of Massachusetts. In view of the debate that has proceeded yesterday and to-day in reference to imports and exports, I would like to have the opinion of the chairman of the Finance Committee on this aspect of the question: The information which comes to me from business men is that it is no fair criterion, under present conditions, to refer to imports and exports in terms of dollars, that the only fair and just criterion is to consider them in terms of tonnage or units. For instance, it is claimed that while two years ago a straw hat imported from Italy would have cost 50 cents in our currency, to-day two or three may be imported for the same price. I would like to have the Senator's opinion, as the chairman of the Committee on Finance, as to whether it is fair to judge imports in terms solely of dollars.

Mr. SMOOT. Mr. President, I will say to the Senator that, of course, it is not fair. But let us take the statements made by Senators themselves and let us compare the importations for the years 1925 to 1932, inclusive, and the exports as well. It will be seen that every year the proportion of imports and exports is about the same, not as to the total amount of business done but the percentage of difference between the amount of exports and imports is about the same. So all the criticisms because of the fact that it is a tariff bill fall to the ground. For instance, the following table shows clearly the point to which I have just invited attention:

Total value of exports and imports, 1925 to 1932, inclusive

(Thousands of dollars)

Calendar years	Imports	Exports
1925	4,226,589	4,909,848
1926	4,430,888	4,808,660
1927	4,184,742	4,865,375
1928	4,091,444	5,128,356
1929	4,399,361	5,240,995
1930	3,060,908	3,843,181
1931	2,090,635	2,424,289
1932	1,322,745	1,617,877

In other words, Mr. President, the table shows the condition of business not only in our own country, but in the world. Senators may charge it to the Smoot-Hawley tariff bill if they please, but taking the year 1932, for example, why were the imports less and why were the exports less? It was because of the conditions prevailing in the business world.

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. SMOOT. Certainly.

Mr. TYDINGS. What difference does the condition of the world make if we are self-sufficient and living unto ourselves? What difference does it make what the rest of the world is doing? Is it not our policy to let the rest of the world go and to live unto ourselves?

Mr. SMOOT. The Senator ought to know that the depression is world-wide. It is not only in this country but throughout the whole world.

Mr. TYDINGS. But it can not affect our trade because that has all been excluded. Why are we not prosperous? Why is there a carry-over of wheat? Why is there an excess of cotton?

Mr. SMOOT. Simply because the people have not the money to purchase.

Mr. TYDINGS. Why do they not have the money? Is it not merely because they can not sell their crops in the markets of the world where they have been accustomed to sell them?

Mr. SMOOT. And they can not sell them in the markets of the world because there is no money to buy. There is an overproduction everywhere. People are not living on the same high standard and spending as much money as they have always done in the past in the United States. The Senator knows that he himself is not expending as much money as he used to spend. No Senator of the United States is expending the same amount of money, no matter whether he has the same income or not.

Mr. FLETCHER. Mr. President, may I ask the Senator from Utah a question?

Mr. SMOOT. Certainly.

Mr. FLETCHER. All through the years has not the balance of trade been in favor of the United States?

Mr. SMOOT. Every year in about exactly the same proportion; so the world trade has fallen in the same proportion as our own trade has fallen in the matter of imports and exports. It can not be charged to a tariff law.

Mr. President, if I had the time I would like to go into the question of dutiable imports and of our exports and show the conditions in various countries and why the changes have been made. If any Senator will stop to consider it, if he will give the least consideration to conditions in the world generally, and in the United States in particular, and then take the actual figures as shown by our own Government, he can see why the trade of the world is less than it has been in the past.

I do not want to get into a tariff discussion at this time, but if there was ever a time in the history of the United States when the United States and the American people needed a tariff, it is to-day. God help the country if we had not had one! We would be just about as bad off as Europe, and probably a great deal worse. After all our credit was gone and after all the money we had accumulated in the past had been expended, we would be worse off than any of them.

Mr. President, I merely desired to say this much in answer to the Senator from Maryland [Mr. TYDINGS] in relation to the question he was discussing.

Mr. ODDIE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. ODDIE. What is the pending question?

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Wisconsin [Mr. BLAINE] to the amendment of the Senator from California [Mr. JOHNSON].

Mr. ODDIE. I demand the regular order.

The PRESIDING OFFICER. The regular order is demanded. The question is on the amendment of the Senator from Wisconsin to the amendment of the Senator from California. [Putting the question.] The noes seem to have it.

Mr. BLAINE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Brookhart	Costigan	George
Austin	Bulkley	Couzens	Glass
Bankhead	Bulow	Cutting	Glenn
Barbour	Byrnes	Dale	Goldsborough
Barkley	Capper	Davis	Gore
Bingham	Caraway	Dickinson	Grammer
Black	Clark	Dill	Hale
Blaine	Connally	Fess	Harrison
Borah	Coolidge	Fletcher	Hastings
Bratton	Copeland	Frazier	Hatfield

Hayden	McKellar	Robinson, Ark.	Thomas, Okla.
Hebert	McNary	Robinson, Ind.	Townsend
Hull	Metcalf	Russell	Trammell
Johnson	Moses	Schall	Tydings
Kean	Neely	Schuyler	Vandenberg
Kendrick	Norbeck	Sheppard	Wagner
Keyes	Norris	Shipstead	Walcott
King	Nye	Smith	Walsh, Mass
La Follette	Oddie	Smoot	Walsh, Mont.
Lewis	Pittman	Steiwer	Watson
Logan	Reed	Swanson	Wheeler
McGill	Reynolds	Thomas, Idaho	White

The PRESIDING OFFICER. Eighty-eight Senators have answered to their names. A quorum is present. The question is on the amendment of the Senator from Wisconsin to the amendment of the Senator from California.

Mr. BLAINE. Mr. President, the vote not having been announced, I assume debate is in order. I desire to explain briefly the amendment which I have offered to the amendment of the Senator from California.

At the outset let me emphasize that the language which I propose to insert in the pending amendment is the language which has been adopted by the Congress and applied to purchases by the War Department. I want to read that language. The restrictions as to articles of the growth, production, and manufacture of the United States were classed as general legislation and became the law on March 8, 1932, and apply only to the War Department. This is the language:

> In the expenditure of appropriations for the military or nonmilitary activities of the War Department, the Secretary of War shall, unless in his discretion the interest of the Government will not permit, purchase or contract within the limits of the United States—

Now note this language—

> only articles of the growth, production, or manufacture of the United States.

I propose to incorporate in the pending amendment that language which has been approved by the Congress. The Senator from Pennsylvania [Mr. REED] on yesterday said that the law applicable to the War Department was working very smoothly and satisfactorily and that it had accomplished the purposes intended to be accomplished. I do not want this amendment to go beyond the policy already established by the Congress, for if we do we are going to discriminate as against many American industries. I understand, of course, as the Senator from Connecticut stated yesterday, as to the particular product of paper, for instance, it would not materially affect the paper industry because of the small amount that may be used by contractors in the construction of public works, but it would be a discrimination just the same against some particular industry or industries. Not only the paper industry is concerned but the furniture industry is concerned, and there are other industries concerned. Now it is proposed to discriminate as against those industries.

The Senator from California contends that the language he uses in his amendment is broad enough to take such industries out from under the amendment. I want to say to the Senator from California that I am somewhat familiar with the paper industry; I have my own judgment respecting this matter; and my judgment is the judgment of 237 paper mills of this country which are manufacturing paper from foreign pulp or pulpwood. Their judgment is that to the extent of the purchases that are made by the Government within this amendment it will actually operate as a discrimination against their product. That means a discrimination against American stockholders of industries; that means a discrimination against American workingmen; a discrimination against all those who are interested as Americans in the paper industry.

I am not limiting it to the paper industry alone, but that is the outstanding industry that would be affected. It is also true that the furniture industry would be very vitally affected, and perhaps other industries; but I have used this one illustration so that I might point out how unfair it is to pick 2 or 3 or 4 industries and place a discrimination against them.

Now, let me analyze the amendment offered by the Senator from California. It reads:

> SEC. 2. Notwithstanding any other provision of law, and unless the head of the department or independent establishment concerned shall determine it to be inconsistent with the public interest, or the cost to be unreasonable, only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced, or manufactured, as the case may be—

All paper manufactured out of pulp or pulpwood has but one constituent part, and that is wood; there is no other substance in the product. Therefore that provision of the amendment directly and expressly excludes the paper industry, the 237 paper mills of the country, from selling their product to the Government or to a contractor of the Government. I do not know to what extent it would injure them; but I am not so much concerned about that as I am concerned about the discrimination, no matter how great or small it may be.

The Senator from California in private has pointed out the qualifying clause—

> Unless the head of the department * * * shall determine it to be inconsistent with the public interest.

But there is no public interest involved with respect to the particular commodity to which I refer, in any respect whatever. It has also been suggested that the words "or the cost to be unreasonable" might save the situation, but I point out that the cost of paper manufactured by the paper mills importing pulp and pulpwood is substantially the same as the cost of paper manufactured by paper mills which manufacture their paper from domestic pulpwood. So that does not protect them. Then the amendment further provides:

> This section shall not apply with respect to articles, materials, or supplies for use outside the United States—

I will omit some of that language—

> or if articles, materials, or supplies of the class or kind to be used or the articles, materials, or supplies from which they are manufactured are not mined, produced, or manufactured, as the case may be, in the United States in commercial quanities and of a satisfactory quality.

Let me point out that that exception does not protect these industries. There are commercial quantities of pulpwood in this country. The western coast has increased its production of pulpwood several hundred per cent. As I recall the testimony before a House committee the other day, there has been an increase of about 350 per cent in that production of pulpwood. There is plenty of pulpwood in this country for the time being to supply all the pulp mills on the west coast and perhaps in the lower reaches of the Mississippi Valley; but, as I pointed out yesterday, the excessive cost of transportation prevents that pulpwood being available to the paper mills in the East and the Middle West and the upper reaches of the Mississippi Valley. So that is no protection. The department can not hold that there is not a sufficient commercial quantity, for there is; but the transportation cost is the thing that bars the use of that pulpwood for the eastern and middle western and upper Mississippi Valley paper mills.

> And of a satisfactory quality.

The quality of paper, of course, it is obvious, is identically the same.

It is the judgment of 237 paper mills of this country—and, from a careful analysis of this amendment, I concur in their judgment—that none of the exceptions, none of the qualifications protect that industry; and it does not protect the furniture industry. I have not the time to go into a discussion of that question with respect to the use of hardwood in the manufacture of desks and chairs which may be obtained under contract and used by the Government.

Mr. REED. Mr. President, will the Senator permit a question?

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Pennsylvania?

Mr. BLAINE. I yield.

Mr. REED. It occurs to me that reasonable protection would be given in the cases such as the Senator is discussing if in line 20 of the amendment of the Senator from California, after the word "in," we should insert the words "sufficient and reasonably available," so that it would read—

in the United States in sufficient and reasonably available commercial quantities and of a satisfactory quality.

It seems to me that that would meet the situation better than the suggestion of the Senator.

Mr. BLAINE. That might obviate the specfic objection respecting the paper industry, but I do not know whether it would meet the objection of other industries. I think, however, it would be much more satisfactory, I submit to the Senator from Pennsylvania, to follow the language which he used in the bill which became a law respecting the purchase of supplies for the War Department. As the Senator said yesterday, that law has worked smoothly, it has been satisfactory, it has effectuated the purpose, the language is well known, it has been interpreted by the War Department, it has been interpreted by the Comptroller General, it has become the standardized language respecting the subject; and why not use the standardized language?

Mr. REED. Mr. President, if the Senator will permit me to interrupt him further, let me say that I think it works in the War Department because a very sympathetic group of officials are administering it. The Quartermaster General, for example, is warmly in sympathy with it. I should like to have incorporated in the law a provision which would protect us in case we did not have such a sympathetic administration. I am thinking of a case like this: It will be remembered in the tariff hearings we were told how cases of watches were brought in separate from the works and then the cases and works were put together, an operation which requires only a minute or two. Under the Senator's amendment such an article will be considered as having been manufactured in the United States, and we ought not to leave the law so wide open.

Mr. BLAINE. It is identically the same language.

Mr. REED. In the case of the provision as to War Department supplies that is true, but the amendment of the Senator from California would protect against such devices as that, and we do not want to make a law that will be easily evaded.

Mr. BLAINE. Let me point out—I do not know whether the Senator's illustration is according to the usage or not—but let me say to the Senator from California that the specific evil to which he referred on yesterday, and according to telegrams which I am receiving and according to gentlemen who are awaiting the time when I may discuss the matter with them, has to do with the electrical equipment and machinery to be used at Boulder Dam. That gave rise, to a large extent, to the promotion of this type of legislation.

The language which I have proposed is just as protective for American industry in that particular instance as is the language used in the amendment proposed by the Senator from California.

Mr. REED. I think the language used by the Senator from California in his amendment would be more effective.

The PRESIDING OFFICER. The time of the Senator from Wisconsin has expired.

Mr. BLAINE. Mr. President, I have not spoken on the bill.

The PRESIDING OFFICER. The Senator is recognized for 15 minutes on the bill.

Mr. REED. Mr. President, will the Senator from Wisconsin permit me, in the time to be charged to me, to inquire of the Senator from California whether he would be willing to accept the amendment which I have suggested?

Mr. JOHNSON. I think so.

Mr. REED. May that be understood to be done at this time?

The PRESIDING OFFICER. Does the Senator from Pennsylvania offer an amendment?

Mr. REED. It is an amendment to the language proposed by the Senator from California, who undoubtedly has a right to modify his amendment until the time when a vote shall be taken on it.

The PRESIDING OFFICER. An amendment is not in order if it is offered at this stage.

Mr. REED. I am not offering it; I am asking the Senator from California to accept it.

Mr. JOHNSON. Mr. President, I accept it. The suggestion, as I understand, is in line 20, after the word "in," to insert the words "sufficient and reasonably available." I accept that, because it does not interfere, in my opinion, with the general specific purpose of the amendment.

The PRESIDING OFFICER. The Chair understands that the Senator from California modifies his amendment as indicated.

Mr. BLAINE. Mr. President, I want to inquire of the Chair whether the time of other Senators is running against me?

The PRESIDING OFFICER. The Chair will not so regard it.

Mr. BLAINE. Mr. President, may I have the exact language as stated by the Senator from California? In the confusion I did not understand it plainly. The words are to be inserted, as I understand, in line 20.

Mr. JOHNSON. In line 20, page 2, after the word "in," the words suggested by the Senator from Pennsylvania, as I followed them, are "sufficient and reasonably available." That is the insertion.

Mr. BLAINE. I thank the Senator.

Now, Mr. President, I wish to address myself to the proposition which the Senator from Pennsylvania has stated. He stated that, in his opinion, the language which I propose does not sufficiently protect American industries respecting the furnishing of electric equipment for Boulder Dam. I want to point out that the words, "if manufactured in the United States," applying to the machinery that must be used at Boulder Dam or in any public building where there is electrical equipment or whatsoever it may be, are effective so far as that specific instance is concerned.

Mr. President, I do not want to take all the time allotted to me upon the bill. I have endeavored to explain the purpose of this amendment, and to point out that it is the standardized language used in the War Department supply bill. It has worked satisfactorily, according to the statement of the Senator from Pennsylvania [Mr. REED]; and it is the best policy, in my judgment, regarding controversial questions of this kind, to follow language that to a certain extent has become standardized and has been interpreted by the department and by the Comptroller General. By following that course we avoid confusion, and that is in the interest of efficient Government administration.

Mr. VANDENBERG. Mr. President, it seems to me that the vice of the amendment submitted by my able friend from Wisconsin [Mr. BLAINE] is that it opens the door to controversy respecting the identity of commodities which it is proposed to proscribe. It dilutes the mandate.

We are repeatedly reminded that the language proposed by the Senator is the standard language which has been used in previous efforts of the same character in respect to four other departments of the Government. I want to call the Senator's attention to the fact that that is one of the precise reasons why I think it is dangerous to leave this particular door open if we intend to do a thoroughgoing job; and I want to illustrate that to the Senator with just one out of many examples. It will point the proposition which urges against the amendment submitted by my friend from Wisconsin.

There is one public contract which was let about 18 months ago, perhaps two years ago, for the construction of a very important and expensive public building in another city. The contract was let under these limited restrictions to which the Senator from Wisconsin has referred and which

he thinks are sufficient for these purposes. It was the expectation that American products exclusively should enter into these work-relief expenditures; and certainly if there is any point in our public economy where we are entitled to insist upon exclusive American products, it is the expenditure of tax funds at a time like this. I do not argue for a universal embargo in all our trade. I am speaking at the public expenditure of public money. So here we had a project which presumably, under the limited proscriptions to which the Senator has referred, was to be constructed out of American commodities.

What happened?

When they got all through, and the building was up, and they were ready to dedicate it, on the steel window frames throughout that building appeared the mark, "Made in England." Immediately there was an argument as to whether or not a window frame made in England could qualify under a public-building contract which was supposed to be confining its beneficiaries to America. As I recall the situation, the argument finally disclosed the fact that the frame had come in on the theory that it was a raw product or a partially processed product, and therefore, since there was some casual work upon the frame after it had been imported, that it could qualify as an American product.

Mr. BLAINE. Mr. President, will the Senator permit a brief observation there?

Mr. VANDENBERG. Yes.

Mr. BLAINE. This character of legislation is before the Committee on Expenditures in the Executive Departments. I think it is understood—I can say this without any question of its veracity—that the Comptroller General holds to the opinion that when discretionary power is left to the head of a department there is more difficulty in the administration of the law than when some specific rule is set up by the Congress.

I think the Senator's argument that this language would promote controversy is far afield from the facts as disclosed by the Comptroller General.

Mr. VANDENBERG. Mr. President, I totally disagree with the Senator's analysis. It seems to me that if we had a clean-cut and specific rule that our public expenditures, at least during this time of stress, shall be confined to American industry and American labor, there would be no chance whatever for argument; whereas if we adopt the Senator's amendment, which provides that these commodities purchased with American tax funds can be either grown, produced, or manufactured in the United States, I submit that we have precipitated a constant invitation to argument as to whether the processing may not have adequately qualified an import within the meaning of the rule, whereas otherwise it could not have qualified and was not intended to be permitted.

I renew the example that I submitted to the Senate a few moments ago: There is at this moment a great public building in this country which was supposed to have been built on the basis of this proscription of foreign commodities, in which every window frame is stamped "Made in England"; and, of course, after the building was up the window frames could not very well be torn out, and there was nothing left except a post-mortem argument. I do not want to amend the Johnson amendment in the interest of such arguments.

Mr. President, if that situation had been reversed—and I think this is pertinent—if this had been a British public project which had been proceeding under recent British regulations, there would not have been any chance whatever for something made in America to have crept in under any such possible construction of the situation. You can read all of the orders that have been handed down upon this subject by the British Government relating to public works and the use of materials in the construction in the United Kingdom of public works of all forms and description—publice buildings, roads, and everything else—and you find that the following has been a typical condition of these grants. I am now quoting a Treasury minute dated September 11, 1929, instructing the advisory committee in charge of grants under the development act of 1929, requiring—

That all materials—

There is no "or" about it—

all materials required for the assisted work will be of British origin, and all manufactured articles of British manufacture.

"Origin" and "manufacture"! Not "or"! A mandate, not an argument! The only point I make of it is that this proposition is neither new nor novel. It is no affront.

Mr. GLENN. Mr. President, will the Senator yield?

Mr. VANDENBERG. I yield.

Mr. GLENN. Is there any limitation in that as to reasonableness of cost, or any exception at all?

Mr. VANDENBERG. I will complete the language.

Subject, however, to such exceptions as the committee may regard as necessary or desirable in any particular case, having regard to all the circumstances, including the comparative price of British and foreign articles.

It is approximately the same general reservation which is proposed in the pending amendment as originally submitted by the Senator from California.

Mr. GLENN. Criticism was voiced against the amendment submitted by the Senator from California upon the ground that it was not sufficiently definite. It seems to me it is certainly as definite as the British regulation from which the Senator from Michigan is quoting.

Mr. VANDENBERG. The Senator is correct. It is sufficiently definite to do the job, whereas the amendment submitted by my friend from Wisconsin in perfect good faith—and nothing I am submitting is in any remote criticism of his point of view—inevitably opens the door to evasion, to controversy, to argument, and to doubt.

It occurs to me that in a time like this, when we are beset upon all sides with an almost inescapable and unavoidable responsibility to provide employment for unemployed American people, we have a right to draw the line, without any "or" in it anywhere, in defense of American industry and American employment, when we are spending American tax funds. Why have an American make-work program which makes work in Europe or in Asia? I am not blind to the need for export trade. I am speaking solely of Government funds and their expenditure.

Mr. President, the American Treasury is not the world's community chest, although too frequently it seems to be looked upon in that aspect; and at this moment, with a workable proposition for domestic protection, submitted by the Senator from California, I submit that the Senate should stand upon the proposition as it is submitted and make it a complete success.

Mr. BLAINE. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Wisconsin?

Mr. VANDENBERG. I yield.

Mr. BLAINE. I know the Senator does not intend to exaggerate.

Mr. VANDENBERG. I hope not.

Mr. BLAINE. The Senator read the order of the British Government. It must be perfectly clear to the Senator that the British Empire does not contain certain essential raw materials that are used in British construction. There must be some exceptions certainly. I doubt that that testimony is entitled to very much weight.

Mr. VANDENBERG. Well, I have read the Senator the order, and it will speak for itself in behalf of my argument.

This is not rightfully a general tariff debate, although Democrats across the aisle would make it such. So far as tariffs go, the depreciated currencies of the world have left us almost defenseless. This lapse in protection needs correction. If this proposal submitted by the Senator from California is a step in protective directions, so much the better. But primarily it is an employment measure conceived in the notion that American tax money should sustain American labor in a moment of American crisis and American exigency. I admit that this is traditional Republican

doctrine. I admit that Democratic attitudes are supposed to be otherwise. But I speak for American doctrine and American attitudes, in this particular situation, regardless of partisanship or predilections.

Mr. WALSH of Massachusetts. Mr. President, many who are friendly to the purpose of the original amendment offered by the Senator from California have objected to the words on page 2, line 20, "in commercial quantities and of a satisfactory quality."

It has been suggested to me that an amendment ought to be made to that language incorporating the language used in the tariff acts to accomplish the same end. That language is:

In such quantities as to meet the consumptive demand of the United States.

This bill applies to the Philippine Islands—see subparagraph b of section 1—and I am wondering whether the language "in commercial quantities" actually takes care of sisal, for instance, which is grown in the Philippines and perhaps in commercial quantities, but not in sufficient quantity to meet the consumptive demand in the United States. Flax is grown in the northwest section, but not in sufficient quantities to meet the consumptive demand, although it may be said to be grown in commercial quantities. Manganese is probably produced in commercial quantities, but, of course, such production is wholly inadequate to meet commercial demands. Hides in the southwest section are grown in commercial quantities, but certainly not sufficiently to meet consumptive demands. The latter situation would more particularly affect some shoe manufacturers; the sisal situation would relate to cordage interests, and so forth.

Would it not be better, therefore, to amend section 2, line 17, as follows:

By striking out, in line 17 of section 2, the words "in commercial quantities" and by inserting in lieu thereof the following, "in such quantities as to meet the consumptive demand of the United States."

This is the language followed by the tariff acts and by the Tariff Commission and others in expressing the same thought with relation to similar matters, and certainly would more fully express the thought of those who are trying to obviate conditions which might arise under the language, "in commercial quantities."

That language was not acceptable to the Senator from California [Mr. JOHNSON], with whom I conferred with reference to the matter. He did accept several other amendments that I proposed, which were published in the RECORD of January 19, with a memorandum explaining them. The amendment just offered by the Senator from Pennsylvania [Mr. REED], and which has been accepted by the Senator from California and is now incorporated in the original amendment, changes the language on line 20, page 2, by inserting certain words in front of "in commercial quantities and of a satisfactory quality," so that section 2 will read, on line 20, as follows:

In sufficient and reasonably available commercial quantities and of a satisfactory quality.

I think that amendment, which the Senator from California has accepted, has greatly improved the bill and has met the objection of those who have conferred with me. I do not know that it goes as far as the Senator from Wisconsin proposes to go; but it certainly is an improvement, and removes the objections that have been presented by those who are friendly to the measure.

Mr. BYRNES. Mr. President——

Mr. WALSH of Massachusetts. I yield to the Senator from South Carolina.

Mr. BYRNES. Can the Senator tell us the difference between the proposal of the Senator from California and the existing law which was enacted by the Congress last June, which was added to this very bill carrying appropriations for the Treasury and the Post Office Departments, and which provides:

In the expenditure of appropriations in this act or appropriations hereafter made, the Secretary of the Treasury in the case of the Treasury Department, and the Postmaster General in the case of the Post Office Department, shall, unless in his discretion the interest of the Government will not permit, purchase, or contract for, within the limits of the United States, only articles of the growth, production, or manufacture of the United States, notwithstanding that such articles of the growth, production, or manufacture of the United States may cost more, if such excess of cost be not unreasonable. In giving effect to this section special consideration shall be given to the domestic article where the raw material of which the article is made is grown in the United States and the article is manufactured in the United States.

What is the substantial difference between the existing law—which was passed, according to the RECORD, unanimously by the Senate—and the bill that is now pending?

Mr. WALSH of Massachusetts. There is in principle practically no difference; and that is why I was surprised yesterday to find Senators who voted for this amendment when it was offered a year ago objecting to the Johnson amendment. The object the Johnson amendment seeks is exactly the object that was taken care of in the appropriation bill of last year.

Mr. BYRNES. As I understand, the Johnson amendment would extend the action to departments other than the Treasury and Post Office Departments.

Mr. WALSH of Massachusetts. Exactly.

Mr. BYRNES. I will say to the Senator that when that amendment was added last year, it was prompted by the fact that the Post Office Department was refusing to buy cotton twine produced in this country because they did not believe they could give preference to the American product, though they really wished to do so. That was the inspiration for putting in the bill that amendment advocated by the Senator from Georgia. On the floor of the Senate the bill was amended. During the last few years the Postmaster General had wrongfully interpreted the law as not requiring him to exercise his discretion in favor of American cotton.

Mr. WALSH of Massachusetts. What we are doing, therefore, is merely to extend an existing law.

Mr. BYRNES. As I understand it, it does nothing other than extend to other departments the law which is now on the statute books as to the Treasury and the Post Office Departments.

Mr. WALSH of Massachusetts. I agree it does nothing further than that.

Mr. BLAINE. Mr. President, permit me to suggest to the Senator from South Carolina that the same language as that used in the Post Office and Treasury Departments bill is incorporated in the general law as it relates to the War Department, in the matter of the purchase of material. I was endeavoring to make the language of the pending amendment conform to the standardized language which has been adopted as a policy by the Congress. I think there would be less confusion.

Mr. BYRNES. I did not know that it applied to the War Department.

Mr. SMITH. Mr. President, I have heard the discussion of the question now before us, and I was particularly interested in what the senior Senator from Utah [Mr. SMOOT] had to say, to the effect that if we ever needed a tariff, we need one now. He then went on to attempt to show that the foreign imports and exports, though diminishing, had kept their percentage relation.

It seems to me to be a strange argument that the imposition of tariffs does not diminish or prohibit the importation of goods; that no matter how high we may raise them, the same articles come in.

Mr. President, the figures read by the Senator from Maryland [Mr. TYDINGS] were hardly necessary to convince the Senate that the prosperity of this country depends upon the profitable exportation of our surplus goods. It makes no difference that the Congress in previous sessions may have enacted laws comparable to the proposed act; the question for us to determine is whether they were right or wrong then. The fact is that there is no reason why we should perpetuate it when we know its continuance would be detrimental to the interests of this country.

I am not going to attempt to speak at length, but we have at last arrived, in the imposition of our tariffs, to the *n*th

power. We propose to supplement the high tariffs with the inauguration of embargoes, and provide that our departments, in the exercise of their administrative power, shall not buy from any foreign country any materials which are produced in this country. That is equivalent to serving notice on foreign countries that we do not intend to trade with them except in cases of dire necessity, when we can not under any conditions produce the things we need.

Reference was made to the exportation of our farm products. Sixty per cent of the American cotton crop is exported. It has held the balance of trade in favor of the United States for more than 75 years. In 1928 the gross value of the American cotton crop was $1,528,000,000. In 1929 it was $1,504,000,000. In 1930 it had shrunk to $759,000,000, and the same sized crop in 1931 had shrunk to $500,000,000, entailing a loss in the purchasing power of 20,000,000 people of $2,500,000,000.

What did that spell? The distribution of that primary capital carried with it, of course, ten times that amount of credit. For every hundred dollars in actual cash every business man knows that there may be ten times that amount of credit based upon the actual cash investment, plus the thing that is to be produced or the trade that is to be made. So that the $2,500,000,000 that was lost meant a credit of more than ten times that amount.

What has been the result? Not bank failures in the South alone but bank failures throughout the United States, because the amount of money brought into this country in return for our exportations of cotton is not exceeded by that representing the value of any other importations brought in. So that it is not a question of a southern product; it is a question of an American asset that has not a competitor on the globe.

We hear much about the competition of foreign countries. I state to-day without fear of contradiction that there is not a pound of cotton produced in the world, even that raised from American seed, that classifies in character, tensile strength, and manufacturing properties with that produced in the Southeastern States of the United States. But we are asked now to embark upon a program that would shut out from exportation to the world at large a commodity which not only holds the balance of trade but spells the prosperity of American industries as well as of American farmers.

Mr. President, when we get money in return for our exported cotton, we buy the products of our domestic manufacturers. Now the exportation of cotton has shrunk to such a point that the price of that article is from $25 to $30 a bale below the cost of production. The result is that the manufacturers of the East can not sell their manufactures, though they produce no exportable surplus; because the exportable surplus of our farm products has dried up, there is no return, and therefore the purchasing power that would be distributed over this country amongst the masses is not available; hence from one side of this country to the other we are feeling the grip of the retaliation of other countries against the iniquitous, the silly, the asinine, performance of our attempting to live within the borders of the United States.

I know how men can grow eloquent when they have a protective tariff that shuts out all foreign competition, so far as sale in America is concerned, and can mulct the American people at any price they see fit, through combines, and leave the balance of us to do the best we can under that iniquitous system, when our life depends upon the good will and the open markets of the foreign world. Yet men stand on this floor and invoke a tariff so disastrous as the one that is already in existence, and then in aid of that seek to set the precedent and the principle of an embargo against foreign countries.

If we are denied an export market, then why do we stand here, as the Senator from Maryland indicated to-day, and say, "This is a world-wide thing?" We declared that we were so sufficient unto ourselves that we could raise a tariff wall around ourselves and deny the importations of foreign countries, America for America, and "Buy American," and the result is bankruptcy from the Pacific to the Atlantic, distress everywhere, food piling up until we are starving to death, clothing piled up until we are naked, and building materials piled up and we are homeless. That is the result of our attitude toward foreign countries.

Every man on this floor knows that when the war was over and the countries of Europe had no purchasing power in terms of gold, it was natural for them to look to the United States to allow them to exchange goods with us in order to rehabilitate the war-worn countries that were our allies. We promptly passed our antidumping law. For whose benefit? For the benefit of a little handful of protected manufacturers, against the interests of the laborers and the producers of the exportable raw materials here.

Two nations had more than 75 per cent of the monetary gold of the world. The foreign countries were our debtors. In place of our saying that we joined them to save democracy, immediately upon the cessation of the war we gave the lie to that expression and said we saved the world for autocracy, and put that idea into effect in the United States to the *n*th power.

Mr. President, as a Democrat, sometimes I feel very lonely in this body. Have we degenerated into a body of opportunists? Have we forgotten the fundamental principles upon which prosperity ultimately is to come and to abide perpetually? Here we are, grasping at any kind of a thing that seems to give some little relief to me and mine, while the masses of the people are not considered.

It has been said we should refer to certain leaders who have agreed upon a certain course. I have said, these are the leaders I have been hearing of for the last 24 years, since I have been a Member of the Senate; and if they have led us to where we are, for God's sake let us get a new bunch.

If this is the result of their leadership, then God save us from any further leadership on their part. If the result of a high protective tariff has led us to where we are, then God knows it is time for us to try some other principle. I, for one, resent the attitude of my colleagues on this side of the Chamber—not individually, but as a party—when they join those on the other side to put into operation a principle that we have denied as being a correct principle of government through all the history of party government in this country.

Mr. President, some wise one said, "A false principle wrought into real life will work itself out in disaster." It makes no difference how plausible it may seem at the time of its adoption, it makes no difference how the circumstances may justify its incorporation into our real life, you and I in the Capital of America have no right to incorporate into the laws of this country that which we know by experience and logic and reason has been disastrous to the masses of the people and of questionable benefit in the long run to the protected interests.

The PRESIDING OFFICER. The time of the Senator from South Carolina has expired.

Mr. SMITH. Mr. President, I have said this much. I had intended to try to show just how this condition is drifting. I perhaps have been derelict to my own self-respect by not voicing my sentiments on some of the things that have been introduced here by what the people thought was a body of sensible men.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Wisconsin to the amendment of the Senator from California.

Mr. COPELAND. Mr. President, I hope the Senator from Utah will not leave the Chamber for a moment.

Mr. KING. I am compelled to leave. I have some people waiting for me.

Mr. COPELAND. Before the Senator does leave I want to say he assumed a good deal in suggesting that I am in favor of this measure. I did not so indicate by my vote yesterday; and it was in all good faith that I asked him a question which I hoped he might answer and thus illuminate my own understanding of this matter. There are a number of matters which I do not care to discuss if the Senator is leaving the Chamber.

I am greatly concerned when I take up the details of our importations. In spite of what has been said by the Senator from Utah, I can not get the same comfort from the figures that he appears to get.

I find, for example—and it was this that I asked the Senator from Utah—that our imports of boric acid—I speak of that because it is a very common substance used in medicine, and used very extensively—from Italy have increased 1,490 per cent. On the other hand, there has been a material falling off in our domestic exports, amounting to about 1,000,000 pounds in the past year.

I suppose one can prove anything by statistics. But there are just as many figures to show that the Senator from Utah is mistaken as there are to fortify his position.

At the end of his remarks the Senator spoke about the American merchant marine. He told about how many of our ships are tied up because of the lack of export trade. Doubtless he is entirely unfamiliar with the fact that every nation in the world is making the same complaint. Bitter criticism has been passed only recently by British operators upon our policy of assisting the American merchant marine. The British Chamber of Shipping at a very recent meeting—a meeting held within six weeks—has passed resolutions condemning in bitter terms the policy of the United States in subsidizing and otherwise assisting our shipping. The British are feeling the pinch in their shipping activities. They are suffering from the economic depression, as we are, and likewise for our own activity.

Furthermore, Mr. President—and I want Senators to note this—the shipping interests of England, by solemn resolution, have recommended to the British delegates to the economic conference that they shall take positive action against the policy which we are carrying out in America. Also they are proposing that there shall be conferences of British delegates with the delegates of other nations in order that the economic conference may do exactly what British interests want done.

There was held in Ottawa recently, as everybody knows, the British Imperial Economic Conference. In that conference bilateral trade agreements were signed by those British countries which participated in the conference. Under the plan which was adopted the United Kingdom has decided and undertaken to levy duties on certain non-Empire imports and to control by quotas the importation of other products.

What has been the effect of the Ottawa conference?

I hold in my hand a letter which I received this morning from one of the great steamship lines sailing under the American flag, making reference to an address I made recently before the Sixth Annual Shipping Conference, held in this city, and I quote from the letter:

> Am very glad to note that you spoke of the Ottawa Trade Conference, which certainly is a severe handicap we ourselves are feeling in decreased business carried by us to all British possessions, including the West Indies, Nassau, etc., and emphasizes that that agreement between England and her colonies has been doing and is going to do far more injury to American shipping than most people imagine.

That is what is going on. I am not sure whether the amendment proposed by the Senator from California is wise or not, but it certainly is a fact that American shipping is suffering materially by reason of what the British-speaking people did at the Ottawa conference; and, if we may rely at all upon these figures, which have been presented by the Commerce Department, American manufacturers are suffering by reason of the present economic situation, and suffering apparently in a greater measure than the manufacturers of other countries.

Mr. President, I did not rise to make any extended remarks. I was simply seeking to reply to the Senator from Utah. I realize that perhaps in the pressure of time he was not quite so yielding as is ordinarily his wont. I did want to say this much, however, because no question which can possibly be considered by the Senate is more important than the question of how to put men back at employment.

When we find almost every manufacturing establishment in America out of business, no smoke belching from the smokestacks of most of these establishments, millions of men and women out of work, twelve or fifteen millions without employment, in my State a million families being supported entirely by charity, and the same thing as to increasing numbers throughout our country—it was testified this morning that nearly 5,000,000 families in America are now being taken care of by charity, representing 25,000,000 of our people—it is time that we thought seriously about any measure which has in it the hope of greater employment and the relief of human distress.

Mr. FESS. Mr. President, I am glad to hear the Senator from New York speak in the manner in which he has spoken.

Mr. JOHNSON. Mr. President, will the Senator yield to enable me to call for a quorum?

Mr. FESS. I prefer that the Senator should not do that.

The Senator from New York is a consistent Democrat, and is what I would call a protectionist Democrat. He is not alone in the Senate in that classification.

The Senator from South Carolina [Mr. SMITH], the Senator from Utah [Mr. KING], and the Senator from Maryland [Mr. TYDINGS] all have spoken on this amendment, as well as the Senator from Colorado [Mr. COSTIGAN]. These Senators are fine examples of advocates of unrestricted trade between countries. Their argument is logical if we concede certain premises, but very illogical unless we do concede those premises.

For example, if all the world is a neighborhood, and there ought to be no barriers at all along boundaries, that would only be presupposed on condition that the situations in all parts of the world are the same; that the same price we pay for labor in America will be paid in every other part of the world. If we had a situation of that sort, then I would agree with the Senator from Utah and the Senator from South Carolina that the barriers should be taken down; but that is a condition that simply does not exist. We have a different standard of living here from that which exists in many of the countries that compete with us. We want to maintain that standard, and the only way we can do it is neither to allow cheap labor to migrate to this country to compete with American labor nor to allow cheaply made goods produced by cheap labor to be sent here to come in competition with American-made goods produced at a high rate of wage.

Mr. COPELAND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from New York?

Mr. FESS. I have not much time, but I yield to the Senator.

Mr. COPELAND. Just this one moment, if the Senator will permit me.

I resent it when any man imputes to me a failure to follow Democratic principles if at times I advocate a protective tariff which protects the American workingman against the serf and pauper labor of Europe; and that is exactly my position.

I do not wish to take the Senator's time.

Mr. FESS. The Senator is not only right in that, but he has not any occasion to make an apology, because the early Democratic leaders, such as Madison, Jefferson, and Monroe, as well as Jackson, stood for establishing such a protective tariff as would make up the difference between the cost of labor in this country and the cost of labor in competing countries.

When there is no difference in the conditions, take down the barrier; there is no need of keeping them up; but if there is a difference, the only way by which we can maintain the American standard of living is to make the importing country pay the penalty in the form of a duty that will make up the difference between what we pay labor and what labor is paid in the other country.

We have legislated with that in mind. Our country has always been on a protective tariff basis, with the exception of a few periods. During most of our history we have been on a protective tariff basis. As far as the law now goes, we have sufficient protection if nothing is to be done except by law. But there is this difference: The countries which com-

pete with us under the burden of paying protective duties will get rid of that burden by simply depreciating their currency.

When they depreciate their currency, they cheapen labor, and, in the degree to which foreign countries have cheapened their currency, they have cheapened the cost of producing the things made by the labor paid in that cheap currency. So we have a situation where Great Britain, for instance, will produce an article costing $1, and we produce it at a cost of $1.30. Great Britain will have to pay a tariff duty of 30 per cent in order to bring that article into the United States. On the other hand, Great Britain goes off the gold standard, her pound drops from $4.87 to $3.40, or there is a reduction of 33⅓ per cent, and thus Great Britain cheapens the cost of her product 33⅓ per cent. In that way she is enabled to increase her exports to us, after paying the tariff duty itself. Even with the tariff law on the statute books, England can pay the duty, and then, by cheapening the cost of producing an article through cheap labor, because of cheap money, she can bring the article in in spite of the protection we have attempted to afford the American producer.

That is precisely what is done, and I wonder if the Senator from Utah, who continually in this forum expresses the idea that we can not export unless we import, is bidding for imports. If he is, then all he needs to do is to have us take down the tariff barrier, or allow countries competing with us to adopt a cheap-money standard. If those countries on a cheap-money basis produce articles in competition with us at a smaller cost of production than that at which we can produce them, their exports to this country will increase.

Mr. President, that is the explanation of the thousand per cent increase in importations to this country of certain articles, articles which were kept out at one time because of protective tariffs, but now, since the protective tariff has been absolutely nullified by the depreciated currency, the increase will be in some cases more than 1,000 per cent.

If we intend to maintain the employment of American labor, that can not be accomplished if a depreciated-currency country becomes an exporting country, and makes this country the market, and floods us with imports. That is precisely what has taken place. So far as the actual principle goes, there are many articles on which there are not protective tariffs, because the protective tariff has been totally nullified.

Mr. President, some of my Democratic friends have been arguing that we ought to impose our tariffs on the principle of the difference between the cost of labor in this country and in competing countries, and they have voted on that basis in the past. I want to say to them now that they would not in any way be inconsistent, under present conditions of depreciated currencies, in voting for the principle that we were buying in the United States in cases where American goods can be produced.

While I was not certain when the pending amendment was first offered whether it was not going too far, whether it was not reaching in some particulars to the extent of an embargo, and I would not want to go to that extent, I think the amendment is a movement in the right direction; and when 12,000,000 people are unemployed, at least we ought not to increase the unemployment by further increasing distress on the part of American industry by forcing it into competition with cheap-money countries.

Mr. President, it seems to me we have reached the point where every American ought to stand up for the employment of American labor rather than look across the lines to employ foreign labor.

Mr. PITTMAN obtained the floor.

Mr. BLAINE. Mr. President, will the Senator from Nevada yield to me to permit me to modify my amendment?

Mr. PITTMAN. I yield.

Mr. BLAINE. I desire to modify the amendment I submitted by inserting "and" before the word "or," so that it will read "articles of the growth, production, and/or manufacture of the United States."

The PRESIDING OFFICER (Mr. DICKINSON in the chair). The amendment to the amendment will be modified as suggested.

Mr. THOMAS of Oklahoma. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. THOMAS of Oklahoma. The amendment now being modified, does not that give those who have discussed the prior amendment the right to discuss the amendment as now modified?

The PRESIDING OFFICER. It is the understanding of the Chair that a modification of an amendment does not entitle a Senator to another opportunity to speak on the same amendment.

Mr. PITTMAN. Mr. President, all of our legislation at the present time is abnormal. The conditions of the world are abnormal. It is almost impossible, under world conditions to-day, to apply principles which would be applicable in normal times.

The economic situation of the world is such that it has unbalanced all facts we used in times gone by in sustaining certain principles and policies. For instance, to-day the United States, and possibly France, to a certain extent, are the only countries in the world on the gold standard. Our standard of measure on the gold standard is from two to three times as high as the measure of most other countries. It is to-day one-third higher than the measure of values and property and labor, even in Great Britain. It is twice as high as the measure in Norway and Sweden, Argentina, and other countries.

Mr. President, as has been so ably stated, the difference in the costs of production in various countries has upset all calculation with regard to tariff protection. Let me illustrate that very simply. In the State of Washington wood pulp was being produced very economically, because it was a by-product of the logging industry. While commercial logs were being taken out, spruce trees would be taken out at the same time for pulp. All of the plants that were doing that are now closed down entirely, not due to any tariff situation, but due entirely to the depreciated currencies of the world as measured in international trade by gold.

A shipper from Norway, for instance, brings over a ton of pulp. He sells that pulp in this country for gold, he returns with the gold, and he buys two units of value in Norway currency with that gold, but it took only one unit of gold to produce that ton of pulp. In other words, there has been a profit to the Norwegian of 50 per cent just on the exchange of the Norwegian money for our gold-standard money. That difference runs all through the history of international trade at the present time.

For instance, take American cotton. We are selling more cotton to China to-day than we ever sold, but we are selling less cotton to Great Britain than we ever sold. It is reduced to almost half of what we sold, because Great Britain's sales of cotton piece goods to China and other oriental countries have dropped off two-thirds. That fall of two-thirds is due entirely to the difference in the exchange value of the Chinese money with higher valued money.

China is on a silver basis. Silver passes at par there, but when Chinese try to buy in some foreign country they have to exchange their money for gold-standard money or for other higher valued money. When Great Britain was on the gold standard the Chinese had to exchange four and a half of their dollars, the depreciated currency of China, for one unit of value in Great Britain with which to buy British goods.

We all understand what a depreciated currency means when a country is off the gold standard, but we never understood that there was a depreciation of a silver currency due to fall in the price of silver. In 1929 the sale of cotton piece goods shipped from Great Britain to China was 215,000,000 linear yards; then it dropped in 1930 to 64,000,000, and to-day it is half that. Consequently our cotton farmers here are injured in their export trade to Great Britain by reason of the depreciated-currency situation of China, India, and South America.

There is another thing, Mr. President. I voted against the last tariff bill before us. There were probably 30 gov-

ernments which at that time protested that if we raised the tariff they would retaliate. Many of our statesmen here did not believe they would retaliate. As a matter of fact, 49 countries retaliated.

It is useless for us to discuss what brought about that situation; it has been brought about. Every country in the world to-day is using every means in its power to prevent every other country from selling goods in its markets, and all countries are doing that quite successfully, largely by reason of the depreciated currencies.

Another thing, a country that sells to us for our gold does not buy our products here with that gold, because it can go to a country on a depreciated currency or a currency of a lower value and buy more goods there with such gold than here. There is no such thing as a balance of trade any more, because goods are sold for gold here and with that gold goods can be purchased in countries with depreciated currencies where the money will buy from a third to three-quarters more than it will buy here. That is the reason why the depreciated-currency countries have not had a rise in labor costs or material costs. It is due to the fact that the whole world, with the exception of two countries, is on a depreciated-currency basis, and those desiring to buy purchase in countries with depreciated currencies, and not here. For instance, the Norwegian who gets gold here for his pulp will not buy other things in this country when he can buy the same products he would purchase here in some other country for half the cost.

That is the condition now. We find to-day that the British Government is going farther and farther in its efforts to exclude every country, except the British Empire, from the markets of Great Britain. The other day a citizen of the United States tried to sell a plant which he had in Great Britain, and he was refused permission to sell because it was said it would take money out of Great Britain into the United States.

The British Government has gone farther and now requires that goods coming in from the Empire for sale must have at least 50 per cent of the products of the British Empire in the manufactured article and 50 per cent of the labor of the subjects of Great Britain therein.

It is all wrong. It is the effort to have the market entirely for ourselves, with the privilege of selling somewhere else, which has stagnated the surpluses of every country within the country itself, destroyed its trade, created an oversupply, and destroyed the domestic market. What can we do about it? There is nothing we can do about it until we can negotiate with those governments. With every country in the world having practically a tariff barrier like ours, with every country using every effort to exclude foreign goods, we have no other alternative. We have to do the same thing until sanity can be brought about in the world again and until we can negotiate reciprocity treaties such as Great Britain has negotiated with her colonies. That may come out of the economic conference, but if it is ever accomplished at all it will have to be accomplished out of negotiations in which each of the parties will yield some benefits to the others and each of the parties will receive some benefits.

I agree fully that the whole trouble in the United States and in the world to-day is the undisposed-of surpluses. The whole problem is a price problem. So long as the price of products is below the cost of production there will not be purchases. When there are not purchases, manufacturing institutions will not run. When they do not run, men will not be employed. When men are not employed, they will be thrown back into the class of nonpurchasers. That is what is going on. But we have no remedy for it now. The only remedy we will ever get is to place ourselves in the same impregnable position as the rest of the world has done, illogical as it may be, and then see if we can not reach some basis for reciprocity treaties and ultimately start the wheels of progress and business again.

Mr. CONNALLY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Texas?

Mr. PITTMAN. I yield.

Mr. CONNALLY. What is the Senator's reaction to the proposal for reducing our own wall to meet the situation and thereby raising the prices of commodities to enable debtors to pay their debts and encouraging people who are hoarding money to bring it out because of the fact that if they do not bring it out it will reduce their opportunity in the future?

Mr. PITTMAN. If the Senator has in mind stating that a $10 gold piece is a $20 gold piece and considering contracts and obligations that are based on the present unit value of money, I will state that, in my opinion, it is totally impractical. If he has in mind the cheapening of the value of money by increasing the currency of the United States on a sound basis of metal, gold and silver, to whatever extent may be logical and reasonable, I am entirely in accord with him in that matter.

Mr. CONNALLY. Will the Senator point out how that can be done when there is plenty of money in existence, when the banks are full of money, but when, too, the trouble is that money is too high? There is no more money as long as that money is redeemable in gold, while we tie every dollar to a gold dollar, and leave money still high.

Mr. PITTMAN. I think it is very unfortunate that the great bankers and economists of the country have been so selfish and so negligent that they have not suggested such a policy. I agree that their statements with regard to the circulation of currency are deceptive. Mr. Ogden Mills the other day publicly stated that there is $600,000,000 in the banks of the country in excess of the legal reserve. He says that is good for an expansion of $9,000,000,000. But at the same time he says we can not get it out. Of course, it can not get out, and for two reasons.

The people of the world do not believe to-day that there is enough gold to pay, if it is demanded. As long as they thought there was sufficient gold reserve, it was enough; but when they begin to doubt it, then it is not enough. We have $600,000,000 with a basis of $9,000,000,000 of credit that can not be used because the bankers can not lend it on a falling market—a falling property market, a falling commodity market. They can not reduce their reserves as long as there may be a lack of confidence in the country that will bring about runs on the banks. It is true there is the money in existence, but for all the practical good it does it might as well be on the bottom of the ocean. The Federal reserve bank has $4,000,000,000 of extra credit on hand now over and above its legal reserve. The Glass-Steagall bill was passed for the purpose of encouraging the Federal reserve bank to lend to member banks. The banks will not borrow it because they can not lend it safely, and therefore that plan was an utter failure.

Possibly some one may find a method by which the Federal reserve banks may be induced to finance the Reconstruction Finance Corporation or some other agency. What it can not get out through the banks the Federal reserve bank may get out through some other instrumentality than the banks after legislative authority.

The PRESIDING OFFICER. The time of the Senator from Nevada has expired.

Mr. PITTMAN. Mr. President, I ask consent of the Senate to place in the RECORD at the end of my remarks, as a part of them, a statement that I made on yesterday before a committee of the House of Representatives touching in part the same subject I was discussing.

The PRESIDING OFFICER. Without objection, it is so ordered.

The statement is as follows:

STATEMENT BY SENATOR KEY PITTMAN, OF NEVADA, BEFORE THE COMMITTEE ON COINAGE, WEIGHTS, AND MEASURES, OF THE HOUSE OF REPRESENTATIVES, ON FEBRUARY 2, 1933, WITH REGARD TO THE SILVER-MONEY PROBLEM

Mr. Chairman, I have the honor and pleasure to be before your committee upon your invitation, to discuss legislation touching the world silver problem.

The traditions, habits, and conceptions of peoples developed throughout the ages can not be changed—except possibly through long periods of evolution—by legislation. The money and the currencies based thereon of all civilized nations is now, and, since money has been used has been, gold and silver. Gold and silver were first used as an aid to and instrumentality in barter and

trade. The ancient farmer discovered that a piece of silver of a certain size offered him in payment for a cow would be accepted in exchange for a horse. So the farmer accepted the piece of silver.

Laws did not make money of gold and silver. They were money before monetary laws were ever enacted. Laws were but declaratory for and served to fix the metal contents of coins for convenience in trade and the payment of debts. Gold and silver, whether in the form of bullion or coin, are and for ages have been accepted in exchange for goods throughout the world. There are sound reasons why such metals were accepted as mediums of exchange. These metals were found substantially everywhere, yet in all places they were scarce. Their production, while slow, was continuous and uniform. The ratio of the production of such metals was not only uniform but substantially certain. Since the beginning of time, as far as information can be obtained, there has not been produced throughout the world on the average more than 15 ounces of silver to 1 ounce of gold. During 1932 there were less than 13 ounces of silver produced to 1 ounce of gold throughout the world. This uniformity of production and ratio facilitated the use of both metals in trade and in the exchange of such metals. There was a natural ratio between such metals based upon equal demand and relative supply. Laws did not make gold and silver money, but laws decrease the demand for silver through restricting its use as money. This, of course, decreases its relative value. What I seek is first to remove or neutralize these restrictions so as to restore the normal law of supply and demand.

In the last 15 years the price of silver has fluctuated from $1.39 an ounce to 25 cents an ounce. The question naturally is asked, Why restore silver money to its fullest use and former exchange value with gold and prevent such wide fluctuations? The reasons that actuate me are these, namely:

1. Gold or silver is the measure of value of the currencies of all civilized governments whether those metals be in possession or in expectancy.

2. There are only about twelve and one-half billion dollars' worth of monetary gold known to be in existence. It is estimated that there is three times this amount of currency outstanding resting on and redeemable by this gold base. This is exclusive of the bonds, notes, contracts, and all other obligations payable in gold, which amount to many times this figure. It is generally admitted that the monetary stock of gold is now, or will in the reasonably near future, be insufficient as a base for the world's monetary requirements. This burden upon gold is accentuated by lack of confidence in ability to redeem gold currencies and obligations and the knowledge of the maldistribution of gold, and the requirements of the payment of international war debts in gold, and incidentally hoarding of gold by governments and individuals.

3. There are only approximately 11,000,000,000 ounces of silver available in the world for monetary purposes. Of this conservative estimate of 11,000,000,000 ounces probably 7,000,000,000 are permanently locked up in the hordes of India and China. If all this silver were used as a base for silver currencies and as a supplement for currencies based upon gold, whether used in international trade or exclusively for domestic purposes, it could not possibly increase the basic money of the world over $12,000,000,000 even if the parity of such basic silver money were restored to a parity with gold based upon the relative production of gold and silver.

4. It is now, and for ages has been, the measure of values and the wealth reserve of over half of the people of the world.

5. The depreciation in the value of silver has pro tanto depreciated the value of the money of silver-using countries in the exchange of their money for gold-standard moneys for the purchase of products in gold-standard countries.

6. This depreciation with regard to the money of silver-using countries has had the same effect upon our trade and commerce as with countries formerly on the gold standard that have gone off the gold standard and now have a depreciated currency as measured by gold.

7. We understand this effect upon our foreign trade with countries formerly on the gold-standard basis. The same condition now exists, and has existed since 1928, relative to our trade with countries whose ultimate purchasers pay for our products in silver.

8. Depreciated currencies—and I mean depreciated currencies in international trade, because it is only there that it is measured by the gold standard—have raised a wall against our exports and proportionately reduced our tariff protection against such countries of depreciated currency to substantially the amount of depreciation.

9. We are becoming isolated from world trade. Our surpluses are thrown on the domestic market, creating oversupply and a constant depreciation of commodity prices. This result is destructive not only of our foreign and domestic market but the maintenance of stable governments in silver-money-using countries. It forces their people to an industrialization destructive of our market for manufactured products in such countries. In substantiation of this statement, I call attention to the records of our Department of Commerce and reports of our officials.

10. The depreciation of the capacity of silver-money-using peoples to purchase our goods, produced and sold on the higher gold standard, has almost extinguished some of our greatest potential markets.

11. We are forced to the alternative of lowering our money measure of values or of raising the money measure of values of our foreign customers.

12. The destruction of the monetary value of silver in international trade will tend to force all countries ultimately upon the gold standard, and thus place a greater strain upon gold as the monetary base.

I have outlined—hastily, I must admit—some of the reasons that impel me to seek the remonetization or at least the restoration and stabilization of the value of silver. This determination is not new on my part. I have been working to this end two or three years. The action of the United States Senate convinces me that it agrees with such necessity whether it agrees with the means suggested or not.

In February, 1931, the United States Senate adopted unanimously a resolution introduced by me requesting the President to call an international conference for the purpose of the removal of restrictions to a higher use of silver as money. The Chief Executive did not call such a conference.

I sought, then, to accomplish something by the action of our own Government. I introduced in the Senate a bill, the substance of which is now under consideration by your committee, in the form of a bill introduced in the House by Congressman McKEOWN, of Oklahoma, and referred to your committee, directing the Treasury Department to accept tenders of silver produced in the United States and to pay therefor in silver certificates to be issued by our Government at the market price of silver, such price to be determined by the Treasury Department as of the date of tender. From the silver so purchased a standard silver dollar is to be coined, to be held in the Treasury for the redemption of each dollar silver certificate issued for the purchase of such silver.

There would, of course, be a surplus of bullion remaining in the Treasury. At the present market price the Treasury Department would purchase nearly 4 ounces of silver for a $1 silver certificate. As it only requires about seventy-eight one-hundredths of an ounce of silver to manufacture a silver dollar, there would remain a surplus of approximately 3.22 ounces of such silver in the Treasury in addition to such standard silver dollar so purchased by the dollar certificate. This surplus silver is to remain in the Treasury as additional security against any depreciation in the value of the silver certificate. This additional security, in my opinion, is unnecessary, but it satisfies the fear of those who are constantly uneasy with regard to the depreciation of our currencies. There are now in circulation in the United States nearly $500,000,000 in dollar certificates issued under similar laws, and these certificates have not during this century suffered any threat of depreciation.

I must confess that this act will not result in any material expansion in our currency. Such is not the intent of the act. The purpose of the act is to have our Government do something that seems necessary that individuals can not do. The act will result in the reduction of the world's supply of silver on the market of the world for a period of five years. There is an oversupply of silver on the market. This word "oversupply" must be distinguished from "overproduction." There is no overproduction of silver. When I say production I mean mine production. When I say supply I mean silver thrown on the market of the world derived from all sources, including the debasing and melting up of silver coins in various countries.

For instance, in 1929 the world production of silver was 261,511,985 ounces. In 1931 it was 192,709,971 ounces. For 1932, based on estimates, it was approximately 160,000,000 ounces. But the total supply in 1929 was 328,511,985 ounces and in 1931 it was 255,266,700 ounces. The supply over production was derived from the melting up of silver coins in India and the selling of the metal on the markets of the world. This oversupply, coming from an unnatural source, had the natural effect of beating down the price of silver.

There was an even greater effect than in selling this silver, and that was the authority of the secretary of the treasury for India to sell any quantity of such silver at any time and at any price, while at the same time he had a supply on hand of such silver equal to the world's production for approximately two years. In other words, in 1928, when India started to sell silver from melted coins, it had approximately 400,000,000 ounces of silver in such form in its treasury. To-day, after selling approximately 140,000,000 ounces of such silver, it has around 400,000,000 ounces of silver still available in the treasury for such sale. This is due to accretions in the treasury from general circulation. According to reports from India, such sales are continuing, notwithstanding the abnormal low price of silver. There is no indication that such sales will cease.

It is futile to discuss here the causes that have and now actuate the British government for India in the initiation and continuance of such policy. The fact is it has been destructive to the exchange value of the silver moneys of such silver-using countries as China, and has destroyed the export trade to all those countries from countries on the gold standard, such as the United States.

The question was and is, What can we do about it? The British industrialists have protested against the policy. It is protested against by the president of the Imperial Bank of India and by the Indian people. These protests have been of no avail.

Sir George Shuster, the treasurer for India, who seems to have arbitrary powers in the matter, has demanded that silver producers reduce their production. He is still as ignorant of the facts with regard to the production and consumption of silver as he was

when he inaugurated the destructive Indian policy. He did not know then—and apparently he does not know now—that 70 per cent of the silver production of the world is a by-product in the production of other metals, such as gold, copper, lead, and zinc, and that so long as there is a market for such metals they will be produced, and, of course, silver will be produced as a by-product. He did not know—and he probably does not know now—that the maximum production of silver in the world for all time was only 260,000,000 ounces in a year. He does not know that there was only a normal increase in the consumption of silver, which was accurately measured by the normal increase in production. He does not remember that when during the war a crisis arose by reason of the inability of the British Government for India to obtain silver for the redemption of their silver rupee notes—that the only available surplus of silver in the world that could be found were the standard silver dollars in the Treasury of the United States, and that we had to take those silver dollars out of the Treasury and supply them to meet such demand. Such ignorance is not subject to criticism, for it is general, nor are my statements intended as a criticism.

A majority of our economists and financiers hold to the myth that silver can be supplied without limit. They know nothing of the statistics of the production and consumption of silver throughout the ages.

I beg you to pardon me, Mr. Chairman, for diverting from my subject. Sir George Shuster has demanded that the producers of silver reduce their production. This can not be accomplished for the reasons I have stated.

Our Government, however, can take off of the market the annual production of the United States for the period of five years, as provided in my bill. This will, to a certain extent, comply with the arbitrary demands of Sir George Shuster, and will, to a certain extent, neutralize the oversupply that he insists must be thrown on the market of the world.

Let me explain this: Sir George Shuster desires to sell silver derived from such melted coins—from thirty to fifty million ounces of silver a year. The United States produced in 1932 only 24,000,000 ounces. The most it has ever produced is 61,000,000 ounces. That was during the great peak production of copper, lead, and zinc in this country. The withdrawal of silver from the market of the world through the process of my bill will neutralize, to a certain extent, the oversupply derived from the melting up of Indian coins. If the Governments of Canada and Mexico should follow a similar procedure, then all of the sale from India would be neutralized and the law of supply and demand, based upon mine production and normal purchases, could be maintained and silver would return to the normal price of around 60 cents an ounce.

Now let me cite to you some of the objections made to this bill of mine by the Secretary of the Treasury, Mr. Ogden Mills.

In the first place, he contends that if I seek expansion of currency my plan will not result in any material expansion. He is right in that, because it would only take about $6,000,000 in silver certificates to purchase all the silver produced in the United States for 1932.

He doubts whether it would aid the mining industry. It is true that the producer of silver would get no more money for his silver from the Treasury than he would obtain anywhere else in the world, because the market price of silver is the same throughout the world, being fixed by four brokers in London every morning. The miner, however, would be helped by being able to sell to the Government and thus reduce the oversupply of the world, caused by the action of the British Government for India; and, of course, the neutralization of the silver supply would tend to restore silver to its normal price of between 60 and 65 cents an ounce. In that manner the silver producer would be benefited. That, however, is a small part of the benefits to be derived from the act. What I seek is to restore the purchasing power of the depreciated currencies of China and other silver-using countries, as all of us seek to restore the normal value of the depreciated currencies of those countries who have gone off the gold standard. This will help in the purchase of the world's surplus production, thus lifting it off the world's domestic markets and thereby increasing commodity and property prices, which, in my opinion, is the essential thing to the return of universal prosperity.

The Secretary of the Treasury, in his correspondence with me, contends that silver is only a commodity and that there is no more reason why the Government should buy silver than it should buy any other commodity. He forgets that silver is not as much a commodity as gold. He forgets that four-fifths of the silver now being produced, and that ever has been produced, has been used for monetary purposes, while only half of the gold ever produced has been used for monetary purposes. He forgets that over half the people of the world use silver as money in their own countries, and that they can not use it as money in exchange for our money, with which to buy our products, because we value gold so high and silver so low. He suggests that the time might come when there would be an overbalancing of silver currencies as against currencies based on gold.

No one expects there will be much increase in the silver production of the United States in the next few years. It is now 24,000,000 ounces annually. Its maximum was 60,000,000 ounces. The purchases only exist for five years. If the average during that period was 45,000,000 ounces per annum, it would only mean 225,000,000 ounces. At the present price of silver it would be less than $60,000,000 in silver certificate issues. Even with this issue added to our present issue of silver in silver certificates, the proportion of silver issues as against gold issues in our country would be far less than they were in 1913.

The question is, Why do I support this bill, which has negligible power for currency expansion, against other silver bills which have greater power of currency expansion?

The first reason is that I am directly interested in obtaining a market for the surplus production of our country through the restoration of our export trade.

The second reason is that there may be other methods of expansion within our present monetary system, and the third reason is that my bill is the only bill of the many introduced in the United States Senate that has received a favorable report from any committee.

I realize that there are two principles involved in legislation. One of them is to take nothing less than what you think is right, and the other is to compromise upon the best you can obtain if it constitutes an advance. My bill, in my opinion—and I am only using my judgment as a legislator—is the most that can be obtained through congressional legislation in the near future, and certainly we are faced with an emergency that requires expeditious action. Other advances may be made in the future, but I doubt if any further advance can be made at the present. I have voted against more far-reaching silver measures because I knew that the advocacy of such measures was futile—yes; even more than futile. It would confuse the minds of legislators and arouse the suspicion of an intent to attack our present gold-standard monetary system.

I have no intention of undermining, weakening, or destroying our present gold-standard monetary system. I do not think that it is at all necessary to the remonetization, the restoration to parity with gold, and the stabilization of silver prices. Gold to-day measures the international value of every currency in the world, whether it be the pound sterling or the Chinese dollar. I am speaking of the value of money in the purchase of goods in other countries. The Chinese dollar has a par value in China and in purchasing goods in the United States it has only a value of 20 cents. Gold is accepted throughout the world to-day as the measure of the value of money in international trade. It has existed for 60 years at least. It would be difficult to change it by legislation. Nothing would be accomplished by changing it through legislation.

What we seek is to have other measures of value conform to the gold measure. That is what we have done and are now doing in the United States. We have more silver in circulation in the United States and silver currency than any other country of the world outside of China and India. One-twelfth of our currency is silver currency. Our dollar is worth $1.29 an ounce in gold. The same size silver dollar in China is worth 20 cents in our gold. There is only approximately 20 cents' worth of silver in our silver dollar, measured by the market price of silver, and yet 10 of our standard silver dollars readily exchange for $10 in gold, which makes the price of the silver in the silver dollar $1.29 an ounce. If every great commercial country in the world had the same system, there would be no question about the parity of silver with gold, and that would be on the natural parity of 16 to 1. In that event, the Chinese would not have to pay $3,000 for an automobile through the process of exchanging their money for gold, but would exchange their silver dollar for a dollar of our gold, and would only have to pay $600 for an automobile.

I came here at your invitation to discuss the reasons for my bill. I beg your pardon for having diverged onto the general silver problem. I am not here to oppose any other bill that has been introduced. I seek only that which may possibly become law without delay.

I am satisfied that purchasing power must be increased, not only in our own country but throughout the world, before prosperity can possibly return. I do not believe that purchasing power can be increased until a larger quantity of sound money can be made available for those who must purchase money with goods and property. I do not claim that the expansion of available money through the restoration of the purchasing power of silver is a panacea for all of our ills. I am convinced, however, after a long study of the situation, that such restoration would instantly increase purchases in our country, reduce our surplus of production, and thus increase our purchasing power, increase the capacity of our manufacturing institutions and the employment of our laborers. I can not content myself with the policy now indulged in by some of our statesmen that the only remedy is liquidation, liquidation, further and further liquidation.

I have no confidence in the theory that the depression has flattened out. I admit that it has been retarded. This frequently happens just before death. I admit that our airplane of finance spiraled too rapidly up into the stratosphere. We all know that it has been in a tail spin, rapidly and dangerously approaching earth. The pilot may have gained some control, he may have flattened it out to some extent, but we know that the earth is close and that a crash will bring destruction and conflagration. It may be flattened out, but what obstacles are ahead of us in the fog we do not know. Isn't it time to pull back on the controls and elevate our financial plane so that it may assuredly and safely rise above all obstructions?

I ask leave to file with your committee as a part of my remarks the report of the Banking and Currency Committee of the United States Senate in which it approved my silver purchase act, which in identical form is now under consideration by your committee as introduced by Congressman McKeown, of Oklahoma.

Mr. JOHNSON. Mr. President, permit me to tender my apologies to the Members of the Senate individually and as a body. When I introduced my amendment I had not the slightest intention or belief that it should or did impinge on anyone's tariff views or that it affected in any way, shape, form, or manner anyone's prejudices concerning an embargo. I imagined I was presenting a straight-cut proposition which was of value to the country and which in these times might aid just a wee bit. Had I any conception or idea that I was interfering with tariffs or that I was provoking a discussion of tariffs and embargoes such as we have listened to for the last two days, I doubt if I would have had the temerity to present the amendment or to have it discussed upon the floor of the Senate at all.

Mr. President, there is a distinct issue, in my opinion, presented by the amendment that I have proposed. I stand upon that issue, sir. That issue is so plain that I do not think any man can misunderstand it in the slightest degree.

Tariff involved? Embargo concerned? Why, sir, I hold in my hand the six different laws which, in the last few years, have been enacted unanimously by this body of similar character to that which I propose. I have here the specific documents which do measurably in certain departments what I seek to do with all departments. Sir, when these specific laws came before this body there was not a soul here, nor any other place with which I am familiar, who said one word about the fundamental principles of commodity prices, of tariffs, of embargoes, or of any other question of like import. I recall, sir, when I stood here with my brethren on the other side of the Chamber and demanded that the Navy purchase only oil mined in the United States of America. I was very glad indeed with my Democratic brethren to make such contest as I could in behalf of that purchase by the Navy.

I stood here when gentlemen were talking about the outrage that was perpetrated by some department in the purchase of twine, sympathetic with them, and aiding them in passing the necessary legislation which at their instance was passed.

Here in my hand, sir, are the laws of like character, of similar import with the amendment which I have presented here, which unanimously were passed by the United States Senate, not only unanimously but enthusiastically. Reading the RECORD, as I have, there is not a single line that I could find in it of protest for a single one of these laws nor a single syllable that was uttered upon the question of tariffs or embargoes.

So I thought I was justified, Mr. President and my brethren, in saying that there is just one principle involved in this measure. Assume, sir, upon a building on Pennsylvania Avenue which we are constructing to-day out of money wrung from the taxpayers of this country, that bids are advertised for, and that a certain portion of the building is to be built of a certain kind of material. Assume, sir, that some one who manufactures the thing desired in Germany, in Italy, in France, or in England presents a bid for the article to be manufactured over there by their workmen, presents a bid that is $1 or $5 or $100 or $1,000 less than the article can be manufactured for in this country by our people in our factories and by those who pay the taxes which erect the very building.

Will you say to me, as some of you gentlemen do in your arguments, that if such a contingency is presented we are going to destroy everything that we have; we are going to permit a tariff wall to be built around the United States of America; and we are going to have an embargo that never again will permit us to be prosperous if we give the bid to a hundred dollar higher American bidder? Oh, no; you can not mean that. That, however, is exactly the argument that is made here against this amendment.

There is the issue. I accept that issue and that challenge that has been made upon this floor. I accept the issue and the challenge, and I say that if an American industry can bring to us goods manufactured in an American factory, and can with American workmen produce those goods for use upon a building being constructed by the United States of America, though its bid may be a dollar or two or five or ten or a hundred dollars higher than the bid for the same sort of thing manufactured abroad by foreign workmen in a foreign factory, I want the bid awarded to the American factory and to the American workmen. That is exactly what this amendment does and nothing more, and that is the issue that it presents here now.

I insist there is no question of tariff involved; I insist there is no question of embargo involved; I insist that the amendment does not in any degree affect the barter or the trade or the trafficking of peoples of any land with our land. We simply say that the money of our taxpayers may be accorded our people who pay those taxes and that their goods shall be the ones that shall be accepted, other circumstances being equal, the price not being unreasonable, and the public welfare being unaffected. That is the whole purpose and the only purpose of the amendment.

Why is it that when Britain from 1920 until 1933 said, in so many words, only British-made goods shall be used in any British construction, whether it be a road or a building or relief of some kind, other than the mere dole—when Britain said under those circumstances that only British goods may be used and only British manufactories may be favored, why is it that we can not do it? Why is it such a virtue in Britain and such a vice in America to make that declaration?

The amendment is a simple one which has in its essence been approved again and again by the Congress of the United States. It is an amendment that in these times, I submit to Senators, should not for an instant be forgotten, but it should be adopted without demur or delay.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Wisconsin [Mr. BLAINE] to the amendment of the Senator from California [Mr. JOHNSON].

Mr. LA FOLLETTE. Upon that I ask for the yeas and nays.

CURRENCY INFLATION

Mr. THOMAS of Oklahoma. Mr. President, there has been considerable said about depreciated currency; in fact, we have bills pending in Congress providing that our present tariff laws shall be amended to protect domestic products against the depreciated currencies of foreign lands.

Mr. President, instead of having depreciated currencies in foreign lands, I assert that it is not so much the fact that those currencies have depreciated as it is that the American dollar has appreciated. Take, for example, Great Britain. The British pound is now worth from $3.36 to $3.38. The pound is worth, at that rate, much more than it was along about 1920 or even in 1921 or 1922. The American dollar, based upon gold, has gone up in buying power; its purchasing power has risen; and that is the reason why, in my judgment, we have occasion to speak of the "depreciated currencies" of other lands. The American dollar has gone above the currencies of foreign lands, not that foreign currencies have receded from the value of the American dollar.

Mr. President, it appears to me that the Congress is proceeding upon the theory that we are to retain the present high purchasing power of the dollar. I have here a statement by Mr. Herbert Little. I do not have the pleasure of knowing Mr. Little but because his data are, in my judgment, conservative, I call the attention of the Senate to some of the facts given by him.

This is of date January 1, 1933, and the data are given under the heading—

Our wealth, debts, taxes, income.

I read:

The national wealth in 1930, $329,000,000,000, or $2,677 per capita. In 1932 (estimated) $260,000,000,000, or $1,964 per capita. Total debts (estimated) $203,000,000,000, a minimum of $1,624 per capita.

If these figures are correct, they show we have a Nation worth $260,000,000,000 and at the same time we owe debts

of $203,000,000,000; in other words, we owe almost as much as the entire property of the Nation is worth.

Total taxes, $15,000,000,000 a year, about $120 per capita.
Total income, $37,000,000,000 (estimate of Senator BORAH), compared with $85,000,000,000 in 1929, or $296 per capita.

DEBTORS AND CREDITORS

Two Cornell economists analyzed the debts in this country, as of 1929, in the following fashion:
Corporations, $76,000,000,000.
Town and city mortgages, $37,000,000,000.
Bank loans, $37,000,000,000.
State, county, and local government debts, $21,000,000,000.
Farm mortgages, $9,000,000,000.
Life insurance policy loans and premium notes, $3,000,000,000.
Retail installment paper, $3,000,000,000.
Pawnbrokers' loans and unlawful loans, $1,000,000,000.

HOW MUCH IS A DOLLAR?

If you say the dollar of 1926 was worth 100 cents, the dollar of 1917–1920 was worth from 65 to 84 cents, and the dollar of to-day is worth $1.56.

Mr. President, I cite these figures as an argument in support of my statement that the trouble is not that the currencies of foreign countries have depreciated but that the American dollar has appreciated from 65 cents in 1920 to 156 cents to-day.

I read further:

To the debtor that means it takes 50 per cent more labor or goods to-day to pay off a debt contracted in 1926 than it would have taken then, and twice as much labor or goods to pay off to-day a debt contracted in 1917–1920.

In support of this theory, I ask permission to incorporate at this point in my remarks copy of a petition to the Congress of the United States signed by James C. Jones, of St. Louis, dated January 15, 1933.

The PRESIDING OFFICER (Mr. FESS in the chair). Without objection, it is so ordered.

The petition referred to is as follows:

THE ELUSIVE DOLLAR

To the Congress of the United States:

So far as people without money are concerned, a rising dollar is about as bad as a falling mark.

Wealth in the form of real estate, bonds (other than Government bonds), mortgages, or other securities is well-nigh valueless, for it is unsalable and banks and other financial institutions will lend little or nothing upon it.

The dollar is hoarded—hoarded by banks as well as by individuals—and neither is to be severely criticized in these trying times.

But the fact remains that our only "medium of exchange" is disappearing with increasing rapidity.

Trade can not function without a medium of exchange.

Any attempt to change our existing dollar is cried down by the seeming opprobrious epithets, "Inflation," "Cheap money," "Rotten dollar."

Securities now worthless for borrowing or lending might have at least "some value" if we could have a "medium of exchange" other than the now highly prized, highly priced, and muchly hoarded gold dollar.

Can such medium of exchange be provided without inflation?

Mr. THOMAS of Oklahoma. Mr. President, I call the attention of the Senate to a letter just received from a member of the Legislature of the State of Arkansas. I read the letter, addressed to myself.

LITTLE ROCK, ARK., *January 30, 1933.*

I am inclosing a copy of House Concurrent Memorial Resolution No. 2, which has been adopted by the Forty-ninth General Assembly of the State of Arkansas. It, to my mind, is one remedy for the cure of the present economical depression, because money is to the country, economically speaking, as blood is to the human body.

This letter is signed "Marcus L. Miller, representative of Polk County."

The postscript of the letter reads as follows:

You will note that a copy of this resolution is being sent to each of the 42 legislatures now in session in the United States; also a copy is being sent to each of the Representatives in Congress from Arkansas. Please get behind this movement and help us work out a remedy in regard to the money question.

Attached to this letter is a copy of the resolution adopted unanimously by the Arkansas Legislature, which supports the theory I am trying to state upon the floor. I ask unanimous consent that the resolution may be printed in the RECORD at this point.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution referred to is as follows:

House Joint Memorial Resolution 2

Whereas during the World War the United States Government greatly expanded the currency in order to finance the war as is reflected by the fact that the amount of Treasury and bank-note circulation increased from $715,000,000 in 1914 to $3,340,000,000 in 1919, resulting in even more than 100 per cent rise in prices; and

Whereas the national debt increased from $1,188,000,000 to $25,482,000,000 in the same period, and is now more than $20,000,000,000, and the indebtedness of other States, as well as corporate, private, and individuals, has increased in even a greater percentage; and,

Whereas public, private, corporate, and individual business has accumulated and contracted vast amounts of indebtedness during this period of inflated currency and overexpansion of credit; and

Whereas under the present condition of low prices for labor, commodities and deflated currency, these public and private debts contracted when dollars were cheap, must now and can not be repaid with dollars that are dear, creating an unjust hardship and forcing into bankruptcy great numbers of debtors and giving undue and unjust advantage, as well as jeopardizing the rights of creditors; and

Whereas the depression has resulted in deflation of prices of commodities, salaries, and wages, but not in interest and dividends, as is reflected by the fact that the average of wages and salaries in the United States has decreased 57 per cent since the year 1926, not counting the totally unemployed, while on the other hand the average of interest and dividend payments have increased 68 per cent, thus making the present deflation extremely unjust and one-sided in its effect; and

Whereas money, gold, and currency are the measure by which exchange of real values is made and the value thereof can easily and arbitrarily be fixed, the power of so doing having been placed in the hands of the Congress by the Constitution of the United States: Therefore be it

Resolved by the house of representatives of the forty-ninth general assembly (the senate concurring therein), That we do hereby memorialize the Congress of the United States to revaluate our money system of gold and currency or to enact such legislation as will restore same to the value of 1919 as a means of bringing wages, salaries, and commodity prices on a par with the payment of debts, both public and private, and thereby avoiding wholesale bankruptcy and protecting creditors and holders of securities against impending loss; and be it further

Resolved, That we send a copy of this resolution to our Senators and Representatives in the United States Congress, thereby asking them to sponsor and support such legislation; be it further

Resolved, That we send a copy of this resolution to the presiding officers of the house and senate of each State legislature now in session, thereby requesting that each of those bodies pass a similar resolution.

MARCUS L. MILLER,
Polk County.
JOHN M. WILLEMS,
Logan County.

Mr. THOMAS of Oklahoma. Mr. President, I received to-day some data from one of the distinguished economists of the Nation, Dr. G. F. Warren, professor of agricultural economics and farm management, Cornell University, Ithaca, N. Y. I find a number of pages in this little treatise have to do with this identical subject under various headings, one of which is "Deflation or reflation." Another headline is "Deflation." Another heading is "Reflation." Each one of these topics is discussed at some length. Another heading is "What stabilization means." Another heading is "Credit expansion." Other headings are "Currency expansion," "Remonetization of silver," "Revaluation," "Managed currency," "The compensated dollar," and "The gold clause."

Mr. President, without taking the time to read, I ask unanimous consent to have the portions outlined and marked incorporated in the RECORD at this point in connection with my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

DEFLATION OR REFLATION?

The price level must be raised to the debt level or the debt level must be lowered to the price level. This is a matter of grim reality that can not be cured by psychology, confidence, or Government lending.

We must choose between deflation and reflation. No country likes to change its monetary system, nor does any country like to go through wholesale bankruptcies and continue to have millions of unemployed. Our choice is not between two desirable things.

It is between two undesirable things. Merely raising the well-known objections to either procedure does not commend the other. The question is, Which is worse?

If we wish to go through with deflation, we may as well proceed with the bankruptcies, foreclosures, and public defaults and get them over with. Merely postponing by lending some money or attempting to hold up the price of this or that thing will accomplish very little.

DEFLATION

If deflation is completed, the following are some of the innumerable adjustments yet to be made:

At the new price levels public and private debts are nearly equal to the national wealth. These debts will have to be reduced. The only plan thus far proposed for reducing them is bankruptcy and private adjustment. This will probably require three or four years for the major adjustment and a generation to complete the process. While the more serious part of this is taking place bankrupt homes, farms, and other properties will always be for sale at less than new costs of construction, regardless of how low these costs may fall. Therefore little building of any kind is to be expected. Consequently most of the basic industries will operate at low capacity and severe unemployment will be continuous. Business cycles in such a period will be suppressed cycles.

The vigorous efforts to reduce taxes will do well if they succeed in making cuts equal to the new taxes necessary to feed the unemployed. Some shifting from real estate to other forms of taxation may occur.

Public debts will increase and some of the Government units will find it impossible to meet their obligations. It will be years before taxpayers get these debts paid.

Adjusting a price level down requires much more time than adjusting it up. It is not difficult to adjust public and private debts to a higher price level, but it is very difficult to reduce them. To adjust debts up merely requires that the usual purchases be made at the new price level with the usual percentage of credit transactions. To adjust debts down means the slow process of bankruptcy. Bankruptcy acts like a house of cards—each bankruptcy starts another.

Bank deposits will decline because of the reduced amount of business and the lower prices at which business is done and the tendency to use cash rather than checks. This latter movement is encouraged by fear of banks, lack of banks, lower interest payments on deposits, charges for checks, taxes on checks, and high postage rates. Many further bank failures will occur.

Because of severe unemployment some workers are working for extremely low wages, but it is not to be expected that the general wage level will decline to the price level. The long-time tendency is for wages to rise as the output per worker increases. Whenever the debts are liquidated so that business can proceed, wages will be far above pre-war.

Interest rates will be much below pre-war for safe securities, but a large part of the business will be on such a precarious basis that for some years rates for agriculture and industry may be high. Interest payments on bank deposits will be decidedly reduced. It will be impossible for life-insurance companies, universities, hospitals, and other institutions that depend on investments to keep up their incomes. Life-insurance rates will probably rise. The average size of policies will be reduced.

The size of fire-insurance policies will be reduced, losses will be increased, and rates probably will be raised.

Innumerable prices which have not declined will fall. Some of these are freight rates, telephone charges, price of newspapers, doctors' fees, dentists' fees, and telegraph charges.

Large numbers of corporations will disappear by bankruptcy or by combination to avoid bankruptcy.

Wholesale writing down of the capital of industrial plants, farms, and city real estate will be necessary.

Costs of distribution will gradually decline, so that prices paid to farmers will again come into adjustment with the prices which they pay. Much of this can be done in a half-dozen years. Probably it can be completed in a generation.

Some basic commodity prices have fallen too low even for the conditions and will rise.

Innumerable measures will be tried in attempts to hold up prices of this or that thing. Tariffs, bounties, farm boards, domestic allotments, restrictions on trade between States under sanitary and other guises, pools, gentlemen's agreements, and many others will continue to be tried. Some of these may do a little good, but they will continue to result in disillusion and disappointment. Maintaining the present price of gold means bringing the whole debt and price structure down. To attempt to hold each individual thing up and yet bring down the whole is like sinking a ship but attempting to hold up each rivet and doorknob in it.

Nothing is gained by minimizing the gravity of the situation. Repeated confidence statements can not change the facts. They discredit leadership and cause losses to innumerable individuals through false hopes. While the country has never before experienced as great deflation as we are now attempting, we have had experiences which indicate the probable length of the deflation disease. It usually takes six or seven years to go far enough with the bankrupting process so that construction can begin, and it takes many more years fully to complete the process.

If we are going through with deflation, debt-adjustment commissions are desirable to operate for a number of years. The legal system of writing down debts works badly enough when only a few bankrupt properties are thrown on the market. It destroys values for both the creditors and lenders when applied in a wholesale way. A creditor often takes over a home or a farm, keeps it in hopes of a sale until the carrying charges eat up much of the value. In the meantime, the property depreciates. Finally, in despair, a shoe-string sale is often made to a less desirable buyer than the dispossessed owner. Debt-adjustment commissions should study each case and make recommendations for settlement for all creditors. Such recommendations from a disinterested party would save many owners and help many lenders and would keep many of the cases out of the courts. If the Government lending agencies wish to lend more money, they will do more good by taking up the safer part of the underlying mortgages in such cases than by direct loans to the lending corporations, which do not get at the root of the trouble.

While it is not the purpose of this discussion to consider what the individual can do for himself, I should like to insert one piece of advice to the millions of farmers and city home owners who are losing their homes and lifetime savings. If one has a good farm, it seems to me that the best thing to do is to retain possession of it as long as possible, in the hope that some temporary rise in prices or possibly a monetary change will enable him to keep the property. If he gives up, the savings are surely gone. He has little to lose from holding on as long as any slight chance remains.

The man who has failed in business or is out of work is blamed for it, and he often blames himself. This is adding insult to injury. Most of the failures are not due to unsound business, but to unstable money, for which no individual is to blame. The farmer or business man who has failed should not be despondent or commit suicide. He should feel like a man who has just gone through a tornado, stripped of his property, but escaped with his life. His family and friends should treat him accordingly.

It is not improbable that the high value of gold will result in discoveries of it, so that a later generation will have inflation.

The general attitude of the public seems to be to prefer to write everything down in terms of gold, rather than raise the price of gold. The strain on public credit to feed unemployed persons and the social confusion from such general bankruptcies may make it impossible to complete the process. No such violent deflation has yet been carried through by any modern nation.

If the process is carried through, a new generation can be prosperous, except as foolish laws remain to plague it. Any price level is satisfactory after business is adjusted to it.

REFLATION

The effect of rising prices is the same regardless of the cause. If for any reason the price level is restored, it does not mean that all prices will rise equally. Many prices have not declined, or have declined little. Restoring the price level would relieve them of the necessity of declining. The major ones are debts and taxes. If commodity prices were raised, buying would begin, because rising prices cause buying. Jobs would be available. Houses would be in demand. The debts and taxes on the houses and farms could be paid, and the debts would not have to be cut by bankruptcy.

The former amount of life insurance would be desired.

Many charges, such as freight rates, doctors' fees, telephone rates, and the like, are already adjusted to the price level that would be established. They would not rise, but would be relieved from falling.

Costs of distribution would rise very little. Therefore, prices paid to farmers and other producers would rise much more than retail prices. This would bring farm prices into adjustment with other prices. It is sometimes said that two steps are necessary—first, restore the price level, and second, restore the relationships of farm prices to other prices. If the first step is taken, the second follows automatically.

Prices of basic commodities, such as copper, corn, wheat, and cotton, would rise very decidedly because they are so far below the price level that would be restored.

The declines in values of homes and farms would be stopped.

In general, the prices that have not yet declined would be relieved from declining, and those that have declined would be restored.

Probably nothing is more universally wished for than a rise in commodity prices. We are willing to have the Farm Board buy wheat and cotton, pile tariff on tariff, lend billions of Government money—all in the hope that commodity prices may rise. But when any proposal is put forward that will raise the whole price level, it is commonly considered sacrilegious. There is probably no other subject on which so many people have formed positive convictions without scientific evidence. It is the responsibility of farm organizations to give consideration to the various possible methods of procedure.

When a city is on fire, there are only two ways to proceed. One is to let it burn itself out and get ready for the next generation to build a new city; the other is to attempt to put out the fire, even at the risk of some damage from water. Perhaps I should mention a third way of trying to dispose of it by saying that it does not exist.

Since the general level of commodity prices is the reciprocal of the value of money, there is no way to raise the price level except as the value of money declines or is lowered by law.

WHAT STABILIZATION MEANS

Stabilizing the commodity-price level does not mean that any single commodity will be free from fluctuations in price due to the supply of it or the demand for it. It does mean that com-

modity prices as a whole may be freed from being swept up or down as a mass due either to world supply of gold or frantic changes in the demands for it. There are many proposals for limited or complete stabilization.

CREDIT EXPANSION

A gradual and slow increase in the amount of monetary circulation plus bank deposits per dollar of gold in the United States has been taking place for many years. There is no indication that the Federal reserve system has speeded up this normal growth of circulation plus credit per dollar of gold. Whenever the normal is much exceeded a reaction occurs.

Some persons believe that the Federal reserve system is to blame for the decline in prices, and that there is gold enough to maintain predeflation prices if credit were properly managed. The evidence indicates that a rise in the value of gold was inevitable with the return of the world-wide demand for it. Credit management might have prevented a part of the stock-market boom. No evidence has been found that credit management could have prevented a decline in commodity prices, or that the 1929 commodity prices can be restored by credit management and still maintain the present price of gold.

By the management of credit it is possible to throw commodity prices out of line with gold by a limited amount. There is no indication that any permanent change in this relationship can be accomplished in this way. Overexpansion of credit brings on a reaction, and so does overcontraction of credit. The policy of the Federal Government in 1932 was based on the theory that prices could be raised by credit. The Reconstruction Finance Corporation lent money to many agencies in the expectation that credit expansion by the Reconstruction Finance Corporation and the Federal reserve banks would raise prices and restore equities back of securities and start business activity. The policy did check contraction, at least tomporarily; but only a rise in the price structure can stop bankruptcies and start employment. It is not possible to expand credit sufficiently to do this and still maintain the present price of gold.

CURRENCY EXPANSION

It is very easy to raise the price level by an expansion of the currency, but any expansion that is sufficient to restore the prices of commodities to the debt level would make it impossible to continue to redeem each of the paper dollars with 23.22 grains of gold. There is no way of printing paper money that will make it possible materially to change the relative values of gold and commodities.

REMONETIZATION OF SILVER

By adopting bimetallism or symmetallism it is possible to set any price level that is desired. If silver is remonetized, it should certainly be done by symmetallism, as proposed by the great English economist, Alfred Marshall. This proposal is now receiving considerable attention in England. It is very simple. Instead of having a dollar exchange for 23.22 grains of gold it would exchange for some given weight of gold plus a given weight of silver. Since two commodities are more stable than one, and since silver production is less erratic than gold production, such a money would be more stable than gold. If once established, it would work in the same way in which the gold standard works, except for greater stability.

REVALUATION

Most of the continent of Europe has reduced the weight of gold in the monetary unit. It is probable that England and the 30 other countries that have suspended the gold standard will do the same. If so, this will leave the United States as one of the very few countries that attempts to maintain the pre-war price of gold, regardless of the supply of it or demand for it.

France reduced the weight of gold in the franc by four-fifths, so that when our prices are 100, her price level is about 500. The present outlook is that England will probably reduce the amount of gold in the pound by 30 to 50 per cent. The United States reduced the weight of gold in the dollar by 6.25 per cent in 1834. By reducing the weight of gold in the dollar any desired price level can be established. The future course of prices would depend on future supply of gold and future demand for it.

MANAGED CURRENCY

Two proposals have been advanced to provide for a permanently stable measure of value. One of these proposes a managed currency to be controlled by central banks in such a way as to keep the average of commodity prices stable. To operate such a system requires willingness and intelligence in the bank management and freedom from influence by politics or desire for profits.

At innumerable times in history the gold standard has broken down and a managed currency has been substituted. After great revolutions, such as the American Revolution, the French Revolution, and the German Revolution, at attempts to pay reparations, nations were so completely bankrupt that their currencies were "not worth a continental."

At innumerable other times, after the failure of the gold standard, a managed currency has been operated with a considerable degree of success. England had such a currency from 1915 to 1925, and has had such a currency since September, 1931. Prices in England since she left the gold standard have been more stable than prices here. Apparently such a country as England could permanently operate such a currency successfully. The possibility of a managed currency should not be judged entirely by its success or failure when conditions are so bad that the gold standard has failed.

THE COMPENSATED DOLLAR

The compensated dollar is a proposal to establish by law a currency redeemable in gold, but the weight of gold for which the dollar would exchange would vary with the index number of wholesale prices of all commodities; that is, if prices rose 1 per cent, the weight of gold for which the dollar would exchange would rise 1 per cent. If prices fell 1 per cent, the dollar would exchange for 1 per cent less gold. The gold would be kept in bars in the Treasury and central banks. This would keep the dollar stable in buying power for the average of all commodities.

The dollar has to be rubber either as to weight or as to value. It can not have a fixed weight and also have a fixed value. This proposal would give it a fixed value and a rubber weight. It raises the fundamental question as to whether a medium of exchange should be fixed in weight or fixed in value.

A scientific money is one with a constant buying power for all commodities rather than a fixed weight of one commodity. Our whole tax and debt structure rests on commodity prices. If this structure is to be kept sound either for the creditor or the debtor, it is commodity prices that need to be kept stable, not the weight of gold for which a dollar will exchange.

THE GOLD CLAUSE

A considerable number of bonds in the United States call for payment in a gold dollar of present weight and fineness. This does not apply to Federal land bank bonds or mortgages nor to most of the mortgages of joint-stock land banks and life-insurance companies. These agencies agree to pay their creditors in lawful money, and are therefore protected if they collect lawful money from their debtors.

The problem to-day is not whether creditors will be paid in any particular brand of a dollar, but whether they will get anything. Sometimes they get less than nothing, for they get a non-income-paying property with delinquent taxes. If the dollar is revalued, Congress will probably invalidate such contracts, or if this is considered to be unconstitutional, can easily tax the profits derived from such a source by a sufficient amount to prevent collection.

If the price level were restored, business would proceed, jobs would be available, taxpayers would be relieved of feeding millions of unemployed, and it would be easier to pay one-third more than the bond calls for than it now is to pay the present sum.

The gold clause is probably of little value to any creditor, and even if enforced, it is a minor matter when considering the innumerable effects of deflation. Ten million unemployed is a far more serious matter than the gold clause.

If we continue to allow our whole price and debt structure to be based on accidental discoveries of some one commodity or the accidents of demand for it, we should not be surprised to see the social system that depends on such an unstable medium of exchange seriously threatened. The present revolutions and political upheavals in the world are the direct and indirect results of a breakdown in the medium of exchange. If such a monetary system continues, every investor, farmer, home owner, and business man should give first attention to the probable supplies of and demand for gold before he considers the details of his business.

Mr. THOMAS of Oklahoma. Mr. President, the Finance Committee of the Senate is at this time preparing to hold hearings in order to find out, if possible, the cause of the present depression, and if possible discover some remedy which may bring about an upturn in our present economic condition. A few days ago I sent to the soon-to-be chairman of the Finance Committee, the senior Senator from Mississippi [Mr. HARRISON] some suggestions which I thought might be helpful for the guidance of the committee in its investigations. What I submitted had to do with the management of money and credits and their relation to and effect upon prices and business. I ask unanimous consent to have printed at this point a copy of the agenda submitted by me to the Finance Committee through the Senator from Mississippi [Mr. HARRISON].

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

Effect, if any, of the management of money and credit upon business:

1. In 1912 amount of money in circulation was $3,335,000,000. On April 1, 1921, circulation was $6,207,000,000, an increase of $2,872,000,000 in eight years.

(A) During this period of radical increase in circulation prices of commodities and real estate increased correspondingly and good times were enjoyed by every class of business.

2. Beginning April 1, 1931, money in circulation began to decrease, and on July 31, 1930, amount of money in circulation was $4,426,000,000, a decrease of $1,781,000,000.

(A) During such deflation of money in circulation we had general decline in commodity prices, farm lands, real estate, and prices generally.

3. In May, 1920, when we had largest amount of money in circulation, the buying power of the dollar, as measured by the

United States Department of Labor, Bureau of Labor Statistics, was $0.598, and in December, 1932, when bank credit was nonexistent and when large volumes of currency were reported to be hoarded, the buying power of the dollar had increased to $1.597.

(A) The foregoing shows that by withdrawing money from circulation, making money scarce and thereby dear, the buying power of the dollar increased from approximately 60 cents to approximately $1.60.

4. As measured by the Department of Labor wholesale-price index, debtors are now required to pay the amount of value borrowed in 1920, plus 100 cents on each dollar, because of the added value of the dollar.

(A) This 100-cent increased value must be paid on every item of debt as follows: (a) On taxes; (b) on interest; (c) on debts; (d) on salaries.

5. Holders of fixed investments such as bonds and notes, acquired around 1920, have buying power, or value, or wealth, to the extent of three times the value paid for such securities, such value not having been paid for or earned, yet debtors, to liquidate bonds and notes under present-valued dollar, must part with such three times added value to liquidate indebtedness.

6. The present high-valued dollar (160 cents) is direct cause of low-priced commodities, farm lands, and values, and so long as present high-valued dollar is retained, producers of raw materials, such as farmers, miners, and lumbermen, will be unable to meet their taxes, their interest, and their obligations.

7. Hence, if figures are accurate and reasoning sound, the present high-valued dollar must be reduced in buying power as a prerequisite for a return of business activity and prosperity.

Mr. THOMAS of Oklahoma. Likewise, Mr. President, I ask permission to submit for the RECORD a list of leading economists of the country who might be called to testify upon this particular matter, which, I think, has much to do with our present economic condition.

The PRESIDING OFFICER. Without objection, that order will be made.

The list referred to is as follows:

James Harvey Rogers, Yale University, New Haven, Conn.; Willford I. King, New York University, New York City; Harry G. Brown, Missouri University, Columbia, Mo.; G. F. Warren, Cornell University, Ithaca, N. Y.; F. A. Pearson, Cornell University, Ithaca, N. Y.; Paul Douglas, Chicago University, Chicago, Ill.; Professor Millis, Chicago University, Chicago, Ill.; John R. Commons, Wisconsin University, Madison, Wis.; Professor Ise, Kansas University, Lawrence, Kans.; Professor Brown, industrial relations department, Princeton University, Princeton, N. J.; Alvin Hansen, Minnesota University, Minneapolis, Minn.; Dr. Irving Fisher, Yale University, New Haven, Conn.; Chester Phillips, Iowa University, Iowa City; Charles Tibbetts, University of Buffalo, Buffalo, N. Y.; John B. Canning, Stanford University, Palo Alto, Calif.; J. M. Clark, Columbia University, New York; Wesley C. Mitchell, Columbia University, New York; Carl Snyder, Federal Reserve Bank of New York; Warren M. Persons, Standard Statistics Corporation, New York; Warren F. Hickernell, Yale Club, New York City; Harold L. Reed, United States Chamber of Commerce, Washington, D. C.; C. O. Hardy, Brookings Institution, Washington, D. C.; Victor S. Clark, Congressional Library, Washington, D. C.; Doctor Raffalowich, Marshal Field & Co., Chicago, Ill.

DISTRIBUTION OF GOVERNMENT-OWNED COTTON

Mr. SMITH submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13607) to authorize the distribution of Government-owned cotton to the American National Red Cross and other organizations for relief of distress, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 2.

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following substitute:

"SEC. 3. In so far as cotton is delivered to relief agencies by the Cotton Stabilization Corporation under this act the Federal Farm Board is authorized to cancel such part of its loans to such corporation as equals the proportionate part of said loans represented by the cotton delivered hereunder, less the current market value of the cotton delivered, and to deduct the amount of such loans canceled from the amount of the revolving fund established by the agricultural marketing act. To carry out the provisions of this act the unexpended balance of appropriations made for carrying out the provisions of the joint resolution entitled 'Joint resolution authorizing the distribution of Government-owned wheat and cotton to the American National Red Cross and other organizations for relief of distress', approved July 5, 1932, is authorized to be made immediately available, and, in addition, the sum of $4,100,000 is authorized to be appropriated and made immediately available to the Federal Farm Board to be used solely for the following purposes: For advancing to such corporations amounts to repay loans held by commercial or intermediate credit banks against cotton which would be released for donations under this act and to retire all storage and carrying charges against cotton, including compression charges, at the time of the approval of this act; and for meeting carrying, and handling charges, and interest payments on commercial or intermediate credit bank loans, on or against cotton which would be released for donations under this act between the date of its approval and the delivery of the cotton to the American National Red Cross or other organization. Any additional amounts necessary for such purposes shall be paid from the revolving fund established by the agricultural marketing act."

And the Senate agree to the same.

CHAS. L. MCNARY,
G. W. NORRIS,
E. D. SMITH,
Managers on the part of the Senate.

MARVIN JONES,
H. P. FULMER,
G. N. HAUGEN,
Managers on the part of the House.

The report was agreed to.

TREASURY AND POST OFFICE APPROPRIATIONS

The Senate resumed the consideration of the bill (H. R. 13520) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1934, and for other purposes.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Wisconsin to the amendment of the Senator from California.

Mr. BARKLEY. Mr. President, I wish to ask the Senator from California a question. In the Post Office and Treasury appropriation bill passed a year ago, making appropriations for the fiscal year ending next June 30, there is a provision very similar to the amendment offered by the Senator from California. That is not a provision that pertains simply to that appropriation bill, but it was permanent law, because it provides that "hereafter" the very things should occur which are provided for in the amendment of the Senator from California.

Mr. JOHNSON. The Senator is correct.

Mr. BARKLEY. What shortcoming is there in that provision, which is already permanent law, which renders it impossible to take care of the situation the Senator from California has in mind in offering his pending amendment?

Mr. JOHNSON. That relates to a particular department. There is no such law that is applicable to-day to the Interior Department or to some other department. A general act, therefore, was presented in the House; it was passed by the House, and, after it was passed upon by the committee here with an amendment, it was endeavored to be put upon this bill, and that is substantially the amendment that is here offered.

Mr. BARKLEY. Mr. President, in view of the fact that this is already the law so far as the Post Office and Treasury Departments are concerned, why would there be any objection to offering the same provision on each appropriation bill and making it permanent law as to that department—not making it temporary as to the particular appropriation—rather than to have incorporated in this bill, which is an appropriation for two departments where this provision already is in force, a provision applying to all the departments?

Mr. JOHNSON. Because it would not be general law applicable to all the departments.

It is quite true, as the Senator suggests, that we could make three or four bites at the cherry, and offer an amendment to each particular appropriation bill. I have sought to eliminate that particular contingency, however, by a general act already passed by the House that will be applicable to all the departments of government.

Mr. BARKLEY. Is there any substantial difference between the provisions of law now in force, applicable to the Post Office and Treasury Departments, and the Senator's amendment, except that his amendment applies to all departments and the present law applies only to two?

Mr. JOHNSON. Yes. The amendment that has been offered by me is broader in character and endeavors to stop some of the gaps that were presented by the other amendments that have been made to the different appropriation bills.

Mr. BARKLEY. In other words, if I understand the Senator's amendment, it provides that the departments shall be required not only to purchase supplies produced, mined, and so forth in the United States, according to the present law, but to purchase articles manufactured out of those articles. In other words, whereas the present law applying to the Post Office and Treasury Departments is rather limited to raw materials in its scope, the Senator's amendment seeks to enlarge that so that anything manufactured out of those raw materials comes under the same law. Is that true?

Mr. JOHNSON. Substantially so. I would not express it exactly that way, but I think the idea the Senator from Kentucky has is correct. There is another element, too, of this amendment that relates to contracts, and that the contract shall be of the same sort as has been indicated.

Mr. BYRNES. Mr. President, will the Senator from Kentucky yield to me? I desire to read to him the language of that law. It provides that the heads of these two departments—Treasury and Post Office—shall, unless in their discretion the interest of the Government will not permit—

> Purchase, or contract for, within the limits of the United States, only articles of the growth, production, or manufacture of the United States.

That is the existing law as to these two departments.

Mr. BARKLEY. Yes. That language makes it practically as broad in its scope as the amendment offered by the Senator from California.

Mr. JOHNSON. It makes it what?

Mr. BARKLEY. It makes it, as applying to these two departments, practically as broad as the amendment of the Senator, except——

Mr. JOHNSON. No; I would not say that at all.

Mr. BARKLEY. Except that it applies only to the direct purchase by the Government of these supplies, and probably does not go so far as to require the same conditions with reference to the supplies purchased by contractors who have dealings with the Government.

Mr. JOHNSON. Yes; the amendment is broader in that respect, and goes to the manufactured article as well. Will the Senator from Kentucky permit me to add to my reply that if the amendment of the Senator from Wisconsin is adopted, it will, in my opinion, blow a hole in the endeavor that I make by the amendment that I have presented; and I trust it will not be adopted.

Mr. TRAMMELL. Mr. President, I desire to inquire what we are about to vote on.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Wisconsin [Mr. BLAINE] to the amendment of the Senator from California [Mr. JOHNSON]. Upon that question the yeas and nays have been demanded. Is the demand seconded?

Mr. BLAINE. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll to develop the presence of a quorum.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Barbour	Black	Bratton
Austin	Barkley	Blaine	Brookhart
Bankhead	Bingham	Borah	Bulkley
Bulow	Glass	Logan	Sheppard
Byrnes	Glenn	McGill	Shipstead
Capper	Goldsborough	McKellar	Smith
Caraway	Gore	McNary	Smoot
Clark	Grammer	Metcalf	Steiwer
Connally	Hale	Moses	Swanson
Coolidge	Harrison	Neely	Thomas, Idaho
Copeland	Hastings	Norbeck	Thomas, Okla.
Costigan	Hatfield	Norris	Townsend
Couzens	Hayden	Nye	Trammell
Cutting	Hebert	Oddie	Tydings
Dale	Hull	Pittman	Vandenberg
Davis	Johnson	Reed	Wagner
Dickinson	Kean	Reynolds	Walcott
Dill	Kendrick	Robinson, Ark.	Walsh, Mass.
Fess	Keyes	Robinson, Ind.	Walsh, Mont.
Fletcher	King	Russell	Watson
Frazier	La Follette	Schall	Wheeler
George	Lewis	Schuyler	White

The PRESIDING OFFICER. Eighty-eight Senators have answered to the roll call. A quorum is present.

Mr. BLAINE. Mr. President, it is not my intention to debate the amendment which I have offered. I desire to inform the Senate that the amendment which I have offered is in the identical language of the present law as it relates to the War Department, the Post Office Department, and the Treasury Department, all three of which provisions are uniform. I propose to adopt the same uniform language, but have inserted in the modification of the amendment the words "and/or," so that it will read:

> Articles of the growth, production, and/or manufacture of the United States.

Mr. DILL. Mr. President, I should like to have the attention of the Senator from California [Mr. JOHNSON]. I should like to have the Senator explain, if he will, in my time, what is the effect from his viewpoint of the amendment offered by the Senator from Wisconsin [Mr. BLAINE].

Mr. JOHNSON. Mr. President, the Senator from Wisconsin strikes out, as I recall, lines 7 to 12 of section 2 of the bill. He inserts in lieu thereof:

> Articles of the growth, production, and/or manufacture of the United States.

From my standpoint, the vice of his amendment is that from outside, from a foreign country, could be brought into this country the material which could be manufactured as seen fit, and then it would not be within the prohibition of the law.

For instance, as I have repeatedly stated upon the floor, the impelling cause of this measure was the situation at the Boulder Dam, where it was expected that the lowest bid would be from Germany for the turbines or generating machinery and the like—a transaction involving about $6,000,000. Now, assume that they brought over from Germany part of the machinery, and assume that they brought over then in another ship another part of it, and in another ship another part of it, and then, in some factory in this country it was assembled and manufactured. Then, there would be no prohibition upon it such as I desire to put in this bill upon bids of that sort.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Wisconsin [Mr. BLAINE] to the amendment of the Senator from California [Mr. JOHNSON]. Upon that question the yeas and nays have been demanded. Is the demand seconded?

The yeas and nays were ordered.

Mr. GORE. Mr. President, I think that the Senator from California a few moments ago stated the issue which divides Senators upon this amendment clearly and fairly. Indeed, he presented the issue in a very pointed way. He took this illustration: A contractor constructing a building here on Pennsylvania Avenue advertises for bids on certain materials. An American manufacturer submits a bid to supply the materials for $11,000. An importer, say, of English or Canadian goods submits a bid to furnish the same materials for $10,000. The American bid is $1,000 more than the bid on the imported goods.

The Senator says that we ought to pass a law providing that the American bid shall be accepted and that the bid on the imported goods shall be rejected. He insists that the Government should be compelled to pay a thousand

dollars more for the American-made goods than it would be obliged to pay for the imported goods.

Mr. President, that is the issue. That is the point. I do not understand how the Senator could make an appeal that that should be done in behalf of American taxpayers, because the proposal would compel the American taxpayer to pay $1,000 more for the domestic goods than for the imported goods. The American taxpayer, with cotton at 5 cents a pound, corn at 10 cents a bushel, and prunes at 2 cents a pound, will have to pay a thousand dollars more for the materials than they are worth; would have to pay a thousand dollars more for the materials than they would cost under the importer's bid.

Mr. COSTIGAN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Oklahoma yield to the Senator from Colorado?

Mr. GORE. I yield.

Mr. COSTIGAN. Will the Senator from Oklahoma tell us whether this proposal is part of an economy program?

Mr. GORE. Oh, yes.

Mr. COSTIGAN. Will the Senator also tell us whether there are any safeguards in the amendment against monopoly charges?

Mr. GORE. I am coming to that in a moment. The American taxpayer would be compelled to pay $1,000 more for this order than the materials would be worth. Just how the American taxpayer would profit by that transaction defies my imagination.

Mark this, Mr. President, in the case which I am discussing, the imported goods have already scaled our high tariff walls, and to have paid tariff rates which were deemed to be sufficient to protect American industry. They have made that contribution to the Treasury of the United States, they have entered our markets, under existing law, and are entitled to compete with American goods.

Notwithstanding they have scaled the tariff walls, it is proposed here that we disfranchise them entirely. It is proposed here that they can not be purchased at any price, even though the price is only half as much as the American price. In the interest of economy, and in behalf of the American taxpayers, we are to pay more for the thing than the thing is worth. This amendment prohibits absolutely the purchase and use of imported articles in the case under discussion. We have placed them under a ban, under an embargo. This invites combination on the part of American manufacturers. The tariff did not exclude all competition. We invite American steel concerns, we will say, to enter into a combination. They may well do so, because no matter what the foreign price, these imports are excluded, they are forbidden, and, no matter how high the price may be run up by such a combination, they are secure against all foreign competition.

What is the only other point? That the use of these imported materials displaces so much American labor. If that were true, there might be some force in that argument. But that argument is not sound. These imported materials which were to be used in the building here in Washington had to be paid for before they scaled our tariff walls. They were paid for with American exports. They were paid for in part with American cotton. In part they were paid for with American lard, paid for in part with American tobacco, paid for in part with American flour, paid for in part with American prunes, all paid for with American goods, and these American goods which were exported in exchange for the imported goods gave as much employment to American labor to all intents and purposes as if the imported goods had been produced in this country, not to the same laborers, but substantially the same laborers.

Mr. President, there is a point which Senators overlook, and there lies the fallacy in the argument that imported goods displace American labor. Imported goods are paid for with American goods, paid for with exported goods, and exported goods are produced by American labor.

I want to repeat, Mr. President, that the world to-day is suffocating beneath the burden of unexchanged surpluses. The Johnson amendment is not going in the right direction, it is going in the wrong direction.

As I see it, there is only one hope, and that is that protectionism is going mad, that protectionism is committing suicide. It may be that things must get worse before they get better, and once protection hardens into prohibition, as it does in this amendment, it seems to me that the end ought to be drawing nigh.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the junior Senator from Wisconsin [Mr. BLAINE] to the amendment proposed by the senior Senator from California [Mr. JOHNSON]. On that question the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BRATTON (when his name was called). I have a pair with the junior Senator from Nebraska [Mr. HOWELL], who is necessarily absent on official business of the Senate. In his absence I withhold my vote.

Mr. FESS (when Mr. GLENN'S name was called). The senior Senator from Illinois [Mr. GLENN] has a general pair with the senior Senator from Virginia [Mr. SWANSON].

Mr. HEBERT (when his name was called). I have a general pair with the senior Senator from North Carolina [Mr. BAILEY]. In his absence, not knowing how he would vote, I withhold my vote. If permitted to vote, I would vote "nay."

Mr. McNARY (when his name was called). I have a pair with the senior Senator from Mississippi [Mr. HARRISON]. Not knowing how he would vote, I shall withhold my vote. If permitted to vote, I would vote "nay."

Mr. COSTIGAN (when Mr. NEELY'S name was called). The junior Senator from West Virginia [Mr. NEELY] is unavoidably absent.

Mr. ROBINSON of Indiana (when his name was called). I have a general pair with the junior Senator from Mississippi [Mr. STEPHENS]. I am unable to obtain a transfer, and, therefore, in the absence of the Senator from Mississippi, not knowing how he would vote, I withhold my vote. If permitted to vote, I would vote "nay."

The roll call was concluded.

Mr. FESS. I desire to announce the following general pairs:

The Senator from Wyoming [Mr. CAREY] with the Senator from Louisiana [Mr. LONG]; and

The Senator from Missouri [Mr. PATTERSON] with the Senator from New York [Mr. WAGNER].

The Senator from Missouri [Mr. PATTERSON] is detained from the Senate on account of a death in his family.

Mr. THOMAS of Idaho (after having voted in the negative). Has the junior Senator from Montana [Mr. WHEELER] voted?

The PRESIDENT pro tempore. That Senator has not voted.

Mr. THOMAS of Idaho. I have a general pair with the Senator from Montana [Mr. WHEELER], and in his absence I withdraw my vote.

Mr. CUTTING. On this question I have a pair with the junior Senator from West Virginia [Mr. NEELY]. If permitted to vote, I would vote "yea." The Senator from West Virginia, I understand, if present, would vote "nay."

The result was announced—yeas 16, nays 57, as follows:

YEAS—16

Bankhead	Borah	Clark	King
Barkley	Bulow	Coolidge	La Follette
Black	Byrnes	Costigan	Logan
Blaine	Caraway	Hayden	Shipstead

NAYS—57

Ashurst	Dale	Gore	McKellar
Austin	Davis	Grammer	Metcalf
Barbour	Dickinson	Hale	Moses
Bingham	Dill	Hastings	Norris
Brookhart	Fess	Hatfield	Nye
Bulkley	Fletcher	Hull	Oddie
Capper	Frazier	Johnson	Pittman
Connally	George	Kean	Reed
Copeland	Glass	Keyes	Reynolds
Couzens	Goldsborough	McGill	Robinson, Ark.

Russell	Smith	Tydings	Watson
Schall	Steiwer	Vandenberg	White
Schuyler	Thomas, Okla.	Walcott	
Sheppard	Townsend	Walsh, Mass.	
Shortridge	Trammell	Walsh, Mont.	

NOT VOTING—23

Bailey	Harrison	McNary	Stephens
Bratton	Hebert	Neely	Swanson
Broussard	Howell	Norbeck	Thomas, Idaho
Carey	Kendrick	Patterson	Wagner
Cutting	Lewis	Robinson, Ind.	Wheeler
Glenn	Long	Smoot	

So Mr. BLAINE'S amendment to Mr. JOHNSON'S amendment was rejected.

The PRESIDENT pro tempore. The question recurs upon——

Mr. TYDINGS. Mr. President, I have an amendment pending.

The PRESIDENT pro tempore. When the Senator from Maryland had his amendment read, it was read with the idea, and so announced by the Chair, that it was to lie upon the table. Therefore, the question now recurs upon the amendment proposed by the Senator from California as modified. If the Senator from Maryland now wishes to present his amendment, he may do so.

Mr. TYDINGS. Mr. President, I ask that the amendment be read.

The PRESIDENT pro tempore. Let it be read for the information of the Senate.

The Chief Clerk read as follows:

At the proper place add a new section, as follows:

"SEC. —. That hereafter any appropriation of money for crop production of any crops whereof there is already an exportable surplus in the United States is hereby rescinded, and any such appropriation shall revert to the Treasury."

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Maryland to the amendment of the Senator from California.

EXAMINATION OF DAVID S. BARRY, SERGEANT AT ARMS

Mr. WATSON. Mr. President, in the issue of the New Outlook under date of February 2, there appears an article entitled "Over the Hill to Demagoguery," which purports to have been written by David S. Barry, Sergeant at Arms of the United States Senate. The first two or three sentences of that article recite as follows:

Contrary, perhaps, to the popular belief, there are not many crooks in Congress, that is, out-and-out grafters or those who are willing to be such. There are not many Senators or Representatives who sell their vote for money, and it is pretty well known who those few are.

Mr. Barry has been connected with the Senate as Sergeant at Arms for a good many years. Prior to that he was a newspaper correspondent in the city of Washington and very familiarly acquainted with Senators and Representatives and men in public life. It is very difficult for any of us to believe that Mr. Barry could have meant what he said in this article, but it is here in cold type and is something that no Senator believes should be permitted to pass by without an explanation which I think he ought to have the opportunity to give in open Senate.

Therefore I move that Mr. Barry be brought before the bar of the Senate for the purpose of answering such questions as may be asked him touching this article or to make any explanation he may have in mind on the merits of the proposition.

The PRESIDENT pro tempore. May the Chair suggest that probably a wiser course would be to have the matter referred to the Committee on Rules?

Mr. ASHURST. Mr. President, a point of order. The Chair has no right to argue from the chair. If the Chair wishes to argue, he should take his place on the floor of the Senate.

The PRESIDENT pro tempore. The Chair may make a suggestion.

Mr. ASHURST. No; he may not!

Mr. NORRIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Indiana yield to the Senator from Nebraska?

Mr. WATSON. I yield.

Mr. NORRIS. I would like to add to the motion of the Senator from Indiana that Mr. Barry be brought before the Senate the suggestion that the oath be administered to him.

Mr. ROBINSON of Arkansas. Mr. President, I think too, in addition to the suggestion of the Senator from Nebraska, that Mr. Barry should be required to state in open Senate who are the Senators and Representatives who, as he says, everybody knows are crooks.

Mr. WATSON. That suggestion is entirely in order.

The PRESIDENT pro tempore. The motion made by the Senator from Indiana is wholly privileged. The question is on the motion of the Senator from Indiana. [Putting the question.] The motion is agreed to unanimously. The Chair awaits suggestions as to the method under which the Senate shall proceed.

Mr. ASHURST. Mr. President, I respectfully move that all questions propounded to Mr. Barry shall be in writing.

Mr. WALSH of Montana. Mr. President, in a matter as grave as this it seems to me the Senate ought not to proceed precipitously. Mr. Barry stands in a way accused here, and certainly ought to have an opportunity to prepare to make whatever explanation or defense he can, and to be advised by counsel before he is called upon.

Mr. BORAH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Indiana yield to the Senator from Idaho?

Mr. WATSON. I yield.

Mr. BORAH. If, after Mr. Barry is brought before the bar of the Senate, he desires time and desires counsel, of course we would not deny it to him, but I think as a first step he should be brought here and let him indicate what he desires.

The PRESIDENT pro tempore. The Chair, being without precedents, will act upon any suggestion that a majority of the Senate wish to impose. If the Senator from Arizona will permit, the Chair will again say that probably the proceeding should be determined by the Committee on Rules.

Mr. REED. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Indiana yield to the Senator from Pennsylvania?

Mr. WATSON. I yield.

Mr. REED. I observe that Mr. Barry is now in the Chamber. I move that the oath be now administered to him by the Presiding Officer.

The PRESIDENT pro tempore. Is there objection?

Mr. ASHURST. Mr. President, I have no objection to that motion, but I insist on my motion that all questions submitted to Mr. Barry shall be in writing. We had trouble in this same way in the Archbold impeachment case with Senators rising and propounding questions and cross-fire questions. Finally we determined that the only practical way to proceed was to propound the questions in writing. I shall insist on my motion after the oath has been administered.

The PRESIDENT pro tempore. After the oath is administered?

Mr. ASHURST. Yes.

The PRESIDENT pro tempore. The Chair will administer the oath to the Sergeant at Arms.

Mr. GORE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Indiana yield to the Senator from Oklahoma?

Mr. WATSON. I yield.

Mr. GORE. I wish to say I am inclined to think the suggestion made by the Chair is a wise one. I am not certain that the Senate ought to be stampeded. I do not mean that it has been or is being stampeded, but I think we ought to proceed in a reasonable way. So far as I am concerned, if Mr. Barry has any information on this matter he is wiser than I am. I am not sure but that the Senator from Montana [Mr. WALSH] is correct in his suggestion. I share in the desire to have all the information that is available. If Mr. Barry has any facts they ought to be made known, and when made known, proper action ought to be taken. But I am not really certain that the United States Senate ought

to exhibit haste of this kind. It seems a little unseemly, though I may be wrong.

Mr. BORAH. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Indiana yield to the Senator from Idaho?

Mr. WATSON. I yield.

Mr. BORAH. I repeat that after Mr. Barry has taken the oath—and he is a very intelligent gentleman—he may suggest that he desires time and desires counsel; but these charges have been made openly, they are a part of the public knowledge. So far as I am concerned, I am not willing that the hearing shall be behind the closed doors of a committee.

Mr. WATSON. Mr. President, I will say, along that line, that perhaps a third of the Members of the Senate have been to me touching this matter. I suggested to a number of them that the matter be referred to a committee. There was no one in favor of that procedure. They said Mr. Barry is a man of high intelligence, has been connected with public life for some time, was a newspaper correspondent before that, and well understands the meaning of language and knows what he wanted to say, and is in a position to explain what he did mean if he did not mean what the article says. Therefore it is my thought that it is entirely fair to him under the conditions that he shall come before the bar of the Senate and offer any explanation that he may have to make.

The PRESIDENT pro tempore. May the Chair make a suggestion, with the permission of the Senator from Arizona?

Mr. ASHURST. I cheerfully grant permission. [Laughter.]

The PRESIDENT pro tempore. This is a unique proceeding. The Senate is about to put on hearing one of its officers. The oath is about to be administered to that officer under a vote of the Senate. The manner of proceeding with the hearing is wholly unknown to the Senate. It has occurred to the Chair that at least the matter of procedure might be referred to the Committee on Rules, so that the Senate might establish a precedent in the event that hereafter some of its officers should possibly transgress the proprieties.

Mr. McKELLAR. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Indiana yield to the Senator from Tennessee?

Mr. WATSON. I yield.

Mr. McKELLAR. It seems to me Mr. Barry might desire to have something to say after the oath is administered to him. He should be afforded the opportunity to give whatever explanation he wants to give here openly. I see no reason why the course we are now pursuing is not the right and proper course.

The PRESIDENT pro tempore. The Chair is about to administer the oath to the Sergeant at Arms.

(Sergeant at Arms Barry rose and raised his right hand.)

The PRESIDENT pro tempore. You do solemnly swear, in reference to the cause now on hearing before the Senate, that you will tell the truth, the whole truth, and nothing but the truth, so help you God?

Sergeant at Arms BARRY. I do.

The PRESIDENT pro tempore. The Senate is now resolved into a court of trial to hear the Sergeant at Arms.

Mr. ASHURST. Mr. President, I respectfully move that any and all questions to Mr. Barry be in writing.

The PRESIDENT pro tempore. Does the Senator ask that any time be given Mr. Barry in which to consider his answers?

Mr. BORAH. Mr. President, I suggest that Mr. Barry state whether or not he desires to proceed at this time. If he desires time to consult counsel, the Senate ought to give it to him. After that we can determine how we will question him, if he does not desire time.

The PRESIDENT pro tempore. Very well; the Senate will hear the Sergeant at Arms.

Sergeant at Arms BARRY. I have no desire to have counsel. There is no real explanation to make. The article stands for what it says. Any further statement that is desired I will be glad to make about it, but I have no desire to make one.

The PRESIDENT pro tempore. Very well. Then the question recurs upon the motion of the Senator from Arizona, namely, that any questions to be propounded by any Senator to the Sergeant at Arms in the course of the hearing now being held shall be submitted to him in writing.

The motion was rejected.

The PRESIDENT pro tempore. The Chair awaits further action on the part of the Senate.

Mr. WATSON. Mr. President, may I be permitted to ask Mr. Barry a question or two?

The PRESIDENT pro tempore. The Chair assumes that the Senate for the minute has resolved itself into a court of inquiry, and, having rejected the motion of the Senator from Arizona that questions to the Sergeant at Arms be propounded in writing, the Chair holds that any Senator may rise and orally propound to the Sergeant at Arms any question which he has in mind.

Mr. WATSON. Mr. Barry, did you write the article in the New Outlook published this month?

Sergeant at Arms BARRY. I did.

Mr. WATSON. In that article did you say—

> There are not many Senators or Representatives who sell their vote for money, and it is pretty well known who those few are.

Sergeant at Arms BARRY. Yes, sir; I did.

Mr. WATSON. Who are those Senators and Representatives who you know have sold their votes for money?

Sergeant at Arms BARRY. I have not the slightest idea. I had no Senator in mind, and I do not know that there is such a Senator.

Mr. WATSON. What, then, Mr. Barry, did you mean by that language?

Sergeant at Arms BARRY. My idea in writing that was to defend the Senate from the popular belief that there are crooks and grafters here. I have for 30 years taken that view. I have written a great many times and said a great many times that there are no crooks in Congress; that it is a mistaken popular belief, but it is the general belief; and I meant by that, of course, that if there were a few men here who did take money for their votes they would be very well known to their colleagues. I meant nothing further than that and my motive was entirely in the way of defense of the Senate.

I will say that I wrote this article some time ago and never knew it was published until Mr. LAGUARDIA spoke today. I never received a proof of it. I never had an opportunity to revise it. I do not say that I would have changed the proof, but I might have done so, and I certainly would if my attention had been called to the meaning of these words. I should certainly have changed it, because I do not know of any such men and did not mean to imply that I did.

Mr. BARKLEY. Mr. President, I should like to ask the Sergeant at Arms if he received compensation for the publication of this article?

Sergeant at Arms BARRY. I have not received any compensation, but I presume I will; I expect to be paid for it.

Mr. BARKLEY. Did you write it at the request of the publisher of this magazine?

Sergeant at Arms BARRY. Yes, sir. I did not write this particular article—but I agreed to write them some articles, but not to have any name. I submitted this article, along with another article, and that is the last I heard of it.

Mr. BARKLEY. You wrote it under a contract with them?

Sergeant at Arms BARRY. Yes, sir.

Mr. BARKLEY. To receive compensation?

Sergeant at Arms BARRY. The arrangement for compensation was made after I had written it and submitted it.

Mr. BARKLEY. How many articles are you to write for this magazine?

Sergeant at Arms BARRY. I have not any idea, sir.

Mr. BARKLEY. Will they all be on the Senate?

Sergeant at Arms BARRY. Oh, no, sir.

Mr. BARKLEY. What are you to be paid for the article that has been published?

Sergeant at Arms BARRY. I do not exactly know. I supposed that before this article was printed there would be a definite arrangement about that, and I was very much surprised when it was printed. I did not know it until to-day.

Mr. BARKLEY. You said you prepared it in pursuance of a contract you had with the publishers, did you not?

Sergeant at Arms BARRY. Yes, sir. I had a general contract with them.

Mr. BARKLEY. What were the terms of that contract?

Sergeant at Arms BARRY. They were to pay me $250 an article.

Mr. BARKLEY. That is what you expect?

Sergeant at Arms BARRY. That is what I expect; yes.

Mr. BARKLEY. You do not know how many will be published?

Sergeant at Arms BARRY. No; nothing was said about that.

Mr. BARKLEY. At that rate you will keep on as long as they will print them I suppose?

Sergeant at Arms BARRY. I do not know—unless I run out of subject matter. My motive is entirely the opposite to what seems to be regarded by those who read the article. It is pretty badly expressed.

Mr. BARKLEY. In other words, gathering the opinion from the context of the first paragraph, your intention was to defend the Senate and House by stating that only a few men sell their votes?

Sergeant at Arms BARRY. That is the motive that I had in mind. I have for a great many years heard these charges as to Members of Congress being crooks. It is taught in the schools here and in the universities. They teach them that. I know one young man who, since this matter came up to-day, told me that his professor taught him in school that Congressmen were crooks and took money for their votes, and all the young men growing up that I have talked to have that idea. It was entirely for the purpose of defending them from any such charges that I wrote the article.

Mr. BARKLEY. Let me ask, if you had had the intention of defending the Senate and the House could you not have said that if there were any such men they could be easily known? Why did you not use that language instead of stating—

> There are not many Representatives or Senators who sell their vote for money, and it is pretty well known who these few are.

Sergeant at Arms BARRY. I think, Senator, that was thoughtlessly used. I did not intend to say it definitely. I did not have in mind any person when I wrote it.

Mr. BARKLEY. You have had long experience as a writer?

Sergeant at Arms BARRY. Yes.

Mr. BARKLEY. You know, of course, what the ordinary citizen reading language of that sort would infer?

Sergeant at Arms BARRY. I do not think they would infer what seems to have been inferred generally here. I think they would have gone more on what it says.

Mr. BARKLEY. Reading that language now as it is published in the first paragraph of your article, what other interpretation would any ordinary intelligent person put upon it except that you knew of certain Members of Congress who had sold their votes, although there were only a few of them?

Sergeant at Arms BARRY. I do not know that they could make any other inference, but I did not intend to say that I knew them or that others knew them. My intention was to carry the statement that they would be so few that they would all be known to everybody, and probably were.

Mr. BARKLEY. In other words, you think the fewer they are the better they would be known, rather than if they were all guilty, it would be secret?

Sergant at Arms BARRY. Certainly it would be known if there were a few of them; but I had no other intention than as I have stated.

Mr. NORRIS. Mr. Barry, you say in this article:

> There are not many Senators or Representatives who sell their vote for money.

Could you draw any other implication from that than that there were several who did sell their votes for money?

Sergeant at Arms BARRY. Well, I believe that would be the natural inference.

Mr. NORRIS. Do you mean to say that is true?

Sergeant at Arms BARRY. I do not.

Mr. NORRIS. Well, why did you say it in this article if you were honestly trying to defend Congress against attacks which you believed to be false?

Sergeant at Arms BARRY. I can only say that I think it is rather thoughtlessly and carelessly written. If I had had an opportunity to correct it, to correct the proof of it, I think probably that would have been changed. It certainly would have been if anybody had called my attention to the language.

Mr. NORRIS. Following that language I have just read, you say:

> And it is pretty well known who those few are.

Can you give any intelligent reason to the Senate why you used that language unless you wanted to convey by the language I first read to you that there were some Senators and Representatives who did sell their votes for money?

Sergeant at Arms BARRY. No, sir; I can not.

Mr. NORRIS. Well, what explanation have you to give for that language—is it true or false?

Sergeant at Arms BARRY. I can not say.

Mr. NORRIS. Then, if you can not say, why did you make the charge which on the face of it leaves no doubt whatever? You have said here that—

> There are not many Senators or Representatives who sell their votes for money, and it is pretty well known who those few are.

Sergeant at Arms BARRY. I may have been mistaken in making that statement.

Mr. NORRIS. Is that statement true?

Sergeant at Arms BARRY. It may not be; I have no way of proving it.

Mr. NORRIS. You made such a statement without having any evidence—is that true?

Sergeant at Arms BARRY. I am unable to say.

Mr. NORRIS. If it is true, then give us the evidence. If you know anybody in the Senate or House who has sold his vote for money, give the name or the names of those Representatives or Senators now.

Sergeant at Arms BARRY. I do not think I shall do that, Senator.

Mr. NORRIS. I did not quite understand; speak a little louder, please.

Sergeant at Arms BARRY. I say I do not think I shall do that.

Mr. NORRIS. Do you mean to say, because you will not do it, that there are such men?

Sergeant at Arms BARRY. No, sir.

Mr. NORRIS. And you refuse to tell who they are?

Sergeant at Arms BARRY. No, sir; not at all.

Mr. NORRIS. Then what do you mean?

Sergeant at Arms BARRY. I do not know any.

Mr. NORRIS. Do you have any knowledge of any Member of the House or Senate who sells his vote or has sold his vote for money?

Sergeant at Arms BARRY. No, sir; I have not.

Mr. NORRIS. Do you have any knowledge of any Senator or Representative who has sold his vote for anything else besides money?

Sergeant at Arms BARRY. No; I have not any knowledge to that effect.

Mr. NORRIS. The Senator from Indiana did not read the portion following what he read to you. I had better read all of it, so as to get the sense:

> There are not many Senators or Representatives who sell their vote for money, and it is pretty well known who those few are:

but there are many demagogues of the kind that will vote for legislation solely because they think that it will help their political and social fortunes.

And then you follow that by this language:

This is what passed the constitutional amendment providing for the popular election of Senators, it is what passed the amendment giving suffrage to women, it is what passed the prohibition amendment, and it is what has made possible the almost sucessful attempt to hang the bonus on the American taxpayers.

Is it true, in your judgment, that there are demagogues in the House and Senate, and it is because of the votes of those demagogues that these amendments have been submitted to the people?

Sergeant at Arms BARRY. I most certainly do.

Mr. NORRIS. You think everybody who voted, then, for the constitutional amendment providing for the popular election of Senators was a demagogue?

Sergeant at Arms BARRY. I certainly do not.

Mr. NORRIS. Then how do you classify them?

Sergeant at Arms BARRY. In various ways. I classify them. I have classified them in the article, as I have explained, from my viewpoint.

Mr. NORRIS. I do not get your meaning. You say now that you think that it is because of the votes for that amendment cast by demagogues that they were enabled to pass it? If that be true, does it not follow that those who secured the passage of the amendment were, in your judgment, demagogues?

Sergeant at Arms BARRY. That depends. That seems to be your judgment, sir. I have not said that.

Mr. NORRIS. Yes; that would be my judgment if I made the statement you have made.

Sergeant at Arms BARRY. I have not stated it.

Mr. NORRIS. What have you got to say about classifying those who favored those amendments as demagogues?

Sergeant at Arms BARRY. I have not anything to say, sir.

Mr. NORRIS. Do you not think this language classifies them as demagogues?

Sergeant at Arms BARRY. It depends upon how it is read, how people read it as it is written there, but I have not any further classification to make.

Mr. NORRIS. Do you think that the members of the legislatures of the various States that approved those amendments were demagogues also?

Sergeant at Arms BARRY. Well, I have not any means of knowing, and I was not writing about the members of those legislatures. I was writing about what passes here.

Mr. NORRIS. It is your opinion, as I understand, and you so stated here, that that is what passed the constitutional amendment providing for the popular election of Senators. It is stated just above that there are many demagogues, and that that is the reason those constitutional amendments were passed. Is that your idea?

Sergeant at Arms BARRY. Well, I think that is my idea; yes. I think the people so understand it. There are a certain number of demagogues, and a certain number of demagogic votes that were cast for it.

Mr. REED. Mr. President, it is perfectly clear that Mr. Barry has charged some of the Members of the Senate and some of the Members of the House with bribery. It is also clear that he now says under oath that that charge is unsupported by any evidence, and that he is unable to give the name of any Senator or any Member of the other House whom he knows or believes to be guilty of bribery.

I think the natural instinct of every one of us would be to declare vacant the office of Sergeant at Arms and to do it instantly, but I am apprehensive that that would be taken by the country to be a hotheaded action, to be done in the heat of resentment by the Senate, more in revenge than in soberly considered punishment.

Therefore, Mr. President, I move that the matter be referred to the Judiciary Committee of the Senate with the request to that committee to report back to the Senate, as soon as it conveniently can, what action it recommends should be taken in Mr. Barry's case.

Mr. ASHURST. Mr. President, I join heartily in the suggestion of the Senator from Pennsylvania [Mr. REED]. He has to-day erected a permanent testimonial to his character as a lawyer by making that suggestion.

Mr. NORRIS. Mr. President, I do not feel that we ought to refer this matter to the Judiciary Committee, although I am a member of it. This is testimony taken in open court. It is like a contempt proceeding. We ought to act on the undisputed evidence of the man against whom action ought to be taken.

I am not afraid of being charged with doing a thing without proper consideration. The evidence is all in. Mr. Barry has not asked and does not ask that he have an attorney, or that we give him time, or anything of that kind. He has admitted what is stated here, which, as the Senator from Pennsylvania truly says, is a charge against Members of the Senate and the House of bribery without any proof to sustain it.

It seems to me, especially since Mr. Barry is one of the officials of the Senate, has held office in the Senate here for a long time, and has openly admitted writing this article, that it is perfectly useless to take evidence. We have it all in now. We ought to act now, and I move, Mr. President, as a substitute for the motion made by the Senator from Pennsylvania that the office of Sergeant at Arms is hereby declared vacant.

Mr. GEORGE. Mr. President——

The PRESIDENT pro tempore. The question is on agreeing to the amendment in the nature of a substitute offered by the Senator from Nebraska.

Mr. NORRIS. Mr. President, just a moment. I want to change the motion.

I move, as a substitute, that Mr. Barry be, and he is hereby, removed from the office of Sergeant at Arms of the Senate.
